

Meeting of the Board of Trustees

November 14, 2016

CALL TO ORDER: 5:00 P.M.

1.0 PROCEDURAL MATTERS

1.1 Call to Order

1.2 Public Comments

*Members of the public may address the Board on items listed to be discussed in **closed session**. If you wish to address the board on a closed session item, please complete a yellow form entitled, "Request to Speak" and submit it to the board's Executive Assistant. These forms are available outside the board room. **Speakers are limited to two minutes each.***

RECESS TO CLOSED SESSION FOR DISCUSSION OF THE FOLLOWING:

- 1.3 Student Discipline (Education Code Section 72122)(1 matter)
- 1.4 Public Employee Employment, Discipline, Dismissal, Release (Government Code Section 54957(b).)
 - A. Public Employee Employment, Evaluation (Government Code Section 54957(b).) (15 matters)
 - 1. Dean, Counseling Services (IVC)
 - 2. Vice President for Student Services (IVC)
 - 3. Director, Research, Planning and Accreditation (IVC)
 - 4. District Director, Research, Planning and Data Management (DS)
 - 5. Dean, Economic Workforce Development and Business Services (SC)
 - 6. Director, Research, Planning and Accreditation (SC)
 - 7. Interim Vice President for Instruction (IVC)
 - 8. Dean, Liberal Arts (SC)
 - 9. Assistant Dean, Health Sciences & Human Services/Director of Nursing (SC)
 - 10. Dean of the Arts (IVC)
 - 11. Dean, Health Sciences & Human Services (SC)
 - 12. President (IVC)
 - 13. Dean, Advanced Technology and Applied Science (SC)
 - 14. Dean, Social & Behavioral Science (SC)
 - 15. Dean, Math, Science & Engineering (IVC)
 - B. Public Employee Discipline, Dismissal, Release (Government Code

- Section 54957(b.)(2 matters)
- 1.5 Conference with Labor Negotiators (Government Code Section 54957.6)
 - A. Police Officers Association
Agency Designated Negotiator: David P. Bugay, Ph.D.
 - B. SOCCCD Faculty Association
Agency Designated Negotiator: David P. Bugay, Ph.D.
 - C. California School Employees Association (CSEA)
Agency Designated Negotiator: David P. Bugay, Ph.D.
 - 1.6 Conference with Legal Counsel (Government Code Section 54956.9)
 - A. Anticipated Litigation (Government Code Section 54956.9(d)(2), (e)(1)
(4 potential cases)

RECONVENE OPEN SESSION: 6:30 P.M.

2.0 PROCEDURAL MATTERS

2.1 Actions Taken in Closed Session

2.2 Invocation

Led by Trustee Jim Wright

2.3 Pledge of Allegiance

Led by Trustee Barbara Jay

2.4 Public Comments

*Members of the public may address the Board on any item on the agenda at this time or during consideration of the item. Items not on the agenda that are within the subject matter jurisdiction of the Board may also be addressed at this time. If you wish to address the board, please complete a yellow form entitled, "Request to Speak" and submit it to the board's Executive Assistant. These forms are available outside the board room. **Speakers are limited to up to two minutes each.***

3.0 REPORTS

3.1 Oral Reports: *Speakers are limited to up to two minutes each.*

- A. Board Reports
- B. Chancellor's Report
- C. College Presidents' Reports (*Written Reports included in Section 8.0*)
- D. Associated Student Government Reports
- E. Board Request(s) for Reports

4.0 DISCUSSION ITEMS

4.1 SOCCCD: Accreditation Report Draft

Dr. Tod A. Burnett, President, Saddleback College, and Dr. Glenn R. Roquemore, President, Irvine Valley College, will present information on the draft accreditation report.

5.0 CONSENT CALENDAR ITEMS

All matters on the consent calendar are routine items and are to be approved in one motion unless a Board member requests separate action on a specific item, and states the compelling reason for separate action.

5.1 SOCCCD: Board of Trustees Meeting Minutes

Approve minutes of Regular Meeting held on October 24, 2016.

5.2 Saddleback College: New Program for the 2016-17 Academic Year and New, Revised, and Deleted Courses for the 2017-18 Academic Year

Approve the proposed curriculum changes for the 2016-17 and 2017-2018 academic years at Saddleback College.

5.3 Saddleback College: Community Education, Spring 2017

Approve the Community Education courses, presenters, and compensation.

5.4 Saddleback College: Grant Acceptance, National Science Foundation Inclusion across the Nation of Communities of Learners of Underrepresented Discoverers in Engineering and Science (NSF INCLUDES)

Accept this award of \$299,981 from the National Science Foundation for the NSF INCLUDES pilot grant in support of the STEM Core Initiative for the period of October 1, 2016 through September 30, 2018.

5.5 Saddleback College and Irvine Valley College: Speakers

Approve general fund honoraria for speakers for events and/or classes at Saddleback College and Irvine Valley College.

5.6 SOCCCD: Irvine Valley College and Saddleback College, Amendment No. 2, Digital Catalog Software, Digital Architecture

Approve Amendment No. 2 with Digital Architecture for a one-year extension beginning November 20, 2016 and ending November 19, 2017, in an amount not to exceed \$25,493 for annual operational fees.

5.7 SOCCCD: Irvine Valley College, Award of Bid: Chemistry Glassware, Bid No. 331

Award Bid No. 331 for Chemistry Glassware for FY 2016-2017 for a total amount of \$94,162.84, to the vendors listed on with an option for a two-year renewal period.

- 5.8 **SOCCCD: Trustees' Requests for Attending Conferences**
Approve trustees' requests for attending conference(s).
- 5.9 **SOCCCD: District-wide Sustainability/Energy Plan Consultant Services, Harley Ellis Devereaux Corporation**
Approve the district-wide Sustainability/Energy Plan Consultant Services agreement with Harley Ellis Devereaux Corporation, in the amount of \$201,695.
- 5.10 **SOCCCD: Budget Amendment: Adopt Resolution No. 16-30 to Amend FY 2016-2017 Adopted Budget**
Adopt Resolution No. 16-30 to amend the FY 2016-2017 Adopted Budget.
- 5.11 **SOCCCD: Transfer of Budget Appropriations**
Ratify the Transfer of Budget Appropriations.
- 5.12 **SOCCCD: October 2016 Change Orders / Amendments**
Ratify the change orders and amendments as listed.
- 5.13 **SOCCCD: Purchase Orders and Checks**
Ratify the purchase orders and checks as listed.
- 5.14 **SOCCCD: September - October 2016 Contracts**
Ratify contracts as listed.

6.0 GENERAL ACTION ITEMS

- 6.1 **Saddleback College: Study Abroad Program to Santander, Spain, from June 30, 2017 to July 31, 2017**
Approve the Saddleback College study abroad program: Spanish Language Studies in Santander, Spain from June 30, 2017 to July 31, 2017 as summarized, and directs the administration to execute the Educational Tour/Field Study Travel Contractor Agreement with Travel and Education for coordinating all travel agreements.
- 6.2 **SOCCCD: Advanced Technology & Education Park (ATEP) Utilities and Infrastructure Phase I Project, Award of Bid No. 20, Griffith Company**
Award Bid No. 20, Advanced Technology & Education Park (ATEP) Utilities and Infrastructure Phase I project, and approve the agreement with Griffith Company, in the amount of \$5,353,750.
- 6.3 **SOCCCD: Board Policy Revision: BP-4202 Transfer of Sick Leave for Classified Personnel, BP-4420 Enrollment Fee Reimbursement for Eligible Employees, BP-5130 Financial Aid, BP-5200 Student Health Services, BP-5625 Students in the Military**
Approve the board policies as shown.

- 6.4 **SOCCCD: Board Policy Revision: BP-109 Board Education**
Accept for review and study the board policy as shown.
- 6.5 **SOCCCD: Academic Personnel Actions – Regular Items**
Approve New Personnel Appointments, Additional Compensation: General Fund, Additional Compensation: Categorical/Non-General Fund, Reclassification, Extension of Administrative Temporary Assignment, Workload Banking.
- 6.6 **SOCCCD: Classified Personnel Actions – Regular Items**
Approve New Personnel Appointments, Authorization to Establish and Announce a Classified Position, Reclassification, Authorization to Revise the Classified Temporary Non-Bargaining Unit Salary Schedules, Change of Status, Out of Class Assignments, Leave of Absence, Resignation/Retirement/Conclusion of Employment, Volunteers.
- 6.7 **SOCCCD: Sabbatical Rescindment**
Approve request from faculty member to rescind approval for Fall 2017 sabbatical leave.
- 6.8 **SOCCCD: Resolution No. 16-31 Retirement Incentive Program & Public Agency Retirement Services (PARS) Agreement**
Adopt Resolution No. 16-31 PARS Supplementary Retirement Plan (SRP) and approve the agreement for administrative services through PARS.

7.0 REPORTS

- 7.1 **Saddleback College and Irvine Valley College: Speakers**
A listing of speakers for events and/or classes at Saddleback College and Irvine Valley College.
- 7.2 **SOCCCD: Basic Aid Report**
Report on projected receipts and approved projects.
- 7.3 **SOCCCD: Facilities Plan Status Report**
Status of current construction projects.
- 7.4 **SOCCCD: Monthly Financial Status Report**
Report for the period ending September 30, 2016.
- 7.5 **SOCCCD: Quarterly Investment Report**
Report for the period ending September 30, 2016.
- 7.6 **SOCCCD: Quarterly Pension Stabilization Trust Fund**
Report is for the period ending September 30, 2016.

8.0 REPORTS FROM ADMINISTRATION AND GOVERNANCE GROUPS

*Reports by the following individuals and groups may be written and submitted through the docket process prior to distribution of the Board agenda packet. **Speakers are limited to two minutes each.***

- A. Saddleback College Academic Senate
- B. Faculty Association
- C. Irvine Valley College Academic Senate
- D. Vice Chancellor, Technology and Learning Services
- E. Vice Chancellor, Human Resources
- F. Vice Chancellor, Business Services
- G. Irvine Valley College Classified Senate
- H. California School Employees Association
- I. Saddleback College Classified Senate
- J. Police Officers Association

9.0 ADDITIONAL ITEMS

ADJOURNMENT (or continuation of closed session if required): **9:00 P.M.**

TO: Board of Trustees

FROM: Debra L. Fitzsimons, Interim Chancellor

RE: Saddleback College and Irvine Valley College: Accreditation Update

ACTION: Approval

BACKGROUND

In accordance with the Accrediting Commission for Community and Junior Colleges (ACCJC) requirement that a Self Evaluation Report be submitted by the Colleges in the seventh year since the last evaluation team visit, Saddleback College and Irvine Valley College have completed drafts of their Self Evaluation Reports. The reports must be submitted to the ACCJC by December 2016. During the production of these reports, there was broad participation throughout the District and the Self Evaluation Reports reflect accurately the status and progress of both colleges since the ACCJC's last visit.

STATUS

Attached please find a joint PowerPoint presentation marked as Exhibit A and two PDF files marked as Exhibits B and C with the most recent drafts of all the standards currently posted on the colleges' SharePoint sites. The PowerPoint presentation focuses on the highlights from the self-evaluation reports, the current state of the draft reports, and anticipated report submission deadlines to the ACCJC.

The Saddleback College Self Evaluation Report is marked as Exhibit B and the Irvine Valley College Self Evaluation Report is marked as Exhibit C.

Saddleback College

Presentation to Board of Trustees
November 14, 2016

Compliance with Accreditation Requirements, Policies, and Standards

- Compliant with all 21 Eligibility Requirements!!
- Meet requirements for Standards I, II, III, and IV (generally)
- Working towards full compliance with ACCJC Commission Policies and Federal Regulations

Areas Requiring Additional Attention

- Academic Achievement Standards of Performance Policy is 75% fulfilled, will focus on remaining 25%. (CP & Federal Regs)
- Adoption of Student Complaint Process– AR-5530 (CP & Federal Regs)
- Systematization of DE Training, Support, etc. (CP & Federal Regs)
- Completion of GE Handbook (Standard II)
- Systematic Evaluations of All Personnel (Standard III)
- SOCCCD “Barriers Outcomes” need to be completed (Standard IV)

Quality Focused Essays: 3-5 Year Priority

QFE #1: Student Success Metrics

- ☐ Setting student success metrics: minimum thresholds, goals and targets will undergo expansion throughout college planning and program review.
- ☐ Institution-set standards developed at the program level.

QFE #2: Online Education Plan

- ☐ Systematization of professional development training specific to DE
- ☐ Strengthen and/or develop student support services specific to DE
- ☐ Formalize key institutional practices that impact success of DE, including ADA compliance

What happens next?

December 2016

- Report finalized and sent to duplicating
- Report and evidence posted on college website
- Bound copies of report mailed to ACCJC by Dec. 15th
- Accreditation Steering Cmte begins site visit planning

January 2016

- Visiting team assembled & trained by ACCJC
- Pre-Visit Coordination w/ visiting team chair
- Production of visiting team brochure w/ bios
- Prof. Development Week presentation
- Finalizing site visit logistics and interviews

Spring 2017

Site Visit:

February 27 –
March 2, 2017

Recap

- ✓ Heavy lifting complete
- ✓ Filling gaps found in self-evaluation in advance of visit
- ✓ Tedious, refining, and logistical work pending

A special “Thank You” to the **over 300 unique visitors** to our accreditation feedback website. Thank you for reviewing our draft for accuracy and for providing feedback!

Irvine Valley College Accreditation

Self Evaluation Report Highlights

November 14, 2016

Task	Status
Technical Edits	Ongoing
Verification: Eligibility Requirements	Complete
Campus and Community Review and Comment Period	Ends November 11, 2016
Report Submission to the ACCJC	Due November 21, 2016

Online Education

- Professional development
- Online course review
- LMS migration to Canvas
- DE curriculum approval process

Resource Request Process

- Expedite and simplify the process
- Maintain transparency

Areas Being Addressed

Student Learning Outcome Updates

Actions Taken	Faculty asked to update TracDat
Status	Ongoing

Program Reviews

Actions Taken	Faculty asked to update TracDat
Status	Ongoing

Administrative Unit Reviews

Actions Taken	Managers asked to update TracDat
Status	Ongoing

Students Rights/Grievance Policy

Actions Taken	Discussion initiated
Status	Ongoing

Report Highlights

Standard I:
Mission, Academic Quality and Institutional Effectiveness,
and Integrity

Standard II:
Student Learning Programs and Support Services

Standard III:
Resources

Standard IV:
Leadership and Governance

Item 4.1 SOCCCD: Accreditation Report Draft

Dr. Tod A. Burnett, President, Saddleback College, and Dr. Glenn R. Roquemore, President, Irvine Valley College, will present information on the draft accreditation report.

An updated version of Item 4.1, Exhibit B was submitted to the Board of Trustees at the November 14, 2016 meeting.

The former version originally posted with the agenda on November 10, 2016 is now obsolete.

The Accreditation Self-Study Report of Saddleback College

Draft Copy 11/14/16

Presented to the Western Association of Schools and Colleges in Support of Application for Reaffirmation of Accreditation

**South Orange County Community College District
Saddleback College**

**28000 Marguerite Parkway
Mission Viejo, California 92692**

**South Orange County Community College District Board of Trustees Thomas
Barbara J. Jay, Timothy Jemal, David B. Lang, Marcia Milchiker, T.J. Prendergast III, Terri
Whitt, James R. Wright. Jonathan Forde, Student Member.
Dr. Debra L. Fitzsimons, Acting Chancellor**

**Saddleback College
Tod A. Burnett, Ed.D., President**

Introduction:

Saddleback College, a public two-year community college, first opened its doors in fall 1968. What was then a small rural college with 1,536 students in 11 buildings on a few acres has grown into a large urban college on a 200-acre campus serving more than 25,000 students each semester.

As the College grew, so did its reputation for excellence, which attracted teachers and administrators from throughout the United States. Together, the College's educators and administrators have created a dynamic, constantly evolving learning environment where students are challenged to fulfill their potential and encouraged to achieve their goals. The excellence of the College's programs and faculty can best be measured by the success of the College's alumnae/i in their academic pursuits at four-year universities and in the professional world. The first priority of the College is student success. From its renowned educational programs, to its stellar student services, the College works tirelessly to ensure that students learn and achieve their goals, whether those goals include improving their English abilities, transferring to a four-year university, or retooling for a new career. To serve the diverse needs of its students, the College offers courses at multiple locations and in a variety of formats (face-to-face, online, hybrid, full term, and short term). Innovative and experiential programs such as Study Abroad, Cooperative Work Experience, Service Learning, and an Honors Program are also offered. Student services are also geared to the diversity of our student population; these services include Extended Opportunity Programs and Services (EOPS), the International Students Office, Disabled Students Programs and Services (DSPS), the Child Development Center, and the Veterans Education and Transition Services (VETS) program.

The College is a comprehensive institution, fulfilling all four missions of the community college system as outlined in AB 1725; these missions include baccalaureate-quality transfer education, career and technical education, basic skills courses, and lifelong learning opportunities. The College offers over 300 associate degrees, certificates, and occupational skills awards in 190 programs. In addition, the College also offers a huge selection of student clubs and activities, such as the Associated Student Government, a champion forensics team, an award-winning student newspaper, a radio station, and a television station.

In addition to being a center of learning, the College has developed into one of south Orange County's premier cultural and recreational sites. The campus hosts film festivals, music and dance concerts, and lectures by renowned newsmakers and scholars. It is also home to an award-winning theatre arts program. Its men's and women's intercollegiate athletic teams have achieved a solid reputation for success and hold more than 100 conference, state, and national titles. On-campus sports facilities include a golf driving range and putting greens, an aquatics

complex, a football stadium, baseball and softball fields, gymnasium and fitness facilities, tennis courts, and an all-weather track.

Linking education with community growth and vitality, the College has become an integral part of the south Orange County landscape. After nearly five decades, the College continues to strengthen its ties with the communities it serves and to help residents fulfill their dreams and aspirations.

History of Saddleback College

The history of the College can best be understood by separating it into eight distinct periods. Each period is characterized by significant organizational changes.

Period I (1967-1979)

From its founding in 1967 through 1979, the College and the District, then known as the Saddleback Community College District, operated as a single entity under a chief executive officer (CEO) who served as superintendent of the District and president of the College. At the time, south Orange County was a sparsely populated region of southern California, and the College was able to serve the needs of the community. During this period, however, College enrollment grew dramatically. In just one year, from fall 1974 to fall 1975, enrollments increased by 78 percent. Because of this precipitous increase, the District began to make plans for the opening of a satellite campus in the northern portion of the service area.

Period II (1979-1981)

In 1979 a satellite campus was opened 11 miles to the north in the city of Irvine. Saddleback College was designated as the main campus, and the satellite was designated as the north campus. Both operated as components of the single college, which retained the Saddleback College name. The CEO continued to serve as the superintendent-president. A dean of instruction headed the main campus and also served as assistant superintendent of the District.

Period III (1981-1983)

In 1981 the north campus was elevated from satellite to full-campus status, altering the organizational structure to a multi-campus, single-college district. The superintendent's position was changed to that of a chancellor, and presidents were appointed to serve as the CEOs at each campus. A new chancellor was appointed in 1982.

Period IV (1983-1985)

Discrete District offices were established in 1983 and were later expanded by the chancellor.

The name of the main campus was changed to Saddleback College South, and a new president was appointed. The designation of the north campus was changed to Saddleback College North.

During this period, certain functions were centralized under the District's authority, while others were decentralized and became the responsibility of each campus.

Period V (1985-1992)

In 1985 the Board of Trustees (BOT) adopted a new organizational structure and established a multi-college district. Saddleback College South emerged with its own identity as Saddleback College, while Saddleback College North was renamed Irvine Valley College (IVC). In 1986 a new chancellor was appointed and, in conjunction with the College presidents, arranged for the further decentralization of District functions and increased decision-making authority for the colleges.

Saddleback College enjoyed a stable organization, consistent leadership by the institution's president of nine years, and an effective system of governance. Although the College

shared the financial concerns of other California community colleges at the time, as well as the normal tensions inherent in any multi-college district, this period of stability permitted the College to focus its attention upon educational and institutional development.

Period VI (1992-2004)

The period between 1992 and the 2004 accreditation self-evaluation was marked by considerable administrative instability at both the College and the District. During this time frame, there were six changes in the presidency, four changes in the chancellor's position, and multiple changes in other management positions, such as the vice president for instruction and the vice president for student services, at the College.

In 1996 the BOT initiated a review of the District name, and in April 1997 the board approved a name change from the Saddleback Community College District to the South Orange County Community College District (SOCCCD) in order to reflect the larger geographic base of the District.

The BOT also made sweeping adjustments in the administrative structures at both Saddleback College and IVC in July 1997. This resulted in the transfer of five Saddleback College deans to IVC and the expansion of duties for the four deans who remained at Saddleback with each dean now in charge of very large "mega-divisions." When it became evident that the reduction in the number of deans at the College was too severe, a number of additional organizational changes were instituted. With input from all segments of shared governance, the College recommended, and the BOT agreed, to realign responsibilities and expand the number of deans.

Such intense and profound change had a strong impact on all levels of the organization. This period served as a litmus test of the true mettle of the College's administration, faculty, and staff, and the institution continued to strive toward excellence in its mission.

Period VII (2004-2010)

Between 2004 and 2010, the administrative structure was considerably more stable than in previous periods. The 2004-2005 academic year was the first in more than a decade in which there were no freshmen deans. There was a change in presidency due to the retirement of the previous president, who was an employee of the College for over 30 years and served as president for the last four of those years. The current president was hired in 2008. The previous chancellor resigned in 2010 and was replaced by the deputy chancellor, who had been an employee of the district for 11 years. The vice president for student services retreated to the faculty of IVC in April 2010 and the vice president for instruction was hired as the president of Fullerton College. This opened up a new era of change at both the District and the College.

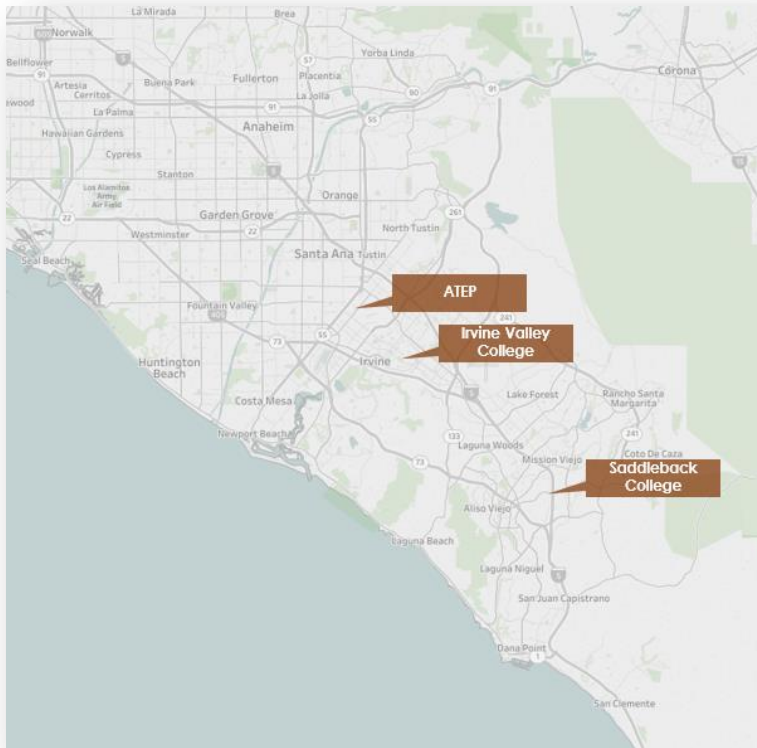

Period VIII (2010 to the present)

The period since the last accreditation self-evaluation has once again been marked by significant change. Adjustments to the administrative structure included the addition of a third vice president in 2012—the vice president for administrative services—and an assistant vice president for institutional effectiveness in 2016. There has been considerable turnover at all levels of District and College administration. Only three of the current deans were hired into their positions prior to 2010. The current vice president for student services was hired in 2010, and the current vice president for instruction was hired in 2013. These changes have accelerated throughout the period, culminating in the resignation of the chancellor in fall 2016 and the resignation of the president at the end of spring 2017. Therefore, both the District and College will each have a new CEO in 2017.

Description of Service Area

Community

Saddleback College, located in the city of Mission Viejo, is the older of two separately accredited colleges in the SOCCCD, which also includes Irvine Valley College (IVC), in the city of Irvine, as well as the new Advanced Technology & Education Park (ATEP), located in the city of Tustin. Overall, the College's major service area, sister campus, and District facilities are situated in a desirable location near stunning coastlines, quality K-12 school districts, major freeways, booming businesses, and growing metropolitan areas.

Map showing the location of Saddleback College, its sister campuses, and the surrounding communities.
Source. Office of Planning, Research and Accreditation 2016.

When it was founded in 1967, the College's neighboring areas were sparsely populated bedroom communities. Despite the Great Recession and the collapse of the housing market in 2008 and the state budget crisis in 2009, the local area has continued to grow slowly in the gradually renewing economy. Recent development and reinvestment of single-family, multi-family, and commercial real estate properties continues to draw new residents and businesses alike. As recently as last year, the growth in single and multi-family housing and retail centers has brought a fresh change after a five-year period of largely stagnant housing starts and retail development.

Community Demographics

The College's service area includes the cities and communities of Aliso Viejo, Capistrano Beach, Dana Point, El Toro, Ladera Ranch, Laguna Beach, Laguna Hills, Laguna Niguel, Laguna Woods, Lake Forest, Mission Viejo, Rancho Santa Margarita, San Clemente, San Juan Capistrano, and Trabuco Canyon. These cities and unincorporated areas cover 126.3 square miles of south Orange County (CSU Fullerton, 2014 Orange County Progress Report).

The College's service area is home to over 600,000 total residents (EMSI 2015 Q3) of whom approximately 500,000 are 15 years of age or older (2010-2014 American Community Survey 5-

Year Estimates; EMSI 2015 Q3). The adult-aged population in the College's service area is projected to grow about 3.6 percent by the year 2020 and is therefore expected to grow by 0.6 percent annually over the next four years (2011-2031 Saddleback College Education Masterplan).

As of 2014, 47.9 percent of residents were male and 52.1 percent female (2010-2014 American Community Survey 5-Year Estimates). In addition, the ethnic diversity of the service area is as follows (EMSI 2015 Q3):

0.19%	Native Hawaiian/Pacific Islander
0.17%	American Indian/Alaskan Native
1.29%	Black/African American
3.06%	Other
10.03%	Asian
20.33%	Hispanic (Alone or with another Race)
64.92%	White, Non-Hispanic

The service area is experiencing growth in ethnic diversity. The Hispanic/Latino ethnic group has increased 7 percent over the last five years (EMSI 2015 Q3 comparison data) while Asian residents have increased by 11 percent and Black/African American residents have increased by 10 percent.

The age profile of local residents continues to be a matter of concern in the service area. There has been a decline in the school-age population (5-19 years old) in the last five years. This is a potential problem for education providers like the College as it relates to a shortage in the future supply of students. Currently the young adult population (20-34 years old) has increased in the last five years, but the pace of growth is slow. In the short term, the College might benefit from the slowly growing young adult population. In the long term, however, the shrinking elementary and high school population will pose a problem for the College in terms of total enrollments (Southern California Association of Governments). Furthermore, an influx of adults over 60 years old is anticipated as the baby boomer generation is expected to move to places like south Orange County for retirement living. The College's Emeritus Institute, which provides free education for older adults in order to promote lifelong learning, is an example of the ways in which the College continues to meet the needs of the changing local environment and highlights one of the ways that the College is preparing for the future.

Economically, the service area has changed in the following ways in the past five years:

- The south Orange County population has experienced 2 percent growth
- Transportation infrastructure has not met the needs of a growing population
- The regional job market has had a 10.3 percent increase
- Unemployment rates have decreased

- Housing prices have continued to escalate, while affordable housing is shrinking
- Students living with parents for more affordable housing has increased
- Growth in the aging population has continued
- Need for workforce training to support middle and high-end jobs has increased

Education attainment levels in the service area continue to be very high. Completion of high school in the service area is very strong as 94.6 percent of the population has at least a high school degree. In terms of post-secondary education, on average, the service area has a population where 31.1 percent of adults 25 or older have a bachelor's degree and another 18.4 percent have a graduate degrees; this means that nearly half of the population has a bachelor's degree or higher (2010-2014 American Community Survey 5-Year Estimates). These rates stem from strong high school graduation rates for the two major feeder high school districts for the College (refer to chart X below).

HIGH SCHOOL GRADUATION RATES OF FEEDER SCHOOLS FOR SADDLEBACK COLLEGE

Source. California Longitudinal Pupil Achievement Data System (CALPADS)

During the recent economic recovery, employment rates for workers with a high school diploma have not fared as well as employment rates for those with a bachelor's degree or higher. In consideration of this disparity, the College has offered a variety of educational opportunities to promote economic and workforce development for those seeking high school completion. Adult education programs serve the region by collaborating with the Saddleback Valley Unified School District and the Capistrano Unified School District to provide adult education course in the areas of AESL (Adult English as a Second Language), citizenship, basic skills and high school equivalency, career and technical education (CTE), and pre-apprenticeship programs. Students may also gain educational credit through the Cooperative Work Experience/Work-Based Learning (CWE) program in which students can obtain a variety of work-related experiences for their educational pursuits. This program promotes collaboration and dialogue between the College and the employer or supervisor of the student. In the future, statewide initiatives, such as

the Strong Workforce initiative, will further promote skill-building opportunities through CTE pathways and programs.

The College feeds two major public institutions for students seeking to transfer to a four-year institution: the University of California, Irvine, and California State University, Fullerton. However, since 2008, increased student fees and tuition, escalating housing costs, and growth in the number of impacted academic programs in public four-year institutions have decreased the volume and rate of student transfer to these institutions (refer to chart below). The College's Transfer Center has responded by continuing to promote transfer-outs by referring students to colleges beyond the two local public four-year institutions. In doing so, the College has experienced significant growth in the volume of transfers to private and out-of-state institutions. In fact, transfers to private and in-state institutions have increased tenfold since the year 2000. Such findings indicate that the College is responsive to external forces that may impair four-year transfers in the local post-secondary education market.

Enrollment Trends and Description of Student Population

Student enrollment increased dramatically during the first 20 years of the College's existence. During the second 20-year period, enrollment remained fairly constant; numbers fluctuated between 22,000 and 24,000 students each fall with the exception of one significant dip to just over 19,000 enrolled students in fall 1995. Following the Great Recession, there has been a

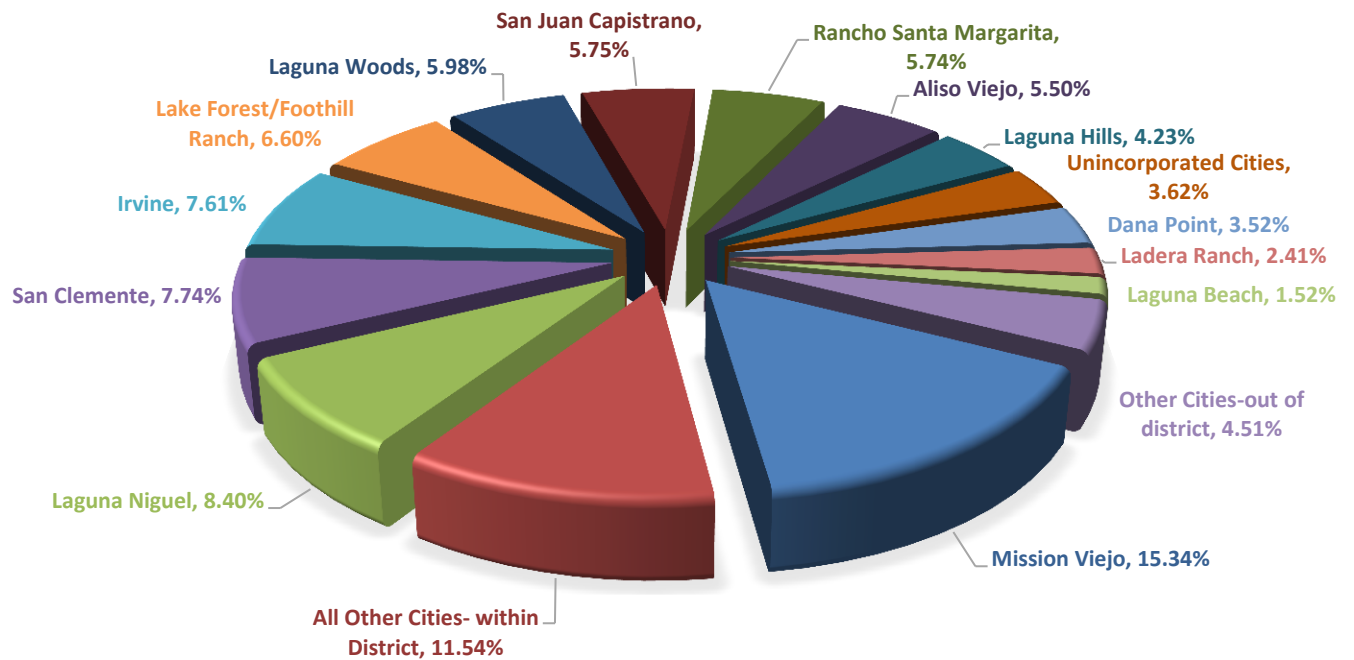

noticeable increase in students; fall enrollments climbed to over 25,000 in 2008. Following a dramatic peak of enrollments in 2011, the College has experienced some enrollment decline.

Students from throughout the District's service area are drawn to the College. The chart below shows the cities in which the College's student population resided during the 2015-2016 academic year. As indicated by the chart, 88.5 percent of all students come from within the District.

WHERE SADDLEBACK COLLEGE STUDENTS RESIDE

Source. SOCCCD inFORM Data Warehouse

The ethnic composition of the student population closely represents the surrounding community. In fact, the College's Student Equity Plan (SEP) (In-5) illustrated that there are no access issues in terms of disproportionate impact to historically underrepresented ethnic groups. Over the last five years, the College has seen a shifting demographic that illustrates a decrease in the proportions of White, Non-Hispanic students and increased quantities of students from mixed, Hispanic/Latino, and Asian ethnicities.

SADDLEBACK COLLEGE STUDENT ETHNIC DIVERSITY

The portion of males to females has not changed dramatically in the last five years. Females continue to outnumber males by about seventeen percent.

SADDLEBACK COLLEGE GENDER DIVERSITY

Source. Institutional Effectiveness Annual Report (IEAR) inFORM Data Warehouse

The College has seen modest increases in the number of students who are older than 59 years of age in the last five years. Concomitantly, the proportion of students from the 18-21 age group has been slightly decreasing. As discussed previously, such findings are in line with larger economic trends, where demographic projections indicate lower numbers of high school aged students and thus lower numbers of students in that age group attending the College. Similar to economic reports, the College has seen a very modest uptick in the young adult population aged 22-29.

SADDLEBACK COLLEGE STUDENTS AGE GROUP DIVERSITY

Student Age Groups	Fall 2010	Fall 2011	Fall 2012	Fall 2013	Fall 2014	Fall 2015

Student educational goals reflect the diversity of programs offered at the College. The largest percentage of students enroll at the College in order to transfer to four-year colleges and universities, while other students enroll to attain a degree or certificate without transfer, for CTE, for career advancement, for the improvement of their basic skills, or for personal development. Meanwhile, a fair number of students have declared “undecided” as their educational goal. Such findings point to the need to understand the transient nature of educational goal-setting among the population of millennials, generation Y students, and generation X students.

Educational Goal	Fall 2010	Fall 2011	Fall 2012	Fall 2013	Fall 2014	Fall 2015
Transfer	12,187	12,971	13,152	13,286	12,908	13,119

Employee Demographics

The College has seen gradual growth in employees over the past six years. The main contribution to this growth is the increased numbers of full and part-time faculty. The largest category of employees is part-time faculty, followed by classified staff, full-time faculty, and then administrators and managers.

SADDLEBACK COLLEGE EMPLOYEES BY ROLE

Employee Role	Fall 2010	Fall 2011	Fall 2012	Fall 2013	Fall 2014	Fall 2015
Educational Administrator	14	16	19	21	20	20
Full-time Faculty	225	208	229	232	238	249
Part-time Faculty	554	632	607	591	604	640

Saddleback Total	1,107	1,170	1,157	1,141	1,176	1,209

Source. California Community College Chancellor's Office (CCCCO) DataMart

The gender diversity of employees at the College has not improved. In fact, the College continues to increasingly have more female employees than male employees. Given the regulation within the SOCCCD that an Equal Employment Opportunity representative is at every hiring committee [fact check this], the increase in female employees is unexpected. While there has been a steady split between male and female academic administrators over the past six years, the College is hiring more female full and part-time faculty. In contrast, the College is seeing a gradual decrease in the number of female classified staff members concurrent with the steady state of classified male staff members.

SADDLEBACK COLLEGE EMPLOYEE DIVERSITY BY GENDER

Source. California Community College Chancellor's Office (CCCCO) DataMart

In terms of employee diversity with respect to ethnicity, there are a number of positive changes that have taken place. First, the increase in Hispanic/Latino academic administrators has made this employee group more reflective of the local population. Classified staff also has become increasingly diverse. Overall, Asian employees are underrepresented in comparison to the local population. The Office of Human Resources at the District has an Equal Opportunity Plan that serves as a recruiting guide to ensure fairness in recruitment and hiring practices.

Note. Percentages are calculated by role.

With respect to employee age groups, there have been modest variations in the past six years. The demography shows a shifting age profile; whereas the largest share of administrators was once the 55-59 age group, the largest group is now 60-64. Interestingly, the College has also brought on a wide array of younger administrators across a broad spectrum of age groups. Among full and part-time faculty, age distributions have stayed the same. For classified staff, a shift in lower numbers of those aged 18-34 has been offset by a higher number of those aged 50-54.

Presentation of Student Achievement Data and Institution-Set Standards

Student Achievement Data

As reflected in Standard I.B.3, the College widely and publicly provides achievement outcomes on important indicators of student success on its website. The college's Office of Planning, Research and Accreditation (OPRA) also widely presents (In 1-01) achievement outcomes on the College's performance on the CCCO Scorecard for the following constituent groups:

- Consultation Council (In 1-02)
- Planning and Budget Steering Committee (In 1-03)
- SOCCCD Board of Trustees (In 1-04)

OPRA also maintains a website that hosts a compendium of publicly available analytical reports on achievement outcomes within the College Data and Reports microsite of the research website (In 1-05). These reports are not only maintained publicly, but updated annually. These reports are externally available to encourage anyone at the College to use the information for both short and long-term planning. Because data is disaggregated in the longitudinal cohort studies, the findings are also used to inform the SEP (In 1-06).

The College also widely shares and discusses information pertaining to student achievement data in the ACCJC Annual Report. OPRA then presents the ACCJC Annual Report data and encourages discussion among the following constituent groups:

- Academic Senate (In 1-07; In 1-08)
- Consultation Council (In 1-09)
- Planning and Budget Steering Committee (In 1-10)

Analyses of Student Achievement Data

The publicly available analytical reports that OPRA provides are categorized by cohort longitudinal studies (Scorecard) versus point-in-time analyses (DataMart, SIS). Both types of analytic reports are used to determine the degree to which the College continues to serve its mission. Cohort studies assess longitudinal outcomes of students starting a degree, certificate, or transfer-directed field of study and their outcomes as they pertain to four key outcomes: student progress and achievement defined as six-year completion rates (In 1-11); persistence rates defined as enrollment in three consecutive primary terms (In 1-12); the 30 units rate defined as six-year completion rates of 30 units (In 1-13); remedial completion rates defined as six-year completion rates of remedial to college-level courses (In 1-14). Point-in-time studies on the OPRA website highlight other key performance indicators (KPIs), such as successful course completion and course retention (In 1-15). Volume/Output studies assess trends in volume of degrees and certificates (In 1-16) and volume of transfers (In 1-17). The College also assesses the extent to which it serves its mission through demographic analyses (In 1-18) as well as through SEP research (In 1-19).

Presentation and Definition of Achievement Data and Institution-Set Standards

This section will first describe the institutional process of reviewing and integrating student achievement outcomes, institution-set standards (ISS), and goals at the College. The section will conclude with a data table containing the College's definitions of the pertinent student achievement outcomes, the ISS for these outcomes, goals, and recent performance in these areas.

Student Progress and Achievement Rate (SPAR)

The College addresses student achievement through accomplishment of its mission and Districtwide objectives as stated in its Strategic Plan. Strategic Objective 2.1 of the plan it to "Increase student completion rates (degrees, certificates, and transfer) while preserving access, enhancing quality, and closing achievement gaps."

The College and District participate in identifying stretch goals (called targets at the College) for the **Student Progress and Achievement Rate (SPAR)**—also known as the **six-year** completion rates of degrees, certificates, or transfer-level coursework—as part of its District-wide Planning Council annual retreat (In 1-20). SPAR is further defined in the data table in the following section including ISS. As part of its Strategic Plan, the College aims to increase the SPAR by 2.5 percent by the year 2020. The strategic objective is outlined such that the College gradually increases this rate each year to hit the target by 2020. For 2014-2015, the College’s goal was to hit a 58.1 percent SPAR, and it exceeded its goal by getting a rate of 59 percent. Further data on SPAR is presented in the data table in the following section. The institution has not yet adopted ISS for the SPAR rate (**refer to the college institution-set standard data table below**), but there are plans to do so through participation in activities identified in the Quality Focus Essay (QFE).

As the table below identifies, SPAR rates vary by demographic characteristics.

The College aims to close the achievement gap between prepared and unprepared students.

SADDLEBACK COLLEGE STUDENT PROGRESS AND ACHIEVEMENT RATE

<i>Completion Rates</i>	2005-2006		2006-2007		2007-2008		2008-2009		2009-2010	
	Cohort Size	Cohort Rate	Cohort Size	Cohort Rate	Cohort Size	Cohort Rate	Cohort Size	Cohort Rate	Cohort Size	Cohort Rate
<i>Prepared</i>	968	73.2%	1,043	69.7%	1,194	69.0%	1,354	69.9%	1,362	71.3%
<i>Unprepared</i>	1,388	48.2%	1,459	48.1%	1,480	47.6%	1,511	46.9%	1,523	48.0%

One way the College has responded is by participation in the California Acceleration Project (CAP). Participation in this project not only offers the opportunity to see improvements, but also, through its participation in CAP, the College also monitors its progress in placement and assessment in key areas such as English and math (In 1-31).

OPRA has also begun a collaborative partnership with key individuals working on the Basic Skills Initiative. Thus far, the College has started “deep dives” of data on students’ progress and achievement and has presented this information during the College’s Professional Development Week (In 1-21). This research has uncovered novel findings on course-taking patterns. These findings and others inform improvements. Additionally, the College’s new Level Up Basic Skills and Student Outcomes Transformation Grant will address successful outcomes in completion rates.

Transfers

The College assesses total transfer volume through broad-based dialogue and public presentations about trends (In 1-22). While the College has historically presented these institution-wide transfer trends, it has recently added more educational components related to transfer trends and the external factors surrounding transferability (In 1-23). As illustrated in the previous section of this document, transfer volume is on the rise, with the most recent report showing that the College transferred 3933 students in 2014 versus 2236 in the year 2003. In the future, the College will create stretch goals for transfer numbers and integrate these into College planning activities, such as the Strategic Plan. The College has now adopted new ISS for transfers and has exceeded its set standards by 4.32 percent. The College has been focused on diversifying transfer school options for students who cannot get into the CSU or UC system and is seeing dramatic growth outside of California (refer to chart below). Thus, it is not surprising that the College has exceeded its recently adopted ISS for transfer volume.

SADDLEBACK COLLEGE IN-STATE VS. OUT-OF-STATE TRANSFERS TO A FOUR-YEAR INSTITUTION

Source. SOCCCD inFORM Data Warehouse

Degrees and Certificates

Trends in the volume of degrees and certificates are examined as part of the institution's program review process (In 1-24). Award data are examined for year-over-year trends, and faculty are expected to reflect upon these trends as they relate to creating program-level objectives and action steps as well as resource allocation requests. The College also conducts multiyear assessments of degree and certificate output (In 1-16). These research reports are publicly available on the college's OPRA website. From 2006-2007 through 2009-2010 the total number of awards increased by 114 percent, an increase from 1274 awards to 2732. The College continues to have a steady increase in its volume of awards. The chart below shows the College's make up of awards as highlighted by the College's in-depth report (In 1-16).

SADDLEBACK COLLEGE AWARD COMPOSITION 2014-2015

The College has conducted broad-based discussion of award data and trends through the review of ISS. The goals and ISS are further articulated, along with the definition of this achievement outcome, in the ISS table in the following section. Through activities mentioned in the QFE, the College will further integrate the ISS for degrees and certificates into the College Strategic Plan.

Successful Course Completion

Successful course completion is examined as part of the institution's program review data (In-25). Course completion is examined for six-year trends and faculty are expected to reflect upon these rates as they relate to creating objectives, action steps, and resource allocation requests. The College is currently in a process of broad-based dialogue about creating appropriate ISS for successful course completion within program review and planning. Division deans, department chairs, and strategic planning groups have been provided with an initial approach to setting program-level standards and will be asked to critically review these standards before integrating them into program review (In-26).

The College has conducted broad-based discussion of course completion rates for the institution at large through its process of setting one-year and six-year goals via the Institutional Effectiveness Partnership Initiative (In 1-27). The goals and ISS are further articulated, along with the definition of this achievement outcome, in the table in the following section. The College also participates in a Collegewide review of ISS for course completion. The process of reviewing the data on ISS for Collegewide course completion has indicated a need for greater expansion of metric review as identified in the QFE.

The College's course completion rates in credit-bearing courses has been increasing over the past six years. Using the newly revised definitions of the College's recently updated ISS, the College is above the standard of 70.04 percent. It should be noted that ISS are applied on a rolling basis with each new fall term.

Fall Course Success Rates	Fall 2010	Fall 2011	Fall 2012	Fall 2013	Fall 2014	Fall 2015
Saddleback College Overall	74.75%	74.84%	71.31%	70.42%	71.59%	72.98%
By Gender						
Declined to State	75.54%	76.03%	72.91%	68.08%	71.18%	70.47%

Female	77.56%	77.50%	73.24%	72.44%	73.61%	75.59%

Other Non-White	78.57%	81.05%	83.78%	80.00%	81.82%	25.00%
Pacific Islander	74.77%	73.75%	71.01%	73.87%	57.50%	65.49%
White, Non-Hispanic	75.98%	76.16%	72.87%	72.14%	73.46%	74.98%
By Instructional Method						
Lecture	73.63%	74.20%	70.36%	69.52%	70.45%	71.43%
Internet/Distance Education	64.10%	67.39%	63.29%	62.84%	64.33%	69.07%
Hybrid	65.83%	67.14%	64.21%	67.79%	68.39%	69.62%
By Basic Skills Type						
Basic Skills Course	64.53%	68.68%	64.23%	63.49%	68.10%	60.54%
Not a Basic Skills Course	75.19%	75.13%	71.67%	70.80%	71.81%	74.05%

Female students are more likely than males to be successful in courses. In addition, historically underrepresented ethnic groups show a lower likelihood of course success. In-depth research (In-19) has confirmed that course completion is the greatest hurdle among the examined indicators to measure. The College has also acknowledged its lower course success in distance education (DE) courses through its new plans for online education. The basic skills course success rate is lower than success rates in college credit-bearing courses. The College's Learning Resource Center works continuously to respond to these rates and addresses them through a variety of mechanisms, such as tutoring, workshops, online instructional materials, and supplemental instruction.

Job Placement Rates for CTE Programs

The College currently enrolls over 9000 unique students in CTE courses. There has been a 13.5 percent decline in CTE enrollment the past six years, and the College recognizes the need to dynamically innovate programs to meet labor market demands.

Enrollment in CTE Courses	Fall 2010	Fall 2011	Fall 2012	Fall 2013	Fall 2014	Fall 2015
Unduplicated Student Headcount	10,628	10,757	9,909	9,417	9,140	9,185
Enrollment Count at Census	18,025	17,814	16,187	15,297	15,216	15,004
Number of Full-Time Equivalent Students	2,061.26	2,114.56	1,937.13	1,905.55	1,950.61	1,946.78

The College participates in an annual review of its performance regarding job-placement rates using ISS through the review of KPIs related to strategic planning Goal 3, “[To] advance economic and workforce development through regional partnerships with educational institutions and industry and by strengthening career technical education.” At the College, with the exception of the Nursing CTE programs, job-placement rates are identified through the Perkins Core Indicator report. Job-placement rates for Nursing were identified through the California Board of Registered Nursing 2014-2015 Annual School Report (In 1-28). Program-specific faculty content experts reviewed the job-placement rates and had input into the job-placement rates that were accepted as program-level ISS.

The College and District created a KPI that is a “stretch goal” for the College’s job-placement rate. This stretch goal is calculated from the percentage of CTE programs with more than 10 completers who were above the ISS for job-placement rates. As part of its annual strategic planning review process, the College found that in 8 out of 9 programs (89 percent) that job-placement rates were above the ISS. At the College, ISS for job-placement rates are identified through the Perkins Core Indicator report, and the process is faculty driven.

In terms of data on job placement ISS, discussion, training and analysis have been done by various members of the College. For example, several administrators attended the California Community College Association of Occupational Education conference to learn about job-placement data and to receive training on LaunchBoard. The College is now assessing new tools such as EMSI and LaunchBoard for program review and revitalization and has increased its focus on completion rates and job placements. Refer to (In 1-29) for the most recent analysis of all CTE programs.

Licensure Passage Rates

The College also participates in an annual review of programs for which an examination for licensure is required. For the ISS regarding licensure-exam pass rates and job-placement rates, faculty content experts set the ISS based on dialogue within their programs. Typically, for ISS in the Health Sciences and Human Services (HSHS) Division related to licensure-exam pass rates, ISS were set either at or above state and national averages. These pass rates have been described in program review for years, but were first identified as formal program-level ISS in 2015. For example, Nursing utilized National Council for State Boards of Nursing (NCSBN) licensure pass rates in 2014 for state (84 percent) and national (82 percent) level benchmarks. The Nursing program ISS was set at 90 percent, this 90 percent ISS has been a program benchmark for over a decade. (California Board of Registered Nursing 2014-2015 Annual School Report) National Council for State Boards of Nursing (NCSBN). Like Nursing, the Paramedic and Emergency Medical Technician programs used their accrediting or licensing agencies' state and national data to set ISS for license pass rates and employment (In 1-30).

Collegewide Institution-Set Standards

Achievement data are presented in the data tables below per the recommended reporting format of ACCJC. The first table outlines the ISS for the institution overall. The second table identifies the ISS for programs requiring an examination for licensure. The third table illustrates the ISS for job placement for CTE programs with over 10 completers.

SADDLEBACK COLLEGEWIDE INSTITUTION-SET STANDARDS

Data Element	Definition of the measure	Institution-Set Standard*	Stretch Goal	Most Recent Year's Performance	Previous Year Performance	Three-year average
Student Progress and Achievement Rate	Percentage of degree, certificate and/or transfer-seeking students starting first time in 2009-2010 tracked for six years through 2014-2015 who completed a degree, certificate, or transfer-related outcomes	N/A	59.0%	58.1%	57.8%	59.7%
Course Completion Rate*	Applies to all students: Successful course completion, grade C or better if graded, over the number of students enrolled when the enrollment period ends*	71.6%	74.3%	72.92%	71.6%	71.6%
Completion of degrees and certificates combined	Unduplicated headcount of students who obtained a degree or a certificate	2,344	N/A	2,582	2,210	2,310
Completion of degrees	Unduplicated headcount of degrees (AA, AS, AST)	1,166	N/A	1,259	1,103	1,151
Completion of certificates	Unduplicated headcount of certificates of achievement, OSAs and Transfer Certificates	2,144	N/A	2,382	2,012	2,111
Transfers	Annual number of transfers to a four-year institution	3,753	N/A	3,915	3,625	3,728

**Note. Based upon the new ISS created after the 2016 ACCJC Annual Report. In its most recent year, the College is above all of the ISS it has created.*

SADDLEBACK LICENSURE PROGRAM INSTITUTION-SET STANDARDS

Data Element	Definition of the measure	Institution-Set Standard	Stretch Goal	Most Recent Year's Performance	Previous Year Performance	Three-year average
Licensure Exam Passage rate- Nursing	The number of student who passed the licensure examination over all who took the examination	90%	N/A	94%	96%	95%
Licensure Exam Passage rate- Paramedic	The number of student who passed the licensure examination over all who took the examination	90%	N/A	99%	99%	90%
Licensure Exam Passage rate- EMT	The number of student who passed the licensure examination over all who took the examination	60%	N/A	63%	75%	77%
Licensure Exam Passage rate- Cosmetology	The number of student who passed the licensure examination over all who took the examination	75%	N/A	76%	80%	76%
Licensure Exam Passage rate- Medical Lab Technology	The number of student who passed the licensure examination over all who took the examination	90%	N/A	100%	N/A	N/A
Licensure Exam Passage rate- Phlebotomy	The number of student who passed the licensure examination over all who took the examination	76%	N/A	93%	91%	93%

SADDLEBACK LICENSURE PROGRAM INSTITUTION-SET STANDARDS

Data Element	Definition of the measure	Institution-Set Standard	Stretch Goal	Most Recent Year's Performance	Previous Year Performance	Three-year average
Job Placement Rate* - Administrative Medical Assistant	The number of students who are employed in the year following completion of a certificate program.	60%	N/A	68%	62%	N/A
Job Placement Rate* - Alcohol and Drug Studies	The number of students who are employed in the year following completion of a certificate program.	60%	N/A	67%	63%	N/A
Job Placement Rate* - Cinema	The number of students who are employed in the year following completion of a certificate program.	50%	N/A	50%	25%	N/A
Job Placement Rate* - Clinical Medical Assistant	The number of students who are employed in the year following completion of a certificate program.	60%	N/A	77%	63%	N/A
Job Placement Rate* - Cosmetology	The number of students who are employed in the year following completion of a certificate program.	55%	N/A	67%	56%	N/A
Job Placement Rate* - Early Childhood Teacher	The number of students who are employed in the year following completion of a certificate program.	60%	N/A	64%	68%	N/A
Job Placement Rate* - Horticulture	The number of students who are employed in the year following completion of a certificate program.	60%	N/A	42%	61%	N/A
Job Placement Rate* - Paramedic	The number of students who are employed in the year following completion of a certificate program.	70%	N/A	100%	72%	N/A

Job Placement Rate* - - Registered Nurse	The number of students who are employed in the year following completion of a certificate program.	80%	N/A	82%	62%	N/A
---	--	-----	-----	-----	-----	-----

*Set standards were based upon the Perkins Core Indicator reports for placement; the College did not complete these data for a period of three years, thus a three-year average is not applicable.

Organization of the Self-Evaluation Process

The College began preparing for the accreditation self-evaluation in spring 2015, months prior to our scheduled visit in February 2017. Dr. Juan Avalos, vice president for student services, was the accreditation liaison officer (ALO). The Accreditation Steering Committee was co-chaired by Dr. Avalos; Dr. Bob Cosgrove, as representative of the Academic Senate; and Craig Connor, as representative of the Classified Senate/CSEA.

Actively overseeing the entire self-evaluation process, the committee has met every two weeks since spring 2015. Standard chairs were appointed, and following an in-service presentation on the process for the entire College community, committees for each Standard were constituted in spring 2015.

Throughout the entire process, measures were taken to ensure that the voices of all constituent groups were heard and that the entire College community was focused on accreditation. Below is a composition of the Accreditation Steering Committee and each of the Standard Committees.

Accreditation Self-Evaluation Steering Committee

Name	Representative Area
Tod Burnett	College President
Juan Avalos	Steering Committee Tri-Chair
Bob Cosgrove	Steering Committee Tri-Chair
Craig Connor	Steering Committee Tri-Chair
Debra Fitzsimons	District Services
Tere Fluegeman	District Services
Denice Inciong	District Services Research
Carol Hilton	Office of Administration
Kathy Werle	Office of Instruction
Kim d'Arcy	Academic Senate
Jennifer Klein	Planning and Research
Diane Pestolesi	Standard I – Co-Chair
Ken Brady	Standard I & IV – Co-Chair
Suki Fisher	Standard II – Co-Chair
Jenny Langrell	Standard II – Co-Chair
Roxanne Metz	Standard III Chair
Anthony Teng	Standard IV Co-Chair
Claire Cesareo	Content Writer
Amanda Ruud	Style Writer
Scott Greene	CSEA President
Donnie Mineo	CSEA Representative
Ashley Kinder	ASG Representative
Pedram Heidarpour	ASG Representative
Marina Aminy	Interim Dean, DE
Brett Myhren	Instructor, English - DE

Standard Committee Members - Standard One

Name	Representative Area
Diane Pestolesi	Standard I – Co-Chair; Associate Dean of Health Human Services
Ken Brady	Standard I & IV – Co-Chair; Faculty, English
Jennifer Klein	Director, Research, Planning & Accreditation
Christina Hinkle	Director Learning Assistance Center
Kim Stankovich	Student Learning Outcomes Coordinator; Department Chair, Speech; Curriculum Lead
Heidi Ochoa	Program Review/Administrative Unit Review Coordinator; Faculty, Speech & Communication
Patricia McGinley	Nursing Faculty
Kendralyn Webber	Associate Faculty
April Boyd	Student
Estella Castillo-Garrison	Dean, Community Education, Emeritus Institute, K-12 Partnerships
Cadence Wynter	Dean, Social and Behavioral Sciences
Paula Jacobs	Counselor
Georgina Guy	Interim Dean, Transfer, Career & Special Programs
Bruce Gilman	Faculty, English

Standard Committee Members - Standard Two

Name	Representative Area
Suki Fisher	Standard II Co-Chair; Faculty, English
Jenny Langrell	Standard II Co-Chair; Librarian
Hollis Casey	Counselor
Leslie Humphrey-Quirk	Director, Community Outreach and Recruitment
Kevin O'Connor	Dean, Liberal Arts
Marina Aminy	Dean, Online Education and Learning Resources
Kim Branch-Stewart	Faculty, Health and Human Services
Ann Marie Breslin	Learning Disability Specialist, DSPS
Christina Hinkle	Director, Learning Assistance
Donna Rane-Szostak	Dean, Health and Human Services
Parya Sadeghifard	Student, Associated Student Government
Carolyn Seaman	Librarian
Maria Mayenzet	Faculty, Communication Arts
Penny Skaff	Dean, Counseling
Heidi Ochoa	Faculty, Speech Department
Jennifer Hedgecock	Faculty, English
Ardith Lynch	Transfer Center, Special Programs and DSPS
Cora Swanson	Classified Staff, Online Education and Learning Resources
Chris Alvarado	Dean, Enrollment Services
John Jaramillo	Dean, Economic Workforce Development and Business Sciences
Rei Kamio	Student, Associated Student Government
Bruce Gilman	Faculty, English

Valerie Senior	Instructional Technologist, Faculty Center for Student Success
Khaver Akhter	Senior Administrative Assistant, Liberal Arts
Rick Chan	Senior Matriculation Specialist, Matriculation
Brian Denney	Student, Associated Student Government
Janet Miller	Senior Administrative Assistant, Health Sciences and Human Services
Vivian Nguyen	Application Specialist II, Faculty Center for Student Success

DRAFT

Standard Committee Members - Standard Three

Name	Representative Area
Roxanne Metz	Standard III Chair/Director, Fiscal Contract Services
Catherine Arreguin	Grants Analyst
Robert Bramucci	Vice Chancellor, Technology and Learning Services
David Bugay	Vice Chancellor, Human Resources and Employer/Employee Relations
Eugene Evancoe	Faculty, Electrical Technology
Denice Inciong	District Director, Research, Planning and Data Management
Michael James	Assistant Director of Facilities
Ashley Kinder	Student
Anthony Maciel	Director, Technology Serv/Broadcast Syst, Innovation Technology Center
Jennie McCue	Director, Marketing and Communications
Bart McHenry	Dean, Fine Arts and Media Technology
Vincent Pollizzi	Faculty, Automotive Technology
Deborah Snyder	Project Specialist
Shouka Torabi	Research and Planning Analyst

Standard Committee Members - Standard Four

Name	Representative Area
Tony Teng	Standard IV Co-Chair/Dean, Advanced Technology and Applied Science
Ken Brady	Standard IV Co-Chair/Associate Faculty, English
Claire Cesareo	Department Chair, Anthropology and Ethnic Studies
Erlynn Ballo	Interim Director, Student Life
Kim D'Arcy	Learning Disability Specialist
Tere Fluegeman	Executive Director, Public and Government Affairs
Lucy Hendrix	Student
Denice Inciong	District Director, Research, Planning and Data Management
Jan Mastrangelo	Application Specialist II
Sophie Miller-Gilliland	Manager, Office of the President
John Ozurovich	Senior Director of College Facilities
Mike Sauter	Alternate Media Specialist
Blake Stephens	Department Chair, Architecture and Drafting
Dan Walsh	Department Chair, Geography and GIS

Organizational Information

Saddleback College, as part of the SOCCCD, is governed by the SOCCCD BOT. The BOT comprises seven members elected at large to four-year terms by the voters of south Orange County. A student trustee, elected by the students of both Saddleback College and Irvine Valley College, serves a one-year advisory term of office. The BOT is responsible for overseeing all academic programs and educational services of Saddleback College

SOCCCD Board of Trustees (as of November 8, 2016):

Timothy Jemal, President

James R. Wright, Vice President

David B. Lang, Clerk

T.J. Prendergast III, Member

Marcia Milchiker, Member

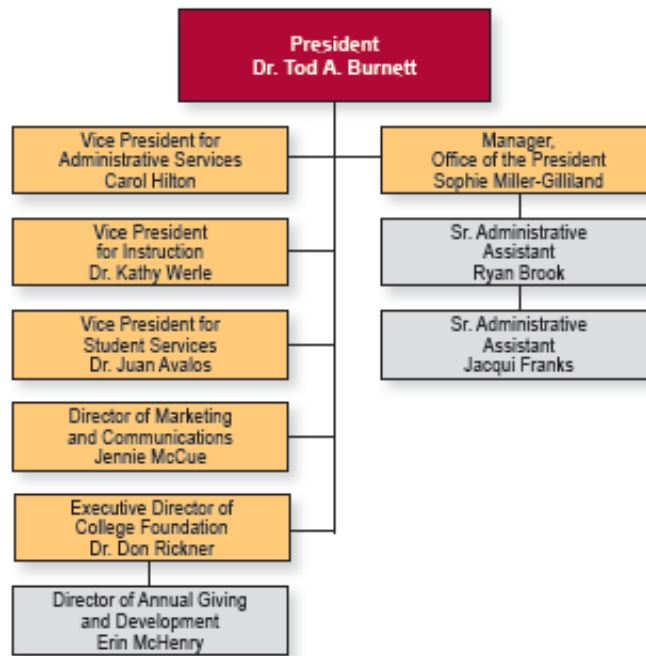

Barbara J. Jay, Member

Terri Whitt, Member

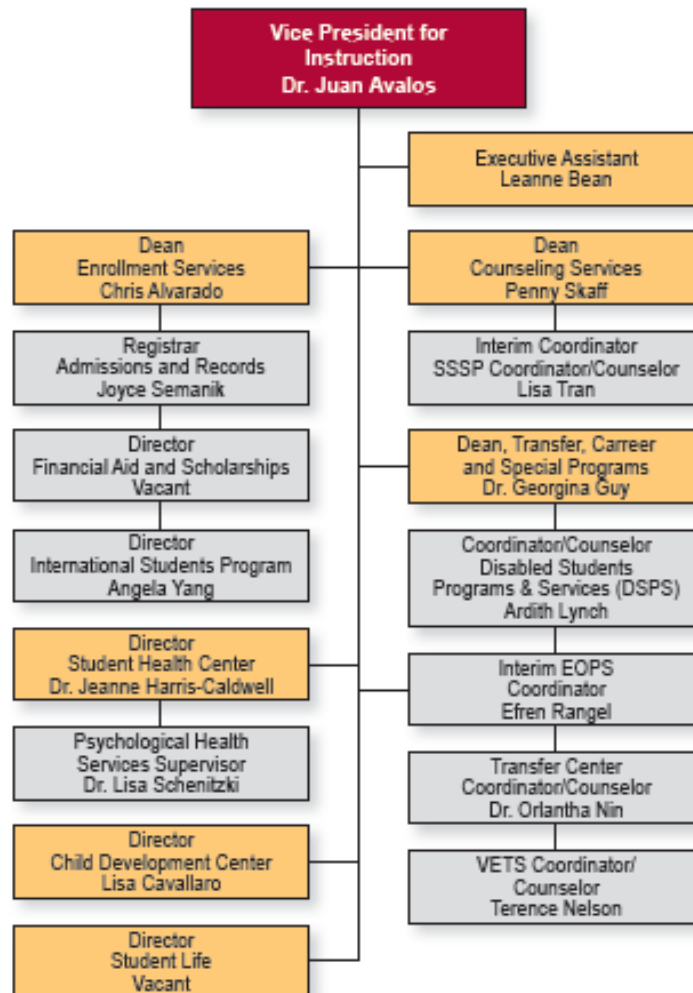

Johnathan Forde, Student Member

Vice President for Instruction Organizational Chart 2016-2017

Districtwide Function Map (can speak to it here in narrative form, but place it in Appendix B)

Certification of Continued Institutional Compliance with Eligibility Requirements

1. Authority

The institution is authorized or licensed to operate as a post-secondary educational institution and to award degrees by an appropriate governmental organization or agency as required by each of the jurisdictions or regions in which it operates.

The College operates as a public, two-year community college and awards degrees under Education Code Section 70900-10901 (ER 1-01) by the authority of the Board of Governors of the California Community Colleges. Locally governed by an elected Board of Trustees, the College is authorized to operate (ER 1-02) as a post-secondary educational institution and to award degrees based on continuous accreditation by the Accrediting Commission for Community and Junior Colleges (ACCJC) of the Western Association of Schools and Colleges (WASC).

2. Operational Status

The institution is operational, with students actively pursuing its degree programs.

The College has operated continuously since it was established in 1967. Student enrollment declined from 27,057 students in fall 2010 to 25,138 in fall 2014 as a result of the Great Recession in late 2008 (ER 2-01). In 2015, the institution had 5388 total awards. Institutional data show a dramatic increase in the number of certificates awarded between 2012 and 2014 (ER 2-02). Degrees awarded over the last six years have also increased with 1222 degrees awarded in 2009-2010, and 1423 total degrees awarded in 2015-2016. The College maintains a class schedule (ER 2-03). The College recently submitted a Substantive Change Proposal to add new programs, new locations, and new DE programs (ER 2-04).

3. Degrees

A substantial portion of the institution's educational offerings are programs that lead to degrees, and a significant proportion of its students are enrolled in them. At least one degree program must be of two academic years in length.

The College offers 112 Associate in Arts degrees, 92 Associate in Science degrees, 89 certificates of achievement, 3 certificates of completion, and 26 occupational skills awards for a total of 322 degrees and certificates. The College maintains a list of degrees and the length of study required to complete each program (ER 3-01). The Associate in Arts degree and Associate in Science involve satisfactory completion of a minimum of 60 semester units, including those required in each area of emphasis, with a "C" average or higher, and the fulfillment of either the College general education (GE) requirements (ER 3-02), California State University (CSU) GE,

or Intersegmental General Education Transfer Curriculum. The College maintains an inventory of the catalog designation of college-level courses for which degree credit is granted. The Associate Degree for Transfer require a minimum of 60 CSU-transferable semester units with an overall average grade of “C” or higher; 12 of these units must be completed at the College. Students enrolled full time could complete the requirements in two academic years. Trends on enrollment in each degree program and nondegree program are available (ER 3-03). The data illustrate that in 2015-2016 there were total of 164,419 enrollments with 39,771 unique students; whereas in 2013-2014, there were 164,107 student enrollments with 39,817 unique students in credit and noncredit courses combined.

4. Chief Executive Officer

The Governing Board of SOCCCD announced the appointment of Dr. Tod Burnett (ER 4-01) as president of Saddleback College on June 24, 2008. He assumed his position in August 2008. The College is aware of its responsibility to immediately notify ACCJC when there is a change in the CEO. Authority to operate the College and implement the College’s District policies through the role of the CEO is reflected in Board Policy 2101 (ER 4-02).

5. Financial Accountability

The College reviews its past, current, and proposed budgets (ER 5-01). Annual external financial audits by a certified public accountant are conducted on the SOCCCD. The College is not audited as a separate entity (ER 5-02, ER 5-03, ER 5-04). This audit includes an audit of the District’s financial aid programs. The Governing Board reviews these reports in a regularly scheduled meeting during public sessions (ER 5-05), and the combined District/Foundation Audit Committee reviews the audit reports to identify any needed actions (ER 5-06). The District files audit reports with the Orange County Department of Education and any other required public agencies. The most recent audit took place during the 2014-2015 academic year. There were no findings in 2014-15 as a result of the audit.

The College default rates fall within the acceptable range (ER 5-07). The College’s three-year cohort default rates are well below 20 percent. The 2011 three-year cohort default rate was 12.7 percent, the 2012 cohort default was 11.1 percent, and the 2013 cohort default rate is 10.8 percent.

Additional information regarding the College’s compliance with Title IV federal regulations can be found in the College’s response to the "Policy on Institutional Compliance with Title IV."

Certification of Continued Compliance with Commission Policies

1. Standards and Performance with Respect to Student Achievement

The institution has defined elements of student achievement. The College identifies and analyzes student progress and achievement, defined as six-year completion rates (CP 1-01); persistence rates defined as enrollment in three consecutive primary terms (CP 1-02); the 30 units rate, defined as six-year completion rates of 30 units (CP 1-03); and the remedial completion rate, defined as **six**-year completion rates of remedial to college-level courses (CP 1-04). The College identifies, analyzes, and defines performance indicators for successful course completion and course retention (CP 1-05), degrees and certificates (CP 1-06), and transfers (CP 1-07). The College also assesses the extent to which it serves its mission through demographic analyses (CP 1-08) as well as through SEP research (CP 1-09).

Through its program review process (CP 1-10), the institution has defined elements of student achievement performance in each program, and is in the process of measuring performance within each defined element through its process of creating ISS (CP-11). The defined elements include, but are not limited to, job placement rates for program completers, and for programs in fields where licensure is required, the licensure examination passage rates for program completers as identified in the data tables in the section on student achievement and ISS.

The ISS across the institution are going through a more rigorous process to guide self-evaluation and institutional improvement. The beginning of these discussions occurred through the College's Planning and Budget Steering Committee and culminated in the College's Institutional Effectiveness Partnership Initiative Annual Report (CP 1-12) as well as Collegewide through the Student Success Metrics Summit (CP 1-13).

Institution-set results are reported regularly across the campus and discussed among constituent groups. The College also analyzes and publicly discusses a holistic picture of its performance against targets (CP 1-14) for institution-wide planning to evaluate how well the institution fulfills its mission, to determine needed changes, to allocate resources, and to make improvements. The planning teams are also expected to provide midterm updates to ensure appropriate tracking toward goals and objectives (CP 1-15).

As outlined in the QFE, the defined data elements and expected performance levels through creation of ISS, as well as goals, are going through a review process to create greater relevance and meaningful integration of goals and standards into the College culture.

2. Credits, Program Length and Tuition

Through the curriculum process, programs are designed to meet the academic standards and rigor appropriate for higher education. Program quality is maintained through regular program review. The Program and Course Approval Handbook (PCAH) is the state-sanctioned handbook for

curriculum development (CP 2-01, CP 2-02). This handbook guides the development of new and revised programs and courses, including the assignment of credit hour and degree program length. Units of credit are awarded based on the Carnegie Unit, in which 18 hours of standard lecture and 36 hours of outside work equal 1 unit of credit. The basis for awarding credit is tied to each course's Methods of Evaluation (MOE).

Through its rigorous curriculum approval process during which Course Outlines of Record (CORs) are scrutinized carefully to ensure compliance with accepted state standards, the College ensures that, at the course level, its credits are consistent with accepted norms of higher education. Course outlines are revised and updated regularly in accordance with established state standards of scheduled review. Transferable courses are developed in compliance with guidelines established by the CSU and University of California (UC) systems to ensure articulation (CP 2-03, CP 2-04).

Tuition is consistent across degree programs (\$46/unit), excluding all noncredit programs. Degree completion requires completion of a minimum of 60 semester units and a minimum of 18 units in a discipline or specialization (CP 2-03).

As specified by the PCAH 6th Edition, which was created by the Academic Affairs Division of the State Chancellor's Office, the College follows federal standards for clock-to-credit hour conversion in the awarding of credit. This handbook states that the "standard formula for credit hour calculations applies to the majority of courses and course types and is derived from the regulations in title 5, section 55002.5," which requires colleges "to define one unit of credit as a minimum of 48 total hours of student work, inclusive of all contact hours plus outside-of-class, or homework, hours."

3. Transfer Policies

A detailed outline of the various transfer policies, including articulation and transfer patterns [pages 132-139], can be found in the College Catalog [pages 36-49]. Policies are also made available to students through MAP, the Student Handbook, counseling classes, and the Transfer Center. All of these mediums provide students with the information they need to create an academic plan (CP 3-01).

Policy information includes transfer policies and planning tools, GE patterns, articulation agreements, the Associates Degree for Transfer, the Teacher Preparation Program, and the Honors Program. In addition, these mediums inform students of the Transfer Admission Guarantee (TAG) program, which provides guaranteed admission to six UC campuses for those California community college students who meet specific requirements. Students are also informed of the Articulation System Stimulating Interinstitutional Student Transfer (ASSIST), the online statewide database of articulation. In addition, the College Catalog provides a means of determining the comparability of courses taken at other California public colleges and universities (CP 3-02).

To determine the College's articulation compliance for each institution, the College regularly reviews the articulation policies of the UC and CSU systems, as well as private and out-of-state colleges and universities. Often, private universities in California and out-of-state colleges present special articulation questions. In these cases, the Counseling Department and the Articulation Office coordinate inquiries and, as needed, will request information and clarification from division and departmental discipline experts.

Students can access the College's articulation agreements with the UC and CSU systems. For information regarding institutions with which the College has no articulation agreement, students can consult the ASSIST database (CP 3-03). The College homepage and the Transfer Center website both provide links to the ASSIST website. The College also provides direct counseling to students on these policies and agreements in the Transfer Center and in Counseling Services (CP 3-04; CP 3-05).

4. Distance Education and Correspondence Education

The College has rigorous curriculum review and program review processes, which apply to all courses and programs and do not differentiate significantly between face-to-face and online course modalities. For example, there is no distinction between the competency levels determined for online versus face-to-face courses. Similarly, the processes for establishing and evaluating courses and programs, including the determination of appropriate credit and articulation agreements, are the same for both modalities. Moreover, Carnegie Units, a standard metric used nationwide, are awarded in the same way for online courses and face-to-face courses. The College also revised the process for approving DE courses in the Curriculum Committee in 2015-2016 in response to requests from faculty and administrators for an updated, streamlined process. The College's new curriculum review process now includes the use of an Online Addendum Form that is reviewed by at least two faculty members for approval of individual courses. During this process, faculty review and approve these forms in a sub-group of the Online Education Committee. Once the course is approved, the division dean has the right of assignment and makes individual decisions about assigning faculty to teach those approved courses.

Several steps maintain the quality of online courses and online instruction. First, a subcommittee of the Curriculum Committee uses a separate approval process to ensure that the quality of online courses is consistent with that of face-to-face courses. The subcommittee also determines whether the intended methodology for the proposed online course is appropriate to the topic. The DE Course Addendum confirms that faculty create assignments and grading strategies suited to an online environment. Through its representation on Board Policy and Administrative Regulation Advisory Council and the Distance and Online Education Committee, the College supported the revision of AR 6112, an Administrative Regulation that addresses the following: definitions of a DE course, the role of the College's Curriculum Committee in approving DE courses, instructor contact, regular effective contact, notification of availability for faculty, and

content delivery and accessibility. AR 6112 is currently under review in BPARAC, and is expected to be finalized by May 2017 (CP 4-01).

The College uses the Blackboard learning management system (LMS) for its DE classes. The College uses Microsoft Active Directory (AD) as the primary method of student authentication. Each student is provided with a unique username and password used to access the LMS and all relevant College-related technology systems, such as email. The LMS is hosted by Blackboard, and the District has its own instance ensuring protection of student information. Students can only access the LMS with their unique username and password. The automatic student account provisioning system ensures that all students have their accounts created in a timely manner and also disabled when the student is no longer taking classes.

The College provides a robust and redundant technology infrastructure which ensures that students, faculty, staff, and management have access to the LMS and other technology resources. The College has a 1Gbps connection to the internet through CENIC and a redundant 100Mbps. All College computers are on a gigabit network with ample bandwidth. The computers on campus are on a four year refresh cycle. There are 1348 computers in instructional computer labs located throughout the College. The Learning Resource Center has over 150 computers available for student use. Blackboard, the LMS used in DE, is hosted by Blackboard and is integrated into the College's student information system. The Faculty Center for Student Success has a dedicated computer lab for instructors to use. This lab is staffed with very knowledgeable application specialists and instruction technologists that assist faculty with their DE courses and the LMS. The District enters in a multiyear contract with the LMS provider to ensure continuity and system availability.

In September, 2016, the College submitted a Substantive Change Proposal for DE, detailing the courses for which at least 50 percent of the coursework is offered in DE mode. This report included a detailed description of the proposed changes, the relationship to the College mission, the rationale for the changes, and additional evidence that the programs and services are within the scope of the institutional mission (CP 4-02; CP 4-03).

5. Student Complaints

The College maintains formal policies and procedures for student complaints. These are provided for students on the College website (CP 5-01); in the College Catalog (CP 5-02); and in the SOCCCD District's Board Policies and Administrative Regulations 4000 series, Human Resources (CP 5-03); and 5000 series, Students, which are posted online (CP 5-04; CP 5-05).

The College Catalog includes several references for filing complaints regarding possible violations of the District's policies regarding Equal Employment Opportunity, nondiscrimination, harassment, and disability discrimination as well as references on how to appeal grades, disqualification, and academic conduct and disciplinary actions. These policies are reiterated in the annual Student Handbook (CP 5-06). The College Catalog lists the contacts

for various complaints and related processes. Students with complaints, grievances, and personal concerns about the College, or any of its policies, are encouraged to discuss them with the appropriate administrator or department chair.

Most student complaints are filed first with Student Services. If the complaint is instruction related, it is referred to Academic Affairs. Personnel-related complaints, including harassment and discrimination complaints, are referred to the Human Resources Office. Student complaint filings for the previous six years (since the last comprehensive evaluation) are available in the appropriate office: Vice President for Student Services, Vice President for Instruction, or district Human Resources. The files demonstrate accurate implementation of the complaint policies and procedures.

6. Institutional Disclosure and Advertising and Recruitment Materials

The College Catalog is updated each year and is posted on the College website. The catalog provides detailed information on the College's courses, degree and certificate programs, and completion requirements; policies on transfer; tuition, fees, and policies for refunds; information on the availability and requirements for financial aid; and rules regarding student conduct.

Each year the College's Public Information and Marketing Office publishes the *At a Glance* (CP 6-01) brochure, which provides information on the College's demographics, academic and student support programs as well as additional information on financial aid and scholarships, transfer, etc. The brochure is distributed to all administrators and managers to keep on file, and copies for the public are kept in offices throughout campus. The Outreach team distributes the brochure during campus and community visits. The brochure is also posted on the College website.

Trained and qualified staff continuously update the College website with information concerning the College's programs, services, and policies. Each department on campus oversees the content on its webpages and updates them accordingly.

The College's educational programs and services are the primary emphasis of College publications and promotional materials and are accurately represented by these publications.

The College Catalog accurately reports the official college name, telephone numbers, and the street and website addresses; the College mission, vision, and goals; program, course, and degree, certificate, and program completion requirements; faculty with degrees held and the conferring institution; institutional facilities readily available for educational use; rules and regulations for student conduct; the institution's academic freedom statement; tuition, fees, and other program costs; opportunities and requirements for financial aid; policies and procedures for refunding fees and charges to students who withdraw from enrollment; policies related to the transfer of credits from other institutions; statements of nondiscrimination; location or publications where other institutional policies may be found; members of the Governing Board;

and the accreditation status of the institution. This information is also found on the College website and in the College's *At a Glance* brochure. The accreditation status of the institution and accreditation reports can be found on the website, one click from the homepage.

The Course Catalog provides accurate information on national and state legal requirements for eligibility and licensure for career programs, including Nursing and Real Estate. The College website provides current gainful employment data of all CTE programs as required for Title IV federal financial aid.

