1-1 Questions and Answers

Q1: Kindly let us know the name of the current vendor providing the same services or this is a new requirement?

A1: We use a number of different vendors for technology consulting. This is the first time we've gone out to bid to select a pool to draw from for these types of services.

Q2: Is there any budget limitations for this project?

A2: The work will all be project based and will depend on what projects are prioritized and funded.

Q3: Could you provide us total spending covered for each category in last contract?

A3: We are developing a pool of technology consultants. We are estimating a range of spending for each project in the amount of \$10,000 to \$100,000.

Q4: Is this a new requirement as it appears, or are there companies supporting some aspect of the ongoing development? Who are they?

A4: We currently use eNamix to supply several consultants based on project needs, but we want to create a pool with multiple potential suppliers.

We manage the consultants as they work on our projects. We are not looking for managed services.

Q5: What is the expected Task duration in months of any work to be accomplished? Will any task be 12 months in duration or longer?

A5: Most projects will range from six to twelve months.
