Additional Career Technical Education Research

The colleges utilized the services of EMSI (Economic Modeling Specialist, Inc.) over the last year. Both colleges are expanding their ability to understand students' earnings and job outcomes after they attend college. The data matching services provided by EMSI allow the colleges to see employers that hire the colleges' students and have the potential to become strategic partners. The college research offices submit files to EMSI to match our students to their job databases. EMSI returns information to the college on our students' career or area of work and income levels. Although the match rate of our students' data to employers was not high, the colleges continue to explore avenues to increase understanding of career outcomes for our programs.

A separate but valuable outcome of the EMSI service was the ability to identify highly successful alumni students. This information can be provided to the Foundations to support their outreach and marketing efforts that target alumni giving.