7. Title IV Compliance

The College complies with Title IV federal financial aid regulations and ensures compliance through various quality improvement strategies and the professional development of staff. The College was recertified to continue with the Department of Education federal financial aid program on March 6, 2014 (CP 7-01). Recertification occurs every five years. The Student Financial Assistance and Scholarship Office conducts compliance requirement checks on an annual basis by following the U.S. Department of Education's federal student aid assessment guide (CP 7-02). In addition, the Student Financial Assistance and Scholarship Office attends regular conferences and training offered by the U.S. Department of Education and financial aid associations to ensure the College complies with current Title IV financial aid regulations (CP 7-03).

The College has publicly presented on Title IV compliance (CP 7-04). Annual external financial audits by a certified public accountant are conducted on the SOCCCD. The College is not audited as a separate entity (CP 7-05; CP 7-06; CP 7-07). This audit includes an audit of the District's financial aid programs. The Governing Board reviews these reports in a regularly scheduled meeting during public session (CP 7-08), and the combined District/Foundations Audit Committee reviews the audit reports to identify any needed actions (CP 7-09; CP 07-10). The District files audit reports with the Orange County Department of Education and any other public agencies, as required. The most recent audit took place during the 2014-2015 academic year. There were no findings in 2014-2015 as result of the audit.

The College default rates fall within the acceptable range. The College's three-year cohort default rates are well below 20 percent. The 2011 three-year cohort default rate was 12.7 percent, the 2012 cohort default was 11.1 percent, and the 2013 cohort default rate was 10.8 percent. The College attributes its success in keeping loan default rates at an acceptably low level by providing a financial aid orientation (CP 7-11) with a literacy component as a part of the loan process, and by providing a comprehensive Financial Aid Student Handbook (CP 7-12).

8. Public Notification of an Evaluation Team Visit and Third Party Comment

Beginning in fall 2016, well in advance of its final draft, the College's accreditation team put forward drafts to solicit feedback. To date, the website has had over 300 unique visitors with 50 qualitative comments.

DRAFT

Standard I: Mission Academic Quality and Institutional Effectiveness, and Integrity

I.A.1. The mission describes the institutions broad educational purposes, its intended student population, the types of degrees and other credentials it offers, and its commitment to student learning and achievement.

Eligibility Requirement 6

The institution's educational mission is clearly defined, adopted and published by its governing board, consistent with its legal authorization, and is appropriate to a degree granting institution of higher education, and the constituency it seeks to serve. The mission statement defines institutional commitment to student learning and achievement.

EVIDENCE OF MEETING THE STANDARD

The College's mission, supported by the vision and values, clearly describes the College's educational purposes, intended student population, degrees and credentials offered, and commitment to student learning and success. The mission, vision, and values are regularly reviewed and revised as needed to ensure that they continue to describe the primary educational purposes of the College. The current mission, vision, and values are below.

Our Mission:

Saddleback College enriches its students and the south Orange County community by providing a comprehensive array of high-quality courses and programs that foster student learning and success in the attainment of academic degrees and career technical certificates transfer to four-year institutions, improvement of basic skills, and lifelong learning.

Our Vision:

Saddleback College will be the first choice of students who seek a dynamic, innovative, and student-centered postsecondary education.

Our Values:

Saddleback College embraces:

Commitment

We commit to fulfilling our mission to serve the south Orange County community.

Excellence

We dedicate ourselves to excellence in academics, student support, and community service.

Collegiality

We foster a climate of integrity, honesty, and respect.

Success

We place our highest priority on student learning and delivering comprehensive support for student success.

Partnership

We strive to develop strong and lasting partnerships among students, faculty, staff, and the community.

Innovation

We anticipate and welcome change by encouraging innovation and creativity.

Academic Freedom

We endorse academic freedom and the open exchange of ideas.

Sustainability

We promote environmental sustainability and use our resources responsibly to reduce our ecological impact.

Inclusiveness

We cultivate equity and diversity by embracing all cultures, ideas, and perspectives.

Global Awareness

We recognize the importance of global awareness and prepare our students to live and work in an increasingly interconnected world (1.A.1.1).

Educational Purpose

The broad educational purpose of the College as described in the mission is to serve the varied needs of its students and the surrounding community. The College aims to promote student learning and success through consistently offering high-quality courses and programs that make it possible for students to achieve a variety of educational goals, including academic degrees, career technical certificates, transfer to four-year institutions, improvement of basic skills, and lifelong learning. Through a comprehensive curriculum process, courses and programs are developed, reviewed, and updated to ensure the curriculum is of high quality, reflective of the current state of the discipline, and responsive to the changing needs of the students and the community. Through a well-integrated review process, courses, programs, student services, and administrative units are continuously evaluated and improved with a focus on supporting student achievement.

The College mission is central to institutional planning and relies on data from internal and external scans to identify the educational needs of students and the community (1.A.1.2).

External scans are utilized to better understand the Colleges' service area, demographic profile,

enrollment trends, and labor market data. This data informs program and institutional planning through the program review and strategic planning processes. (1.A.1.2, 1.A.1.3). Data from surveys and scans identify target occupations, potential new programs, and describe gaps that exist between target occupations and educational opportunities (1.A.1.2, 1.A.1.3).

The mission of every instructional program, administrative unit, and student support service unit at the College is created in alignment with the College mission (1.A.1.2). In addition, the College mission is aligned with the South Orange County Community College (SOCCCD) mission, which reads:

South Orange County Community College District provides a dynamic and innovative learning environment dedicated to student success and economic growth of the region (1.A.1.3). The Saddleback College Mission meets the criteria established in the California Education code 66010.4 (1.A.1.4)

The College mission describes the intended student population including students who strive to obtain academic degrees or career technical certificates, as well as those whose goal is to transfer to four-year institutions, improve basic skills, and continue with lifelong learning. The SOCCCD external scan and enrollment projections identify the potential student population in the Saddleback College service area. Although students seeking certificates, degrees, and transfer make up the majority of the College's demographics, the service area of the College has a higher median age than the rest of Orange County and thus lifelong learning continues to be a significant focus through the Emeritus Institute and Community Education (1.2). In addition, the number of students enrolling who are underprepared for college-level work is increasing, a factor which necessitated a strengthening of the College's focus on basic skills instruction, including the addition of the Adult ESL program. The actual student population as well as their educational goals and objectives are identified primarily through data from the initial California Community College (CCC) application and registration updates. (1.A.1.5).

To meet the diverse needs of the community and its students, Saddleback College offers 135 associate degrees, 86 certificates of achievement, and 32 occupational skills awards (1.A.1.6) The College enrolls approximately 26,000 students each semester. In 2016, over 1300 students transferred to four-year institutions including 486 to the University of California (UC) and 903 to California State University (CSU) (1.A.1.7)

The College's commitment to basic skills education is evident as enrollments have doubled since 2010 (1.5.5). Likewise, the College's commitment to lifelong learning is evident through the Community Education and Emeritus Institute offerings. Nearly 17,000 learners of all ages attended Community Education classes in 2014-2015. Through College for Kids, the After School Experience, and the Summer Experience, more than 600 arts, academic, STEM, personal and cultural enrichment classes were offered to almost 11,000 K-12 students in 2014-2015. In 2015-2016 the Emeritus Institute offered more than 200 course sections and enrolled 5,500 older adults (1.8).

The College also offers courses in a variety of instructional modalities including face-to-face, online, and hybrid, both online and in person. Since 2010 there has been an ____ percent increase in courses offered online, in large part due to student demand. Currently, approximately 20 percent of courses are offered online (1.5.2). As a result, the College also increased online tutoring and counseling in order to better serve the needs of online students. The College's commitment to online education is addressed in Standard II and the QFE for online education.

The College's commitment to student success is evident in the variety of programs and services available to support student learning and achievement. In addition to standard student support programs such as counseling services and financial aid, the College also offers a variety of special programs, many of which target specific populations. These programs include Advancement Via Individual Determination (AVID), the OC Bridge 2 Engineering Program, a Career and Re-Entry Center, the Cooperative Agencies Resource for Educations (CARE) Program, the Freshman Advantage Program, an Honors Program, a state of the art *Library and Learning Resource Center (LRC)*, *the Student Development Office*, the Program Assisting Student-Athlete Success (PASS), *the Transfer Center*, *in-person and online tutoring services*, *and the Veterans Education and Transition Services Center (VETS)*. (*Link to student services, and 1.8, 1.10*) *These programs are outlined in detail in II.B. below.* Saddleback's commitment to student learning is also evident through financial aid resources that have been allocated to students, including over \$732,000 in scholarship awards (citation).

ANALYSIS AND EVALUATION

The College mission describes the College's educational purposes, student population, and degrees and credentials offered. This mission also reflects the College's commitment to student learning and success. The mission meets the criteria set forth by California Education Code 66010.4 (1.4). Grounded by the mission, the College responds to the needs of its students and the changing demographics of the community and commits resources to promote learning and achievement for all students.

Standard I: Mission, Academic

I.A.2 The institution uses data to determine how effectively it is accomplishing its mission, and whether the mission directs institutional priorities in meeting the educational needs of students.

EVIDENCE OF MEETING THE STANDARD

The College uses data to: 1) review, revise, and align the mission; 2) direct institutional priorities; 3) assess student achievement; 4) evaluate outcomes at the course, program, unit, and institutional level; and 5) examine educational needs and opportunities (Integrated Strategic Plan, Current Strat Plan, Scorecard data, EPA annual report, (SSSP Report updated jp). The Office of Planning, Research and Accreditation (OPRA), managed by the director of planning, research, and accreditation, is responsible for the Collegewide coordination of research and data.

Mission Review and Alignment

The College uses data to review and, when necessary, revise the Mission Statement on an annual basis. The strategic planning process offers a more comprehensive review and alignment every third year. Annual review is guided by ongoing data analysis and communication between OPRA and all College entities to ensure that the College is informed about the students it serves and their specific needs. Data used by the Planning and Budget Steering Committee (PBSC) in the annual review of the mission is gathered from the annual updates of institutional plans, student surveys, employee surveys, demographic analysis, the *South Orange County Economic Report*, and the *Institutional Effectiveness Annual Report* (IEAR), among other sources.

Mission alignment analysis occurs every three years and coincides with the beginning and midterm review of the Strategic Plan. As a key step in the strategic planning process and setting of institutional priorities, data from internal and external scans, including a comprehensive Districtwide external scan conducted by the District and College research offices, inform the mission review and alignment. This includes student surveys, Collegewide and Districtwide employee surveys, and the IEAR, (Link OPRA x 3). The Districtwide external scan consists of a detailed data analysis about the demography of the region and the service area, changes in the labor market, and trends in higher education. The review and alignment of the mission ensures that the programs and services offered at the College meet the needs of both current and prospective students, as well as the larger community, and that the College's mission is in alignment with that of the District. .

Institutional Priorities

The College's mission is central to the determination of institutional priorities. Through integrated institutional planning, data is used to direct goals, objectives, activities, and strategies, as well as to evaluate outcomes. The integrated plans and initiatives include the Districtwide Strategic Plan, the College's Strategic Plan, the Student Success and Support Program (SSSP), the Student Equity Plan (SEP), the Basic Skills Initiative (BSI), the Enrollment Management

Plan (EMP), the Technology Master Plan, and the Economic and Workforce Development Plan (EWP), just to name a few. ([Link Docs here](#)). While each planning committee or work group uses data to direct and evaluate the effectiveness of their individual planning efforts, PBSC is responsible for coordinating regular reviews and updates to the Strategic Plan and ensuring the integration of all planning efforts ([Link to current Strat Plan](#)). Through evaluation of all integrated plans and initiatives, students' educational needs are identified and institutional priorities are realigned. See 1.B.9 for a more detailed discussion of integrated planning.

Student Learning and Achievement

The College uses data to assess student learning and achievement. Student success related to the attainment of academic degrees and career technical certificates, transfer to four-year institutions, and improvement of basic skills, are a central part of the College's mission, and are measured against data provided by the California Community Colleges Chancellor's Office MIS data mart Student Success Scorecard (CCCCO Student Success Scorecard) ([Link to Scorecard](#)). The Student Success Scorecard data tracks cohorts of students related to completion of degrees, certificates, transfer, persistence, 30-unit completion rate, and remedial math and English progress rates. These measures of achievement are further analyzed by OPRA and published in annual reports that examine Scorecard Data trends and historical analyses of degrees, certificates, success, and retention. ([link to reports OPRA website](#)). College data regarding historical transfer patterns, demographic characteristics, and locally determined success metrics are also analyzed and published on the OPRA website ([Link here](#)). Achievement data is also examined at the program level and reported through program review. This data is automatically available disaggregated by teaching modality (face-to-face and online) and can be disaggregated for other specific populations—such as gender, ethnicity, or age—by a special pull from the District's inFORM Data Warehouse (EVI – Program Review Report). Several programs report achievement data that has become institutional set standards. ([Link to ACCJC annual report](#)). Annually, Scorecard data is presented to College administrative and faculty leadership as well as the board of trustees ([Link July BOT presentation Management team minutes July 28, 2016 etc.](#)).

Outcomes Assessment

The College has had processes in place for over a decade that examine data to evaluate course, program, and institutional student learning outcomes, as well as student support unit and administrative unit outcomes. These processes were developed by the Educational Planning and Assessment (EPA) Committee and are regularly revised in response to external accreditation requirements and updated to ensure relevance ([Link to Handbooks SLO/AUO](#)). The SLO/AUO processes are described in more detail in I.B.2. Through the PR/AUR process, outcomes assessment data is evaluated to determine the ability of each program or unit to support the educational needs of students. The end result of the program and administrative unit review is a data-driven needs assessment that directs program and institutional priorities as well as resource allocations. Program and administrative unit review will be described in detail in I.B.5 ([PR/AUR Handbooks](#)). The EPA oversees both the outcome assessment and review processes.

Educational Needs and Opportunities

The College systematically gathers information and examines data to explore the educational needs of students and to both identify areas of opportunity and activities that, through grant-funded projects and initiatives, have the potential to increase student success (SSSP, BSI, SEP). Through these grants and initiatives, the College participates in data analysis of specific student populations and tracks outcomes at midpoints and at the end of the grant (initiative) term. The outcomes of these analyses make it possible to direct institutional resources to meet the needs of specifically identified subpopulations of students.

ANALYSIS AND EVALUATION

The College uses data to determine how effectively it is achieving its mission and to ensure that the mission directs institutional priorities to meet the educational needs of students. A Collegewide culture of evidence and inquiry is coordinated and supported through the AVPIE, OPRA and, EPA. Furthermore, these bodies promote data-driven planning and decision-making aligned with the College mission.

While data is well integrated into the planning, achievement, outcomes assessment, and PR/AUR processes at the College, there is a recognized need for an increased Collegewide understanding of data related to student success metrics and the use of these metrics in setting institutional goals for student learning and achievement. In spring 2016, the Office of Planning and Institutional Effectiveness (OPIE) and the OPRA hosted the first annual Student Success Metrics Summit in an effort to educate and engage stakeholders in discussions regarding the CCCO Student Success Scorecard data, Institution Set Standards (ISS), and the Institutional Effectiveness Partnership Initiatives (IEPI). Based on this recognition, a Quality Focused Essay (QFE) was developed related to increasing data-driven dialogue and the integration of student success metrics, with meaningful goal-setting and specific planning efforts (See QFE Success Metrics).

I. A. 3. The institution's programs and services are aligned with its mission. The mission guides institutional decision-making, planning, and resource allocation and informs institutional goals for student learning and achievement.

Saddleback College enriches its students and the south Orange County Community by providing a comprehensive array of high-quality courses and programs that foster student learning and success in the attainment of academic degrees and career technical certificates, transfer to four- year institutions, improvement of basic skills, and lifelong learning. (My reference) delete for final draft

EVIDENCE OF MEETING THE STANDARD

Saddleback College offers over 1,700 courses and 70 instructional programs that are supported by more than 40 student support and administrative units (1.A.3.1ACCJC Annual Report 2016). Through the program and administrative unit review process (PR/AUR), completed every two years, each program, student support unit, and administrative unit aligns future objectives with the College mission and vision (1.A.3.2, 1.A.3.3). Through this process, each program, student support unit, and administrative unit also describes its specific mission and how it serves to support the College's mission, vision, and strategic plans. All instructional programs are required to go through the same PR process and address how their program is aligned with the mission in relation to all teaching modalities, including face-to-face and online.

During the review process, a thorough needs assessment addresses human resources, instruction, service, research, technology, equipment, facilities, marketing, and outreach needs. Once needs are identified, objectives and action steps to meet those needs are developed, and these, along with resource allocation requests, are input into TracDat. In order to qualify for resource allocations, the resource requests must be identified in the PR/AUR and linked to the Strategic Plan (1.A.3.4, 1.A.3.5).A.3 1.6 See Saddleback College Resource Allocation Process Model. Do we need any documents from the process as evidence?). Ultimately, the PR/AUR process is intended to ensure quality programs and support services as well as the effective use of the College's resources. PRs and AURs are key components—along with student learning outcomes (SLO) assessment, administrative unit outcomes (AUO) assessment, and ongoing curriculum assessment—utilized to evaluate institutional effectiveness at the College. The PR /AUR process is described in detail in I.B.5.

At the College, the mission is central to strategic planning, and, through the Strategic Plan, it guides institutional decision-making. The first step of the strategic planning process is an annual review of the College's Mission Statement (Link Integrated Strat planning process). Every three years, the College also conducts a mission alignment analysis coinciding with the midterm review of the Integrated Strategic Plan and the Districtwide external scan. This alignment ensures that the programs and services offered at the College meet the needs of the current students as well as the College's intended population (link Strategic Plan, updated Integrated

Strat planning Process, minutes related to mission alignment external scan DWPC, PBSC agenda/minutes 8/4/16).

The strategic planning process is a comprehensive and collaborative tool that enables the College to accomplish its mission and move toward its vision (updated Integrated Strat planning Process). The 2014-2020 Strategic Plan includes four overarching goals that are aligned with the SOCCCD goals: 1) Respectful Interactions; 2) Student Success; 3) Economic and Workforce Development; and 4) Financial Health and Institutional Effectiveness. Other College plans and initiatives are integrated with the Strategic Plan and, therefore, are also in aligned with the College mission. These plans include the Student Equity Plan (SEP), the Basic Skills Initiative (BSI), the Technology Plan, the Economic and Workforce Development Plan, and the Enrollment Management Plan. Evidence of how the mission guides institutional decision-making and resource allocation through the Strategic Plan can be found in the updated Strategic Plan (Link to Strat Plan on OPRA site). The College's integrated strategic planning process will be discussed in detail in I.B.9. (Link Saddleback College Integrated Strategic Planning Process)

The College mission broadly states institutional goals for student learning and achievement as “success in the attainment of academic degrees, career and technical certificates, and transfer to four-year programs, as well as the improvement of basic skills and lifelong learning.” (Link Mission). The broad goals in the mission are closely associated with the CCCO Scorecard metrics. To ensure that the mission is being met, OPRA regularly generates reports that analyze Scorecard data specific to the College with attention to historical performance and trends to allow comparisons to statewide performance. These reports include: 1) *Milestones: Persistence Rate 30 Units Rate Five Year Trends*; 2) *Saddleback College Degree/Transfer Completion Rates, Career Technical Education Completion Rates, and Career Development College Preparation Completion Rates*; 3) *Basic Skills*; 4) *Saddleback College Awards 2014/2015 Academic Year Data and Long Term Trends in Degrees and Certificates Awarded*; 5) *Saddleback College Transfers 2003 to 2013 Long Term Trends*; and 6) *Measures of Saddleback College’s Demographic and Academic Characteristics of Students 2013-2015 (Fall Semesters)* (Links x 7 to OPRA docs). These reports provide the College community, especially planning and decision-making bodies, the information needed to set appropriate goals for student achievement and measure success.

At the state and federal levels, recent mandates focused on student success metrics—including the CCCCO Scorecard metrics, Institution Set Standards (ISS) and the Institutional Effectiveness Partnership Initiative (IEPI)—have required the College to explicitly state goals related to student success and achievement. In spring 2016, in response to those requirements, the Student Success Metrics Summit was hosted by the AVPIE and OPRA (Minutes or link to presentation). This summit served as a way to educate the College community and to begin Collegewide dialogue about student success metrics including the CCCCO Scorecard and the ACCJC annual report.

ANALYSIS AND EVALUATION

Through the well-established PR/AUR processes, both of which have existed for more than a decade, every instructional program, student support unit, and administrative unit on campus has a mission that is aligned with, and supportive of, the College mission. The review process also enables programs and units to develop objectives and action steps as well as request funding to ensure that the College's mission is met. Through the Strategic Plan, as well as integrated plans and initiatives, the mission informs institutional goals and guides institutional decision-making, planning, and resource allocation. The College recognizes that although there is broad-based participation in planning, decision-making, and the resource allocation process, there exists a lack of understanding related to student success metrics and setting institutional goals for student learning and achievement. A QFE was undertaken to develop an action project for the College related to developing a culture of institutional effectiveness through the integration of various student success metrics with meaningful goal-setting and specific College initiatives that will lead to increased success for students.

I.A. Mission

I.A.4. The institution articulates its mission in a widely published statement approved by the governing board. The mission statement is periodically reviewed and updated as necessary.

EVIDENCE OF MEETING THE STANDARD

The College articulates its mission in a widely published statement that is reviewed annually by the College and the SOCCCD Board of Trustees (BOT), and was most recently reviewed and approved by the BOT on May 18, 2015 in accordance with Board Policy 101 (I.A.4.1). The Planning and Budget Steering Committee (PBSC) initiates a review of the Mission Statement on a regular basis to ensure that the programs and services offered at the College meet the needs of current students and the College's intended population. Data from internal and external scans inform the mission review. These scans include student surveys, employee surveys, demographic analysis, the IEAR, and the South Orange County Economic Report, among others. Alignment with the SOCCCD mission is also an essential component of the mission review. (I.A.4.1 PBSC Agenda Minutes Nov November 12, 2015, student survey link, employee survey link and district wide climate survey link and citations?) A review of the mission may also be undertaken outside of the regular review process in response to data from internal or external scans, changes in the Strategic Plan, or at the recommendation of any participatory governance group.

Proposed changes to the mission are presented by PBSC to Consultation Council, whose members solicit input from the different constituent groups on campus including managers and administrators; the Academic Senate (AS), for faculty; the Associated Student Government (AGS), for students; and the CSEA and Classified Senate, for staff. (Citations from AS, ASG, CC, CSEA meetings). (I.A.4.2). Recommendations from Consultation Council are forwarded to the College president by April of each year and sent to the BOT for approval in May. The BOT annually reviews and approves the Mission Statement at either their May or June meeting (Link to previous 5 years of BOT approvals needed). The most recent review of the Mission Statement occurred through a request from faculty in fall 2015. A revision of the mission to more directly address online education was proposed and a discussion of all participatory groups ensued. While it was noted that there has been an increased emphasis on online education at the College, it was determined that the current mission adequately encompasses our online offerings (AS minutes). The final version of the Mission Statement was approved by Consultation Council and forwarded to the president in April, then approved by the BOT in May 2016. Every three years, the College also conducts a mission alignment analysis coinciding with the midterm review of the Strategic Plan and the Districtwide external scan to ensure that the College and District missions are consistent (link integrated strat plan process). Most recently, the College mission was aligned with the mission of the SOCCCD as part of the Districtwide strategic planning process for 2014-2020 (EVI).

The College mission is widely publicized and published on the College website (1.A.4.5) and in various documents including the:

- College Catalog (1.A.4.4)
- Student Handbook (1.A.4.6)
- Faculty Handbook (1.A.4.7)
- SLO Handbook: A Guide to the Writing, Assessing and Reporting of Student Learning Outcomes (SLOs) at Saddleback College (1.A.4.8)
- AUO Handbook: A Guide to the Writing, Assessing and Reporting of Administrative Unit Outcomes (SLOs) at Saddleback College (1.A.4.9)
- Program Review Handbook for Instructional Programs (1.A.4.10)
- Administrative Unit Review Handbook for Student Support and Administrative Services (1.A.4.11)
- Faculty, staff, manager, and administrator business cards

In addition, the mission appears on all Consultation Council agendas to serve as a reminder that the College mission must be considered in planning and decision-making. The mission, vision, and values are displayed in all division offices, in the library, and in the Student Services Center, as well as in lecture halls, conference rooms, and classrooms across campus. Finally, as part of the program review and administrative and student support unit review process, each program and administrative and student support unit has a mission that is aligned with the mission of the College, and these missions are reviewed every two years. (1.A.4.8, 1.A.4.9, 1.A.4.10, 1.A.4.11).

ANALYSIS AND EVALUTION

The College mission is widely publicized and serves to guide all planning and decision making at the College. The mission is reviewed regularly through the College's planning process, as part of the integrated strategic planning process, in response to data from internal and external scans, or at the recommendation of any participatory governance group (1.A.4.12, 1. A.4.10, 1. A.4.11). All constituent groups, including students, faculty, staff, managers, and administrators, participate in the review and revision of the College mission.

I.B. Assuring Academic Quality and Institutional Effectiveness – Academic Quality

I.B.1. The institution demonstrates a sustained substantive and collegial dialog about student outcomes, student equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement.

EVIDENCE OF MEETING THE STANDARD

Saddleback College faculty, classified staff, administration, and students engage in sustained and substantive dialogue regarding student outcomes, student equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement. The College has structured this dialogue through 1) academic departments and divisions, and student support and administrative units, 2) participatory governance groups and committees, 3) planning groups and committees, including strategic planning groups, and decision-making bodies, and 4) professional development activities.

Academic Departments and Divisions and Student Support and Academic Units

In academic departments and divisions as well as student support and administrative units, faculty, staff, administrators, students, and advisory group members work together to improve courses and programs and to develop strategies to improve student outcomes, academic quality, and institutional effectiveness. Extensive dialogue occurs through the program review (PR), and administrative unit review (AUR) processes (See I.B.5 for more detail). Program and administrative unit review teams collect, analyze, and interpret data regarding programs and services and make recommendations to improve their effectiveness (Link PR/AUR Handbooks). PRs are discussed and approved in Academic Senate meetings, and AURs are discussed and approved in Management Team meetings. Once approved, the reviews are posted in TracDat and on the EPA SharePoint site, where they are available to all employees. In many cases, PRs and AURs are also posted on department or unit websites where they are available to the public. Once every four years, each academic program, student support unit, and administrative unit presents a summary of accomplishments, challenges, needs, and plans to Consultation Council (CC), the principle decision-making body at the College (minutes of CC with PR shared). Questions and discussion follow this presentation.

In academic departments and divisions, faculty work collaboratively and engage in ongoing discussions as they determine how to use SLO results to improve instruction and increase student success. In student support and administrative units, administrators, managers, faculty, and staff work collaboratively and engage in ongoing discussions as they determine how to use AUO results to improve their services and more effectively contribute to increased student success.

Participatory Governance Groups and Committees

Participatory governance is an essential part of planning and decision-making as well as the cornerstone of dialogue at the College. Each constituent group is represented by a

body which serves as the voice of that group in planning and decision-making. During constituent group meetings, dialogue and debate is essential prior to consensus or voting. Each group also elects their own representatives to Collegewide and Districtwide participatory governance committees.

The Academic Senate represents faculty and is primarily responsible for making recommendations with respect to academic standards and professional matters. The California School Employees Association (CSEA) and Classified Senate represent classified employees and their interests. Through the Associated Student Government (ASG), students participate in governance and planning as well as other College and Districtwide committees ([Link to Governance Manual Committee descriptions p. 11 & 12](#)). In participatory governance committees, members are responsible for soliciting input from their peers and representing them at the meetings. Broad participation in meetings is encouraged, and input from committee members from each constituent group receives serious consideration prior to consensus or voting. Committees that provide a forum for sustained collegial dialogue on outcomes, equity, quality, effectiveness, and continuous improvement are many. These committees include advisory groups, Accreditation Steering Committee and standard teams, Basic Skills Initiative Committee, Curriculum Committee, Economic and Workforce Development Committee, Educational Planning and Assessment Committee, Equity and Diversity Committee, Honors Board, Matriculation Advisory Committee, Online Education Committee, Outreach Committee, strategic planning groups, Student Equity Plan Committee and work groups, the Student Services Coordinating Committee and work groups, and the Technology Committee, among others ([LINKS](#)). (Committees from Academic Senate Web site [link here](#))

All meetings are open to the College community. In order to communicate the work of the committee to other members, minutes are posted on each committee's SharePoint site. Members also make regular presentations at their constituent group meetings.

Planning Groups and Committees

The primary planning and decision-making committees at the College are Consultation Council (CC) and PBSC, both of which are supported by the work of other committees, including strategic planning groups, EPA, Enrollment Management Committee, Student Equity Plan Core Team, Student Success Coordinating Committee, and Technology Committee, among others. The CC is the College's main strategic planning and recommending body and is composed of members from all constituent groups. PBSC is the College's coordinating body for planning and budgeting processes at the College, including strategic planning ([link](#)). These committees engage with, and regularly dialogue about, outcomes, equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement. EPA has the explicit responsibility of overseeing the College's efforts to engage in ongoing quality improvement and to document how the College fulfills its mission through outcomes assessment

and systematic review at the program and administrative unit level. EPA also promotes Collegewide dialogue related to outcomes assessment and PR/AUR through ongoing presentations during Professional Development Week, at Academic Senate and Membership Team meetings, and during special programming, such as the Student Success Metrics Summit and the Online Education Summit (B.1 1.11 Educational Planning and Assessment (EPA). (Link to PD schedule or presentation). The co-chairs of PBSC oversee and coordinate all planning processes at the College. They also ensure that the Strategic Plan as well as integrated plans and initiatives are updated regularly and broadly communicated.

Dialogue related to the activities of all planning and decision-making groups is well documented and shared through websites and SharePoint sites of the committees and work groups involved in establishing and evaluating these processes (Link SSSP, SEP, BSI, EMP, EWD and TP minutes). A more detailed discussion of the integrated strategic planning process follows in I.B.9. OPRA and the AVPIE have also promoted dialogue through campus-wide presentations and discussions related to student success metrics, institution-set standards (ISS), and the Institutional Effectiveness Partnership Initiative (IEPI). (Minutes to PBSC, student success metrics summit, etc).

Professional Development Activities

The College offers employees, and particularly faculty, a variety of opportunities to participate in professional development (PD) and to dialogue about academic quality and continuous improvement of student learning. Each semester PD Week provides multiple opportunities for faculty to meet and discuss student learning outcomes, student equity, the quality of programs and services, and initiatives related to student achievement. Experts on teaching and learning, including College faculty, share their knowledge, skills, and expertise on topics such as new instructional strategies, the use of technology in the classroom, responding to changing student demographics, improving computer skills, and utilizing campus resources to improve student outcomes and success (link to the PD schedule here). Every year during PD week, the chancellor and college president report on the state of the District and College, including all planning efforts and continuous improvement activities. (1.B.1.1 Annual State of the College: A Culture of Excellence need link). Presentations—in relation to activities, achievements, and ongoing work to support students and their success—are also made by committees and planning groups, such as the Accreditation Steering Committee, EPA, the Student Success Coordinating Committee, and Student Equity Plan Core Team (1.B.1.2, Student Success Coordinating Committee Update – need link and Student Equity Plan Presentations – need links to spring 2016 flex week presentations x 3).

Ongoing dialogue around best practices in teaching and learning has resulted in the updated Faculty Center for Student Success (FCSS) and the reinvigorated Institute for Teaching and Learning (ITL). Workshops and seminars presented by the FCSS and the ITL include class assessment practices, basic skills instruction across the curriculum, online course design, and

best practices in online instruction, among others. Through the FCSS, one-on-one, small group, and online meetings promote dialogue related to instruction and technology, and are widely available for faculty with the goal of improving instructional delivery and student learning (link to website). In addition to professional development opportunities on campus, funding is available through the Academic Senate for full-time and part-time faculty who seek to attend off-campus conferences and workshops (should we say over XXX faculty received funding for professional development in 2015 – 2016.). The College also offers faculty the opportunity to participate in The Great Teachers Seminar, an annual off-campus retreat that allows faculty to share best practices and improve instruction and student learning in a collegial, supportive environment (EVI). Dialogue related to the need for increased PD opportunities for classified staff to improve their ability to support student learning and institutional effectiveness has resulted in new PD opportunities. (Link to Group to Team +?)

Sustained dialogue related to online education occurs in the Online Education Committee (OEC). Two full-time faculty members co-chair the OEC with support from the dean of online education and learning resources (OELR). Discussions during OEC meetings focus on quality instruction, instructional technology best practices in online education, faculty training, curriculum approval for online courses, and the evaluation of learning management systems (LMSs) (Cite minutes from a typical meeting).

Evaluation of academic quality for both face-to-face and online courses occurs in the Academic Senate, the Curriculum Committee, the EPA, and in the OEC. Dialogue related to student outcomes and the comparability of student experiences based on instructional method also takes place in these committees.

ANALYSIS AND EVALUATION

The College has a variety of forums that promote dialogue on outcomes, student equity, academic quality, institutional effectiveness, and the continuous improvement of student learning and achievement. Sustained collegial dialogue is evident within academic divisions and departments, student support units, administrative units, and in committees across the campus, as well as during special programming. A comprehensive approach to assessing SLOs/AUOs coupled with ongoing PR and AUR fosters dialogue among faculty, staff, administrators and students with the intention of continually improving the College's courses, programs, and services in order to increase student learning. (See 1.B.2 SLOs, 1.B.5 PR/AUR and 1.B.9 institutional planning) (Link to SLO, AUO, PR, AUR handbooks and links). The Employee Survey found that 67 percent of all employees reported to have participated in PR/AUR within their department or unit (Link to Employee Survey 2013).

Participatory governance groups and committees, as well as planning groups and committees, focus on continuous improvement of student learning and achievement. Through the College strategic planning process, including evaluation of goals and objectives, dialogue is substantive,

sustained, and central to the College's commitment to student success, basic skills instruction, student equity, academic quality, institutional effectiveness, professional development, and online education.

Although the College websites and SharePoint sites are replete with evidence of dialogue from programs and units, participatory governance groups, and planning committees and groups, evidence of dialogue from committees outside of these key bodies is documented inconsistently. An opportunity to expand and sustain dialogue Collegewide through an improved, consistent committee process and improved documentation of dialogue was identified through the Accreditation self-evaluation process. Improved processes related to College committees, including roles, structures, and communication, were approved through the participatory governance process and communicated through the Organizational Planning Manual (pending approval Link). Additionally, a QFE related to student success metrics was undertaken to enrich the dialogue about, and to encourage the integration of, student success metrics in discussions related to student outcomes, equity, academic quality, effectiveness and continuous improvement of student learning and achievement.

I.B.2. The institution defines and assesses student learning outcomes for all instructional programs and student and learning support services. (ER 11)

ER 11 The institution defines standards for student achievement and assesses its performance against those standards. The institution publishes for each program the program's expected student learning and any program specific-achievement outcomes. Through regular and systematic assessment, it demonstrates that students who complete programs no matter how or where they are offered, achieve the identified outcomes and that the standards for student achievement are met.

EVIDENCE OF MEETING THE STANDARD

Student Learning Outcomes for Instructional Programs

The College evaluates student achievement through the assessment of student learning outcomes (SLOs) and through the assessment of student success indicators during the PR process. The assessment of student learning outcomes (SLOs) has been in place at the College for over a decade utilizing the process described in the SLO Handbook: A Guide for the Writing, Assessing, and Reporting of Student Learning Outcomes (SLOs) at Saddleback (I.B.2.1) and the Program Review Handbook for Institutional Programs (LINK). SLO assessment is a means to determine if students are learning what they are expected to learn in courses and programs (Link I.B.2.1). The use of SLO assessment results is meant to stimulate discussion and direct activities to improve instructional delivery and student support on campus.

Faculty within a department or program develop course-level SLOs, program SLOs (PSLOs), and program-specific achievement outcomes related to indicators such as success and retention

rates, or specific ISSs, as discussed in more detail in I.B.5 below. The College, through its Educational Planning and Assessment Committee (EPA), has also developed institutional student learning outcomes (ISLOs), which outline the knowledge, skills, and abilities that students should expect to achieve as the result of completing a degree at the College.

Courses must have a minimum of three to five associated SLOs, and programs must have a minimum of three to five PSLOs. Course-level SLOs are assessed annually in each course taught. SLOs are placed on course syllabi to inform students of what they can expect to learn by the end of the course [reference Senate resolutions April 2014]. SLOs, methods of assessment, criteria for success, and assessment results are stored in the TracDat system. Department chairs are primarily responsible for entering SLO information into TracDat. They are also responsible for the overall coordination, development, assessment, and reporting of SLOs. Division deans collect course syllabi each semester to verify that SLOs are placed on every syllabus. SLOs are not currently an official part of the Course Outlines of Record (CORs). However, this practice is projected to be rectified within the next five years as each course goes through the curriculum review process. Nonetheless, these SLOs are available to all faculty on TracDat and to students through course syllabi. SLOs are also posted on many department and program webpages. PSLOs are published on department and program webpages and included in the College Catalog. ISLOs are published on the College website and in the College Catalog (Link catalog).

Within TracDat, course-level SLOs are linked to PSLOs and to ISLOs, so that attainment of criteria at each level can be evaluated. Every two years during PR, the department chair runs the *TracDat Comprehensive Program SLO Report*, which provides a summary of all SLOs, criteria for success, assessment results, and the uses of those results. This report forms the basis of dialogue within the department.

During the PR process, Program Review Teams (PRTs), led by the department chair, engage in dialogue about SLO attainment and provide examples of how SLO results have been used in courses and programs to make changes, such as in curriculum or teaching methodologies (Link PR Handbook). The PR process includes an examination of how SLO assessments contribute to overall PSLO and ISLO attainment, and how SLOs have been used to improve courses and programs. PRTs also analyze SLO results to determine if there are differences when comparing face-to-face course results to those of online education courses. The PRTs then determine actions to remedy any differences identified.

In 2014-2015, 100 percent of 838 unique courses had established SLOs, 2581 (98.5 percent) SLOs were assessed, and 2,366 (90.3 percent) of course-level SLOs met their criteria. (Annual SLO Report I.B.2.3). Examples of how faculty have used SLO results to make courses and programs more effective are recorded in TracDat and summarized in the Annual SLO Report produced by EPA. Examples of changes include altering the mode of instruction, revising course outlines, creating rubrics to clarify assignments, increasing referrals to tutors in the LRC

Tutoring Center, modifying the admission criteria for the Nursing Program, and adding lecture content and learning activities to enhance student skills. (Annual SLO report; Link to Saddleback College SLOs, PSLOs, ISLOs Results and Using Them, Fall 2015). Examples of PSLO attainment and the use of PSLO results from 2014-2015 are also published in the Annual SLO Report (Annual SLO Report p. 7 – 10). Several programs have also set achievement goals that have become program-specific institution-set standards which have been documented in the ACCJC Annual Report and are posted on the EPA webpage (Link ACCJC Annual Reports 2015, 2016 and EPA Website).

As a result of their overall experience at the College, students should expect to develop knowledge, skills, and abilities across four broad areas identified by the following ISLO categories: effective communication, intellectual and practical skills, community/global consciousness and responsibility, and breadth of subject area knowledge. In TracDat, SLOs and PSLOs are mapped to ISLOs. This roll up makes it possible to create a report that can be used to evaluate ISLO attainment. While this report does currently exist, it is difficult to interpret and use in an efficient and meaningful way. The EPA is currently working on revising the report to make it more useful. ISLOs, however, are currently evaluated through other means, such as faculty ISLO activity reports, CLA+ testing, and activities in the Leadership Lab. Faculty generate faculty ISLO activity reports. These reports describe activities that build ISLO attainment. CLA+ is an external performance-based assessment used to evaluate critical thinking, written-communication skills, analysis and problem-solving, scientific and quantitative reasoning, and critical reading and evaluation. CLA+ assessment was implemented to evaluate student attainment of ISLOs in the 2015-2016 academic year (Link to results). In addition, a pilot project on the use of ePortfolios as a method to assess ISLO attainment took place in 2015-2016. The model used required students to upload signature assignments that assessed one or more of the College's ISLOs and to write a short reflection on their realization of those ISLOs. Both the faculty who participated and the ePortfolio evaluation task force considered the pilot successful; plans for Collegewide implementation of this model are currently underway (Annual SLO Report p.14).

Administrative Unit Outcomes for Student Support Services

The assessment of administrative unit outcomes (AUOs) in student support and administrative units is also well established at the College as described in the AUO Handbook: A Guide for the Writing, Assessing, and Reporting of Administrative Unit Outcomes (AUOs) at Saddleback College (1.B.2.2) and the Administrative Unit Review Handbook for Student Support and Administrative Services (Link). AUO assessment is a means to discover if student support and administrative units are providing effective services to their constituencies—be they students, employees, or the community (1.B.2.2) AUO assessment results stimulate discussion and direct activities to improve student support and administrative services on campus. During the AUR process, Administrative Unit Review Teams (AURTs) examine the effectiveness, efficiency,

quality, and relevance of their unit. The goal of the AUR process is to improve student learning and success through appropriate student support and administrative services (Link AUR Handbook). Improved outcomes as a result of AUR include changes in the hours of service, increased one-on-one student contact, revised documentation, and increased access to services online.

Disaggregation of Results

The disaggregation of achievement results according to student characteristics (such as age, gender, and ethnicity) is possible through the inFORM Data Warehouse. These disaggregated results include retention, success rates, transfer rates, and certificate or degree completion rates (See more detail in 1.B.5 and 1.B.6 SEP). Through InFORM, programs are also able to disaggregate data for individual classes by instructional mode (online versus face-to-face) in terms of success, retention, and completion rates. These reports are run every two years when a program undergoes PR, and they form one of the primary sources of data used in the PR process.

The disaggregation of SLO results in TracDat has only recently been required and is limited to method of delivery. Many programs are still in the process of implementing this change. In relation to student characteristics, however, the College has always used aggregated data in order to discuss overall results within a course and program without linking it back to particular faculty or students. The College believes that the purpose behind SLO assessment is to engender a vital dialogue amongst faculty about how to improve instruction in order to achieve greater student success. If results were attributable to individual students and, thus, individual faculty, this would compromise this essential dialogue. Ongoing dialogue is taking place within the EPA Committee about the benefits of moving to a disaggregated method of obtaining and reporting SLO assessment results. In fall 2016, the EPA implemented a way to input SLO data by method of instruction so the College can make comparisons between courses offered face-to face and courses offered online.

ANALYSIS AND EVALUATION

The College has well-established processes that define and assess outcomes for all courses, instructional programs, student support and administrative units, and degrees. SLOs and AUOs are assessed annually and serve as a basis for dialogue related to continuous quality improvement within all departments, programs, and student support and administrative units. The PR and AUR process evaluate SLO, PSLO, AUO, and program-specific achievement data. In the PR data sets available through the inFORM Data warehouse, programs have access to significant student success data disaggregated by student characteristics and instructional method. However, the College has only recently begun to disaggregate SLO data by instructional method. The College is still considering the disaggregation of SLO data by student characteristics as this process would require a significant shift in how this data is currently collected and reported. QFE statement needed for success metrics

I.B.3. The institution establishes institution-set standards for student achievement, appropriate to its mission, assesses how well it is achieving them in pursuit of continuous achievement, and publishes this information.

Eligibility Requirement 11 Student Learning and Student Achievement

The institution defines standards for student achievement and assesses its performance against those standards. The institution publishes for each program the program's expected student learning and any program specific achievement outcomes) Through regular and systematic assessment, it demonstrates that students who complete programs no matter how or where they are offered, achieve the identified outcomes and that the standards for student achievement are met.

EVIDENCE OF MEETING THE STANDARD

The College has established institution-set standards (ISS) for all required student achievement metrics. The ISS are assessed annually, published in the ACCJC Annual Report, and posted on the OPRA and SharePoint websites, where they are available to all College employees. (Evidence I.B.3.1 Link to ACCJC Annual Reports 2014, 2015, 2016). In 2012-2013 the Office of Planning, Research and Accreditation (OPRA) lead Collegewide dialogue related to setting internal standards of performance. The OPRA developed three methodologies that included using state and national databases to identify peer institutions as well as historical institutional performance to identify and adopt standards. These three approaches to ISS development were presented and discussed by the Academic Senate, the EPA committee, the VPI Council (consisting of instructional deans and academic and classified administrators), the broader college management team, and the Consultation Council. The College developed institution-set standards for three metrics in the annual report: course completion rate, completed awards/certificates, and annual transfers. The standards adopted for all three metrics were set by adding the three-year standard deviation to a three-year running average. This method was used to present the ISS in the 2014, 2015 and 2016 ACCJC Annual Reports (Link to ACCJC Annual Reports 2014, 2015, 2016)).

In 2015-2016, new leadership in research and institutional effectiveness re-engaged in dialogue about set standards and identified that the approach and calculations previously used were more reflective of set standards that were more aspirational in nature than minimum thresholds or baseline expectations. Following this dialogue, the OPRA proposed a change to the calculation of the set standards (using the three year running average minus one standard deviation) so that the resulting ISS would be reflective of minimum thresholds rather than aspirational goals. These modifications were approved through the College's shared governance process, and the proposed changes were highlighted at the Student Success Metrics Summit and in governance meetings (Link, Student Success Metrics Summit, AS, PBSC, CC minutes). In the 2017 ACCJC Annual Report, the College will adopt this new calculation for set standards.

Each year, the College evaluates its performance against the ISS and promotes dialogue about ISS through instructional areas, constituent groups, through the AS, the PBSC, and CC (AS, PBSC, CC minutes 3/816). When the College does not meet the ISS, emphasis is put on deep dialogue through instructional areas and constituent groups as well as investigation by the research department to examine the college's performance (Link Trend and Historical reports OPRA). Institution-set standards for student achievement appropriate to the mission inform both the College and Districtwide Strategic Plans (Link Standard 2 Success and Transfer rates in Strategic Plan). Finally, the College reports the findings to the ACCJC in the annual report and publishes the report on the OPRA and SharePoint sites (Minutes CC and PBSC).

In addition to the required ISS, in 2015, the College chose to set program-level ISS for specific CTE programs. Although many of these programs have had standards of achievement for years through the internal PR process, formally identified ISS for CTE programs were first reported in the ACCJC Annual Report in 2015. Licensure examination pass rates and graduate employment rates were also added to the college ACCJC Annual Report in 2015. The achievement of each programs' specific ISS are published in completed program reviews, entered into TracDat, and posted on the EPA SharePoint site. Instructional programs set standards for achievement using state and national benchmarks and trends, historical data, input from advisory boards, and labor market trends. For programs regulated by external accreditation standards, the program ISS are typically at or above the state and national averages. If a program falls below their set standards, program faculty and administrators put action plans in place to improve outcomes; they also publish these action plans in the PR. The charts below demonstrate how all programs met or exceed their ISS for student achievement in both licensure exam pass rates and job placement rates.

Program-Level Institution-Set Standards

Program Title	Institution-set Standard for Licensure Exam Pass Rate	Licensure Exam Pass Rate 2013-2014
Cosmetology	75%	76.5%
Emergency Medical Technician	60%	63%
Medical Lab Technician	90%	100%
Nursing	90%	94%
Paramedic	90%	99%

Licensure Exam Pass Rates

Program-Level Institution-Set Standards

Program Title	Institution-set Standard for Job Placement Rate	Job Placement Rate 2013-2014
Administrative Medical Assistant	60%	68.4%
Alcohol and Drug Studies	60%	66.7%

Cinema	50%	50%
Clinical Medical Assistant	60%	77.3%
Cosmetology	55%	66.7%
Early Childhood Teacher	60%	64.4%
Horticulture	60%	41.7%
Nursing	80%	82.4%
Paramedic	70%	100%

Job Placement Rates

ANALYSIS AND EVALUATION

The College uses institution-set standards to analyze institutional effectiveness and academic quality. Methods used to set ISS align with common practices statewide. Institution-set standards also align with the mission of the College and are integrated into the College's Strategic Plan. The College has also adopted standards beyond those required by the Commission by including program-level institution-set standards related to licensure and graduate employment.

The College first set ISS in 2014. However, in 2016, when reevaluating the process used to set ISS, it was determined that there was an error in the calculation used to produce the ISS and the intent of the ISS for setting a minimum threshold. The new director of research identified this calculation error. The College quickly reported the methodological concern to the ACCJC and cited it as an error in the previous year's approach ([Link to communication email evidence](#)). The College intends the ISS to reflect a minimum standard of performance; when results are below the set standard, the institution is alerted to the problem so corrective action can be initiated to improve institutional performance. As a result of the previous method used to set the ISS, the standards that were set were very high and actually unrealistic. After studying historical data and trends, it was determined that a much more appropriate ISS would be derived from using the three-year average minus one standard deviation rather than plus one standard deviation. The difference in reference to course completion was an institution-set standard of 70.39 percent as opposed to the previously calculated 74.17 percent. The proposed method to set appropriate ISS was presented to planning and governance committees, and the director of planning, research and accreditation shared the method at the spring Student Metrics Summit ([Link to minutes AS, CC, PBSC and Metric summit presentation](#)). In response to this discovery, the College was initially going to submit the College ACCJC Annual Report late with a notation about changes to the ISS, but subsequently determined, in correspondence with ACCJC, that a late annual report to ACCJC would not be prudent ([Link to correspondence](#)). Thus, the College kept its ISS the same as prior years, but has already addressed the change Collegewide and is at work addressing matters that came up concerning ISS in this self-study report. The upcoming ACCJC report will reflect these changes. The College has undertaken a QFE on student success metrics to formalize the structure, process and communication surrounding student success metrics, including ISS.

I.B.4. The institution uses assessment data and organizes its institutional processes to support student learning and student achievement.

EVIDENCE OF MEETING THE STANDARD

The College uses assessment data to support student learning and student achievement. The College uses data from assessment of students, courses, programs, and services, as well as assessment data at the institutional level, to improve processes and student outcomes (See 1.B.2, 1.B.3, 1.B.5, 1.B.9). Assessment data constitutes the foundation for student placement, SLO/AUO attainment, the review of programs and student support and administrative units, and the evaluation of student achievement. (1.A.2, 1.B.1, 1.B.2, 1.B.3, 1.B.5). Assessment data is integral to the Strategic Plan and Integrated Plans, including the Student Equity Plan (SEP), the Technology Plan, the Economic and Workforce Development (EWD) Plan, and the Enrollment Management Plan (EMP) as described in 1.B.2, 1.B.3, 1.B.5, 1.B.6, and 1. B.9.

The assessment and the obtainment of data begin when a student applies to the College. Important information regarding student characteristics and educational goals is gathered at this time. Through the matriculation process, the College assesses students to ensure their placement in appropriate courses. This placement makes it possible to identify students at risk, track cohort achievement and gaps, and institute needed services to improve student learning outcomes and achievement. Awaiting overview statement about SSSP activities that changed processes to promote learning and achievement like Freshman Advantage, Refresh, AVID, BSI tutoring etc,... In addition, each semester the College provides a Class Profile of student characteristics and matriculation levels of enrolled students to each faculty member so that faculty can correlate teaching methods to the various needs within the class (EVI).

As described in 1.B.2., assessment of SLOs and AUOs is a well-established process that has been in place for over a decade at the College. Using SLO and AUO assessment results, the College makes changes to courses, programs, and student support and administrative services. Programs and units use this data, along with the PR data sets on student success and retention rates within courses, to evaluate their strengths and weaknesses during the PR and AUR processes and to make necessary changes to improve student learning and achievement.

Invested parties use data from PRs and AURs to identify needs and to derive resource requests, as well as to address progress in meeting objectives from the previous PRs and AURs. Examples of PR and AUR assessment to support student learning and achievement include: (solicit examples from dept chairs and administrators). PRs for CTE programs also include labor market data. Several CTE programs have used labor market data to support growth and expansion including the Health Information Technology Program, the Medical Assistant Program, and the Drug and Alcohol Education Program (Link to the PR of these programs). The AUR process has led changes that promote student achievement in the following organizational processes: (solicit examples from dept chairs and administrators).

To coordinate Collegewide efforts to use assessment data for the improvement of institutional effectiveness and in support of learning and achievement, the College created the position of the assistant vice president for institutional effectiveness (AVPIE) in 2015. The AVPIE reports to the vice president of instruction (VPI) and works closely with the director of OPRA. In addition to institutional effectiveness, the AVPIE is responsible for online education, curriculum, and student success (See org chart AVPIE and VPI). The director of OPRA is responsible for leadership, coordination, and advocacy related to strategic planning, institutional research, and achievement metrics, as well as federal and state compliance to ensure institutional effectiveness.

Achievement metrics including completion rates (for prepared and underprepared students), degrees, certificates, transfer, and achievement gaps, are integrated into strategic planning through goals and objectives related to success and their related indicators. Achievement relative to ISS is reported annually to the ACCJC, is published in the ACCJC Annual Report, and is made available on the OPRA website (Link to ACCJC Report 2016). In addition, through OPRA, institutional assessment and achievement data is further analyzed from a historical perspective to identify trends and to enable statewide comparisons. These analyses include Scorecard Trend Reports, Data Mart Trend Reports, and Institutional Data Trend Reports, all of which are available on the OPRA website (Link to Research OPRA College Data Website). As described in 1. B.3., if institutional performance falls below the ISS, the College takes action and initiates strategies to improve performance. The AVPIE and the director of OPRA also help strategic planning groups use assessment data to set goals and evaluate performance relative to the Institutional Effectiveness Partnership Indicators (Link to Saddleback College Institutional Effectiveness Partnership Initiative).

OPRA also supports Collegewide needs for data and research. In addition to the director, the OPRA staff consists of a senior research and data analyst, a research and data analyst, and a project specialist for research. OPRA's research responsibilities include working closely with the AVPIE, as well as College faculty, administrators, and PRTs/AURTs to provide data analysis and outcomes assessment related to SLOs/AUOs, PSLOs, ISLOs, program operations, and program impact. Research staff members also support College data collection and reporting needs as required by state and federal accountability initiatives and compliance with state and federal laws and regulations. Research staff members work closely with and support the **Education Planning and Assessment Committee (EPA)**.

In order to document ongoing quality improvement efforts as well as student learning and achievement, EPA coordinates and oversees the College's efforts to engage in comprehensive review and outcomes assessment in all courses, programs, and student support and administrative units. Both PR/AUR, SLO/AUO assessment and curriculum fall under the auspices of EPA. A faculty member and the director of planning, research and accreditation co-chair EPA. Faculty coordinators oversee SLO/AUO assessment, while a faculty chair of the Curriculum Committee

oversees PR/AUR and curriculum. To support student learning and achievement, the EPA, with approval from PBSC and Academic Senate, regularly evaluates, updates and improves the effectiveness of the PR/AUR, SLO/AUO, and curriculum processes (Link to current SLO, AUO, PR, AUR Handbooks).

PBSC is a participatory governance committee that is responsible for coordinating the College's planning efforts, including strategic planning, budget processes, and dialogue regarding student success metrics, ISSs, and IEPs. The PBSC makes recommendations to CC. CC, a participatory governance council, serves as the College's main planning and recommending body, and is responsible for making final recommendations to the college president.

In addition to the data available through the California Community College Chancellor's Office (CCCCO) Student Success Scorecard and the CCCCCO Management Information Systems Data Mart, the College has continuous access to quantitative institutional data through the InFORM Data Warehouse. Through InFORM, various data sets and reports can be generated and disaggregated to provide detailed information by section, course, program, division, or whole College about enrollment, productivity, fill rates, retention, success rates, student counts by age, gender, ethnicity, educational goal (including transfer), and awards by type, age, gender, and major.

ANALYSIS AND EVALUATION

The College regularly and systematically uses assessment data to support student learning and achievement. Assessment data comes from a variety of sources and is integrated into planning, program and administrative unit review, resource allocations, and the evaluation of institutional effectiveness through student success metrics, which are available both externally and internally. A fully staffed OPRA, the addition of the AVPIE, and the InFORM Data Warehouse supported by district services personnel, are all evidence of the College's commitment to an organizational structure and processes that are focused on using assessment data to support student learning and student achievement.

Although data is widely available at the College, dialogue related to student success and achievement in relationship to goal setting and the monitoring of goal attainment is limited. As a result, there are missed opportunities to disseminate effective strategies to set meaningful goals and to expand on past work that has the potential to more broadly support learning and achievement. Therefore, the College has identified the need for a Quality Focus Essay related to both the development of a deeper understanding of student success metrics Collegewide and the role that individual departments and units can have on larger institutional outcomes and student achievement.

I.B.5. The institution assesses accomplishment of its mission through Program Review and evaluation of goals and objectives, student learning outcomes, and student achievement. Quantitative and qualitative data are disaggregated for analysis by program type and mode of delivery.

EVIDENCE OF MEETING THE STANDARD

Every two years, all instructional programs at the College undergo program review (Link to PR handbook) and all student support and administrative units undergo administrative unit review (AUR) (Link to AUR handbook). These reviews are a means to evaluate the effectiveness of programs and units in meeting the mission of the College, to develop objectives and action steps for continuous quality improvement, and to provide information for decision-making in Collegewide planning and resource allocation processes.

PR is a systematic process for the collection, analysis, and interpretation of data concerning a program and its curriculum and is a means to make recommendations to improve student learning, student achievement, and program effectiveness. Data from a variety of sources is analyzed in the completion of the PR; this data includes staffing reports, SLO assessment results (TracDat Comprehensive Program SLO Report), program progress reports (TracDat Program Objectives and Action Steps Progress Report), student achievement data from the data warehouse (inFORM Program Review Data Set), and, for CTE programs, labor market data from Economic Modeling Specialists, Inc. (EMSI). Additional research can also be requested from OPRA and included in the analysis. All data available through the inFORM Data Warehouse can be disaggregated by program and instructional method (such as face-to-face and online). The College has also recently begun to collect and report SLO data by instructional method.

As described in the Program Review Handbook for Instructional Programs, the following are the primary objectives of PR:

1. State program objectives and align future objectives with the College's mission and vision.
2. Collect and analyze data on key performance indicators, SLOs, program activities, and accomplishments.
3. Examine and document the effectiveness of programs.
4. Develop recommendations and strategies concerning future program directions and needs (e.g., budget, staffing, and resources).
5. Provide an opportunity for programs to assess their relevance and position within the division and the college and with all other stakeholders.
6. Comply with federal and state law, Title 5, Student Equity, Perkins, the Student Success and Support program (formerly known as matriculation), ADA (Americans with Disabilities Act), and other legal or certification requirements. (PR Handbook, p. 3 08/15/2014).

The PR is completed by a Program Review Team (PRT) composed of the department chair, one or more faculty subject experts, and other faculty staff, and/or administrators deemed necessary

by the department chair. PR has three sections: the program overview and objectives, the review report, and a needs assessment. The appendices include copies of all data sources used in the completion of the report. The program overview and objectives provide a broad understanding of the program, current trends related to the program's mission, how the program meets the overall mission and/or vision of the College, how the program has used SLO results to make improvements to the program and its curriculum, how SLO assessments contributed to overall PSLO and ISLO attainment, and the program objectives for the upcoming two-year period. A detailed assessment of the program based on the collected quantitative and qualitative data is completed in the review report section. This section addresses issues related to staffing, curriculum and instruction, student success, facilities, technological infrastructure, resources, service, community outreach, and economic development. The final section, the needs assessment, is a summary of program needs as described in the review report. These needs include human resource needs, instructional/service needs, research needs, facility needs, marketing and outreach needs, as well as technology, equipment, and other resource needs.

Student support and administrative units undergo a similar process for AURs. AUR is a systematic process for the collection, analysis, and interpretation of data concerning an administrative unit. An AUR is utilized in making recommendations to improve the effectiveness of the unit and its impact on student learning and student success. The following are some of the varied sources of data analyzed in the completion of the AUR: staffing reports, AUO assessment results (TracDat Comprehensive Unit AUO Report), unit progress reports (TracDat Unit Objectives and Action Steps Progress Report), and student achievement data from the data warehouse (inFORM Division Administrative Unit Review Report). Additional research can also be requested from OPRA and included in the analysis. The EPA Committee, the faculty PR/AUR coordinator, and OPRA provide assistance for the collection and interpretation of data for PRs and AURs.

Annually, resource allocation requests are developed for new resources that will augment a given program's ability to fulfill its mission. ([Link to Resource Allocation Process and Model](#)). In order to submit a resource allocation request, a program's need must be documented and specifically referenced in the most recent PR/AUR. Preference is given to needs also identified in the current Strategic Plan. The prioritization of resources takes place first at the division level, then at the "branch" or vice presidential level, then at the college level by the College Resource Committee (CRC). The college president approves the final allocation of resources. The PBSC reviews budgets, recommends funding to apply CRC priorities, and, finally, the College Administrative Services allocates funds for the approved requests. As a result of this process, instructional programs, as well as student support and administrative services, are able to identify needs, solicit resources, and implement changes to improve institutional effectiveness and academic quality.

EVALUATION AND ANALYSIS

The College assesses the accomplishment of the mission through PR and AUR, which include an evaluation of program/unit objectives and action steps, SLOs/AUOs, and student achievement data. Program/unit objectives and action steps are aligned with the College mission, vision, and strategic plans. In addition, each PR/AUR addresses the way in which it serves to help the College achieve its stated mission. PR/AUR is a means of ensuring that, within the limitations of available resources, the College's programs and services are effective and responsive to the student body and the local community. Through a review of SLOs/AUOs, key program indicators, and detailed data sets on student achievement, the College is able to evaluate its educational effectiveness and develop plans for ongoing improvement. The results of PR/AUR are incorporated into the strategic planning and resource allocation processes of the College and provide information for future planning for, and improvement of, the College's programs and services.

Data required to support PR is readily available through the inFORM Data Warehouse, TracDat, and EMSI. Furthermore, OPRA supports additional research, including student surveys. Both qualitative and quantitative data are disaggregated for analysis by program and instructional method. In the past, SLO data was not disaggregated by instructional method. The field for instructional method was added into TracDat in 2015-2016 and henceforth all future assessment reporting will be collected, reported, and analyzed in disaggregated form.

Although PR/AUR are aligned with the College mission, and the results of PR/AUR are incorporated into strategic planning and resource allocation, it has been identified that at the program, student service, and administrative-unit levels, more could be done to impact and support student achievement at the institutional level. A Quality Focus Essay that addresses authentic goal setting and the utilization of data and research to support student achievement and success at the institutional level emerged from the self-evaluation for accreditation.

I.B.6. The institution disaggregates and analyzes learning outcomes and achievement for subpopulations of students. When the institution identifies performance gaps, it implements strategies, which may include allocation of human, fiscal and other resources, to mitigate those gaps and evaluates the efficacy of those strategies.

EVIDENCE OF MEETING THE STANDARD

In many of its processes, the College disaggregates and analyzes learning outcomes and achievement data for subpopulations of students in order to examine performance gaps. The Student Equity Plan (SEP) is the primary mechanism for identifying and addressing performance gaps. In addition to the SEP, disaggregated data is used to measure key performance indicators relevant to student success in the College Strategic Plan, to assess the success of projects from the Basic Skills Initiative (See BSI link), and to analyze and address student success and achievement gaps through the PR process.

The Saddleback College Student Equity Plan

In 2014, the Student Equity Taskforce, with representation from all participatory governance groups, revised and aligned the SEP with new state mandates ([Link to Membership SEP](#)). The taskforce developed an updated SEP which focuses on improving student success for specific populations who may be disproportionately impacted by College practices, programs, or services. ([Link SEP 2015 p.29](#)).

The SEP analyzes student outcome and achievement data to measure the required student equity success indicators: access, course completion, English as a Second Language (ESL) and basic skills completion, degree and certificate completion, and transfer. The SEP identifies the disproportionate impact within specified populations for each indicator. The targeted populations include:

- American Indians/Alaska Natives
- Asians/Pacific Islanders
- African Americans
- Hispanics
- Whites, Non-Hispanic
- Men
- Women
- Current or former foster youth
- Persons with disabilities
- Low-income students
- Veterans ([Link to findings most current SEP See Link Disproportionate Impact Summary of Findings SEP p. 7](#))

Student equity work groups composed of members from all participatory governance groups were established to address each of the student equity success indicators: access, course completion, ESL and basic skills completion, degree and certificate completion, and transfer. In order to identify any disproportionate impact at the College, OPRA created a detailed report for each of the indicators in relation to the aforementioned populations. Student Success Scorecard data from the State Chancellor's Office was utilized to complete this report. Using this data, work groups composed of members from all participatory governance groups analyzed the data for disproportionate impact; developed strategies, goals, and activities to increase the success rates of the populations impacted; proposed timelines for completion of the identified actions and a budget; and recommended a means of evaluating outcomes. ([Link SEP Plans 2014, 2015](#)).

The State Chancellor's Office provided funding for the SEP initiatives. The amount received by the College was just over \$2 million, with \$714,516.00 allocated for the 2014-2015 academic

year and \$1,314,425.00 allocated for the 2015-2016 academic year. These funds enabled additional services for targeted populations in research, outreach, matriculation, counseling, financial aid, tutoring, and student mentoring. Specific actions taken included the hiring of a student equity outreach aide and additional financial aid specialists, the extension of cohort-based learning communities and peer mentors, the extension of tutoring hours, the development of “fast track” pathways, and the establishment of a bilingual (English/Spanish) transfer mentoring program ([Link to Presentation regarding SEP strategies and activities](#)).

For all three completion metrics included in the Scorecard (Degree/Transfer Completion, CTE Completion, and CDCP Completion), the College's success rates exceeded rates statewide (1.B.6.9). The Degree/Transfer Completion Rate at Saddleback for college-prepared students equals the state average. Meanwhile, for unprepared students, the College exceeds the state average. Completion rates for all metrics at the College are increasing more quickly than statewide increases. Since Hispanic students are seeking degrees or transfers at a rate that exceeds their representation in the student body, equity efforts in this area appear to be having a positive impact (1.B.6.8). (See Figure 8 Saddleback College and Statewide Trends in Completion Rates by level of Preparation).

The College integrates SEP the Strategic Plan and aligns it with major planning efforts and initiatives, including SSSP and BSI ([Link to Strat Plan and BSI](#)). The SEP core indicator groups monitor and coordinate the evaluation of the SEP in partnership with major College leadership councils, including the Consultation Council, the Student Success Coordinating Committee, and the PBSC. Activities and progress toward meeting the goals of the SEP are reported to the Student Success Coordinating Committee and integrated into the Strategic Plan as part of Goal two (See SSSP update book reference to SEP). The SEP is then forwarded to the PBSC and CC for input, discussion, and to address barriers to successful achievement of the identified goals ([Link to SEP in Goal two Strat plan, PBSC or CC minutes](#)). The SEP is a three-year plan that is evaluated annually and updated or revised as needed.

The SEP—including activities, action steps and progress towards achieving goals—is shared widely. Each fall the SEP is shared with each participatory governance group and the BOT, who are also provided an opportunity to engage with the SEP chair, core team leaders, and work group members ([Link to the SEP PowerPoint 2015 on SharePoint now as well as minutes from participatory gov group presentations](#)). The SEP activities and outcomes are also shared widely during Professional Development Week ([Link to professional development schedule spring 2016](#)).

Program Review and Achievement Data

The PR process requires each program to conduct a regular self-evaluation that leads to program improvements, the identification of program needs, and resource allocation requests. Data used for the completion of the PR includes information on student achievement disaggregated by student characteristics. The inFORM PR Data Set includes five years of detailed information

about a program's course; enrollments; productivity; fill rates; retention; success rates; student counts by age, gender, ethnicity, and educational goal; and awards by age, gender, major, and type. For those programs with significant online offerings, these data sets can be run by instructional method in order to analyze differences in success and retention rates of courses taught face-to-face or online. Upon request, OPRA can furnish additional disaggregation of data. The analysis of SLO assessment data takes place during PR. The TracDat Comprehensive Program SLO Report includes all active course-level SLOs, assessment methods, criteria for success, results, and the use of results. In light of changes made in TracDat in spring 2016, data on SLO attainment can be reported and analyzed by instruction method (Link PR handbook, evidence from Manual).

When programs identify performance gaps through the analysis of this data, objectives and action steps are developed. These steps may include changes related to access, curriculum, or teaching methods, among others. The effectiveness of the objectives and action steps developed through PR face review every two years and revision as needed. SLO report link or see 1.B.2)

Saddleback Strategic Plan

One of the main objectives in the College's current Strategic Plan is to “increase student completion rates (degrees, certificates, and transfer) while preserving access, enhancing quality, and closing achievement gaps (Link to it here).” This objective integrates activities from the SSSP Plan, the Enrollment Management Plan (EMP), the BSI, (See Strategic Plan BSI Level up grant information \$1.5 million), the Technology Plan, and the SEP. The key performance indicators for this objective are based on the Student Success Scorecard metrics provided by the State Chancellor’s office. These completion metrics can be disaggregated by gender, age group, ethnicity, disability status, and economic status.

ANALYSIS AND EVALUATION

The College uses disaggregated achievement data for many of its analyses and reports, including the SEP, PR, and the Strategic Plan. The SEP has identified those areas with disproportionately impacted student populations and indicators as prescribed by the California Community Colleges Chancellor’s Office. The SEP is a method to implement strategies and activities, to set goals and key performance indicators, and to allocate resources to mitigate gaps. In addition to the SEP, instructional programs use disaggregated data during PR and develop objectives and actions steps to address gaps. In spring 2016, the College began to disaggregate SLO data by instruction method. Discussions are also underway regarding the collection and reporting of disaggregated SLO data by student characteristics. 1.B.6.8, 1.B.6.9 links,).

In terms of student achievement, the OPRA has demonstrated how data mining and the increased use of disaggregate data has the potential to uncover data stories and create a culture of evidence-based dialogue, planning, and decision-making that support student success to a degree never enjoyed at the College before. As a result, the College has undertaken a Quality Focus Essay on student success metrics including the ability to disaggregate data and to integrate student success

metrics into broad-based dialogue, planning, decision-making, and resource allocation to promote institutional effectiveness.

I.B.7. The institution regularly evaluates its policies and practices across all areas of the institution, including instructional programs, student and learning support services, resource management, and governance processes to assure their effectiveness in supporting academic quality and accomplishment of mission.

EVIDENCE OF MEETING THE STANDARD

The District and the College review and revise all policies and procedures regularly to assure their effectiveness in supporting academic quality and the accomplishment of their missions. The Board Policy and Administrative Regulation Advisory Council (BPARC) review and revise board policies and administrative regulations. BPARC is a shared governance committee with representation from all constituent groups and is chaired by the vice chancellor of business services. The committee reviews all board policies on a regular cycle and makes recommendations for revisions to the Chancellor's Council prior to going to the Board of Trustees for study, review, and approval [EVI-Committee Composition and Purpose]. BPARC may also revise policies and/or procedures to align with templates provided by the Community College League of California (CCLC) or in response to changes in external regulations, or legal or accreditation requirements. (Link to Bill Kelly's BPAR calendar). Board policies (BPs) and administrative regulations (ARs) address the following broad categories: bylaws, community relations, administration, business, human resources, students, instruction, and speech and advocacy. BPs and ARs are made available on the District website for students, employees, and the public.

College policies and procedures are developed and revised regularly on an as-needed basis, as part of the institutionalized planning cycle, or to align with revised BPs and ARs. At the College, the CC is the primary body responsible for the review of policies and procedures and for making recommendations to the president for approval. (Link to Saddleback College Governance and Decision-making Manual 2016 steps in strategic planning process p. 18).

As described in the *Saddleback College Governance and Decision-making Manual 2016*, and in accordance with Title 5, the College ensures the participation in governance and decision-making of all constituent groups, including faculty, classified staff, administrators, managers, and students (Link Governance Manual). In making policy and procedural recommendations, the Academic Senate represents faculty, the California Schools Employee Association (CSEA) and the Classified Senate represent staff, and the Associated Student Government (ASG) represents students. Any interested person, committee, or representative group at the College may initiate the review and revision of policies and procedures.

Policies and Procedures Related to Instructional Programs and Success

Policies and practices related to instructional programs and student success are primarily under the purview of the Academic Senate, the Curriculum Committee, the Online Education Committee, EPA, and VPI Council.

The Academic Senate is the representative body of faculty that is responsible for participating in formulation of College and District policy related to academic and professional matters as required by BP 2100.1, Delegation of Authority to the Academic Senate; BP 2100.2, Role and Score of Authority of the Academic Senates; and Title 5 of the California Code of Regulations. As needed, the Academic Senate regularly evaluates and revises policies and practices related to:

1. Curriculum, including establishing prerequisites and placing courses within disciplines
2. Degree and certificate requirements
3. Grading policies
4. Educational program development
5. Standards or policies regarding student preparation and success
6. District and College governance structures, as related to faculty roles
7. Faculty roles and involvement in accreditation processes, including self-study and annual reports
8. Policies for faculty professional development activities
9. Processes for program review
10. Processes for institutional planning and budget development
11. Other academic and professional matters as mutually agreed upon

Evidence of recent changes made by the Academic Senate in these areas include grading and independent study and both can be found on the committee SharePoint site (Link to a couple representative changes i.e. BP 5300 Grading, BP 5626 Independent Study – unless AS has other recommendations).

The Curriculum Committee, a standing committee of the Academic Senate, is responsible for recommending approval of both credit and noncredit courses on the basis of such standards as grading policy, units, prerequisites, academic rigor, course content, course objectives, repeatability, assignments, instructional methodology, and methods of evaluation. The committee is also responsible for developing all policies and procedures that affect the development and approval of curriculum at the College, and for recommending approval of such policies and procedures to the Academic Senate (EVI-Curriculum Committee Bylaws 2011?). The committee regularly evaluates curriculum processes and practices. In 2014, significant changes took place to improve the efficiency and effectiveness of the curriculum processes, particularly in response to the increase in online courses (see Curriculum minutes related to CLTs). The online approval process is currently under revision and is the subject of one of the quality focus essays.

The Online Education Committee (OEC), a standing committee of the Academic Senate, is responsible for developing policies and procedures related to online education at the College. With a focus on quality as part of the development of the new Online Education Plan, the OEC is currently reviewing and revising existing policies and practices related to issues, such as curriculum approval, faculty training, and student support. This process is discussed in detail in the Quality Focus Essay on online education.

The Educational Planning and Assessment Committee (EPA)—a college committee jointly chaired by an Academic Senate appointee and the director of planning, research and accreditation—oversees the College's efforts to engage in an ongoing quest for quality improvement, and to document how well the College fulfills its mission and goals by employing a comprehensive system of planning and outcomes assessment in all programs, student support units, and administrative service units on campus. The policies and procedures under the purview of EPA are those related SLO/AUO assessment and PR/AUR. These policies and procedures face regular updates to ensure they effectively promote continuous improvement of student support and administrative units, courses, and programs (See PR AUR Handbook and SLO and AUO handbooks). A recent procedural change includes the submission of SLO results by instructional method so that data can be analyzed separately for face-to-face and online classes. This new procedure necessitated a change in the TracDat fields and a shift in the way data was collected and reported by departments. (Link EPA minutes).

The VPI Council is composed of those academic administrators responsible for instruction, enrollment management, strategic planning, scheduling, faculty hiring, and classroom matters (minutes or link). This council is responsible for the planning and evaluation of courses (traditional and online) and instructional programs as well as overseeing assessment practices and establishing policies and practices to ensure instructional quality and effectiveness.

Policies and Practices Related to Resource Management

Policies and practices related to resource allocations are addressed primarily by the Planning and Budget Steering Committee (PBSC), the College Resource Committee (CRC), and Consultation Council (CC). The current resource allocation process was evaluated and revised in fall 2015 to include explicit timelines and to more clearly describe the roles of PBSC, CRC, and CC in resource allocation (Link to the Process and the Model, see 1.B.5). The revised resource allocation process requires that instructional program and administrative unit needs are referenced in the PR/AUR and tied to the mission and/or Strategic Plan.

Each year, the effectiveness of the resource allocation process is evaluated by PBSC and revised as necessary. Moreover, one of the objectives in the current Strategic Plan is that “Saddleback College will strengthen long term financial health and institutional effectiveness through integrated planning and resource allocation.” (SBC Strategic Plan). Therefore, through the annual evaluation of the College’s Strategic Plan, the resource evaluation process, policies, and

practices will also being examined to ensure that the resource allocations are based on substantial verifiable data (SBC Strategic Plan 4.1.1).

The *SOCCCD District-wide Integrated Budget Planning Resource Guide* demonstrates how planning processes at the district level are linked to budget allocations (See Link). This guide is updated regularly and includes the Budget Development Guidelines, which are reviewed and approved twice a year by the Board of Trustees. The District Resource Allocation Council (DRAC) model, and BP and AR 3110, Basic Aid, guide the budget development for Districtwide allocation of unrestricted general funds and basic aid funds. The District Resources Allocation Committee is a participatory governance group charged with developing and maintaining the income allocation model on which the District budget is based. This committee is also responsible for the development and oversight of the allocation process for unrestricted general funds. The Basic Aid Allocation Recommendation Committee (BAARC) is also a participatory governance committee charged with allocating basic aid funds in accordance with BP and AR 3110 and in alignment with planning documents developed by the District-wide Planning Council (DWPC), the District-wide Technology Committee (DTC), and the Capital Improvement Committee (CIC). (District-wide Planning and Decision-making Manual 2015 - 2020). All District councils and committees evaluate their practices annually through a membership survey and make changes as needed

Policies and Practices Related to Governance Processes

The Saddleback College Organizational Planning Manual documents the policies and practices related to decision-making and governance processes at the College (Link Organizational Planning Manual – draft form). The manual includes roles and responsibilities of councils, committees, work groups, and individuals that play a role in planning and decision-making on campus. Timelines for College and Districtwide planning and resource allocation are included in the manual. The College strategic planning and integrated planning processes, as well as the alignment to Districtwide processes, are described in the Organizational Planning Manual. The Organizational Planning Manual is reviewed regularly to ensure that the processes, practices, and policies related to planning and decision-making are current, efficient, effective, and support academic quality and accomplishment of the mission. A review of the Organizational Planning Manual is initiated by the OPRA when significant changes to the planning or governance processes occur. The most recent update to the manual occurred in fall 2016. Before approval of the updated Organizational Planning Manual, and the policies and practices within, the manual is shared with participatory governance groups for input prior to recommendation for approval by the PBSC and approval by the CC (Minutes AS, PBSC, VPI, Management Team, CC Sept, Oct 2016).

The District annually evaluates its policies and procedures related to planning, governance, and resource allocation, and publishes the them in the *SOCCCD District-wide Planning and Decision-making Manual 2015-2020* and *District-wide Integrated Budget Planning Resources*

Guide (Link to both here). DWPC is responsible for overseeing the review and revision of the manual and guide.

ANALYSIS AND EVALUATION:

The College regularly reviews its policies and procedures across all areas, including instructional programs, student and learning support services, resource management, and governance processes. BPARC, a Districtwide committee, reviews and revises BPs and ARs. The Chancellor's Cabinet and, in the case of BPs, the Board of Trustees then approve them. On the College level, the CC is the primary body that approves policies and procedures which emerge out of various College committees. The Academic Senate, with other committees also playing a role, is primarily responsible for the evaluation of policies and practices to ensure effective instruction, academic quality, and student success. PBSC regularly evaluate the goals, objectives and outcomes of the Strategic Plan and makes recommendations to policies and practices to ensure effectiveness, academic quality, and accomplishment of the mission (see 1.B.9). At the District level, the DWPC evaluates resource management. At the College level, resource management is evaluated through PBSC, CRC, and CC, as well as by all programs, student support, and administrative services that participate in the resource allocation process. Key participatory governance planning and decision-making councils, committees, task forces, and work groups regularly evaluate policies and practices related to governance.

To support the accomplishment of the mission, participatory governance and planning committees regularly evaluate their policies and practices. However, the College lacks a standardized approach for committees to communicate their purpose and to evaluate their effectiveness. This issue is being rectified by PBSC and CC, which recently approved new committee practices to align with current practices in Districtwide committees, including communication about each committee's purpose, membership and annual self-evaluations. (PBSC minutes 8/25, Link to Organizational Planning Manual). The goal of these changes is to increase and sustain Collegewide dialogue by making employees more aware of participation opportunities through standardized practices and improved record keeping.

I.B.8. The institution broadly communicates the results of all of its assessment and evaluation activities so that the institution has a shared understanding of its strengths and weaknesses and sets appropriate priorities.

EVIDENCE OF MEETING THE STANDARD

The results of assessment and evaluation activities are communicated broadly via documents and minutes posted on the College website and SharePoint sites primarily through the Office of Planning Research and Accreditation (OPRA), the Education Planning and Assessment committee (EPA), and the Planning and Budget Steering Committee (PBSC). Assessment and

evaluation results are broadly communicated through Collegewide presentations as well as in presentations made to key planning and governance councils and committees. Internal scans and surveys are also completed on a regular basis to further understand institutional strengths and weaknesses and to inform priorities and future planning efforts (1.B.8.1, 1.B.8.2, 1.B.8.3, 1.B.8.4, 1.B.8.5).

Assessments and evaluation results posted on the OPRA website include, but are not limited to, climate and College employee survey results, strategic plan evaluations, Student Success Scorecard information, and internal documents that further analyze Scorecard data, historical performance, and trends (1.B.8.6, 1.B.8.7, 1.B.8.8, 1.B.8.9, 1.B.8.10, 1.B.8.11, 1.B.8.12, 1.B.8.13, 1.B.8.14, 1.B.8.15, 1.B.8.16, 1.B.8.17, 1.B.8.18, 1.B.8.19, 1.B.8.20, 1.B.8.21).

EPA is responsible for completing annual SLO/AUO assessment reports and posting completed PRs and AURs. AUO reports are posted in TracDat and on the committee SharePoint site (1.B.8.22, 1.B.8.23). The Academic Senate reviews completed PRs. The Management Team reviews completed AURs. PRs and AURs are shared with Consultation Council every four years, and are considered in strategic planning and resource allocations decisions. (Link 1.B.8.24 to an example of a specific PR/AUR, 1.B.8.25 Minutes of Senate with PR approval, 1.B.8.26 minutes of Consultation council with PR/AUR presentation, 1.B.8.27 evidence of PR influencing strategic plan).

Additionally, the College communicates results of assessment and evaluations through a variety of activities. These activities include the president's Annual State of the College report during Professional Development Week, Professional Development Week presentations, the president's update during monthly BOT meetings, and reports at planning and decision-making committees as well as at department and division meetings (1.B.8.28, 1.B.8.29, 1.B.8.30, 1.B.8.31, 1.B.8.32). Key committees that communicate assessment and evaluation results include the Planning and Budget Steering Committee (PBSC), the Education Planning and Assessment (EPA) Committee, the Academic Senate and the strategic planning committees, especially the student success coordinating committee and work groups (1.B.8.33 minutes from PBSC strategic planning update, 1.B.8.34 minutes of EPA, 1.B.8.35 Academic Senate minutes, 1.B.8.36 SSCC update). See discussion in I.B.1

ANALYSIS AND EVALUATION

The College communicates results of assessment and evaluations through a variety of methods, including presentations that are captured in meeting minutes and documents that are publicly available on the College and committee websites. The EPA oversees reporting on assessment data related to SLOs/AUOs and on evaluations contained in PRs/AURs. This reporting includes regular reports by all programs and student support and administrative units to CC and the college president. PBSC and OPRA oversee institutional assessments related to strategic planning and Scorecard data. These assessments are available on College websites and

SharePoint sites accessible to all employees. Internal scans and surveys conducted by OPRA provide additional information related to College strengths and weakness and inform College priorities. Through a revitalized OPRA assessment and evaluation, activities are broadly communicated. The Public Information Office and the college president regularly communicate overall strengths, weaknesses, and priorities through a variety of Collegewide forums including Annual State of the College presentations.

I.B.9. The institution engages in continuous, broad based, systematic evaluation and planning. The institution integrates program review, planning, and resource allocation into a comprehensive process that leads to accomplishment of its mission and improvement of institutional effectiveness and academic quality. Institutional planning addresses short- and long-range needs for educational programs and services and for human and physical, technology and financial resources. (ER 19)

Eligibility Requirement 19 The institution systematically evaluates and makes public how well and in what ways it is accomplishing its purposes, including assessment of student outcomes. The institution provides evidence of planning for improvement of institutional structures and processes, student achievement of educational goals, and student learning. The institution assesses progress toward achieving its stated goals and makes decisions regarding improvement through an ongoing and systematic cycle of evaluation, integrated planning, resource allocation, implementation, and reevaluation

EVIDENCE OF MEETING THE STANDARD

The College, in conjunction with the SOCCCD, engages in continuous, broad-based, systematic evaluation and planning. As described in Standards I.B.1, 1.B.2, 1.B.3, and 1.B.5, the College integrates PR/AUR, short-term planning, long-term planning, and resource allocation into a comprehensive process that leads to the fulfillment of the College mission and improvement of both institutional effectiveness and academic quality (Link to Program Review Handbook for Instructional Programs, Administrative Unit Review Handbook for Student Support and Administrative Services, Resource Allocation Process, Resource Allocation Process Model, SLO Annual Report, Saddleback College Strategic Plan,).

The *SOCCCD 2011-2031 Education and Facilities Master Plan* (EFMP) outlines a long-term plan for continuous quality improvements focusing on strategies for academic excellence and facilities improvements. The purpose of the EFMP is to establish clear direction for the District and each of its colleges, and to serve as a primary resource for development of college long-range planning activities (Link to 2011-2031 EFMP Vol 1 p.6). Integrated short-term planning consists of the Districtwide and college strategic plans. The *SOCCCD District-wide Strategic Plan 2014-2020* (the Districtwide short-term plan) was developed through the leadership of the Districtwide Planning Council. Supported by data from an external scan of the community, an integrated strategic planning model was developed for the District and colleges with shared

goals, objectives, and key performance indicators (KPIs). The external scan of the community provided five major areas of review as a basis for planning. These areas included enrollment projections, labor market analysis, student success policy, research, and accountability, technology, and budget and the economy (Link District-wide Strategic Plan Board of Trustees Presentation 2014 - 2020).

The purpose of developing an integrated Districtwide strategic plan is to make the strategic planning process more efficient, to improve collaboration, and to encourage a commitment toward common goals and objectives using common indicators, timelines, and reporting requirements. Ultimately, the integrated strategic planning process is intended to improve the effectiveness of the colleges, and to promote better-informed decisions regarding the allocation of resources.

Integrated Planning

The Saddleback College Strategic Plan is aligned with the SOCCCD Strategic Plan and is the foundation for college planning and resource allocation decisions. The College strategic planning process is a comprehensive and collaborative tool for enabling the College to continuously improve, effectively achieve its mission, and move toward its desired vision. The Organizational Planning Manual contains a full description of the steps in the strategic planning process. (Link Organizational Planning Manual in draft form Development of the Saddleback College Strategic Plan p. 25).

The *Saddleback College Strategic Plan for 2014-2020* has four overarching goals. Each goal is aligned with the SOCCCD goals and is addressed by strategic planning groups led by a chairperson or cochairmen. These strategic planning goals are as follows:

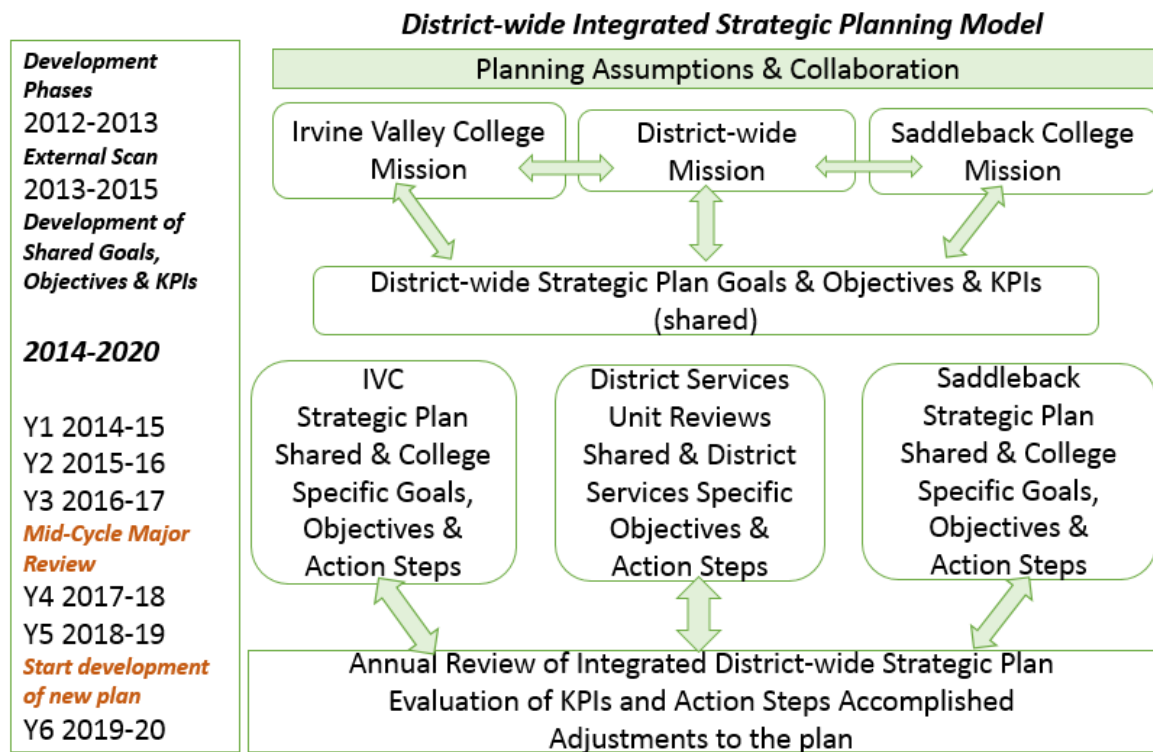

Saddleback College Strategic Planning Goals for 2014-2020

1. Saddleback College will foster an environment characterized by creativity, innovation, respectful interactions and collaboration. (*AKA Respectful Interactions*)
2. Saddleback College will promote students' success by enhancing the teaching and learning environment. (*AKA Student Success*).
3. Saddleback College will advance economic and workforce development through regional partnerships with educational institutions and industry and by strengthening career technical education. (*AKA Economic and Workforce Development*)
4. Saddleback College will strengthen long-term financial health and institutional effectiveness through integrated planning and resource allocation. *AKA Financial Health and institutional Effectiveness* (1.B 1.9 Link updated Saddleback College Strategic Plan 2014 – 2020).

The College engages in other short-term planning processes focused on specific initiatives and grant-funded projects that include the SEP, the Technology Plan, the Economic and Workforce

Development Plan, the Student Success Coordinating Plan, and the Basic Skills Plan. These plans inform one another and are integrated into the Strategic Plan. (Link to BSI, SEP, SSSP). (Link to EWD, and EMP). (Link Tech Plan).

X Indicates where plan is linked by explicitly to the College's Strategic Plan															

OPRA leads the development of the College's Strategic Plan. The director of OPRA oversees the plan's implementation; monitors progress toward achieving goals, outcomes, and key performance indicators; and assists in evaluation of the planning process. OPRA facilitates Collegewide data-driven decision-making, accountability, and continuous improvement through the integration of strategic planning and institutional research. (Link to Strategic Plan).

The director of planning, research, and accreditation and the director of fiscal services co-chair PBSC. PBSC coordinates Collegewide planning and budgeting processes, including the Strategic Plan, and makes recommendation for procedural changes to CC. CC serves as the College's main strategic planning and recommending body and is composed of representatives from all constituent groups on campus. Sustained broad-based collegial dialogue informs all planning processes at the College. (Saddleback Integrated Strategic Planning).

A chairperson or chairmen is responsible for each goal and for reviewing progress toward the strategic planning goals, including measuring action steps completed, and tracking key performance indicators. The chairperson or chairmen are also ultimately responsible for the achievement of each strategic planning goal. Responsibility for the outcomes of the Strategic Plan are widespread; they are shared within each planning group by committees, councils, work groups, and individuals (Link to updated Strategic Plan).

Periodic evaluation and review is an essential part of all planning at the College. For example, the strategic planning process and outcomes of the plan are evaluated to ensure the needs of the College and its constituents are being met. Each year, progress is measured in terms of the action steps completed. The achievement of outcomes is monitored through annual tracking of key performance indicators, action steps, and the degree to which performance targets have been achieved (Statement on Annual update or meeting minutes or link). Through the integrated strategic planning process, the College collectively identifies, prioritizes, and takes action to meet Collegewide goals and objectives. The result of the strategic planning process is a Strategic Plan that provides short-term direction for the College.

Program and Administrative Unit Review

Program and administrative unit review inform strategic planning and resource allocation decisions, and, along with SLO/AUO assessment, are key to appraising academic quality and institutional effectiveness. Planning for instructional programs as well as student support and administrative services occurs through the PR/AUR every two years (Link to PR/AUR Handbooks). Through PR and AUR, data related to SLOs, courses, programs, curriculum, and support services, is collected and analyzed, and recommendations are made to improve student learning, student success, programs, student support and administrative services. PRs and AURs are a means of ensuring that the College's programs and services, within the limitations of available resources, are effective and responsive to the local College community.

Annually, resource allocation requests for new resources are derived from the needs assessment in the PR/AUR processes (Link to Resource Allocation Process and Resource Allocation Model). Requests for faculty can be expressed through the PR/AUR process, but are formally requested through the faculty hiring and prioritization process. Through the PR/AUR processes, planning addresses needs for academic programs; student and administrative services for human resources; instructional/service needs; research needs; as well as technology, equipment,

facilities; other resources; and marketing and outreach. The College has a well-prescribed plan for annual resource allocation ([Link to Resource Allocation Process and Model](#))

Human Resources

Every PR/AUR addresses the human resource needs within a program or unit and uses a five-year staffing profile for faculty, classified staff, managers, and administrators as the basis of analysis. Resource allocation requests include requests for additional staffing. The College Resource Committee (CRC) bases funding decisions for these requests upon demonstrated need and alignment with the College Strategic Plan. Classified staff positions go through the standard resource allocation request process described in xx.x.xx. However, the Faculty Hiring Prioritization Committee, an Academic Senate committee composed of the faculty and dean representatives from each academic division, prioritizes faculty positions. Annually, the committee creates a prioritization of positions. These recommendations are forwarded to the Academic Senate, college president, and Board of Trustees for approval. While this list includes a ranking of all positions requested, the college president, in consultation with the President's Executive Team (PET), determines the number of positions to be hired each year from this list based on budgetary considerations.

Physical Resources

Physical resource needs, including facilities, furniture, and equipment (over \$500), are also determined and requested through the PR/AUR and resource allocation processes. Equipment requests are prioritized by the resource allocation request process, and decisions are made by the College Resource Committee (CRC) based on documented need and alignment with the Strategic Plan. In addition to demonstrating a link to the Strategic Plan, facilities requests must also conform to standards set by the Safety and Facilities Committee and must be in alignment with the College's Education and Facilities Master Plan. ([Link Saddleback College EMFP](#)).

Technology Resources

Generally, the Saddleback College Technology Plan maintains technology needs. This plan has established a replacement schedule for classroom, faculty, manager/administrator, staff, and technology on campus. The College Technology Committee with representation from all participatory governance groups creates the Technology Plan to provide a strategic pathway to guide the College in its implementation of technology. The purpose of the Technology Committee is to engage in collaborative discussions regarding College technology; to disseminate information to the campus community; to empower students, faculty, and staff through the deployment and availability of technology resources; to consider the concepts of universal access and design; and to provide direction for technology that advances and supports the strategic plans ([Link 2015-2020 Saddleback College Technology Plan, on SharePoint](#)).

Requests for funding new technology needs (over \$500) are identified through the College's PR/AUR resource allocation process. The Technology Committee reviews these requests prior to final CRC ranking and approval. Funding for larger College technology needs can be requested

through the basic aid process at the District level. The Basic Aid Allocation Recommendation Committee (BAARC) reviews the requests, and final recommendations go to the Chancellor for funding (Link to Technology Plan p.8).

Financial Resources

All programs and units receive annual budgets to support operational costs. These funds are reviewed regularly by PBSC, and recommendations for augmentations to these budgets are forwarded to the CC and college president for approval. The need for additional funds for staffing, facilities, and equipment and technology exceeding \$500 can be documented through the PR/AUR and requested through the resource allocation request process. (Need statement from standard III here).

ANALYSIS AND EVALUATION

The College engages in broad-based systematic evaluation and planning within programs and units, Collegewide, and Districtwide. PR/AUR, short-term and long-term planning, and resource allocation are integrated into a comprehensive process to ensure that all academic program, student support, and administrative needs are met in order to fulfill the mission of the College. In a continual effort to improve short and long-term planning and decision-making, OPRA is working with departments and programs, as well as with planning and decision-making groups, to more fully understand data and student success metrics; this is all done in order to improve outcomes at the course, program, and institutional level to ensure accomplishment of the mission. A QFE on student success metrics has been developed to address this Collegewide goal and to ensure that success metrics have a place in the Strategic Plan and resource allocation process.

I.C Institutional Integrity

I.C.1 The institution assures the clarity, accuracy and integrity of information provided to students and prospective students, personnel, and all persons or organizations related to its mission statement, learning outcomes, educational programs, and student support services.

EVIDENCE OF MEETING THE STANDARD

Saddleback College provides information about its mission, educational programs, student learning outcomes, available student support systems, and accreditation status in a clear, complete, and accurate manner for students, prospective students, employees, and the public. The primary sources of information on these items are the College Catalog and the College's website, which are both regularly reviewed for accuracy and completeness and updated as necessary. An electronic version of the College Catalog is posted on the College homepage. A paper version is printed for use in counseling and other offices, but is no longer available for sale in the bookstore. While the College website is a living entity that can be updated frequently as policies and procedures change, the College Catalog is only updated annually and the curricular

information contained within it has significance for students starting coursework at the College, as it describes the program requirements for which can be granted “catalog rights” as described in II.A.x below.

The College’s Mission Statement, along with its vision and values, can be found in both the College Catalog and on the College website, and is also prominently displayed in various locations on campus, such as conference rooms and administrative offices, and is even printed on the back of employee business cards (Ev. 6, 7, 8).

The College Catalog includes information about the College’s educational programs. This information includes a comprehensive list of all the College’s degrees, certificates, and awards; a description of each program, including its PSLOs and required courses; and a detailed explanation of the three possible transfer/general education patterns discussed in detail in II.A.x. Program information can also be found on program webpages, which, in many cases, include a list of PSLOs and course SLOs. The College’s ISLOs can also be found in the College Catalog and on the College website.

Course information and section availability is available on the electronic class schedule, which can be found on the College homepage. Many elements of the course outlines of record (CORs), including topics covered, learning objectives, and methods of evaluation, are accessible to students and the public on the detail page of the class schedule. The public can also find the full COR by doing a course search in CurricUNET, the curriculum system used by the College. Information about the articulation agreements for courses is also available through ASSIST.org. All students are provided syllabi for the courses in which they are enrolled on the first day of class, and these syllabi always include general information about the course, including the SLOs.

Information about student support programs is available on the College website and in the College Catalog. In 2015, the College website was completely redesigned to make information students need to be successful easier to access. The Student Success tab on the College homepage provides a quick link to all student support programs available. In addition, the Division of Counseling Services produces a Student Handbook each year that also describes many of the services at the College. This handbook is available online on the Counseling Services webpage and in print at various locations around campus, including the Student Services Building and the information desk in the Library.

A statement regarding the accreditation status of the College can be found on the homepage of the College’s website and in the College Catalog. More detailed information is available on the accreditation page, which links directly from the College homepage, on the College website. The accreditation webpage includes relevant documentation, such as a copy of the most recent self-evaluation reports, as well as any communication received from the ACCJC regarding the College’s accreditation.

ANALYSIS AND EVALUATION

The College ensures the clarity, accuracy and integrity of information provided to students, prospective students, employees, and the public in regards to its mission, educational programs, student learning outcomes, available student services, and accreditation status. The College's website and College Catalog are the two primary sources of this information; however, there are a number of other locations where detailed information can be found, such as the Student Handbook, and division, department, and program websites.

Course syllabi that include course SLOs are the primary source of course information provided to students. PSLOs and ISLOs are published in the Course Catalog and on the College website. The accreditation status of the College is prominently displayed on the College website, and detailed information about accreditation, including all documentation, is available on the accreditation page of the College website.

Through the self-evaluation for accreditation process, it was identified that the College needs to create procedures and guidelines for presenting information on division, department, and program websites consistently. It was also recognized that the development of a publication timeline, especially related to recurring or annual publications, would help to ensure clarity, accuracy, and integrity of information provided to students and prospective students, personnel, and all persons or organizations. These recommendations are being formalized and will be presented to the director of public information and marketing and all constituent groups.

I.C.2 The institution provides a print or online catalog for students and prospective students with precise, accurate, and current information on all facts, requirements, policies, and procedures listed in the “Catalog Requirements. (ER 20)

EVIDENCE OF MEETING THE STANDARD

The College produces a comprehensive College Catalog linked directly on the homepage of the College website so it is easily accessible for students, prospective students, and the public. The catalog provides precise and accurate information on the College's programs, policies, and services. The online College Catalog is configured in PDF format, both in its entirety and also separated into various sections, so that it can be more easily accessed and printed if desired. In addition, catalogs from the past 19 years are also available on the website. A limited number of paper copies of the catalog are produced each year for use by counselors and other parties. In the past, printed copies of the catalog were also available for sale in the College Bookstore, but that practice was eliminated in 2012-2013.

The catalog is revised annually and tremendous efforts are made to ensure that it contains the most accurate information possible. If errors are found or changes made, however, an addendum is also published for that year and posted to the website.

The Office of Instruction coordinates the development and organization of the catalog through a collaborative effort with various departments and individuals on campus, including, Campus Police, Counseling, Curriculum, Financial Aid, Matriculation, the Office of Student Services, division deans, and department chairs.

The College Catalog contains the following information and major headings:

- Catalog Year
- Academic Calendar
- Name, Address, and Phone Number of the College
- Statement of Accreditation Status
- ACCJC Contact Information
- Nondiscrimination Statement
- Name, Address, and Phone Number of the District
- Vision, Mission, and Strategic Planning Goals of the SOCCCD
- District Administration
- Board of Trustee Members
- President's Message
- College Administrators
- Academic Divisions, Contact Information, and Associated Departments
- Mission, Vision, and Values of Saddleback College
- Saddleback College Institutional Student Learning Outcomes (ISLOs)
- Información en Español

- Admission Requirements
- Matriculation Services
- Registration for Classes
- Student Fees/Refunds/Credits
- Student Support Services
- Student Activities/College Life
- Students' Rights and Responsibilities
- Academic Regulations
- Credit by Exam
- Honors Program
- Alternative Credit Options
- College Credit for International Baccalaureate Exams (IB exams)
- College Credit for CLEP Exams
- Other College Programs
- Graduation Requirements
- Degrees, Certificates, and Awards
- Articulation/Transfer Patterns
- Announcement of Courses
- Enrollment Limitations for Active Participatory Courses That Are Related in Content
- Course Listing by Academic Discipline
- Emeritus Institute Courses
- Adult Education Courses
- Faculty Directory

ANALYSIS AND EVALUATION

The College Catalog is updated annually and available to students and the public on the College's homepage. It provides for students precise, accurate, and current information on a variety of essential topics including, but not limited to, admission policies, matriculation, student fees, student support services, degree and certificate requirements, transfer patterns, and a description of all courses. An online catalog supplement at catalog.saddleback.edu is published for policies and/or degrees that have been approved after publication of the hardcopy of the Saddleback Course Catalog. ER 20 omission? Academic Freedom Policy

I.C.3 The institution uses documented assessment of student learning and evaluation of student achievement to communicate matters of academic quality to appropriate constituencies, including current and prospective students and the public.

EVIDENCE OF MEETING THE STANDARD

The College compiles student achievement and learning outcomes data and makes it available to all constituencies, including students, prospective students, and the public. The Office of Planning, Research and Accreditation (OPRA) and the Educational Planning and Assessment (EPA) Committee are the primary entities at the College responsible for collecting, analyzing, and publishing student achievement and learning outcome data. The CCCO Student Success Scorecard information, which demonstrates how well colleges are doing in remedial instruction, job training programs, retention of students, and graduation and completion rates, is linked from the College homepage and is also publicly available at the State Chancellor's Office website.

Student achievement data is available in several reports on the OPRA website. This includes Student Success Scorecard trends, analyses of historical trends in degree and certificate awards, retention and success, historical transfer patterns, and ACCJC annual reports, among others. Information on the Institutional Effectiveness Partnership Initiative (IEPI) is also available on the OPRA website. This initiative provides a framework for assessing the effectiveness of colleges by looking at nine core indicators, such as course completion rates, accreditation status, fund balance, and compliance.

Program-specific student achievement and student learning outcome (SLO) assessment data is available in the program review (PR) reports that are updated every two years. The comprehensive SLO Report, which is part of PR, provides historical assessment results as well as information on how those results were utilized to improve the program. Within the PRs, faculty also reflect on achievement and SLO data and develop objectives for the next two years. PRs are posted on department and program websites as well as the EPA SharePoint site which is available to all employees. Assessments of student learning, achievement, and academic quality are also communicated through program and department-specific websites and brochures (Link CTE page and published brochures).

The Public Information and Marketing Office regularly publishes matters related to student achievement and academic quality for public access (Link <https://www.saddleback.edu/pio/public-information-and-marketing-office>). The president communicates matters of achievement and academic quality to the BOT in their monthly meetings, and to the College community through the Annual State of the College address (Link (ER 19)).

ANALYSIS AND EVALUATION

The College communicates matters of academic quality through publications on the College website, as well as the OPRA, EPA, and SharePoint sites. In addition, program-specific achievement and quality are published in PRs and on division and department websites. The Public Information and Marketing Office disseminates information to students, faculty, staff and the community through news releases, fliers, newsletters, brochures, and social networking sites.

DRAFT

I.C.4 The institution describes its certificates and degrees in terms of their purpose, content, course requirements and expected learning outcomes.

EVIDENCE OF MEETING THE STANDARD

All certificates and degrees offered through the College are described in the College Catalog. This description includes purpose, content, course requirements and learning outcomes (1.C.4.1). The catalog is available online and is linked to the homepage of the College website. The catalog may be downloaded and printed in PDF format. Degrees, certificates, and awards are searchable through the catalog alphabetically, by division, by program, and by degree (1.C.4.2).

Divisions, departments, and programs also describe certificates, degrees, course requirements, and learning outcomes on their websites and in program-specific brochures (1.C.4.3, 1.C.4.4). Course-level learning outcomes are provided to all students by faculty in course syllabi. Department chairs ensure that course syllabi are available to all students and that individual sections of courses adhere to published SLOs through the prescribed SLO evaluation and reporting process (1.C.4.5, 1.C.4.6).

ANALYSIS AND EVALUATION

Clear and accurate descriptions—including purpose, content, course requirements, and learning outcomes—of certificates and degrees are found in the College Catalog, on division, department, and program websites, and through program-specific brochures.

I.C.5 The institution regularly reviews institutional policies, procedures, and publications to assure integrity in all representations of its mission, programs, and services.

EVIDENCE OF MEETING THE STANDARD

The District and the College regularly review and revise policies, procedures, and publications to ensure integrity in all representations of the mission, programs, and services. Board policies (BPs) and administrative regulations (ARs) are reviewed and revised through the Board Policy and Administrative Regulation Council (BPARAC). This is a shared governance committee with representation from all constituent groups in the District which is chaired by the vice chancellor of business services. This committee reviews all BPs on a regular cycle and makes recommendations for revisions in response to changes in external regulations, legal, or accreditation requirements, to align with templates provided by the Community College League of California (CCLC) (Link to Bill Kelly's BPAR calendar). BPs and ARs address the following broad categories: bylaws, community relations, administration, business, human resources, students, instruction, and speech and advocacy. BPs and ARs are available to students, employees, and the public on the District website (Links Saddleback College Catalog 2016 – 2016, SOCCCD Board Policies, Saddleback College Governance and Decision Making Manual 2016, SOCCCD District-wide Planning and Decision Making Manual 2015-2020, Student Handbook Faculty Handbook).

College policies and procedures are developed and revised regularly on an as-needed basis, as part of the institutionalized planning cycle, or to align with revised BPs or ARs. The Consultation Council is the primary body at the College responsible for the review of policies and procedures and for making recommendations to the President for approval. (Link to Saddleback College Governance and Decision Making Manual 2016 steps in strategic planning process p. 18).

As described in the Saddleback College Planning and Governance Manual 2016, and in accordance with Title 5, the College ensures the participation of all constituent groups, including faculty, staff, and students, in governance and decision-making. In the making of policy and procedural recommendations, faculty are represented by the Academic Senate, staff are represented by both the California Schools Employees Association (CSEA) and the Classified Senate, and students are represented by the Associated Student Government (ASG). The review and revision of policies and procedures may be initiated by any interested person, committee, or representative group at the College.

The College publishes its mission, key institutional policies and procedures, and a description of its programs and services in the College Catalog, which is reviewed, revised, and updated annually as discussed in I.C.2 above. The catalog is available on the College's website. The College also regularly reviews, revises, and publishes the Governance and Decision Making

Manual, which is maintained by OPRA; the Student Handbook, which is maintained by the Counseling Division; and the Faculty Handbook, which is maintained by the Academic Senate (Link to each). All of these documents contain key policies and procedures at the College and are available on the College website and in print versions. The integrity of publications is ensured through guidelines set forth by the Public Information and Marketing Office and in the Communications and Graphics Manual (Link to the Saddleback College Communications and Graphics Manual).

ANALYSIS AND EVALUATION

The College's policies, procedures, and publications are reviewed regularly to ensure integrity in all representations of its mission, programs, and services. This review occurs through a shared governance process that involves all constituent groups. To ensure ongoing integrity and inclusion of the most current policies, procedures, programs, and services in publications, a publication timeline as well as policies and procedures related to publications is recommended. This publication timeline should provide ample time for a thorough review of all aspects of the publication prior to printing and should be widely distributed and communicated to all parties responsible for information in these publications.

I.C.6 The institution accurately informs current and prospective students regarding the total cost of education, including tuition, fees and other required expenses, including textbooks, and other instructional materials.

EVIDENCE OF MEETING THE STANDARD

The College accurately informs current and prospective students on the total cost of education at the College through multiple information channels, including the College's website, the College Catalog, the online class schedule, the student portal (MySite), and various publications and workshops available in the Financial Assistance and Scholarship Office (Link screen shot of Financial Aid site, Scholarship website screenshot, Loan, screenshot, Financial Aid Video screenshot and link). The College Catalog has a section titled Student Fees/Refunds/Credits that accurately outlines all mandatory and voluntary student fees, including Associated Student Body (ASB) stamp fees, enrollment fees, health fees, material/lab fees, returned check fees, transcript/verification fees, and nonresident fees. The catalog also outlines deadlines for the payment of fees as well as procedures for obtaining credits and refunds. In addition, students are provided information about the fees associated with their classes and the cost of textbooks, as well as payment and refund information, in the online class schedule and on the their MySite portal.

The Financial Assistance and Scholarship Office provides information to students on the availability of financial assistance, including fee waivers, scholarships, grants, loans, and work-study positions. The Financial Assistance and Scholarship Office produces the Financial Aid Student Handbook, which describes available aid opportunities and application deadlines. In addition, student consumer information is available on the Financial Assistance and Scholarship Office website. This information includes the total price of attendance, the net price calculator, tax credits, textbook information, and gainful employment disclosures regarding the success of students in certificate programs that lead to employment. The gainful employment page is designed to help students make informed choices about the colleges, universities, and programs of study they select by providing the following information for each certificate program at the College: graduation rates, total estimated education costs, and the median debt of students who completed the certificate. Workshops are also offered on a regular basis on topics such as scholarships, the Financial Aid Shopping Sheet, FAFSA filing, and the Dream Act application.

ANALYSIS AND EVALUATION

The College accurately informs current and prospective students about the total cost of education, including fees and other related expenses, through a variety of means that include the College's website, the Financial Assistance and Scholarship Office webpage, the College Catalog, and the MySite portal. The catalog clearly lists all voluntary and nonvoluntary student fees and refund policies and procedures. Students are also informed about their current semester fees as well as any additional or course-specific fees (such as a materials fee) in the online

schedule of classes and on their MySite portal. Students are also given information about meeting the costs of education and financial aid assistance through the Financial Assistance and Scholarship Office.

DRAFT

I.C.7 In order to assure institutional and academic integrity, the institution uses and publishes governing board policies on academic freedom and responsibility. These policies make clear the institutions commitment to the free pursuit and dissemination of knowledge, and its support for an atmosphere in which intellectual freedom exists for all constituencies, including faculty and students.

EVIDENCE OF MEETING THE STANDARD

The College and SOCCCD's commitment to academic freedom and responsibility within the institution is guided by BP 6120, Academic Freedom, which reads:

The South Orange County Community College District Board of Trustees seeks to encourage and to protect academic freedom and responsibility. The SOCCCD is committed to the free pursuit and dissemination of knowledge, and it seeks to foster the integrity of the teaching-learning process. The SOCCCD Board of Trustees, administration, faculty, staff, and students all bear an obligation to protect, to preserve, and to promote academic freedom and academic responsibility within the institution.

This BP is available to students, employees, and the public on the SOCCCD website. Academic freedom is also one of the core values embraced by the College, as stated in the College's values:

Saddleback College embraces:

- **Commitment:** We commit to fulfilling our mission to serve the south Orange County community.
- **Excellence:** We dedicate ourselves to excellence in academics, student support, and community service.
- **Collegiality:** We foster a climate of integrity, honesty, and respect.
- **Success:** We place our highest priority on student learning and delivering comprehensive support for student success.
- **Partnership:** We strive to develop strong and lasting partnerships among students, faculty, staff, and the community.
- **Innovation:** We anticipate and welcome change by encouraging innovation and creativity.
- **Academic Freedom:** We endorse academic freedom and the open exchange of ideas.
- **Sustainability:** We promote environmental sustainability and use our resources responsibly to reduce our ecological impact.
- **Inclusiveness:** We cultivate equity and diversity by embracing all cultures, ideas, and perspectives.
- **Global Awareness:** We recognize the importance of global awareness and prepare our students to live and work in an increasingly interconnected world.

This list of values is posted on the College webpage, published in the Course Catalog, and posted, along with the mission, in various locations around campus. This commitment to academic freedom and responsibility is also reflected in the Faculty Code of Ethics and Professional Standards, which is posted on the Academic Senate webpage and is published, in part, in the College Catalog. In relation to students, the following is written in the code:

Ethical Principle:

"As teachers, professors encourage the free pursuit of learning in their students. They hold before them the best scholarly and ethical standards of their disciplines. They demonstrate respect for students as individuals, and adhere to their proper roles as intellectual guides and counselors. Professors make every reasonable effort to foster honest academic conduct and to ensure that their evaluations of students reflect each student's true merit. They respect the confidential nature of the relationship between professor and student. They avoid any exploitation, harassment, or discriminatory treatment of students. They acknowledge significant academic or scholarly assistance from them. They protect their academic freedom." (American Association of University Professors Statement, 1990).

Standards of Conduct:

- a. Faculty treat all students with fairness and respect.
- b. Faculty encourage the free exchange of ideas between themselves and students.
- c. Faculty conscientiously strive to be fair and balanced in their evaluation of student work.
- d. Faculty should not exploit their students for personal gain.
- e. Faculty should be fair and objective when providing references for students.
- f. Faculty shall not disclose information about students obtained in the course of professional service unless disclosure serves a compelling professional purpose or is required by law.
- g. Faculty-student personal relationships are unethical when they hinder any student's academic progress or create a situation in which any student is either favored or negatively impacted on grounds other than academic performance.
- h. Because a teacher/student relationship is inherently unequal, a member of the faculty should not enter into a sexual relationship with his/her student while engaged in a professional relationship.
- i. Faculty have the obligation to meet classes as scheduled, to maintain office hours and to provide reasonable means for student access to course information.

ANALYSIS AND EVALUATION

The College is committed to the free pursuit and dissemination of knowledge and supports an environment where intellectual freedom exists for all constituencies. This commitment is contained in BP 6120, Academic Freedom, in the core values of the College, and in the Faculty Code of Ethics and Professional Standards.

Evidence

BP-6120 Academic Freedom http://www.socccd.edu/about/about_boardpolicy7.html

DRAFT

I.C.8 The institution establishes and publishes clear policies and procedures that promote honesty, responsibility and academic integrity. These policies apply to all constituencies and include specifics relative to each, including student behavior, academic honesty and consequences for dishonesty.

EVIDENCE OF MEETING THE STANDARD

Saddleback College and the SOCCCD have various policies and procedures concerning principles of academic honesty, responsibility, and integrity. The commitment to academic freedom and responsibility for all constituents is contained in BP 6120, as discussed in I.C.7 above. Additionally, all constituents of the College, including faculty, staff, administration, and students worked together on a joint “Statement of Mutual Respect and Collegial Behavior” in 2015-2016. The statement was approved by all of the constituent groups and the College’s Consultation Council. It is posted in various offices and meeting rooms around campus and on the College website. It reads:

The faculty, staff, administration, and students at Saddleback College, are instrumental in providing an environment in which students can successfully achieve their educational goals, and in which employees can maximize their performance. Saddleback College embraces the core values of commitment, excellence, collegiality, success, partnership, innovation, academic freedom, sustainability, inclusiveness, and global awareness. Saddleback College defines the ethical person as one who is consistently fair, honest, straightforward, trustworthy, objective, and unprejudiced. At Saddleback College, the ethical person models civility and concern for others, and is conspicuously unflinching in the exercise of integrity to sustain the credibility that is the expectation of public servants and scholars.

In enacting the college’s core values, members of the Saddleback College community shall treat others with civility and respect, recognizing that disagreement and informed debate are pervasive in an academic setting. They shall not seek to abridge for any purpose the freedoms of employees, students, or the public, nor support retaliatory behavior for any reason.

The following statements are intended as principles for ethical behavior at Saddleback College:

- Provide and protect access to the educational resources of Saddleback College.
- Act as stewards of the campus, protecting and providing for its environmental sustainability and beauty through conscientious conduct.
- Protect human dignity and freedom of expression in the academic and working environment, and assure that all are respected as individuals.

- Facilitate a climate of collegiality, independent decision-making, and the right to dissent.
- Encourage open dialogue and positive contributions to Saddleback College by inviting all constituencies to participate in the governance process.
- Use care and integrity in managing confidential information, fulfilling commitments, and sharing credit for accomplishments.
- Provide accurate, objective, and clear information so that decisions are made that are in the best interests of students, employees, Saddleback College, and the public.
- Foster openness and courtesy by encouraging and maintaining communication consistent with Saddleback College's organizational and administrative protocols.
- Abide by established college and district policies and procedures and act within applicable laws, codes, and regulations.

While these ethical principles apply to all members of the academic community, this document is not meant to be a comprehensive list of the ethical responsibilities of each member. Recognizing the different roles of members and the different levels of authority that come with them, we thus affirm that:

- Students are expected to abide by the Student Code of Conduct as printed in the student handbook, and the Associated Student Government Code of Ethics.
- Faculty are expected to abide by the Academic Senate's Faculty Code of Ethics and Professional Standards.
- Classified staff are expected to abide by the CSEA Code of Ethics and Classified Senate Code of Ethics.
- Administrators and Managers are expected to abide by the South Orange County Community College District Administrator and Manager Statement of Ethics.

While each constituent group on campus has its own code of conduct, as mentioned, this joint statement was meant to reinforce the values of honesty, responsibility, and integrity shared by all members of the College community.

Finally, BP 5401, Rules and Regulations for Student Behavior, and AR 5401, Student Conduct, outline the rights and responsibilities of students. This BP and AR include expectations with regards to honesty and integrity and describe the procedures that are in place when the policy is violated. AR 5401 describes in detail the steps to be taken in case of a violation, the possible disciplinary actions, and the process for contesting such actions. This policy and regulation can be found on the District's website and the College's website and is published in both the College Catalog and the Student Handbook. (<https://www.saddleback.edu/la/acts-academic-dishonesty>)

Current policies and procedures related to verification and authentication of students in online courses relies on the username/password protocols established by the current learning

management system. Through the development of the online education plan and QFE it is likely that authentication and verification of students enrolled in online classes will evolve.

ANALYSIS AND EVALUATION

The District and the College have developed policies and procedures that address codes of conduct, including honesty, responsibility, and academic integrity for students, staff, faculty, and management. BP 6120, Academic Freedom, addresses issues of academic freedom and BP/AR 5401 both address student conduct and responsibilities. Moreover, the College constituent groups have reasserted their shared commitment to these principles through the joint development of the “Statement of Mutual Respect and Collegial Behavior.”

Evidence

BP 6120

Statement of Mutual Respect and Collegial Behavior”

AR 5401

<http://www.saddleback.edu/uploads/asenate/documents/FacultyHandbook1213updated.pdf>

<http://www.saddleback.edu/uploads/vpss/CodeofConduct.pdf>

I.C.9 Faculty distinguish between personal conviction and professionally accepted views in a discipline. They present data and information fairly and objectively.

EVIDENCE OF MEETING THE STANDARD

The College expects faculty to present data and information fairly and objectively and to provide an environment that fosters the free pursuit and exchange of ideas. The Faculty Code of Ethics and Professional Standards, developed by the Academic Senate, lists the following expectations of faculty in relation to students:

- a. Faculty treat all students with fairness and respect.
- b. Faculty encourage the free exchange of ideas between themselves and students.
- c. Faculty conscientiously strive to be fair and balanced in their evaluation of student work.
- d. Faculty should not exploit their students for personal gain.
- e. Faculty should be fair and objective when providing references for students.
- f. Faculty shall not disclose information about students obtained in the course of professional service unless disclosure serves a compelling professional purpose or is required by law.
- g. Faculty-student personal relationships are unethical when they hinder any student's academic progress or create a situation in which any student is either favored or negatively impacted on grounds other than academic performance.
- h. Because a teacher/student relationship is inherently unequal, a member of the faculty should not enter into a sexual relationship with his/her student while engaged in a professional relationship.
- i. Faculty have the obligation to meet classes as scheduled, to maintain office hours and to provide reasonable means for student access to course information.

In addition, BP 6120, Academic Freedom, states that it is the responsibility of faculty, among others, to protect, preserve, and promote academic freedom at the College. Thus, when faculty are evaluated on their compliance with BPs, it is evident that they are expected to promote professionally accepted practices of academic freedom and responsibility in their classes. Moreover, the evaluation instrument also assesses faculty on the use of instructional practices that “encourage student learning, critical thinking, and academic initiative,” and on interactions with students that “demonstrates tolerance of different perspectives,” and on the demonstration of “current knowledge of [the] discipline.” Combined, all of these different expectations of faculty ensure that faculty distinguish between their own views and those of the discipline, promote critical thinking and academic initiation, and tolerate different opinions and views in their classes.

ANALYSIS AND EVALUATION

Faculty are expected to create an environment of free inquiry, critical thinking, academic initiative, and tolerance within their classes. Faculty fairly and objectively present information regarding their discipline, but also encourage dialogue and debate. The faculty evaluation process reinforces these expectations.

Evidence

Faculty Code of Ethics and Professional Standards

BP 6120

DRAFT

I.C.10 Institutions that require conformity to specific codes of conduct of staff, faculty, administrators, or students, or that seek to instill specific beliefs or world views, give clear prior notice of such policies, including statements in the catalog and/or appropriate faculty and student handbooks.

EVIDENCE OF MEETING THE STANDARD

Saddleback College is a public institution. As such, Saddleback College is open to all students regardless of race, religion, ethnicity, or preference. Saddleback College does not require conformity to specific beliefs or world views of students nor employees. This standard is therefore not applicable to the College.

ANALYSIS AND EVALUATION

This standard is not applicable.

DRAFT

I.C.11 Institutions operating in foreign locations operate in conformity with the Standards and applicable Commission policies for all students. Institutions must have authorization from the Commission to operate in a foreign location.

EVIDENCE OF MEETING THE STANDARD

Saddleback College does not operate in foreign locations; therefore, this standard is not applicable to the College.

ANALYSIS AND EVALUATION

This standard is not applicable.

DRAFT

I.C.12 The institution agrees to comply with Eligibility Requirements, Accreditation Standards, Commission policies, guidelines, and requirements for public disclosure, institutional reporting, team visits, and prior approval of substantive changes. When directed to act by the Commission, the institution responds to meet requirements within a time period set by the Commission. It discloses information required by the Commission to carry out its accrediting responsibilities.

EVIDENCE OF MEETING THE STANDARD

The College complies with all requirements of the ACCJC. The College's compliance includes upholding Eligibility Requirements, Accreditation Standards, and all Commission policies, guidelines, and requirements relating to public disclosure, institutional reporting, team visits, and prior approval of substantive changes. The College has and continues to respond to all requirements of the ACCJC in a sincere and timely manner, including regular self-evaluations, requested follow-up reports, midterm reports, annual reports, and substantive change reports. For example, in spring 2016, when it was recognized that the ISS were calculated incorrectly, the College contacted the ACCJC promptly to seek advice and recommendations for correction (Link to documentation).

The College has been accredited since its founding in 1967, and it communicates its accreditation status to students and the public both on its homepage and in its online catalog. An accreditation page on the website houses all documents related to the most recent accreditation, including the self-evaluation report, requested follow-up reports, and all communication received from the Commission. Older accreditation materials are archived in the Office of the President.

ANALYSIS AND EVALUATION

The College has a long-standing record of compliance with all of the Commission's requirements for timely submission of all documents required in the accreditation process including self-evaluations, follow-up reports, midterm reports, and annual reports. The College has previously submitted substantive change reports on distance education and off-site offerings, both of which have been approved by the Commission. Recently, two additional substantive change reports have been submitted on x and x.

I.C.13 The institution advocates and demonstrates honesty and integrity in its relationships with external agencies, including compliance with regulations and statutes. It describes itself in consistent terms to all of its accrediting agencies and communicates any changes in its accredited status to the Commission, students and the public.

EVIDENCE OF MEETING THE STANDARD

The College and programs within the College comply with standards, criteria, regulations and statutes as required by external agencies. Some of the external agencies that the College interacts with regularly include the ACCJC, the California Community College Chancellor's Office (CCCCO), the U.S. Department of Education, the California Department of Education, the Orange County Department of Education, the California Community College Athletic Association (CCCAA) as well as program-related accreditation agencies as well as agencies that award grants to the College (Links to each here?).

The College has several programs that are accredited by external agencies including:

- Registered Nursing (RN) Program
- Health Information Technology (HIT) Program
- Paramedic Program
- Alcohol and Drug Studies Program

The Nursing Program has been approved by the California Board of Registered Nursing (BRN) since 1970 and was most recently reapproved in 2013. The Registered Nursing Program has been nationally accredited since 1988 and was most recently reaccredited by the National League for Nursing Accrediting Commission (now the Accreditation Commission for Education in Nursing) in 2010. The Health Information Technology Program (HIT) was initially accredited in 2015 by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM). The Saddleback Paramedic Program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) upon the recommendation of the Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions (CoAEMSP). The Paramedic Program has maintained ongoing accreditation since 2003. The Alcohol and Drug Studies Program is accredited by California Association for Alcohol/Drug Education (CAADE) and has maintained ongoing approval since its inception in 1977.

The accreditation status and agency information for each of the above programs is available on the respective program websites, in the College Catalog, and in PRs. The College, as well as the accredited programs within the College, are responsive to, and consistently demonstrate compliance with, the regulations and statutes of accrediting agencies as evidenced by their long-term, ongoing accreditation statuses. (ER 21)

ANALYSIS AND EVALUATION

The College responds expeditiously, honestly, accurately, and consistently to all accrediting agencies, external agencies, and regulatory organizations. The College responds to requests from external agencies in a timely manner (Link Accreditation Website or docs). The College discloses all required information to the agencies, the students, and the public. Information relevant to accreditation is provided via the College's website, the College Catalog, in PRs, and in program-specific self-studies.

DRAFT

I.C.14 The institution ensures that its commitments to high quality education, student achievement and student learning are paramount to other objectives such as generating financial returns for investors, contributing to a related or parent organization, or supporting external interests.

EVIDENCE OF MEETING THE STANDARD

The College is a publicly funded, open-access, not-for-profit community college that functions for the benefit of its students. As such, the College does not generate financial returns for investors or contribute to any outside organization to enhance or to promote any outside organization's financial gain. All financial arrangements entered into by the College are approved by the governing board and closely monitored by College and District administration.

Student achievement and student learning are central to the mission of the College, which affirms that the institution exists to enrich "its students and the South Orange County Community College District community by providing a comprehensive array of high-quality courses and programs that foster student learning and success." Standard I.A above assesses how the College's mission directs institutional priorities in meeting the educational needs of its students.

The College's commitment to high-quality education, to student achievement, and to student learning are also supported by the Saddleback College Foundation. The Foundation offers comprehensive fundraising for scholarships, programs, instructional equipment, employee development and campus improvement, with the mission of "enhancing the quality of Saddleback College's higher education." The Saddleback College Foundation provides student scholarships and partners with the College in specific resource-development initiatives. The majority of funds donated to the College by the College Foundation are endowed scholarships. The College Foundation promotes charitable giving and entrepreneurial revenue generation through its varied activities; the proceeds from these foundational activities directly benefit the educational programs and the mission of the College.

ANALYSIS AND EVALUATION

The College is a not-for-profit public institution and does not generate returns for investors, contribute to related or parent organizations, or support external interests. All financial arrangements the College enters into are approved by the governing board and are closely monitored by the College and District administration. The College is solely committed to providing a high-quality education for its students.

Evidence

Standard II: Student Learning Programs and Support Services

II.A.1. All instructional programs, regardless of location or means of delivery, including distance education and correspondence education are offered in fields of study consistent with the institution's mission, are appropriate to higher education, and culminate in student attainment of identified student learning outcomes and achievement of degrees, certificates, employment, or transfer. (ER 9 and ER 11)

EVIDENCE OF MEETING THE STANDARD

Saddleback College offers 37 associate in arts degrees, 71 associate of science degrees, 82 certificates of achievement, 3 certificates of completion, 18 A.A.-T degrees, 5 A.S.-T degrees, and 33 occupational skills awards for a total of 249 degrees and certificates (II.A.1-01; II.A.1-02) (ER 9-01; ER 9-02). These degrees, awards, and certificates are reflective of the College's mission, which is to enrich "students and the south Orange County community by providing a comprehensive array of high-quality courses and programs that foster student learning and success in the attainment of academic degrees and career technical certificates, transfer to four-year institutions, improvement of basic skills, and lifelong learning" (II.A.1-03).

To ensure that all programs reflect this mission, program review, completed every two years, requires faculty to address how their programs serve to support the College's Mission Statement (II.A.1-04) (ER 11-0?). In addition, each program is required to have program-level SLOs (PSLOs) documenting the knowledge, skills, and abilities that students can expect to attain as a result of having completed a degree or certificate. The College Catalog lists these PSLOs (II.A.1-05; II.A.1-06; II.A.1-07; II.A.1-08) (ER 11-0?; ER 11-0?; ER 11-0?; ER 11-0?).

Through the curriculum process, programs are designed to meet the academic standards and rigor appropriate for higher education. Program quality is maintained through regular program review. The Program and Course Approval Handbook (PCAH) is the state-sanctioned handbook for curriculum development (II.A.1-09). This handbook guides the development of new and revised programs and courses. The College ensures that at the course level its credits are consistent with accepted norms of higher education through its rigorous curriculum approval process (II.A.1-10; II.A.1-11) during which Course Outlines of Record (CORs) are scrutinized carefully to ensure compliance with accepted state standards (II.A.1-12; II.A.1-13). Course outlines are revised and updated regularly in accordance with established state standards of scheduled review. Transferable courses are developed in compliance with guidelines established by the California State and University of California systems to ensure articulation.

All 113 California Community Colleges, including Saddleback College, maintain three general education patterns (II.A.1-14): the Intersegmental General Education Transfer Curriculum (IGETC) for students planning to transfer to the University of California (UC) system (II.A.1-15), the California State University (CSU) General Education Requirements (CSU GE) for students planning to transfer to the CSU system (II.A.1-16), and a local general education pattern defined by Title 5 (II.A.1-17). In order to transfer to a UC or CSU campus, students are generally required to complete a minimum of 60 transferable units, including general education, major preparation, and elective units.

Program Development and Revisions

The College's Curriculum Committee guides the development of academic programs (II.A.1-18). When a department or division decides to develop a new program, the department or division must first create a program proposal, which provides justification for the program, the sequencing of courses, and the minimum qualifications for faculty to teach the courses. In the case of a new transfer program, the department must show that the new (or revised) program would meet 51 percent of a transfer institution's program's lower division requirements. Once this step has been completed, the department or division then forwards its proposed program to the College's Curriculum Committee, which then determines if the course meets the standards of Title 5. These standards include grading policies, units, intensity, pre-requisites, co-requisites, basic skills requirements, and difficulty level (II.A.1-19). In conjunction with the curriculum chair, the College's articulation officer then ensures that articulation agreements are prepared for the newly developed program. Saddleback College maintains articulation agreements with its most common transfer institutions, including all UC and CSU campuses as well as many private and out-of-state colleges and universities. These agreements are published on ASSIST.org (II.A.1-20) as well as on the College's articulation web page (II.A.1-21). New and revised programs are then approved by the Academic Senate, the Board of Trustees, and the State Chancellor's Office.

In the case of Career Technology Education (CTE) programs, curriculum approval is a three-step process. Curriculum for CTE programs is first approved locally by the College's Curriculum Committee, Academic Senate, and Board of Trustees. CTE curriculum must then be approved by a regional consortium known as the Los Angeles and Orange County Regional Consortium (LAOCRC), which includes representation from all 27 community colleges in the Los Angeles and Orange County areas. This consortium ensures that a new or substantially changed program has positive labor market data and employment opportunities, and that the program doesn't create disruptive competition with other regional colleges. The final step is approval from the State Chancellor's Office.

When choosing fields of study for CTE programs, faculty recommend a program or program modification, then follow the state-mandated process for program approval. The College then measures demand for this program by researching the number of occupations the program would support, the rate of pay for these occupations, and comparable programs (II.A.1-22). Data is obtained from various sources such as EMSI, which includes local labor market statistics, and data mart, a database tied to the State Chancellor's Office that provides enrollment rates, persistence rates, success rates, and the types of certificates and degrees that are awarded for similar programs in the area (II.A.1-23; II.A.1-24; II.A.1-25). In conjunction with this data, the College takes into consideration the demographics and student populations related to the schools that offer said program. After researching demand, the College then seeks input from industry personnel through advisory committees. Based on all of this information, faculty develop the curriculum and send it through the regular curriculum approval process.

Similar to CTE, Community Education (CE) classes are developed and offered in response to community need as identified by feedback from participants, enrollment history, popularity of similar programs offered elsewhere, and current trends (II.A.1-26; II.A.1-27; II.A.1-28). The CE Department welcomes new program proposals from the general public, College faculty, and staff. All proposals are reviewed by program specialists and the dean. New proposals are

accepted based on the anticipated needs of the community and financial viability. All recommended CE classes are reviewed by the Academic Senate for duplication with credit offerings, and are approved by the Board of Trustees before being offered.

In addition to Community Education, the College illustrates its commitment to the lifelong learner through the Emeritus Institute (EI), which offers noncredit academic programs to an older adult population (II.A.1-29). These courses go through the same approval process as other academic courses, but, as they are noncredit and nontransferable, do not go through articulation. Central to the mission and goals of the EI is “the College’s commitment to offer opportunities for intellectual stimulation and cultural enrichment to all members of the community.” Furthermore, courses offered through EI are “academically-rigorous, socially-engaging, mentally-stimulating, and physically-strengthening for older adult students” (II.A.1-30).

When programs are either considered obsolete or are demonstrating a consistently low enrollment, these programs can be re-evaluated through the Program Vitality Inquiry Policy and Process (II.A.1-31), which allows struggling programs an opportunity to assess their viability. Either faculty or administration can initiate this process, and the possible outcomes of the process include program continuance, program revitalization, or program discontinuance.

Course and Program Evaluation

The College addresses the assessment of courses and programs for currency, appropriateness within higher education, teaching and learning strategies, and student learning outcomes through a process known locally as technical review (II.A.1-32; II.A.1-33). In compliance with Title 5, this process takes place every five years for non-CTE courses and every two years for CTE courses. All courses and course revisions are written by faculty experts within a department and approved by the College’s Curriculum Committee—which looks for appropriate rigor, content, standards, and expectations—the Academic Senate, the Board of Trustees, and the State Chancellor’s Office.

All instructional programs, including academic programs, CTE, and the EI, have course-level SLOs, which drive the curriculum. Course SLOs are linked to both PSLOs and the College’s ISLOs, and as part of the biannual program review process, faculty are asked to reflect on how course SLO assessments contribute to overall PSLO and ISLO attainment (II.A.1-34; II.A.1-35).

All ISLOs are tied to the College’s mission of fostering learning and student success, and their areas of focus include: Effective Communication, Intellectual and Practical Skills, Community/Global Consciousness and Responsibility, and Breadth of Subject Area Knowledge (II.A.1-36). In spring 2015, a work group of the College’s Educational Planning and Assessment Committee (EPA) researched ePortfolios and their use for gathering subjective data from students related to attainment of ISLOs. The research found ePortfolios to be a sound approach and source of rich ISLO attainment data because they allow students to reflect on both classroom and non-classroom activities related to ISLOs (II.A.1-37; II.A.1-38; II.A.1-39). In spring 2016, approximately 12 faculty piloted the use of ePortfolios in their classes. The work group is evaluating this pilot during fall 2016, and a plan for college wide implementation of ePortfolios is being devised. Further discussion of SLOs can be found in II.A.3.

Student Success and Academic Planning

Through the Student Success and Support Program (SSSP), the College provides each student with a clear roadmap that leads to further education and/or employment. As a result of the SB1456: Student Success Act, SSSP requires all students to follow the matriculation process unless they have already earned a minimum of an AA/AS degree from an accredited U.S. college, are concurrently enrolled at a four-year college, are taking classes for personal development, or are concurrently enrolled in grades K-11, as all students in 12th grade are required to matriculate (II.A.1-40; II.A.1-41). This requirement, along with the College's enrollment processes, ensures that students will be properly placed and guided toward their majors early on. As part of the initial enrollment process, students must complete the following steps:

1. Orientation
2. Assessment
3. Advisement
4. The creation of an Educational Plan

All students who want a certificate, a two-year degree, to transfer to a four-year university, or who are undecided are guided through this process by a program known as My Academic Plan (MAP), which can be accessed through MySite (II.A.1-42; II.A.1-43; II.A.1-44).

Information on graduation requirements is available on the College website, the Student Handbook, and in the College Catalog, which includes a description of all degree and certificate requirements as well as the general education transfer patterns (II.A.1-45; II.A.1-46; II.A.1-47). In addition, the College's Transfer Center and academic counselors aid students with their educational goals (II.A.1-48).

Data that students progress through and complete degrees and certificates, gain employment, or transfer to four-year institutions is collected annually in the *Saddleback College Institutional Effectiveness Report*, which analyzes the past five years of retention and success rates (II.A.1-49). The report includes student progress, student transfer rates, and the number of degrees earned by transfer students at universities within the CSU and UC systems.

Additional data in relation to student progression and achievement will soon be available through the Community College Survey of Student Engagement (CCSSE), to which the District became a member in 2015 (II.A.1-50). The CCSSE helps community colleges assess their educational practices by analyzing the use of active and collaborative learning, student effort, academic challenge, student-faculty interaction, and learning support services (II.A.1-51).

Beyond insuring academic success, the College also seeks to provide employment pathways for CTE students. CTE programs communicate with the community to ensure the programs meet industry needs. The College also monitors labor market data to see if programs are still relevant.

While the College does not have many programs that are exclusively offered through distance education, courses within programs are offered online and many of the programs provide the ability to complete 50 percent or more of the degree online. The College relies upon discipline experts within programs, such as department chairs, to determine if online courses are applicable to a given program and its students (II.A.1-52). In addition, advisory boards within all CTE

programs, such as HIT (which is 100% online) (II.A.1-53), Real Estate (II.A.1-54), and Child Development (II.A.1-55), provide additional guidance on the applicability and need for online offerings. Considerations for decisions affecting whether to offer a course online include analysis of student access, community needs, historical data for enrollment patterns, fill rates, demand, student success rates, accrediting organization requirements, and academic integrity.

ANALYSIS AND EVALUATION

Saddleback College offers a wide variety of courses and programs that are aligned with the College's mission. The degrees and certificates offered, regardless of location or means of delivery, meet the needs of our students and are regularly assessed to ensure relevancy, academic rigor, and student achievement. Students earning degrees or certificates are prepared to transfer or enter the workforce. The Curriculum Committee reviews programs on a regular basis to ensure that programs support the College's mission and are appropriate to higher education. Every two years, programs are assessed through a comprehensive program review process, which includes the analysis of SLO attainment and student achievement data.

II.A.2. Faculty, including full-time, part-time, and adjunct faculty ensure that the content and methods of instruction meet generally accepted academic and professional standards and expectations. Faculty and others responsible act to continuously improve instructional courses, programs and directly related services through systematic evaluation to assure currency, improve teaching and learning strategies, and promote student success.

EVIDENCE OF MEETING THE STANDARD

All faculty, regardless of mode of delivery, are expected to teach the approved Course Outline of Record (COR), which describes the requirements for a given course, including topics covered, course objectives, typical assignments and readings, methods of instruction, and methods of evaluation (II.A.2-01; II.A.2-02; II.A.2-30). Regular evaluation of both full-time and part-time faculty is practiced to determine that faculty are teaching to the COR.

Faculty, both full-time and part-time, work collaboratively to regularly review and revise the CORs and to evaluate their programs through program review and the curriculum revision and development process (II.A.2-04; II.A.2-05).

Regular evaluation of program curriculum is conducted in accordance with Title 5 section 55130(d) and Education Code section 78016 as overseen by the Curriculum Committee, as described in II.A.1 above.

Program Review

During the program review process—which takes place every two years and is overseen by the Educational Planning and Assessment Committee (EPA)—each instructional program conducts a thorough self-evaluation addressing areas such as staffing, curriculum and instruction, student success, teaching modalities, facilities and infrastructure, and community outreach. As described in the Program Review Handbook, the objectives of program review are to:

1. State program objectives and future objectives align with the college's mission and vision.
2. Collect and analyze data on key performance indicators, SLOs, program activities, and accomplishments.
3. Document and discuss the effectiveness of programs.
4. Develop recommendations and strategies concerning future program directions and needs (for example, budget, staffing, and resources).
5. Provide an opportunity for programs to assess their relevance and position within the division and the college and with all other stakeholders.

In conjunction with the program assessment process, significant emphasis has been placed on the use of data in the continuous improvement of the College's course, program, and degree offerings. In relation to their programs, faculty are expected to provide detailed data reports, including the inFORM Program Review Data Set, the TracDat Comprehensive Program SLO Report, the EMSI Report (if CTE), and the TracDat Program Objectives and Action Steps Progress Report. The inFORM Program Review Data Set provides five years of data on a variety of indicators as a way of analyzing a program for its effectiveness. These indicators, which can

be separated by mode of delivery, include course productivity, course fill rates, success rates, retention rates, student demographics, and awards conferred (II.A.2-06). In addition, the research office supports the program review process by ensuring that a research analyst is available to help faculty with their research needs. Finally, an important component of the program review process is faculty dialogue about the data, including SLO assessment results. These exchanges have led to a number of changes within instructional programs—including changes in curriculum, teaching methods, and the delivery modalities in which a course is offered—based on outcomes assessment as evidenced by the EPA reflective document, which is discussed further in II.A.3. In general, teaching methodologies and delivery modalities are selected based on course content, student need, applicability to discipline, and the faculty's interests and teaching styles. The variety of teaching modalities offered at the College includes face-to-face, online, hybrid, eight-week, accelerated, and late-start classes—all of which enable the College to meet the needs of students so that they can achieve their educational goals in a timely fashion. At the same time, the efficacy of the varying delivery modes is also assessed based on student success and retention rates. Based on an evaluation of the data available, each program sets objectives and action steps during the program review process (II.A.2-07; II.A.2-08; II.A.2-09).

Faculty Dialogue and Professional Development

Beyond program review, faculty-led dialogue about effective teaching strategies is ongoing and pervasive. Each semester, a week of professional development activities is offered for all faculty. This professional development week often includes workshops on teaching strategies, overviews of new technologies tied to education, and training tied to the College's Learning Management System (II.A.2-10). These conversations continue into division and departmental meetings, which are open to both full-time and part-time faculty. Examples of ongoing professional development opportunities include the implementation of AVID for Higher Learning (II.A.2-11; II.A.2-12) in Fall 2013, for which the College received a three-year Dell grant, the Basic Skills Initiative (BSI), which has allowed the College to focus specifically on faculty projects tied to the basic skills learner, the CTE Enhancement Funds, which can be used to help align curriculum with industry standards, and the Institute for Teaching and Learning, an umbrella entity which offers ongoing workshops and training on a variety of teaching strategies and methods.

The Faculty Center for Student Success (FCSS) provides further training and support for faculty through. Formally known as the Center for Instructional Design & Distance Education (CIDDE), the FCSS provides exemplary faculty support and training services that focus on online education and instructional technology (II.A.2-13; II.A.2-14; II.A.2-15). Currently, the FCSS staff are working closely with the online education coordinator and the dean of online education and learning resources to continue improving the quality of online, hybrid, and enhanced education. Training in online technologies through workshops and one-to-one advisement and collaboration with DSPS specialists on the latest best practices provides continual education on accommodation needs and emerging technologies. Furthermore, there are varied opportunities for faculty to consider teaching methodologies for online courses. Support staff in the FCSS are well-versed with the tools and building blocks within the Learning Management System, and they frequently update and refresh their skills to better support faculty members. Individual faculty members also participate virtually in @ONE training courses (II.A.2-16; II.A.2-17), and participate in staff-led workshops in the FCSS. Saddleback College was at the forefront of training for our online faculty, and in the past we offered a six-course skills award for faculty.

This program was discontinued when @ONE created their online program, and it was believed that faculty would complete that program instead. While many faculty did complete the @ONE program, it became evident that a locally devised program should be created as well. Therefore, a ten-week certificate course was created over the summer and fall of 2016 and will debut in spring 2017 (II.A.2-18; II.A.2-19; II.A.2-20; II.A.2-21).

Faculty Evaluation

As outlined in the Academic Employee Master Agreement for 2015-2018, the dean or designee evaluate all faculty on a regular basis. Probationary, tenure-track faculty are evaluated yearly through their fourth year. Tenured and part-time faculty are evaluated at least once every three years. The evaluation process is negotiated by the Faculty Association in consultation with the Academic Senate and district administration. Per the new faculty contract, which was implemented in Fall 2016, the evaluation process includes a faculty-prepared portfolio, a classroom/worksite observation, and an administrative review by the dean or designee. Faculty also have the option of submitting student evaluations. In the case of probationary faculty, a tenure review committee (TRC) is created to monitor the progress of the faculty member and make recommendations on their tenure status. The evaluation of faculty is based on criteria such as the maintenance of currency in their field, the use of effective instructional methodologies and practices, which encourage student learning and critical thinking, the teaching of the approved curriculum, and participation in outcomes assessment and program review (II.A.2-22).

ANALYSIS AND EVALUATION

The College has effective processes for establishing, evaluating, and maintaining quality courses that are taught in a variety of delivery modalities, including face-to-face, hybrid, and online. These processes are largely guided by faculty and include curriculum development and technical review, program review, outcomes assessment, and program discontinuance inquiry. All faculty are responsible for student success and are evaluated on a regular basis to ensure currency in their field, the use of effective teaching methodologies, adherence to the course curriculum, and participation in outcomes assessment and program review.

II.A.3. The institution identifies and regularly assesses learning outcomes for courses, programs, certificates and degrees using established institutional procedures. The institution has officially approved and current course outlines that include student learning outcomes. In every class section students receive a course syllabus that includes learning outcomes from the institution's officially approved course outline.

EVIDENCE OF MEETING THE STANDARD

The College recognizes three levels of learning outcomes: course SLOs, which pertain to the knowledge and abilities that students gain within a single course; program-level SLOs (PSLOs), which pertain to the knowledge and abilities that students gain within their field of study; and institutional SLOs (ISLOs), which pertain to the knowledge and abilities that students gain by having completed a degree or transfer program at the College (II.A.3-01). Ongoing assessment of these SLOs has been in place since 2005. In addition, the College has also identified Administrative Unit Outcomes (AUOs) for each administrative and student support unit on campus (II.A.3-02; II.A.3-03). Assessment of these outcomes has also been underway for a number of years. The coordination of these assessment activities is through the Educational Planning and Assessment Committee (EPA) in collaboration with the Curriculum Committee, the Academic Senate, and the Planning and Budget Steering Committee (PBSC).

All active courses at the College have related SLOs, which are required to be listed on the syllabus of each section offered. One or more of these SLOs is assessed in each section of the course annually, and the results are stored within TracDat, the system used to house the College's SLO data (II.A.3-04). To increase SLO attainment, department chairs meet with their faculty in order to engage in dialogue regarding the results, help faculty make thoughtful revisions to their courses or teaching methods, and revise department curriculum as needed. The assessment results and the way in which those results are used are then input into TracDat. The *TracDat Comprehensive SLO Report* contains evidence of this assessment activity, as well as assessment results and the ways in which results have been utilized by programs (II.A.3-05; II.A.3-06). Each program runs and analyzes this report during the program review process. At present, the College is working on including SLOs on the COR for each course (II.A.3-07; II.A.3-08). This necessitates both a technical change on CurricUNET, the system used to house the College's curriculum, and a processual change in the curriculum process. Due to the five-year cycle for course review, and the need for all changes to the COR to go to the State Chancellor's Office for approval and the articulation process, this change will take a few years to complete as each course cycles through the system. Faculty are evaluated, in part, on their participation in SLO assessment activities and the placement of SLOs on their course syllabi (II.A.3-09).

Program student learning outcomes (PSLOs) have also been identified for each certificate and degree program at the College. These are published in the College Catalog (II.A.3-10; II.A.3-11) and posted on the web pages of most programs (II.A.3-12; II.A.3-13). Within TracDat course SLOs are mapped to the relevant PSLOs, and reports can be run to allow for the analysis of PSLO attainment based on the aggregation of course assessment data (II.A.3-14; II.A.3-15). Direct assessment of PSLOs also occurs in many programs, especially those with capstone courses or licensure exams, such as Nursing or Child Development, where a single course, exam,

or signature assignment is required for all students graduating with a certificate or degree in that program. Due to the nature of community colleges, this is not true for most programs, so the College has been investigating various options. At present, the College is initiating a rollout plan for student ePortfolios for the purpose of direct ISLO assessment. Once institutionalized, these ePortfolios can be used by programs for PSLO assessment as well.

The College has also identified a set of institutional student learning outcomes (ISLOs) that are related to degree requirements. These are published in the College Catalog (II.A.3-16) and on the College's website (II.A.3-17). Within TracDat, course SLOs are mapped to the relevant ISLOs, and reports can also be run for the analysis of ISLO attainment based on the roll-up of course assessment data (II.A.3-18). The College has identified a number of methods for direct ISLO assessment that include the following:

- **ePortfolios:** An ePortfolio is an electronic collection of writing samples, photos, research undertakings, creative projects, student reflections, and mentor feedback that document a student's academic journey while at the College and beyond. These ePortfolios allow students to report on both classroom assignments and accomplishments outside of the classroom that relate to ISLOs (II.A.3-19). During 2014-2015, a joint workgroup of the Student Success Committee and the EPA Committee conducted, researched, and developed an ePortfolio pilot, which took place in spring of 2016 (II.A.3-20; II.A.3-21). During the pilot, approximately 12 faculty members used ePortfolios in their classes. The students involved in the project created their ePortfolios on one of two platforms, uploaded a signature assignment given to them by their professors which directly assessed one or more of the College's ISLOs, and wrote a brief reflection on their attainment of that ISLO. A plan for the college wide rollout of ePortfolios is being devised during fall 2016 for implementation in spring 2017.
- **Testing students through CLA+:** CLA+ is a standardized exam for SLO assessment that is used by many four-year colleges and universities. This assessment can provide external validation that students have attained the College's ISLOs. During the pilot implementation of CLA+, 100 students took the assessment. An evaluation of its usefulness for the College is taking place in fall 2016 (II.A.3-22).
- **Interactive workshops:** In fall 2015, the EPA Committee began holding interactive workshops with faculty during the College's professional development week as a means to identify the ways in which ISLOs are being assessed across the campus. Much like a focus group, these workshops are useful in collecting indirect data on ISLOs (II.A.3-23).
- **Department Chair Surveys:** In fall 2016, the EPA Committee will send an annual survey to department chairs as an additional means of identifying the ways in which ISLOs are being assessed across the campus. These surveys will also provide indirect data on ISLOs (II.A.3-24).

ANALYSIS AND EVALUATION

The College has identified course SLOs for all courses it offers, PSLOs for all certificate and degree programs, and ISLOs for general education outcomes. The College assesses course SLOs on a regular basis, a process, which provides information that rolls up to PSLOs and ISLOs, providing data for a dialogue on P/I/SLO attainment through the Program Review process. The College is working diligently on finding ways to more directly assess PSLOs and ISLOs, including the promising use of ePortfolios. For many years faculty have been asked to place SLOs on their course syllabi; however, it became evident that there were cases in which this was not being done. In order to rectify this inconsistency, in 2015 the Academic Senate approved a mandate that all course syllabi must include the approved SLOs. The College now evaluates faculty's adherence to this mandate (II.A.3-15). The College is working on integrating SLOs into official course outlines. Unlike other indicators, such as success and retention rates, which are disaggregated, course SLOs have been assessed in all courses and in every delivery mode, but the data has been aggregated so that results cannot be analyzed by modality. The EPA Committee is currently working on a new process that will require SLO result data to be separately reported and analyzed. A rollout of this new process will occur for the 2016-2017 assessment results.

II.A.4. If the institution offers pre-collegiate level curriculum, it distinguishes that curriculum from college level curriculum and directly supports students in learning the knowledge and skills necessary to advance to and succeed in college level curriculum.

EVIDENCE OF MEETING THE STANDARD

The College offers pre-collegiate level curriculum in English, math, reading, and English as a Second Language (ESL). Pre-collegiate level courses are designed to prepare students for college-level coursework, and as such are nontransferable. This pre-collegiate curriculum is distinguished from college-level curriculum through the use of course-sequencing numbers (II.A.4-01), which have been established through the College's Curriculum Committee. All basic skills courses are numbered in the 300s and are designed for students who aren't ready for college-level curriculum. Developmental courses are in the 200s and are geared toward students who have higher skills, but are still not ready for college-level curriculum (II.A.4-02). Transfer courses are numbered from 1-199 for transferability to the CSU system and 1-99 for transferability to the UC system. This sequencing system is available to students in the College Catalog.

Information about the course-sequencing system is also available in MAP when students develop their academic plans. The College does not differentiate class sequence by teaching modality, so face-to-face and online courses are numbered in the same way. In the case of stackable certificates, which allow students to start with a low-unit certificate that provides employable skills that can then be combined with another certificate or degree in order to expand skills and potentially increase pay, the numbering system, along with the official course description, clarify when a student's work becomes college level.

The College establishes and evaluates pre-collegiate courses and programs through the scheduled technical review, outlined in II.A.2 above. As there is no distinction between faculty who teach basic skills courses and faculty who teach transferable courses, dialogue regarding departmental mapping of courses, alignment of SLOs, and the integration of compressed or accelerated curriculum, is department wide. Curricular changes are made in the interest of promoting student success. For example, the English Department has examined success rates and retention in relation to the multiple exit points that a basic skills student would encounter. "Exit points" refers to the increased number of courses the basic skills student takes in order to reach college-level curriculum. With each additional class, it is less likely that the student will reach his or her academic goals. In response to this concern, the English Department will pilot an accelerated course in spring 2016. This course, ENG 390, will remove an exit point and allow students who successfully complete the course to enter into college-level writing (II.A.4-03; II.A.4-04). Prior to beginning coursework at the College, all students are required to complete the matriculation process unless they have already earned a minimum of an AA/AS degree from an accredited U.S. college, are concurrently enrolled at another four-year college, are taking classes for personal development, or are concurrently enrolled in grades K-11 (II.A.4-05). After reviewing the New Student Online Orientation, students are assessed in reading, English, math, and, when applicable, ESL (II.A.4-06). Once their skill level has been determined, students are advised and given a First Semester Education Plan. As a result, student need, as determined through matriculation testing, establishes the criteria by which the College decides to offer developmental, pre-collegiate, continuing and community education, short-term training, and contract education programs. The College also works with the K-12 system to better understand pre-collegiate student populations and their needs. Faculty within a department determine whether to offer these pre-collegiate courses in face-to-face or online modalities. The majority of these courses are offered face-to-face, but, in response to student demand, some English and math courses are offered online (II.A.4-07; II.A.4-08). The continual monitoring of student success, retention, and persistence rates in these course helps determine whether the courses are being offered in the correct modalities.

An example of a recently developed program that illustrates the College's responsiveness to adult education needs is the new noncredit ESL Adult Education program (II.A.4-09). Once offered only through the extension program of the K-12 districts, this program is now offered through the Division of Community Education and provides basic skills classes for adult English language learners. This program provides an example of a clear pathway that community ESL students can take in preparation for college courses. Starting in fall 2015 and geared specifically for the basic skills ESL population, the ESL adult education curriculum provides a seven-level class sequence that leads from the Basic Literacy course to Advanced-High ESL. Class sequencing numbers have been assigned in the 700 range to illustrate that these classes are just below the lowest level of credit ESL offered at the College.

Student need and employer demand help establish the criteria for offering basic skills courses, especially for CTE and EWD. The EWD Corporate Services Office initiates contract education and training programs, which are customized to industry needs (II.A.4-10). For example, the Health Sciences Department offers basic skills courses and programs with contextualized basic skills. These basic skills offerings are designated specifically for health science students and include contextualized and applied learning (II.A.4-11). Industry need drives the EWD course and training offerings. The guiding principles of the College's EWD plan state, "The EWD program will include seamless services and instruction (i.e. a 'pipeline of services') within the college and external partners," as well as, "track student progress and success from enrollment to employment" (II.A.4-12). For example, the EWD job placement officer works with students and industry partners to make employment connections for our students.

Basic skills students are supported by the Student Success and Support Program (SSSP) through the matriculation process, by counseling services in the development of academic plans and explanation of course sequencing, and by the Learning Resources Center (LRC) tutoring program that helps students to succeed in their classes (II.A.4-13; II.A.4-14). In addition, three part-time counselors were hired starting in spring 2015 to specifically serve AESL and ESL students. All of these services assist students in their academic progress and in the illumination of clear pathways to college certificates and degrees.

ANALYSIS AND EVALUATION

The College is dedicated to the educational needs of the community. Pre-collegiate courses and support services are essential for students who desire a college certificate or degree but who are not yet prepared to succeed in college-level coursework. However, the persistence and success rates of these students are, unfortunately, fairly low. In fall 2015, the College's BSI Committee published a report that addresses the success rates of students who moved from pre-collegiate to collegiate courses (II.A.4-15). Following a cohort from fall 2012 to fall 2015, the data shows that only 42 percent of the students successfully passed a college-level English course within three years, and only 6 percent passed a college-level math course within three years. This is an ongoing concern that is being addressed in a variety of ways. One of the reasons why students have not progressed quickly from pre-collegiate into college-level courses is due to the number of courses in these sequences. Therefore, faculty from several departments are working together to shorten the time that it takes students to prepare for college-level transfer courses. For example, curriculum in ESL 350 was revised to align with ENG 300, so that students can then go into the ENG 200 intermediate skills class without having to take ENG 300 as well. This has been accomplished through the alignment of SLOs in the two courses. Additionally, ESL faculty have changed the way ESL 356, Academic Success Strategies, is taught so that students who are concurrently enrolled in ENG 200 receive additional support. The ESL Department also developed additional courses which aid in academic success, such as: ESL 354, Vocabulary Skills for College; ESL 355, ESL Reading for College: American Literature; and ESL 357, Grammar Review for College.

DRAFT

II.A.5. The institution's degrees and programs follow practices common to American higher education, including appropriate length, breadth, depth, rigor, course sequencing, time to completion, and synthesis of learning. The institution ensures that minimum degree requirements are 60 semester credits or equivalent at the associate level, and 120 credits or equivalent at the baccalaureate level. (ER 12)

EVIDENCE OF MEETING THE STANDARD

The College's Curriculum Committee is responsible for maintaining high-quality, broad-based, rigorous programs that follow standard practices in American higher education (II.A.5-01). When new or revised curriculum is proposed, the College's Curriculum Committee determines the course level and sequencing through a number of techniques (II.A.5-02). When applicable, the curriculum chair first looks to the rubrics from the State Chancellor's Office and applies them to the course description to determine if a course has been appropriately sequenced and has the appropriate level of rigor. In particular, the chair will look to the rubrics when assessing developmental courses in math, English, reading, and ESL. While reviewing the proposed course, the chair will look to see how the course aligns with the rubric and if it is appropriately placed within a program's sequence. In cases when there are no rubrics, most often for courses that are nontransferable or for CTEs, the chair will look to Bloom's Taxonomy (II.A.5-03) and the Methods of Evaluation (MOE) to assess the course. The state-approved Course Outline of Record (COR) is a key metric in ensuring that the College's offerings reflect the practices common in American higher education (II.A.5-04).

The Curriculum Committee also ensures that new and revised associate degree programs have at least 60 units which are comprised of general education requirements and, in accordance with Board Policy 5600 and Title 5, Section 33060 et seq, at least 18 degree-specific units (II.A.5-05). All degree programs can be completed in two years if a student attends the College on a full-time basis with a minimum of 15 units per semester (II.A.5-06; II.A.5-07; II.A.5-08; II.A.5-09).

Another way that the College ensures that its programs and degrees follow practices common to American higher education is through articulation, a process by which the College's articulation officer makes sure that the courses offered align with those of higher or equal institutions (II.A.5-10). These articulation agreements streamline the student's ability to transfer. Articulation agreements are developed and updated based upon student need. The College maintains articulation agreements with its most common transfer institutions, including all of the CSU and UC campuses (II.A.5-11) (ER 12-01) as well as many private and out-of-state colleges and universities (II.A.5-12; II.A.5-13) (ER 12-02; ER 12-03). All articulation agreements are published at ASSIST.org and on the Saddleback College articulation website (II.A.5-14). Various degree pathways, including the Associate in Arts for Transfer (AA-T) degrees, demonstrate the efficacy of these agreements (II.A.5-15). The AA-T degree ensures that students who earn an AA-T and meet the CSU minimum eligibility requirements are guaranteed admission to a CSU (II.A.5-16; II.A.5-17). To date, the College offers 18 majors which have been approved for the AA-T, in addition to the 108 AA and AS degrees offered by the College.

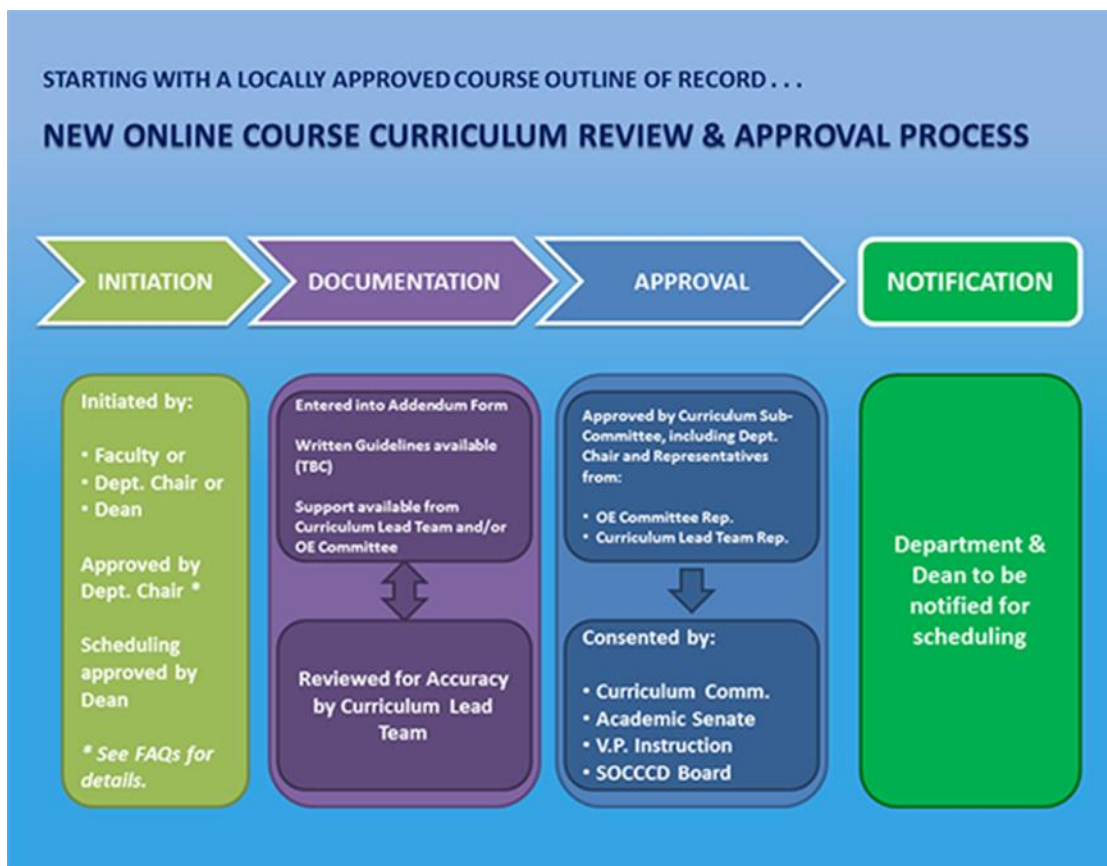

The College's formalized program review process maintains the quality of programs (II.A.5-18). All programs are subject to review on a two-year cycle. This review includes an analysis of the

program's relevance to the College mission. Courses that have not been offered in three years are generally eliminated from the College Catalog, and those programs that are determined to be outdated or unnecessary are subjected to the Program Vitality Inquiry Policy and Process. This policy takes into account the following issues: "effect on students, college curriculum balance, educational and budget planning, regional economics and training, [and] collective bargaining agreements" (II.A.5-19). Though rarely implemented, the presence of this policy reinforces the connection between courses offered and student need.

High-quality instruction is ensured through the hiring process and through faculty evaluations, which occur every three years for both full-time and part-time faculty (II.A.5-20). All faculty must meet minimum teaching qualifications. District administration and the Faculty Association have established the faculty evaluation process in accordance with the Education Code. The Academic Senate, Faculty Association, and administration regularly review and update this process. Furthermore, the faculty and administration implement this process to ensure that division deans or their designees evaluate all probationary, tenured, part-time classroom, and non-classroom faculty. This faculty evaluation process considers faculty expertise, organization, communication skills, teaching methods, and the quality of their assessments.

Several steps maintain the quality of online courses and online instruction. First, a subcommittee of the Curriculum Committee uses a separate approval process to ensure that the quality of online courses is consistent with that of face-to-face courses (II.A.5-21). The subcommittee also determines whether the intended methodology for the proposed online course is appropriate to the topic (II.A.5-22). The Distance Education Addendum confirms that faculty create assignments and grading strategies suited to an online environment.

Flow-chart for D.E. Curricular Approval Process

Faculty evaluations also maintain the quality of online courses. Similar to a face-to-face evaluation, the evaluation of online classes is done by the dean or dean's designee. The evaluation consists of a 50-minute meeting between the instructor and the evaluator during which the instructor walks the evaluator through the online class.

ANALYSIS AND EVALUATION

In the development of its certificate and degree programs, the College follows practices common to institutions of higher education. Following Title 5 and Board Policy 5600, all associate degrees require a minimum of 60 semester units. As the College's content experts, faculty are primarily responsible, through the curriculum and technical review processes, for all matters concerning breadth, depth, rigor, sequencing, time to completion, and criteria for evaluation of courses and programs. Program review evaluates all programs for their effectiveness every two years. Quality instruction is maintained through the evaluation of faculty of both face-to-face and online courses every three years.

II.A.6. The institution schedules courses in a manner that allows students to complete certificate and degree programs within a period of time consistent with established expectations in higher education. (ER 9)

EVIDENCE OF MEETING THE STANDARD

The College creates a course schedule that allows students to complete certificate and degree programs within a period of time consistent with established expectations in higher education (II.A.6-01; II.A.6-02) (ER 9-03; ER 9-04). Coursework leading to a degree, an occupational skills award, or a certificate is offered during the fall, spring, and summer semesters and is sequenced to enable students to complete requirements in a timely fashion (II.A.6-03; II.A.6-04; II.A.6-05; II.A.6-06) (ER 9-05; ER 9-06; ER 9-07; ER 9-08). Courses are offered in different modalities (II.A.6-07) (ER 9-09), at various locations within the community (such as local high schools), in both day and evening time blocks, and for varying term lengths (II.A.6-08; II.A.6-09; II.A.6-10) (ER 9-10; ER 9-11; ER 9-12). In addition, to ensure that students will be able to complete their degree in the specified timeframe, the state requires that all courses be offered at least once every two years.

The College utilizes a number of data-driven methods to ensure that courses are scheduled in alignment with student needs and program pathways. Through Sharepoint, department chairs have access to an enrollment management site that provides data on course times, enrollment, and section counts (II.A.6-11). This data provides evidence of demand. Further evidence of demand can be found through the inFORM Data Warehouse, which provides statistics and data related to enrollment trends, retention rates, and success rates (II.A.6-12, II.A.6-13). Course waitlists are also useful measures of demand. If waitlists for courses are long, additional sections can be added as needed if classroom space and faculty are available.

Programs are encouraged to create scheduling templates to inform students when all courses will be offered over the coming two-year period, and many programs, such as Automotive Technology and Human Services, have done so. All templates provide clear roadmaps and are efficiently sequenced (II.A.6-14, II.A.6-15, II.A.6-16). This is particularly important for CTE programs, which tend to have classes that are offered only once every two years. This information is therefore vital for students as they create their academic plans. The goal is for all programs to update their templates on a yearly basis and publish them to their webpage so that students and counselors will be able to reference them. In addition, as more students complete their academic plans through MAP, the College intends to use this information to effectively predict course demand in a given semester so that the appropriate number of sections will be offered to meet student need.

Finally, the College has recently taken several steps, such as the introduction of accelerated courses and changes in placement assessment, to ensure that students complete their coursework in a timely fashion (II.A.6-17). For example, the accelerated course English 390 is a one-semester course designed for students who have placed two levels below college transfer. Through successful completion of the course, students qualify for college-level English courses (II.A.6-18). Furthermore, both the introduction of a multiple measures assessment process and the Refresh Program, which allows students who have placed into beginning or developmental

courses the opportunity to take a free workshop and then retest, ensure that students are both appropriately placed and on a clear pathway toward their career goals (II.A.6-19).

ANALYSIS AND EVALUATION

The College has worked hard at enrollment management to ensure that students are able to complete their certificates and degrees in a timely manner. An important redesign of course scheduling is reflected in the new block schedule instituted in 2015-2016, which was designed to allow for the most efficient scheduling of courses to meet the needs of students (II.A.6-20). The College has recently completed a comprehensive enrollment management plan that addresses additional ways to improve student progression through their programs (II.A.6-21). This plan was approved by the Consultation Counsel in March of 2016 and has since been implemented.

II.A.7. The institution effectively uses delivery modes, teaching methodologies and learning support services that reflect the diverse and changing needs of its students, in support of equity in success for all students.

EVIDENCE OF MEETING THE STANDARD

In order to best meet the needs of a diverse student population, the College uses a variety of teaching methodologies and delivery modes, including face-to-face, online, hybrid, field studies, service learning, and cooperative work experience (CWE). These various modes of delivery are designed to address the various learning styles and delivery needs of the student population.

The College's diverse teaching methodologies are also reflected in the numerous ways in which SLOs are assessed, as outlined in the College's SLO Handbook (II.A.7-01). Some of these methodologies include the use of field research, written evaluations, group presentations, exams, and performances. Enrollment numbers and program review serve as evidence that the College meets the needs and learning styles of its students. The evaluation of the effectiveness of delivery modes is an important component of the biannual program review (II.A.7-02). While some programs, like Real Estate, are almost entirely online, other programs, like Sociology, use a variety of delivery modes including face-to face, hybrid, and online courses.

In addition, the College's online courses offer an array of instructional methods to address the multiple learning styles of online students. Online courses can include a variety of methods for student-to-student interaction, including collaborative activities, discussion boards, and synchronous instruction. These courses also offer various methods of content delivery, such as video, audio, and written lectures (II.A.7-03). Using the Turnitin database, which is part of the LMS platform, instructors can provide feedback on student work through grading rubrics, typed notes, and voice memos. These forms of feedback can serve multiple intelligences and can offer the instructor a means to engage students with different learning styles. The College also works to ensure that all of its students are served equitably by the student support programs on campus. Various methods work to identify populations that are disproportionately impacted, such as the Student Equity Plan, which "[is designed to] transform services by recommending best practices, activities and interventions to better serve students on campus" (II.A.7-04).

Some of the support programs that serve the diverse and changing needs of our students include:

- The Community Education program (II.A.7-05) is responsible for adult noncredit programming, including educational and personal enrichment classes, as well as guided travel opportunities. In 2013, Community Education Department programming expanded to include afterschool and enrichment programs for K-12 and oversight of intensive language courses offered to international students. In 2015, Community Education Department programming expanded to include oversight of community-based AESL (Adult ESL) programs (II.A.7-06).
- The Saddleback College Emeritus Institute promotes lifelong learning by offering academically rigorous, mentally stimulating, socially engaging, and physically

strengthening classes for older adult students in South Orange County (II.A.7-07; II.A.7-08).

- The Disabled Students Programs and Services (DSPS) program provides support services, specialized instruction, and authorized educational accommodations for students with disabilities so that they can participate fully in, and benefit equitably from, their college experience (II.A.7-09; II.A.7-10; II.A.7-11).
- Veterans Education and Transition Services provides support for the College's large veteran population. The effort to support student veterans includes a vast amount of counseling support, dozens of community partners, student activities, the Veterans Memorial, and the VETS Center (II.A.7-12).
- Extended Opportunity Programs and Services (EOPS) is a state-funded program, which serves students who are educationally and financially disadvantaged. The program's services include academic, career, and personal counseling, as well as book service, priority registration, and assistance in transferring to four-year colleges and universities (II.A.7-13).
- As a supplemental program of EOPS, CARE provides educational support services for EOPS-eligible students who are single heads of households receiving CalWORKs (California Work Opportunity and Responsibility to Kids) (II.A.7-14).
- CalWORKs is a welfare program that provides cash aid and services to eligible California families. In addition to providing educational planning and counseling, CalWORKs also helps students navigate the community college system, coordinate with county welfare offices, and provide a bridge to other on-campus and off-campus services (II.A.7-15; II.A.7-16).
- The Saddleback College Economic and Workforce Development Initiative facilitates a variety of solutions for employment development and workforce training. The Economic and Workforce Development Initiative can help businesses and individual students navigate through the array of options at Saddleback College and a network of resources throughout California (II.A.7-17).

The Learning Resource Center (LRC) offers additional learning support services, including face-to-face and online tutoring; the Paper Center, which provides remote feedback on uploaded papers; and extended hours to meet the needs of nontraditional students (II.A.7-18). All of these services ensure greater success for students who utilize the Tutoring Center.

Moreover, numerous professional development opportunities can assist the faculty and staff in addressing the diverse needs of students. These professional development opportunities include best teaching practices for online instruction, accessibility training, and basic skills workshops, among others.

ANALYSIS AND EVALUATION

Saddleback College has carefully evaluated the needs of its diverse student population and constantly seeks to develop and reinforce programs that will aid students in their academic goals. Courses are scheduled in a variety of delivery modes, locations, term lengths, and time blocks. Student support services are also offered online and on campus during day and evening hours.

Professional development opportunities assist faculty and staff in addressing the diverse needs of students. As discussed in the 2010 *Accreditation Self Study Report*, the College created the Institute for Teaching and Learning, which provided in-house online instruction training for faculty through a series of two-unit courses. Due to low enrollment, these courses were phased out in 2012. Faculty now use @ONE, an outside provider that partners with the State Chancellor's Office to provide training and certification for online instructors (II.A.7-19). Furthermore, the Faculty Center for Student Success (formally known as CIDDE) offers online assistance and supports effective use of instructional technology both inside the classroom and in online courses. The FCSS regularly provides training to faculty and staff during in-service and Flex Weeks, ongoing workshops, and training and support for instructional technologies throughout the year (II.A.7-20).

II.A.8. The institution validates the effectiveness of department-wide course and/or program examinations, where used, including direct assessment of prior learning. The institution ensures that processes are in place to reduce test bias and enhance reliability.

EVIDENCE OF MEETING THE STANDARD

The College validates the effectiveness of standardized testing utilized in its programs. The only programs currently using standardized tests are the Student Success and Support Program (SSSP) and in the Nursing and Reading programs solely for placement purposes. SSSP assesses all new degree and certificate students for placement into the correct level of English, math, reading, and ESL courses (II.A.8-01).

When a new standardized test is adopted, a validation study and report will be conducted, looking specifically for test bias and student equity. Such was the case when, in 2013, SSSP shifted to the CTEP for student placement (II.A.8-02). A validation report of the CTEP was published in the spring of 2014. In areas where student equity was not reached, the college disaggregated the data to assess specific target groups and discussed how to reach them. The Student Success Coordinating Committee update report and the College Student Equity Plan also illustrate how specific groups who might struggle are provided extra support when preparing for the placement test in order to reduce test bias and enhance reliability (II.A.8-03; II.A.8-04). For example, the College has implemented the Refresh Program where students complete a 21-hour workshop led by English and math instructors and then re-take the placement test (II.A.8-05).

Those programs that require further assessment for student placement work hard to validate their tests and maintain test reliability. For example, the Nursing Program conducts exams that assess prior learning for entrance to their program. Students must take the Test of Essential Academic Skills (TEAS), which assesses knowledge of reading, mathematics, science, and English and language usage (II.A.8-06). Students must achieve a minimum score of 62 percent in order to apply for the Nursing Program. Since multiple criteria determine admission to the Nursing Program, the TEAS assessment can have a significant impact on whether or not a student is allowed admission into the program. For those students who seek transfer from other nursing programs or who are Licensed Vocational Nurses (LVNs) and would like to become RNs, Nursing administers several nationally normed tests from Assessment Technology Incorporated (ATI) to assess prior learning and to determine recommended placement in the program. By law, an associate degree nursing program that admits LVNs has to have a path that makes it possible for LVNs to complete their course of study in one year. Furthermore, the Nursing Program has studied patterns of success and found that students who score low on the nationally normed ATI Medical Surgical test are not as successful as those who score higher, thus reinforcing the test's reliability. The Reading Program also uses a standardized exam, the Lexile diagnostic, to place students into reading courses. The Reading Program recently shifted to this exam after having used the Nelson-Denny exam for many years. The department decided to shift to the Lexile Diagnostic after realizing that students would test more accurately if they were not timed. Given that English 340 attracts a large number of English as a Second Language students and Special Services students with a broad spectrum of learning disabilities, a timed test with the level of difficulty of the Nelson-Denny does not accurately reflect the reading comprehension abilities of

those students. The Lexile diagnostic and vocabulary pretest are untimed tests, and the results of these assessments more accurately represent the student's comprehension and vocabulary skill level.

ANALYSIS AND EVALUATION

There is an active effort throughout the College to ensure that standardized examinations, where used, accurately reflect of students' abilities. Faculty assess tests for inter-rater reliability, content, and construct validity.

II.A.9. The institution awards course credit, degrees and certificates based on student attainment of learning outcomes. Units of credit awarded are consistent with institutional policies that reflect generally accepted norms or equivalencies in higher education. If the institution offers courses based on clock hours, it follows Federal standards for clock-to-credit-hour conversions. (ER 10)

EVIDENCE OF MEETING THE STANDARD

According to Board Policy 5600, an associate degree is awarded to a student “who has demonstrated competence in reading, written expression and mathematics, and who has satisfactorily completed at least 60 semester units of college work” (II.A.9-01). Units of credit are awarded based on the Carnegie Unit, in which 18 hours of standard lecture and 36 hours of outside work equal 1 unit of credit (II.A.9-02) (ER 10-01). The basis for awarding credit is tied to each course’s Methods of Evaluation (MOE), which, in turn, are linked to the course’s SLOs (II.A.9-03; II.A.9-04). A variety of mediums can assess these outcomes, thus tailoring the MOE to the SLO. As the MOEs and SLOs are connected, and because SLOs are incorporated into PSLOs, the College can ensure that the achievement of stated programmatic learning outcomes is the basis for awarding degrees and certificates. In addition, degrees or certificates are awarded based on completion of requirements of course work and experiential training as published in the annual Course Catalog (II.A.9-05; II.A.9-06).

C-ID, a course identification numbering system that was made possible by a grant through the State Chancellor’s Office, has streamlined the articulation process. Through C-ID, “Individual community colleges [can] submit local course outlines that are judged by faculty evaluators against the descriptors, and each course designated as a match will have the specific C-ID supranumber appended to its local numeric designation (II.A.9-07). Each C-ID number identifies a specific lower-division, transferable course commonly articulated between the [CCCs](#) and UC and CSU, as well as with many of California’s independent colleges and universities.” II.A.9-08; II.A.9-09 As a result, C-ID will simplify the articulation process, matriculation, and student placement.

As specified by the Program and Course Approval Handbook 6th Edition, which was created by the Academic Affairs Division of the State Chancellor’s Office, the College follows federal standards for clock-to-credit hour conversion in the awarding of credit. This handbook states that “[t]he standard formula for credit hour calculations applies to the majority of courses and course types and is derived from the regulations in title 5, section 55002.5 [, which] requires colleges to define one unit of credit as a minimum of 48 total hours of student work, inclusive of all contact hours plus outside-of-class, or homework, hours” (II.A.9-10) (ER 10-02).

The College ensures that current and prospective students receive clear and accurate information about courses and programs through detailed department and division web pages (II.A.9-11; II.A.9-12), counseling (II.A.9-13), and the official College Catalog (II.A.9-14) (ER 10-03). These sources include descriptions of degrees and certificates in terms of their purpose, content, course requirements, and expected PSLOs (II.A.9-15). All course syllabi must contain the course SLOs, which, as described in II.A.3 above, are assessed annually (II.A.9-16; II.A.9-17; II.A.9-18). These SLOs are designed as “a means to discover if students, are, in fact, learning what they

are expected to learn in courses and programs throughout the college.” While the College does not award credit based on SLO *assessment*, it does award credit based on SLO *attainment*. This practice makes sense as there is a direct connection between SLOs and overall course objectives (II.A.9-19). Students' grades reflect their ability to achieve these course objectives, which are, in turn, designed as a result of stated learning outcomes. The correlation between SLOs and the listed methods of evaluation reinforces each course's intended purpose. For example, the English Department assesses SLOs based on student writing—an important method of evaluation in all levels of composition, and a method of evaluation on all CORs in the composition strand (II.A.9-20; II.A.9-21).

Through systematic program review, faculty illustrate how course-level SLOs are linked to both PSLOs and one, or more, of the Institutional SLOs (ISLOs), which are listed in II.A.11 below. ISLOs are the competencies and general education SLOs that students will attain through the completion of a degree or transfer program at Saddleback College. The ISLOs were developed by the EPA, approved by the Academic Senate, and are published in the College Catalog and on the College's website (II.A.9-22; II.A.9-23).

The College has rigorous curriculum review and program review processes, which apply to all courses and programs and do not differentiate significantly between face-to-face and online modalities. For example, there is no distinction between the competency levels determined for online versus face-to-face courses. Similarly, the processes for establishing and evaluating courses and programs, including the determination of appropriate credit and articulation agreements, are the same for both modalities. Moreover, Carnegie Units, a standard metric used nationwide, are awarded in the same way for online courses and face-to-face courses (II.A.9-24). Faculty determine SLOs for all courses based on their discipline expertise. As these SLOs adhere to the same COR and students are expected to meet the same competencies regardless of delivery mode, these SLOs must be the same for both face-to-face and online courses (II.A.9-25).

ANALYSIS AND EVALUATION

There is a direct correlation between the credits, degrees, and certificates awarded by the College and the attainment of the student learning outcomes instrumental in the development of course objectives. Furthermore, there is a rigorous curriculum development and approval process to ensure that students leave with credits, degrees, or certificates that reflect the generally accepted norms of higher education. Evidence of the College's academic standards can be found in the integration of the federal standard for clock-to-credit conversion house as maintained by the Carnegie Unit, and in the numerous articulation agreements that the College maintains with the UC and CSU systems, private, and out-of-state colleges and universities. These standards and criteria apply to all modes of delivery, including both face-to-face and online classes.

II.A.10. The institution makes available to its students clearly stated transfer-of-credit policies in order to facilitate the mobility of students without penalty. In accepting transfer credits to fulfill degree requirements, the institution certifies that the expected learning outcomes for transferred courses are comparable to the learning outcomes of its own courses. Where patterns of student enrollment between institutions are identified, the institution develops articulation agreements as appropriate to its mission. (ER 10)

EVIDENCE OF MEETING THE STANDARD

Articulation agreements for the transfer of the College's courses to the UC and CSU systems, as well as some private and out-of-state colleges, are updated and reviewed annually (ASSIST.org) (II.A.10-01). In addition, the College has articulation policies in place to ensure that students are given credit for classes taken at other institutions. These policies are developed and reviewed annually by the College's articulation officer (AO), the Curriculum Committee, the General Education (GE) Committee, the Academic Senate, and the Curriculum Office. Students have access to these policies through a variety of mediums, including the College's website and through face-to-face contact with counselors and support staff (II.A.10-02). A detailed outline of the various transfer policies, including articulation and transfer patterns, can be found in the College Catalog (II.A.10-03) (ER 10-04). Policies are also made available to students through MAP, the Student Handbook (II.A.10-04) (ER 10-05), counseling classes (II.A.10-05), and the Transfer Center (II.A.10-06). All of these mediums provide students with the information they need to create an academic plan. This information includes transfer policies and planning tools, GE patterns (II.A.10-07; II.A.10-08; II.A.10-09), articulation agreements (II.A.10-10), the Associates Degree for Transfer (ADT) (II.A.10-11, II.A.10-12), the Teacher Preparation Program (II.A.10-13), and the Honors Program (II.A.10-14). In addition, these mediums inform students of the Transfer Admission Guarantee (TAG) program, which provides guaranteed admission to six UC campuses for those California community college students who meet specific requirements (II.A.10-15).

The College may grant credit for college units earned at regionally accredited institutions of higher education. The Articulation System Stimulating Interinstitutional Student Transfer (ASSIST), the online statewide database of articulation, and the College Catalog provide means of determining the comparability of course taken at other California public colleges and universities. Generally, the Counseling Department determines equivalency of courses (II.A.10-16); specifically, the College's articulation officer, in consultation with the appropriate discipline faculty expert, determines any questionable course credit application. The College registrar ensures that the transcript is official and that the institution is regionally accredited.

When determining whether courses from other institutions are comparable to those offered by the College, the AO takes into consideration course objectives, student learning outcomes, and content area. When it is not readily apparent whether a course from another institution is comparable, the student is asked to obtain an official course outline. If the counselor and/or the AO cannot make a determination on comparability, the course outline is submitted to the chair of the discipline of the appropriate dean. The faculty or the dean makes the final determination on course comparability.

Although in many programs over 50 percent of the courses can be taken online, the College does not offer online degrees. As a result, the evaluation of articulation agreements for online courses,

as well as development and implementation of said courses, is handled in the same manner as the College's face-to-face courses. It should be noted that full reciprocity exists for courses completed at Irvine Valley College when there is a comparable course at Saddleback College.

ANALYSIS AND EVALUATION

To determine the College's articulation compliance for each institution, the College regularly reviews the articulation policies of the University of California (UC) and California State University (CSU) systems, as well as private and out-of-state colleges and universities. Often, private universities in California and out-of-state colleges present special articulation questions. In these cases, the Counseling Department and the Articulation Office coordinate inquiries and, as needed, will request information and clarification from division and departmental discipline experts.

Students can access Saddleback College's articulation agreements with the UC and CSU systems. For information regarding institutions with which the College has no articulation agreement, students can consult the ASSIST database. The Saddleback College homepage and the Transfer Center website both provide links to the ASSIST website. The College also provides direct counseling to students on these policies and agreements in the Transfer Center and in Counseling Services.

II.A.11. The institution includes in all of its programs, student learning outcomes, appropriate to the program level, in communication competency, information competency, quantitative competency, analytic inquiry skills, ethical reasoning, the ability to engage diverse perspectives, and other program-specific learning outcomes.

EVIDENCE OF MEETING THE STANDARD

As described in II.A.3, the College recognizes three levels of learning outcomes: course SLOs, PSLOs, and ISLOs (II.A.11-01). The ISLOs primarily reflect the College's general education requirements, or core competencies, and include outcomes related to communication competency (ISLO category I), information competency (ISLO category II), analytic inquiry skills (ISLO category II), ethical reasoning (ISLO category III), and the ability to engage diverse perspectives (ISLO category III).

For the sake of clarity, the College's ISLOs are organized into four broad categories. They are as follows:

Preamble:

The College's primary mission is to foster learning and student success. Students should expect to develop knowledge, skills and abilities across four broad areas as a result of their overall experience at Saddleback College. The broad areas are identified by the institutional student learning outcomes listed below:

I. Effective Communication

Students completing a degree or transfer program at Saddleback College will be able to:

- Demonstrate the ability to understand, evaluate, and analyze readings from a variety of texts and to apply that ability in academic, personal, and professional contexts.
- Demonstrate the ability to clearly express themselves and the knowledge they have attained in various forms of writing.
- Demonstrate the ability to orally communicate ideas to others in a clear, coherent, and structured fashion when speaking in one or more of the following modes: interpersonally, in small group settings, or in public presentations.

II. Intellectual and Practical Skills

Students completing a degree or transfer program at Saddleback College will be able to:

- Demonstrate competence in fundamental computing and information technology.
- Demonstrate competence in scientific and quantitative reasoning necessary for informed judgment and decision-making.
- Conduct effective research, including the identification, evaluation, synthesis, and responsible use of sources and information.
- Analyze information and ideas independently and logically in order to arrive at reasoned, meaningful, and creative conclusions.
- Work with others to develop creative, logical, and reasoned solutions to problems.

- Develop cognitive, physical, and affective skills which will afford students the opportunity to be well-rounded individuals.

III. Community/Global Consciousness and Responsibility

Students completing a degree or transfer program at Saddleback College will be able to:

- Demonstrate knowledge of cultural diversity and awareness of multiple perspectives in the U.S. and globally.
- Demonstrate the ability to effectively communicate and interact with others in academic, personal, and professional contexts.
- Demonstrate awareness of the necessity for social responsibility and accountability of citizenship in a democratic society.
- Demonstrate an awareness of the necessity for ethical conduct in academic, personal, and professional contexts.

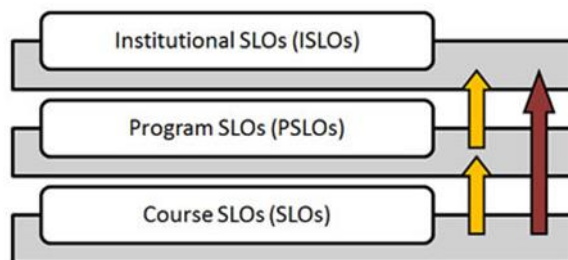

IV. Breadth of Subject Area Knowledge

Students completing a degree or transfer program at Saddleback College will be able to:

- Describe the scope, key principles, and defining framework of the discipline of study within the natural sciences and mathematics, including an understanding of the methods of scientific inquiry.
- Describe the scope, key principles, and defining framework of the discipline of study within the arts and humanities in order to understand the rich history of human knowledge, discourse, and achievements.
- Describe the scope, key concepts, and defining framework of the discipline of study within the social and behavioral sciences in order to understand the complexities of social interactions and human experiences.

The ISLOs are published in the College Catalog (II.A.11-02) and are available on the College's website.

All course-level SLOs are linked to PSLOs and to one or more of the ISLOs, so students understand what to expect to attain as the result of completing a degree program at the College, and the College can determine if the expectations for PSLO and ISLO attainment are being met.

The College currently approaches PSLO and ISLO assessment in three ways. The first method is through the mapping of SLOs to PSLOs and ISLOs, so that the results of course SLO assessment

for the various courses that meet each PSLO and ISLO can be compared and analyzed. This analysis is done as part of the program review process (II.A.11-03; II.A.11-04). The second method is through ePortfolios, where students report on accomplishments both in and out of the classroom related to the ISLOs (II.A.11-05; II.A.11-06; II.A.11-07). The third method is through the CLA+ pilot (II.A.11-08), which may provide an external validation that students have attained the College's ISLOs. Pilots on ePortfolios and CLA+ were completed at the end of spring 2016 and plans for their institutionalization are currently underway for the 2016-2017 academic year.

While the ability to make connections between SLOs and ISLOs is readily done, assessment of ISLOs has proven more challenging; for this reason, the College has focused actively on improving and clarifying the assessment tools (II.A.11-09). Even as the assessment process is being refined, as SLOs (and subsequently PSLOs and ISLOs) drive the curriculum, evidence that students are achieving the intended outcomes listed in the College's ISLOs is tied to student completion rates. This evidence is further reinforced by program completion data—with the exception of CTE, which offers a more nuanced look at the definition of a program's success. Often, the CTE programs have more exit points than the GE or degree-specific programs. A CTE student who is already working in his or her field may take a single class as a refresher or in order to remain current in their field. This student will not complete an entire program because he or she has already attained the intended academic goal of finding employment within a particular field. For example, certain programs, like Real Estate and Automotive Technology, do not have to be completed in order for the student to be successful within the industry. On the other hand, programs like Nursing must be completed in order for the student to pursue a job within that field.

Moreover, some of the ISLOs are not just attained within classes but through extracurricular activities as well. For example, to promote student understanding and appreciation of diverse perspectives, there are numerous ASG clubs on campus and special cultural events, which highlight the diverse backgrounds and interests of the student population (II.A.11-10). The various student clubs include the ACLAMO Club, which assists Chicanos and Latinos in removing educational barriers; the Anime Club, which promotes interest in Japanese anime; the Astronomy and Physics Club, which is geared toward the sciences; the Baha'i Club, which is tied to the Ba'hai faith; and the Pride Alliance Club, which promotes love and acceptance of all people regardless of gender or sexual orientation. This is but a sampling of the many clubs across campus. Beyond student life, faculty also contribute to diverse perspectives through the invitation of speakers and organization of cultural events, like the celebration for El Día de los Muertos. Weekly screenings of TED Talks provide additional diverse perspectives and ideas (II.A.11-11).

ANALYSIS AND EVALUATION

The College's ISLOs include outcomes related to communication competency, information competency, quantitative competency, analytic inquiry skills, ethical reasoning, and the ability to engage diverse perspectives. The College sees all of these as essential skills for students who complete an associate degree or who transfer. Tremendous effort has been made to find meaningful ways in which student learning in and out of the classroom aligns with the College's

ISLOs. Through a variety of methods, the College has illustrated how these outcomes can be assessed and incorporated into a diverse array of programs and activities across the campus.

II.A.12. The institution requires of all of its degree programs a component of general education based on a carefully considered philosophy for both associate and baccalaureate degrees that is clearly stated in its catalog. The institution, relying on faculty expertise, determines the appropriateness of each course for inclusion in the general education curriculum, based upon student learning outcomes and competencies appropriate to the degree level. The learning outcomes include a student's preparation for and acceptance of responsible participation in civil society, skills for lifelong learning and application of learning and a broad comprehension of the development of knowledge, practice, and interpretive approaches in the arts and humanities, the sciences, mathematics, and social sciences. (ER 12)

EVIDENCE OF MEETING THE STANDARD

In accordance with Board Policy 5600 (II.A.12-01), all associate degree programs at Saddleback College require the completion of a minimum of 18 semester units of general education (GE), which includes the natural sciences, social and behavioral sciences, humanities, language and rationality, and mathematics. Students at the College can elect to follow one of three general education patterns: IGETC (II.A.12-02), CSU GE (II.A.12-03), or the College's general education requirements, as described in II.A.1 above (II.A.12-04). The College Catalog contains descriptions of the general education patterns (II.A.12-05; II.A.12-06). Descriptions of individual courses within the general education patterns can also be found in the catalog (II.A.12-07) (ER 12-04). The philosophy that general education is not an isolated endeavor drives general education requirements. In fact, the College Catalog states, "The general education experience allows the associate degree graduate to analyze, understand, appreciate, and modify the global society in which we live. Combined with an in-depth study in a selected field of knowledge, general education will contribute to and support the pursuit of lifelong learning" (II.A.12-08). This general education philosophy is reflected in the broad range of general education courses required for the degree and in the expected institutional student learning outcomes (ISLOs) (II.A.12-09).

At the time of course development or review, faculty in any discipline can propose that the course be considered for general education. The General Education Committee, composed of faculty members from each of the divisions and chaired by the curriculum chair, also a faculty member, is responsible for determining if a course meets the criteria for general education (II.A.12-10; II.A.12-11; II.A.12-12; II.A.12-13) (ER 12-05). While at one time, the GE Committee had a handbook of criteria by which they could determine which courses to include within the GE program, there has not been a handbook used recently. As a result, the GE Committee investigated a way to create clearer guidelines for including courses within the GE program. These guidelines were finalized in fall 2016 (II.A.12-14) (ER 12-06). In addition, the committee is working on integrating the assessment of SLOs as a component to determining course approval to the GE program. This process will begin with the next Curriculum review cycle, which starts in March of 2017.

In conjunction with the GE Committee, the articulation officer (AO), a faculty member, also plays a role in determining GE coursework. The AO supports faculty in their curriculum development to ensure that coursework meets general education requirements. While faculty have the freedom to create their curriculum, the AO will verify that a course meets the criteria

established by transfer institutions before forwarding it to the GE Committee for approval. Once approved by the GE Committee, courses must then be approved by the Academic Senate and the Board of Trustees before being sent to the CSU Chancellor's Office and UC Office of the President for final approval (II.A.12-15).

The scope of the College's ISLOs, as shown in II.A.11 above, offers evidence that the program of general education includes student learning outcomes related to preparation for, and acceptance of, responsible participation in civil society, skills for lifelong learning and application of learning, and a broad comprehension of the development of knowledge, practice, and interpretive approaches in the arts and humanities, the sciences, mathematics, and social sciences (II.A.12-16; II.A.12-17). (ER 12-07; ER 12-08) The Educational Planning and Assessment Committee (EPA) develops ISLOs in alignment with Lumina Foundation's Degree Qualifications Profile (DQP), and the Academic Senate approves ISLOs (II.A.12-18; II.A.12-19).

The College offers GE courses in a variety of modalities, including both face-to-face and online courses. Faculty drive the decision of which modalities in which to offer GE courses in consideration of the particulars of the discipline. If a course is to be offered online, there is a separate approval process developed by the Curriculum Committee in order to ensure that students develop the listed skills (II.A.12-20). The same SLOs apply to all courses regardless of their delivery mode.

The Curriculum Committee bylaws, which specify that the General Education Committee will be comprised of faculty from a variety of disciplines and backgrounds, provide evidence that content and methodology of GE courses is determined by appropriate discipline faculty: "Membership is limited to one faculty member per division, elected by the division and approved by the Academic Senate." In addition, the curriculum-approval process maintains the quality and academic rigor of GE courses regardless of modality.

ANALYSIS AND EVALUATION

All associate degree programs at the College require the completion of GE courses. The GE philosophy is developed locally by the GE Committee and is published in the College Catalog. Courses are eligible for inclusion in one of the three GE patterns based on review by local faculty through the GE Committee and by faculty at transfer institutions through the articulation process. All of the College's GE courses map to one or more of the ISLOs, and through regular outcomes assessment the institution determines the effectiveness of its programs.

II.A.13. All degree programs include a focused study in at least one area of inquiry or in an established interdisciplinary core. The identification of specialized courses in an area of inquiry or interdisciplinary core is based upon student learning outcomes and competencies, and include mastery, at the appropriate degree level, of key theories and practices within the field of study.

EVIDENCE OF MEETING THE STANDARD

In addition to the general education requirements, Board Policy 5600 stipulates that all associate degree programs at the College must require the completion of a minimum of 18 units in a major or area of emphasis for a total minimum of 60 units (II.A.13-01). The core area of inquiry is outlined in the program student learning outcomes (PSLOs), which are established by all programs and are published in the College Catalog (II.A.13-02; II.A.13-03). Discipline experts within each department develop the PSLOs. These PSLOs, as well as the related course objectives and SLOs, demonstrate the level of mastery of key concepts, theories, and practices that students will attain by completing a degree within that discipline (II.A.13-04).

Verification that students have achieved mastery of key theories and practices within the field of study is done primarily through the successful completion of all required courses. Courses required within a program are devised so that each of the PSLOs is achieved upon completion of a degree or certificate. Faculty within a program regularly evaluate the success of their programs through the annual assessment of course SLOs (II.A.13-05) and through various methods of direct PSLO assessment, including discipline-specific exams, signature assignments, and ePortfolios (II.A.13-06), which are designed to highlight student achievement as it relates to that student's educational goals. Furthermore, in the Program Review faculty are asked to discuss how SLO assessment leads to overall PSLO attainment (II.A.13-07; II.A.13-08; II.A.13-09).

ANALYSIS AND EVALUATION

All degree programs at the College focus on one or more disciplines or areas of study. Curriculum is developed with objectives and SLOs that demonstrate the key concepts, theories, and practices that a student should master in a course. The outcomes of courses are then mapped to the PSLOs that students within a particular field of study should master. The tie between curriculum development, SLOs, and PSLOs illustrates that SLOs accurately reflect higher thinking appropriate to the course level, and include mastery of key theories and practices within the field of study. All of the courses within transferable degree programs are articulated with the UC and/or CSU system(s) so that the objectives and SLOs are in alignment with the norms of the discipline.

DRAFT

II.A.14. Graduates completing career-technical certificates and degrees demonstrate technical and professional competencies that meet employment standards and other applicable standards and preparation for external licensure and certification.

EVIDENCE OF MEETING THE STANDARD

Saddleback College has one of the most diverse offerings of Career Technical Education (CTE) programs in the region. In the 2015-2016 academic year, the College offered 100 awards in 45 departments (II.A.14-01; II.A.14-02). Information regarding degrees and certificates is made available to students in the College Catalog, on the College website, and through a variety of marketing measures (II.A.14-03; II.A.14-04).

The ability to prepare students for external licensure, certification, and employment standards is embedded in the curriculum approval process, SLO assessment, and program review (II.A.14-05). As discussed in II.A.1 above, all CTE programs must go through local, regional, and state approval. The regional approval is done through the Los Angeles Orange County Regional Consortium, which scrutinizes each new or substantially revised program to ensure that there are demonstrated employment opportunities, that the program meets the needs of local business and industry, that the program is not in competition with other programs in the region, and that the program's courses adhere to employment and/or licensure standards (II.A.14-06).

To stay in alignment with the ever-changing employment opportunities in the area, programs are constantly being proposed and revised. As part of the program review process that takes place every two years, labor market data is monitored and analyzed to see if programs are still relevant (II.A.14-07; II.A.14-08). In addition, all CTE programs engage in outreach to the community to ensure that the programs meet employment needs. This outreach includes facilitation of advisory committees, participation in regional economic workforce and development, and engagement with regional business organizations, such as the CTE consortium. An important Title 5 requirement is the ongoing engagement of CTE programs with their advisory committees. These committees, which are composed of local employers, community members, faculty, staff, and students, provide valuable input related to program content and relevance to industry standards and/or needs by making recommendations tied to curriculum, equipment, and program outcomes (II.A.14-09; II.A.14-10). To align educational programs with industry standards, faculty utilize this committee input in terms of labor market information and other internal student success data. While each advisory group meets at least once a year, most choose to meet more often. The College also ensures and verifies the currency and relevancy of its programs through a regular review of all CTE courses during the technical review process every two years (II.A.14-11).

Many CTE programs that require licensure include curriculum in their program that helps students prepare for the licensure exam. For example, the curriculum in the Nursing Program helps prepare students for the National Council Licensing Exam (NCLEX). Cosmetology is a 1600-hour program, which meets the required hours for students to qualify for their state licensure. The Alcohol and Drug Studies Certificate program meets the accreditation requirements of the California Association for Alcohol and Drug Educators (CAADE), and upon completion of the Certificate program, students are eligible to sit for the state-required certification exam (II.A.14-12; II.A.14-13; II.A.14-14).

SLOs for CTE courses are designed and implemented to meet employment standards. Course exams and pass rates evaluate competency levels and measurable SLOs. As SLOs and exams are monitored and evaluated by faculty, faculty determine whether students have mastered the course content.

ANALYSIS AND EVALUATION

All of the CTE programs at Saddleback College are developed and revised in alignment with industry standards so that students are well prepared for employment and/or certification and licensure by external agencies. This is evidenced in particular by the exam pass rates and employment rates of students who complete these programs (II.A.14-15). Through advisory committees, SLO assessment, technical review of curriculum, and program review, programs engage in continuous evaluation to ensure that they continue to meet local business and industry needs.

II.A.15. When programs are eliminated or program requirements are significantly changed, the institution makes appropriate arrangements so that enrolled students may complete their education in a timely manner with a minimum of disruption.

EVIDENCE OF MEETING THE STANDARD

In accordance with Title 5, Section 51022, and Education Code, Section 78016, the College has a process for evaluating the viability of a program called the Program Vitality Inquiry Policy and Process (II.A.15-01). Any faculty member or administrator can initiate this process, and the possible outcomes of the process include program continuance, program revitalization, or program discontinuance. Although few programs have been slated for elimination, there are provisions in place to allow students currently enrolled in those programs to complete their course of study. The policy states that once a program has been slated for discontinuance, “a plan and timeline for phasing out the program will be completed. The plan shall include procedures to allow currently enrolled students to complete their programs of study in accordance with the rights of students as stipulated in the college catalog.” These rights are known as “catalog rights” (II.A.15-02).

As described in the College Catalog, students may establish catalog rights based on the catalog that was in effect when they first began taking classes at Saddleback College so long as they have maintained continuous enrollment or were on a documented military, medical, or educational leave. These rights protect students from being held accountable for additional requirements that may be added to a later catalog. These rights also allow students to complete programs that may have been eliminated during the time of their enrollment at the College. Beginning in fall 2009, the number of years allowed for students to complete a certificate or degree program while maintaining catalog rights is six years. Students who were enrolled prior to fall 2009 are granted catalog rights for longer than six years as long as they have maintained continuous enrollment during the entire period.

Catalog rights apply only to the College's graduation and program requirements. If other institutions change their requirements for entrance, graduation, or satisfaction of general education patterns, it may be necessary for the student to meet the new requirements upon transfer even if continuous enrollment was maintained. Catalog rights must be requested by students on their Petition to Graduate (II.A.15-03; II.A.15-04).

ANALYSIS AND EVALUATION

The College has procedures and policies in place to ensure that students have the opportunity to complete their education in a timely manner following the elimination of a program. Within recent years, no programs have been discontinued (II.A.15-05; II.A.15-06; II.A.15-07; II.A.15-08; II.A.15-09).

DRAFT

II.A.16. The institution regularly evaluates and improves the quality and currency of all instructional programs offered in the name of the institution, including collegiate, pre-collegiate, career-technical, and continuing and community education courses and programs regardless of delivery mode or location. The institution systematically strives to improve programs and courses to enhance learning outcomes and achievement of students.

EVIDENCE OF MEETING THE STANDARD

Through systematic outcomes assessment, program review, and curricular review, the College regularly evaluates and improves the quality and currency of all instructional programs, including collegiate, pre-collegiate, career technical, and continuing education, regardless of delivery mode or location. SLO assessment, described in I.B.2 and II.A.3 above, is conducted annually in all credit and noncredit courses to ensure that course objectives are being met (II.A.16-01). The results of these assessments are evaluated and discussed within programs. Program review, which is conducted by all programs every two years, as described in I.B.5 above, assesses the overall effectiveness, relevance, appropriateness, currency, and predicted future needs of all instructional offerings at the College (II.A.16-02). This review includes a comprehensive analysis of SLO assessment data, student success indicators and other measures of effectiveness, and results in actionable objectives for the improvement of programs (II.A.16-03; II.A.16-04; II.A.16-05). To ensure that official course outlines retain their relevancy and articulation with transfer institutions, formal curricular review, as described in II.A.1 above, of all college courses is required at least once every five years (II.A.16-06); however, curricular changes of courses and programs often occur prior to their scheduled review based on the results of program review. This applies to collegiate, pre-collegiate, and Emeritus Institute courses, all of which are approved and evaluated through the same curricular process. Although there are now some certificate programs that can be completed entirely online (such as the HIT certificate and various child development certificates), most programs include a variety of delivery modes and evaluate the effectiveness of each through program review, during which student success indicators are analyzed with respect to the modality in which they are taught (II.A.16-07).

Evidence that the criteria in the College's program review process evaluates relevancy, appropriateness, achievement of student learning outcomes, currency, and planning for the future can be found on page 3 of the Program Review Handbook (II.A.16-08). This page outlines the objectives of program review as follows:

1. The statement of program objectives and alignment of future objectives with the College's mission and vision
2. The collection and analysis of data on key performance indicators, SLOs, program activities, and accomplishments
3. The documentation and discussion of the effectiveness of programs
4. The development of recommendations and strategies concerning future program directions and future needs (e.g., budget, staffing, and resources)
5. The opportunity for programs to assess their relevance and position within the division, the college, and with all other stakeholders.

These objectives enable faculty to reflect on the many ways in which their program and its curriculum tie to the College's mission and goals. The results of program review are also tied directly to institutional planning and the allocation of resources. As part of the program review process, objectives and action steps for a two-year period are input into TracDAT, are linked to annual resource allocation requests, and are included in decision-making processes (II.A.16-09; II.A.16-10; II.A.16-11). In subsequent reviews, programs reflect on the achievement of their objectives and make recommendations for continued improvement through the creation of new or refined objectives.

All educational programs go through the program review process with the exception of Community Education (CE). Classes offered through our CE program are not state approved and, therefore, do not go through the same curricular review process; following review by the Academic Senate, CE classes are approved locally by the Board of Trustees. CE classes are evaluated regularly by the division dean for quality and relevance. Evaluations of CE course offerings are generally done through student surveys and the analysis of class participation rates. The feedback from these surveys is used by the presenter to improve his or her class. Success and viability of a class is often determined by the number of participants. Classes may be canceled due to low enrollment; if this happens three times, a program is deemed not to meet the needs of the community and is no longer offered. For example, the College has been able to survey large groups of participants in the College For Kids and Junior Gaucho Swim programs (II.A.16-12; II.A.16-13). The last survey took place in August 2016. It was carried out through Constant Contact, the programs' online marketing and communication service, and sent to the parent/guardian of every College For Kids and Junior Gaucho Swim participant that summer. The survey was comprised of 10 questions, included opportunities for feedback, and solicited suggestions for future program options.

ANALYSIS AND EVALUATION

The College strives to continually and systematically improve its courses and programs to enhance student learning outcomes and improve student success. All courses are evaluated regularly through annual SLO assessment and the five-year curricular review process. Programs are evaluated through a comprehensive process of program review undertaken every two years. Moving from a five-year to a two-year program review cycle in 2011 as well as the creation of program-specific objectives that link to the College's strategic planning efforts has had an incredibly positive impact on closing the loop between program assessment, program dialogue and reflection, and the projection of future program needs. In combination, the College's systematic review processes are used to assess course and program relevance, appropriateness, currency, effectiveness, to identify future needs, and to ensure that the success of students is at the forefront of all planning and decision-making. The review processes determine the needs for curriculum, services, staffing, facilities and equipment, and are linked to budgeting and resource allocation.

In 2015, the College created a new administrative position: assistant vice president of institutional effectiveness. The primary purpose for this position was to refocus and refine the workload handled by existing vice presidents and to address the areas where the College wished to improve (II.A.16-14). The interim assistant vice president was hired in fall 2016 and began her

role immediately. In the creation of this position, the College illustrated that it recognized the need to create an administrative position to oversee several areas that are tied specifically to curriculum, research, online education, student success, and the various components of institutional effectiveness.

The College's systematic review of its curriculum and instructional programs, as well as the review of all student support and administrative units on campus, is serving students well, and improvements have been made across the campus as a result of these ongoing processes.

II.B.1: The institution supports student learning and achievement by providing library, and other learning support services to students and to personnel responsible for student learning and support. These services are sufficient in quantity, currency, depth, and variety to support educational programs, regardless of location or means of delivery, including distance education and correspondence education. Learning support services include, but are not limited to, library collections, tutoring, learning centers, computer laboratories, learning technology, and ongoing instruction for users of library and other learning support services. (ER 17)

EVIDENCE OF MEETING THE STANDARD

Saddleback College supports student learning and achievement by providing extensive learning support services for students, many of which are housed in the recently renovated state-of-the-art Library and Learning Resource Center (LRC). The LRC includes the Library and Computer Lab on the third floor; the Academic Reading Center, Computer Labs, the Language Lab, The LRC Tutoring Center, and the Writing Center on the second floor; and the Television Studio and classrooms on the first floor.

Library

The mission of the Saddleback College Library is as follows:

“The College Library supports the success of our diverse student population by teaching information competency skills and offering guidance and encouragement to students as they pursue the achievement of student learning outcomes. The Library provides all users with access to a learning environment and information resources designed to support the achievement of their academic and personal goals.” (II.B.1-01)

To fulfill this mission, the Library provides all users with a safe and welcoming environment conducive to learning and collaboration. Librarians actively participate on College and District committees, such as Academic Senate, Curriculum, EPA, Online Education, and Student Success, where student support needs are identified and discussed. In support of the college mission, the Library offers a diverse collection of information resources and services while facilitating access to them by providing multiple access points that support the needs of both traditional and online students. Librarians teach students, faculty, staff, and administrators how to find, evaluate, and use information ethically in their respective academic, professional, and personal lives.

The Library is part of the Online Education and Learning Resources Division (OE & LR). The library faculty and staff work under the supervision of the Dean of Online Education and Learning Resources. In order to serve students, the Library currently has six full-time faculty librarians, three part-time faculty librarians, five full-time staff members, and one part-time staff member. During fall and spring semesters, the Library is open Monday through Thursday, 8:00 a.m. to 8:00 p.m. and Fridays, 8:00 a.m. to 2:00 p.m. for a total of 54 hours per week. Saturday hours vary semester to semester depending on funding. All students, including those enrolled in online courses, have equal access to library resources. Students who visit the library virtually are supported through digital resources such as the research databases, instructional websites, demonstrational online videos, information literacy workshops, Ask a Librarian, and telephone/chat reference services (II.B.1-02) (ER 17-01).

In addition to the library collection discussed below, the Library provides open study space for students with large tables and chairs plus individual reading areas. Students can also reserve any of the seven group study rooms, providing them with an area for collaborative work. These study rooms are equipped with tables, chairs, and whiteboard walls that students can write on with erasable markers. In addition to offering a variety of places for study, the Library has become, since its reopening, a popular space for students, staff, and faculty to gather (II.B.1-03).

Library Collections and Services

Book and eBooks

The Library's collection is sufficient in quantity, currency, depth, and variety to support the College's educational programs, regardless of means of delivery. Librarians stay abreast of collection needs in various ways such as through reading program reviews and by reviewing new course proposals or revisions as they come through the curriculum process.

The collection includes 118,752 print books and e-books, other media including DVDs and CDs, and print/online periodicals. In addition, students can easily request materials outside of the library's collection via Inter-Library Loan, which enhances access to library materials not available at the Saddleback or Irvine Valley College libraries (II.B.1-04) (ER 17-02).

Audiovisual Materials

The Library continues to acquire audiovisual materials, informed primarily by faculty requests. Per ADA Sec. 508, all audiovisual materials acquired by the library must be closed captioned titles. The Library has discarded most VHS videos and purchased replacement DVDs whenever possible. In fall 2015, the library received a budget augmentation to add Films on Demand, which maintains a database of over 22,000 streaming videos that are closed captioned and available to students, faculty, and staff both on and off-campus (II.B.1-05).

Database Collection and Database Usage

Regardless of location, students, faculty and staff can access the library's online database collection at any time; authentication is provided by EZproxy. The library has increased its online collection from 16 databases in 2010 to 118 in 2015-16. The library budget for information resources (print and online) has remained stable. The online databases are funded mostly from the library's book/magazine/periodical annual budget of approximately \$133,000. In addition, the EBSCO Academic Search Premier suite is paid for by the Community College League (II.B.1-06; II.B.1-07) (ER 17-03).

The Library collects usage statistics for all the databases. Annually, this data is used to make renewal decisions. For the 2015-16 academic year there were a total of 381,095 searches conducted in all Library databases. There was a total of 158,078 searches conducted in the state-wide Academic Search Premier suite (II.B.1-08) (ER 17-04).

Reference Services

The reference librarian on duty provides reference assistance via chat, email, phone, and in-person during all open hours the library is open. Students can request an individual, one-on-one consultation for in-depth research assistance with a librarian by submitting the request form prominently displayed on the library website. The librarians promote this consultation service in the library credit classes, the workshops, and all bibliographic instruction sessions.

Library Website

The library website provides information regarding all services, access to information resources, research tools, chat reference service, EasyBib (citation management software), online study room reservations, online library workshop registration, and much more. Through the chat reference service, Saddleback librarians serve students and the community without having to be on campus. This is a particularly valuable service for students taking online courses.

Through Google Analytics, the Library collects data about the number of Library webpage views. Between August 17, 2015 and May 23, 2016, the library webpage was visited 238,310 times, 341 chat reference questions were answered, 1,913 study room bookings, and during this same time 255 students signed up for at least one of the library workshop using WC Online, an online scheduling software piloted in 2015-16 (II.B.1-09) (ER 17-05).

Periodical Collection

For several years, the librarians have gradually reduced the print periodical collection in favor of full-text, online format. Consistent with national academic library trends, the print periodical collection has diminished in size and demand as access to full-text electronic resources has increased rapidly. In the 2010 self-study, the Library had 130 print periodical subscriptions while today it has only 42. The librarians conduct an annual review of print periodical collection usage to make decisions about print subscriptions and renewals (II.B.1-10) (ER 17-06).

WorldShare (Library Catalog)

The library has a Discovery service through the WorldShare Integrated Library System (WMS). Students can locate books, DVDs, and articles from a single search platform by using the Library WMS meta-search platform (including the library catalog) that uses its Knowledge Base to provide links to relevant materials in several of the library databases. Although WMS is a significant upgrade from the past Integrated Library System, Discovery services continue to have some limitations. As a result, librarians encourage students to search individual databases directly as those search results will return more relevant articles for student research assignments (II.B.1-11).

Reserve Collection

The library maintains a reserve collection of over 950 textbooks and other course materials all searchable through WMS (II.B.1-12) (ER 17-07). The library makes every effort to provide as many textbooks as possible though emphasis remains on the most heavily used textbooks. For several years, the library has partnered with the college bookstore, which provides a \$10,000 annual grant to purchase textbooks (II.B.1-13). Additionally, the library encourages departments and individual instructors to place desk-copies of textbooks in the Reserve collection for student use. The Library's reserve collection is by far the most heavily utilized portion of the Library collection accounting for 79% of overall circulation in 2015-2016 (II.B.1-14).

Library Access for Online Students

All students, including those enrolled in online courses, have equal access to library resources. Students who visit the library virtually are supported through digital resources such as the research databases, instructional websites, demonstrational online videos, information literacy workshops, Ask a Librarian, and telephone/chat reference services. Both of the library's credit courses, Library 100 and Library 2, are taught exclusively online. In addition, the library has

added online versions of some information competency workshops. Both versions highlight the Library's responsiveness to student needs by making instruction available 24/7. These courses and workshops are discussed in detail in II.B.3 below (II.B.1-15; II.B.1-16).

LRC Tutoring Center Services

The LRC Tutoring Center shares the Learning Resources Center (LRC) building with the library, and is open 8:00 a.m. to 8:00 p.m. Monday through Thursday, 8:00 a.m. to 2:00 p.m. on Friday, and 10:00 a.m. to 3:00 p.m. on Saturdays during fall and spring for a total of 54 hours. During the summer, the Tutoring Center is open 9:00 a.m. to 7:00 p.m. Monday through Thursday and 9:00 a.m. to 2:00 p.m. on Friday, for a total of 45 hours. Current staffing includes the Director of Learning Assistance, who reports to the Dean of OE & LR, 106 tutors, and 3 part-time and 1 full time staff. Faculty are also present in the Center for every hour that the LRC Tutoring Center is open to oversee the tutors, provide tutor training, and assist students. Currently, 16 part-time faculty support tutoring and their expanding services (II.B.1-17; II.B.1-18; II.B.1-19; II.B.1-20; II.B.1-21; II.B.1-22).

All tutoring services are free to students at the College. To take advantage of the tutoring services available, students enroll in Fundamentals of Tutoring (TU 300). TU 300 is a non-credit course that is free for all currently enrolled students and can be added at any time during the semester. The center provides students with help in English, ESL, humanities, foreign languages, science and math, as well as many other subjects. Students can schedule thirty-minute appointments to work with a tutor in any of these areas. One-hour appointments are available for students enrolled in a foreign language class, DSPS students, veterans, or at the discretion of the tutor. Appointments can be made at the front counter or online. Drop-in tutoring, no appointment needed, is available for all areas of math and most sciences (II.B.1-23; II.B.1-24; II.B.1-25).

The LRC Tutoring Center has expanded support for DSPS students, and ensures that counselor-referred students will get appointments that are an hour in length for any discipline. A DSPS counselor also spends 8 hours a week in the center to assist both students and the tutors. LRC tutoring is also offered in the Veterans Education and Transitions Services (VETS) Center Monday through Thursday from 12:00 p.m. to 3:00 p.m. These tutors are specifically trained for working with our veteran student population through the VET NET Ally Awareness program (II.B.1.26).

Online Tutoring

Starting in fall 2014, tutoring options expanded to include online as well as onsite tutoring. Link-Systems International Whiteboard online tutoring software, which supports one-on-one tutoring online. Currently, online tutoring is available for students taking English and math courses at the College. Beginning in spring 2015, the center began to provide online assistance to students in English courses through the Paper Center. Through this service, students can upload their papers and receive feedback from a tutor within 24 to 48 hours. The Paper Center receives approximately 250 submissions on average per semester and thus service is expanding to support students who need assistance with their essay and writing related assignments in other disciplines. The Tutoring Center also serves as a pilot college for the tutoring platform of the Online Education Initiative (OEI) the Center is collaborating with Irvine Valley College to obtain a more effective online tutoring platform for the District (II.B.1.27).

Embedded Tutors and Supplemental Instruction

The center also provides embedded tutors for a variety of courses including English, science, math, and ESL classes. Embedded tutors promote collaborative learning among faculty, peer tutors, and students in an effort to improve student success rates. Additionally, students in math classes can receive tutoring through the BSI Math Tutoring Center located in LRC 208. Deanna Valdez, a full time math professor, with support from the Director of Learning Assistance, currently coordinates the hiring, training, and evaluations of BSI math tutors.

In spring 2015, the College implemented the Refresh Program. With coordination from LRC tutoring, matriculation, and the math and English departments, students who have matriculated into basic skills math courses (MATH 251, 351) and basic skills English and reading courses (ENG 340, 300 and 200) are provided the opportunity to attend a multi-day workshop. These workshops refresh students' skills, build their confidence, and expose them to test taking best practices. On the final day of the workshop, students who successfully meet the requirements of the workshop are offered the opportunity to re-matriculate. The success of this program is evidenced by the fact that students who retested, 56% placed into a higher-level English course, 58% placed into a higher-level reading course, and 48% placed into a higher-level math course. Further analysis of the success rates of these students in their coursework is needed (II.B.1.28).

Program Assisting Student-Athlete Success (PASS)

LRC Tutoring also works collaboratively with the athletic department to support athletes through the PASS program. The PASS program provides coaches with weekly updates regarding student athlete attendance and usage of tutoring services, requires athletes to complete two grade checks per semester, and supports the overall academic success of student athletes. There are six tutors reserved specifically for players, for appointment and drop-in tutoring. In addition, athletic counselors provide drop in Counseling in the LRC Tutoring Center four days a week to help players reach or maintain their eligibility. In spring 2015, all nine athletic programs had team GPAs of 3.0 or higher for the first time in the school's history due to this program. During the 2015-2016 academic year, sixteen out of nineteen teams obtained team GPAs of 3.0 or above (II.B.1.29).

AVID

Saddleback College also has a partnership with AVID for Higher Education which encourages and supports adoption of the Socratic tutoring. All Saddleback College tutors are required to attend at least four professional development trainings, totaling approximately ten hours of professional development per semester. Six of the ten hours are dedicated to introducing and eventually mastering Socratic tutoring. Socratic tutoring encourages the formation of interactive study groups to create responsible and independent students, and encourages tutors to engage in what is referred to as 80/20 tutoring. During a Socratic tutoring session, the student is required to take an active role in the session by asking questions, solving problems, and modeling behavior 80% of the time while the tutor, through questioning and leading assists the student the remaining 20% of the time. This model ensures that students understand their role in the learning process and are encouraged to take the lead. As a result of implementing the Socratic tutoring process, Saddleback tutors have been featured in AVID training videos which will be shared across the county. Additionally, AVID has chosen Saddleback's Tutoring Center to receive its National Tutoring Center of the Year award, which was presented at AVID's national conference in July 2016 (II.B.1.30; II.B.1.31; II.B.1.32).

Directed Learning Activities (DLA)

Beginning in spring of 2016, the LRC Tutoring Center, in coordination with the English department, started to develop Directed Learning Activities (DLA). DLA is an exercise designed by faculty from a specific department. Students should complete each DLA with the support of a tutor in the Tutoring Center. DLAs assist students in developing essential skills and strategies needed to succeed in their courses. Successful DLAs integrate into the curriculum of the host course. Instructors connect learning information, and skills from the DLA to class discussion, tests, quizzes, projects, and other in-class activities. The DLA takes about an hour to complete and gives students the opportunity for independent study with immediate feedback from tutors. In addition to the English department, a summer work group was created and consists of faculty from the English, math, library, reading, and the Social and Behavioral Sciences Division (SBS). These faculty members will work with their departments over the summer and fall to develop over 60 DLAs that will support and remediate essential skills for students in developmental courses (II.B.1.33).

Computer Labs and Learning Technology

The LRC building has two open computer labs: LRC Computer Lab (second floor) and Library Computer Lab (third floor). Both labs are equipped with a total of 90 thin-client computers along with copy machines and printers. Implementation of scanning capabilities is planned for 2016-17. All campus computer labs and software available to students and faculty are outlined in detail in Standard III.C.01.

The Student Technical Support Desk staff, located on the second and third floors of the LRC, assist students to reset passwords, help students with Blackboard, and answer software and computer-related questions. Help is available in person, by phone, chat and via email. The Student Technical Support Desks are conveniently located next to the computer labs on the second and third floors of the LRC (II.B.1.34).

Academic Reading Center: The Academic Reading Center offers ENG 332 and 333, which are open entry/open exit courses that students may register for and complete anytime throughout the semester. The Center is used in the co-requisite reading programs. Instructors, instructional assistants, and tutors work with students to improve their skills in reading comprehension and vocabulary acquisition, essay and textbook reading, and study skills. The lab has 112 computers available to students (II.B.1.35).

Faculty Center for Student Success (FCSS): FCSS is charged with providing all professional development on campus for faculty. FCSS provides faculty workshops and training that promote excellence in teaching to ensure the highest level of student learning for on-campus, blended, flipped, or completely online classes. The Center also offers Professional Development week activities in fall and spring. The center has 32 computers, and two sound booths for faculty to create and edit instructional videos (II.B.1.36).

Language Lab: The Language Laboratory provides students with instructional resources and activities to support and enhance language learning for students studying Arabic, Chinese, ESL, French, German, Hebrew, Italian, Japanese, Korean, Persian, Portuguese, and Spanish. Students enroll in a lab class that develops, expands, and reinforces multiple second language skills. The language lab has 40 computers available for students (II.B.1.37).

Library Instruction Classroom: The instruction classroom is equipped with 30 laptops, one instructor station, an overhead projector, and a scanner (II.B.1.38).

Writing Center: The Writing Center offers two classes, ENG 301 and ENG 310. Students receive additional support to learn about writing concepts, and practice writing. The Writing Center has 55 computers (II.B.1-39).

In addition, the college has a number of programs that have dedicated computer labs associated with the program such as Automotive Tech Lab, Culinary Arts, Digital Labs, Graphics Labs, and Rapid Prototyping. A complete list is provided in Standard III.C.1.

Ongoing Instruction for Users of the Library and Other Learning Support Services

The Library offers several programs and services for students and faculty, including librarian-led information competency workshops face-to-face and online. Instruction sessions are offered at the request of discipline faculty, and librarians also teach two for-credit classes. (II.B.3)

Support Services for Faculty

The reference desk is staffed by a librarian during regular hours of operation. They provide research assistance to faculty in-person or via email, chat, or telephone. Instructors can schedule a library orientation for their students during class time or in the library's instruction classroom. Also, instructors are encouraged to place textbooks and other course materials on reserve. While most instructors provide their own copies of textbooks for the reserve collection, they can also request to place materials owned by the library on reserve for their courses. The librarians make efforts to offer library-related professional development opportunities for faculty every academic year. Librarians facilitate workshops that market library services to faculty, such as new databases and other electronic resources. (II.B.1.40)

ANALYSIS AND EVALUATION

Saddleback College supports student learning and achievement by providing tutoring, learning support services to students, as well as to personnel responsible for student learning and support. These services are sufficient in quantity, currency, depth, and variety to support the College's educational programs, regardless of location or means of delivery, including online education. Learning support services include, but are not limited to, library collections, tutoring, learning centers, computer laboratories, learning technology, and ongoing instruction for users of the library.

II.B.2: Relying on appropriate expertise of faculty, including librarians, and other learning support services professionals, the institution selects and maintains educational equipment and materials to support student learning and enhance the achievement of the mission.

EVIDENCE OF MEETING THE STANDARD

At Saddleback College, the selection and maintenance of educational equipment and materials to support student learning and enhance the achievement of the College's mission relies on the expertise of librarians, faculty, and learning support services professionals. The College provides formal and informal processes for faculty and learning support services professionals, as well as others within the College community, to offer input regarding the selection of instructional equipment and materials.

The acquisition of materials for the Library is driven by the Library's *Collection Development Policy*, which is periodically updated, most recently in April 2015 (II.B.2-01). Collection development, including the identification, purchasing, processing, and delivery of educational resources, is a primary function of the Library. Library faculty select and maintain traditional, electronic, and web-based learning and information resources. The Library faculty assess the effectiveness of the collection development processes through the biennial administrative unit review (AUR) (II.B.1-03).

Librarians actively solicit recommendations from faculty and learning support service professionals. Library faculty also consider the needs of students and community members when making purchasing decisions. Every semester the Library sends an email message to all faculty requesting their subject expertise and recommendations for Library materials acquisitions (II.B.2-02). In addition, the Library regularly receives requests for new titles through email, telephone, and in person. Librarians also meet with individual faculty members to go over the information covered in their courses, and when gaps in resources are found, the librarians order materials. Moreover, each librarian serves as a liaison to one or more academic divisions and is responsible for maintaining the print and eBook collection in those subject areas (II.B.2-03). To select new materials and review existing collections, librarians use professional selection tools, such as *Library Journal*, *American Libraries*, and *Choice*, along with publishers' catalogs, online resources including GOBI (Global Online Bibliographic Information), and instructor bibliographies, as well as faculty recommendations (II.B.2-04).

The Library assesses student learning needs through an annual student survey delivered via the Library's webpage. The analysis of survey responses further assists the Library faculty in their acquisition of materials and equipment. Data analysis from database and catalog use offers additional insight into student use of the Library. Gift materials from faculty, staff, and the community are also welcome and added when appropriate to support the College's curriculum (II.B.2-05).

Librarians strive to keep the collection current and relevant by staying abreast of newly published titles of interest to the community and by making purchases as the budget allows. The librarians also participate actively on many College committees that inform collection development (II.B.2-06).

One full-time librarian is a member of the Curriculum Committee and helps provide instructors creating new courses with guidance about the integration of information competency. That

librarian also reviews all new and revised courses and programs. If there are any gaps in the Library's collection, the librarian consults with the faculty member proposing the course and additional resources are purchased.

Another full-time librarian serves on the Online Education Committee to both ensure that the Library's online materials meet the needs of students and faculty engaged in online education courses and to improve access to those materials.

The librarians periodically review their collection areas and cull worn, outdated, or superseded materials. They refer to usage statistics from the Library's WorldShare integrated library system. Following the Library's *Collection Development Policy* and *Saddleback Weeding Guidelines*, instructional faculty may be consulted in the identification and removal of outdated materials. (II.B.2-01; II.B.2-07).

In addition, the Library reviews its electronic resources collection each spring. The librarians assess all of the databases to which the Library currently subscribes, the number of times each database was accessed throughout the year, and the cost-effectiveness of each database. Furthermore, the Library evaluates journal databases under consideration for purchase against the options already offered by the current collection (II.B.1-07).

The Tutoring Center and other learning support services areas select additional materials based on the expertise of faculty and staff responsible for the day-to-day operation of those services. Outcomes assessment data are also used to highlight areas of need.

Selection of equipment and software for the Library and learning support areas undergoes a similar process except when the cost is greater than the Library's budget allocation (II.B.2-08). In these instances, the request would be subject to the College's resource allocation process. If the cost for a particular item is considered too large for College funding, alternate funding is sought, such as through the Basic Aid Allocation Process described in I.B.07 and I.B.09 above. For example, in 2012-13 the Irvine Valley College and Saddleback College libraries used the Basic Aid Funds Allocation Process to request the acquisition of a new integrated library management system, WorldShare, which was purchased and implemented in 2014 (II.B.2-09).

The College Technology Services department handles selection and maintenance of technology-related equipment across campus. As outlined in the *Saddleback College Technology Plan 2015-2020*, Technology Services follows College-defined standards for the scheduling of equipment replacement and maintenance (II.B.2-10). However, if the need arises, there is flexibility for purchasing of equipment outside of these guidelines. The College Technology Committee reviews the standards, selection, and maintenance of technology-related equipment. The College uses a districtwide support portal and help desk ticket management system to request software and hardware support. The portal creates an efficient workflow for staff requesting support from College and District technology services (II.B.2-11).

The College relies on staff expertise of Technology Services to provide copying equipment and services used by students, faculty, and staff. Maintenance of this equipment is coordinated by the Technology Services department and arranged through an equipment lease or service contract (II.B.2-12; II.C.3.02) (ER 17-08)

Each of the College's divisions is given a budget to purchase of educational materials and equipment. The College also has competitive equipment and technology processes that allow for the request of items that exceed a division's budget. Discipline experts make these requests through program or administrative unit reviews, and funds are allocated based on alignment with the College's mission and strategic planning goals, as discussed in I.A.03.

ANALYSIS AND EVALUATION

The College has established processes for the selection and maintenance of educational equipment and materials that support student learning and assist in the achievement of the College mission. Through direct solicitation, surveys, committee participation, and regular assessments, the Library and the LRC Tutoring Center ensure that the expertise of faculty and learning support services professionals is central to the collection development processes. Annual division funding and the resource allocation request process ensure that educational materials needed in instructional areas, as determined by discipline experts, are distributed as needed to ensure student learning and success.

II.B.3 The institution evaluates library and other learning support services to assure their adequacy in meeting identified student needs. Evaluation of these services includes evidence that they contribute to the attainment of student learning outcomes. The institution uses the results of these evaluations as the basis for improvement.

EVIDENCE OF MEETING THE STANDARD

The Library and all other learning support services on campus regularly evaluate and assess services and programs to ensure they are meeting the needs of its students. The results of these evaluations inform and improve planning and decision-making in areas related to use, access, and learning outcomes.

The Library participates in the College's administrative review process, which is tied to planning and resource allocation. This biennial process allows for the creation and tracking of operational objectives and action steps, as well as the assessment of program-level student learning and administrative unit outcomes. The Library is scheduled to complete its next comprehensive AUR in fall 2016 (II.B.1-03).

The Library also gathers data through surveys, statistics, gate count, and database usage. Statistics collected at the circulation and reference desks are used to track and evaluate the demand for services provided by Library staff. These statistics inform decisions related to staffing, scheduling, and collection development. Statistical reports are also generated from the integrated library system and electronic databases. These reports are used to evaluate usage of Library materials (II.B.1-02; II.B.1-08; II.B.3-01).

The Library administers at least one survey annually to evaluate and improve services. The latest student satisfaction survey was conducted in spring 2016. 82.93 percent of responding students reported they strongly agreed or agreed with the statement "I find the information, books or articles I need when I use the library." Furthermore, 85.60 percent of the responding students reported they strongly agreed or agreed with the statement "Using the Library contributes to my overall college success." The survey also shows that over 75 percent of the students access the Library remotely, data that demonstrates the need for online services for students in both online and face-to-face classes (II.B.3.02).

The librarians assess the Library instruction program and Library services in order to evaluate the Library's impact on student success. Based on this data, necessary changes are made to Library courses and services to improve their effectiveness.

Library Instruction

Credit Courses: The Library offers two online credit courses that teach information competency and research skills. LIB 100 is a 1-unit course that is transferable to the CSU system and LIB 2 is a 3-unit honors course that is transferable to the CSU and UC systems. SLOs are assessed every semester for these courses to provide data necessary for course improvement. Both full-time and part-time librarians teach these courses (II.B.3-03; II.B.3-04).

Library Workshops: In addition to credit courses, the Library provides point-of-need, drop-in, and online workshops throughout the semester to support faculty and course information competency requirements. These workshops provide instruction and interactive, hands-on

practice for students. Faculty assign credit for workshop completion based on attendance. The SLOs for the workshops are based on the Association of College & Research Libraries new *Framework for Information Literacy for Higher Education*. Due to student demand, the Library has added two additional online workshops: 1) Avoiding Plagiarism and 2) Finding Information. Adding more online workshops simultaneously increased online enrollment and decreased in-person attendance, demonstrating the need for more online workshop offerings. To address this need, the instruction librarian and the distance learning librarian are currently working to create more online workshops. The effectiveness of these online workshops is demonstrated by the fact that 90 percent of students who take the online workshops meet the SLO with a competency rate of 70 percent or higher—a competency rate equal to that of in-person workshops. In fall 2015 and spring 2016, 1262 students completed Library workshops either online or in person (II.B.1-38; II.B.3-05; II.B.3-06; II.B.3-07; II.B.3-08).

During spring 2016, the following information competency workshops were offered:

- Avoiding Plagiarism (online)
- Books and eBooks
- EasyBib Citations
- Finding Articles (also available online)
- Finding Information (online pilot)
- Internet Searching
- Planning Your Research

Faculty Requested Instruction: The Library provides specialized instruction for students in classes that have tailored or research based assignments. Each class that has an individualized instruction session receives a customized research guide highlighting the resources utilized and of value to the assignment. Librarians travel to classrooms across campus or secure the Library classroom, LRC 314, where students can utilize the Library's laptops for hands-on practice. During fall 2015 and spring 2016, the Library had 41 instruction requests from discipline faculty. Typically, students visit the Library for a 50-minute session accompanied by their instructor (II.B.3-09; II.B.3-10).

Library Consultations: The Library offers one-on-one appointments for students to receive in-depth research support. During fall 2015, the Library began marketing this service on its homepage. Some faculty have incorporated these consultations into their classes by offering extra credit to those students who meet with a librarian for research assignments. Faculty who have actively promoted the consultation service to their students have given positive feedback related to the quality of work submitted after the consultation and the students' response to the service. During the 2015-2016 year, 104 students used the research consultation service. Starting in fall 2016, the Library will implement a short student survey after each consultation to assess the value of this service (II.B.3-11; II.B.3-12).

In spring 2016, the Library piloted a program to visit English classes for a 10-minute orientation which highlights basic Library services, resources, and information competency support. All faculty who requested the orientations stated that they found the information helpful and would request the orientation again. During the pilot, 17 English classes were visited reaching a total of 449 students (II.B.3-13; II.B.3-14; II.B.3-15).

LRC Tutoring

The College's tutoring programs also participate in a review process. In fall 2012 the Learning Assistance Program was renamed LRC Tutoring. The renaming took place when the building in which the Library and tutoring program is housed was renamed the Learning Resource Center (LRC). LRC Tutoring completed its most recent AUR in March 2014 (II.B.1.16).

As part of the review process, LRC Tutoring uses online surveys which assess student satisfaction and the program's effectiveness. This survey is available through WC Online, the Center's scheduling software, and students are encouraged to complete the survey after each tutoring session. The survey is also administered at the end of every semester to non-appointment based tutoring sessions. The survey is reviewed on a regular basis by tutorial staff to determine program strengths as well as areas in need of attention (II.B.3-16; II.B.3-1; II.B.3-18; II.B.3-19).

LRC Tutoring also works with a research analyst from OPRA to determine the impact of its services on student success. According to the data provided by the analyst, those students who utilized tutoring services for six or more hours per semester during the 2014-2015 academic year had greater success, retention, and persistence rates than the general student population at the College. Significant increases in the success rates (from 71 percent to 80 percent) and persistence rates (from 79 percent to 93 percent), demonstrate the effectiveness of this program (II.B.3-20; II.B.3-21).

LRC Tutoring provides its services across disciplines for over 160,000 hours per academic year. In addition to onsite tutoring, students in online and face-to-face courses can receive online tutoring through WorldWideWhiteboard, a program that allows remote access in both synchronous and asynchronous formats. The College also provides an online Paper Center through which students can submit papers via Blackboard for review by a tutor within 48 hours (II.B.1.26).

LRC Tutoring serves approximately 3,200 students per semester. In fall 2015, 3,578 students enrolled in TU300 and completed a total of 64,810 positive attendance hours in the Tutoring Center. In spring 2016, 3,192 students enrolled in TU 300 and completed a total of 62,277 positive attendance hours. The Tutoring Center provides tutoring by appointment and, for high-demand subjects such as math and the sciences, on a drop-in basis. Recently, the Tutoring Center has developed embedded tutoring as a way of improving the success of at-risk students in English, math, ESL, and science courses. Each semester, embedded tutors reach approximately 2,100 students in more than 45 sections (II.B.3-22; II.B.3-23; II.B.3-24; II.B.3-25; II.B.3-26; II.B.3-27).

ANALYSIS AND EVALUATION

The College regularly evaluates Library and other learning support services to ensure that student needs are met. The Library and LRC Tutoring use outcomes assessment data, statistics, student surveys, and input from faculty and staff to help evaluate their services and to provide insight into areas that can be improved to better support learning and achievement. This data is systematically evaluated during the biennial administrative review process.

II.B.4: When the institution relies on or collaborates with other institutions or other sources for library and other learning support services for its instructional programs, it documents that formal agreements exist and that such resources and services are adequate for the institution's intended purposes, are easily accessible and utilized. The institution takes responsibility for and assures the security, maintenance, and reliability of services provided either directly or through contractual arrangement. The institution regularly evaluates these services to ensure their effectiveness. (ER 17)

EVIDENCE OF MEETING THE STANDARD

The College Library and LRC Tutoring maintain collaborative relationships with other institutions and contract with library service providers to enhance library services and learning support services. Contractual agreements provide resources and services that are adequate and accessible for students. The librarians, tutoring staff, and technology services collaborate to ensure the security and reliability of all contracted services. These services are regularly assessed, often annually, and improvements made as needed.

Library

Faculty and staff at the libraries of Saddleback College and Irvine Valley College collaborate on an ongoing basis, primarily through email, telephone calls, or meetings. As an example, the District moved to a new integrated library system (ILS) during the summer of 2014. Both Colleges were heavily involved in the selection and implementation of the new ILS, which took over a year to complete. During this time, the faculty and staff at both Colleges met regularly to discuss and coordinate the migration to the new ILS (II.B.4-01).

The Saddleback College and the Irvine Valley College libraries continue to have an inter-college lending program to serve each other's students. Saddleback College utilizes WorldShare as its ILS, which manages patron and material records and is the backend of the online public access catalog. Library patrons have the option to search the Colleges' collections individually or collectively and can request items from either campus by using the online catalog. A daily courier between Saddleback College and Irvine Valley College ensures that requested materials are available for the patron to check out from their home library in one to two days. In addition, patrons can now use the online catalog to search the collections of libraries around the world and request items from those libraries through Interlibrary Loan. With the Interlibrary Loan service, the library works with other libraries around the country to find a copy of the requested item that can be sent to Saddleback for the patron to check out, often at no charge. Previously, Interlibrary Loan requests required the patron to visit the library during regular business hours to fill out a paper form with assistance from a librarian. This service is now offered online 24 hours a day, 7 days a week, so as to better serve both face-to-face and online students. Due to this change, the number of Interlibrary Loan requests submitted has increased dramatically (II.B.4-02).

In addition, the library maintains a formal borrowing agreement with FLS International, which is affiliated with the Saddleback College Community Education program. Students enrolled at FLS International (a nearby language school) enjoy limited borrowing privileges at the Saddleback College library by presenting their FLS International ID (II.B.4-03). Formal agreements also exist between the Saddleback College Honors Program and two of the local UCs. Saddleback students enrolled in the College Honors Program enjoy borrowing

privileges with the UC Irvine and UCLA libraries (II.B.4-04; II.B.4-05; II.B.4-06). All formal agreements are evaluated periodically.

Vendor Services

The Saddleback College collaborates with many commercial vendors and organizations to provide a full range of quality library services. The following are a list of current vendor contracts:

- 100 Pianos Premier Solutions (Guide on the Side) (II.B.4-07) (ER 17-09)
- 26 Design (WC Online) (II.B.4-08) (ER 17-10)
- Better World Books (II.B.4-09) (ER 17-11)
- Bibliotheca (II.B.4-10) (ER 17-12)
- California Community Colleges Council of Chief Librarians Consortium (II.B.4-11) (ER 17-13)
- Compendium Library Services (DeskTracker) (II.B.4-12) (ER 17-14)
- EBSCO (II.B.1-10) (ER 17-06)
- Nub Games, Inc. (LibraryH3lp Chat Service) (II.B.4-13) (ER 17-15)
- OCLC (WorldShare) (II.B.4-14) (ER 17-16)
- SARS (II.B.4-15) (ER 17-17)
- Unique Management Services, Inc. (UMS) (II.B.4-16) (ER 17-18)
- Library of Congress (Classification Web) (II.B.4-17) (ER 17-19)
- American Library Association (RDA Toolkit) (II.B.4-20)
- Xerox (II.B.2-12) (ER 17-08)
- Yankee Book Peddler (II.B.4-20) (ER 17-21)

The librarians review vendor services regularly to ensure they continue to meet the library's needs and provide reliable maintenance and service, product support, and security. The College documents vendor service agreements, and the contracts are negotiated and maintained by the District business services office.

LRC Tutoring

The College maintains contracts with several commercial vendors to provide a range of support services in LRC Tutoring. The following is a list of current vendor contracts:

- 26 Design (WC Online) (II.B.4-21) (ER 17-22)
- Link Systems (NetTutor, WorldWide Whiteboard) (II.B.4-22) (ER 17-23)
- Nub Games, Inc. (Library H3lp Chat Service) (II.B.4-23) (ER 17-24)
- SARS (II.B.4-15) (ER 17-17)

The College is currently piloting online tutoring services with Link Systems' NetTutor and WorldWide Whiteboard software as part of our involvement with the Online Education Initiative (OEI) so as to more effectively serve online students.

Security, Maintenance and Reliability of Services

The library purchased a Radio Frequency Identification (RFID) system that was installed in the renovated library in 2012 to replace our 3M Tattle Tape security system. The library has RFID security gates at both entrances to help maintain the security of the collection. All library materials are embedded with RFID tags (II.B.4-10). For online resources, the library

uses EZProxy as a secure login system to authenticate off-campus users. EZProxy ensures that usage conforms to provider licensing.

Technology Services ensures that the computer systems are secure from unauthorized access or use, and is safe from destruction, theft, and damage. For community users (i.e., non-students and non-staff), the library provides a guest log-in that requires users to sign up and to provide a photo ID. Guest usernames and passwords are created in Active Directory by circulation staff. With a username and password, guests can log into the District network and use on-site computers and library resources. This guest log-in does not permit off-campus access to library resources.

The campus wireless network has been operational campuswide for over a decade and during that time the College has tried to keep up with the growing demand. In spring 2016, the College started another Wi-Fi upgrade project to improve the signal's strength and reliability across campus. The Technology Services department's network security measures protect the library and learning support service computers against security breaches.

The College installed three security cameras on the outside perimeter of the Learning Resource Center building in 2013. The three Advidia A-54 IR cameras are located on the second and third floor exterior stair wells and on the second floor emergency exit door.

The Library and the LRC Tutoring computers and software are maintained by Technology Services. The College and the District use an online work request system to respond to computer technology equipment repair notifications using a Districtwide Support Portal. Responses to critical repair items that impact daily operations of services are immediately assessed and routed to the appropriate Technology Services staff or vendor. The College's *2015-2020 Technology Plan* addresses the maintenance and scheduled replacement of computer equipment (II.B.2.11).

WorldShare is a cloud-based software and the District's Information Technology department works with OCLC, the vendor for WorldShare, to maintain the software and ensure security for the system.

The Library and LRC Tutoring public copiers and printers are currently maintained through a Xerox service agreement. The College moved to Xerox during the spring 2016; the previous vendor was no longer meeting the needs of the students. Under the Xerox contract, new features are available to students, including Follow-You Printing, free scanning, and the ability to print from a mobile device (II.B.4-19).

ANALYSIS AND EVALUATION

The Library and LRC Tutoring center regularly collaborate, both formally and informally, with other institutions, organizations, and vendors. The College documents all formal agreements and contracts with outside organizations or vendors, evaluates outside library and learning support services for quality and suitability, and ensures that outside services meet the College's requirements for data security, reliability, and maintenance.

II.C.1 The institution regularly evaluates the quality of student support services and demonstrates that these services, regardless of location or means of delivery, including distance education and correspondence education, support learning, and enhance accomplishment of the mission of the institution. (ER 15)

EVIDENCE OF MEETING THE STANDARD

The College evaluates and assesses the quality of student support services and demonstrates that these services, regardless of location or method of delivery, support student learning and enhance the mission of the institution. The quality of student support services is primarily assessed through the administrative unit review (AUR) process. One of the major functions of PR/AUR is to ensure that all units are aligned with the mission and goals of the College. Student learning outcomes (SLOs) and administrative unit outcomes (AUOs) are used to improve services and are an integral part of the review process. AUOs and SLOs are addressed in II.C.2.

The College provides comparable student support services to online education students. Each student support unit uses a variety of technologies—such as email, telephone contact, the College website, and online chats—to extend access to all students, including online students. Online student services were originally developed with online education students in mind, but these services have become popular with all students. Students can use the College website to apply, attend the new student orientation, begin the financial aid process, order books, contact a counselor, add or drop classes, request transcripts, seek student technical support, participate in online tutoring, and use library databases (II.C.1-01; II.C.1-02) (ER 15-01; ER 15-02).

Admissions, Records and, Enrollment Services (A&R)

The Office of Admissions, Records, and Enrollment Services assists with applications for enrollment and all enrollment-related services; with registration and transcript requests; and with degrees, certificates, and occupational certificates. All admissions and records policies and regulations adhere to state, federal, and local rules and regulations (II.C.1-03; II.C.1-04; II.C.1-04) (ER 15-03).

This services of this office include the following:

- Maintaining permanent academic records for current and former students
- Providing transcripts and enrollment information upon request
- Creating and maintaining class lists, grade lists, and grade reports
- Graduation activity support
- Graduation certification
- Statistical reporting
- Transcript evaluation

A&R support services are available to all students, which include extensive web access to admissions, records and registration through the College's website and office sites; MySite, the online source for registration and student records; and emails to students.

All of the following services are available online:

- All admissions and records forms
- Open CCC college application process
- Registration dates and deadlines
- Class registration/drop/fee payment
- Progress toward AA/AS Degree
- Petition to graduate
- Petition for certificate
- Registration priority status
- Transcript requests
- Unofficial transcripts

The quality of A&R services were evaluated through the Student Services Satisfaction Survey 2013. The results of the 2013 survey reveal that 85.7 of the respondents are Very Satisfied or Satisfied with the A&R Services. Additionally, 93.5 of the respondents were Very Satisfied or Satisfied with MySite (II.C.1-06; II.C.1-07; II.C.1-08) (ER 15-04; ER 15-05; ER 15-06). A&R also conducts surveys to evaluate new services or updates to policy. For example, in fall 2014 the office wanted to ensure that students were aware of the new registration priorities. The results revealed that email messages and the college website were the most common mode for receiving information (II.C.1-09) (ER 15-07).

In addition, every two years, the Admission and Records Office evaluates its student support services through an AUR. The AUR speaks to the department's strengths, opportunities, challenges and needs, as well as their future objectives. Each AUR also presents the completion of previous objectives (II.C.1-10) (ER 15-08).

Career and Re-Entry Center

The primary focus of the Career and Re-Entry Center is to offer career exploration, career counseling, advisement, and support to students who are searching for a new major, as well as services to assist individuals with career and life development (II.C.1-11). This center provides both career guidance services and re-entry services to all students. The center currently employs two full-time, year-round specialists, and one career guidance technician to serve evening students and classes and is primarily responsible to support all distance education courses that utilized our services or assessments. In addition, two part-time office assistants ensure coverage during service hours.

The Center maintains three webpages, a career library and a computer lab used for instruction, presentations and classroom orientations. Career guidance services are available to students and community members. These services include career books and resources; information regarding majors; educational and training information; financial aid, grants, and scholarship information; college catalogs and other resources; interest, values, skills, and personality assessments; and standardized testing (II.C.1-12).

The last AUO review was completed in 2009-10 (II.C.1-13; II.C.1-14) (ER 15-09; ER 15-10). During the renovation of the library building the unduplicated headcount of student visits increased to 20,000 students. During 2010 a Center position was reassigned and not replaced. Due to a loss of the position the attendance reports from SARS have not been run on a regular basis (II.C.1-15).

Below are the numbers for the 2015-2016 academic year:

Front desk /Office visitors from SARS Trak attendance by reason, duplicated and unduplicated for the period of July 1, 2015 to June 30, 2016.

<u>Reason Code*</u>	<u>Duplicated</u>	<u>Unduplicated</u>
Career Guidance – Assessments	402	307
Research Careers	6645	1689
Re-Entry Services	201	159
Web/Lib Resources	5248	1630
CCLD Workshop	1567	1198
	14,063	4,983

*Reason Code for the tracking computer at the front desk does not capture all individual appointments and contacts over email and phone.

Re-entry Services has an open door policy for all students and community members and has never denied services based on a specific definition of "re-entry student." The center's intention is to support all re-entry students and promote the success of their educational, career, and personal goals. Services include needs assessments; advisement; resources; referrals to appropriate contacts; education and career guidance; educational and informational sessions (in English and Farsi); support groups; conferences; and scholarship information. Each April, Re-entry Services holds an annual event that features community speakers, workshops, and a nonprofit resource fair (II.C.1-16; II.C.1-17).

The Career and Re-Entry Center offers assistance face-to face, via email, and by phone. The center's website provides a starting point for many services and also provides a variety of tools for students. The following services and research tools are provided to students: CaCareerCafe.com, CaCareerZone.org, Vocational Biographies, Occupational Outlook Handbook, and O*Net.

Career Placement Services

The career placement officer operates in the Economic and Workforce Development and Business Science Division. The position provides campuswide job preparation services and supports students in the areas of job searching, resume writing, interviewing, as well as social media issues impacting the job search (II.C.1-18). The career placement officer manages the Saddleback College Career Network group on LinkedIn currently with 1100+ members (II.C.1-19). The position also provides extensive employer relations offering organizations opportunities to recruit and hire students through On-Campus Recruitment (OCR) (II.C.1-20), career fairs, and job postings on Gaucho Jobs. The career placement officer is the system administrator for Gaucho Jobs, an online student employment system averaging 20,000+ visits per year, 200-300 job posts per month, and 3000+ employer contacts (II.C.1-21; II.C.1-22). Furthermore, Gaucho Jobs averages approximately 500 students searching for employment each month spending over six minutes per visit. In addition, the career placement officer coordinates the annual career fair, which is consistently one of the highest-rated career fair events in the region and brings nearly 100 organizations and 1000+ job-seekers to campus.

Results from the 2016 Career Fair Employer survey showed eleven of the reporting organizations hired at least one candidate from the event and twenty-seven organizations planned on interviewing between one and 10+ student job-seekers (II.C.1-23; II.C.1-24; II.C.1-25; II.C.1-26) (ER 15-11; ER 15-12; ER 15-13; ER 15-14). The career placement officer also completes around 200 student resume critiques annually with 82.5% of responding students reporting the service to be Extremely valuable, 72% reporting they are more Confident in their job search and 44% reporting they Landed a new job resulting from the critique (II.C.1-27; II.C.1-28) (ER 15-15; ER 15-16). Finally, the career placement officer also offers classroom presentations on resume writing and job search techniques across various departments. 84% of responding students reported very high to exceptional Value gained from the presentation and 100% of responding students rated the overall presentation as Very high to Exceptional (II.C.1-29; II.C.1-30) (ER 15-17; ER 15-18).

Child Development Center (CDC)

The College offers child care services for children of SC students, faculty and staff, and members of the community based on available space. The CDC provides services for children ages 18 months to 6 years of age before their entrance into Kindergarten. Priority is given to children of Saddleback College students carrying six or more units. Students who qualify for financial aid on campus will receive a 20% discount on their monthly tuition rate. Student parents may also qualify for an additional tuition scholarship which is based on their child's age and schedule at the center. The primary focus of the program is to provide an educational environment where children, families and adults come together to learn and grow.

The CDC also serves a dual purpose in providing an early childhood demonstration/lab site for students enrolled in the Child Development and Education department, as well as, several other discipline areas on campus including Psychology, Sociology, Human Services and Nursing (II.C.1-31). This opportunity provides college students with a hands-on observation/interaction lab that aids in their course requirements and future job training. These functions of the CDC support student learning and the mission of Saddleback College.

Counseling Services

Consistent with the College mission, Counseling Services supports student learning and success by regularly evaluating the quality of its student support services (II.C.1-32; II.C.1-33). Feedback about student services is collected through both the annual college wide survey and the Counseling Division student surveys (II.C.1-34) (ER 15-19). In fall 2013, student surveys were administered in the Counseling Division. The surveys addressed students' satisfaction with Counseling Services and included questions about student satisfaction with their development of an educational plan, appointment length, information provided, quality of counselor support, and appointment availability. The 2013 survey contained data from 100 students.

The results of the student surveys regarding the development of educational plans demonstrate the Counseling Services Division's success in supporting learning and enhancing the mission of the College. Data from the 2013 survey states that 95 percent of the students who made appointments for academic counseling indicated that they had developed a complete academic plan during their appointment using My Academic Plan (MAP) (II.C.1-35; II.C.1-36). MAP is a computerized online academic planning tool created by the College and IVC counselors in 2007 to create comprehensive student educational plans (II.C.1-37; II.C.1-38). MAP, which interfaces

with ASSIST.org, is utilized by all counselors in all departments of student services. Recent data concerning the development of academic plans by students further validates this point by showing exceptional increases in the number of MAPs being developed by students over the past three years as well as the number of comprehensive academic plans being approved by counselors. Recent data shows that since fall 2012, 19,368 comprehensive academic plans were approved by counselors at the College, and, between the academic year 2013-2014 and 2014-2015, there was a 25 percent increase in approved comprehensive academic plans. Since MAP can be accessed and completed on the student's computer at any time and in any location, this data includes distance education and correspondence education students. Whether working directly with the student in an appointment or over the phone, a counselor can check and approve a student's MAP by accessing it on a computer.

In addition, the 2013 student surveys indicated that the majority of students were consistently satisfied with their contact with a counselor. Since student success is the goal of all counseling appointments—whether these appointments are for academic, career or personal counseling—this data further demonstrates Counseling Services' ability to support student learning.

In addition, to monitoring appointment satisfaction, the Counseling Services Division works consistently to improve the counseling experience for DE students. Online versions of counseling classes continue to be added, and updates and improvements to the online academic planning tool MAP occur on a regular basis.

Group counseling is another innovative tool the Counseling Services Division can utilize to meet the needs of a growing student population. During the summer and fall 2015, the Counseling Services Division participated in a formal research study to measure the effectiveness of using group counseling to assist students with the development of a comprehensive academic plan. To determine if group counseling could be an effective method of assisting students in developing a comprehensive academic plan, the REL West and MDRC research groups partnered to undertake a research study with the Counseling Division at the College (II.C.1-39) (ER 15-20). A random sample of students was selected to attend academic planning groups using MAP. These MAP workshops were designed to provide counseling to groups of five to ten students with the goal of assisting each student with the development of a comprehensive academic plan. These students were compared to a random sample of students who received individual counseling appointments with the same goal of developing a comprehensive academic plan. As a result of the Counseling Division's participation in this study, MAP Workshops have been identified as a viable delivery method for counseling students at Saddleback College. MAP Workshops provide the Counseling Division with the flexibility to respond to student demand and meet student needs regarding the development of comprehensive academic plans. MAP Workshops can be added to a counselor's schedule when student demand for counseling appointments becomes greater than counseling appointment availability.

In addition, every two years, the Counseling Services Division evaluates its student support services through an AUR. The AUR speaks to Division strengths, opportunities, challenges and needs, as well as their future objectives. Each AUR also presents the completion of previous objectives. The AUR is a comprehensive and thorough document that demonstrates support of student learning and enhances the mission of the institution (II.C.1-41) (ER 15-21).

Disabled Students Programs and Services

Disabled Students Programs and Services (DSPS) regularly evaluates the quality of their department's services through surveys, the evaluation of usage data, the review of AUOs, and the completion of AURs (II.C.1-41; II.C.1-42) (ER 15-22).

DSPS sends out a student survey during the spring semester. Direct student feedback about DSPS provides immediate data following student appointments for DSPS Counseling, Learning Disabilities Assessment, Accommodated Testing Services and Alternate Media Production, as well as other services provided for deaf and hard of hearing students, students in need of adaptive furniture, or those in need of "on campus" transportation. The surveys distributed during the spring term are then reviewed and the results are included in the DSPS program's administrative unit outcomes and also used for administrative unit reviews. The surveys address students' satisfaction with DSPS services and include questions about student satisfaction with appointment availability, information provided, new learnings, and the quality of counselor support. The 2009 survey contained data from 75 students, and the 2015 survey contained data from 42 students (II.C.1-43; II.C.1-44) (ER 15-23; ER 15-24).

Results from the 2015 DSPS student survey showed that students were extremely satisfied with their contact with a counselor, learning disabilities specialist or DSPS specialist. 86 percent of responding students strongly agreed or agreed with the statement "I felt the counselor/LD Specialist/DSPS Specialist responded to my questions thoroughly." In 2009, 93 percent of the students indicated that their appointment provided them with new knowledge or skills related to academic, career, or personal goals.

The DSPS Program also analyzes students' use of their services. Through SARS, which records all student contacts, the College is able to determine the most significant services and programs utilized by students. This information provides insight into student needs and the ways in which DSPS should focus its goals, strategies, and planning to provide greater access to services through advanced technology, equipment, and additional programs and services (II.C.1-45) (ER 15-25).

In 2009, DSPS Alternate Media Production evaluated the number of students who attended their initial appointment after being referred to Alternate Media Production by a DSPS counselor. During the spring semester, 134 students were referred to Alternate Media Production. Of that number, 70 percent kept an appointment and submitted books/class material for production into an alternate media format. In 2015, 150 students met with the alternate media specialist and 175 books/materials were converted to Kurzweil or another media format (II.C.1-46) (ER 15-26).

This kind of evaluation occurs regularly in all areas of DSPS. In addition, the DSPS Program completes a program review every two years. The program review allows the DSPS Program to connect their services, programs, and instruction to the mission of the College.

Once a student is verified as having a disability (II.C.1-47; II.C.1-48), an interaction process during an accommodations appointment with the student determines what accommodations and auxiliary services would be effective for optimal learning. Accommodations apply to students for in class, Distance Education, and Continuing Education. If a student discovers that one of their accommodations cannot be applied, the student reports this information to their instructor and DSPS. DSPS and the instructor of record will then work together to make sure that the

accommodation is provided. Counseling appointments regarding DSPS accommodations, orientation, and counseling for DE students, can take place through Skype or phone conversations. The same methods can be used for students who need access to Alternate Media Production, and materials can be delivered through email or physical mail. For those DE students whose accommodations include extended time on tests, DSPS provides the accommodation information to the instructor, who then adjusts the time allotment for tests on Blackboard or other technological access points for the student (II.C.1-49; II.C.1-50) (ER 15-27).

EOPS/CARE and CalWORKs

Consistent with the College mission, EOPS/CARE and CalWORKs supports student learning and success by regularly evaluating the quality of its student support services. The annual Collegewide survey collects feedback about student services, as does the review of AUOs and the completion an AUR (II.C.1-51; II.C.1-52; II.C.1-53; II.C.1-54; II.C.1-55) (ER15-28; ER 15-29). In addition, EOPS/CARE and CalWORKs faculty and staff have biweekly meetings to discuss the progress of the student support services that these programs offer to students (II.C.1-56). In 2013, the EOPS/CARE and CalWORKs Program conducted a student survey to evaluate the services offered through these programs (II.C.1-57) (ER 15-30). The survey addressed students' satisfaction with EOPS/CARE and CalWORKs services, information provided by the counselors, mode of information delivery, quality of counselor support, and their completion of a student educational plan. The 2013 survey contained data from 60 students.

The results of the student surveys demonstrate the EOPS/CARE and CalWORKs Program's success in supporting learning and enhancing the mission of the College through the development of education plans. Data from the 2013 survey states that 95 percent of responding students agreed or strongly agreed with the statement "the EOPS Counselor developed an understandable educational plan that reflects my career or academic goals." All educational plans completed by EOPS/CARE and CalWORKs counselors are approved and signed by the student and the counselor (II.C.1-58). 93 percent of students agreed or strongly agreed that their EOPS counselor was knowledgeable about academic programs, general education and transfer requirements; 90 percent of responding students utilized priority registration and 81 percent utilized book vouchers or borrowed text books from the EOPS book loan program (II.C.1-59).

Financial Assistance

The Student Financial Assistance and Scholarship Office provides FAFSA guidance and support to students who are eligible for federal, state, private, or institutional financial assistance. There are many financial aid programs that can help students with fees, books, supplies, transportation, housing, and other related educational expenses (II.C.1-60).

The quality of support services are evaluated through the Student Services Satisfaction Survey 2013. The results of the 2013 survey reveal that 83.9 of the respondents are Very Satisfied or Satisfied with the Financial Aid Office services (II.C.1-08).

The quality of programs are also measure by required mandated state and federal reports such as the CCCCO Student Services Automated Reporting for CC and Federal Fiscal Operations Report and Application to Participate (II.C.1-61; II.C.1-62).

In addition, every two years, the Admission and Records Office evaluates its student support services through an AUR. The AUR speaks to the department's strengths, opportunities, challenges and needs, as well as their future objectives. Each AUR also presents the completion of previous objectives (II.C.1-63) (ER 15-31).

Support services for all students, including DE students, include extensive web access to state and federal financial aid applications, financial aid missing documents, messages, awards and disbursement information through the online My Financial Aid portal (II.C.1-64). In addition financial questions and answers are available 24/7 through short video videos that discuss important financial topics (II.C.1-65).

International Student Office

The International Student Office provides services to international students who hold F-1 student visas. These services include assisting students in the admissions, assessment, and orientation processes. Furthermore, the International Student Office guides international students through the transfer and graduation process and helps students with the preparation of home-stay and visa applications as well as documents required by the United States Citizenship and Immigration Services. In addition, the International Student Office both coordinates events on campus to promote global awareness and cooperates with community organizations in international friendship programs (II.C.1-66; II.C.1-67).

The quality of support services are evaluated through the Student Services Satisfaction Survey 2013. The results of the 2013 survey reveal that 100% of the respondents are Very Satisfied or Satisfied with the International Student Office. Fall 2016 International Student Orientation Evaluations were performed, 35 students attended the event. A total of 29 students participated. 14 Multiple choice questions & two short essay questions, 20 students wrote positive feedback on how helpful the orientation was; 25 students wrote positive feedback on how well they understood the orientation (II.C.1-68).

In addition, every two years, the Admission and Records Office evaluates its student support services through an AUR. The AUR speaks to the department's strengths, opportunities, challenges and needs, as well as their future objectives. Each AUR also presents the completion of previous objectives (II.C.1-10).

Support services for all students, including International Students, is discussed above in A&R.

Student Health Center

The Student Health Center offers quality, confidential medical health care and psychological therapy for currently enrolled students who have paid their health fee. The Health Center staff is comprised of physicians, registered nurses, psychologists, and counseling interns. The student health fee includes treatment for acute, short-term illnesses as well as injuries, health education, referrals, and general health screening, including mental health therapy and women's health. A minimal fee does apply to some procedures, tests, labs, and prescriptions (II.C.1-69; II.C.1-70) (ER 15-32).

The College has a Crisis Intervention Team (CIT) which includes staff from the Student Health Center and Counseling Services (II.C.1-71; II.C.1-72). This team is available when a College

student or staff member has a psychological emergency. In addition, the Student Health Center subscribes to *Student Health 101*—a monthly online magazine that covers a variety of pertinent college health issues, such as colds and flu, stress, depression, sleep, nutrition, alcohol, and sexual behavior (II.C.1-73).

Student Success and Support Program (Formally known as Matriculation Department)

The Student Success and Support Program (SSSP) evaluates its student support services through student surveys, the review of AUOs, and the completion of AURs (II.C.1-74; II.C.1-75) (ER 15-33). In spring 2012, a sample of 287 students who had completed matriculation at the College responded to a matriculation satisfaction survey. All questions on this survey were graded on a scale of 1-5 with 5 being the highest score. As a result of this survey, efforts were made to improve 1) the College's orientation and advisement and 2) the language on the matriculation website to better explain the process for submitting alternative evidence to meet the prerequisites for English and math requirements (II.C.1-76) (ER 15-34). In spring 2016, the College participated in a CESSE student survey (II.C.1-77) (ER 15-35).

Students must now show information mastery while completing the online orientation. This demonstrates consistent student learning while completing the orientation process. A student must get 80 percent of the orientation questions correct in order to clear this required step in the matriculation process (II.C.1-78).

The SSSP program review along with the SSSP credit and noncredit plans are used to measure the program's progress and to monitor any unmet needs of SSSP/Matriculation. Orientation is mandatory for all students who are required to complete the matriculation process as a result of their educational status and educational goal. During the 2014-2015 academic year, 92% of first time students completed orientation (II.C.1-79) (ER 15-36).

The College is able to meet all student orientation needs as this service is entirely available online. Only students whose educational goal does not require orientation are permitted to register for classes without having completed all SSSP core services. An effort is being made through Sherpa "nudge" technology to follow-up with students who have applied, but who have not completed the SSSP core services nor enrolled.

SSSP supports the Counseling student learning outcomes (SLOs) by introducing new students to campus support programs including: Counseling courses; categorical programs such as DSPS, EOPS, CalWORKs; veteran services; the Transfer Center; the Health Center; free tutoring in the LRC; FERPA; and Title IX. The successful completion of the online orientation module's exit exam demonstrates evidence of student learning (II.C.1-80) (ER 15-37).

Transfer Center

It is the mission of the Transfer Center (TC) to provide resources and counseling services that empower students, so they can achieve their desired transfer goals and career objectives. In order to transfer to a four-year institution, students must meet specific momentum points dependent on their transfer goal. The general points are deciding on a major and career goal, math and English requirement completion, completion of a specific number of units, completion or partial completion of a general education pattern, lower-division major preparation, and maintenance of a competitive grade point average (II.C.1-81).

The Transfer Center regularly evaluates the quality of support services provided to students through student surveys, by reviewing AUOs, completing AURs, and evaluating data (II.C.1-82) (ER 15-38). Furthermore, the support services provided by the center support learning and enhance the accomplishment of the mission of the institution and, in particular, the mission of student transfer to 4-year institutions. Students have multiple means of making contact with the Transfer Center; they can access the center through its website, schedule individual appointments in the center, call the office and be placed on a call-back list during walk-in periods, or email the center with questions via a designated general email address provided on the center's website. The counselor/coordinator and the eight part-time counselors also deliver services through presentations in academic classes, workshops for students, open application labs, personal statement essay reviews, and quad visits (II.C.1-83). These class visits and workshops are regularly evaluated through a paper survey that is uploaded to Class Climate. In addition, as part of the administrative review process, a student satisfaction survey was conducted in 2014. To provide access to the survey for distance education students and those who had already transferred, the survey was sent to students who had made an appointment via their College email. Students who visited the office were given a paper survey. Through both means of delivery, 83 students participated in the survey total (II.C.1-84) (ER 15-39).

Appointment processes: The survey results demonstrated that 56 percent of students made appointments over the phone and 36 percent made appointments in person. Eight percent of students who completed the survey had never made an appointment with a Transfer Center counselor. It is possible that these students completed the survey while they were in the office during walk-in transfer express times. 56 percent of students found the appointment making process to be very easy, while 18 percent found it easy. Meanwhile, 14 percent of the students found the process to be difficult, and 7 percent found it very difficult.

Counseling: Nearly 68 percent of students were "very satisfied" with their counselor's thoroughness. Seventy-one percent of students were satisfied with their counselor's explanation of specific transfer steps. Sixty-nine percent of students rated their satisfaction with MAP as "very satisfied." 76 percent rated their satisfaction with application help as "very satisfied." Finally, 73 percent of students were "very satisfied" with the length of their appointment.

Transfer Center counseling related to college choices was the highest rated reason for visiting the Transfer Center at 71 percent, followed by help with counseling assistance for class scheduling at 66 percent. Nearly 35 percent of students surveyed used the center for transfer workshops, followed by 15 percent for university representative visits, 11 percent for college fairs, and 6 percent for careers in teaching.

The Transfer Center determines AUOs each year to guide priorities and provide focus for the academic year. The Transfer Team, composed of both faculty and staff, meets each Monday to review progress and plan for upcoming student transfer needs. In addition, counseling faculty meet monthly for a Counselor Forum to consider case studies, policy review, and four-year institution research (II.C.1-85) (ER 15-40).

Veterans Education & Transition Services Program (VETS)

The VETS Program is not mandated or required through Title 5 or state or federal regulation; it functions and is supported at the will of the College. The mission of the VETS Program is to provide United States Military Veterans, active military, and the families of both, access to educational opportunities and the necessary support services to reach academic success as well as transition back into civilian and college life. In achieving this mission, the College will stand as a leader among post-secondary institutions in serving those who have served us (II.C.1-86; II.C.1-87).

The VETS Program regularly evaluates the quality of support services provided to students through the assessment of AUOs and through the AUR process (II.C.1-88) (ER 15-42). The program works with District IT staff to assess completion rates, retention rates, participation rates, and demographic information of student veterans, active duty personnel, and military dependents. Furthermore, the Vets Program also reviews the efficiency and efficacy of its services. For summer 2016, the program planned a deeper review of student veterans, the impact that the use of services has on those students, as well as an overall satisfaction survey. Once completed, this assessment will inform the future direction of the VETS Program. In spring 2016, a review of the physical VETS Center took place. In this review, students showed extreme dissatisfaction with the size and layout of the current location, SSC 207. As a result, a report has been developed and will be delivered to the College administration to seek a new, larger, and more accessible location to serve student veterans (II.C.1-89).

The VETS Program provides phone and online services for off-site active duty personnel, veterans, or family members, who are often either deployed or on a military installation outside of the area. For example, when a student contacts the program with limitations based on geography or the inability to be given leave by a commanding officer to come to campus, an appointment is scheduled and a counselor calls the student and engages with them online to review records and documents simultaneously; in addition, the program offers counseling at Camp Pendleton Marine Corps Base. Many veteran students come from the northern part of Camp Pendleton, and yet they still struggle to get to campus due to active duty commitments (II.C.1-90).

Veterans Affairs and Services

The Veterans Office assists students in completing paperwork required for VA education benefits (II.C.1-91). The College encourages students who qualify for VA education benefits to take advantage of their entitlement. In addition to providing education benefits to veterans, the Veterans Office provides education benefits to dependent children and spouses of veterans who died or are permanently and totally disabled due to a service-connected disability. Veterans Affairs and Services regularly evaluates the quality of support services provided to students through the process of reviewing AUOs and completing AURs (II.C.1-92) (ER 15-42).

ANALYSIS AND EVALUATION

The College makes every effort to provide comparable support services regardless of the method and location of instruction. The College regularly evaluates student services through administrative review and point-of-service surveys. By utilizing these evaluations, student support services can ensure that services meet the needs of the students and support the mission of the College. In addition, this process ensures that the College

provides high-quality services that support student learning, and helps to identify additional needs and services.

DRAFT

II.C.2 The institution identifies and assesses learning support outcomes for its student population and provides appropriate student support services and programs to achieve those outcomes. The institution uses assessment data to continuously improve student support programs and services.

EVIDENCE OF MEETING THE STANDARD

The College is committed to providing high-quality student support services, regardless of location or means of delivery, to promote student success and the mission of the College. Student Services defines and assesses AUOs for a diverse student population, provides appropriate support programs and services to achieve those outcomes, and uses subsequent results to make changes and improvements.

The College currently does not have any programs that are offered solely online. As an open institution, the College does not restrict access to any of its courses, and works to ensure the success of all students, both face-to-face and online, by providing necessary resources and services. The College assesses and utilizes outcomes assessment data for all support services, whether these services are provided face-to-face or online. In addition, the College requires all student and learning support services to participate in the biennial AUR process (II.C.2-01).

Counseling Services

Counseling Services identifies and assesses learning support outcomes and provides appropriate student services by regularly participating in the AUOs (II.C.2-02) process and by assessing SLOs (II.C.2-03) related to counseling courses taught through the Counseling Department. Counselors work with students to create a plan that mirrors student goals whether that goal is a certificate, associate degree, or to transfer to a four-year institution. All necessary courses in this plan can be arranged by semester to provide students with a visual outline of their remaining courses for completion. MAP is always accessible to students through the MySite portal (II.C.2-04).

The Counseling Division tracks the number of academic plans that are made on MAP as well as the number of plans that have been approved by a counselor. MAP has proven to be a useful and innovative tool for counselors as well as students to promote student learning. The results of the aforementioned mentioned 2013 Counseling Division student survey (II.C.1-34) show students' satisfaction with their ability to develop a comprehensive academic plan using MAP (II.C.1-24).

The Counseling Division also assesses student outcomes through SLOs related to counseling courses taught through the Counseling Services Division (II.C.2-05). Counseling courses are taught in subjects including: career exploration, academic planning, human relationships, and study skills. Each class has a specific list of SLOs that students are expected to achieve by the end of the course. Class assignments and exams are means to measure SLOs. Comparable counseling courses, whether taken in person or online, have the same SLOs. Therefore, online students can expect to receive the same information as face-to-face students and will achieve the same learning outcomes. In order for students to accomplish the competencies necessary to earn a certificate, degree, and/or transfer, all course-level SLOs are linked to PSLOs and ISLOs. In the latest measurement of SLOs in Counseling Services courses in 2015, 100 percent of counseling courses met their SLO goals. The chart below describes how specific counseling SLOs were measured (II.C.2-06).

Disabled Students Programs and Services (DSPS)

Through DSPS administrative unit outcomes, DSPS assesses how adequately it meets the needs of students in a timely manner. In 2013-2014, the AUO was assessed through institutional data collection (II.C.2-07). SARS was used to examine the time between a student's first contact with DSPS (submission of the DSPS Application for Services) and the time the student received their initial appointment. It was found that only 61 percent of the students applying for services received an appointment within two weeks of their first contact. These results indicated that there was an inadequate number of appointments available, perhaps partly due to budget reductions since 2008. In addition, the DSPS student count has increased significantly since 2008. There were 1800 DSPS students in 2008 and 2500 hundred students by 2014. In response to this increase, DSPS has added counselors to meet student needs (II.C.2-08).

DSPS also assesses student outcomes through student learning outcomes related to Special Services courses taught through DSPS as well as the adaptive PE courses (KNEA) taught through DSPS (II.C.2-09). Special Services courses cover various subjects including: Alternative Learning Strategies, Personal Awareness and Success Strategies, Memory and Attention Skills, Success Strategies for Basic Mathematics, Basic Computational Skills, Phonetic Structure for Reading and Spelling, and Adaptive Computer Lab. KNEA courses include: Adaptive Strength Training, Water Exercise and Swimming, Cardiovascular Conditioning, Adapted Sports, and Survey and Assessment of Fitness, among others (II.C.2-10). Each class has a specific list of SLOs that students are expected to achieve by the end of the course. SLOs are measured through class participation, assignments and exams.

Early Alert

A new early alert, or Progress Report, was launched in summer 2016 to all faculty whose students are in jeopardy of not attaining the outcomes for the course (II.C.2-11). Progress Report was piloted in spring 2016 by 25 faculty, and over 1300 Progress Report nudges were sent to students (II.C.2012). This new early alert system is an opportunity for faculty to continue to communicate with their students, particularly to express any concerns that they have regarding their students' class performance. Faculty can use Progress Reports to communicate to a student that he/she may be missing assignments, poor performance on a test, or absences. Since College counselors will also have access to these Progress Reports during individual counseling appointments with students, Progress Report will allow for a holistic and intrusive approach to counseling. Furthermore, counselors will proactively use Progress Report analytics to reach out to students who are in need and direct them to campus services for support.

Progress Report nudges include referrals to the Learning Resource Center, the College's free tutoring center, instructor office hours, and counseling (II.C.2.-13). While Progress Report is voluntary tool for our faculty, this function can easily be accessed with any class roster found in MySite. Professional development workshops will address how to use Progress Report; in the meantime, this intuitive tool is already available to faculty. Approximately 1,800 students end each semester on academic or progress probation. Beginning fall 2016, students on academic probation are in serious jeopardy of losing their financial aid. Progress Report can serve as a preventative tool to help all students succeed. Finally, Progress Report can also send positive nudges (II.C.2-14), which will allow counselors to reinforce positive classroom performance. This early alert system is a Districtwide project funded through SSSP. Instructional and

counseling faculty, staff, research and District IT worked together on this collaborative effort to provide a needed and beneficial student support tool.

EOPS/CARE and CalWORKs

Every three years, EOPS/CARE and CalWORKs identifies and AUOs (II.C.2-15). The EOPS faculty and staff members have biweekly staff meetings to discuss and evaluate AUOs. During these meetings, staff report the outcomes of their activities in relation to AUOs. For example, all EOPS active students are required to attend three counseling meetings per semester; during these meetings, the counselor ensures that the student develops an educational plan. All current EOPS students have a comprehensive student educational plan.

In addition, students are contacted via email and phone with reminders about their priority registration, counseling contacts, book vouchers, the book loan program, and other student support services—such as holiday events, grants, and scholarships available to students. The AUOs are assessed in several ways. The EOPS program specialist uses a database to run daily reports on those students who utilize each support service and on the student support services provided (II.C.2-16). The EOPS/CARE programs have a tracking system where all student contact is documented and all services are tracked. In order to plan for the following year, all AUOs are assessed at the end of each calendar year. In addition, the EOPS/CARE programs have mandated reports. The reporting forms required by the Chancellor's Office during the fiscal year include the previous year EOPS Final Expenditure Report (II.C.2-17), the CARE Final Expenditure Report (II.C.2-18), and the CalWORKs Final Expenditure Report (II.C.2-19) all reports need to be submitted with assigned signatures to the Chancellors office by September 15th. The EOPS and the CalWORKs Program Plan need to be submitted with assigned signatures to the Chancellors office by November 15th. The EOPS Budget Plan (II.C.2-20), the CARE Budget Plan (II.C.2-21), and the CalWORKs Budget Plan (II.C.2-22) need to be submitted with assigned signatures to the Chancellors office by November 15th. The EOPS and CARE Mid-Year Reports need to be submitted with assigned signatures to the Chancellors office by February 1st (II.C.2-23).

Level Up Basic Skills and Student Outcomes Transformation Grant

The College was awarded \$1.5 million for the three-year Level Up Basic Skills and Student Outcomes Transformation Grant, which began in fall 2016 (II.C.2-24). The grant will focus on factors students say they need to feel in order to succeed in college: directed, focused, nurtured, engaged, connected, and valued. The grant will supplement ongoing college success efforts, such as AVID.

The grant addresses four objectives:

- 1) Adopt the Common Assessment Initiative and Multiple Measures Assessment indicators, and evaluate and place students in college-level courses.
- 2) Increase the placement of students directly in gateway English and mathematics courses, transferable to a UC or CSU, with remedial instruction, as appropriate, for underrepresented students.
- 3) Contextualize remedial instruction in foundational skills for the specific academic and career pathways in which students seek to advance.
- 4) Provide proactive student support that is integrated with instruction.

The College will also use the grant to advance existing practices that are productive, to employ professional development to create awareness and practice of these strategies and perspectives, and to develop a Collegewide culture, both in the classroom and in areas of student support, that bolsters basic skills success. In addition, the College will use existing District technology to create a new class schedule that will integrate a given student's assessment results, high school transcripts, completed coursework, academic plan as well as create an individualized class schedule. The grant will also create six positions, expand tutoring, and provide stipends for curriculum redesign and professional development.

SSSP

SSSP assesses and provides for student needs by including in the orientation topics mandated by Title 5, section 55521, as well as any additional information, policies and/or procedures that the College or District determines necessary to include in a comprehensive orientation. The orientation includes all required topics as well as additional topics, such as, programs and majors, the SSSP process, student services, academic planning, campus life, and student conduct and safety (II.C.1-25).

SSSP addresses student need regardless of location. The program responds daily to email messages from students and the community regarding SSSP-related questions and concerns. All student services-related departments, as well as instructional support divisions and departments, contact SSSP regarding matters of assessment, at which time the SSSP coordinator and/or staff address each inquiry on a case-by-case basis. All SSSP information is available to students and the community via the SSSP website (II.C.1-77).

SSSP provides online orientation and online advisement for students unable to participate in in-person SSSP services. Students outside of a 150-mile radius of campus and out of state can complete assessments with off-site proctoring services nationwide through the College's membership with NCTA (II.C.2-26). Through Comevo, the same provider of online orientation, online probation workshops are available to students (II.C.2-27).

SSSP ascertains the effectiveness of student support services through department surveys and event evaluations. Evaluations are collected from Freshman Advantage Fridays, Refresh, WOW, Probation Workshops and during administrative review, typically using Class Climate and now Turning Technologies. SSSP staff use data to help update and improve service and program delivery. The SSSP researcher regularly assists the staff with data analysis (II.C.2-28).

Transfer Center

Students work with counselors in the Transfer Center to prepare for transfer, to apply, and to follow the steps for transferring which, in many cases, take approximately one year from application to the first semester at a given transfer campus (II.C.2-29).

To determine whether students are achieving anticipated outcomes and to improve services, the Transfer Center assesses the following:

- Assessment of approved MAPs completed by counselors in the Transfer Center (II.C.2-30)

- Assessment of the number of CSU and UC applications and admissions each year (II.C.2-31)
- Private and out-of-state college admissions (II.C.2-32)
- Tracking of Honors Program and Teacher Preparation Pipeline students (II.C.2-33)
- Assessment of student use of the Transfer Admission Planner (TAP) which is a service/online planner administered by the University of California (II.C.2-34)
- Assessment and follow up of students through the UC Data Sharing Program (II.C.2-35)

Veterans Education & Transition Services Program

Plans are in place to evaluate the efficacy of VETS Program services; to date, no formal assessment has taken place. Internal assessments include student wait time for counseling, counselor efficiency, VETS Center utilization, accuracy of MAP majors to VA once submissions, event participations rates, and overall veteran participation rates at the College. The VETS Program is currently up for AUR and will incorporate specific metrics into both the planning process and AUR (II.C.1-88).

Distance Education

In response to student need, the College is currently piloting online tutoring services, an online Paper Center, and live tutoring. The LRC Tutoring Center is offering WOW workshops for students taking online courses (II.C.2-36; II.C.2-37). The Tutoring Center has also added some embedded tutors for online courses. In addition, the Library is offering online Library Workshops and will add additional online workshops in 2017 (II.C.2-38).

Counselors provide online/phone counseling to help meet the growing needs of online students. To ensure reasonable academic accommodations for students enrolled in online courses, DSPS has online procedures to accommodate students who have disabilities.

AURs and PRs flag additional student needs and enable a link to resource allocations. In addition, student surveys and committees—including the District Technology Committee, College Technology Committee, DOEC, and College Online Education Committee—offer the College opportunities to assure the quality of student support, identify needs for support services, and ensure that those needs are met (II.C.2-39).

Students in DE courses are offered support that is comparable to their traditional student counterparts. While the OEI-engaged courses at the college are piloting student-readiness modules, the college does not mandate a baseline readiness procedure for all students enrolled in DE courses. However, students do have access to success workshops for online students (during WOW week), and there are online resources such as readiness quizzes available for students. OEI-engaged faculty also have access to Proctorio, an online proctoring service offered free of charge to students, while some faculty who teach DE courses, such as in the Math Department, also use ProctorU, which is a fee-based proctoring tool (II.C.2-40; II.C.2-41). The college could improve in its access to free proctoring services for DE courses. The Student Technical Support team at the college also ensures consistent support for students who need desktop support with passwords, access to the LMS, and simple technical issues such as converting files and troubleshooting. There are currently two full-time and one half-time staff members dedicated to Student Technical Support to support the 30,000+ students enrolled at the college; increasing

support will be an important consideration for the college, especially if the college chooses to move to a new LMS. Beyond technical support, students have access to online library services (such as reference support, 24/7 chat with librarians, online library workshops, and access to databases), online tutoring services including the Paper Center and online tutoring for English, and the ability to create, edit and cancel appointments using the appointment-scheduling system, WC Online.

ANALYSIS AND EVALUATION

The College provides a broad range of student services and programs to support student success. The College utilizes several methods for identifying and assessing outcomes for its learning support services and then uses that data to provide appropriate student support services to achieve those outcomes. Information on all student programs and services is available to students and the public through the College Catalog, which is available in print and online, as well as hyperlinks on the Student Services website. Furthermore, student orientation, campus events and personal development course curriculum, provide students with information on College services. The College was an early adopter of student services SLOs and AUOs, and all student support services have completed multiple AUO assessment cycles.

II.C.3 The institution assures equitable access to all of its students by providing appropriate, comprehensive, and reliable services to students regardless of service location or delivery method. (ER 15)

EVIDENCE OF MEETING THE STANDARD

The College provides appropriate, comprehensive and reliable student services that promote equal opportunity and access to all students, regardless of location or means of delivery. The College actively evaluates both student needs and student support services to ensure the quality of programs and their effectiveness in enhancing student success. To ensure quality of student support services regardless of location or means of delivery, all student support services participate in the College planning, evaluation, and review process.

Admissions, Records and Enrollment Services

The Office of Admissions, Records and Enrollment Services assists with applications for enrollment, all enrollment-related services, registration and transcript requests, as well as degree and certificate conferral (II.C.1-03; II.C.3-01). The office collects, processes, and maintains student grades and completion records of certificates and degrees. The staff processes residency redeterminations and transcript requests, and enforces academic regulations, such as course repetition, academic renewal, and enrollment priority. Most transactions can be completed online, and the Office of Admissions, Records and Enrollment Services serves traditional and online education students (II.C.3-02).

Counseling Services

Comprehensive and reliable counseling services include academic counseling, personal counseling, and career counseling, all of which can be obtained in person, on the telephone, and on online. Counseling Services is open for day and evening appointments every day of the week, excluding weekends and holidays (II.C.1-32).

The College has many high school students who attend the college through dual enrollment. Additionally, in 2012, Saddleback College began offering counseling courses (then titled Applied Psychology) at local high school campuses. Today, the Counseling 100 courses are offered at 12 local high schools and serve a population of 400 plus high school students. High school students who complete Counseling 100 have informed educational plans and have met the matriculation deadline for priority registration appointment dates (II.C.3-03) (ER 15-41).

Disabled Students Programs and Services

DSPS at the College ensures that students with disabilities have equitable access to all support services and educational/academic classes and programs in the following ways: educational accommodations for academic limitations due to verified disability; academic, personal, and career counseling; priority registration; accommodated testing; mobility orientations and campus-accessibility maps; note-taking assistance, reader and transcription services; alternative media production; adapted computer labs; sign-language and real-time captioning; and liaison with faculty and community agencies (II.C.3-04; II.C.3-05) (ER 15-42; ER 15-43). These services apply to students in both face-to-face and online classes, and appointments are available in person, by phone, or by Skype. In addition, DSPS offers specialized courses in strategies training, basic academic skills, lip-reading and hearing conservation, and adapted kinesiology (adapted PE) (II.C.3-06) (ER 15-44). The DSPS Learning Disabilities Center offers free learning

disability assessments to students who have never been diagnosed with a disability, but who are struggling academically and want to determine if a learning disability is contributing to their difficulties (II.C.1-47).

Due to the increase in the disabled student population, DSPS services were required to hire additional faculty and staff. This growth created space constraints that made it extremely difficult to meet the service needs of students, so the College increased the facilities space available to DSPS. This additional space was added in multiple locations throughout the campus. Having multiple locations has created a barrier to access of services in a timely and effective manner. The College is aware of this issue; the long-range plan is to move DSPS into the Gateway Building after its completion.

Due to the size and topography of the campus, the College will always need to provide “on-campus” transportation for students with mobility issues. DSPS provides campus transportation by way of two golf carts (one cart is wheelchair accessible) between building locations, the parking lot, and the ACCESS bus stops, as well other areas on the campus.

EOPS/CARE and CalWORKs

EOPS/CARE and CalWORKs is committed to providing comprehensive student support services for EOPS/CARE and CalWORKs eligible students through the following services: career, personal, and academic counseling; priority registration; assistance with registration; book vouchers; assistance with scholarship applications; application fee waivers to four-year institutions; the Book Loan Program; Cap & Gown; cultural and social events; and extended tutoring services and grants (II.C.1-51).

The EOPS/CARE Program provides support services to those students who qualify for and are accepted into their program. Students can reach the program in person, by telephone, or online. The EOPS/CARE and CalWORKs Office is open daily, excluding weekends and holidays. All forms are readily available via the College's EOPS/CARE and CalWORKs website (II.C.3-07).

Counseling is the primary student support service offered to EOPS/CARE and CalWORKs students. Each program has its own eligibility requirements based on Title 5 regulations. In order to be eligible for the EOPS/CARE Program a student must have an educational and socio-economic disadvantage and have completed less than 70 degree-applicable units. In order to be eligible for the CalWORKs Program, students must be CalWORKs or TANF recipients and have a Welfare to Work contract with the Department of Social Services. EOPS/CARE and CalWORKs students utilize personal, career, and academic counseling. EOPS/CARE and CalWORKs counselors develop comprehensive academic plans for students through the District's MAP software. Each student's MAP is reviewed and updated on a semester basis.

Follow-up services are communicated in person, by email or phone. EOPS/CARE students also have access to priority registration and can apply for associates degrees, vocational certificates, or occupational awards online through their MySite portal (II.C.3-08).

Financial Aid

The financial aid staff are responsible for the initiation, supervision, disbursement, and monitoring of funds provided by federal, state, and local government agencies in the form of grants, employment wages, loans, and scholarships. Financial aid programs assist eligible

students from all income levels, and specifically those students from low and middle-income families. All students have access to the application for financial aid online, as well as related forms (II.C.1-60; II.C.3-09). In addition, financial aid support is provided face-to-face, via email, or by telephone.

International Student Office

The International Students Office coordinates events on campus to promote global awareness and also cooperates with community organizations in international friendship programs. The office's website provides links to the international student application as well as information about activities and events. Students can interact with the College's International Student Program using Facebook, Twitter, and YouTube (II.C.1-66).

Student Equity Plan (SEP)

The College provides appropriate, comprehensive, and reliable services to all students. The College's culture of support strives to ensure equitable access to support services for all segments of the student population. The College uses a multifaceted approach to ensure this equitable access for all students. The College utilizes the Student Equity Plan (SEP) to support and move each student toward academic and personal achievement. Categorical programs, student equity, basic skills, and student success and support programs, ensure students many opportunities to achieve this success. The College's SEP aligns with Objective 2.1 of the Strategic Plan which calls for "closing the achievement gap." The SEP focuses on increasing access, course completion, English as a Second Language (ESL) and basic skills completion, degrees and certificates, and transfers for all students, as measured by success indicators linked to the California Community Colleges Student Success Scorecard and other measures developed in consultation with local colleges (II.C.3-10; II.C.3-11) (ER 15-45; ER 16-46).

Student Success and Support Program (SSSP)

SSSP ensures regular evaluation of equitable access by meeting with the English, Reading, ESL and Math department chairs to conduct validations (II.C.3-12). The English, Reading, ESL and Math departments are currently preparing for implementation and validation of the new Common Assessment and statewide multiple measures.

SSSP ensures that matriculation testing is available to remote students through the utilization of NCTA (National College Testing Association) to provide proctored assessment services to students who are out of state or outside of a 150-mile radius of the College. All other SSSP services, including orientation and advisement, are available online.

SSSP Department can monitor, track and study the use of online orientation and online advisement. In addition, the SSSP Coordinator is a member of the High School Partnership Council and receives regular feedback from area high school officials regarding the Saddleback College off-campus assessment service provided at area high schools (II.C.3-13).

Reliable SSSP services are provided online (orientation, advisement and probation). Currently, out of the area and out of state students are given the option to have assessment testing proctored at a National College Testing Association (NCTA) site within the United States. Soon Saddleback College will offer the Common Assessment, which means a student will be able to assess at a local California Community College campus and have their placement results made available to Saddleback College through the CCCAssess statewide data warehouse (II.C.1-74).

The College discovered there is a need to offer off-campus assessment more than once at many area high schools. Due to the overall number of high school seniors requiring assessment and the College's current practice of capping test sessions to 50 students, the College will offer assessment at some of the larger high schools for a second time. In addition, the College discovered the need to return to high schools for additional testing sessions in order to meet the needs of students who required an evening test session due to extracurricular activities. This year the College is testing at local private schools, starting as early as October (II.C.3-14). The High School Partnership Program has improved relationships with neighboring parochial schools (II.C.3-15).

A greater effort is also being made to bring the College assessment to the broader community. A small working group made up of SSSP staff and discipline experts in English, reading, ESL, and math, are preparing a list of community sites—such as libraries, Boys & Girls Clubs, and military stations—where the College can host regular assessment testing sessions (II.C.3-16).

As a pilot test college for the Common Assessment Initiative (CAI), the College looks forward to bringing the Common Assessment to the community. We believe the CAI platform will be adaptive, mobile, and better suited for off-campus testing than the current exams—CTEP, MDTP, and CELSA. CAI is discussed in more detail in II.C.7 (II.C.7-22).

Transfer Center

The Transfer Center provides equitable access to students through appointments, walk-ins, transfer-related workshops, computer application labs, transfer fairs, class visits, counselor call-backs, and counselor e-mail follow up through SCTCO (II.C.3-17). Students who meet with a counselor complete an academic plan (MAP). Counselors use their notes and documentation from appointments to facilitate continuity of services since, in many instances, the student will see more than one counselor in their community college career. Counselors who meet with the student after their Transfer Center appointment can use these notes, as can evaluators at the time of a given student's graduation/transfer. The Transfer Center has extended hours from Monday through Thursday to accommodate students who are unable to access services during the day (II.C.1-78). The Transfer Center invites representatives from four-year colleges to visit the College's campus in person or to meet virtually with potential transfer students; both of these methods provide access to students who may not have the means to travel to prospective transfer campuses. The Transfer Center offers tours to each of the three local transfer options including UC, CSU and private institutions. In addition, there are counselors available in the Transfer Center with language proficiency in Spanish and Farsi. With the new SEP-funded CLASE Transfer Mentor Program, the Transfer Center also provides a bilingual/Spanish transfer information program for new students and their parents; this is an effort to provide equitable access to a population who is disproportionately impacted at our campus in the area of transfer (II.C.3-18).

VETS

The offering of VETS on the Camp Pendleton Marine Corps Base and via phone and online is advertised on the program website and communicated to students in the VA Office. These services are also promoted at the School of Infantry Joint Education Center (II.C.3-19) (ER 15-48).

ANALYSIS AND EVALUATION

The College provides equitable, appropriate, comprehensive, and reliable information and services to students using multiple methods to assure access for all students. The quality, reliability, and accessibility of all College student services are reviewed through comprehensive program review, annual updates, as well as annual student learning outcomes assessment. When additional needs are identified, new methods are developed and made available to students.

II.C.4: Co-curricular programs and athletics programs are suited to the institution's mission and contribute to the social and cultural dimensions of the educational experience of its students. If the institution offers co-curricular or athletic programs, they are conducted with sound educational policy and standards of integrity. The institution has responsibility for the control of these programs, including their finances.

EVIDENCE OF MEETING THE STANDARD

The College offers a wide variety of co-curricular and athletic programs that align with the College mission and provide expanded social, cultural, and educational activities for students. To ensure they meet College standards, all academic and student service programs—including ASG, athletics, and fine arts programs—are reviewed through the College PR/AUR process in the same manner.

Student Development

The Student Development Office's primary goal is to support student leadership and personal growth through the following: Campus Life activities, the Leadership Lab, Associated Student Government (ASG), and student clubs. The ASG participates in a student-driven leadership program that is an integral part of campus life and shared governance. ASG, in partnership with the staff of Student Development, is responsible for administering the annual ASG student elections and the SOCCCD Student Trustee Election (II.C.4-01).

All co-curricular activities adhere to state regulations as well as District policies and procedures (II.C.4-02). These include California Education Code and California Community College regulations governing eligibility to hold a student government office as well as board policies related to ASG organization, election of officers and student trustees, free speech, use of facilities, and student appointment to college committees (II.C.4-03).

ASG strives to meet the diverse needs of the student population by supporting student clubs and organizations on campus through the Inter-Club Council (II.C.4-04; II.C.4-05). In spring 2016, there were 40 recognized clubs covering a wide range of student interests. These clubs include Anime, Business, Gay Straight Alliance, Meditation and Mindfulness Realization, and Psi Beta and Psychology clubs (II.C.4-06). Students interested in forming a club must complete a Club Activation Form which includes acknowledgement the club will create and abide by a constitution and set of bylaws (II.C.4-07; II.C.4-08). All clubs must go through a short orientation as well as additional training in order to host off campus events, fundraise, and expend funds. All club applications are reviewed and approved by Student Development and ASG. These policies are designed to ensure the integrity of all co-curricular activities.

ASG sponsors events and programs that speak to students' interests and needs. Examples include the International and Diversity Student Council (IDSC), Taste of Saddleback, Red Cross Blood Drives, veteran student events, and a water fountain renovation campaign (II.C.4-09). Through the Campus Life Activities arm of Student Development, there are many activities and events available to students that foster campus engagement. These activities include the Game Lounge, weekly ping pong tournaments, free Moonlight Movie Nights, and monthly food trucks (II.C.4-10). The Leadership Lab, also overseen by the Student Development Office, offers a variety of workshops and live events—such as public viewings of Ted Talks on Tuesdays—created with the goal of building within our students a robust sense of leadership as

well as professional and personal development (II.C.4-11). The Leadership Lab provides workshops including Stress and Anxiety Relief, Franklin Covey's 7 Habits of Highly Successful College Students, Understanding and Practicing Growth Mindset, The Power of Motivation, and How to Make the Most of Your Twenties. ASG works collaboratively with faculty, departments, and divisions by providing funding opportunities for educational activities, such as guest speaker series and conferences fees. ASG Grant Assistance has funded specific activities including Day of Silence, Ability Awareness Week, International Film Festival, NSNA Convention, Science Lecture Series, Cheerleading Training Camp, Transfer Day, Women's Conference, Math Triathlon, and VETS Resource Fair (II.C.4-12).

ASG is funded through a share of the College bookstore sales, cafeteria/vending sales, and Associated Student Body (ASB) \$10 activity sticker sales. ASG's finances are governed under board policy 5420. In 2015-2016, 60 percent of the operating budget was comprised of on-campus service contract revenue and the remaining 40 percent of the budget was derived from the sale of ASB activity stickers (II.C.4-13).

Athletics

The College's athletic programs are housed within the Kinesiology and Athletics Division with direct supervision and oversight by the athletic director/dean of kinesiology and athletics (II.C.4-14; II.C.4-15). Each sport program is offered as a for-credit educational course (II.C.4-16). Athletics has two financial sources: 1) an allocation from the College's general fund operating budget, 2) team fundraising (III.X.X-X; II.C.4-17). The College provides the budget for athletics, which includes allocations for transportation, equipment, meals, and officiating fees. Fundraising by each individual sport helps with additional supplies and other costs. The Kinesiology and Athletics Division also actively reviews its PR annually in preparation of the alignment of its annual resource allocation requests for additional funding for the program (II.C.4-18).

The College currently offers twenty intercollegiate sports programs throughout the academic year (II.C.4-19):

- Baseball
- Basketball, Men's and Women's
- Beach Volleyball, Women's
- Cross Country, Men's and Women's
- Football
- Golf, Men's and Women's
- Soccer, Women's
- Softball
- Swimming & Diving, Men's and Women's
- Tennis, Men's and Women's
- Track & Field, Men's and Women's
- Volleyball, Women's
- Water Polo, Men's and Women's

The sports programs adhere to the sport codes, policies, procedures, and bylaws established and administered by the California Community College Athletic Association (CCCCAA), the SOCCCD Board of Trustees (BP 5230), State Education Code Section 67360-67365, and Federal Register of Title IX (II.C.4-20). The CCCAA maintains general oversight of all athletic sport programs in the California Community College System. Annual gender equity and financial reports are submitted to the U.S. Department of Education (Equity in Athletics Disclosure Act) and to the CCCAA to provide statistics and information to the public. These reports are submitted in October and are inclusive of the prior year's activity within the program (II.C.4-21).

The CCCAA constitution, articles, and bylaws govern the integrity of student athletes. Student athletes must also follow specific rules and regulations as set forth by the CCCAA, including academic policies and integrity. All freshman athletes must be enrolled in 12 units during their season of participation. Of these 12 units, nine must be academic. Before playing their second season of competition, sophomore athletes must have passed 24 units, 18 of which must be academic, with a minimum GPA of 2.0 (II.C.4-22). The CCCAA requires all staff who are directly involved with athletics—from the athletic director (AD) to the head and assistant coaches—to complete an annual exam regarding compliance with CCCAA articles and bylaws, and they must earn a minimum score of 80 percent.

Division of Fine Arts and Media Technology

The Division of Fine Arts and Media Technology offers a large number of co-curricular activities throughout the year geared toward providing students an opportunity to receive college credit while also receiving real-world experience. The division provides activities which include cinema and television production, art gallery shows, music performance, theatre performances, speech and debate team competition, and photography displays. The division plays a vital role in adding a social and cultural dimension, not only to the College, but to the community as a whole (II.C.4-23).

The Department of Theatre Arts produces several diverse performances each fall and spring semester (II.C.4-24). In addition, the department has the strong Summer of Theatre program. During summer 2016, the program performed *Beauty and the Beast* and *Little Shop of Horrors* (II.C.4-26). The College also participates in the Kennedy Center American College Theater Festival. These co-curricular programs offer students and community members the opportunity to participate in and attend performances and productions. The Theatre Arts Department serves as an educational base, a vocational training ground, and an artistic resource for students and the community, and is a leader in performing arts in Orange County.

The Cinema program has been part of the College for more than 25 years and provides students "real world"/hands-on experience (II.C.4-27). The program submits productions each year to the Newport Beach Film Festival, where the students have the ability to expand their impact to a broader audience (II.C.4-28). Additionally, students participate in the radio stations KSBR and OC Rock internet radio as well as Channel 39, a local television channel (II.C.4-29; II.C.4-30).

The Music Department has a comprehensive program and many co-curricular programs, such as concerts and recitals (II.C.4-31). These programs offer students and community members the opportunity to perform and/or enjoy music by students and professionals. The department has several performance groups made up of students, community members, and professional musicians, including Big Band, Concert Choir and Contemporary Vocal Ensemble, Jazz Lab

Ensemble, Keyboard, Symphony Orchestra, and Wind Ensemble (II.C.4-32). Many of these groups will have the opportunity to perform with a nationally known artist.

One Book, One College

In spring 2016, the College held its first annual One Book, One College—a reading program designed to promote discussion and understanding of the broader issues we face, both locally and globally (II.C.4-33). The One Book, One College Committee selected the novel *Fives and Twenty-Fives* to be read across the campus by students, faculty, staff, and administrators throughout the semester. Many faculty across disciplines chose to integrate the book into their courses. A robust series of community events were offered on campus related to the novel, including panel discussions, film showings, book readings, fine art exhibits, and artistic performances. The semester-long program culminated in a campus visit by the author, Michael Pitre, which was attended by over 400 students, faculty, staff, administrators, and community members (II.C.4-34).

This pilot project was funded by the College's general fund and a grant from the Associated Student Government. The College Foundation also created an account for the One Book, One College program, to which community members may contribute donations. Given the highly successful turnout of the program, the One Book, One College Committee is looking to institutionalize funding in order to continue the program annually. Funding requests for the program have been included in the College's resource allocation process (II.C.4-35).

ANALYSIS AND EVALUATION

Co-curricular and athletics programs offered at the College are appropriately aligned with the institutional mission and provide cultural and social experiences for students and the community at large. The programs are designed and offered to complement and enhance the educational experience of the students who participate. These opportunities play a vital role in connecting students to the campus community; this connection being a critical component in student success. These programs reflect the interests of students as well as those of local and surrounding communities.

II.C.5 The institution provides counseling and/or academic advising programs to support student development and success and prepares faculty and other personnel responsible for the advising function. Counseling and advising programs orient students to ensure they understand the requirements related to their programs of study and receive timely, useful, and accurate information about relevant academic requirements, including graduation and transfer policies.

EVIDENCE OF MEETING THE STANDARD

The College is committed to supporting student development and success by providing counseling and academic advising programs to orient students and ensure that they understand their program of study requirements. These programs also ensure that students receive timely, useful, and accurate information including graduation and transfer policies. Through the replacement of the Matriculation process with the new SSSP (II.C.1-74), the College has examined all processes and materials related to student progress from application to completion.

Virtual counseling services are available and accessible to all students from any location. To meet the needs of students who are not in the area, the College relies heavily on phone calls for academic and other counseling services. An increased number of counselors are using technologies such as Zoom to communicate with students. For out-of-area students, there is a need for a more standardized approach to student support. Currently, the Counseling Division is looking into a universal counseling platform for counseling services. The platform in use for this pilot is Cranium Café (II.C.5-01). The evaluation of services in Counseling for online students relies mostly on anecdotal evidence and reflective discussions amongst counselors. Some of the challenges with standardization have to do with the fact that Counseling has had three administrators within the past year.

Counseling Services

The Counseling Services Division provides academic, career, and personal counseling to support student development and success. The mission of the College's Counseling Division is to “provide current and prospective students with the counseling and instruction necessary to successfully reach their academic, career, and personal goals.” Counselors instruct counseling classes and well as conduct individual appointments, walk-in appointments, group counseling/advisement, workshops, and online advisement (II.C.1-32).

The College prepares counselors to be effective in academic, personal and career counseling. All counselors attend a weekly articulation meeting for critical academic updates and training regarding transfer policies. All new, part-time faculty receive one hour of training per week with a full-time counselor for the first semester of their employment at the College. In addition, a Friday training institute was created in 2015 to continually train part-time counseling faculty (II.C.5-02). The Counseling Division has a Crisis Intervention Team that works collaboratively with the Student Health Center and campus police to provide updates, in compliance with all related laws, about personal counseling practices and responding to students in crisis (II.C.1-71).

In addition, counselors are highly trained in MAP—an online academic planning tool utilized by all counselors in all departments of student services, which interfaces with ASSIST.org. Any counselor in any department of student services can view student academic plans. This connectivity allows for more accuracy and continuity in information dispersed to students by

counselors. MAP ensures that students understand requirements related to their programs and academic goals. Students are able to access MAP remotely and are given the tools to understand, to read, and even create their own academic plans. Students are encouraged to have all plans reviewed regularly by a College counselor. Usage of MAP has grown dramatically in the past few years, enabling students to feel more confident about graduation and transfer policies. Since fall 2012, a total of 19,368 comprehensive academic plans have been completed using MAP (II.C.5-03). Over that same period of time, College students have created tens of thousands of additional MAPs.

Another way the Counseling Services Division has supported student development and success is through partnership with AVID for Higher Education. AVID was incorporated into freshman seminar courses (Counseling 140), and instructors for these courses collaborate with other faculty and support programs on campus to ensure student development and success. Since the inception of AVID at the College, AVID experts have trained counselors, tutors, and faculty across the campus in AVID's high engagement teaching and learning strategies. AVID for Higher Education is a model for student support and demonstrates the Counseling Services Division's dedication to providing comprehensive, timely, useful, and accurate information. According to the AVID for Higher Education Site Level Student Survey results: In fall 2014 and 2015, a research study conducted by Gibson Consulting Group (II.C.5-04), showed that those students who took courses taught using AVID strategies displayed higher percentages of retention of course content, skills and confidence, and connection to peers and the college when compared to those students who took non-AVID courses. Analogous results were found between fall 2014 and 2015. (II.C.5-05)

Simply stated, students in sections with higher degrees of student-centered pedagogy and skill-building activities/content were significantly more likely to feel that the course 1) improved their skills and 2) confidence that they will be successful in college. This information implies that instruction emphasizing research-based, student-centered pedagogy matters and resonates with college freshmen (II.C.5-06). Furthermore, when AVID-based content and pedagogy are present and students' confidence levels are higher, students are more likely to make meaningful connections to other students in their classes; indicate a willingness to lead or participate in peer study groups; visit their professors during office hours; and make use of the campus tutoring centers; behaviors which all indicate higher attachment to the college or university.

Disabled Students Programs and Services

Disabled Student Programs and Services (DSPS) provides academic, career, personal, and disability management counseling to support student development and success. DSPS is committed to providing quality support services and specialized instruction, which enable students with verified disabilities to access and participate in all programs at the College (II.C.1-42).

DSPS counselors conduct individual counseling appointments, drop-in appointments, and workshops (II.C.5-07). Special Services classes provide resources for strategies and success.

Newly hired DSPS counselors are trained intradepartmentally in the process for verifying disabilities, providing appropriate education accommodations, and understanding Title 5 regulations (II.C.5-08). All DSPS counselors attend articulation meetings for critical academic updates and training regarding transfer policies, MAP, as well as on-going professional

development opportunities. Additionally, all DSPS counselors and learning disability specialists attend weekly meetings for discussion of student concerns as well as department updates, etc.

DSPS students participate in the College's application and enrollment process and receive current and up-to-date information regarding transfer. All DSPS students can access DSPS counselors for academic planning as well as support for academic and disability-related challenges.

EOPS/CARE and CalWORKs

The EOPS/CARE and CalWORKs Program provide academic, career, and personal counseling to support student development and success. The Extended Opportunity Program and Services (EOPS) at the College is committed to the success and retention of college students. The EOPS Program is designed to assist students from educationally and socioeconomically disadvantaged backgrounds: "The goals of the EOPS Program are to prepare students to transfer to four-year universities, complete an Associate Degree or achieve a vocational certificate (II.C.1-51)."

All EOPS students complete a Comprehensive Educational Plan during their initial semester of the program. This Comprehensive Educational Plan is important to the EOPS/CARE students and includes a long-term sequence of courses to be taken and a specific timeframe for course completion. This plan is not just a list of standard course requirement. The plan is approved, with a signature, by both the counselors and the student. Furthermore, the EOPS/CARE and CalWORKs Program require that all counseling session be documented. This documentation is done through the new Student Informational System (SIS) (II.C.5-10).

EOPS counselors are highly trained in assisting students from educationally and socioeconomically disadvantaged backgrounds. In addition to the requirements of a general counselor, according to Educational Code 56264, EOPS counselors must have also completed a minimum of nine semester units of college course work predominantly relating to ethnic minorities or persons handicapped by language, social, or economic disadvantages (II.C-5-11).

All counselors attend a weekly articulation meeting for critical academic updates and training regarding transfer policies. All new, part-time counselors begin with one full week of shadowing other EOPS/CARE and CalWORKs part-time counselors to assure that they are trained in the College's EOPS/CARE and CalWORKs policies and procedures. Part-time counselors are also highly encouraged to attend Friday institute counseling training.

In addition, EOPS/CARE and CalWORKs counselors attend CSU, UC, and private university counselors conferences to stay abreast of any changes that are occurring in the universities' admissions policies or articulation agreements. Counselors also attend an annual EOPS conference to assure that they stay up-to-date with any changes that are occurring with EOPS/CARE across the state. All EOPS/CARE counselors are highly trained in the use of MAP. EOPS/CARE and CalWORKs students review their MAP regularly with their EOPS/CARE counselor.

Once admitted into the EOPS/CARE and CalWORKs programs students participate in mandatory EOPS/CARE and CalWORKs orientation (II.C.5-12). Students are familiarized with the EOPS/CARE Program policies and procedures; eligibility; the location and functions of the College and EOPS programs and services; the College Catalog; the application and registration

process, with emphasis on academic and grading standards; college terminology; and course add and drop procedures and related rules.

Student Success and Support Programs (SSSP)

Under the direction of the Dean of Counseling Services, counseling appointments increased from 30 minutes to 1 hour. This additional time allows counselors to address the needs of students from a more holistic approach (II.C.5-13). In addition, Four full-time counselors were hired effective fall 2015, and SSSP is proposing to hire an additional three full-time counselors with preference for the ability to provide counseling services in Farsi and Spanish (II.C.5-14).

To maximize the number of available hours for students, part-time counselors are scheduled to work at their maximum allowable hours. Also, in an effort to maximize office space, counselors will be assigned to provide counseling appointments in instructional divisions and departments throughout the campus. Online counseling is available to students, using Zoom software and e-SARS, and additional online modalities are being explored (II.C.5-15). Counselors are mobile and provide services in high traffic areas, such as the Learning Resource Center and Library and the campus quad.

In an effort to help students make more informed decisions regarding withdrawal, the Talk Before You Drop counseling campaign has scheduled information booths across campus several weeks before the final class drop date (II.C.5-16). MAP Workshops are held each semester; students nearing the criteria for a Comprehensive Plan hold are sent a digital reminder to complete a MAP using Sherpa technology (II.C.5-17). High school seniors participating in Freshman Advantage Fridays receive targeted in-person advisement (II.C.5-18).

Categorical programs provide ongoing, targeted advisement for students participating in DSPS, EOPS, CalWORKs, and S.T.E.P.S. Veteran students also receive additional targeted counseling.

The steps being taken to increase the utilization of advisement includes intrusive advising, where counselors and student success mentors contact students in a variety of ways: Sherpa nudge emails, e-alerts through the student's college portal, text messages, and even phone calls. The new Student Success Dashboard, partially funded with SSSP funds, will be an improved student portal; each time a student logs in to their portal, they will see where they stand toward SSSP services completion, their units earned, their GPA, prerequisites, and how close they are to completing their intended educational goal (II.C.5-19).

Additional Counseling Services include:

- 60-minute counseling appointments
- Walk-in counseling appointments daily, 8:00 a.m. to 6:45 p.m.
- Online counseling appointments
- Weekly MAP Workshops
- Weekly small group, in-person advisement sessions (provided Saturdays, too)
- Spring semester Freshman Advantage Fridays (22 sessions)
- Week of Workshops (WOW) in August and January for students seeking to enroll last minute for the upcoming semester
- Mobile counseling in divisions, departments, the cafeteria, library, and student quad.

- College counseling appointments at local, feeder high schools in the spring semester, scheduled after the Counseling 100 class.

The probation process at the College consists of intrusive, direct counselor-student contact. In addition, a PB hold is placed on registration for students identified on first-time probation (II.C.5-20). To remove the PB hold, students are required to attend a 90-minute Probation Workshop (II.C.5-21). The workshop helps students identify strategies for improving their academic standing and develop plans for getting off of probation.

The Probation Workshop objectives are as follows:

1. Define and clarify academic policy in regards to academic probation and progress probation.
2. Identify issues students experience that lead to a lack of academic success.
3. Create strategies that allow students to improve their academic standing.
4. Identify campus resources available to help students stay off probation.

A new proactive process to be implemented in the 2015-2016 academic year will send email messages to students with GPAs between 2.0-2.2 (II.C.5-22). These messages will inform students of the consequences of falling below a 2.0 GPA and provide information on various student success resources (the LRC and other support centers) on campus.

District research monitors an ongoing probation report on College students (II.C.5-23). Using a student identification number, students' progress can be monitored as they work their way off of academic and progress probation.

Students are placed on dismissal after three consecutive semesters (not including summer) of probation (II.C.5-24). Students who are dismissed must take leave for a semester before they are able to submit an appeal for readmission. Once these students return, they are required to meet with a counselor and draft a plan for re-applying. The Academic Appeals Committee meets weekly to review each of the appeals. This committee is led by the dean of admissions, records and enrollment services and the dean of counseling, and is composed of both counseling faculty and instructional faculty.

Transfer Center

Counseling in the Transfer Center is conducted by the transfer center coordinator/counselor and by part-time counselors who are generally trained in counseling as well as specifically trained in (II.C.5-25):

1. Counseling related to transfer
2. Counseling related to the Honors Program
3. Grant-specific counseling for the Bridge to Engineering and Teacher Preparation Pipeline programs

The information provided to students and the policies the Tutoring Center interprets are dynamic and dependent upon a given student's transfer goals and transfer campus. In many cases, the

College's students apply broadly to many campuses and systems, a method which increases their chances for admittance. For this reason, counselors in the Transfer Center must stay abreast of CSU, UC, out-of-state, and private institution admission, application, testing, general education, and major requirements. With the assistance of the articulation officer, the counselors stay abreast of articulation agreements in order to appropriately advise students.

The coordinator/counselor meets weekly with the staff and counselors of the Transfer Center for training and updates (II.C.5-26). The coordinator/counselor also participates in monthly Region 8, Transfer Center, and Articulation meetings (II.C.5-27). These meetings provide updates from Region 8 universities including CSU, Fullerton; CSU, Long Beach; Cal Poly Pomona; and UC Irvine. This information is distributed to the counselors in the Transfer Center via weekly meetings and to counselors across campus through a weekly e-newsletter, *TC Weekly News*. The coordinator/counselor also participates in annual meetings with USC, UCLA and UCI and disperses information through training sessions, meetings and newsletters (II.C.5-28).

Transfer Center counselors are encouraged to participate in, and have funding available to attend, the annual CSU Counselor Conference, the UC Counselor Conference, the UC Ensuring Transfer Success Conference as well as other campus-specific conferences, such as the CSULB Counselors' Conference and the annual USC Counselor Conference. Transfer Center counselors also take students on tours of local campuses which provide first-hand experiences to share with other students.

New counselors are mentored by 1:1 training with the coordinator/counselor, during which they observe a more experienced counselor during appointments and are then shadowed by a more experienced counselor or the coordinator/counselor until they have a solid understanding of their role and functions. The coordinator/counselor also seeks out training opportunities—such as webinars, reading materials and websites—for counselors to maintain their knowledge and keep current on transfer issues.

Counselors in the Transfer Center attend a weekly articulation meeting for academic updates critical to their roles. In addition, they participate in a monthly Counselor Forum with their peers in the Transfer Center to review any difficult counseling issues, to discuss these issues, and provide resolution and sharing of knowledge (II.C.5-29). Because all counselors cannot attend every professional development opportunity related to transfer, this time is also used for information sharing related to conference attendance, college tours, and webinar participation.

Students are oriented to transfer by participation in transfer workshops and through counseling appointments. Students are also invited to transfer fairs hosted on campus so they can meet with representatives from California, out-of-state, and international colleges. When students are ready to apply for transfer, they are invited to one of several CSU/UC Open Labs offered in the fall semester. At the open labs, students sit at a computer and work on their applications while counselors assist them with any questions, review their applications, and give them resources for their next steps in the process. These next steps include petitioning for degrees and certificates as well as planning for graduation and commencement ceremonies. After the filing period ends, the coordinator/counselor receives names of students who applied for a CSU Associate Degree for Transfer (ADT) and these names are placed into a Sherpa Profile

by the senior transfer center specialist. The coordinator also receives the names of students who applied to a UC campus and gave permission to participate in a UC data sharing project. These students are also placed into a Sherpa Profile. The CSU-ADT students and the UC applicants are provided with timely and accurate information through Sherpa nudges for events and programs related to their transfer goals. They are also sent reminders about deadlines related to transfer, such as their deadlines to submit supplemental applications, apply for housing, and make their deposits.

VETS

The VETS Program provides support services and acts as a bridge to external support services for student veterans, active military personnel, and their loved ones. VETS Program services include, but are not limited to: new student guidance, veteran counseling, scholarship and financial aid assistance, a link to the Veterans Student Council, Veterans Outreach, a venue for community-building, and more (II.C.1-90). The VETS Program hosts events aimed at reintegration into civilian and college life. The program has also developed counseling and other support services in an online format based on individual student need. Adjustments and modifications are made often to ensure that student veterans receive timely and accurate online support wherever they may reside.

ANALYSIS AND EVALUATION

The College provides comprehensive services at each step of the students' progress toward their academic goals. Counselors and advisors meet regularly to keep updated on academic requirements, graduation/transfer policies, and other training to ensure student success.

DRAFT

II.C.6 The institution has adopted and adheres to admission policies consistent with its mission that specify the qualifications of students appropriate for its programs. The institution defines and advises students on clear pathways to complete degrees, certificates, and transfer goals.

EVIDENCE OF MEETING THE STANDARD

The College follows practices that are consistent with the District admission policy BP 5604, Admissions, approved by the Board of Trustees, and consistent to the mission of the College (II.C.6-01; I.A.1-01) (ER 16-05). This policy ensures that, unless specifically exempted by statute or regulation, every course is fully open to enrollment and participation by any person who has been admitted to the College. The College Catalog, available online, outlines admissions criteria (II.C.1-03; II.C.1-05; II.C.6-02; II.C.6-03; II.C.6-04; II.C.6-05) (ER 16-06; ER 16-07; ER 16-08; ER 16-09).

Special admissions criteria are available for high school students and international students. Also, the College website and Catalog outline specific admissions criteria for vocational programs requiring special preparation, such as health occupations. The Associate of Science in Nursing Degree is an example of a program with specific admissions criteria. Special admissions criteria for this program can be found online and in the College Catalog (II.C.6-06) (ER 16-10).

Counseling Services

Counselors assist students in selecting clear pathways to complete degrees, certificates, and transfer goals through MAP. MAP enables students and counselors from all areas of the College—general counseling, DSPS, EOPS, VETS, Transfer, as well as college evaluators—to view the same academic plan. This ensures continuity of information. Students are able to access MAP online at any time, allowing DE students to stay as informed of their educational goals as traditional, in-person students. MAP provides a structure for all students, even those who are undecided about their majors, to begin working toward their academic goals. Undecided major workshops, career/personal counseling, and additional forms of support assist students who have not yet chosen a major (II.C.6-07; II.C.1-27).

Disabled Students Programs and Services

DSPS counselors assist students in selecting pathways to complete degrees, certificates, and transfer goals. These counselors utilize a variety of resources which include MAP, assessment and development of employment skills, and opportunities for disabled students with academic challenges to consider a variety of exit points that may include noncredit pathways. (II.C.6-08).

EOPS/CARE and CalWORKs

Using My Academic Plan (MAP), EOPS/CARE and CalWORKs counselors assist students in selecting pathways to complete degrees, certificates, and transfer goals. All possible pathways are communicated to a given student during their counseling appointment and then transferred onto the student's MAP (II.C.6-09).

Transfer Center

Counselors in the Transfer Center help students to choose their transfer pathway using ASSIST, MAP and four-year institution websites. Counselors encourage students to complete an AA, AS, AAT or AST degree and CSU, GE or IGETC Certification (as appropriate) prior to transfer and show students how they can best utilize the courses they have already taken toward earning a

degree. This is done through appointments and walk-ins as well as advising tools such as MAP, Associate Degree for Transfer worksheets, and the UC Transfer Pathways website. The College currently offers 19 Associate Degrees for Transfer, and faculty are developing more (II.C.6-10; II.C.6-11; II.C.6-12; II.C.6-13; II.C.6-14; II.C.6-15).

Additional Pathways

The College is actively involved in creating pathways for students whose goals include a degree, certificate, and/or transfer. The College works on and off campus with students to help them meet their goals. Students are provided information about each program in various ways including, print, online, and face-to-face communication.

CTE Pathways

The College provides disclosure information for each of its state-approved Career Technical Education (CTE) certificates. The College offers 100 certificates of achievement in 34 program areas. Current and prospective students will find information about the careers for which each certificate provides training on program webpages and on the College website, a site which also includes Gainful Employment Disclosure Statements and course requirements (II.C.6-16; II.C.6-17; II.C.6-18).

In 2014, the California Department of Education awarded Orange County Career Pathways partnership (OCCPP) a 15 million dollar California Career Pathways Trust grant. This grant will focus on three primary industry sectors: advanced manufacturing/engineering, healthcare/biotechnology, and information/communication technology/digital media. OCCPP is led by the College and the Orange County Department of Education (OCDE) and is the first countywide consortium to include fifteen Orange County school districts, nine community colleges, UCI, CSUF, regional occupational programs, workforce investment boards, Vital Link, and over 100 business and industry partners. In December 2015, the inaugural OC Pathways Showcase took place, bringing together high school students, college students, and industry to display the regional collaboration and progress in pathway alignment. The State of California is looking at OCCPP as a possible regional curriculum model for the rest of the state (II.C.6-19; II.C.6-20).

CTE Transition

CTE Transitions is a program designed to connect several educational organizations by means of formal articulation agreements. The Carl D. Perkins Career Technical Education Improvement Act (Perkins IV) funds CTE Transitions at the College. The program allows high school and regional occupation program (ROP) students to take college-level courses that articulate with the College. Once the student transfers to the College, they will not be required to repeat courses that have been articulated. Currently, there are 119 articulation agreements, which cover 18 different subject areas, in our regional high schools. Starting in fall 2016, the Career and Technology Education Management Application (CATEMA) system will track students from high school to college or to the workforce. CATEMA provides a web-based program that can track enrollment, student completion, and employment outcomes. Initially, the funding for CATEMA will be made possible by the California State Chancellor's Office (II.C.6-21; II.C.6-22; II.C.6-23).

K-12 Outreach

The College has expanded outreach activities to all high schools in the area, and has created partnerships with Capistrano Unified School District (CUSD), Saddleback Valley Unified

School District (SVUSD), and Laguna Beach Unified School District (LBUSD) (II.C.6-24). The focus on high school partnerships began in 2009 with the creation of the outreach and recruitment position. By 2011, the College had begun developing the High School Partnership Program (HSPP), and in 2013 the College signed a memorandum of understanding with the CUSD and SVUSD (II.C.6-25; II.C.6-26; II.C.6-27; II.C.6-28; II.C.6-29). The HSPP seeks to improve postsecondary performance and increase enrollments by establishing a 360-degree partnership between the College, students, parents/guardians, and high schools that will help students prepare for success after high school. In support of the HSPP, the College participates in the High School Partnership Counsel where all public high schools in South Orange County meet monthly to discuss current issues (II.C.6-30).

Adult Education

Adult Education provides educational opportunities and services to guide adults toward a better quality of life (II.C.6-31). After the passage of AB86, and a year-long assessment, the College, in partnership with SVUSD, took on the administrative role of Adult Education courses in noncredit ESL, citizenship, and high school equivalency (HSE), and noncredit pathways to Career and Technical Education (CTE) (II.C.6-32; II.C.6-33). At that time, the District received \$388,469 to help create the AB 86 South Orange County Regional Consortium, which includes the following colleges and school districts: Saddleback College, Irvine Valley College, Capistrano Unified School District, Saddleback Valley Unified School District, Laguna Beach Unified School District, Irvine Unified School District, and Tustin Unified School District. The consortium has developed working relationships with regional occupational programs/centers, local workforce investment boards, library literacy programs, Orange County Job Corps, and Orange County Department of Education. Many of the courses offered through the Adult Education program will lead a given student on their path to the College (II.C.6-34; II.C.6-35).

English Professional Learning Council

The English Professional Learning Council (PLC) began an intersegmental program in 2010 by reaching out to colleagues who teach English in area high schools, aligning curriculum, sharing teaching strategies, and working to better prepare high school students for a successful experience at the College. The 2015-2016 PLC project placed the College's English instructors in high school English classes, where they discussed the College's curriculum, matriculation process, and support services designed to assist students in their academic and career pathways (II.C.6-36; II.C.6-37; II.C.6-38; II.C.6-39; II.C.6-40).

Economic and Workforce Development (EWD)

The Economic and Workforce Development and Business Science Division prepares its students for employment, career advancement, and continuing education opportunities in accounting, business, computer applications, computer information systems, and real estate (II.C.6-41).

As a result of the changes in Economic and Workforce Development (EWD) over the last decade, the College has made a concerted effort to evaluate its role in the region vis-à-vis technological advances, globalization of markets, and demographic changes. A taskforce comprised of faculty, staff, management, and community developed the College's *Economic and Workforce Development Plan 2015-2020* (II.C.6-42). The EWD Plan links CTE programs and other services throughout the College to the economic well-being of the community. To lead the EWD efforts in 2015, the College hired a new dean of economic and workforce development and

business science, dean of advanced technology and applied science, and director of economic and workforce development.

The EWD Plan is organized around three themes: 1) student success, 2) community connection, and 3) regional leadership. One of the guiding principles for this EWD Plan and the College's EWD program is that "Saddleback students and graduates will be desired by employers in the region." The EWD program will assist students to identify career interests and goals, select a career pathway, and successfully complete a program of study leading to employment and/or higher degree (II.C.6-43).

Pathway to Law School 2+2+3

The College is one of 28 California Community Colleges selected to participate in a new initiative with the State Bar of California and the UC Regents. This initiative will provide students a pathway to six of California's most prestigious undergraduate universities and their affiliated law schools. The first group of students entered the program during fall 2016 (II.C.6-44).

The Community College Pathway to Law School 2+2+3 Initiative (CCPLSI) is an unprecedented program created to enhance opportunities and advancement in the legal profession for diverse populations, particularly those populations that have been traditionally underrepresented in the legal profession. All students are welcome to apply and first-generation college students, veterans, underrepresented student populations and other nontraditional students interested in learning more about careers in the legal field are encouraged to participate. Pathway to Law School Scholars will spend two years at the College while completing their general education requirements and the CCPTLS core curriculum. They will then receive special recognition for transfer to one of the participating undergraduate institutions to complete their bachelor's degree and again when they apply to a participating law school.

The following are participating undergraduate institutions and affiliated law schools: Loyola Marymount University and LMU School of Law, Santa Clara University and Santa Clara School of Law, UC Davis and King Hall (Davis) School of Law, UC Irvine and UCI School of Law, University of San Francisco and USF School of Law, and University of Southern California and USC Gould School of Law (II.C.6-45).

The program benefits include:

- Individual counseling and mentoring, including financial aid counseling
- Exposure to careers in law, service learning, job shadowing, internships and more
- Networking and learning opportunities, state-wide conference attendance
- Saddleback College Pre-Law Society and related events
- Academic and LSAT prep support
- Support of the Law School Admissions Council and DiscoverLaw.org
- Special recognition admissions review at participating undergraduate institutions and affiliated law schools
- Law school application fee waivers

Teacher Preparation Pipeline

The Teacher Preparation Pipeline (TPP) is a grant-funded program that identifies future teachers and gives them an opportunity to start their career pathway to teaching at the community college level. This program is designed to support students that are interested in K-12 education with a focus on STEM and CTE teaching. TPP students also have opportunities to participate in class observations, hear teaching related speakers during the What's Up Wednesday program, volunteer in elementary school classrooms, participate in STEM-related internships, and attend teaching conferences off campus (II.C.6-46; II.C.6-47; II.C.6-48).

TPP students receive support in the following areas:

- Academic transfer counseling specifically for teaching pathways
- Assistance with volunteer or internship placement
- Transportation to teaching conferences, university campus tours, and science-related programs

Health Science and Human Services

The Division of Health Science and Human Services at the College is a model of CTE programming, student success, and EWD working together to provide students career opportunities. Faculty mentors advise students on pathways to certificates, degrees, or transfer. The division has created several pathways to ready students for high-demand jobs (II.C.6-49).

In 2013, the College was awarded a \$2.75 million Trade Adjustment Assistance Community College and Career Training Program (TAACCCT) grant funded by the United States Department of Labor (II.C.6-50). The grant's primary goal is to enhance current allied health career training programs and develop new programs in response to the changing health care industry. Through this grant, the division has focused on creating pathways to high-skilled and high paying jobs in the following areas:

- Health Care Career Transitions – Fast Track to Success
- Health Information Technology
- Medical Assistant
- Medical Lab Technician
- Transition programs: RN to BSN, HIT

Health Information Technology (HIT)

The HIT Program incorporates the disciplines of medicine, management, finance, information technology, and law into one curriculum. Due to this unique mixture, HIT graduates can choose from a variety of work settings across an array of healthcare environments. This program was developed to meet changing and growing demands in the health care industry (II.C.6-51).

In 2009, the Health Information Technology for Economic and Clinical Health Act (HITECH) was signed into law. The goal of this new law was to improve healthcare delivery and patient care through Health Information Technology, an online environment. This law caused rapid change in the field and created a void of qualified employees. As a result, in 2010, the College

applied for, and received, a \$378,000 American Recovery and Reinvestment Act of 2009, Health Information Technology Extension Program grant to create and offer an AS degree in Health Information Technology as an extension to the Medical Assistant (MA) Program (II.C.6-52). Initially the HIT Program was a part of the Medical Assistant Program and required 56 units to complete. However, in 2014, the HIT Program became a standalone program and reduced the total number of required units to 46 (II.C.6-53). The HIT program entered accreditation candidacy status with the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM) in March 2013, and the program received their accreditation from CAHIIM in October 2015 (II.C.6-54).

Medical Assistant

The Medical Assistant Program prepares students for employment in a physician's office or clinic, insurance billing departments, hospitals or other health care facilities. The curriculum has four tracks or pathways. These pathways include: the 15-unit Occupational Skills Award in Medical Insurance Billing, the 29 Unit Clinical Medical Assistant Certificate Program, the 31.5 Unit Administrative Medical Assistant Certificate Program and finally the 45 Unit Comprehensive Medical Assistant Certificate. The curriculum is designed to provide training in administrative (front office) and clinical (back office) medical assisting skills. Instruction is given in basic medical office procedures (including appointment scheduling, billing, and insurance), assisting with examinations, surgical and laboratory procedures (including venipuncture, pharmacology, and injections), electrocardiography, electronic health records, public relations, supervision, and practice-building techniques. A clinical externship helps provide students the opportunity to apply the skills necessary to enter this field (II.C.6-55).

Human Services (Division of Health Sciences and Human Services)

Human Services provides certificate of achievement awards in four career pathway areas and offers an Occupational Skills Award for Eating Disorders Studies. These programs are designed to educate and train students for careers in the treatment of substance use disorders, mental health, and the social services fields. All programs can lead to an associate degree and/or certificate of achievement (II.C.6-56).

The Alcohol and Drug Studies certificate program is accredited by the California Association for Alcohol/Drug Educators (CAADE). Students who complete the Alcohol and Drug Studies track are prepared and eligible to sit for the CATC exam to become a certified alcohol and drug treatment counselor. This certification is required by the State of California for individuals who wish to practice in state-licensed alcohol and drug treatment facilities. The Human Services faculty are dedicated to supporting student academic and career success and providing guidance and support throughout the program. Information on the various pathways are both available online and provided by the faculty (II.C.6-57).

The following are the five Human Services certificate program areas:

- Human Services Generalist (II.C.6-58)
- Alcohol & Drug Studies (II.C.6-59)
- Community-Based Corrections (II.C.6-60)
- Mental Health Worker (II.C.6.61)
- Occupational Skills Award for Eating Disorders Studies

The Human Services Department hosts several important annual events, including an active Human Services Advisory Meeting comprised of community partners who serve as advisory members, faculty, current students, and alumni. In addition, Human Services hosts an annual Human Services Panel Presentation comprised of faculty, alumni, and community partners who provide students with information on employment trends, training, internship and volunteer opportunities, with an emphasis on continuing education. The College's Human Services Department and the Associated Student Government will sponsor the 26th Annual Red Ribbon Resource and Career Fair on October 26, 2016 (II.C.6-62).

Human Services was recently awarded the Health Resources and Services Administration (HRSA) FY 2016 Behavioral Health Workforce Education and Training for Paraprofessionals and Professionals Award. The Human Services Department was one of only 34 awardees across the country to be awarded this federal grant. Funds from this grant will help increase access to and awareness of Human Services' unique Mental Health Certificate and related Human Services programs and will provide financial assistance to students to help them meet their educational and training goals (II.C.6-63).

Nursing Program

The College's Nursing Program is highly successful and is respected both locally and nationally. The Nursing Program is consistently ranked in the top 10 percent of all nursing programs in the United States, and is often in the top five percent. The faculty are dedicated, competent, compassionate, and creative nurses committed to the scholarship of the discipline. The Nursing Program prepares students for entry-level practice in nursing (II.C.6-64; II.C.6-65).

The Nursing Program currently has articulation agreements with nine universities that result in a bachelor's degree in nursing. The College also has agreements with two universities where graduates can continue on their education and obtain a master's degree in nursing (II.C.6-58). In addition, the College offers dual enrollment programs with CSU Fullerton (CSUF) and Vanguard University. Typically, 15 to 20 percent of nursing students are dually enrolled by the time they graduate from the College (II.C.6-66).

2+2+2 is a new program in development. This program provides seamless articulation from high school to the College to CSUF (Irvine Campus) and provides students with the opportunity to obtain a bachelor's degree in nursing four years after high school graduation. The program will be cohort based and students will self-identify as early as their sophomore year in high school. In their junior and senior years, high school students will complete prerequisite classes for the associate degree in nursing. After completing the two-year nursing program at the College, participating students will transfer to CSUF (Irvine) and complete their BSN requirements in the last two years of the program (II.C.6-67).

Emergency Medical Technician

Due to changes in EMT training at the national level, the College's Emergency Medical Technician (EMT) program was modified in 2012 from a 6-unit program to a 12-unit program. An unforeseen consequence of the restructuring of the program was a decline in enrollment. This decline was due to the increase of required units from 6 to 12, which led to the loss of one section of the former 6-unit program. The ambulance companies who provide internships could not sustain the number of students for the increased number of hours of internship required by

the new program. The EMT program is very successful and has a pass rate of over 80 percent, which qualifies student to take the National EMS Certification examination (II.C.6-68; II.C.6-69).

ANALYSIS AND EVALUATION

The College has adopted and adheres to admission policies consistent with its mission. The College regularly evaluates admissions practices to ensure that the student population appropriately reflects the District service area; the depth and breadth of programs offered at the College supports the open access mission of the community college. The College defines and advises students on clear pathways to help facilitate completion of degree, certificate, and transfer requirements. Information on certificates, degrees, and transfer pathways is available to students on the College website and in Counseling Services.

II.C.7: The institution regularly evaluates admissions and placement instruments and practices to validate their effectiveness while minimizing biases.

EVIDENCE OF MEETING THE STANDARD

As an open-access institution, Saddleback College does not utilize an instrument to determine student admission. The College admits students according to BP 5604 (II.C.7-01), Admissions, based on California Education Code (76000). All applicants who have a high school diploma or equivalent, or who are 18 years of age or older, and who can benefit from instruction are admitted. The only exceptions to this admission policy are for international and concurrent enrollment high school students who must meet additional admission criteria. Currently, the College does not offer a fully online degree program, so no separate measures are used in admissions for online students (II.C.1-02).

In March 2016, Matriculation began using the NCTA to administer assessment tests to students in remote areas (150-mile radius from the college), a process that enables students to take assessment tests without coming to the college (II.C.7-02; II.C.7-03; II.C.7-04). As of fall 2016, approximately 40 students have used this service. Students can learn about this option by contacting the Matriculation Office by phone or email.

The majority of students apply to the College using the (CCCApply). Paper applications are also available upon request from the Office of Admissions and Records.

The application complies with legal and practical reporting requirements for the gathering of student demographic information. Since contracting with CCCApply, the application has been modified to capture relevant data, such as veteran information. Bilingual support is offered by phone, by email, or in person through the Office of Admissions, Records and Enrollment Services. The office lobby was recently remodeled to provide ten internet-based computer workstations and printers for students to use for the online admission and registration processes.

As a part of the enrollment process, new students are assessed for placement in English, mathematics, reading, and/or ESL. For students with previous math and English coursework from another accredited college or university, a request for alternative evidence evaluation may be submitted to the Matriculation Office for math and English placement. Resultant placement, be it via alternative evidence evaluation or assessment testing, satisfies completion of the initial basic skills assessment requirement of the matriculation process. Math and English assessment testing is offered year-round in the Matriculation Office on a walk-in basis or by appointment in an electronic format. Additionally, math and English assessment testing is offered off-campus to all area high schools in a proctored paper-pencil format at least once a year. Assessment testing for ESL placement is administered in a proctored paper-pencil format and offered by appointment. The College uses MDTP for math placement (II.C.7-05), CELSA for ESL placement (II.C.7-06), and CTEP for English and reading placement (II.C.7-07). Beginning in 2014, in preparation for a computerized common assessment, the College's English Department and OPRA conducted an internal validation to begin using a computerized version of CTEP for English and reading course placement. The transition to CTEP was relatively seamless since it was already being used within the District, as CTEP was the placement test IVC English faculty had previously validated. Third-party providers designed all of the College's test instruments. (II.C.7-06)

The College uses only state-approved assessment tests. These tests are locally validated and have minimum cultural and linguistic biases. Validation studies are conducted by the subject matter department chairs and the OPRA (II.C.7-08). All tests use multiple measures that are conducted through a student survey during the assessment sessions for English, reading, math, and ESL placement. Designated questions are weighted within the survey to emphasize assessment areas that have been identified as important to student success. The raw score plus the weighted scores are used to determine placement. These measures are incorporated into all placements electronically.

The College is a pilot school for statewide Multiple Measures Assessment Project (MMAAP) (II.C.7-09) and has begun the conversation to use high school transcripts for initial placement for incoming freshmen from local area feeder high schools. For this effort, overall grades from sophomore and junior year will be analyzed. Using the statewide multiple measures branching tree for placement will benefit first-time college students for whom Cal-Pass Plus data is available. The Common Assessment exam would then become the challenge option for this cohort of incoming freshmen. All research thus far suggests that moving in this direction would benefit all of our area high school students and in particular, have a positive impact on our disproportionately impacted students.

All math and English placements are accepted district-wide as long as the placement courses are equivalent between the colleges. Colleges outside our district must proctor the same exams as we do to be accepted; additionally, students must turn in a full score report showing exam types, exam levels, and raw scores for evaluation and placement. We do not accept any assessment test results from Adult Education Programs. The Saddleback College campus community eagerly awaits the new Common Assessment.

Re-test policies are explained verbally and provided in document format to every student upon completion of assessment testing for English, reading, mathematics, and/or ESL placement. Re-test policies are also posted on the Matriculation website (II.C.7-10). Students may retest every three months. For math placement, if attempting a different level MDTP assessment test, students may retest after a 24-hour wait period. Senior Matriculation Specialists meet with English, Reading, Math and ESL Department Chairs to discuss retest policies regularly.

A ten-question student survey is included in both the assessment exam for ESL placement and in the battery of assessment exams for English, reading, and math placement (II.C.7-11). Each area has two to four questions that add additional points to the student's raw test scores. As an MMAAP pilot school for the statewide Common Assessment Initiative, Saddleback College administered over 2,000 grit or self-efficacy surveys to fall 2015 students during the assessment process (II.C.7-12). A student's grit score is the number on the grit scale that indicates perseverance and passion for long-term goals. A comparison was made between a student's grit score to their actual class completion. Fall 2015 data was inconclusive, however, Saddleback College will further explore grit score as being a possible indicator for success (II.C.7-13). The hypothesis is that a student's grit score will be one predictor of student success in the classroom. This type of student information combined with predictive analytics will help Saddleback College provide more intrusive counseling to students at risk. The idea of helping students before they get into academic trouble is exciting and will benefit a large number of students.

In spring 2014, the English Department and OPRA conducted a validation on the CTEP Assessment instrument (II.C.7-14). These reports are kept on file in the SSSP/Matriculation Office and the District Research and Planning Office. Reports were prepared by the English Department chair and the district researcher.

Steps that are being taken to increase the availability of assessment testing to help meet the needs of students include offering more evening and Saturday testing sessions. For first-time college students who are out of state, off-campus NCTA proctored assessment testing is available. The most significant effort to provide greater access, however, will be the forthcoming opportunity to direct potential distance education learners to a local California Community College in their region where they will be able to take the Common Assessment (II.C.7-15).

Undecided students are contacted throughout the semester and directed to attend Undecided Major Workshops. Beginning spring 2016, Undecided Major Fairs will take place each semester for both daytime and evening students. The workgroup for the Undecided Major Fair effort will be spearheaded by faculty from the Saddleback College Division of Counseling Services in collaboration with instructional faculty and staff from various departments (II.C.7-16).

English Composition Appeal Process

Students who receive a recommended placement for a basic-skills writing course from the initial assessment test, and wish to be considered for placement into college-level writing, may attempt the Writing Sample Appeal in place of waiting to retest. During the Writing Sample Appeal, students write an essay based on a prompt and passage provided by the English Department and administered by the Matriculation Office. An Appeals Committee will meet and review the Writing Sample Appeal within five working days. If the appeal is approved, the student will be allowed to enroll in the higher-level course. If the appeal is denied, the student will not be eligible for the higher-level course and will be dropped if prior enrollment was allowed. Appeal results are final and placement cannot be appealed again. Dates and times of the Writing Sample Appeal sessions are available in the Matriculation Office (Village 8-5) and online. (II.C.7-17).

Mathematics Appeal Process

A student who seeks placement in a higher-level mathematics course than resulted from the assessment test is referred by the Matriculation Office for an Appeal Petition in the Mathematics, Science, and Engineering Division Office (SM 334) (II.C.7-19).

The following documents must be attached to the Appeal Petition:

1. The student's high school transcript.
2. College transcript and college catalog description of each mathematics courses on the transcript.
3. The results of the appropriate Saddleback College mathematics assessment test.

Students seeking enrollment in MATH 353 must complete either the level 1 or level 2 mathematics assessment test. Those seeking enrollment in MATH 205 or 253 must complete either the level 2 or level 3 mathematics assessment test. Students who wish to enroll in MATH 7, 8, 10, 11, 112 or 124 must complete the level 3 assessment test. Students must complete the level 4 mathematics assessment test for all higher-level math courses, MATH 2 and MATH 3A.

An Appeals Committee will meet to review the Appeal Petition and supporting documents within five working days. If the appeal is approved, the student will be allowed to enroll in the higher-level course. If the appeal is denied, the student will not be eligible for the higher-level course and will be dropped if prior enrollment was allowed.

Any student who feels they have experienced discrimination regarding the matriculation process has the right to file a grievance. Information may be obtained in the Office of the Vice President for Student Services (AGB 126).

Common Assessment Initiative (CAI)

The College is currently a grant partner in year three of a five-year statewide grant for the CAI (II.C.7-19; II.C.7-20). This grant will total approximately four million dollars over those five years. With a primary focus on professional development for the CAI, the College's team has successfully completed project outcomes, maintained and exceeded required timelines, and implemented major steps in providing professional development to the 113 colleges in the state. Most of these outcomes have been achieved through a careful and inclusive collaboration with College team members (including faculty, staff, researchers and administrators) and the College grants office. Furthermore, over the past three years, the College's team has remained responsive to the project plan and needs of the state's colleges while engaging with other grant partners from Butte College, Cal-Pass Plus, and Educational Results Partnership to update, assess and evaluate outcomes for the Common Assessment Initiative Grant. Part of this engagement has entailed extensive participation in statewide workgroups, regional meetings, and steering committees; the team has engaged with stakeholders both at the College and at the state level to ensure the success of this project. Participation as a grant partner has been transformative for the College, which aims to implement multiple measures and a more accurate assessment process for students. The discussions and professional development related to piloting and partnering on the CAI aim to reduce unnecessary remediation as well as improve retention, persistence and completion for students. Finally, the College's involvement in the Multiple Measures Assessment Project (MMAP) has involved a multidisciplinary team from the College, including department chairs, matriculation and assessment staff, faculty, and administrators. The MMAP ties directly in to both the CAI and the basic skills grant, targeting placement, assessment, and focusing on transforming our current processes. The MMAP and CAI engagement are examples of successful implementation by College team members which emphasize the College's ability to collaborate, transform current practices, and engage in a statewide dialogue with colleagues to understand and integrate best practices.

As a pilot college, Saddleback has participated in several rounds of item and field testing for the technology platform. The feedback and information gathered from students during this phase inform the entire Common Assessment mechanism during statewide implementation. College team members are able to see student outcomes based on the new test as well as comparisons for placement with the former test and multiple measures. These studies of student outcomes, conversations and acts of collaboration led to many changes in support services for students, such as the introduction of the Refresh program, a revisiting of multiple measures in mathematics, and even a proposal for the Level Up Basic Skills and Student Outcomes Transformational Basic Skills Grant, for which Saddleback was awarded 1.5 million dollars.

ANALYSIS AND EVALUATION

The College admissions and placement policies and practices are tied to Board Policies and

Regulations and California Community College Chancellor's Office reviews. The College complies with the standards for admission required by California Education Code, Title 5. The admission application is free and may be submitted electronically using the online application system, in-person, or via postal mail using the paper application form. The College regularly establishes the effectiveness of placement instruments via rigorous validation studies, and ensures that issues of effectiveness, consistency, and potential for bias are addressed.

II.C.8 The institution maintains student records permanently, securely, and confidentially, with provision for secure backup of all files, regardless of the form in which those files are maintained. The institution publishes and follows established policies for release of student records.

EVIDENCE OF MEETING THE STANDARD

The College maintains student records permanently, securely, and confidentially, with secure backup of all files in accordance with BP 5615, Student Records, Compliance with Family Educational Rights and Privacy ACT (FERPA) (II.C.8-01). In the Admission and Records Office, student records (for example, residency reclassification and academic petitions) are maintained permanently and securely in fireproof filing cabinets. These documents are also scanned and are purged according to retention requirements for class three disposable records. In addition, electronic student records are secured via the ImageNow (II.C.8-02) and MySite systems (II.C.8-03). The District SIS database is the primary repository for electronic student information. District IT backs this system up nightly, and the backup is electronically and securely transferred to a secure off-campus storage that is cloud hosted; backups are maintained for two months. Access to the files is limited and is based on employee's job classification.

The College continues to maintain hard copies of College student transcripts prior to 1981 in fire-protected vaults within secure mobile storage containers on campus property. Physical documents that are accepted by the Office of Admissions, Records and Enrollment Services (II.C.1-01) are imaged on site using ImageNow. Employees gain access through the use of a username and password. The various documents imaged are assigned a document type. The level of access has been predetermined based on the employee's job description, for which there must be a legitimate educational interest expected for a person with specific responsibilities. Electronic documents are stored on a secured server in the District IT data center, and this server is backed up on a nightly basis. During 2012-2014, the College converted all applications and enrollment data being preserved and retained on microfilm and microfiche to digital images.

Students are issued randomly generated Student Identification numbers to protect their privacy and the security of their Social Security numbers. A student may change his/her password by selecting "Forgot My Pin" (II.C.8-04) in the MySite landing page. The student then enters a Username or Student ID number. The Student is then prompted to answer the Secret Question he/she created. If the answer is correct, the student may enter a new Pin Number. Students can access their College records via MySite, the College's secure Web portal, with their unique user ID and PIN. Students requesting their records or completing enrollment transactions in person are required to present authorized photo identification.

All student records are securely maintained in the Admissions and Records Office. The College adheres to strict confidentiality standards, Title 5 and the Family Educational Rights and Privacy Act of 1974 (FERPA). Furthermore, all student services offices follow state and District mandates. The College publishes information on the requirements for the release of student records in the College Catalog, and in multiple places on the College website (II.C.8-05; II.C.8-06; II.C.8-07; II.C.8-08). The release of student records is in accordance with FERPA and District guidelines. Staff members participate in training on records systems and security as well as the protocols for confidentiality of records and for releasing information to students. Information regarding release of student records is part of the New Student Orientation.

ANALYSIS AND EVALUATION

The College ensures a high standard for confidentiality, security, and maintenance of student records. The College publishes and follows established policies for release of student records and follows FERPA standards on confidentiality and release of records to parents, et al. Students can access their own records via MySite; using their unique ID and password, students can gain access to the system for much of their information. All College staff members who work directly with student records are trained in record confidentiality and security. The College publishes and follows established policies for release of student records.

Standard III: Resources

The institution effectively uses its human, physical, technology, and financial resources to achieve its mission and to improve academic quality and institutional effectiveness. Accredited colleges in multi-college systems may be organized so that responsibility for resources, allocation of resources, and planning rests with the district/system. In such cases, the district/system is responsible for meeting the Standards, and an evaluation of its performance is reflected in the accredited status of the institution(s).

III.A.1 The institution assures the integrity and quality of its programs and services by employing administrators, faculty and staff who are qualified by appropriate education, training, and experience to provide and support these programs and services. Criteria, qualifications, and procedures for selection of personnel are clearly and publicly stated and address the needs of the institution in serving its student population. Job descriptions are directly related to institutional mission and goals and accurately reflect position duties, responsibilities, and authority.

EVIDENCE OF MEETING THE STANDARD

Employment procedures at Saddleback College are administered by the South Orange County Community College District (SOCCCD) Office of Human Resources (OHR) consistent with law, board policies, and administrative regulations. Board policies (BP) and administrative regulations (AR) related to employment of personnel are developed by the Board Policy and Administrative Regulation Committee (BPARC), which is comprised of constituency representatives throughout the district. These board policies and administrative regulations describe in detail the employment procedures used to ensure the recruitment and hiring of highly qualified personnel. Policies and regulations are in place to standardize the hiring of all full-time faculty (III.A.1-01), part-time faculty (III.A.1-02), classified staff (III.A.1-03), and administrators and managers (III.A.1-04). These board policies and administrative regulations reflect hiring processes that are specific to each position's role in the operation of the College. All hiring for permanent positions is conducted by committees that ensure applicants being considered for employment meet the qualifications outlined in the job descriptions and position announcement and that the most qualified applicant is offered the position. It is the responsibility of the College President to ensure the integrity of the recruitment and hiring processes at the college.

The qualifications for each job vacancy are linked to position requirements and responsibilities and to established standards. OHR establishes hiring criteria by matching position requirements and responsibilities to industry standards. For new classified and administrative positions, the job description content is drafted by the supervisor with assistance from OHR. The draft job description is reviewed by an outside consultant and compared to the local labor market for comparable duties, salary, and minimum qualifications. Once the draft is formally reviewed and

finalized, it is presented to the Board of Trustees (BOT) for approval. Job descriptions for classified staff, administrators, and classified management positions are posted on the job site. Job descriptions for faculty positions are developed by discipline experts within the field in accordance with Administrative Regulation 4011.1, Recruitment: Full-Time Faculty (III.A.1-05) and reflect the job duties outlined in Board Policy 4309, Duties and Responsibilities of the Faculty (III.A.1-06).

OHR uses various means to advertise college and district services job openings including internally (districtwide) and on various external sites. All job announcements are posted under the “jobs” link on the SOCCCD Web site and on the College cable television station. OHR maintains a high profile at the California Community College Registry job fairs and participates in many regional job fairs. Job openings are listed in the California Community College Job Registry, the “Chronicle of Higher Education,” major daily newspapers (as deemed appropriate), discipline-specific periodicals, and association publications. Job announcements and brochures are posted electronically as previously described and in print and include the position description, representative duties, education and experience requirements, compensation and benefits information, conditions of employment, required materials, and a description of the application and selection process.

All faculty and administrator hiring is made in strict compliance with the minimum qualifications for faculty and administrators as mandated by the California Community Colleges Chancellor’s Office (III.A.1-07). Moreover, the job announcements for all positions requiring expertise in online education, such as faculty positions and the dean of online education and learning resources, have language describing the required and desired experience and training in online teaching or administration.

The Office of Human Resources recruits for diversity by utilizing up to twenty-seven (27) different avenues to ensure access to employment opportunities. In addition, positions are advertised in specialty publications or websites directed towards underrepresented and diverse populations (III.A.1-08). The district’s Equal Employment Opportunity Plan serves as a recruiting guide (III.A.1-09). To ensure fairness in the recruitment and hiring process, OHR assigns a non-voting Equal Employment Opportunity (EEO) representative to each committee. OHR has conducted EEO training for managers at the colleges to streamline the committee formation process (III.A.1-10).

The employment procedures used to recruit faculty, classified staff, administrators, and managers vary, as described in the following sections.

Recruitment and Hiring of Full-Time Faculty

Administrative Regulation 4011.1 clearly defines the recruitment and hiring policy for full-time faculty (III.A.1-01), and a college process to develop faculty position prioritization recommendations is consistently applied. Each year the college develops a list of faculty positions to be filled through a defined process established by the Academic Senate (III.A.1-11). First, a list of potential full-time positions are developed based upon analysis of identified program needs through the program review and college wide planning processes. Criteria include program accreditation considerations, student demand for classes, the ratio of full-time to part-time faculty in the discipline, and assessment of student learning. This list is subsequently prioritized by the Full-Time Hiring Prioritization Committee of the Academic Senate. The committee's recommendations regarding priorities for faculty positions are submitted to the College president, who determines the final list and forwards it the Board of Trustees for approval. Once a full-time faculty position has been approved, the appropriate division dean will submit a request to OHR in Workday, the district's enterprise resource planning system, to announce the position. OHR then appoints a human resources specialist to administer the hiring process for that position.

Each department approved for a new faculty hire forms a search committee of five to seven members, which generally includes the division dean, discipline faculty, and, occasionally, classified staff. No fewer than three members of the committee must be experts in the academic or student services discipline of the recruited position. All faculty appointments to search committees are approved by the Academic Senate.

Search committees review applications for full-time faculty positions to rank applicants in relation to the required knowledge, education, and experience for the positions for which they have applied. Evaluation includes a review of applications, cover letters, transcripts, curriculum vitae, and letters of recommendation if required. Based on this ranking, applicants are then selected for an interview and, depending on the position, a teaching demonstration.

Practices for determining whether an applicant is well-qualified in the field of online teaching varies across departments at the college. For all positions requiring online teaching, there is an emphasis on evaluating proficiency in online education. Evidence may include recent online teaching experiences, a teaching demonstrations that showcase candidates' abilities to teach online, responses to open-ended interview questions that ask about best practices in online teaching, references from other institutions, online teaching certifications (such as the @ONE or Quality Matters certificates), and prior mentorship from experienced online instructors. Hiring committees for full-time positions which include online assignments will also ask applicants about their background in online teaching, experience with various Learning Management Systems, and their ability to leverage various technologies during the interview.

After the conclusion of the interviews, the committee forwards the names of candidates that qualify for a second-level interview with the College President and one of the College Vice Presidents. Prior to the second-level interview, the chair conducts a check of professional references. The College President consults with the search committee chair and discipline experts after the second-level interviews and before any offer of employment is made. The College President makes the final selection of the candidate for recommendation for appointment to the job. Before a candidate's name is forwarded for Board of Trustees for approval, OHR reviews official transcripts and verifies employment history.

Recruitment and Hiring of Part-Time Faculty

Administrative Regulation 4225 defines the recruitment and hiring policy for part-time faculty. Applications for part-time faculty positions are continuously accepted and OHR maintains a candidate pool for each discipline of those applicants who meet the minimum qualifications for the position. Division deans and department chairs can access the application materials in each candidate pool online when a part-time appointment is needed.

Due to the nature of part-time faculty hiring, the hiring process for part-time faculty varies among divisions. The department chair or the division dean (sometimes with other faculty members) interviews part-time faculty applicants. Part-time faculty must meet the same minimum qualifications required of full-time faculty and submit official transcripts prior to Board approval. Division deans make hiring decisions after appropriate reference checks have been conducted.

Recruitment and Hiring of Classified Employees

Board policy 4011.3 defines the recruitment and hiring process for classified employees, and a college process to develop the prioritized recommendations for classified positions is consistently followed (III.A.1-12)(III.A.1-13). In October 2015, the district implemented a voluntary pilot project for recruitment and hiring of classified employees as the first step in evaluating the current board policy for possible revisions (III.A.1-14). While funding for replacement positions remains with the department, funding requests for new positions follow a competitive process. New staff positions are requested by supervisors through the program and administrative review processes, and these requests are consolidated by the appropriate Vice President, who prioritizes and brings the requests to the College Resource Committee, which reviews them prior to forwarding them to Consultation Council, the College's main governance group for new discussion and ranking of new staff position requests. The Consultation Council creates one prioritized listing of classified staff. The President finalizes the list based on available funding and other factors and submits it to the Chancellor.

Following the approval of the prioritized list of staff positions, the hiring process is started through the submission of a job requisition to OHR through Workday. Applications for classified positions undergo a rigorous review process. OHR screens applications for completeness and to ensure all applicants forwarded to the committee for review demonstrate the minimum knowledge, education, and experience specified in the job announcement. The search committee chair has the option to be involved in the minimum qualification screening process. If the need arises, OHR will consult with the chair on matters of interpretation of minimum qualifications. The pilot classified hiring process enables the committee to confer regarding interpretation of minimum qualifications required for the position.

Search committees are formed for each position and consist of three to seven members, which may include classified staff, managers, administrators, and faculty, where applicable. The application materials for all applicants meeting the minimum qualifications for the position are reviewed and ranked online on the district's employment site by committee members in order to determine which applicants will be invited for an interview.

A human resources specialist and the search committee chair determine the lowest score to qualify for an interview and the number of applicants to be interviewed. In the pilot classified hiring process, search committee discussion forms the basis of determination about which candidates will be interviewed.

Interview questions are asked to determine whether candidates can accomplish the tasks required of the positions for which they have applied. For staff positions related to instructional technology in online education, for example, candidates' applications are screened for experience and education related to online education and additional questions are asked about their abilities and training as part of the interview. At the conclusions of the interviews and any subsequent discussions, each committee member determines a final interview score for each candidate. The pilot hiring process involves progressive ranking after the completion of each interview (i.e., no scores are tallied). Reference checks are made in accordance with administrative regulation guidelines, and second-level interviews are frequently conducted prior to submission of the recommended applicant to the president. This process ensures that the applicant who is offered the position is the most qualified to support the programs and services of the College.

Recruitment and Hiring of Administrators and Managers

Academic administrators have two basic requirements: (1) possession of a master's degree, as defined in "Minimum Qualifications for Faculty and Administrators in California Community Colleges" and in Title 5, Sections 53400-53430, and (2) meet the needs of the college in the position for which they are hired. This second requirement may include more-specific degree

requirements, degree majors, or additional educational or experiences requirements as defined by the needs of the college (III.A.1-07) (III.A.1-15).

Minimum qualifications for all classified, or non-academic, managers are determined by the needs of the district. Education, experience, and job requirements are developed by OHR in collaboration with the hiring manager and refined by an external consultant with information provided by periodic classification surveys with other community colleges. In general, classified managers must (1) possess, at minimum, a bachelor's degree in a specialized area and (2) meet or exceed the experience criteria based upon the needs of the position.

The recruitment and hiring process for College administrators and managers is set forth in Board Policy 4011, Employment Procedures for Administrators and Managers (III.A.1-04). When the need for hiring a new administrator or manager is determined, the president makes a recommendation to the chancellor. Once approved by the chancellor, a job requisition is submitted to OHR through Workday. OHR advertises the open position and is responsible for maintaining the recruitment file and application materials for each position.

Search committees for administrator and manager positions consist of between five and twelve members. The majority of the committee must be administrators and managers, but the committee must also include one faculty representative appointed by the Academic Senate President, one faculty representative appointed by the SOCCCD Faculty Association, and one classified employee appointed by the California School Employees Association. As with other positions, applications are screened for meeting the job qualifications as specified in the description and ranked. Interviews are held with the most qualified applicants, and three finalists are forwarded to the president for a second-level interview. The president typically conducts the second-level interview with a vice president and/or the committee chair and makes the final selection for the position. Reference checks are conducted by the committee chair or designate, and OHR reviews transcripts and verifies the employment history of the top candidate before an offer is made.

ANALYSIS AND EVALUATION

The College follows established procedures for the recruitment and hiring of all personnel. The determination of positions to be hired is based on the institutional needs of the College, and processes are followed to ensure that the College attracts and hires only the most qualified individuals for each position.

The College and District have policies and procedures in place to ensure that it continues to recruit, develop, and retain the best-qualified personnel available to deliver and support quality programs and services. OHR ensures adherence to the California Education Code, California

Code of Regulations, Title 5, collective bargaining agreements, board policies, and administrative regulations in the hiring and recruitment of personnel.

A common concern at the College revolves around the time it takes to fill an open position. The hiring process for classified staff is lengthy, due in part to a backlog of open positions and OHR's ability to work through the backlog, and due in part to the many steps required by the process itself. In an attempt to reduce the time and to improve the recruitment process, OHR has reorganized and hired additional staff. OHR has also implemented several process improvements such as the online screening of candidates by the committee members. In addition, college and district administrators have visited with human resources professionals at other community colleges to learn about their hiring processes, and the college is currently engaged in a classified staff hiring pilot process in an attempt to streamline and shorten the hiring process.

III.A.2. Faculty qualifications include knowledge of the subject matter and requisite skills for the service to be performed. Factors of qualification include appropriate degrees, professional experience, and discipline expertise, level of assignment, teaching skills, scholarly activities, and potential to contribute to the mission of the institution. Faculty job descriptions include development and review of curriculum as well as assessment of learning. (ER 14)

EVIDENCE OF MEETING THE STANDARD

Saddleback College seeks to hire the most qualified faculty in all disciplines. In order to be considered for a position, applicants must meet the minimum qualifications or the equivalent as described in the position announcement and established by State law (Title 5, Sections 53400-53430) (III.A.2-01). The Board of Governors of the California Community Colleges, in consultation with the Academic Senate for California Community Colleges, determines the minimum qualifications for faculty and publishes them in their "Minimum Qualifications for Faculty and Administrators in California Community Colleges" (III.A.2-02). Applicants who do not meet the minimum qualifications for a faculty position as published in the position announcement may apply for equivalency in accordance with the California Code of Regulations, Title 5, Section 53430, and the California Education Code §87359 (III.A.2-03). Equivalency policies are detailed in Board Policy 4011.1 (III.A.2-04).

Job descriptions for faculty positions are developed in accordance with Administrative Regulation 4011.1, Recruitment: Full-Time Faculty (III.A.2-05) and reflect the job duties outlined in Board Policy 4309, Duties and Responsibilities of the Faculty (III.A.2-06), which include curriculum development and the assessment of student learning, as well as the specific requirements for knowledge and expertise within their discipline. Beyond the minimum

qualifications, each job description includes a list required experience and desired qualifications for the position, which are determined by faculty discipline experts.

The college currently utilizes an effective process for hiring that ensures content area expertise for faculty hiring of full-time positions. All hiring committees must include no fewer than three members who are experts in the academic discipline of the recruited position, and these may be drawn from District faculty and staff or from external sources if necessary. All faculty appointments are approved by the Academic Senate.

Instructors are hired for a broad range of skills needed within their discipline, which may include expertise in online instruction. Search committees review applications for full-time faculty positions to ensure applicants have the appropriate knowledge, education, and experience for the position, as outlined in the job description.

ANALYSIS AND EVALUATION

Saddleback College has been successful in hiring and retaining highly qualified faculty, and the college meets Eligibility Requirement 14, Faculty. This is due to the well-developed job descriptions that outline the qualifications necessary for employment and the rigorous processes in place for recruiting and selecting candidates. Many College faculty hold positions of leadership in statewide and national professional organizations and shape and influence community college education beyond Saddleback College. The College has a long-standing preference for filling full-time faculty positions with individuals who exceed the minimum qualifications. In addition, many part-time faculty, particularly in career technical education, are practitioners who work in the community and bring their unique experiences to the classroom.

A good indicator of the quality and the expertise of our faculty is their length of service to the College and their educational preparation and training. Their markedly long service record is an indication of the stability and consistency the College has been able to maintain with regard to human capital. According to the OHR:

- Nearly 60% of our tenured faculty have been with the College more than 10 years. More than 35% have 20 years or more of service to the College, and 12% have more than 30 years of service.
- More than 10% of our part-time faculty have been with the College more than 10 years and 9% have been with the College more than 15 years. Six part-time faculty have been with the College more than 30 years.

- Of our tenured faculty 61 (34 percent) have doctorates, and 20 (29 percent) of our probationary faculty have doctorates. It is important to note that none of our faculty positions require this advanced degree. However, as the data indicate, faculty in all categories exceed the minimum requirements for their positions (III.A.2-07).
1. Administrators and other employees responsible for educational programs and services possess qualifications necessary to perform duties required to sustain institutional effectiveness and academic quality.

EVIDENCE OF MEETING THE STANDARD

Academic Administrator's and Classified Managers Qualifications

Saddleback College seeks to hire the most qualified managers and administrators. In order to be considered for academic administrator positions, applicants must meet the minimum qualifications or the equivalent as described in the position announcement, defined by the California Code of Regulations, Title 5, Section 53420, and published by the Board of Governors of the California Community Colleges in the document, "Minimum Qualifications for Faculty and Administrators in California Community Colleges" (III.A.3-01). The College also establishes required experience and desired qualifications for each position that above the minimum qualifications. These are described in the job announcement for each position.

Minimum qualifications for classified managers are contained in job descriptions developed by the OHR in collaboration with the hiring manager at the college. The College can also establish additional qualification in relations to education, experience, and job knowledge. These are described in the job announcement for each position. In general, classified managers must (1) possess, at minimum, a bachelor's degree in a specialized area and (2) meet or exceed the experience criteria based upon the requirements of the position.

Classified Employees' Qualifications

The qualifications for each classified staff position are linked to the position requirements and responsibilities and to standards established by the OHR. The Office of Human Resources establishes classified staff qualifications by matching the position requirements and responsibilities to industry standards. All classified position descriptions include minimum education and experience requirements, knowledge and abilities required by the position, and information regarding the working conditions, physical demands, and potential hazards, if any, related to the position.

Board Policy 4011.3 requires the OHR to verify a prospective employee's educational or professional certification, experience, or any other prerequisites for employment (III.A.3-02).

ANALYSIS AND EVALUATION

College administrators and other employees responsible for educational programs and services possess qualifications necessary to perform duties required to sustain institutional effectiveness and academic quality. The College develops job announcements that state all qualifications for positions, including desired qualifications, and adheres to established processes to ensure that only the most highly qualified individuals are hired.

III.A.4. Required degrees held by faculty, administrators and other employees are from institutions accredited by recognized U.S. accrediting agencies. Degrees from non-U.S. institutions are recognized only if equivalence has been established.

EVIDENCE OF MEETING THE STANDARD

The minimum qualifications for all positions describe both the required and desired educational credentials. All applicants for positions requiring higher education degrees are required to submit transcripts that indicate degree conferral. OHR reviews the validity of each transcript and verifies educational degrees through the National Association of Credential Evaluation Services (NACES).

Individuals who have completed college or university course work or degrees at an institution in a country other than the United States must obtain a complete evaluation of foreign transcripts and degrees through a U.S. foreign transcript evaluation agency accredited by the State of California Commission for Teacher Credentialing such as Educational Records Evaluation Service and the International Education Research Foundation. The applicant bears the responsibility to complete and submit this evaluation. These evaluations are then verified by OHR. Degrees from non-U.S. institutions are recognized only if equivalence has been established.

ANALYSIS AND EVALUATION

The college follows appropriate procedures to ensure that all faculty, administrators, and other employees hold appropriate degrees. All transcripts and degrees listed on an individual's application are verified prior to hiring.

III.A.5. The institution assures the effectiveness of its human resources by evaluating all personnel systematically and at stated intervals. The institution establishes written criteria for evaluating all personnel, including performance of assigned duties and participation in institutional responsibilities and other activities appropriate to their expertise. Evaluation processes seek to assess effectiveness of personnel and encourage improvement. Actions taken following evaluations are formal, timely, and documented.

All personnel at the College are systematically and regularly evaluated through processes and procedures established by board policies, administrative regulations, and employee contracts. The evaluation process is overseen by OHR and all manager and administrators are responsible for ensuring that their employees are evaluated in a timely fashion. All employee evaluation reports and determinations are kept in the employee's personnel file, maintained by OHR. Employees have the right to provide a written response to his or her evaluation and have it placed in the personnel file. The evaluation procedures used to evaluate faculty, classified staff, administrators, and managers vary, as described in the following sections.

Evaluation of Faculty

Faculty evaluations follows the negotiated procedure described in the collective bargaining agreement between the District and the SOCCCD Faculty Association (III.A.5-01).

Evaluation procedures for probationary (tenure-track), tenured, and part-time faculty members are defined in the 2015-2018 Academic Employee Master Agreement (III.A.5-02).

The evaluation of probationary faculty is designed to serve two purposes: (1) to ensure that new faculty hires understand their responsibilities to the students, to the College, and to their own professional development and (2) to ensure that Saddleback College maintains high-quality instruction. Probationary faculty are evaluated annually throughout the four-year probationary period. The probationary faculty evaluation is a four-step process:

The first step is a self-evaluation in the form of a portfolio. This is a new part of the evaluation process and allows the faculty member to include information regarding their accomplishments, course materials such as syllabi, and goals. The second step is the observation and report conducted by a tenure review committee (TRC). Each tenure track faculty member is assigned a TRC that follows the probationary faculty member through the probationary period. The TRC is appointed by the probationary faculty member's division dean, in consultation with the department chair, and comprises the dean and a minimum of two tenured faculty members from the department or from a related department (III.A.5-03). The TRC also includes a faculty mentor who has a non-evaluative role and is expected to serve as the advocate for the needs of the faculty member during the probationary period. The TRC conducts scheduled classroom/worksite/electronic visitation(s) as needed and submits written comments to the dean.

The third step in the process is student evaluations. The student evaluations are arranged through the appropriate vice president's office and are obtained in each class. The student evaluations are made available for the faculty member to review and may be utilized by the TRC as part of the evaluation process. The fourth step is the completion of the Faculty Performance Evaluation Report by the TRC. This report is based on the observations of the faculty member made by the TRC and well as other items relevant to the instructional duties assigned to the probationary faculty member, including, but not limited to, participation in curriculum development and review and in the development and assessment of student learning outcomes (SLOs). Any information included in the probationary faculty member's evaluation regarding participation in the curriculum or the SLO processes are verified and documented. The TRC meets with the probationary faculty members to discuss its evaluation report. If the faculty member's performance is judged to be unsatisfactory or needs improvement, the TRC will develop a plan of action, which includes follow-up activities, dates of completion, and measurable outcomes to address the issues. Following each evaluation, the TRC makes a recommendation of renewal or nonrenewal of the faculty member's contract. This recommendation is submitted by the dean to the appropriate vice president, who then reviews the recommendation and forwards his or her recommendation to the president. The president reviews the recommendation and forwards his or her recommendation to the chancellor. The chancellor reviews the president's recommendation, and in turn, forwards his or her recommendation to the board of trustees.

The purpose of the tenured faculty evaluation process is "to improve the teaching/ learning process and the delivery of student services, to provide a basis for professional growth and development, and to comply with California State Community College laws and regulations" (III.A.5-4). Tenured faculty members are scheduled for evaluation at least once every three years. Evaluation is a four-part process that includes a self-evaluation portfolio, student evaluations, classroom/worksite observation, and a review report. The self-evaluation and student evaluations are conducted in the same manner as for probationary faculty. The observation is conducted by the division dean or designee, who then completes the Faculty Performance Evaluation Report.

The evaluator seeks to assess the faculty member's overall performance, including teaching ability, subject matter competence, participation in campus life, and whether the faculty member meets professional expectations. The evaluator holds a final evaluation conference with the faculty member during which all items in the evaluation process are reviewed. If the evaluator feels that a faculty member's overall rating is unsatisfactory and is not meeting the expected performance level, then a plan of action is presented to the faculty member which details the activity or activities for enhancement, the date of completion for each activity, and material which will be acceptable as documentation of action completed. The faculty member will be evaluated again.

The faculty member being evaluated may also elect to have a second evaluation by a tenured faculty member of his or her choice. The second evaluation is intended for improvement of the faculty member, and it may become a part of the personnel file.

The part-time faculty evaluation process is also designed to improve the teaching/ learning process and delivery of student services, and to provide the part-time faculty member a basis for professional growth and development. Part-time faculty are evaluated once in the first semester of employment and every three years thereafter. The process followed is exactly the same as for a tenured faculty member and includes a self-evaluation portfolio, student evaluations, a classroom/worksite visit by the dean or department chair, and an evaluation report (III.A.5-05).

The format for evaluating online courses is described in the Academic Employee Master Agreement, which requires faculty who teach online to meet for at least 50 minutes with their supervisors to go over their online course. Evaluators make recommendations for improvement of online courses during the evaluation process, and faculty typically implement suggestions from peers and evaluators or through informal feedback.

The use of mentors, portfolios and meetings covers additional areas of growth and professional development, which would not typically be covered in a shorter, single observation. Faculty are evaluated in all areas, including preparation, effective instructional practices, outcomes assessment, and college service. Mentorships and interactions between colleagues also help to determine the effectiveness of faculty in performing their duties.

Through both formal evaluation processes and informal means, faculty are provided with opportunities to identify areas of improvement and participate in professional development to improve their teaching in both face-to-face and online courses or other areas of job performance.

Outside of the evaluation process, there are opportunities for faculty to improve their teaching skills in both face-to face and online classes. These include one-on-one meetings with professionals in the Faculty Center for Student Success, AVID workshops, Quality Matters sessions, and other professional development workshops. Faculty can also participate in committees that address teaching and learning. The Online Education Initiative has also offered some unique opportunities for faculty to improve their teaching methodologies in online education and to document evidence of effectiveness. The college currently serves as a pilot site for the OEI, and there are six OEI-engaged faculty members participating in varying levels within the pilot. These OEI-engaged faculty are reviewed and re-reviewed for improvement and are provided with ample opportunities to learn new skills, meet with instructional designers, and participate in workshops and training to improve their online teaching skills. The evaluation instrument, the OEI's Course Design Rubric, has been widely utilized and adopted in state level activities as promoting improvement and standards for effective teaching in online education,

and the College is in the process of developing a new online teaching certificate based, in part, on this rubric.

Classified Staff Evaluation

Classified staff evaluations follow the procedures described in the collective bargaining agreement between the California School Employees Association, Chapter 586, and the District (III.A.5-06). The CSEA contract states that each permanent classified employee shall receive a written evaluation at least once every two years. New classified employees are placed on a 12-month probationary period. During this probationary period, employees are expected to be evaluated once during the initial six months of employment, and again prior to the end of the probationary period.

The OHR has developed a report in Workday, the college's enterprise resource planning tool that managers can use to determine when evaluations are due. OHR holds workshops on effective evaluation techniques. OHR receives all completed evaluations for inclusion in each employee's personnel file (III.A.5-07).

The evaluation process provides a method for measuring employee performance based on the employee's classification standards and requirements as stated in the employee's position description. Managers provide guidance to staff in support of their daily work activities. Evaluations for academic administrators and classified managers can now be conducted in Workday, which allows for input by the supervisor and the employee (III.A.5-08).

Once an evaluation is completed, the area administrator reviews the evaluation with the employee. When there is concern, the area administrator discusses strategies for improvement with the employee. Any negative evaluation includes specific recommendations for improvement such as a remediation plan and provisions for assisting the employee in implementing any recommendations made.

Evaluation of Police Officers

Classified employees holding those positions described as Campus Security Officer, Police Officer, and Police Officer Lead are evaluated using the procedures described in the collective bargaining agreement between the District and the South Orange County Community College District Police Officers Association (POA) (III.A.5-09). All officers on campus receive an annual written performance evaluation. New employees serve a one-year probationary period. During this probationary period, the work performance of the employee is evaluated by the immediate supervisor at three months, five months, and eleven months of employment.

Evaluations address those areas that need improvement and identify those areas in which an employee meets or exceeds police department standards. If necessary, the evaluation may also set forth an improvement plan developed by both the supervisor and the employee. The plan outlines specific steps that the employee can take to improve in the identified areas.

Evaluation of Administrators and Classified Managers

Board policy and administrative regulation 4090 govern the evaluation of academic administrators and classified managers (III.A.5-10) (III.A.5-11). Administrators and managers are evaluated semiannually during the first year of employment and annually thereafter. The evaluation is completed by the immediate supervisor in Workday (III.A.5-12). These formal evaluations are designed for leadership personnel to achieve and maintain high levels of work performance. The evaluation process begins with the establishment of mutually agreed-upon goals and objectives for the year, which set the benchmarks against which the employee's accomplishments will be objectively reviewed. If necessary, a remediation plan is provided for "needs improvement" or "unsatisfactory" marks on the evaluation form.

The completed evaluation is shared with the employee, forwarded to the College president and the chancellor for review, and transmitted to OHR.

ANALYSIS AND EVALUATION

College processes are in place to ensure evaluations are conducted by the employee's immediate supervisor on a regular basis as identified in the board policy, administrative regulation, or employee contract. OHR has now developed a report for monitoring due dates for staff and faculty evaluations to assist managers and administrators to complete evaluations in a timely fashion. A majority of administrators and classified managers have been trained by OHR to use the FRISK (Facts Rules Impact Suggestions Knowledge) evaluation model for employee performance documentation (III.A.5-13), and evaluation training has been provided in numerous sessions at College Management Team meetings and at District Administrators and Managers meetings (III.A.5-14). The College is collaborating with the OHR to refine and execute an improved process for tracking all evaluations to ensure they are conducted at stated intervals.

III.A.6. The evaluation of faculty, academic administrators, and other personnel directly responsible for student learning includes, as a component of that evaluation, consideration of how these employees use the results of the assessment of learning outcomes to improve teaching and learning.

Saddleback College is committed to student learning and student success. As part of their regular responsibilities, and in accordance with BP4309, Duties and Responsibilities of the Faculty, Saddleback faculty are required to engage in the assessment of student learning outcomes

(SLOs) in all their courses. Faculty, whether teaching face-to-face or online, are required to assess student learning. Counselors and librarians are also required to participate in SLO assessment as part of their responsibilities.

Faculty are evaluated, in part, on their compliance with the responsibility to evaluate student learning as part of the faculty evaluation process (III.A.6-01). The evaluation article in the faculty contract specifies that evaluation reports include information regarding participation in curriculum development and review and in development and assessment of student learning outcomes, and the evaluation instrument also includes this as one of the key ranking measures.

Administrators, classified managers, and staff who are closely linked to instruction, such as instructional assistants, recognize the role they play in the student learning process and are involved in the development and assessment of either Student Learning Outcomes (SLOs) or Administrative Unit Outcomes (AUOs). Administrators and managers work with staff and faculty in their areas to ensure that outcomes are being assessed and dialogue is taking place to lead to greater attainment of those outcomes. They also are responsible for evaluating faculty and staff in relation to engaging in SLO or AUO assessment and to set employee goals related to assessment of learning, where applicable.

SLO assessment is conducted at the department level and department chairs are required to lead faculty assessment and dialogue. When student learning does not meet the criteria set by the department, department chairs facilitate discussion about needed improvements. Discussions about the how to improve learning outcomes come in many forms and lead to a variety of plans. Program reviews and SLO assessment result are gathered by departments, which include information on student success and retention rates, among other data. Dialogue also takes place outside of departments in various committees and workshops. For example, the Online Education Committee regularly discusses online course outcomes, and members dialogue and disseminate information related to benchmarks, best practices, and uses of assessment data to increase in student success measures in online classes. As a result of this dialogue and the analysis of assessment data, resources are developed to assist faculty throughout the college. These resources include the creation of documents, such as checklists and best practices manuals, and professional development activities for faculty in collaboration with the staff at the Faculty Center for Student Success, an Online Educator program, the Online Education Summit, AVID online-focused workshops for faculty have all been a result of these discussions.

ANALYSIS AND EVALUATION

The faculty evaluation process requires the participation of classroom faculty, counselors, and librarians in the assessment of SLOS. The faculty evaluation process as a whole is meant to assess how effective instructors are at facilitating teaching and learning, and the use of learning

outcomes is seen as a key component of their effectiveness. The College has proactively addressed faculty members' participation in SLO development and assessment by making it a part of the evaluation for all faculty. During the evaluation process, the evaluator is asked to evaluate the faculty member's participation level in creating, assessing, and/or discussing SLOs. Most faculty members are now fully engaged in using the SLO assessment process to improve their instruction and student learning.

Methods of assessing SLOs and the discussion and analyses of the results vary from department to department. Some departments and individual faculty members are more deeply engaged than others, and the EPA Committee strives to continually increase engagement levels. Nonetheless, all departments participate in discussions related to SLOs. Some of the most extensive discussion related to SLOs occurs in committees such as the Online Education Committee, Curriculum Committee, and the Educational Planning and Assessment Committee. Faculty members from various disciplines serve on these committees, sharing their experiences and insights and carrying the discussion back to their respective departments and college wide during professional development activities.

Administrators are asked, as part of their annual self-evaluation, to identify their accomplishments based on SLOs and AUOs in their division. The participation of classified managers and staff in activities related to SLO and AUO assessment is considered as part of their evaluation as well.

III.A.7. The institution maintains a sufficient number of qualified faculty, which includes full time faculty and may include part time and adjunct faculty, to assure the fulfillment of faculty responsibilities essential to the quality of educational programs and services to achieve institutional mission and purposes. (ER 14)

EVIDENCE OF MEETING THE STANDARD

The College maintains an appropriate number of full-time and part-time faculty to ensure the quality of its educational programs and services. Moreover, the College recognizes the importance of having as many full-time faculty as possible. The California Code of Regulations, Title 5, Section 51025, requires each community college district to employ a specified minimum number of full-time faculty. This requirement is expressed in terms of full-time equivalent positions and is commonly referred to as the full-time "faculty obligation number" (FON). Title 5, Section 51025, also requires community college districts to increase the number of full-time faculty annually in proportion to the amount of growth in credit-funded full-time equivalent students (FTES). In Fall 2015, the SOCCCD's total Full-Time Equivalent Faculty was 381.2 for both Colleges in the District; this figure exceeds the full-time faculty obligation number (FON) of 366.8 for SOCCCD (III.A.7-01).

It is generally recognized campus wide that a robust team of full-time faculty is needed to effectively carry out the work of the College, especially as faculty duties related to evaluating and improving student learning outcomes, student equity, and student success have increased. As such, the college maintains a full-time faculty number for classroom and non-classroom faculty that is above the FON required by the California Community Colleges Chancellor's Office (III.A.7-01) (III.A.7-02). College data show that from 2010 to spring 2016, full-time equivalent faculty have increased 15.5 percent, classified staffing increased 3.2 percent, and administrative and management staffing 16.3 percent (III.A.7-03). In this same time period, student enrollment was relatively unchanged (III.A.7-04). While some of the new classified and management positions were categorically-funded, the creation of these positions has enabled the college to meet new requirements related to initiatives such as matriculation, student success, and student equity.

Staffing for new full-time faculty positions is determined through a process that incorporates recommendations from the Faculty Hiring Prioritization Committee, which includes consideration of indicators of the sufficiency of faculty staffing levels contained in the program reviews, as well as analysis conducted by the college President that includes a broad view of the college's mission and goals as well as fiscal considerations. Part-time faculty are hired on an as-needed basis to ensure that sufficient classes are offered in order for students to complete their programs of study in a timely fashion. The college's class schedule shows the faculty responsible for each class (III.A.7-05).

ANALYSIS AND EVALUATION

The College has a variety of practices in place to ensure that a sufficient number of full-time and part-time faculty are maintained to fulfill all the responsibilities essential to the quality of educational programs and services at the College. The Faculty Hiring Prioritization process uses institutional and program review (PR) data to identify faculty needs and to ensure that those programs with the most demonstrated need are ranked highest. The actual number of full-time faculty hired is determined by the President based on these demonstrated needs, on College priorities determined through planning efforts, on the requirements of maintaining staffing levels above the FON, and on the College budget. PRs increase the correlation between institutional planning and staffing decisions to provide an improved methodology for maintaining the appropriate level of faculty required to maintain the depth, breadth, and responsiveness of the College's quality programs and services.

Full-time faculty have a vested interest in the College and its students and contribute significantly to the success of its programs. Because of these factors, hiring more full-time faculty where needed has enhanced the quality and diversity of our program offerings.

In all programs and services at the College, part-time faculty are utilized when needed to fill classes and meet counseling and library needs. Each department maintains a pool of part-time faculty that can be hired when the need exceeds the current number of part-time faculty within the department. The college meets Eligibility Requirement 14, Faculty.

III.A.8. An institution with part time and adjunct faculty has employment policies and practices which provide for their orientation, oversight, evaluation, and professional development. The institution provides opportunities for integration of part time and adjunct faculty into the life of the institution.

EVIDENCE OF MEETING THE STANDARD

Part-time faculty at Saddleback College are seen as an essential component of student success and are, therefore, provided with all the tools necessary for their full integration into the life of the institution.

When hired, all part-time faculty at Saddleback College participate in two orientations. The first orientation is led by OHR prior to their start date and provides employment information on a number of important topics including benefits, policies, and procedures. The list of topics covered during this orientation includes contact information, designation of beneficiary, employment eligibility verification I-9, Title VII questionnaire, workers compensation, employee's withholding allowance certificate W-4, direct deposit, TB testing, parking permits, CalSTRS retirement, salary schedules, pay dates, verification of academic and occupational work experience, Workday, network access, MySite, employee benefits, optional benefits, the harassment policy and complaint procedure, HIPPA notice of privacy practices, safety, academic calendar, and the faculty employment agreement (III.A.8-01).

The second orientation occurs within the department or division in which the part-time faculty member will be working. These orientations are typically led by the department chair and includes details regarding the actual assignment and College and division procedures and policies. This orientation typically includes course syllabus design, handling registration emails, managing the faculty profile, downloading class rosters, add permit codes, navigating MySite, ordering textbooks and other resources through the College bookstore, maintaining a voicemail box, audio/visual instructions, referral for student conduct violations, employee identification card, library services, tutoring services, copy center, Faculty Center for Student Success (FCSS) offerings and other opportunities for professional development, college committees such as the Academic Senate, and Faculty Association membership.

A third optional training is provided by the Faculty Center for Student Success. Part-time Faculty get one on one training on how to use Blackboard, create an official class website, and

assistance with processes related to the aforementioned training topics (e.g., faculty profile, class rosters, etc.)

All professional development opportunities available on campus are open to part-time faculty, and they are encouraged to participate. At times, a stipend is offered to part-time faculty for their participation. Each year, the College offers nine full-days of professional development activities during the Professional Development (PD) Week that precedes the start of each semester. During fall PD Week each year, the President hosts a part-time faculty dinner and resource fair, where they are given information on how to effectively participate in the academic and professional life of the College. For the past two years, a stipend was provided for all part-time faculty who attended this dinner, and this has greatly increased participation in the event (III.A.8-02).

In addition, through the Academic Senate part-time faculty can apply for up to \$600 to participate in outside professional development activities such as discipline-specific or teaching and learning conferences (III.A.8-03). Part-time faculty are encouraged to participate in college initiatives that frequently include professional development. These initiatives include AVID for Higher Education, grant-funded professional development (e.g., the STEM guitar workshop, Perkins-funded conference attendance, faculty externships), and categorically-funded professional development (e.g., through the Student Support and Success Program, the Basic Skills Initiative, and the Student Equity Plan). On-campus conferences open to both full-time and part-time faculty include a regularly scheduled CTE Conference, a Student Success Conference, and an Online Education Summit. Another professional development resources available to part-time faculty include workshops and one-on-one technical and online teaching training in the FCSS. The FCSS also maintains a website with significant resources available to part-time faculty including the Faculty Guide to Online Education, an effective online teaching rubric, and tips to increase student retention, among others.

Oversight of and assistance for part-time faculty is included in the job description of division deans and in the board policy on the duties and responsibilities of department chairs (III.A.8-04). This oversight, which includes informal meetings, formal evaluations, and ongoing training and dialogue, ensures the highest quality of instruction and service by part-time faculty. As discussed in III.A.5 above, all part-time faculty are evaluated their first semester and every three years thereafter per the Academic Employees Master Agreement. The evaluation process is conducted through the division dean with assistance from the department chair. Part-time faculty are invited but not required to attend all division and departmental meetings and to become active in college committees. Moreover, the most recent faculty contract (2015-2018) incorporated payment for student consultation time or office hours into the part-time salary schedule.

ANALYSIS AND EVALUATION

As part-time faculty teach a significant number of classes at the College and provide valuable services to students in counseling and the library, the College recognizes the need to fully-integrate part-time faculty into the life and culture of the institution. The College's employment practices provide a comprehensive orientation to the policies and practices of the College and District, professional development opportunities, ongoing oversight and assistance, and regular evaluation for part-time faculty.

III.A.9. The institution has a sufficient number of staff with appropriate qualifications to support the effective educational, technological, physical, and administrative operations of the institution. (ER 8)

EVIDENCE OF MEETING THE STANDARD

The College has processes in place to determine its human resources needs. As previously mentioned, the College follows a standardized hiring prioritization process for faculty and staff positions. These processes are designed so that information from program and administrative unit reviews, other institutional data, and College priorities are considered in the ranking decision. Needs for classified manager and administrator positions are also informed by administrative unit reviews and other institutional data; these positions are fewer in number and are not formally ranked through the college's resource allocation process but are vetted through the consultation council which is comprised of constituency group representatives.

Each administrative and student support unit on campus determines its staffing needs primarily through the AUR process. Classified staff, manager, and administrator requests are made through the College's resource allocation process and submitted into TracDat. During this AUR process, the need for classified staff is reviewed by considering department or unit needs and larger institutional needs and priorities as identified in the strategic planning process and the College budget. Needs are prioritized at the department/division level and then by the Vice Presidents of each area prior to being presented to the College Resource Committee for review. This is an annual process, which results in a funding for the position in the current year, deferral of funding to a future time, or non-funding.

The qualifications for each job vacancy are linked to position requirements and responsibilities and to standards established by OHR. OHR establishes hiring criteria by matching position requirements and responsibilities to industry standards. SOCCCD has established comprehensive practices to assure that qualifications for each position are closely matched to specific program needs and serve to support the goals of students. Job descriptions for classified staff, administrators, and classified management positions are posted on the job site. Human Resources

technicians review all applications to ensure all applicants meet the position qualifications related to education and experience.

The table below shows the number of years of service for each employee, and a listing of all staff is also available (III.A.9-01); the personnel turnover rate at Saddleback College is low, and there have been very few terminations, indicating a good match between new employees' qualifications and their job responsibilities.

Count by Employee	<1 Year	1-4 years	5-9 years	10-14 years	15-19 years	20 years or more	Grand Total
District Services	9	19	25	16	13	14	96
Academic Administrators			1	1	1		3
Classified Administrators and Managers	2	6	9	6	5	5	33
CSEA	7	13	15	9	7	9	60
Saddleback College	51	139	121	95	58	113	577
Academic Administrators	2	5	9	2	2		20
Classified Administrators and Managers	5	6	2	5		10	28
CSEA	29	60	64	44	25	51	273
Faculty CTA	15	66	44	43	31	50	249
POA		2	2	1		2	7
Grand Total	60	158	146	111	71	127	673

ANALYSIS AND EVALUATION

The college has a sufficient number of staff to support the effective educational, technological, physical, and administrative operations of the institution and meets Eligibility Requirement 8, Administrative Capacity. Where staffing levels are too low, staff planning processes are in place to ensure that issues documented in AURs inform staff resource request approval processes. Hiring practices ensure that staff have the qualifications they need for their positions. While classified staff hiring processes appears slow, the college and OHR are collaborating to implement a pilot process to improve these processes.

III.A.10. The institution maintains a sufficient number of administrators with appropriate preparation and expertise to provide continuity and effective administrative leadership and services that support the institution's mission and purposes. (ER 8)

EVIDENCE OF MEETING THE STANDARD

Saddleback College's senior management staff includes the College president, three vice presidents, and an assistant vice president of institutional effectiveness. In addition to the senior staff, the College employs 15 deans and other academic administrators and 35 classified managers. This complement of administrators and managers provides the leadership and expertise needed to ensure that the College fulfills its mission.

The administrative structure of the College is informed by AURs and the College Resource Committee (CRC) process previously described. Administrative reorganizations, however, are subject to approval by the chancellor and the board of trustees. In the past year, the college created one new administrative position, the associate vice president of institutional effectiveness, in order to ensure leadership for several important college initiatives. The need for the position was identified in the appropriate AUR and was vetted through the College's shared governance process. Classified staff, faculty, and all leadership personnel had an opportunity to review and provide input on the recommended reorganization before the recommendation was forwarded to the chancellor and the board of trustees. A statewide comparison of the number of students per administrator shows that Saddleback College is ranked 52 out of 113 California community colleges by college size (III.A.10-01). An organizational chart is also available (III.A.10-02).

The administrator recruitment and hiring processes outlined in sections III.A.1 and III.A.3 describe how the college ensures appropriate expertise among administrators. Saddleback College's Management and Administrative team has participated in an ongoing professional development series, "From Group to Team", which has supported the development of a cohesive management team at the college. The college was recently selected as one of the nation's "Great Colleges to Work For" based on a survey administered by the Chronicle of Higher Education. These survey results are an indication that the administrative team at the college is effective (III.A.10-03).

ANALYSIS AND EVALUATION

Saddleback College maintains a sufficient number of administrators with appropriate preparation and expertise to provide effective leadership in support of the institution's mission and purposes and meets Eligibility Requirement 8, Administrative Capacity. A statewide comparison of all districts indicates that Saddleback College has a median number of administrators across all colleges and districts in California. Administrators engage in ongoing professional development to ensure effectiveness.

III.A.11. The institution establishes, publishes, and adheres to written personnel policies and procedures that are available for information and review. Such policies and procedures are fair and equitably and consistently administered.

EVIDENCE OF MEETING THE STANDARD

The SOCCCD and Saddleback College strive for fairness and equity in all employment practices, and various policies and regulations are developed towards this end. A districtwide policy committee, the Board Policy and Administrative Regulations Advisory Council (BPARC), which represents all constituency groups, is charged with identifying and recommending all policies of the district, including those that are legally required by state and federal law and by the accreditation commission. The BPARC maintains a systematic and periodic review of all existing District policies to ensure that they are legally current and in accordance with the provisions of Title 5 of the California Code of Regulations. Draft policies and administrative regulations developed by BPARC are sent out for review by all constituent groups. When feedback is received, a final draft is developed by BPARC, approved, and then forwarded to the chancellor for review and submission to the board of trustees for approval and adoption. This is an ongoing process that ensures that existing policies are reviewed regularly and new policies are developed when needed in order to maintain the district's commitment to unbiased and impartial treatment of its employees.

Reporting to the vice chancellor for business services, BPARC is the consultative body for policies and regulations. The council is composed of the three district vice chancellors the vice presidents for instruction and vice presidents for student services from both Saddleback College and Irvine Valley College, a classified leadership representative, an academic dean from both colleges, the Academic Senate presidents from both colleges, the Classified Senate presidents from both colleges, the SOCCCD Faculty Association president, the CSEA president, and ASG representatives from both colleges (III.A.11-01). BPARC meets approximately every two weeks. Support for BPARC's work is provided by the California Community College League's Board Policy and Administrative Procedure Service and by a consultant hired to oversee the process of board policy and administrative regulation revision and development. Through the league's policy and procedure service, the District is provided with regular updates of any legal or regulatory changes as well as legal opinions that may impact district policy.

Board policies and administrative regulations are divided into seven series including bylaws, community relations, administration, business, human resources, students, instruction, and speech and advocacy. They are available to all employees on the District's website and through the documents link in MySite, the District's information portal (III.A.11-02). Board policies, administrative regulations, and collective bargaining agreements govern the personnel practices at the College and District. All personnel board policies and administrative regulations are located in the 4000 series on human resources. They are developed and widely disseminated to

ensure that District policies and procedures regarding areas such as hiring procedures, equal employment opportunity, harassment and discrimination prevention, evaluation of employees, and resolution of employee complaints are applied fairly and consistently. The review and revision of board policies and administrative regulations for all human resource-related items is conducted by BPARC in collaboration with OHR as well as the various employee organization. All hiring committees have an Equal Employment Opportunity (EEO) representative to ensure that selection procedures are applied fairly and consistently. EEO representatives are required to attend training prior to serving on the committee in this capacity. All employees who participate on a hiring committee are required to receive EEO training as well, and to complete confidentiality and conflict of interest statements prior to the screening and selection process. The EEO training outlines the laws regarding discrimination and the roles of the EEO representative, the committee, and the committee chair. A majority of Saddleback College administrators and managers and many faculty have completed EEO training and are able to serve in the capacity of EEO representative on hiring committees (III.A.11-03).

In addition to board policies and administrative regulations, many personnel items are contained within the negotiated collective bargaining agreements relating to specific categories of personnel. The following collective bargaining agreements are in effect:

- Faculty – Academic Employee Master Agreement, 2015-2018 (III.A.11-04)
- Classified Staff – CSEA Contract, July 1, 2012 – June 30, 2015 (III.A.11-05)
- Police Officers – Police Officers Association Master Agreement, July 1, 2012 – June 30, 2015 (III.A.11-06)

Grievance procedures, which deal with contract violations, are defined under the individual employee agreements. Procedures governing grievances procedures and appropriate forms can be accessed on the Human Resources page of the District's SharePoint site. OHR is responsible for ensuring that grievance procedures are consistently and fairly administered.

The SOCCCD Harassment Policy and Complaint Procedure Handbook, which outlines the various types of harassment that can exist and the procedures to follow if a student, employee, or third party believes that he or she has been harassed, is available to all on the District's website (III.A.11-07). An Unlawful Discrimination Complaint Form is also available on the website.

Questions about existing policies and regulations can be referred to appropriate administrator for clarification or directly to the OHR. OHR staff routinely address a range of questions regarding policy application with the goal of consistency in application and administration.

Changes in policies and procedures that are pertinent to specific employee groups are communicated to administrators and relevant employee organization, who, in turn, communicate information about the updated policies to employees.

Policies concerning discrimination, sexual harassment, and equal employment opportunity, and reporting procedures, exist in board policies and administrative regulations 4000.4 (III.A.11-08), 4000.5 (III.A.11-09) (III.A.11-10), and 4000.6 (III.A.11-11). Training in prevention of discrimination and harassment is required of all administrators and managers, and is held regularly during the College's PD Week. Equal employment opportunity training is available to all employees, and is required for EEO representatives serving on hiring committees.

ANALYSIS AND EVALUATION

Personnel-related board policies and administrative regulations are systematically developed and updated on an ongoing basis through a consultative process that includes all constituency groups to ensure the policies are fair and in accordance with law and collective bargaining agreements. All personnel policies are currently either up-to-date or are in the revision process.

Board policies and administrative regulations are posted on the District website and are also available to all employees through MySite. The District is quick to follow up on any known or reported policy violation, and investigates if necessary.

III.A.12. Through its policies and practices, the institution creates and maintains appropriate programs, practices, and services that support its diverse personnel. The institution regularly assesses its record in employment equity and diversity consistent with its mission.

EVIDENCE OF MEETING THE STANDARD

The College demonstrates its commitment to equity and diversity through its board policies and administrative regulations, its hiring practices, its grievance, complaint, and problem solving practices, and campus initiatives and activities for employees and students.

Moreover, the College's values statement, the Student Equity Plan, the Staff Development Plan, and Associate Student Government programs, among others, reflect the equity and diversity tenets addressed in Board policies and administrative procedures. The district's updated Equal Employment Opportunity plan is instrumental in support staff diversity.

Board policy 4010, entitled "Commitment to Diversity," sets the tone the entire District in relation to this commitment. It reads:

The District is committed to employing qualified administrators, faculty, and staff members who are dedicated to student success. The Board recognizes that diversity in the academic environment fosters cultural awareness, promotes mutual understanding and respect, and provides suitable role models for all students. The Board is committed to hiring and professional development processes that support the goals of equal opportunity and diversity, and provide equal consideration for all qualified candidates (III.A.12-01).

These ideals are contained within many of the board policies that deal with fair employment practices, harassment and discrimination prevention, conflict of interest prohibitions, academic freedom, speech and advocacy, and student equity.

In addition, the SOCCCD Equal Employment Opportunity Plan, 2016-2019, reflects the district's commitment to these principles in its hiring practices (III.A.12-02). SOCCCD does not discriminate in employment on the basis of race, color, ancestry, national origin, religious creed, sex, physical handicap, medical condition, age, sexual orientation, or marital status and is subject to Title IX of the Education Amendments of 1972, Title VII of the Civil Rights Act of 1964, as amended, Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, and California Labor Code 1102.1 (III.A.12-03). It is the District's policy to ensure that all qualified job applicants have full and equal access to employment opportunities and are not subjected to discrimination in any District program or activity. The District has an Equal Employment Opportunity (EEO) officer, who is also the Assistant Director of Human Resources. The EEO officer is responsible for ensuring that hiring committees comply with board policy and with established hiring procedures so that applicants receive fair and equitable treatment. The district's EEO Officer compiles and analyzes data related to applicant pool and workforce composition to monitor plan effectiveness and inform plan revisions (III.A.12-04) (III.A.12-05).

Moreover, all permanent positions require that applicants show “Evidence of sensitivity to and understanding of the diverse academic, socioeconomic, cultural, disability, and ethnic backgrounds of community college students,” and this statement is contained on all job announcements.

The College’s commitment to recognizing and addressing the importance of equity and diversity is demonstrated by the College’s values statement, which guides the implementation of the College Mission Statement. One of the values listed in the statement is “inclusiveness,” which holds that “We cultivate equity and diversity by embracing all cultures, ideas, and perspectives” (III.A.12-06).

College initiatives such as the development of the Student Equity Plan engage students, faculty and staff from across the college in discussions about diversity issues and the development of action plans to outreach to underrepresented populations and serve students from various backgrounds. These discussions have referred to the need to support diverse personnel as part of a student engagement strategy. Other practices that support the college’s diverse personnel include the participatory governance structure, grievance procedures, and a new problem-solving workgroup that provides support for addressing numerous issues that may arise in a diverse workplace.

ASG also financially supports campus activities, group projects, and a variety of events each year that support cultural diversity. Additionally, faculty and staff are invited to apply for grant funding for their own projects (III.A.12-07). The student clubs that foster appreciation of different cultural experiences include Appreciation of Pilipino American Culture (APAC), the Black Student Union, the Campus Crusade for Christ, the Christian Students Club, the Gay & Straight Alliance, the German Club, the Latin American Film Club, Latter-Day Saint Students, and the Muslim Student Union (III.A.12-08). Through the efforts of the International Student Program Office, the College makes every effort to integrate the international student population into campus life (III.A.12-09).

The Academic Senate also has an Equity and Diversity Committee that address diversity programing, teaching about diversity, recognizing different needs within a classroom, and hiring for diversity. This committee has been inactive for the past several years, but is in the process of being reformulated and revitalized.

ANALYSIS AND EVALUATION

Saddleback College and the SOCCCD support diversity on an ongoing basis. The District and College have established policies to address equity and diversity issues for all employees and students of the College. The policies are applied consistently and fairly (III.A.12-10).

The District is committed to administering hiring and staff development processes that support both equal opportunity and diversity and that provide equal consideration for all candidates as required in Federal and State law.

College faculty, staff, administrators, and managers recognize and celebrate diversity through various programs and within classes. Each year employees participate with ASG in the planning and execution of Multicultural Week, and departments hold a variety of activities that deal with diversity issues such the Teach-in On Islam, Dia de los Muertos events, etc.

III.A.13. The institution upholds a written code of professional ethics for all of its personnel, including consequences for violation.

EVIDENCE OF MEETING THE STANDARD

The District and the College have written policies that provide standards for ethical conduct of its personnel to encourage them to conform to such standards as stated in Federal and State laws and by professional educational organizations. These policies also delineate processes for resolving internal disputes in a collegial and ethical manner.

The Board of Trustees sets standards for the conduct of its own members through Board Policy 110, Code of Ethics – Standards of Practice, for Members of the Board of Trustees (III.A.13-01). Additionally, the Board's prohibitions against divided loyalties (e.g., financial interest in contracts and holding incompatible offices) and the requirements of disclosure of certain economic interests are addressed in Board Policy 154 and Administrative Procedure 154, Conflict of Interest (III.A.13-02). All designated employees must abide by Administrative Regulation 4000.9, Conflict of Interest Code (III.A.13-03), which stipulates that must not make decisions based on their own financial interest or of their relatives or business associates. Together, these policies and procedures embody the institutional Conflict of Interest Code required by California law.

Each College employee group has a code of ethics:

- Administrators and Managers are expected to abide by the South Orange County Community College District Administrator and Manager Statement of Ethics (III.A.13-04)
- Faculty are expected to abide by the Academic Senate's Faculty Code of Ethics and Professional Standards (III.A.13-05)
- Classified staff are expected to abide by the CSEA Code of Ethics and Classified Senate Code of Ethics (III.A.13-06)
- The Police Officers are expected to abide by the Law Enforcement Code of Ethics Statement (III.A.13-07)

- Students are expected to abide by the Student Code of Conduct as printed in the student handbook, and the Associated Student Government Code of Ethics (III.A.13-08)

Any unethical behavior is addressed through management and administration, through the evaluation process, or through specific procedures outlined in board policies and administrative regulations.

In addition, all constituents of the College, including students, staff, faculty, and management, worked together on a joint “Statement of Mutual Respect and Collegial Behavior,” as described in I.C.8 above, and, in January 2016, Consultation Council approved an “Interpersonal Conflict Resolution Recommendation” that encourages all employees to participate in “professional development and training on topics including interpersonal conflict resolution, abusive conduct, effective communication, and pertinent state and federal legislation, board policies, and administrative regulations.” The goal is for the recommendations to be a living document that fosters an environment of professional development, communication and collegiality.

ANALYSIS AND EVALUATION

While the College does not maintain a single college wide code of ethics pertaining to all employees, each constituent group maintains its own code of conduct (III.A.13-09) (III.A.13-10) (III.A.13-11). In addition, the College has reinforced the expectation of ethical behavior through dialogue resulting in the joint “Statement of Mutual Respect and Collegial Behavior” and “Interpersonal Conflict Resolution Recommendation.” (III.A.13-12)

III.A.14. The institution plans for and provides all personnel with appropriate opportunities for continued professional development, consistent with the institutional mission and based on evolving pedagogy, technology, and learning needs. The institution systematically evaluates professional development programs and uses the results of these evaluations as the basis for improvement.

Both Saddleback College and the SOCCCD recognizes the importance of professional development for all its employees, as evidenced in the fact that one of the primary objectives in the 2014-2020 integrated strategic plan is to “increase professional development that potentiates employees’ talents and interests” (Objective 1.4).

In order to meet this objective, numerous professional development opportunities are available for employees of all classifications. These include opportunities made available within the District and at the College, as well as the provision of funding for external professional development opportunities. Wherever possible, professional development offerings and activities are linked to the College’s mission, vision, and values (III.A.14-01) (III.A.14-02).

Each year, the College holds a PD Week, sometimes referred to as “Flex Week,” prior to the start of the fall and spring semesters. As part of the state’s flexible calendar plan for the promotion of professional development, the District’s academic calendar is able to devote nine of the required 175 annual teaching days to professional development. The Faculty Development Flex Committee of the Academic Senate oversees the planning and implementation of PD Week activities (III.A.14-03). Ideas for activities are solicited from the college community and through an employee survey, results from surveys taken during previous professional development activities, and discussions during the Academic Senate and other college committee meetings. Although organized through the Academic Senate, PD Week also includes a variety of activities for classified staff, managers, and administrators as well.

Per the faculty contract, all full-time faculty are required to participate in professional development activities for a minimum of 38 hours during each academic year (III.A.14-04) (III.A.14-05). Faculty may elect to participate in the College’s PD Week to earn these hours, through other opportunities that are offered throughout the year, or through attendance at an external conference related to their assigned duties. Faculty can also apply to undertake and complete an individual project related to staff, student, or instructional improvement. To receive credit for outside conferences or individual projects, the faculty member must complete an evaluation form demonstrating how this activity benefited the individual and/or the College. This form is reviewed and approved by the Faculty Development Flex Committee before credit is granted (III.A.14-06).

The College Academic Senate, the faculty association, and OHR jointly present an orientation program for new full-time faculty during PD week and notify them of this obligation. Additionally, all probationary faculty are expected to provide documentation to their Tenure Review Committee (TRC) that they are actively maintaining currency in their discipline through professional literature, professional memberships, workshops, conferences, or other activities.

In addition to PD Week, various professional development activities are held at the College throughout the year. These include the Institute for Teaching and Learning workshops that focus on teaching and learning strategies, workshops or one-on-one sessions in the FCSS focusing on online teaching, AVID workshops, a CTE Conference, a Student Success Conference, and an Online Education Summit, among many others.

The college supports various professional development opportunities related to online education. In the past, faculty received reimbursement for completing a six-course online educator sequence, which was an in-house program for instructors interested in building their skills as related to online instruction. This program was eliminated after the state developed a similar program through @ONE. Faculty are now encouraged to complete this sequence of courses. However, the lack of an in-house training program has become evident, and the Online

Education Committee is currently developing a 10-week certificate program in online instruction to be offered beginning in spring of 2017. Most faculty who teach online continue to be trained on a one-on-one basis with the staff of the FCSS. The center has three instructional technologists on staff to assist faculty in all stages of online course development and refinement. FCSS also offers numerous workshops on online instruction tools and technologies, in addition to other instructional technologies, throughout the year. PD Week offers a host of skills-based workshops and opportunities for faculty to learn about best practices in online education, including new technologies, Canvas, and online teaching pedagogies. AVID offered online education-focused workshops for faculty during the 2015 year, and Quality Matters offered free on-campus training sessions and certification as well. In addition, many faculty have used their professional development funding monies to attend online education-related events and activities such as the Online Teaching Conference, Quality Matters National Conference, Course Design Workshop for @ONE, and other institutions. Annually, the College has begun to host an Online Education Summit that includes dialogue about best practices for faculty and administration. Faculty can also apply for funds to attend outside conferences relating to their discipline or to teaching and learning. The Faculty Development Funding Committee of the Academic Senate is responsible for the distribution of funds available for faculty professional development (III.A.14-07). Currently, funding supports up to \$1,200 for full-time faculty and \$600 for part-time faculty (III.A.14-08). Each year hundreds of funding awards are made to both full-time and part-time faculty to attend conferences or work on independent projects. Professional development funding also provides an incentive for faculty to participate in conference planning, join a professional organization, serve on a panel, present academic papers, and conduct workshops.

Full-time faculty members are eligible to apply for sabbatical and professional development leaves as part of their collective bargaining agreement (III.A.14-09). The sabbatical is intended for the professional enhancement of the faculty member, which shall benefit of the faculty member, his/her College, students, and/or the District. The value of what the faculty member may contribute following his/her return includes, but is not limited to, the areas of pedagogy, curriculum development, and the culture of the College and the community. Per the Academic Employee Master Agreement (III.A.14-05), the number of semesters available for faculty sabbaticals is calculated as 4.63% of the full-time faculty semester/year obligation as reported by the state chancellor's office to the District in the fall of that academic year. Upon completion of sabbaticals, recipients are required to submit a report of activities to the Sabbatical Leave Committee demonstrating their accomplishment of sabbatical goals. Sabbatical recipients also share their experiences with their colleagues through presentations during PD Week.

In addition, at the discretion of the board of trustees, the District may grant a faculty member a paid or unpaid leave of absence of up to two (2) years for professional development which may include, but is not be limited to, additional schooling and/or training, participation in faculty exchange programs, a project/activity that would benefit the College and/or District, involvement

in research efforts, and acceptance of long-term assignments to other higher education institutions, agencies, corporations, foundations, or government (Calif. Ed. Code Section 87768)

Professional development is available throughout the year for classified staff, managers, and administrators as well. District Services has provided face-to-face training in Workday, the new financial system. The OHR hosts training activities specifically for administrators and managers. Using the results from an annual survey of the District Leadership Team (DLT), OHR designs professional development activities around the top priorities. For a number of years, the legal firm of Liebert Cassidy Whitmore has provided training on topics such as absenteeism prevention, performance management, the Education Code and Title 5, equal employment opportunity, and current developments in workers' compensation. The OHR coordinates and documents the State-mandated harassment-prevention training for all employees, which is conducted annually during PD Week and is also available online. The OHR also facilitates numerous performance evaluation trainings including a program called "FRISK" (Facts Rules Impact Suggestions Knowledge) for all administrators and managers (III.A.14-10).

Classified staff are encouraged to participate in various professional development seminars and workshops. Classified staff are permitted and encouraged, with management approval, to attend PD Week activities, many of which are geared towards staff (III.A.14-11), and other activities that take place throughout the year. During spring break, one day is set aside for districtwide classified staff professional development.

Professional development funds are available for classified staff, and academic administrators have a modest budget for professional development within their areas as well. A Staff Development Committee of the Classified Senate manages a professional development fund and allocates funding on a proposal basis, (III.A.14-12). Classified staff members are required to assess how professional development activities have benefited them and to report what they have learned by completing an accountability form required by the Classified Senate and the Staff Development Committee (III.A.14-13).

Many of the classified staff attend formal classes with the goals of obtaining a degree or an advanced degree. Therefore, besides enhancing their work at the College, they are also provided with assistance in personal growth and advancement in their respective career goals. All permanent full- and part-time classified staff are eligible to receive funding for appropriate classes, books, tuition, and conference fees. Classified staff are encouraged to participate in different activities throughout the state to broaden their horizons and to create new learning opportunities for themselves and their colleagues. Classified staff members have attended the Community College League of California Conference (CCLC) and the Classified Leadership Institute (CLI), a yearly event sponsored by the California Community College Classified Senate.

The College and the District provide additional professional development training through their websites. Examples include a series safety videos (III.A.14-14), technology training via Lynda.com, and online training videos, job aids, and instruction manuals (III.A.14-15) (III.A.14-16). The Office of Planning, Research, and Accreditation provides support for in-house computer information technology systems, such as TracDat, the outcomes assessment and PR/AUR system, inFORM, the District's data warehouse, and the chancellor's office Datamart, among others.

Board Policy 4111, Administrative/Classified Leadership Leave (Without Loss of Pay), provides up to 60 calendar days of leave for all administrators and classified managers (III.A.14-17). Because it is often difficult for an administrator or manager to participate in professional development activities that require an extended period of time, such as a university course or a certification program, this policy is available for such purposes. Administrators are not required to complete a written evaluation of their professional development activities. Instead, they provide oral reports to their colleagues and to their division or unit employees on relevant information (III.A.14-18).

The College solicits evaluation surveys to identify areas of strength and areas that need improvement. The comments from these surveys are incorporated into the planning of future professional development programs and funding opportunities. Through constant reevaluation of programs, the College ensures meaningful professional development activities to all members of the College community (III.A.14-19) (III.A.14-20) (III.A.14-21).

ANALYSIS AND EVALUATION

The College's commitment to professional development for all employees is evident in the number of professional development activities and funding it makes available each year. The total college wide expenditure for all professional development was \$632,393 in 2015-2016 (III.A.14-22). The District and the College provide a wide variety of professional development opportunities to College faculty, staff, administrators, and managers during both PD Week and throughout the year. The College evaluates professional development activities to identify areas of strength and areas that need improvement in order to ensure meaningful professional development activities are available to all members of the College community.

In addition to evaluating the quality of the professional development events, faculty are evaluated on their participation in professional development activities. Full-time faculty are held accountable for their minimum 38 hours of professional development each year (III.A.14-04).

III.A.15. The institution makes provision for the security and confidentiality of personnel records. Each employee has access to his/her personnel records in accordance with law.

EVIDENCE OF MEETING THE STANDARD

Extensive individual employee data are maintained in electronic form by the OHR. Employee data are managed with strict security and access is limited to Human Resources and supervisory personnel. Hardcopy personnel files, including evaluations for all employees, are maintained in secure fireproof cabinets in the OHR.

Medical records are maintained in secure cabinets separate from the personnel files. The District protects all medical information regarding an individual according to the Confidentiality of Medical Information Act (CMIA), Calif. Civil Code, Section 56 et seq., and the Health Insurance Portability Accountability Act (HIPAA), Public Law 104-196 (III.A.15-01). Employee fingerprint information is received and on a secure network computer in an internal, secure location. A Districtwide Records Retention Committee reviews all record-retention systems and makes changes to ensure uniform access and storage.

Each employee has the right to inspect materials in his or her personnel file consistent with state law, board policy, and collective bargaining agreement provisions. A Human Resources employee is present when the records are reviewed and will make photocopies of any documents requested by the employee. The District does not charge a fee for employees to make copies of their personnel files.

Offices and file cabinets in the OHR that contain confidential documents are locked when unattended and at the end of each business day.

Board Policy 3310 (III.A.15-02) and Administrative Regulations 3310 (III.A.15-03) explain the process for retaining and destroying records, as described in the Records Retention Manual (III.A.15-04). Human Resources evaluates public records requests and subpoenas served on the College in order to ensure that any release of documents containing personal information conforms to board policy and to state and federal regulations.

ANALYSIS AND EVALUATION

The need for confidentiality of personnel records is continually stressed to all Human Resource personnel. There has never been an incident of inappropriate release of personnel information by Human Resources staff, and no staff member has ever been disciplined for inappropriate handling of personnel materials.

All District and College personnel are made aware of all board policies and administrative regulations that must be followed related to the release of personal, confidential, and privileged information.

Personnel files are maintained in fireproof filing cabinets in the OHR, and only Human Resources and supervisory personnel have access to these files. Employees may also view their own personnel files. There is a sign-out card for each file that records who has reviewed the files. When a file is being reviewed, a Human Resources staff member is present to ensure items placed in the files remain in the files and that no materials are added.

The District is implementing electronic personnel records using two complementary technologies: for historical information in a personnel file that is currently on paper, this information will be scanned and stored in a secure database (Perceptive Software's Image Now application) that is indexed by Employee ID, SSN and Name. For all new personnel information that normally would be placed in the personnel file, this information will be entered into the Districts' ERP, Workday. Portions of these technologies are currently in production and additional features are being implemented.

III.B: Physical Resources

III.B.1. The institution assures safe and sufficient physical resources at all locations where it offers courses programs and learning support services. They are constructed and maintained to assure access, safety, security and a healthful learning and working environment.

EVIDENCE OF MEETING THE STANDARD

The College engages in activities to ensure safe and sufficient facilities in all locations where it offers courses, programs, and student support services. This includes regular assessment and evaluation of facilities and the allocation of resources when needed. The processes used by the College and District Services to evaluate the sufficiency and safety of its facilities for renovations, relocations, and the building of new facilities are based upon established criteria and include extensive research, consultation, and dialogue within the appropriate committees. Moreover, the College integrates college wide facility needs and safety concerns into its planning processes including the College Strategic Plan (III.B.1-01) the Educational and Facilities Master Plan (EFMP) (III.B.1-02), and the Five-Year Construction Plan (III.B.1-03).

The EFMP, which was last completed in 2011 and is scheduled to be updated starting in 2017, provides a blueprint for the College and District through 2031 and serves as the basis for facility expansion and modification decisions and the implementation of expenditures provided to improve facilities. The EFMP includes five-, 10-, and 20-year time horizons. Each year, a Five-Year Construction Plan, derived from the EFMP, is updated and submitted to the CCC Chancellor's Office. This prioritized list of projects for the entire district is developed by the district Facilities Planning Office with input from the presidents of both colleges. The 20-Year Facility, Renovation, and Scheduled Maintenance Plan identifies the College's scheduled maintenance, renovations, and capital projects. These plans are discussed more fully in III.B.2 below.

Facilities planning is integrated into the districtwide and college strategic planning processes. The College participates in the District-Wide Strategic Planning Council whose purpose is to coordinate all district-wide planning (III.B.1-04). The college's Six Year Strategic Plan process was informed by various data sources (III.B.1-01) including the Facilities Maintenance and Operations Department Administrative Unit Reviews (AUR) (III.B.1-05) and safety inspection reports as commissioned by the Facilities Maintenance and Operations (FMO) management team (III.B.1-06). The Facilities Condition Assessment report of 2015 (III.B.1-07) was a result of an integrated planning process to identify building and infrastructure needs and ensure appropriate funding is allocated to address these needs.

The Facilities, Maintenance, and Operations Department (FMO) at Saddleback College regularly reviews these plans and other documents to determine the sufficiency of the College's classrooms, lecture halls, labs, and other facilities. The plans provide direction to guide development of physical resources to accommodate student enrollment and student use of facilities for all the College's educational programs. For example, in 2014 the college created 613 temporary parking spaces to address the college community need for additional student parking.

Since the last accreditation self-evaluation, the District and College have invested significant resources into campus buildings. A new \$68M state of the art sciences building opened in fall 2016; an extensive renovation of a temporary classroom cluster known as "The Village," was

completed; and a new Automotive Technology/Transportation building opened in 2016. Since 2010, \$134 M has been allocated to Saddleback College for facilities upgrades through the basic aid allocation process (III.B.1-08).

The FMO Department is also responsible for the maintenance of all campus facilities to ensure compliance with District and College plans, to ensure a safe, secure, clean, and accessible environment that is compliant with all state and federal regulations, and to provide adequate maintenance of campus grounds. FMO implements scheduled maintenance and inspection checks of College facilities and equipment, including security checks. The senior director of facilities is responsible for overseeing the work of the FMO Department, and staff are scheduled to work both day and night shifts, and as needed based on issues that may arise. The College has an evening and weekend administrator program (III.B.1-09) through which administrators and deans alternate serving as the point person during these times in order to address potential problems, perform safety checks, and document and report facility concerns.

The College meets its facilities needs by assessing usage data and conducting evaluations and surveys to ensure the maintenance and safety of all campus buildings. Critical to this success are the monthly reports generated by the Advanced Maintenance Management System (AMMS) (III.B.1-10). The AMMS program allows users to track safety issues and emergency repair work. The user can track work that is performed in each building, who performed the work, and the duration of the project. The AMMS system can also help determine how timely work requests are completed and electronically maintains all records of past work orders. This information is useful in planning work schedules and evaluating staffing requirements.

The senior director of facilities reviews the monthly reports generated from the AMMS work order system and uses them as a management tool to monitor, supervise, and evaluate the workload and services provided at the College. Complaints received are reviewed and changes are proposed, approved, and implemented based on budget feasibility. The College prioritizes the needs identified from statements gathered in this evaluation process, shares accolades with FMO staff as appropriate, and consults on ways to improve services based on relevant factors such as enrollment growth and time constraints.

The equipment that FMO maintains undergoes regularly scheduled preventative maintenance that is tracked in the annual inventory reports. In addition, through the program review (PR) and administrative unit review (AUR) processes, described in I.x.xx above, each instructional program and student support and administrative unit selects and prioritizes new needs to be supported through the resource allocation process. This includes funding for new facilities, equipment, and technology. In addition, the FMO department receives an automatic annual allocation for equipment replacement.

Regular assessment and evaluation of College facilities is done through the Facilities Maintenance and Operations Department administrative unit review (AUR) (III.B.1-05), safety inspection reports as commissioned by the Facilities Maintenance and Operations (FMO) management team (III.B.1-06), and the Facilities Condition Assessment report of 2016 (III.B.1-07), which serves to identify building and infrastructure needs and ensure appropriate funding is allocated to address these needs.

In May 2016, Saddleback College received the Facility Condition Assessment Report (FCA) (III.B.1-07). Contracted by South Orange County Community College District in 2012, the final assessment focuses on (6) six main facilities' systems that make up the campus' physical resources: Mechanical, Electrical, Plumbing (MEP), roofs and interior finishes: ceilings, walls, floor coverings and a total evaluation of the campus infrastructure (includes partial mapping), and the underground storm drain system. All systems' assessments for each building are accompanied by a statement of current condition, estimated time of next repair/replacement, and estimated expense. This third-party evaluation of the campus' grounds and facilities condition provide an invaluable forecasting/planning tool to assure issues are prioritized in accordance with the campus community's concerns and to address accessibility, health and safety concerns in a timely manner. In addition to the benefits realized by the campus community, the report provides a reliable third-party assessment for state-scheduled maintenance reporting. The FCA report has been integrated and incorporated into a School Dude planning module which houses a 20-Year Facility, Renovation, and Scheduled Maintenance Plan to identify project priorities and can be updated by the college as needed (III.B.1-11).

The Office of Instruction selects off-site facilities with input from division deans and is responsible for ensuring that these facilities are adequate and that they are in compliance with relevant safety and security requirements. Prior to contracting with an off-site location, College administration visits each proposed off-site location to verify that it is suitable, meets student and instructor needs, and is safe.

During the semester, administration staff visits the classes to evaluate the instructors and locations, and they work closely with the site owners to ensure the safety of students and College equipment. Faculty provide feedback if any problems arise during the semester, and the responsible dean or the vice president for instruction resolves any issues. If a site proves to be unsatisfactory, that site will not be used again. The College supports the use of off-site classes only when the location chosen meets student needs and on-campus classes are not adversely affected.

Safety

Annually, the Risk Management Department, with input from Keenan & Associates, the District's property and liability carrier, reviews and updates the District's Injury and Illness Prevention Plan

(III.B.1-12). The College's FMO staff also participates in monthly on-the-job safety training (III.B.1-13). Keenan & Associates conducts annual inspections (State Wide Association of Community Colleges, SWACC) (III.B.1-14) of College facilities to identify any potential safety risks and reports all risks to District Risk Management and the senior director of facilities for correction. The College is committed to maintaining a safe campus and addresses all recommendations in the Keenan & Associates report. Keenan & Associates completes a follow-up audit report to ensure all safety risks have been addressed. Consultation with the units of Disabled Students Programs and Services (DSPS), and the Campus Police ensures that the College provides safe egress and regress travel access to all facilities.

Recently, the Board of Trustees (BOT) approved basic aid funding of \$630,000 to engage ADA transition plan consultation services and approved these services at the February 2016 board meeting. The ADA Transition Plan Consultant, Cordoba Corporation, began surveying all campus buildings and exterior pedestrian pathways in March 2016 to identify barriers to accessibility. All surveys were complete by August 2016. The results of the surveys were entered into a database for analysis and tracking purposes, and a districtwide ADA plan (III.B.1-15) was developed from this data. The cost to implement this ADA plan was estimated and a phased approach to implementation developed with safety concerns taking top priority. The means of correcting the identified issues vary between adjustments and repairs that can be completed by campus maintenance staff, repairs and reconstruction that require work by contractors, and work that will be included in future building renovations. Status of all items can be tracked in the database developed as we address all items identified in the twelve year plan. Funding sources vary, and larger cost items will be funded via the annual Capital Improvement Committee (CIC) process. The Transition Plan will continue to be a tool for analyzing, prioritizing, scheduling and monitoring ADA compliance in the future.

Facilities plans such as the EFMP and the 5-year construction plan are reviewed annually and implemented as appropriate to meet all relevant building, fire, seismic, and environmental health laws and requirements. Facility deficiencies and safety concerns are addressed by developing a prioritized list of project needs and managing those projects (once they are approved) in the weekly facilities management meetings. The Facilities and Safety Committee, a participatory governance committee composed of classified staff, faculty, administrators, and students ensures that the College complies with established safety standards. The College also has a silent witness program to enable members of the campus community to report concerns; this helps to ensure and maintain safety campus wide (III.B.1-16).

Be Safe

The Saddleback College Police Department has researched, purchased, and implemented a proactive emergency response system. This new program, called "Be Safe," is a very powerful data-driven tool that will increase our ability to maintain a safe campus and effectively respond

to emergencies.

“Be Safe” provides police, fire, swat, and other emergency teams with accurate and detailed information on floor plans, building demographics, and many other unique features of the campus. This program provides emergency teams and administrators with up-to-date information about any facility on the College campus. In the event of an emergency, this information is instantly accessible, thus allowing critical decisions to implement strategies to protect life and property to be made quickly and effectively.

“Be Safe” is a proactive system, and it facilitates clear communications among College resources and emergency first responders with critical information about the entire campus. This system engages and integrates students, administrators, and emergency response teams and supports Emergency Services and FMO Space Inventory (III.B.1-17).

Blackboard Connect™

Blackboard Connect™ is a mass notification system that can be used to inform the College or the District community of time-sensitive situations or just day-to-day events when safety, reliability, efficiency, and speed are needed. The Blackboard Connect™ service provides the College and the District with the capability to reach students, faculty, and staff via voice, text, and email (III.B.1-18).

CISCO AlertMe System on VOIP

The Cisco AlertMe System, or Informa Cast, is a mass broadcast and notification system that can be used by the College Police Department personnel to push immediate voice and text messages to every telephone on campus. The voice-alert messages automatically sound on the telephone’s external speakers, and the accompanying text message appears on the telephone’s LCD display so the device receiver does not have to be picked up to receive these messages. In 2007, the CISCO AlertMe System proved very useful and helpful in facilitating the real-time evacuation of the campus when smoke from wildfires caused unhealthy air quality campus-wide. AlertMe has also been used to conduct building evacuations during fire drills and in other scenarios conducted by the Saddleback College Police Department and local law enforcement agencies in exercising mutual aid protocols and emergency response procedures (III.B.1-19).

College Police Department Equipment Upgrade

The College Police Department has completely upgraded its officers’ uniforms and equipment, including less-than-lethal force options, tactical firearms, and light weight ceramic vests to provide protection against large caliber rounds and helmets. All officers have been equipped and trained on the M-4 rifles for active shooter incidents. New digital radios will be replacing the existing analog handheld radios. This will enable better communications between FMO, our IT department and the local law enforcement. Four emergency gas powered generators were also purchased and added to

the inventory. These generators are equipped with lights and are capable of providing 110 and 220 ports.

In 2015, three new SUV patrol vehicles have been purchased and are in service by the police department. The vehicles can carry more emergency equipment and can provide as a platform for in-field command center until a formal base can be established.

All officers have successfully completed the state mandated standard certification program, the Peace Officers Standards and Training (P.O.S.T.), on the upgraded equipment and in the techniques of rapid deployment in response to immediate threats and in critical-incident management.

New Mobile Emergency Operations Center

When the College's Communications Arts Department no longer needed an old recreational vehicle (RV) that was used for Channel 39 and KSBR broadcasts, the Police Department refurbished the RV and transformed it into an emergency mobile command post for the College. Today, the RV serves as a flexible and effective tool for emergency management.

Safety Videos

Ten short playing safety videos have been developed specific to the campus. The videos were intended to provide information during a variety of possible emergency situations such as earthquakes, fires, power or utility outages, active shooter incidents, disruptive students, and other emergency situation. Each video provides resource information and contact information for specific services provided by the college and what to do in emergency situations. The safety videos are available to employees, students, and the public on the Police Department webpage. It is also included during the onboarding process for new district employees (III.B.1-20).

Video Camera System with Access Control Integration

Integrated digital video cameras and access controls have been installed and utilized in the new sciences building, which was the first building to utilize this integrated college standard. The college spent considerable time and energy researching the best and most innovative standard to ensure future success and adaptability. All new and renovated college buildings will now include this technology as a building requirement. Video cameras have been installed in strategic locations, but full deployment has not yet occurred. The use of this technology is a force-multiplier for the Police Department. Public hallways and roadways can be quickly checked from the dispatch center and can quickly be used to review incidents that have just happened. As new buildings are being completed, the addition of the video system has been included.

The college is currently in the process of obtaining bids to expand access control and integrated video cameras to all permanent campus building not currently scheduled for renovation. This

will allow the ability to remotely lock and unlock building doors during emergency situations. As unlawful breaches are attempted, the uses of the video cameras can provide suspect information quickly and assist in directing officers to the proper location. All new buildings, including the recently constructed Sciences Building, will have video systems and access control incorporated; long-term goal is to have all buildings with video coverage and integrated access control.

Training

The college has developed an emergency planning and training matrix and timetable. This training includes training of faculty, staff, managers, and administrators for emergency situations via table top exercises that include a review of plans and practice scenarios. The President's Executive Team (PET) has completed a table top exercise for active shooter incidents and another is planned for delivery to college management personnel and will cover EOC and Policy Team roles and responsibilities. Presentations have been given at the college's Management Team meetings and the 2015 management retreat. Individual departments and divisions have requested and have been given safety training in their staff meetings. The Administrative Services Team meets monthly to address emergency planning and business continuity issues, and to reflect on and improve our response to incidents that have occurred. We currently have an emergency management consultant on board who is in the process of analyzing our emergency preparedness condition and will develop and emergency response improvement plan based on the results. In late 2016 we developed and funded a new management position; Emergency and Business Continuity Manager.

The College Police Department has been working closely with the Orange County Sheriff's Department (OCSD) for emergency preparedness. In 2014 and 2015 the college participated in live active shooter training scenarios both on the college campus and at a nearby mall, and in 2016 an officer trained with the local SWAT in classroom studies of tactics. The college's Police Chief has attended various OCSD patrol briefings to distribute campus maps and explain locations and routes for active shooter responses. College Police Department has also trained with OCSD for Mobile Field Force (MFF,) which is the county standard training for deployment of personnel during riots or mutual aid incidents. In June 2016, the college's lieutenant led an in-house training on tactics and multiple shooter scenarios.

The college has a robust Community Emergency Response Team (CERT), with regular training and continuing expansion on membership. There are currently 56 fully trained CERT staff members who assist with emergency situations.

Evaluation of Facilities Utilization

Effective use of facilities is determined in a variety of ways. The College utilizes a custom MySite tool to reserve rooms. The Office of Instruction reserves classrooms via the college's

Information Management System tool as well as MySite. The MySite tool is also used to reserve rooms for the Master Calendar. The EFMP, Five-Year Construction Plan and the six-year Strategic Plan drive decisions and serve as a mechanism for evaluation. Student and employee surveys and ongoing inspections by Administration, District Risk Management, Keenan & Associates and FMO are conducted. In addition, fire inspections and safety inspections are conducted by external entities, and the results are used as a basis for improvement. The results of the most recent employee survey are summarized below (III.B.1-21). Issues that arise unexpectedly are reported on the AMMS maintenance work order system and are addressed in a timely manner.

The Facilities, Maintenance, and Operations department reviews College plans and other pertinent documents to determine the sufficiency of classrooms, lecture halls, labs, and other facilities. The Educational Facilities Master Plan, which is updated every five years, comprehensively addresses the College's programs, including those in distance education. Other plans and documents include the FMO AUO.

According to the 2013 Employee Survey (n=334):

- Roughly 54% of the employees who completed the survey have worked at Saddleback College less than 10 years.
- Most employees feel that campus traffic congestion is a problem. Congestion is most evident during the first few weeks of each semester, when the College normally has a larger influx of new students.
- Most employees feel that while there is adequate parking during the workday, however, majority of employees felt that parking lots are not located favorably in regard to the layout of campus buildings.
- The majority of the respondents feel that the campus has adequate lighting.
- The vast majority of employees are very satisfied with the ease of travel on our campus walkways and pathways.
- Roughly half of the employees that completed the survey feel that Campus Police officers are highly visible on campus, and over 70% of respondents also feel safe while on campus.
- About 40% of employees perceive that people with disabilities have reasonable access to all campus buildings.
- Majority of the employees feel that their actual physical work environment is adequate.
- More than half of the employees feel that our campus facilities support student learning.
- Most respondents agree that Facilities Maintenance and Operations Department respond to work orders accurately, courteously and in a timely manner.

ANALYSIS AND EVALUATION

The College has various plans and procedures in place to effectively manage physical resources and to ensure access, safety, security, and a healthful learning and working environment. The College planning processes are integrated and are used to identify facilities needs and strategies for accomplishing those needs.

The Advanced Maintenance Management System (AMMS) is a powerful recordkeeping and management tool. This system has the capabilities of providing management with accurate and useful data for decision-making. Management must and will provide additional training to staff to be able to fully generate and utilize AMMS reports. FMO purchased an \$11,000 AMMS upgrade in fiscal year 2015/2016 to increase the effectiveness and efficiency of the system and improve our ability to meet the needs of the College. Some of the new features in the upgrade include enhanced login and approval options, an improved scheduler function, ability to attach files, new reporting options, etc.

A major challenge faced by the College is obtaining funding for new buildings and for upgrading existing facilities and land. The Board of Trustees has not pursued a local bond for new facilities and facilities improvement and instead relies primarily on excess property tax revenue above apportionment to fund facilities, referred to as basic aid funding and described in III.D.1 below. Obtaining state funding and acquiring sufficient basic aid funds for meeting all identified college needs has proven to be a challenge. A positive step in the planning process has been the continued development of the Capital Improvement Committee (CIC). This participatory governance group makes recommendations on major districtwide facilities and related matters (III.B.1-22). CIC is now able to utilize the Facility Condition Assessment report (FCA) to inform its recommendations for facilities funding for the College (III.B.1-07).

III.B.2. The institution plans, acquires or builds, maintains, and upgrades or replaces its physical resources including facilities, equipment, land, and other assets, in a manner that assures effective utilization and the continuing quality necessary to support its programs and services to achieve its mission.

EVIDENCE OF MEETING THE STANDARD

The planning documents that drive the building of new facilities and the major renovation of existing facilities and infrastructure are the Education and Facilities Master Plan (EFMP) and the Facilities Condition Assessment (FCA) report. The District, in collaboration with the college and using a consulting firm, oversaw the development of the EFMP utilizing data and information largely provided by the College. The plan evaluated current space inventory broken down by category such as lab, classroom, and office space. An enrollment projection by discipline was established and then a long-term capital plan was developed to meet student needs by discipline. This plan projects out building needs to 2031, and breaks down

implementation into three phases. The District and the college are scheduled to update the plan within the next year.

The Facilities Condition Assessment (FCA) report was a multi-stage, comprehensive report that took several years to produce. The FCA describes a physical evaluation of the existing condition of a facility and its systems. The report includes building systems (such as roof exteriors, plumbing, and HVAC), building components (such as chillers, electrical panels, and pumps), equipment inventory (including as photos and data), preventative maintenance schedules, and infrastructure. The findings are used with predictive cost models to estimate current and future funding requirements. The FCA report has been integrated and incorporated into a School Dude planning module which identifies priorities for all identified projects and can be updated by the college as needed (III.B.2-01).

It is the responsibility of the College and District facilities departments to provide direction and oversight for facilities planning and construction. When planning building renovations and construction projects, the facilities departments review the EFMP as well as the FCA report. These items are prioritized and referenced during the annual cycle for requesting funding.

If a project is included in either these plans then project proposals are submitted and evaluated through participatory governance groups such as the Capital Improvement Committee (CIC) and the Basic Aid Allocation Resource Committee (BAARC) for funding recommendation. If funding is approved, consultation begins with the department heads and end-users to consider the needs of programs and define the project components that will meet the needs. The driving forces in building a campus structure are a needs assessment, a campus space review, and of course a review of the appropriate planning documents to integrate with the College's Strategic Plan. The institution and the FMO Department have been engaging in results-oriented planning processes on an on-going basis.

College plans for scheduled maintenance upgrades are developed by the College's Safety and Facilities Committee. As a first step, the Committee reviews the College's Strategic Plan, including its mission and vision, to ensure that the physical needs of all the College's programs and services are being met. Budget planning for physical resources is accomplished through integrated planning; needs identified through PRs and AURs that are in alignment with the college's strategic plan support budget requests for physical resources.

The Safety and Facilities Committee determines and prioritizes service and equipment replacement and maintenance needs. Documentation of meeting agendas and project status reports are recorded.

The Safety and Facilities Committee evaluates the effectiveness of the College's facilities and

equipment in meeting the needs of programs and services through the College Resource Committee process. The FMO Department also incorporates college physical resource needs into its own Administrative Unit Report with input from the professional trades and crafts experts on staff.

An FMO project list (III.B.2-02) lists the current and completed projects and status reports from 2003 to the present. These reports are reviewed in weekly FMO meetings held every Tuesday morning (III.B.2-03). The institution uses its facilities effectively by maintaining classrooms that support the recommended cap-load ratio based on FTES. The physical condition of College facilities used by students, community education programs, and the surrounding community is maintained by FMO; FMO's mission is to create an environment conducive to an effective learning experience.

ANALYSIS AND EVALUATION

The College processes ensure effective utilization and the continuing quality necessary to support its programs and services to achieve its mission. The combined efforts of College planning and implementation by the FMO are effective and adequately meet the needs of students, faculty, and staff.

The EFMP has been followed within reasonable limits. Funding availability has led to adjustments to project prioritization. For example, when matching funds from the state were available for the Library remodel, that project moved to the top of the prioritized list. The Gateway project, scheduled for matching state funds in 2007, is still in the queue as a final project proposal (FPP) with the state. The Gateway delay provided an opening for the College to reprioritize the stadium improvement project with a projected construction start in October 2017 and a scheduled completion date of January 2019, which is much sooner than was originally planned.

Funding new buildings, scheduled maintenance, and facility and site upgrades continue to be a significant challenge. Facility needs are well researched and documented in reports such as the Facilities Condition Assessment Report, but the unfunded scheduled maintenance needs of the college remain high. The College will continue to work through the CIC process to develop a comprehensive funding plan to address these needs.

Equipment and technology has been well funded. Funds for technology have been allocated to the College through the basic aid allocation process, and regular annual allocations have allowed the College to aggressively fund technology on campus. Specific discussion of funding for distance education technology is discussed further in III.C., Technology Services.

The table below shows total equipment funds expended College-wide (III.B.2-4).

**College Equipment
Expenditures, FY 2009-2010 to
FY 2014-2015**

Year	Total Expenditures
2009-2010	\$ 1,255,233.25
2010-2011	\$ 3,167,646.13
2011-2012	\$ 1,307,195.44
2012-2013	\$ 1,803,468.36
2013-2014	\$ 1,868,165.18
2014-2015	\$ 4,900,695.17

III.B.3. To assure the feasibility and effectiveness of physical resources in supporting institutional programs and services, the institution plans and evaluates its facilities and equipment on a regular basis, taking utilization and other relevant data into account.

EVIDENCE OF MEETING THE STANDARD

The College primarily assesses the effectiveness of its facilities in supporting the College's program and services through the PR and AUR processes. Every two years, each program and student support and administrative unit is required assess its physical resources and to complete a needs assessment. Facilities, technology, and equipment needs identified through the PR and AUR are prioritized for funding on an annual basis through the resource allocation process led by the College Resource Committee (CRC). Long-term needs for facilities, including type and size, are assessed at the program level, and are utilized in the development of future education and facilities master plans.

The Safety and Facilities Committee and the Technology Committee also evaluates requests from the PRs and AURs and each establishes a prioritized list of projects for their area. The CRC integrates the prioritized lists for each type of request (e.g. facilities, equipment, staffing, technology, and other) into a consolidated list.

Evaluation of facilities is also done within areas and divisions. For example, on a regular basis student services, with input from each of the ten managers reporting to the vice president for student services (VPSS), assesses the usage of the Student Services Building and of other buildings and space on campus for delivering student services. Each assessment is shared first

with the student services team and then with PET. This evaluation has resulted in improvements such as the mutual usage of space by compatible programs, the moving of programs to more adequate space, the moving of programs due to necessity in a remodeling process, and better usage of space to improve service to students. While many of these improvements are short-term, the identification of facility needs for delivering student services is integrated into long-term plans, such as the construction of the Gateway Building, which is identified on the EFMP.

The Technology Committee develops and maintains a six-year plan. The Technology Committee plans for and funds both hardware and software needs. The first priority of the plan is to maintain currency of technology in the classroom setting and to fund technology replacement needs. The Committee meets annually to review and revise the Technology Plan based in part on needs requested through the PR/AUR process.

A facilities update is submitted as part of the board agenda every month to ensure the board of trustees has current knowledge of facilities projects.

ANALYSIS AND EVALUATION

The College has multiple ways in which physical resource needs are planned and evaluated. The first step is identifying the needs of each instructional program and student support and administrative unit through the PR/AUR processes. The Safety and Facilities Committee, the Technology Committee, and the CRC, are participatory governance bodies at the College and effectively prioritizing identified needs to best support all programs and services. For facilities projects of larger scope, an annual recommendation is provided to CIC identifying the projects that the College would like to see funded. This participatory governance committee, composed of representatives from both colleges and the District, then advance recommendations for capital outlay projects districtwide and include them in the district's annual budget. This process is considered successful and the committee effectively utilizes continuous improvement principles.

III.B.4. Long-range capital plans support institutional improvement goals and reflect projections of the total cost of ownership of new facilities and equipment.

EVIDENCE OF MEETING THE STANDARD

The EFMP is the document that drives the building and major renovation of facilities at the College. This long-range plan is the result of an extensive, collaborative process that includes significant participation of College faculty, staff, administration, and students

This plan identifies in detail all existing facilities by building and also addresses circulatory and

infrastructure needs. Full-time equivalent (FTES) student capacity needs are curriculum driven, and a plan to accommodate those needs is developed. The FTES projections and programmatic needs are developed by the vice presidents for instruction and student services and are supported by OPRA. This plan includes projected need for classrooms, laboratory space, athletic fields, student service space, office space, parking, and roads. The needs are prioritized and a phased plan was developed. This plan is used to supply the State Chancellor's Office with updates to the Five-Year Plan regarding District priorities for facilities funding. Implementation of the plan depends on funding sources. As funding becomes available, the College follows the designated order of priority to implement projects. However, a lower-priority project may be advanced to take advantage of available funding. A recent example can be found in the Library Renovation project. This project had a lower priority than Advanced Technology and Applied Science Building renovation and was implemented first due to the receipt of matching State funds.

The College has significant documented scheduled maintenance needs and struggles to meet those needs both from a funding and a human resources perspective. The 20-Year Facility, Renovation, and Scheduled Maintenance Plan available through the college's School Dude planning module serves as an effective tool for documenting the scheduled maintenance needs of the College. This plan is referenced during the review for annual recommendations to the Capital Improvement Committee in accordance with the identified priorities.

The College uses an integrated strategy that considers building processes, plans, and equipment required to plan for total ownership costs of College facilities. District Services facilities planning professionals utilize a formula for new building construction that assumes the initial building cost is only a percentage of the total cost of ownership which includes maintenance and renovation needs. The College president, senior director of facilities, and the vice president for college administrative services evaluate proposed projects and major equipment requests and analyze the anticipated return on investment and the effect the decision will have on the facilities and maintenance budgets now and in the future. They also balance equipment needs that may have higher costs with the educational component and the facilities component.

The planning process is integral part of ensuring that capital projects support College goals. The budget is driven by the long-range planning process. The process has proven to be effective, as measured by the College's ability to adequately maintain its facilities and project a budget for scheduled maintenance projects.

Over the years, the College has taken a proactive approach to utility savings retrofits and sustainability measures. In 2003, the College installed a 1.5-megawatt cogeneration plant that produces over 8.5 million kilowatt-hours per year. The heat generated by this process is then utilized to supply thermal energy to the College's swimming pool and its buildings. This

process results in an annual savings of approximately 350,000 therms of natural gas. And in January 2009, the installation of an absorption chiller was completed. The chiller generates chilled water for air conditioning by utilizing heat generated from the electrical generators. This improvement provides over 400 tons of cooling capacity and will save an estimated 1.4 million kilowatt-hours and \$200,000 per year. This cooling system will provide all of the College's cooling needs during the winter and half of the cooling needs during the summer. The cost for these improvements, \$1.49 million, qualified for a public utility company rebate of \$408,000. Additional energy efficiencies were gained with Proposition 39 state funding, which enabled the college to install energy efficient LED devices in the parking lot. Other areas of sustainability that should be noted are the College's recycling program and the use of reclaimed water for irrigation. Each year since 2003 the recycling rate for the College's waste was over 50 percent of the total amount of waste generated by the campus. Since 1995 the College has been utilizing reclaimed water for the irrigation of landscaped areas, resulting in an annual savings of over \$75,000 and an annual reduced consumption of 68 million gallons of domestic water.

ANALYSIS AND EVALUATION

The College continually address its scheduled maintenance needs. The College has spent \$38 million in scheduled maintenance over the past ten years (III.B.4-01). Realizing this is a priority, in 2009-10 the District made this a districtwide goal (III.B.4-02). This goal led to the development of the Facilities Condition Assessment report and a 20-Year Facility, Renovation, and Scheduled Maintenance Plan to address facilities needs at Saddleback College.

The College has completed many successful new building construction projects and renovation projects. The College has experienced problems with the "low-bid process," which, unfortunately, does not ensure the best-qualified and most-competent contractors. Therefore, on major building construction and renovation projects, management has the burden and expense to guard against subpar quality workmanship, project delays, and contractor errors and misjudgments, which could obviously lead to unnecessary litigation. A Design Build delivery method is employed when it makes sense to do so which allows for greater collaboration; in this method, design and construction services are contracted by a single entity. The design-build process is anticipated to yield better results, such as a lower overall cost. Shorter project duration superior project quality and better contract features and warranties.

Leadership in Energy and Environmental Design (LEED) is a nationally accepted standard that promotes healthier indoor air and efficiency in energy and water usage. In alignment with the mission, vision, and values of the College related to sustainability, the College has required LEED building certification for the new Sciences building. The College is committed to sustainability and intends to continue to explore sustainable alternatives, including the feasibility of LEED building certification and other alternatives. The new

Sciences building is a gold-rated LEED certified building, and the College will continue to implement sustainable design and building principles throughout the campus as appropriate.

The College's investment in utility savings projects has been significant. In addition to reviewing the criteria for viability, before implementation of utility savings projects the long-range financial impact and the College's mission of sustainability is considered. Sustainability measures implemented at the College have resulted in annual savings of 2.4 million kilowatt-hours, removal from the electrical grid of an additional 8.5 million kilowatt-hours, a savings of 350,000 therms of natural gas, reducing consumption of domestic water by 68 million gallons, and a cost savings of \$905,000. Presently, there are several projects in process that will address additional sustainability issues. These include the installation of an upgraded energy-management system, a new cool-roof system for the Student Services Building, and an evaluation of campus irrigation systems by the Moulton Niguel Water District.

III.C: Technology Resources

III.C.1. Technology services, professional support, facilities, hardware, and software are appropriate and adequate to support the institution's management and operational functions, academic programs, teaching and learning, and support services.

EVIDENCE OF MEETING THE STANDARD

The College is a large and complex institution that utilizes an array of technologies to meet its institutional goals and objectives. Technology permeates every division and department throughout the College. The roles of the College Technology Services department and District IT department are closely linked, with each group providing critical services needed to support the College. College Technology Services provides technical support in an array of technologies. Specific categories of technology support at the College are as follows:

Data Network Administration

- Routers
- Firewalls
- Network Switches
- Wired Infrastructure
- Wireless Access Points
- Network Access Control

- Open Access/General Use Computers

Telephones

- Adds, Moves, and Changes
- Call Handlers/Phone Trees
- Voicemail
- Fax Lines

Desktop Computers

- Faculty, Staff, and Administrative Computers
- Student Computer Labs and Classrooms

Software and Database Support

- End-User Support and Training
- District Application Support

Data Storage

- College Data Storage
- Storage Area Network Management
- Data Backup

Server Administration

- Instructional Servers
- Administrative Servers

Web Administration

- Manage College Web Servers
- Design and Update SharePoint
- Web Applications

College SharePoint Services

- Manage College SharePoint Servers
- SC Cloud-Services

Audio Visual Services

- Boardroom Equipment Operation & Support
- Classroom Media Support
- Equipment Maintenance
- Equipment Installation
- Troubleshooting
- Outdoor Media Systems
- System Maintenance
- System Operation
- Media Services
- Video Duplication

PoE IP-Based Camera

- Configure, Maintain, and Support Cameras and Servers
- Integrate Cameras with Alarm and Video Analytics

Learning Management System

- Support and Train

Applications Development

- Develop and Maintain In-House Applications
- College Specific Software & Database Installation and Support

Printing Management

- Maintain and Support All Printers
- Support All Printing Management Services

Electronic Medical Records

- Support and Maintain System

PoE Access-Control System

- Maintain all the Servers and AD Integration
- Support all Door POE Access-Control System
- Support Integration into Camera System

Instructional Computer Labs

- Collaborate with Instructors to Develop Images
- Troubleshoot
- Software Installation and Configuration

College Technology Services provides technical support for faculty, staff, managers, and administrators. Their hours of operation are from 7:30 a.m. to 8:00 p.m. Monday through Thursday, and 7:30 a.m. to 5:00 p.m. on Friday. There are 13 full-time technical staff, two 60

percent technical staff, an administrative assistant, an assistant director, and a director (III.C.1-1). The staff are qualified to provide support in all of the areas listed. The College's television and radio educational programs use extensive technology. They have dedicated video production specialist staff that assist in supporting these successful and technically adroit programs. Technology Services managers receive text messages via monitoring systems and respond to email after normal Help Desk hours and on weekends.

District IT manages many core services used by Saddleback, Irvine Valley College, and ATEP. These services include the student information system, the email system, CENIC internet lines, the Enterprise Resource Planning system, Workday, mobile applications, and many other systems that are vital to the operation of the College.

Support—Student Technical Support Hours of Operation & Services Provided

To serve all College students, the Division of Online Education and Learning Resources, under the director of learning assistance, manages two student Help Desks and computer labs on the second and third floors of the Learning Resource Center. The computer lab on the second floor is a shared space with Liberal Arts and contains 30 computers for the Language Lab and 48 computers for Skills Lab and Open Lab use. The computer lab on the third floor has 46 open lab computers utilized for research and homework purposes. The student Help Desk offer students in both online and face-to-face classes direct technical support via telephone, email, or in person. In spring 2015, the student Help Desks added a live online technical support chat to assist online students. Hours of operation are Monday through Thursday, 8:00 a.m. to 8:00 p.m., Friday 8:00 a.m. to 2:00 p.m., and 10:00 a.m. to 3:00 p.m. Saturday.

Support—Faculty Center for Student Success Hours of Operation

The Faculty Center for Student Success (FCSS) provides faculty with instructional technology training, workshops, and continued support that promotes excellence in teaching and ensures the highest level of student learning for on-campus, blended, flipped, or fully online classes (III.C.1-2). There are three specialists and one office assistant who are available to assist faculty (III.C.1-3). Each semester, the FCSS offers various instructional technology training options, including specific department/discipline sessions, one-to-one assistance, and new faculty orientations as well as the following:

- Use of the campus learning management system (LMS) in both online and face-to-face classes
- Instructional design support for online classes
- Ways to incorporate instructional technology into classes, including the latest technologies
- Teaching and learning best practices specific to all learning modalities
- Managing, training, and implementing captioning strategies

- Training on third-party apps such as VoiceThread, eduCanon, Google, etc.
- Other topics related to instructional technology

The FCSS is open Monday through Thursday from 7:00 a.m. to 7:00 p.m. and from 7:00 a.m. to 5:00 p.m. Friday. FCSS staff offer workshops on a wide variety of topics throughout the semester. Session topics range from the basics of using the LMS to how to create instructional videos in five minutes or less. In order to accommodate varied faculty schedules, sessions are usually between one to two hours and are available at varying times while the FCSS is open. Surveys from both the start and end of the semester determine the best times for these workshops and which classes should be offered in the future.

The FCSS and the online education coordinator collaborate with Irvine Valley College to organize yearly joint college events, such as the Online Education Summit. FCSS also presents several sessions during PD Week each semester. FCSS also offers fully online or hybrid sessions, on topics such as how to get started online and getting started with Camtasia. In addition to the weeklong online sessions, FCSS also provides webinars for desktop learning loops and one-to-one assistance. Finally, the FCSS has a YouTube Channel and participates in various social media platforms to keep faculty up-to-date with the latest trends in instructional technology and online teaching strategies.

The College's personnel work effectively to support online instruction. There are three full-time staff members dedicated to instructional technology support for faculty (two application specialist II positions, and one instructional technologist). At the College, there are also two full-time positions and one half-time position for student technical support located in the LRC.. Furthermore, the Division of Online Education and Learning Resources (OELR) supports activities at the College that engage students, faculty, and staff with online education. These activities have included the College wide Online Education Summit in November 2015, Week of Workshop (WOW) sessions for students new to online education, and ongoing workshops for instructional technology through the FCSS. FCSS surveys help the center to remain responsive to the needs of faculty and help the center gauge whether it is meeting the needs of faculty. The president's professional development survey included feedback about the support available for online education, learning needs, and future interests. Ongoing feedback from the online education coordinator, dean of OELR, and FCSS supports the distance education programs and services on campus. The online education coordinator also solicits feedback from faculty on services and programs, and then shares this information with the FCSS and the dean of OELR. Finally, there are onboarding opportunities that introduce new faculty to technology skills and best practices in online education. Workshops and one-on-one training at the FCSS help existing faculty to maintain skills. Mentors also help to determine needs for future professional development. Furthermore, the Online Education Committee, District Online Education

Committee (DOEC), the Division of OELR, and FCSS make recommendations for additional needs.

Support—District IT Hours of Operation

District IT technical staff answer Help Desk calls Monday through Friday from 7:00 a.m. to 6:00 p.m. Additionally, the department has a 24/7 emergency hotline; when users call and leave a message on this line, District IT personnel are notified. District IT management also monitors and responds to email after normal Help Desk hours.

Facilities—Computer Labs on Campus

The College has 50 instructional computer labs located throughout the campus (see: Table 1). With the exception of the FCSS, which is dedicated to faculty use, all of these labs are available to students on campus. There is a total of 1553 computers in these labs. The vast majority of these computers are Windows-based machines with 372 devices operating an Apple operating system. The FCSS operates Mac computers, which have the dual capability of running Windows or Apple operating systems. The Technology Services department maintains and supports all of these systems. There is a continued demand for additional instructional computer labs; each year, different divisions request new computer lab setups. The technology committee created a new computer lab process to review requests and recommend options to the CRC committee (III.C.1-4).

Facilities—Faculty Center for Student Success

The facilities for the FCSS offer both a workspace and lounge area for any full-time and part-time faculty members who wish to work or relax. This faculty area includes the following features:

- 20 Mac computers with 26" large screens which are Mac/PC compatible with five additional individual workstations available outside of the lab
- Capability on all computers to operate Windows and IOS
- Microsoft Office suites, as well as Mac Office suites, Adobe Creative Suite, which includes Photoshop and Illustrator, Camtasia video editing tools, as well as others
- Two sound booths equipped with multimedia Mac/PCs, studio-quality microphones and other video creation tools, including Camtasia and Adobe Premiere editing software
- Connected and wireless printers
- Copy machine, scanning capabilities
- Scattered electronic charging stations
- Extra supplies for last-minute needs, such as flash drives, dry markers, erasers, and laser pointers

Facilities—Data Center Funds Allocated

The College has grown through the years, and the demand for technology has skyrocketed. This demand required the deployment and installation of technology that included additional hardware. The College has a main distribution frame (MDF) located on the first floor of the LRC and Library building. The MDF houses all the crucial servers, storage area network (SAN), core switches, and all other technology the College relies on to continue its operations. The MDF has grown organically over the years and now necessitates upgrades to continue properly housing these crucial systems.

A 2015-2016 funding request for \$2.9 million was submitted in spring 2015 via the District Technology Committee to address the needs of the MDF. The request was validated and funded in June 2015; however, due to the funding amount (over \$1M) this project is designated as a district services facility project to be managed by district services. The project currently remains in the project analysis phase, but we are hopeful, due to the demonstrated need, the project will

be accelerated soon. This funding will ensure all College systems are housed in a data center that contains all the necessary facility requirements to secure this vital infrastructure.

The District developed the 20-year Education and Facilities Master Plan to address the needs of the College. This plan is updated every five years and includes distance education needs as well as the technology needs for new buildings.

Hardware—Computers

All full-time employees receive a computer and monitor. Based on employee request and approval from an immediate supervisor, a second monitor is set up to aid in efficiency. The majority of employees receive a Voice over IP (VoIP) phone. There are numerous printers and multifunction devices where employees can print. Divisions and departments have networked copiers that they use for printing, copying, and scanning. Additionally, the College has a reprographics department which accommodates larger and more complex print jobs.

Student printing is available in instructional labs. Additionally, students can print in any of the multiple locations on campus that have student print stations. Student print stations are located in the LRC, Business/General Studies, Health Science, and science and math buildings. The College is in the process of migrating to a web-based student print system that will allow students to send print jobs from mobile devices, laptops, or through the internet and then release the print at any of the print locations at Saddleback College or Irvine Valley College (III.C.1-5).

Hardware—Audio Visual

All instructional classrooms include a projector, screen, computer, monitor, small speaker, and a teacher desk. Technology Services computer/audiovisual technicians support classroom equipment and provide quick training to faculty and staff on the use of this equipment. Additionally, Technology Services has specialized equipment to assist in outdoor activities that require audiovisual equipment. This specialized equipment typically involves large outdoor speakers, large projection screens, projectors, and cellular hotspots for internet access.

Computer-audiovisual technicians typically attend multiple events during the week to help support various functions throughout campus and provide dedicated audiovisual support. The College submitted funding requests in 2015-2016 and 2016-2017 to refresh the technology in classrooms. The current equipment is showing signs of wear, and given the fast-pace of technology, the majority of the rooms cannot accommodate digital connections, such as HDMI or mobile phone connections. The College Technology Committee developed a standard outlining the minimum level of technology needed in the classroom to assist faculty in the

delivery of their lectures and this college standard was integrated into the College Technology Plan and is a requirement for all new buildings.

Technology Plan

The College has made substantial investments in its technology infrastructure. The College has created an air-blown fiber infrastructure with two tubes going to each intermediate distribution frame connecting to the MDF in a star topology. Twelve strands of fiber run between the MDF and each individual intermediate distribution frame (IDF). Additionally, the College upgraded all of its Cisco switches from the edge to the core. Each IDF Cisco switch stack is connected with two 10 Gbps modules creating a 20 Gbps bandwidth path between each IDF and MDF. Two core switches with fiber modules connect each IDF switch stack in a redundant manner.

The College is embarking on a wireless network upgrade. The goal is to have ubiquitous wireless coverage throughout the College, including coverage of athletic fields, parking lots, and roads. Based on the radio frequency (RF) survey conducted, an additional 600 access points will be required to achieve the goal. Funding requests were submitted for 2014-2015, and a subsequent funding request for 2016-2017 was submitted to complete the second phase of the project. A third funding request is being submitted for 2017-2018 to complete the project.

The College's Technology Committee developed a replacement schedule for all computers on campus (III.C.1-6). All employee desktop and laptop computers are replaced every four years. Equivalently, all classroom (non-computer lab) computers are replaced every four years. The replacement cycles are balanced between even and odd years to ease the burden on the budgets and technical staff. Instructional computer labs have a different replacement schedule based on the instructional program housed in the lab. For example, computer-aided design (CAD) lab computers are replaced every two years. Meanwhile, the Language Lab computers are replaced every four years. The trickle down of the CAD lab computers moves to other labs that do not require a two-year replacement cycle.

All other technical equipment has a replacement cycle based on its lifespan. For example, projectors are replaced every seven years, while the storage area network (SAN) is replaced every five years.

Software

The College uses a multitude of software to assist in the efficient running of its operation. From instructional program specific software, to the student information system, the College relies heavily on software for its program and departmental operations. The faculty drive all classroom instructional software acquisitions, and program need determines renewals. The assigned

technician works closely with faculty members to understand the needs of the program and assist in researching, implementing, and maintaining software to keep the program relevant and meeting the needs of students. Technology Services is responsible for the renewal of instructional classroom software and is allocated a budget to successfully renew the software. The software used in instructional programs is extensive. Technology Services has a budget to renew the majority of non-instructional software with the exception of grant-funded programs.

District IT provides online software systems that enable students and employees access to vital services. Key software tools provided to students include MySite and My Academic Plan (MAP).

MySite

MySite is the enterprise Web portal that provides personalized online services to faculty, staff, and students at Saddleback College and Irvine Valley College (III.C.1-7). It provides students the ability to add and drop classes, view semester grades, review transcripts, track the statuses of classes during registration, access email, view college announcements, change ones mailing address, forward college email, review appointment dates, order textbooks, store personal links, set automatic reminder emails, and more.

Faculty can use MySite to view their class schedules, download rosters, generate waitlists and late Add Permit Codes (APCs), submit grades, order books, and manage their class website. Employees can use MySite to perform all of the functions of the student information system.

The District continuously updates MySite software to ensure that it meets the needs of students, faculty, staff, and management. In Fall 2016, a new version, MySite 3.0, will be released. This updated version will feature a student success dashboard that will provide students a unified place to see the progress they are making toward achieving their academic goal(s). MySite 3.0 will be fully mobile responsive and will include advanced search capabilities to assist students in finding the information they need. Additionally, each page will include tutorial videos produced by the student design team—a group of students who assist the College in the design of all of its systems.

SmartSchedule

The District deployed the SmartSchedule program in 2004 to provide students an intuitive way to find the most appropriate classes that meet their requirements. The District is currently leading a Districtwide work group to update the SmartSchedule to make it mobile friendly and to add additional helpful features. The current program has many rich features, which:

- Allow students to easily browse or search the class schedule including textbook information.
- Provide links to faculty profile information.
- Show the location of classes on a campus map and provide a regional map with driving directions.
- Include a details page with Course Catalog descriptions, topics covered, learning objectives, methods of evaluation, and waitlist counts. In addition, the details page also includes all of the important deadline dates for a given class including the first meeting, drop date, refund date, and the last day to add with instructor permission. Students can also request an email reminder for any date listed.
- Allow students to add classes to their personal shopping cart; this feature can detect registration restrictions prior to their registration appointment. Furthermore, classes are displayed in a day/time grid that automatically expands to their schedule and displays the classes in an intuitive calendar-style format.
- Allow students to request a daily email with the status of the classes in their cart, or students can subscribe to a personalized RSS feed that is updated every 5 minutes.
- Include advanced search capabilities which allow students to find classes matching a wide range of criteria, including keywords in description fields, instructor, location, class length, transferability, subject area and the day/time the class meets.

MAP

MAP is a program which guides students through the process of creating their own academic plan (III.C.1-8). It serves as a self-service tracking system for students and counselors to monitor student academic goals. This planning tool provides the student with a complete list of courses broken out by various categories (e.g. general education, major preparation, electives, etc.) The program is fully integrated with the District student information system, which allows MAP to evaluate a given student's transcript every time the plan is accessed. This feature provides a continuous progress report on how the student is accomplishing his/her goal.

Workday

A key software tool provided to employees is the enterprise software Workday. Workday provides access to employee's vacation information, benefits information, organizational charts, payroll, and, in addition, is the financial system use to develop requisition and purchase orders. The software offers many intuitive videos and job aides that assist employee effectiveness and efficiency. Additionally, financial reports, budgets, and organizational charts are a sample of the various reports found within the system.

LMS and Building Blocks

Currently, the College is evaluating the LMS and considering both Canvas and Blackboard in this discussion. This is an inclusive process that calls for faculty, staff, and management to consider all aspects of a new LMS, including its instructional capacities, costs, support services, and other software/hardware needed to support it. The vendor supports the College's current LMS, Blackboard. The vendor maintains servers externally and provides student and technical support. Contractual service agreements with Blackboard ensure reliability, disaster recovery, privacy, and security.

The College's instructional technologists continuously investigate, pilot, and coordinate licensing for emerging instructional technology that can be easily integrated into the campus LMS. Some of these tools include applications (apps), such as VoiceThread, eduCanon, Turnitin, Google Tools, etc. These plugins are tested then presented to the Online Committee to determine use and/or subscriptions. Some apps may not plug directly into the LMS. Some are free or inexpensive tools faculty can use in their classrooms and/or to create content. A good example of this is Monosnap and other video creation tools that faculty can use from their homes.

There is a long list of instructional software installed on computer labs throughout campus. Table 2 provides an example of the software available.

Examples of Classroom Software Available to Students

Adobe Suite	Autodesk AutoCAD	Avid
Camtasia Studio	Citrix Tools for Virtual Machines	Dev-PHP
Eureka	Grammar Fitness	Geographical Information Systems
IronPython	Kurzweil 3000	LinQ
Maternity Mania	MathPlayer	Microsoft Office Suite
Microsoft SQL	Microsoft Visual Studio Professional	MODELA
Movie Magic	Packet Tracer	Persian Tutor
Psych Mania	Python	Pro Tools
QuickBooks	Reading Shape-Up	SOLIDWORKS
Soloist	SPSS—Statistical Analysis	TUKAcad
Vectorworks	Windows Operating System	Write It Right

ZoomText	ZXP Series Toolbox	Wireshark
----------	--------------------	-----------

DRAFT

ANALYSIS AND EVALUATION

The College has made significant investments in technology to provide up-to-date technological tools for all areas of the College.

The College uses various mechanisms to evaluate how effectively equipment and facilities meet the needs of programs and services for both classroom and online instruction. The Education and Facilities Master Plan includes information on online education and a 20-year plan, which is updated every five years (III.C.1-9). The District Technology and College Technology plans serve as additional means for evaluating the effectiveness of equipment and facilities related to online education. The FCSS is supported with staff and resources. Equipment in the FCSS is determined through needs assessments, surveys, resource allocation requests and committees, such as the Technology Committee, DOEC, the Online Education Committee and the DTC. These committees evaluate the effectiveness of equipment and facilities dedicated to online education. Basic Aid Allocation Recommendation Committee (BAARC) funding requests reflect the need for additional infrastructure to support online education. The FCSS computer lab and the student computer labs in the Library and LRC Tutoring Center are maintained and updated regularly per the equipment replacement schedule. Wi-Fi services allow students to use mobile devices for their online courses. Additional requests to update Wi-Fi coverage are considered through the DTC's allocation process.

The College has an equipment replacement schedule for labs, equipment, and other needs. Every four years, the College refreshes the technology in offices, labs, and classrooms (III.C.1-10; III.C.1-11). Resource allocation requests allow for off-cycle needs. The LMS is a key feature that supports online education, and is maintained at high levels in a collaboration between the District and the College. The District ensures that the LMS has sufficient storage to meet the needs of faculty and students. As the use of the LMS has increased (due to increasing populations and offerings), so has additional support for the LMS through the District and College. Blackboard updates take place during times that will least impact students. Finally, the District has service-level agreements with the vendor Blackboard to ensure reliability, disaster recovery, privacy, and security.

The College's Technology Committee created technology replacement schedules to ensure all hardware is refreshed and meets the needs of the institution. The help desk software allows end-users to provide feedback on the support they receive. The majority of this feedback is positive with end users complimenting the support and expertise provided (III.C.1-12). Technology. Discussion regarding technology needs take place at Technology Committee, and the committee can make recommendations for funding (III.C.1-13).

The College provides adequate professional support to ensure that the College meets its institutional goals and objectives. There is a firm commitment to providing up-to-date technology to all areas of the campus. The College follows the replacement schedules outlined in the Technology Plan and allocates sufficient funds to continue the refresh cycles.

The facilities provided, 50 computer instructional labs and 1553 computers, are adequate. Upgrades to the College's infrastructure have left the College ready to handle current and future bandwidth demands. Furthermore, the upgrade and expansion of the wireless network will ensure the College meets the needs of a mobile student body and workforce.

III.C.2. The institution continuously plans for, updates and replaces technology to ensure its technological infrastructure, quality and capacity are adequate to support its mission, operations, programs, and services.

EVIDENCE OF MEETING THE STANDARD

Technology Plan

The College recognizes the importance of technology and has a Technology Committee whose purpose is:

To engage in collaborative discussions regarding college technology, disseminate information to the campus community, empower students, faculty, and staff through the deployment and availability of technology resources, consider the concepts of universal access and design, and provide direction for technology that advances and supports our strategic plans.

The Technology Committee has broad representation from College constituent groups, including students, faculty, classified staff, classified managers, and academic administrators. The committee is responsible for creating the Technology Plan, reviewing it every year during the spring semester, and updating it accordingly.

An Online Education Committee with heavy representation from faculty across the College engages in collaborative discussions regarding online education. The District has a centralized LMS that is the primary tool for online education. Saddleback and Irvine Valley College have representation in DOEC. DOEC meets monthly and discusses all items related to online education, such as building blocks for the LMS, migration to Canvas, and other topics affecting online instruction (III.C.2-1). The District Technology Committee (DTC) has representation from Saddleback College, Irvine Valley College, and district services. DTC discusses all items related to technology and creates the District Technology Plan. The District Technology Plan is updated annually. DTC has broad representation from all three entities.

During 2015, the College's Technology Committee worked on creating the 2015-2020 Saddleback College Technology Plan (III.C.2-2). A draft of the plan was discussed at various. Various governance committees, such as Consultation Council and Management Team, discussed a draft of the plan. The College's Technology Committee approved the final version of the plan in spring 2016 (III.C.2-3). The plan has eight goals and 34 objectives. The technology goals align with the College's strategic goals and with the District Technology Plan goals.

Members of the Technology Committee, with input and feedback from faculty, students, staff, and management, developed the Technology Plan. The objectives were submitted from various areas of the College, reviewed, discussed at length in the Technology Committee, and finally approved and added to the plan. This discussion included engaging in discourse with the responsible parties of the objectives and agreeing on target completion dates.

The College's Technology Committee used four data gathering methods to guide the development of the Technology Plan. First, the committee conducted a successful technology survey in fall 2014 that resulted in 1528 student responses, 65 faculty responses, and 41 staff/management responses (III.C.2-4). Second, the committee had two open forums that were attended by students, faculty, and staff/management (III.C.2-5). One forum took place midday, while the second took place in the evening to provide the College community with multiple options for attendance. An internet blog was the third method of data collection. The fourth method was discussion through various College governance groups. These methods led to the collection of rich data that helped guide the development of the plan. The outcome was data-driven technology goals and objectives that will aid the College in achieving its mission, vision, and strategic goals.

The College strives to meet community, industry, and labor demands. As such, the College is in a constant state of flux. The College has a long-term 20-year construction plan. The Technology Committee developed a set of standards to better assist in classroom-technology construction planning (III.C.2-6). The committee developed these standards to ensure a minimum level of technology in classrooms and to aid architects when designing buildings (III.C.2-7). The standardization of equipment assists in system integration, support, and the maintenance of equipment. Classroom technology standards were embedded into the Technology Plan and are updated, with the rest of the plan, every spring semester.

Administrative Unit Reviews

All divisions and departments submit an administrative unit review (AUR) that outlines unit objectives and needs (III.C.2-8). The AUR documents the need for the technology funding requests submitted by each area. The College uses a centralized planning process to determine the College's technological needs. The College's resource allocation process is the main process used for technology funding requests. Based on their needs, all divisions and departments submit their technology funding requests every year through TracDat. The wing and division/department compile funding requests and submit them to the College Resource Committee, the main governance body that reviews such requests. CRC sends all technology funding requests to the Technology Committee for initial review, feedback, and a ranking of high, medium, or low.

Resource Allocation Process

The College engages yearly in resource allocation. During the spring semester, all divisions and departments submit their resource allocation requests, which include technology funding requests. All requests approved are used for budget planning. Additionally, major technology investments of \$150,000 or above qualify for basic aid funding. Basic aid technology requests are submitted annually beginning in December and with a deadline of January. All divisions and departments can submit technology funding requests through the college resource allocation process and/or through the basic aid technology funding process.

The College uses two primary forms of funding for technology projects:

1. General Fund
 - a. Unrestricted: 010
 - b. Restricted : 011
2. Basic Aid or Capital Outlay Fund: Fund 40

The annual planning prioritization and resource allocation process is the College's process for requesting the funding of new technology (III.C.2-9). This process primarily uses general fund for the funding of approved technology requests.

All technology funding requests for basic aid or fund 40 initiate at the colleges or district services. Each entity follows its own process for the creation and prioritization of requests. The College receives all basic aid funding requests from all divisions/departments and the Technology Services department compiles them. These requests are presented to the Management Team, Consultation Council, and Technology Committee. These governance

groups provide their input regarding priorities. A list of priorities is created and presented again to these governance groups before voting takes place at the Districtwide Technology Committee.

All entities' technology requests for basic aid funding are discussed and prioritized at the Districtwide Technology Committee. The BAARC makes the final recommendation to the Chancellor (III.C.2-10).

The College and the District recognize the need to support the LMS and related programs (such as Turnitin and LMS building blocks) for the success of online courses; the District and colleges work together to allocate resources to support these needs. In addition, the District has an innovation fund to support new ideas and needs. The College has discussions, research, and analysis as part of the resource allocation process, during which each department and division selects and prioritizes its needs. This information goes to the respective unit vice president for prioritization and then up to the CRC for allocation decisions. Resources are utilized in a variety of ways; for example, new instructional technologies are typically piloted for a year, evaluated by the Online Education Committee, and if they are effective, recommendations are then made to institutionalize those resources. The process is similar for needed equipment or hardware. Requests are made through divisions, and then routed to the appropriate channels during the CRC process as well as the Technology Committee for ranking and consideration.

Technology Replacement

There are two primary replacement schedules. There is a replacement schedule for computer instructional labs. These schedules illustrate each lab and its replacement cycle. There is also a replacement plan for all other computers and operational systems. The computer instructional labs have unique replacement needs due to the various educational programs served by the labs. The College replaces computers based on approved computer-replacement schedules. Figure 1 demonstrates the number of computers replaced in the last three years.

The College retains service maintenance agreements in all instructional software that entitles the programs to the latest software versions (III.C.2-11). This subscription enables instructional programs to stay current with technology and have access to the latest versions of the software. Technology Services technicians, in consultation with individual faculty members, upgrade the software every semester. Furthermore, based on faculty requests, additional licenses are purchased to meet the demands of growing enrollments.

The College is currently assessing the possibility of migrating to Canvas, a new learning management system. A number of discussions and presentations have been conducted to offer faculty various opportunities for feedback and discourse (III.C.2-12; III.C.2-13). Discussion takes place in the Online Education Committee as well as at the District Online Education Committee.

Information has also been provided to the Academic Senate. The discussion is ongoing with plans to make a final determination in spring 2017.

Number of Computers Replaced by Year

There has been a multitude of infrastructure replacements over the past years. The College has installed an air-blown fiber (ABF) infrastructure that connects every IDF to the MDF with two ABF tubes (III.C.2-14). Twelve strands of fiber are in one tube, leaving the second tube available for future growth and demand. The College replaced all end and core Cisco switches after the ABF upgrade, allowing gigabit bandwidth to the desktops. In 2015, the College purchased a new NetApp SAN and upgraded the controller in the existing NetApp SAN. The SANs are now setup in high availability (HA) mode. Additionally, the College replaced a number of servers to keep up with College demands.

Technology Services plans to expand the deployment of virtual desktop infrastructure (VDI) over the coming years. The department has purchased a Nutanix block as a foundational block to the expansion of VDI. The plan is to virtualize 100 desktops over the 2016-2017 fiscal year. Based on technology survey results, the top two technology items for students and College employees is wireless and classroom technology. Technology Services is embarking on a phased wireless network upgrade. The first phase will cover high-demand areas, such as the LRC, BGS, and student services buildings including the quad external area. Cisco Wave 2 wireless technology will be deployed to expand the wireless network. Phase two of the wireless expansion project will cover all the inside of the remaining buildings. The third phase will cover all athletic fields, open areas, parking lots, and roads. Simultaneously, Technology Services secured phase one funding for the refresh of all classroom technology. The plan is to follow the

Technology Committee approved classroom technology standards and deploy these standards in every College classroom.

The College is migrating from SharePoint 2010 to SharePoint 2013 to take advantage of the integration with Office 2013 and mobile technology. SharePoint is the main intranet portal utilized by all committees for data storage and collaboration. Furthermore, Technology Services replaced the multiple outdated backup solutions currently in place with a cloud-integrated data protection Barracuda backup solution. The Barracuda backup solution protects the College's physical and virtual systems and all institutional data.

ANALYSIS AND EVALUATION

The College has made substantial investments in its technical infrastructure. The College set up an air-blown fiber infrastructure that provides two tubes to each IDF homerun back to the MDF. One of the tubes has 12 strands of fiber. The second tube is available for future growth. The College upgraded its entire Cisco switch infrastructure. The upgrade included the core switches and the edge switches. Each switch stack in the IDF has two 10 Gbps modules connected with fiber back to the core switches. One of the 10 Gbps modules connects to one core switch, while the other 10 Gbps module connects to the other core switch. This setup provides maximum infrastructure reliability.

The College hired Veritas to conduct a radio frequency (RF) analysis and PlanNet to create a plan for wireless coverage of the entire college (III.C.2-15; III.C.2-16; III.C.2-17). This wireless expansion and upgrade project will take into consideration the realities of the number of wireless devices students use. The first phase of the project will cover the highest-used sites, including the LRC, the Business/General Studies, and student services buildings. The first phase will also cover the quad area, an external location. The second phase will cover all the inside of the buildings. The third phase will to cover all other areas, including athletic fields and open spaces.

The Technology Plan and administrative unit reviews integrate technology needs into the College's strategic planning process. Various surveys, open forums, and blogs informed the Technology Plan. This centralized planning process allows student, faculty, staff, and management input into the type and quality of campus technology, and this input is considered during purchasing and upgrades.

The annual resource allocation and BAARC processes allocate technology needs and funding requests. The respective divisions or departments first rank all technology requests before submitting them to the Resource Committee. The Technology Committee, College Resource Committee, Consultation Council, Districtwide Technology Committee, and BAARC Committee

review their respective requests. These governance groups have ample representation from all constituents.

The technology needs and funding requests processes, in combination with the established equipment replacement schedules, ensure that technology is adequate to support the College's programs and services. The process and replacement schedules effectively meet the needs of the College. The College has committed significant monetary resources to enhancing and refreshing its technology (III.C.2-18; III.C.2-19; III.C.2-20).

III.C.3. The institution assures that technology resources at all locations where it offers courses, programs, and services are implemented and maintained to assure reliable access, safety, and security.

EVIDENCE OF MEETING THE STANDARD

The majority of the College's courses, programs, and services are onsite. The College has a 1 Gbps internet connection through CENIC managed by AT&T. The District Services provides the main internet connection. CENIC also configured a private Cox WAN to sister college Irvine Valley as a backup Internet link. Until recently, that bandwidth had a CENIC hardware limitation of 100 Mbps. Once the CENIC hardware refresh is complete, this backup link should have a maximum capacity of 1.8 Gbps.

There is a 100 Mbps internet connection as a backup via District Services. District Services is looking to configure another 1 Gbps connection with a carrier to serve as a backup so as to not rely on the 100 Mbps connection. The College houses the District Services on part of the second floor of Health Sciences building and on the entirety of the third floor. However, the College and the District Services have two separate networks.

The College has a satellite office located in Laguna Woods that houses five computers. This remote site connects through two Cisco virtual private network devices that create a site-to-site virtual private network (III.C.3-1). The College contracts with Cox for a 100 Mbps internet-access business line. Technology Services provides full computer and network support for this site. The Laguna Woods office has access to the same services provided to on-campus staff.

The College has three levels of security. The College has two firewalls configured active/passive. The firewalls are the first line of defense guarding the institutional network. These firewalls are configured to protect computer systems. The next level of system protection is Symantec, which is used at the local workstations and servers as anti-virus protection. The College has also deployed a network access-control system that assists in providing network-level protection to the network. All staff must login with a unique

username and password per Board Policy (BP). The College uses active directory to provide granular user permissions to systems and all technical resources. The use and access of the College's intranet portal, SharePoint, is protected through active directory authentication and requires a username and password. User rights and permissions control SharePoint access.

The expansion of the "Internet of Things," whereby more systems are connecting on the network, requires segmentation to ensure data security. Logical segmentation of the network using virtual local area networks (VLANs) provides data protections. For example, the irrigation system is in its own VLAN, the HVAC system is in its own VLAN, the lighting system is in its own VLAN, among many other segmented systems (III.C.3-2).

The College is implementing electronic access control for all doors (III.C.3-3). This will give the Police Department the ability to lock all doors in case of an emergency. Additionally, this will enhance security. The College has also implemented Internet Protocol (IP) cameras. These cameras reside on their own VLAN, and only the Police Department can view the content of the cameras.

There is redundancy in every IDF with two 10 Gbps fiber modules connected to each switch stack (III.C.3-4). Each 10 Gbps fiber module has a homerun connection to either core switch A or B. This type of network redundancy provides a high level of network reliability. The College uses server virtualization technology and hardware redundancy to host these virtual servers. To ensure reliability, server clusters with RAID 5 are applied to all hardware.

The College disaster recovery strategy makes use of replication between two identical SANs. Irvine Valley College houses one of the SAN, while the College houses the primary SAN. These two SANs replicate constantly, securing institutional data (III.C.3-5). The systems are also backed up daily, and the College purchased a more robust backup system, Barracuda, to further enhance its disaster recovery strategy (III.C.3-6).

The College uses three primary technologies for emergency notification: Blackboard Connect, InformaCast, and our Dark Site (wherein the College website turns completely dark). Blackboard Connect deploys mass emails and text message notifications. Additionally, InformaCast sends an emergency notification through the College's VoIP Cisco phones. The third method makes the College website appear dark, providing only emergency information. Every October, each of these systems is tested during the Great California ShakeOut.

The District has two governance committees that focus on business continuity and the proper use and destruction of records. The Business Continuity Planning Committee meets quarterly and has broad representation from Saddleback, IVC, and district services (III.C.3-

7). The committee's purpose is to integrate the District and college plans into a comprehensive, integrated business continuity plan and to coordinate business continuity needs Districtwide (III.C.3-8). In 2014, the Business Continuity Planning Committee provided all of its members and District executives with priority calling cards. These cards can be used in case of an emergency and provide the user/caller with priority access to the phones lines.

The Custodian of Records Committee—which meets bi-annually, or as needed—is responsible for outlining a clear process flowchart with defined roles and responsibilities for proper response to all requests on records (III.C.3-9; III.C.3-10). The committee discusses how records need to be handled and stored from inception to deletion (III.C.3-11).

Per direction from the District's bank, the District contracts Trustwave as the PCI-DSS QSA (qualified security assessor). They provide monthly external vulnerability scans of the PCI network as wells as the self-assessment questionnaire. Additionally, the District is currently working with Trustwave to finalize a statement of work for a Districtwide PCI gap analysis (III.C.3-12).

The College uses Blackboard as the LMS (III.C.3-13). Students use their active directory ID and password to access the system. Blackboard is accessible at all times from any system that has internet access. Blackboard's managed hosting has an uptime service-level agreement of 99.9%. Additionally, the hosted solution provides 24/7/365 operations and support, a Tier 4 data center, Tier 1 redundant internet connections, and redundant data backups.

ANALYSIS AND EVALUATION

The Technology Services department has a professional technical team of 13 full-time and two part-time employees, an administrative assistant, an assistant director, and a director. This professional team manages and maintains the College's technological infrastructure and equipment. The District IT team also plays a crucial role in supporting the infrastructure, and both departments work closely with each other.

Technology Services has deployed various technologies to aid in the maintenance and support of the infrastructure. Systems such as WhatsUp Gold monitor the network and send email and text messages when systems malfunction. Fusion software to monitor projectors and report anomalies is deployed. Additionally, LogMeIn is a tool utilized by the Help Desk to provide remote technical support; this feature lessens the time a technician spends in the field.

The College has redundancy throughout the network infrastructure. There are two core switches, and each IDF switch stack has two 10 Gbps modules. One 10 Gbps module connects to one core switch while the other 10 Gbps module connects to the other core switch. This provides reliability and redundancy throughout the College network. Additionally, there is a 1 Gbps Internet connection and a 100 Mbps backup. The College will soon upgrade the backup to 1.8 Gbps.

Technology Services has two identical SANs replicating all data. Irvine Valley College houses one SAN, while the College's MDF houses the primary SAN. This is the current disaster recovery strategy. Additionally, the College is looking to consolidate its multiple backup systems into an enterprise backup technology solution from Barracuda. The Barracuda solution will use both on-premises and cloud software. The College has appropriate systems to ensure reliability and safety.

III.C.4. The institution provides appropriate instruction and support for faculty, staff, students, and administrators, in the effective use of technology and technology systems related to its programs, services, and institutional operations.

EVIDENCE OF MEETING THE STANDARD

The College offers technology training and support opportunities throughout the year to enhance the knowledge of students, faculty, staff, and managers. One-on-one training—the preferred method of faculty, staff, and management—takes place throughout the year through the FCSS and Technology Services offices. Professional Development Week, which occurs twice each academic year, is an additional way faculty receive appropriate instruction on the effective use of technology. A Help Desk for students, faculty, staff, and management is available to provide support on technology systems. Technicians, staff, and faculty support 50 instructional computer labs available for students to ensure access and knowledgeable. In addition, specialized technology systems and software are available for students with accessibility needs, and these systems come with proper technical support.

Professional Development Week

At the beginning of every semester, the College offers one week (five days in the fall, and four days in the spring) of professional development (III.C.4-1). A wide range of workshops offered during this week make faculty, and other attendees, aware of institutional operations and provide training in the effective use of technology systems. Here is a sample of the workshops offered in spring 2016:

- Video Creation

- Common Assessment Initiative
- Our Favorite Apps
- Voice Thread
- Online Education Initiative
- Geek Report—the Internet of Things and Analytics

Throughout the year, the College supports other professional development opportunities related to technology and online education.

Classified staff have an all-day staff development event, which provides a multitude of training activities (III.C.4-2). The technical staff of Technology Services have an online subscription to technical training videos, which include an extensive video library of technologies. The College also provides Lynda.com—an online training website with a comprehensive library of training videos—to all employees. College employees can set their own online learning pace and plan through Lynda.com (III.C.4-3).

The College uses surveys to determine faculty, staff, and management's favored methods of training and professional development. In fall 2014 fall, the Technology Committee conducted a survey to determine the preferred training method of faculty. The findings showed that faculty prefer one-on-one training. Training videos were the second preferred method, and group training was the least preferred. These findings were information to the staff who conduct one-on-one trainings with faculty. The FCSS is a dedicated resource for faculty to receive training on the effective use of technology. The center has a dedicated computer lab with dual boot computer operating systems that faculty, while assisted by professional staff, can use to hone their skills.

Technology Services established a formal Help Desk that provides support to all faculty, staff, and management. Knowledgeable and friendly technicians staff the Help Desk, and assist College employees. The majority of technical calls are resolved over the phone; staff either walk the caller through the steps on how to resolve the issue, or resolve the issue by taking remote control of the caller's system. The Help Desk is available Monday through Thursday from 7:30 a.m. to 8 p.m. and 7:30 a.m. to 5 p.m. Friday. Employees can call the Help Desk, walk-in to the Technology Services department, email to create a work order, or submit a work order online. Additionally, an application specialist within Technology Services provides one-on-one training to staff and management. Training is requested by calling the Help Desk, creating a work order, or by speaking with the application specialist.

The College offers various forms of support for students. There is a dedicated student technical-support team that focuses on helping students in all areas related to technology, including accessing the LMS, password resets, and email problems. The Library houses the student Help Desk team for ease of access and assistance. This team provides assistance both on the phone

and in person. In addition to technical support, the College offers various financial workshops for students (III.C.4-4). Financial Aid offers free weekly workshops to help students complete the state and federal financial aid applications. At these workshops, students receive hands-on assistance with applications.

Students have access to 50 instructional computer labs located throughout the campus, while the FCSS is dedicated to faculty use. There is a total of 1553 computers in these labs. The LRC houses close to 200 computer systems for student use, and it is the most heavily used student computer lab on campus.

Learning Resource Center Computer Lab

The Disabled Students Programs and Services (DSPS) offers a wide variety of support services and specialized instruction. This department's High Tech Center uses the latest hardware technologies and provides a wide variety of software, such as Dragon NaturallySpeaking, JAWS, ZoomText Extra, and Kurzweil 3000. The College follows web accessibility guidelines in its services to people with disabilities.

Accessibility workshop and equipment available to 100+ tutors and 4K+ students in Tutoring Center

As of 2014, all LRC tutors are paid to attend mandatory professional development trainings. These professional development sessions cover a wide variety of topics, including, but not limited to, the Socratic tutoring method, time management, subject-specific best practices, and more. The LRC, in collaboration with the DSPS Program and the College's alternative media specialist, trained tutors on a variety of software and hardware systems in order to support all levels and types of learners. Additional training and support for Kurzweil (cloud-based reading software) and smartpen recording hardware is provided to tutors on a regular basis. Moreover, 10 smartpens and three Kurzweil scanning devices are available to tutors and students in the center. In addition, this semester, tutors are going through training to identify students who are

struggling with reading as these students are often unaware that they are dealing with a possible issue like dyslexia, or mild ADD, ADHD, which may be the cause of their struggles.

Workshops for students on how to succeed in online education (WOW-week of workshops)

During Professional Development Week in both fall and spring, the College hosts the Week of Workshops (WOW) for all students (III.C.4-5). These faculty and student-led workshops are designed to help students prepare for their courses and to create a connection with faculty outside of the classroom. This Collegewide effort has increased in size and scope, and has scaled up successful workshops, including those that address how to succeed in online courses. Last year, 10 workshops focused on the topic of how to succeed in an online course. WOW week participants took surveys before and after each workshop. Beforehand, 66 percent of WOW participants said they felt “not ready” or “somewhat ready” for their courses in the upcoming semester. However, after the WOW workshop over 82 percent of the respondents responded that they felt “very ready” or “ready” for their courses.

ANALYSIS AND EVALUATION

The College provides effective and ongoing instruction and support in the use of technology for students, faculty, staff, and managers.

The College has numerous training workshops for students throughout the academic year. These workshops survey participants to understand their needs. This feedback drives future topics for workshops. The successful student technology survey in fall 2014 also guides the training provided for students. The volume and type of questions the Help Desk fields also guide student trainings.

The College sends a professional development survey to all employees. The survey asks respondents a series of questions that help guide the type and modality of trainings offered for employees. During Professional Development Week, surveys ascertain the value and effectiveness of the workshops. This feedback helps guide workshops offered at the following Professional Development Week. Employees originate much of the technology training by calling the Help Desk and making an appointment with an application specialist II who conducts one-on-one training with employees. The employee is then asked to provide feedback through the work order in the Help Desk system.

The College conducts the Week of Workshops sessions meant to prepare students for success in online classes. Faculty and students lead these workshops, contact which provides student participants with an opportunity to connect with faculty outside of the classroom.

FCSS is dedicated to faculty support and focuses primarily on training faculty in all technology manners related to instruction and, especially, online education. Instructional training options range from specific department/discipline sessions to one-to-one sessions, to new faculty orientations, to myriad workshops focusing on ways to incorporate the latest instructional technology into classes.

III.C.5. The institution has policies and procedures that guide the appropriate use of technology in the teaching and learning processes.

EVIDENCE OF MEETING THE STANDARD

The SOCCCD has BPs and Administrative Regulations (ARs) that guide the appropriate use of technology at the College.

There are primarily five BPs guiding the appropriate use of technology (III.C.5-1; III.C.5-2; III.C.5-3; III.C.5-4; III.C.5-5). These are BP 3310, Records Retention and Destruction; BP 3508, Public Safety Camera System; BP 3530, Compliance with Payment Card Industry Data Security Standards PCI-DSS; BP 4000.2, Electronic Communication; and BP 5615, Student Records, Compliance with Family Educational Rights and Privacy Act (FERPA). The BPs are more broad and strategic, while ARs provide more operational detail.

There are nine ARs that cover appropriate use of technology (III.C.5-6; III.C.5-7; III.C.5-8; III.C.5-9; III.C.5-10; III.C.5-11; III.C.5-12; III.C.5-13; III.C.5-14). AR 4000.2 is intended to inform all users (employees, student, and guests) of the rules regarding use of the District's digital information network. This regulation has five main sections focusing on the permitted uses of the network, user responsibilities, prohibited uses, incidental personal use, and the enforcement of the regulation.

There are two ARs that focus on records, including student records. AR 3310 defines records as "records, maps, books, papers, data processing outputs, and documents of the District required by Title 5 to be retained, including, but not limited to records created originally by computer and 'electronically stored information.'" This AR focuses on records retention and destruction. AR 5615 focuses on student records, and this regulation implements the federal Family Education Rights and Privacy Act of 1974 (FERPA) and state law.

ARs 3726 to 3730 focus on information technology; they cover data classification, access control, physical security, logging and monitoring, and remote access. AR 3726 classifies data into three categories: public, internal, and restricted. This AR assists understanding of the importance of securely handling information and ensuring data protection. AR 3727 focuses on access control, and its objective is to provide internal controls for access to District sites, information, and

applications. The purpose of AR 3728 is to protect the confidentiality, integrity, and availability of the data contained within the District's information systems from potential physical and environmental threats. AR 3729 ensures proper logging and monitoring so that potential security incidents can be detected early and dealt with effectively. Finally, AR 3730's objective is to control access to District information systems when connections are made to those systems from a remote location.

AR 3508 delineates the purpose and scope of the public safety camera system. It states that the District operates a camera system to ensure a safe environment for those who live, work, and visit the District. Additionally, video from the cameras will be recorded on a 24-hour basis, seven days a week. The video is to be kept for an entire year and thereafter erased with the written consent of the campus chief of police.

The Saddleback Student Handbook provides a wealth of information for students by outlining available services, success tools, programs, and important College policies (III.C.5-15).

Processes and procedures regarding technology at both the College and District-level are collaborative and ensure that the appropriate constituent groups are included in discussions and decision-making. A good example of this is the current evaluation of Canvas as a possible replacement of the current LMS, Blackboard. The evaluation process began by first procuring agreement from faculty to participate in the Online Education Initiative (OEI), which is a statewide initiative aimed at centralizing some of the online education services within the California Community College (CCC) system and transitioning all colleges to a common LMS, Canvas. The College has primarily been participating in the OEI as a pilot college for tutoring services. However, there are also currently six faculty piloting the Canvas LMS. The process of making a decision whether or not to replace Blackboard with Canvas has been very thorough and inclusive. There have been opportunities for participation by faculty, staff, and management to consider all aspects of Canvas, including its instructional capacities, costs, and support services as well as the other software/hardware needed to support it. Additionally, there has been discussion at the Online Education Committee and the Districtwide Online Education Committee as well as presentations to the Academic Senate.

ANALYSIS AND EVALUATION

The College has several BPs guiding the appropriate use of technology. These policies cover a broad spectrum from FERPA to record retention and destruction. Complementing these BPs are ARs, which provide more operational detail. The importance of information security is highlighted by the five ARs guiding it. The combination of BPs and ARs guides the College's students and personnel on the appropriate use of technology.

Additionally, the Student Handbook is an excellent source for students of all College procedures and institutional policies.

The College established procedures to follow when entertaining different technologies in classrooms. The College is following these procedures now as it evaluates Canvas as a potential replacement for the existing LMS, Blackboard.

III.D: Financial Resources

III.D.1. Financial resources are sufficient to support and sustain student learning programs and services and improve institutional effectiveness. The distribution of resources supports the development, maintenance, allocation and reallocation, and enhancement of programs and services. The institution plans and manages its financial affairs with integrity and in a manner that ensures financial stability. (ER 18)

EVIDENCE OF MEETING THE STANDARD

The College is part of the South Orange County Community College District (SOCCCD), which is a basic aid district. This means that the District receives money from local property taxes to fund its general operations rather than receiving money from the state. The BOT has adopted budget development principles and practices that are designed to maintain the financial integrity of the District and the colleges. These principles and practices were developed jointly by the colleges and District and are codified as BP/AR 3100, Budget Preparation; BP/AR 3101, Budget Management; BP/AR 3101.5, Fiscal Management; and BP/AR 3110, Basic Aid Funds Allocation Process (III.D.1-01, III.D.1-02, III.D.1-03, III.D.1-04, III.D.1-05). BP 3100 establishes the Budget Development Guidelines, found within each year's adopted budget as the guiding principles used in budget development within the District (III.D.1-06). The guidelines were developed by the District Resources Allocation Council (DRAC) and are based on the board's philosophy of supporting and following fiscal policies that:

1. Ensure wise and prudent use of public resources.
2. Promote financial strength and stability.
3. Maximize educational opportunities for students in accordance with the District's mission statement.

DRAC is a participatory governance council charged with making recommendations for the income allocation model on which the District's budget is based (III.D.1-07). The model developed by DRAC and contained within the guidelines stipulates that the colleges and the District be allocated revenue using the state SB 361 funding formula for all ongoing operating expenditures. Property tax revenue anticipated over and above the state funding formula is designated as basic aid funding and is used primarily for one-time expenditures.

The process for the allocation of basic aid funding is delineated in BP/AR 3110. This process ensures that basic aid funding is allocated for purposes related to capital construction, major renovation, infrastructure projects, and site development; the retirees benefit trust fund and other long-term obligations; trustee elections, legislative advocacy, major legal fees and judgments; major technology initiatives; and support for scheduled maintenance and smaller renovation projects.

The Basic Aid Allocation and Recommendation Committee, (BAARC), a Districtwide committee which has College and participatory governance representation (III.D.1-08), is responsible for making recommendations for the allocation of basic aid funds to the chancellor and for ensuring that recommendations consider the other principles contained within the Budget Development Guidelines, including the maintenance of at least a 7.5 percent general fund reserve.

A District budget allocation model (III.D.1-09) is the computational tool used to allocate general fund unrestricted resources to the colleges. The College and the District work together closely to determine full-time equivalent students (FTES) calculations and income projections, and the College and District meet prior to submission of FS320 reports to ensure FTES are reflected accurately.

The College has efficiently and prudently managed its financial resources. During College budget planning, the relationship between ongoing revenue and ongoing expenditure has always been considered, and the College has been careful not to obligate short-term revenue to long-term expenditures. As a result, the College has had sufficient resources to support existing instructional programs and support services and has been able to allocate resources to address institutional plans.

This planning strategy has served the College well and, during periods of reduced budgets (as experienced in the 2009-2010 fiscal year), has enabled the College to continue to support instructional services and student services without the need for sudden and dramatic budget cuts. Additionally, the College has been in a fiscal position to move forward and continue to apply funds to institutional plans. The College has consistently ended the fiscal year with a healthy ending balance (III.D.1-10).

The College complies with California's 50 percent law, which requires that a calculation (by state formula) of 50 percent or more of the institution's resources be expended for direct instruction. The College computes the 50 percent law calculation based on College expenditures only. This enables the College to track its effect on the overall District calculation as well as to

ensure maintenance of effort. The College has never fallen below the 50 percent benchmark and frequently far exceeds it (III.D.1-11).

In addition to the College's unrestricted general fund, the College receives restricted funds for state-funded categorical programs, local income (such as material fees, parking and health center revenue), grants and agreements, Community Education, ASG, and Foundation revenue. In recent years the College has placed increased focus on revenue generation from successful grants, a method which has increased available resources. The College's restricted and unrestricted general fund budget for the 2015-2016 fiscal year totaled \$131,616,423. The District budget for all funds totaled \$711,000,000 (III.D.1-12). The district's funding base is outlined in the adopted budget (III.D.1-06), and foundation funding is delineated in the Saddleback College Foundation Annual Report (III.D.1-13) and Annual Audit (III.D.1-14).

In compliance with the Budget Development Guidelines, the District has established an unrestricted general fund contingency of 7.5 percent, and the College maintains an additional contingency within its operating budget, which is \$7 million for 2016-2017 (III.D.1-06). The SOCCCD has prepared well for long-term financial obligations, such as retiree health benefits, and the College and the District have fully paid off all prior-year debt obligations.

ANALYSIS AND EVALUATION

The SOCCCD operates within a resource allocation model determined by the SB 361 funding formula. By developing an operating budget in accordance with this resource allocation model, College operations are protected from the volatility of property tax revenue, thereby eliminating the possibility of devastating cuts to programs and services were the District's basic aid status to ever change. Furthermore, property tax revenue collected over and above the SB 361 calculation is allocated and expended as received, and the District has not obligated future anticipated property tax revenue by incurring debt.

Both the District and the College allocate resources in a fiscally prudent and responsible manner. One of the College's strengths is the manner in which it approaches financial planning. College finances are managed conservatively to ensure students' needs are met on both a short and a long-term basis. In recent years, College financial planning anticipated declines in operational revenue combined with inflationary increases in expenditures. This short-range and long-range planning has enabled the College to maintain fiscal integrity; during the nationwide economic recession and state budget crisis, no general-fund layoffs took place at the College, and the general fund offset a portion of the state reductions to categorical programs. Due to the College's conservative long-range fiscal planning, the College is able to develop a balanced budget with a sufficient contingency each year, and District reserves remain healthy. Benchmarks for fiscal stability are always met and are often exceeded.

College funds are sufficient to support educational improvement and innovation. The District's resource allocation process (AR 3110) ensures that funding recommendations are driven by the SOCCCD Educational and Facilities Master Plan (EFMP) (III.D.1-15); the Five-Year Construction Plan (III.D.1-16); the 20-Year Facility, Renovation and Scheduled Maintenance Plan (III.D.1-17); the Districtwide Technology Plan (III.D.1-18); Saddleback College Technology Plan (III.D.1-19); the 2014-2020 District Strategic Plan (III.D.1-20) and Saddleback College Strategic Plan (III.D.1-21); and other College and Districtwide plans. The College's budget development process ensures that funding is set aside for resource needs in support of College wide plans—such as Strategic Plan action steps, the Student Equity Plan, and the Basic Skills Initiative—and in response to departmental plans developed through the assessment and program review processes. The College Resource Committee (CRC) ranks requests for funding, and over \$1.4 million in requests were funded for the 2016-17 fiscal year in support of needs expressed through the program review (PR) and administrative unit review (AUR) processes and the strategic plan; these funds supported facilities, technology, equipment, and other institutional needs (III.D.1-22).

The district's audit report confirms the financial stability of the district and college (III.D.1-23). Saddleback College has a sufficient funding base and financially supports plans to support programs and services and improve institutional effectiveness; as such, the college meets Eligibility Requirement 18, Financial Resources.

III.D.2. The institution's mission and goals are the foundation for financial planning, and financial planning is integrated with and supports all institutional planning. The institution has policies and procedures to ensure sound financial practices and financial stability. Appropriate financial information is disseminated throughout the institution in a timely manner.

EVIDENCE OF MEETING THE STANDARD

The mission and vision are the basis for all financial planning and decision-making at the College. The College's strategic planning process begins with the review and revision of the Mission and Vision Statements (III.D.2-01), and these statements form the foundation from which all strategic goals, objectives, and action steps are developed (III.D.2-02). All planning on the level of academic programs and administrative units also begins with the College mission. Each department and unit develops a mission statement in alignment with the College mission, and during the PR and AUR processes creates objectives to attain this mission.

The budget development and planning processes of the College ensure that financial resources are used to address College plans. The process of institutional planning and the integration of those plans are institutionalized within the College culture. The Planning and Budget Steering Committee (PBSC) and College Resource Committee (CRC) processes ensure that requests for funding are supported by assessment results and other data, and that funded requests are in alignment with the College's mission and the 2014-2020 strategic planning goals (III.D.2-03) (III.D.2-04).

PBSC oversees the implementation of strategic planning goals, objectives, and action steps and measures and evaluates progress. PBSC has co-chairs—the director of planning, research and accreditation, and the director of fiscal and contract services. These co-chairs create a working relationship between the two offices that strengthens the integration of planning and budget. All financial decisions go through this body to ensure that all requests for expenditure are in alignment with the College's Strategic Plan before they are forwarded to the Consultation Council (CC), which, in turn, makes recommendations to the college president.

Both PBSC and CC include representatives of all College constituent groups, and both groups are primarily recommending bodies. Final decisions and accountability rest with the college

president. Based on input from the recommending bodies, PET—which includes the vice president for instruction, the vice president for student services, and the vice president for administrative services—meets with the president to set spending priorities and to ensure that these priorities can be accomplished within a balanced budget.

Strategic planning is designed to lay the foundation for all resource decisions. The College's Strategic Plan reflects a strategic assessment of what will best support student needs, now and in the future, and how existing programs need to be adjusted to better address changing needs. PRs and AURs are conducted every two years by all instructional programs and student support and administrative service units of the College. These reviews are central for both short and long-term planning. Additionally, PRs and AURs are the baseline documents for programs and units to outline resource needs. On an annual basis, through the needs assessment process, resources are requested via the Resource Allocation Request form.

Resource allocation decisions are informed by the Strategic Plan in conjunction with the needs of instructional programs and administrative units on campus as expressed in completed PRs and AURs. For example, all funding requests and allocation recommendations must include a justification that demonstrates an alignment between the Strategic Plan and a specific PR or AUR (III.D.2-05).

All resource allocation requests are submitted via TracDat and reference the relevant sections of a PR or AUR as well as the College's Strategic Plan. After being extracted from TracDat by the Office of Planning, Research, and Accreditation (OPRA), each College branch (instruction, student services, and administrative services) prioritizes the list. After the prioritized list is reviewed by the CRC, the list is parsed out to the Technology Committee and the Safety and Facilities Committee for review and analysis. After input from the functional committees, the consolidated list is unified by CRC. PBSC will review CRC recommendations to ensure accuracy and adherence to the process and will forward the recommendations to the CC, which, in turn, makes priority recommendations to the college president. Annual budgets are developed as an outcome of the planning process and are reviewed and discussed in Consultation Council, PBSC, Management Team, and other college venues (III.D.2-06) (III.D.2-07) (III.D.2-08)

Based upon all of the College's planning decisions, a budget is developed each year. Due to insufficient information from the state prior to adoption of the annual budget and the uncertainty of the state making revisions to the budget during the funding cycle, the College's financial planning process is, by necessity, flexible. Within those parameters, the planning process is linked to the mission, the current strategic planning goals and objectives, and the EFMP.

Faculty have the most direct impact on students. Thus, requests for new faculty must demonstrate alignment with the College mission and the strategic goals that relate to student

learning and success. The Academic Senate oversees a faculty hiring prioritization process in which alignment with the College's Strategic Plan is one of the key determining factors. The resulting prioritized list is then forwarded to the college president for further action. PBSC oversees the process for hiring new classified staff and managers, and this process also requires alignment with the Strategic Plan as well as PRs and AURs. Final approval of all positions rests with the college president, who determines hiring priorities in conjunction with the budget and the most critical needs to meet College goals.

On an annual basis PBSC:

- Reviews resources and make recommendations for the College budget based on the calculations and assumptions outlined in the DRAC model and the District's adopted budget.
- Monitors budget and resources to ensure success of the strategic planning process.
- Completes an annual review of the Strategic Plan in the spring of each year, and makes suggestions to CC for reprioritizing goals and strategies.
- Conducts an annual review of the CRC resource allocation process.

Each spring, CC may reprioritize strategies based upon the annual review and an evaluation of the accomplishments during the year. The strategic directions and goals, however, remain constant for the entire six-year period of the plan. This annual review allows for revision of the College mission, and every sixth year the College revises its values and vision along with the mission. This review also ensures that the College and District mission are in alignment as prescribed in BP 101, Missions, which requires an annual evaluation and, if necessary, revision (III.D.2-09).

There are a variety of financial control mechanisms in the form of policies and procedures to insure the District operates within its budget and remains financially sound. BPs and accompanying regulations related to budgeting are in the 3000 (Business) series. These policies provide direction for budget development. Another mechanism to insure control and prevent overspending is the District's financial software system, Workday, an enterprise resource planning program, which prevents the submittal and authorization of requisitions when funds in the specified account are insufficient. The District consistently ends the fiscal year with a positive ending balance. SOCCCD standard practice is to use one year's ending balance as the following year's beginning balance. The Annual Budget and Financial Report (CCFS-311) on the California Community College Chancellor's Office webpage demonstrates sound financial practices and financial stability.

ANALYSIS AND EVALUATION

The College has a reputation for excellence in academics and service to students. As a result of the College's strong commitment to its mission as well as continuous improvement and innovation, its financial resources are necessarily in great demand by all groups on campus; this demand increases the importance of linking financial planning to institutional planning in order to make decisions that best utilize College resources.

Financial planning at the College is integrated with all institutional planning. The College's financial planning processes are structured to reflect and support the College's mission and institutional plans. Adequate policies and procedures are in place to ensure sound financial practices and financial stability. Leaders in the participatory governance process are integral to the College's planning and budget process, and through the participatory governance processes appropriate financial information is disseminated throughout the institution in a timely manner.

III.D.3. The institution clearly defines and follows its guidelines and processes for financial planning and budget development, with all constituencies having appropriate opportunities to participate in the development of institutional plans and budgets

EVIDENCE OF MEETING THE STANDARD

Both the District and College follow clearly defined policies, guidelines, and processes for financial planning and budget development. The District's budget is driven by the DRAC model and basic aid allocation.

DRAC is the Districtwide participatory governance council charged with 1) making recommendations to the chancellor for the income allocation model upon which the budget is based and 2) developing and overseeing the allocation process for unrestricted general funds. As described in III.D.1 above, the DRAC model is an allocation model for the District which distributes available general fund unrestricted resources in accordance with the state's funding

formula (III.D.3-01). DRAC ensures a fair and equitable distribution of unrestricted general funds to Saddleback College, Irvine Valley College, District Services, contingency reserve, and general expenditures. In essence, the DRAC model allocates funding to the colleges in accordance with the SB 361 funding formula, and after DRAC model allocation the remaining funds are allocated by the Basic Aid Allocation Process outlined in BP 3110 (III.D.3-02).

This Basic Aid Allocation Process is implemented by the BAARC, which is chaired by the vice chancellor of business services (III.D.3-03). BAARC ensures that basic aid funding is allocated for purposes related to capital construction, major renovation, infrastructure projects, and site development; the retirees benefit trust fund and other long term obligations; trustee elections, legislative advocacy, major legal fees and judgments; major technology initiatives; and support for scheduled maintenance and smaller renovation projects. BAARC projects available funding based upon a conservative estimate for property tax and student fee income, which makes up the total amount available for allocation. After funding is allocated for long-term obligations and fixed expenses, this amount is subtracted from the total amount available to yield the net amount available for allocation. As outlined in BP/AR 3110, the net amount is allocated by BAARC based on recommendations by the Capital Improvement Committee (CIC) and the District Technology Committee (DTC); these recommendations are based on Districtwide plans, such as the EFMP, the Five-Year Construction Plan, the 20-Year Facility, Renovation and Scheduled Maintenance Plan, and the Districtwide Technology Plan as well as the Districtwide Strategic Plan, college strategic plans, and college technology plans. BAARC recommendations for the 2015-2016 fiscal year totaled approximately \$57 million (III.D.3-04).

PBSC reviews and monitors resources and makes recommendations to CC for the College budget in accordance with the calculations and assumptions outlined in the DRAC model and the District's adopted budget. PBSC and CRC processes ensure that requests for funding are supported by assessment results and other data and that funded requests are in alignment with the College's mission and the 2014-2020 strategic planning goals.

ANALYSIS AND EVALUATION

The College's processes for financial planning and budget development are clearly defined and widely communicated through BPs and administrative regulations, the District's DRAC and BAARC committees charge and the models developed by these committees, and by the College's budget development and resource allocation processes as outlined by PBSC and CRC. Each of the District and College committees and processes identified include constituency group representation. Committee information, including notes and handouts, are available on the College and District SharePoint sites (III.D.3-05) (III.D.3-06).

For College planning purposes the DRAC formula works very well. Because the formula is clearly understood and the fundamental principles of the model do not change, the College can clearly plan to allocate its resources with an understanding of the effect on income the following year. Because the rules surrounding income generation for the College will not change unless a recommendation is submitted by DRAC and is approved by the chancellor, the College is provided the tools to plan strategically. Additionally, the method used to calculate revenue for distribution through the model is reliable and consistent.

Fiscal Responsibility and Stability

III.D.4. Institutional planning reflects a realistic assessment of financial resource availability, development of financial resources, partnerships, and expenditure requirements.

EVIDENCE OF MEETING THE STANDARD

Assessment of available resources is an ongoing, year-round, multiyear process at the College. Funding for College programs and services is realized through multiple funding sources. The primary funding source is the general fund unrestricted allocation, which is calculated using a revenue-based District resources allocation model. The allocation of these resources is guided by District Budget Development Guidelines and the Basic Aid Funds Allocation Process. BAARC projects available basic aid funding based upon a conservative estimate for property tax and student fee income minus the Colleges operating revenues, which makes up the total amount available for allocation. Property tax estimates are provided to the District by the County of Orange, and the SOCCCD uses the most conservative estimates provided in its calculations.

Unrestricted general fund operating revenues allocated to the College are calculated using a revenue-based formula. While the College is part of a basic aid district, the District uses the state's S361 funding formula to calculate and allocate revenue to the colleges. In essence, the income projection used to fund the FTES is taken directly from the state apportionment calculation for the prior year, and adjustments in the final state budget, positive or negative, such as cost-of-living adjustments and growth, are factored into the revenue calculation. The implementation of this model is overseen by DRAC. The DRAC model distributes available

general fund unrestricted resources in accordance with the state's funding formula; remaining funds are allocated in accordance with the basic aid allocation procedure and process outlined in BP 3110 and AR 3110. The College allocation is then assessed for District Services, such as payroll, accounting, and purchasing, and is assessed for contingency and Districtwide general expenditure items, such as legal fees, that cannot be attributed to one particular College.

In addition to local funding through property taxes, the College also receives funds from additional sources, such as state categorical programs; local revenue; grant revenue from federal, state and local sources; Community Education; ASG; and Foundation revenue. Nonresident tuition FTES income, based on prior-year actual receipts, is added to the income formula. Prior-year ending balances for the District are added to the overall income, and a budget allocation is set for the College. The ending balance for the College, whether positive or negative, is added or subtracted to the College income allocation. Local income, such as parking revenue or health fee income, is budgeted at prior-year actual income levels. Student fee income is budgeted at prior-year income levels and is adjusted in the spring after spring enrollment revenues are known. Budgets are established for grant activities when formal grant award or partnership agreements are received and board approved. Community Education revenues are budgeted slightly below prior-year actual income levels. Student Government revenue is calculated using the minimum guaranteed income derived from vending contracts as well as an estimate of revenue to be earned through sales of the ASB Stamp.

The College's planning process, which ultimately results in budget allocation, is a transparent process and is open to all who choose to participate. Planning and budget committees include:

- Consultation Council
- Planning and Budget Steering Committee
- Educational Planning and Assessment Committee
- Technology Committee
- Safety and Facilities Committee
- College Resource Committee
- Strategic Planning Goal Groups

The budget development and planning processes of the College ensure that financial resources are used to address College plans. PBSC and CRC processes ensure that requests for funding are supported by assessment results and other data and that funded requests are in alignment with the College mission and the strategic planning goals. Resource allocation decisions at the College are informed by the Strategic Plan in conjunction with the needs of instructional programs and administrative units on campus as expressed in completed PRs and AURs. For example, all funding requests and allocation recommendations must include a justification that demonstrates an alignment between the Strategic Plan and a specific PR or AUR.

PBSC reviews and studies budget materials for all funds, programs, grants, and projects. This Committee makes recommendations to CC regarding the allocation of funds, and CC, after review, then makes a recommendation to the college president, who makes the final decision as to the allocation of resources to address College plans. The College's conservative long-range fiscal planning ensures that fiscal commitments are anticipated and that funds are allocated appropriately. Therefore, the College is able to develop a balanced budget with a sufficient contingency each year, and District reserves remain healthy. Benchmarks for fiscal stability are always met and are often exceeded.

ANALYSIS AND EVALUATION

The planning and budgeting process is robust and transparent. Information about available funds is provided to planners and decision makers throughout the process and this access results in planning that reflects realistic assessments of financial resource availability. The Basic Aid Funds Allocation Process ensures that institutional priorities are addressed with the District's overall budget, and the College's resource allocation process ensures that institutional plans in support of the College's mission are funded appropriately. Institutional planning is conducted in accordance with a realistic assessment of available funds.

III.D.5. To assure the financial integrity of the institution and responsible use of its financial resources, the internal control structure has appropriate control mechanisms and widely disseminates dependable and timely information for sound financial decision making. The institution regularly evaluates its financial management practices and uses the results to improve internal control systems.

EVIDENCE OF MEETING THE STANDARD

The College uses an accounting software program, Workday, to establish budgets and expend resources. Budgets use an account code structure which allows the accounting system to direct transactions to those fiducially responsible for the accounts related to those specific transactions. Purchase orders are created online and go through an automated approval process, and those approval requirements are built into the system based on account code structure. Control mechanisms are in place to ensure that requisitions cannot be submitted unless sufficient resources are available. Approvals are in place for all requisitions, depending upon the classification of the expenditure; expenditure classifications and account code structures are used to route budget amendments, journal entries, expenses, invoices, and requisitions. For example, all requisitions using restricted funding sources, such as instructional fee-based supplies, are routed to a funding source manager to ensure they are appropriate. All departments have access to the Workday online system, and any College employee can request access to the system. Users have access to all College accounts in the Workday system and can develop real-time

reports if needed. If departments or employees request or require reports that are more complex than the reports that Workday provides, the College's Fiscal Office is available to assist.

Both the District and the College have controls in place that assure effective oversight of all financial matters. Acceptance of grant funds requires board approval. Once the grant has been authorized, the Fiscal Office prepares a budget amendment, which is submitted to the board. Once the budget is authorized, fund balances are entered into the accounting system, a method which prevents approval of purchase orders in excess of budgeted funds. Only authorized individuals can enter requisitions into the system, and all requisitions are scrutinized and approved by appropriate grant project staff and administrators as well as the College Fiscal Office. The grant project staff, in conjunction with a representative from the Grants Office, monitor fund expenditures to make certain that they are in compliance with the terms and conditions of the grant and other relevant accounting standards. Regular reporting is completed in accordance with grant specifications.

The District accounting staff reviews project reports to verify that they are accurate before they are certified by the vice chancellor of business services, or a designee. Similar processes are in place to ensure the appropriate oversight and management of externally funded programs, such as Perkins appropriations and state-funded categorical programs.

All contracts are approved and executed by the Office of the Vice Chancellor of Business Services. Per BP 2100, Delegation of Authority to the Chancellor, and BP 3200, Purchasing and Contracts, the vice chancellor of business services is given the authority to approve contracts that do not exceed \$100,000 (III.D.5-01). The vice chancellor submits a report to the board on a monthly basis listing all contracts that have been approved for board ratification. Contracts that do not fall within the parameters set for the vice chancellor are submitted to the board for approval before signature. Contract expenditures and payments are managed through the Workday accounting system, which monitors purchase orders and payments.

The College Foundation Board of Governors and the foundation director are responsible for overseeing funds deposited with the Foundation, which includes funds generated by auxiliary organizations (III.D.5-02). Investment reports as well as income and expenditure documentation are submitted to the Foundation board of governors at their regularly scheduled meetings and are presented to the SOCCCD BOT annually (III.D.5-03).

The Office of the Vice Chancellor of Business Services manages institutional investments and asset management. Funds are invested in compliance with the law through the County Treasurer's Office. Monthly informational reports are submitted to the BOT (III.D.5-04).

An independent certified public accounting firm conducts a financial and compliance audit of the District Business Services Office annually in accordance with CA Education Code 8848; the Student Financial Assistance and Scholarship Office, which accounts for financial aid in a separate fund, is also audited to ensure federal guidelines are followed. The annual financial and compliance audit is conducted in accordance with generally accepted auditing standards and is intended to obtain reasonable assurance that financial statements are free of material misstatement. This process includes examining and testing supporting documentation as well as examining internal controls. Reviewing internal controls is the mechanism that provides feedback on processes that require improvement or adjustments. The audit assesses the accounting principles used and ensures that management's estimates provide reasonable assurance of detecting material misstatements that could affect the financial statements as a whole.

As part of the audit process, the adopted budget (expenditure plan) is compared to actual expenditures in an effort to establish any variance. The College is required to explain variances of any significance to the auditors to determine if funds were expended on educational programs and activities as originally planned and intended.

Similarly, the Saddleback College Foundation Finance Committee annually prepares and adopts a budget of operations income and expenses (III.D.5-05). At each of their meetings, the committee reviews actual versus budgeted expenditures and income and makes adjustments when necessary.

The BOT's Audit Committee is charged with monitoring the audit process and reviewing the final audits. To ensure that expenditures are compatible with College plans, multiple signoffs are required on any type of College expenditure.

ANALYSIS AND EVALUATION

The internal control structures in place at the College and the District demonstrate effective control mechanisms and ensure information for sound financial decision-making is dependable and timely. Financial management practices are aligned with generally accepted accounting principles, auditing guidelines, and federal guidelines. Ongoing business process analysis and related process improvements support continuous improvement of internal control systems.

Evidence:

- III.D.5-01 BP 2100 Delegation of Authority to the Chancellor and BP 3200 Purchasing and Contracts
- III.D.5-02 BP and AR 3610 - Auxiliary Organizations
- III.D.5-03 Saddleback Quarterly Report
- III.D.5-04 SOCCCD: Quarterly Investment Report

III.D.6. Financial documents, including the budget, have a high degree of credibility and accuracy, and reflect appropriate allocation and use of financial resources to support student learning programs and services.

EVIDENCE OF MEETING THE STANDARD

An audit of the District's financial statements and supplementary information, including reports on compliance, is conducted in the fall of every year. An independent certified public accounting firm performs this audit. The audit is designed to provide reasonable assurance as to whether the financial statements are free of material misstatement. The audit considers the District's internal controls over financial reporting, a consideration which includes examining, on a test basis, evidence supporting the amounts and disclosures on financial statements. The audit assesses the accounting principles used and significant estimates made by management as well as evaluates the overall basic financial statement presentation (III.D.6-01).

An independent certified public accounting firm conducts a financial and compliance audit annually, in accordance with California Education Code 8848. The annual financial and compliance audit is conducted in accordance with generally accepted auditing standards and is intended to obtain reasonable assurance that financial statements are free of material misstatement. This process includes examining and testing supporting documentation as well as examining internal controls. Reviewing internal controls is the mechanism that provides feedback on processes that require improvement or adjustment.

As part of the audit process, the adopted budget (expenditure plan) is compared to actual expenditures in an effort to establish any variance. The College is required to explain variances of any significance to the auditors to determine if funds were expended on the educational programs and activities as originally planned and intended. The BOT's Audit Committee is charged with monitoring the audit process and reviewing the final audits.

The College's budget sufficiently supports all instructional programs; this is verified through assessment of student learning. When assessment of student learning indicates that additional budget allocations are necessary to support improvement, the CRC process is utilized for the request, prioritization, and funding of programmatic needs. In the past year over \$1.4 million in requests were funded for the 2016-17 fiscal year in support of needs expressed through the program review (PR) and administrative unit review (AUR) processes and the strategic plan; these funds supported facilities, technology, equipment, and other institutional needs (III.D.6-02).

ANALYSIS AND EVALUATION

The College's financial management system and processes have a high degree of credibility as demonstrated in its resource allocation model, budget, and audit reports.

Evidence:

III.D.6-01 SOCCCD Audit Report 2014-15

III.D.6-02 Approved CRC Requests for 2016-17

III.D.7. Institutional responses to external audit findings are comprehensive, timely, and communicated appropriately.

EVIDENCE OF MEETING THE STANDARD

As described in III.D.6 above, an audit of the District's financial statements and supplementary information, including reports on compliance, is conducted annually by an independent certified public accounting firm (III.D.7-01). The board regularly receives reports regarding the District and Colleges' budget, fiscal conditions, financial planning, and audit results (III.D.7-02). The BOT Audit Committee is charged with monitoring the audit process and reviewing the final audits. All board agendas, attachments, and minutes are publicly available on the District website.

The District's audit findings over the past six years have been minimal, and all audits have resulted in unqualified reviews. Those minor questions that have been identified were resolved in a timely manner (III.D.7-03). The results of these audits and the resolution of findings are made part of subsequent audit reports and are available on the District SharePoint site.

ANALYSIS AND EVALUATION

The District resolves all audit findings in a timely fashion. Information about the College and District budget, fiscal conditions affecting the College budget and financial planning, including audit results, are provided College wide and Districtwide on a regular basis.

Evidence:

III.D.7-01 SOCCCD Audit Report 2014-2015

III.D.7-02 Board of Trustees Presentation Schedule

III.D.7-03 SOCCCD Audit Findings 2009-2015

III.D.8. The institution's financial and internal control systems are evaluated and assessed for validity and effectiveness, and the results of this assessment are used for improvement.

EVIDENCE OF MEETING THE STANDARD

The annual financial and compliance audit is conducted in accordance with generally accepted auditing standards and includes examining and testing supporting documentation as well as examining internal controls. Reviewing internal controls is the mechanism that provides feedback on processes that require improvement or adjustment. The audit evaluates any variances between adopted budget and actual expenditures to determine if funds were expended on the educational programs and activities as originally planned and intended.

The College's accounting officer assists departments with categorical program accounting, and the senior accounting specialist in the College's Grants Office assists grant staff with grant accounting. The District's senior accounting specialist reviews expenditure reports on all categorical programs and grants to ensure reported expenditures are necessary, reasonable, allowable, and allocable. An independent certified public accounting firm conducts examinations and tests in accordance with state and federal audit guidelines, and government agencies conduct their own audits. External and governmental audits have not identified any spending irregularities requiring correction (III.D.8-01).

College and district services staff participated in business process analysis and the design of the Workday ERP (III.D.8-02) (III.D.8-03); implementation is ongoing, and college and district staff are continuing to evaluate and improve upon this new system as evidenced by a comprehensive health check report prepared by One Source Virtual as well as the work of the Workday Fiscal Project Team (III.D.8-04) (III.D.8-05).

Staff responsible for categorical and grant-funded programs regularly attend state, regional, and nationwide conferences and participate in webinars that provide guidelines and interpretations of regulations to ensure compliance. Examples of improvements resulting from staff professional development include federal procurement guidelines as well as time and effort reporting improvements (III.D.8-06).

ANALYSIS AND EVALUATION

The College's financial and internal control systems are regularly evaluated and assessed. While repeated audits have found the College's financial and internal control systems to be sound, College and District staff regularly assess and refine processes.

Evidence:

III.D.8-02 BPA Sessions

III.D.8-03 Example Workday Fiscal Design

III.D.8-04 One Source Virtual Executive Summary PowerPoint NEED TO GET

III.D.8-05 Workday Fiscal Project Team SharePoint Site

III.D.8-06 TAACCCT Grant Manual

III.D.9. The institution has sufficient cash flow and reserves to maintain stability, support strategies for appropriate risk management, and, when necessary, implement contingency plans to meet financial emergencies and unforeseen occurrences.

EVIDENCE OF MEETING THE STANDARD

The District is a locally funded basic aid district, as described in III.D.A above, and the revenue received from property taxes exceeds the funds it would receive through SB 361, the state's funding model for community colleges. Revenue is received monthly with the largest tax payments made in December and April. BP 3100, Budget Preparation, states, "Unrestricted general reserves shall be no less than 7.5 %" (III.D.9-01) In addition to this reserve required by policy, and each college maintains its own reserve. The College is fiscally conservative, does not use its reserves, and typically maintains a healthy ending balance (III.D.9-02).

The capital outlay fund has a substantial cash balance committed to specific future capital projects (III.D.9-03). This cash may be temporarily transferred to another fund for the payment of obligations in accordance with the California Community Colleges Budget and Accounting Manual (IIID.9-04).

The District is not self-insured but participates in several joint powers agreements - such as the Statewide Association of Community Colleges (SWACC) for property and liability, Self-Insured Schools of California (SISC) for medical, and the Protected Insurance Program for Schools (PIPS) for workers' compensation - thus lessening risk factors and reducing costs. The District reviews its coverage annually in the spring and carries an excess liability policy. The District maintains an irrevocable trust for its Other Postemployment Benefits (OPEB) obligation, such as retiree health benefits, which remains fully funded (III.D.9-05).

The College and the District have taken numerous additional steps in recent years to reduce financial risk to the District. These steps include numerous professional development presentations on how to identify and reduce risk (III.D.9-06), the development and implementation of contract templates (III.D.9-07) and contract signing processes (III.D.9-08), and the hiring of a new district risk manager, a new district contracts specialist, and a new district contract manager.

ANALYSIS AND EVALUATION

The College maintains healthy ending balances and the District's unrestricted fiscal reserves have not dipped below 7.5 percent in accordance with District policy. The District has appropriately planned for both anticipated and unforeseen circumstances.

III.D.9-07 District Services Contracts and Guidelines SharePoint Site
III.D.9-08 Contract Cover Sheet

III.D.10. The institution practices effective oversight of finances, including management of financial aid, grants, externally funded programs, contractual relationships, auxiliary organizations or foundations, and institutional investments and assets.

EVIDENCE OF MEETING THE STANDARD

As described in III.D.3 above, the College's accounting software program, Workday, is used to establish budgets and expend resources. This system assists the College in providing effective oversight of its finances as all expenditures are input, tracked, and approved through this system.

The Student Financial Assistance and Scholarship Office determines eligibility and enters the awards into the PowerFAIDS system. The District Business Services Office draws down the funds from the U.S. Department of Education's Grant Management System, G5, three days prior to the disbursement date as federal guidelines require the funds must be spent within three days of receipt. After each check disbursement, the Student Financial Assistance and Scholarship Office and the District Accounting Office compare revenues and expenditures. The College complies with the Blue Book: Accounting, Recordkeeping, and Reporting by Postsecondary Educational Institutions for Federally Funded Student Financial Aid Programs. An independent certified public accounting firm audits the Student Financial Assistance and Scholarship Office and the District Business Services Office as part of the annual audit. In the District's financial statements, financial aid is accounted for in a separate fund (III.D.10-01).

Every College group or outside donor raising funds for College programs and scholarships is required to sign an account agreement with the Saddleback College Foundation Office. This agreement states that the group will follow established guidelines and procedures of the foundation and the SOCCCD. A group representative signs the document as the account administrator, the dean or supervisor cosigns, and the foundation director cosigns. This

document then authorizes deposits and expenses from the account. The account is assigned a name and given a code designation so it can be tracked in the Escape accounting system (III.D.10-02).

New account administrators are given a copy of the Saddleback College Foundation policy guidelines, procedures, and accepted nonprofit standards for fund expenditures (III.D.10-03). Money raised from fundraising activity is recorded on a Deposit Advice form (III.D.10-04). The money and the deposit advice form are given to a campus safety officer, who signs a receipt for the funds and hand-delivers them to the District Business Services Office. The District Business Services Office matches the amount of the deposit indicated on the form, prepares a bank deposit, and inputs the deposit into the accounting system. A second copy of the deposit advice form is sent to the Foundation Office, which checks to ensure that funds are coded correctly so they are deposited into the correct account. The donation information is then recorded as a permanent record into a donor database, and tax ID letters are generated and sent. The computerized accounting record for each project can be accessed at any time for review by the Foundation, the District, and the account administrators.

All funds expended from Foundation accounts must be requisitioned by account administrators. The expense request goes through an approval process in the following order: cost center manager, dean, vice president, and then the foundation director. After approval by all parties, requisitions are sent to the District Business Services Office to be processed and have checks cut. If the item or service is ordered, a purchase order and an invoice are required for payment. Before any expenses over \$10,000 can be approved by the foundation director, the requisitions are ratified by the foundation's Board of Governors Finance Committee at its regular meeting.

As discussed in III.D.5 above, the District and the College also have various controls in place that assure effective oversight of all financial matters for grants, externally funded programs, and contracts.

ANALYSIS AND EVALUATION

The College and the District exercise effective oversight and control over all financial and business activities of the College and the District. Systems are in place to provide checks and balances. Internal control is assessed by the District Business Office, and internal audits routinely take place to ensure compliance with generally accepted accounting principles and auditing guidelines. The District received unqualified reports from the auditors on compliance for the past six years and has no findings related to federal Title IV regulation compliance. The recommendations on all findings have been implemented.

Evidence:

III.D.10-01 SOCCCD Audit Report 2014-2015

III.D.10-02 Foundation Conditions and Criteria Application

III.D.10-03 Foundation Policy Guidelines, Procedures, and Accepted Nonprofit Standards

III.D.10-04 Deposit Advice Form

Liabilities

III.D.11. The level of financial resources provides a reasonable expectation of both short-term and long-term financial solvency. When making short-range financial plans, the institution considers its long-range financial priorities to assure financial stability. The institution clearly identifies, plans, and allocates resources for payment of liabilities and future obligations.

EVIDENCE OF MEETING THE STANDARD

The College has efficiently and prudently managed its financial resources. During College budget planning, the relationship between ongoing revenue and ongoing expenditure has always been considered, and the College has been careful not to obligate short-term revenue to long-term expenditures. As a result, the College has had sufficient resources to support existing instructional programs and support services and has been able to allocate resources to address institutional plans.

The District has established an unrestricted general fund contingency of 7.5 percent, and the College maintains an additional contingency within its operating budget, which was \$2.75 million in 2015-2016. The SOCCCD has prepared well for most long-term financial obligations, such as retiree health benefits, and the College and the District have fully paid off all prior-year debt obligations. All other post-employment benefits are fully funded, and the District conducts an actuarial study on at least a biannual basis to ensure it remains fully funded.

ANALYSIS AND EVALUATION

The SOCCCD operates within a resource allocation formula by which College operations are protected from the volatility of property tax revenue, thereby eliminating the possibility of devastating cuts to programs and services were the District's basic aid status ever to change. Furthermore, property tax revenue collected over and above the SB 361 calculation is allocated

and expended as received, and the District has not obligated future anticipated property tax revenue by incurring debt.

Both the District and the College manage finances conservatively and allocate resources in a fiscally prudent and responsible manner to ensure needs are met on both a short-term and long-term basis. Due to the College's conservative long-range fiscal planning, the College is able to develop a balanced budget with a sufficient contingency each year, and District reserves remain healthy. Benchmarks for fiscal stability are always met and are often exceeded.

NO EVIDENCE CITED

III.D.12. The institution plans for and allocates appropriate resources for the payment of liabilities and future obligations, including Other Post-Employment Benefits (OPEB), compensated absences, and other employee related obligations. The actuarial plan to determine Other Post-Employment Benefits (OPEB) is current and prepared as required by appropriate accounting standards.

EVIDENCE OF MEETING THE STANDARD

The SOCCCD has prepared well for long-term financial obligations, such as retiree health benefits, and the College and the District have fully paid off all prior-year debt obligations.

Governmental Accounting Standards Board (GASB) Statements 43 and 45 require annual reporting of post-employment benefit liability. These statements establish standards for the measurement, recognition, and display of OPEB expenses, expenditures, and related liabilities in the financial reports of state and local governmental employers. When these GASB provisions were enacted, the District hired a consultant to assist the District in the navigation of this process and a Retirement Board of Authority (III.D.12-01) was established to guide and oversee the implementation of the GASB standards. The Futuris program, administered by Keenan & Associates, is a comprehensive GASB compliant retiree health and welfare benefit program. The District implemented an irrevocable trust for its OPEB obligation in spring 2008, and the District conducts an actuarial study on at least a biannual basis to ensure it remains fully funded.

The District has also been impacted by the state pension liabilities that resulted in increases to the California Public Employees' Retirement System (CalPERS) and California State Teachers' Retirement System (CalSTRS) employer rates. The District has covered these increases for all unrestricted general fund employees through the 2020-2021 fiscal year by placing adequate funds in a trust account (III.D.12-02).

ANALYSIS AND EVALUATION

The SOCCCD'S annual OPEB obligation is fully funded, as are all compensated absences and other employee-related obligations. The District has also pre-funded the CalPERS and CalSTRS employee contributions through 2020-2021 and placed the funds into a trust account.

Evidence:

III.D.12-01 GASB 43 & 45 Compliance Plan

III.D.12-02 SOCCCD STRS & PERS Pension Rate Increase

III.D.13. On an annual basis, the institution assesses and allocates resources for the repayment of any locally incurred debt instruments that can affect the financial condition of the institution.

EVIDENCE OF MEETING THE STANDARD

The District has not issued any certificates of participation (COPS) since 1999 and all COPS were paid in full by June 2008. The District has not issued any bonds. All long-term debt has been paid off, and the District has not entered into any additional debt agreements.

ANALYSIS AND EVALUATION

The College does not have difficulty meeting current obligations and does not have any long-term debt.

NO EVIDENCE CITED

III.D.14. All financial resources, including short- and long-term debt instruments (such as bonds and Certificates of Participation), auxiliary activities, fund-raising efforts, and grants, are used with integrity in a manner consistent with the intended purpose of the funding source.

EVIDENCE OF MEETING THE STANDARD

The District and College carry no long-term debt, such as bonds or COPS, and have fully funded all other retiree post-employment liabilities. The College is not engaged in any lease purchase agreements, and all capital, including facilities, technology, and equipment are purchased outright on an annual basis as funding permits. The DRAC model ensures that the SB 361 calculation funds all ongoing operations and that the remaining funds are utilized for one-time needs and projects, such as capital outlay.

As discussed above in III.D.5 and III.D.10, the College and District use grant and foundation funds with integrity. College procedures ensure that grant funding receives appropriate

authorization from the BOT, that grant budgets and expenditures are aligned with grant funding, and that grant expenses are approved by appropriate persons to ensure that expenses charged to grants are reasonable, necessary, allowable, and allocable. Fiscal reporting for grants is certified by District accounting staff to ensure proper oversight.

The College Foundation employs foundation fundraising guidelines to ensure that funds are raised and expended appropriately and with oversight by account administrators, cost center managers, and the Foundation's Board of Governors Finance Committee.

The College Foundation Finance Committee annually prepares and adopts a budget of operations income and expenses (III.D.14-01). At each of its monthly meetings, the Finance Committee reviews actual versus budgeted expenditures and income and makes adjustments when necessary. An annual report is presented to the SOCCCD BOT.

ANALYSIS AND EVALUATION

The financial resources of the District and College are used with integrity and in a manner consistent with their goals. Funding from external sources such as the College Foundation, grants, and state categorical monies are all used according to their intended purpose. Grant and foundation fundraising efforts are aligned with the College Strategic Plan and serve the needs of College programs.

The District and the College excel in the area of planning for future liabilities and reducing or eliminating long-term debt commitments. Moreover, they are careful not to obligate future budget years with automatic debt payment, and, when it has been fiscally prudent to do so, future debts have been retired ahead of schedule.

Evidence:

III.D.14-01 Foundation Budget of Operations Income and Expenses

III.D.15. The institution monitors and manages student loan default rates, revenue streams, and assets to ensure compliance with federal requirements, including Title IV of the Higher Education Act, and comes into compliance when the federal government identifies deficiencies.

EVIDENCE OF MEETING THE STANDARD

The District is subject to an annual OMB A-133 audit which allows the auditor to express opinion on the District's compliance with major federal programs, including Title IV programs. For the years ending June 30, 2014 and June 30, 2015, the College did not receive any audit findings (III.D.15-01).

The 2012 three-year cohort default rate recorded in the Federal Student Aid database is 11.1% with 34 defaulters out of 306 borrowers in repayment, and the 2013 three-year cohort default rate is 10.8% (III.D.15-02). This rate is critical as the Department of Education uses this as a measure to sanction schools; institutions with cohort default rates of 25 percent or greater for three years are subject to sanctions.

The College Financial Assistance and Scholarship Office monitors the cohort default rate annually, and actively works to educate students on the responsibilities and consequences of borrowing. For example, the College provides financial literacy counseling to all students wanting to borrow. Students are also required to log into the National Student Loan Database System (NSLDS) and provide a copy of their loan debt summary; if a student has student loan debt incurred, he or she must also provide a copy of the calculator page showing the estimated repayment amount based on career objective.

ANALYSIS AND EVALUATION

The College's financial aid default rate for the last three years has been less than half the sanctionable rate according to federal government regulations. Student loan default rates, revenues, and related matters are monitored and assessed to ensure compliance with Federal Regulations.

Evidence:

III.D.15-01 SOCCCD Audit Findings 2009-2015

III.D.15-02 Cohort Default Rate Report

Contractual Agreements

III.D.16. Contractual agreements with external entities are consistent with the mission and goals of the institution, governed by institutional policies, and contain appropriate provisions to maintain the integrity of the institution and the quality of its programs, services, and operations.

EVIDENCE OF MEETING THE STANDARD

Contractual agreements with outside entities are governed by BPs and ARs, which are established to ensure that they are consistent with the mission and strategic goals of the College. This includes BP/AR 3101.5, Fiscal Management, which states that the District must maintain sound fiscal management that ensures all activities comport with the educational objectives of the District (III.D.16-01). The vice chancellor of business services manages all contracts and has the authority to approve all contracts that do not exceed \$100,000 (III.D.16-02). Contracts over that amount must be approved by the board. Ultimately, it is the responsibility of the BOT to

oversee all contracts and to ensure that they maintain the integrity of the programs, services, and operations of the District and College.

The District provides numerous resources, available on the District's SharePoint site, to assist individuals at the College to successfully implement contract processes (III.D.16-03). These resources include competitive bidding and public contracting guidelines, contract process guidelines, and a contract cover and routing sheet that is utilized to document the purpose of the contract and ensure that appropriate College managers and administrators are aware of, and approve of, the contract. The District's SharePoint site also provides contract templates for numerous contract types, including educational services agreements, field trips and educational tours, and independent contractor agreements.

The District has recently purchased a contract management tool, Total Contract Manager, and will soon implement this product to serve as a document repository 1) to ensure that contracts are appropriately executed and 2) to notify the appropriate individuals when contracts need to be renewed or rebid.

ANALYSIS AND EVALUATION

Contractual agreements established with external entities are consistent with the mission and goals of the College. Through their oversight, the BOT has ultimate responsibility to ensure that these contracts maintain the integrity of the College's programs, services, and operations. Managers who develop College contracts for approval by the vice chancellor of business services confirm adherence to BPs and are responsible for ensuring the contracts are consistent with the College's mission and goals. District administrators ensure that contracts are administered in adherence with all state and federal guidelines (III.D.16-04) (III.D.16-05).

Evidence:

III.D.16-01 BP and AR 3101.5 - Fiscal Management

III.D.16-02 BP 2100 Delegation of Authority to the Chancellor and BP 3200 Purchasing and Contracts

III.D.16-04 BP 3200.1 Contracts

III.D.16-05 BP 3200 Purchasing

Standard IV: Leadership and Governance

The institution recognizes and uses the contributions of leadership throughout the organization for promoting student success, sustaining academic quality, integrity, fiscal stability, and continuous improvement of the institution. Governance roles are defined in policy and are designed to facilitate decisions that support student learning programs and services and improve institutional effectiveness, while acknowledging the designated responsibilities of the governing board and the chief executive officer. Through established governance structures, processes, and practices, the governing board, administrators, faculty, staff, and students work together for the good of the institution. In multi-college districts or systems, the roles within the district/system are clearly delineated. The multi-college district or system has policies for allocation of resources to adequately support and sustain the colleges.

IV.A Decision-Making Role and Processes

IV.A.1 The institution recognizes and uses the contributions of leadership throughout the organization for promoting student success, sustaining academic quality, integrity, fiscal stability, and continuous improvement of the institution. Governance roles are defined in policy and are designed to facilitate decisions that support student learning programs and services and improve institutional effectiveness, while acknowledging the designated responsibilities of the governing board and the chief executive officer. Through established governance structures, processes, and practices, the governing board, administrators, faculty, staff, and students work together for the good of the institution. In multi-college districts or systems, the roles within the district/system are clearly delineated. The multi-college district or system has policies for allocation of resources to adequately support and sustain the colleges.

EVIDENCE OF MEETING THE STANDARD

Both Saddleback College and the South Orange County Community College District (SOCCCD) support a participatory governance model that encourages leadership at all levels of the organization in order to enhance institutional effectiveness in relation to student performance and student outcomes, academic quality, academic and institutional integrity, fiscal stability, and federal and state compliance.

Board policies (the BP 2000 and 3000 series), administrative regulations (the AR 2000 and 3000 series), committee compositions and bylaws (evidence), and the appropriate negotiated collective bargaining agreements, outline the rights and responsibilities granted to faculty, students, staff, managers, and administrators to engage in college governance processes.

The delineation of roles within the District is defined in the following BPs:

- BP 2001, Administration Organization

- BP 2100, Delegation of Authority to the Chancellor
- BP 2100.1, Delegation of Authority to the Academic Senate
- BP 2100.2, Role and Scope of Authority of the Academic Senates
- BP 2101, Delegation of Authority to the College President
- BP/AR 2120, Institutional Planning

These BPs are designed to ensure that the roles of the Board of Trustees (BOT), the District, and the colleges are clearly defined and understood in relation to organizational structure, operations, planning, and decision-making. They also outline the primary role of the faculty in academic and professional matters through the Academic Senates, as required by Title 5, California Code of Regulations, Sections 53200-53205 and 53203.

To ensure adequate financial support for its colleges, the BOT had adopted a variety of BPs and ARs that outline the fiscal practices of the District. These are included in the BP/AR 3000 series and include:

- BP and AR 3001, Delegation of Authority
- BP 3100, Budget Preparation
- BP 3100, Budget Management
- AR 3100, Budget Management-Transfer of Budget Appropriations
- BP and AR 3101.5, Fiscal Management

These BPs establish procedures to ensure that the District maintains sound fiscal management to support the educational mission of the District and its colleges. In addition, the District has created Budget Development Guidelines that are used by the District and both college to create aligned annual budgets. The District Resources Allocation Council (DRAC) is the main body to oversee the allocation of funds to ensure that the colleges within the multi-college district are supported and sustained.

According to its stated purpose, DRAC is

A Districtwide participatory governance council, charged with recommendations for the income allocation model on which the budget is based. It is charged with development and oversight of the allocation process for unrestricted general funds and it makes recommendations to the chancellor. The DRAC model is an allocation model for the District. It distributes available general fund unrestricted resources (according to the state funding formula) and other funding such as enrollment fees, nonresident fees, local income, miscellaneous income, and ending balances.

It is distributed to five areas:

- Saddleback College

- Irvine Valley College
- Contingency Reserve
- General Expenditures
- District Services

The intention of the model is to guarantee the colleges a predictable, fair, and equitable distribution of revenues.” [EVI – Committee Charge and Composition Sheet].

The participatory governance structure and process for the College is outlined in the SOCCCD Function Map, The College Governance and Organization Manual, the College Faculty Handbook, and the College Employee Handbook. In each of these publications, the roles and responsibilities which carry out this participatory governance are clearly delineated. This governance structure endorses individual involvement and responsibility for promoting best practices that enhance programs and services regardless of an individual’s title, constituent group, or level in the organization. Constituents are encouraged to voice concerns, to share ideas, and to communicate freely about the College’s and the District’s programs and services. This occurs both through the formal committee structure and through organized meetings such as the BOT Listening Sessions and the President’s Chats. Open sessions are also held on various issues during Professional Development (PD) Week and throughout the semester. In addition, department chairs, managers, and administrators hold regular program or unit meetings to provide opportunities to exchange ideas for program change and improvement, and this facilitation of dialogue is included in the job responsibilities for each of these positions. The philosophy of open communication and of active participation is also included in the faculty, staff, manager, and administrator evaluation processes (evidence).

At the program and administrative-unit levels, program reviews (PRs) and administrative unit reviews (AURs), which engage employees at every level, are conducted biennially for the purpose of continual improvement. During these reviews, academic, administrative, and student services departments and units, including the Saddleback College President’s Office, review and update objectives and action steps, identify strengths and weaknesses, review outcomes assessment data, and propose new objectives that are aligned with the College’s Strategic Plan as well as the SOCCCD Strategic Plan. (evidence)

Institutional-level discussions for improvements occur within the following committees, all of which include representation from all constituent groups: Consultation Council (CC), Education Planning and Assessment Committee (EPA), Planning and Budget Steering Committee (PBSC), and the Student Success Coordinating Council (SSCC). In addition, all constituent groups have their own representative body that provides an avenue for their concerns to be voiced and debated. These groups include the Academic Senate, for faculty; the Associate Student Government (ASG), for students; Classified Senate (CS), for classified staff; Management Team, for all management including administrators; and xxx for classified managers; as well their

associated standing committees. The governance and committee structure is summarized in the Saddleback College Governance and Organization Manual. (Jennifer for any updates?)

The CC is the primary recommending body to the college president for planning, resources, and policy matters. The president chairs CC, which meets biweekly and is composed of representatives from each constituent group: faculty, staff, managers, administrators, and students (evidence). CC recommendations originate from council members and from committees and representative bodies on campus. Broad participation is evident based on the scope and nature of the committee structure and required membership composition.

The EPA Committee works collegially with the faculty, staff, and administration on PRs, AURs, student learning outcomes (SLOs), institutional outcomes, and the resource allocation process.

The PBSC assists with institutional effectiveness, the resource allocation process, the Strategic Plan, the Governance and Organization Manual, integrity, and student success initiatives.

The Academic Senate is a partner for decisions involving curriculum, academic quality, online education, integrity, faculty hiring, faculty professional development, student success initiatives, the Strategic Plan, the resource allocation process, and fiscal stability.

The CS works collaboratively with the administration on classified staff professional development, integrity, student success initiatives, resource allocation, fiscal stability, and the Strategic Plan.

The ASG participates in decisions involving student clubs, student life, student welfare, scholarships, student success initiatives, and some resource allocation.

ANALYSIS AND EVALUATION

Both the College and SOCCCD leadership attempt to encourage broad participation in planning and decision-making processes that include all stakeholders: faculty, staff, managers, administrators, and students. The formal and informal participatory governance and review structures provide the framework for faculty, staff, managers and administrators, and students to share ideas openly through their committee and representatives.

There are times, however, when faculty, staff, managers, administrators, and students report communication hurdles and point both to the effectiveness of some committees and to the ineffectiveness of the participatory governance model.

As part of these dynamic processes, the governance and review structures of the various committees and task forces are appraised annually (what about Committee on Committees?) and modifications are made to committee charters, by-laws, and compositions. Through this review process, committees and task forces are formed, reorganized, or disbanded in effort to improve institutional efficiency, to enhance effective communication, or to resolve pressing issues. There is a concern, however, that this same dynamic review process does not function as effectively

with the participatory governance model. In addition, there have been some leadership changes in terms of regularly reviewing committees and structures. In an effort to realign various committees to the currency of the College in terms of various initiatives, the College conducted research and compiled inventory of all committees in 2016. The College also created an electronic committee request system that was designed to improve the process of data collection about committee interest. These efforts were intended to respond to committee interest, and to then synthesize various committees into a more robust structure that corresponded with the strategic mission and goals of the College. The goal of the inventory and research was also to render a clear picture on which committees were currently active, assess potential areas of committee redundancy, and to formally establish committees as inactive if meeting minutes or agendas were absent for a substantial period of time. This research also revealed the presence of several informal committees. In response, the College repositioned its approach to restructure informal committees as workgroups that would report back to a larger formal committee. When the Academic Senate and the College agreed upon the final inventory of current committees, the next step included creating a formal process for adding committees. As such, the Governance and Organization Manual was updated to include a process for submitting a request for a new committee through the College or through Academic Senate using the committee One Sheet. In addition, discussion of efficiency in committee structure and requests for new committees was brought into the function of PBSC to ensure that committees align with the institutional mission. Additionally, the Academic Senate regularly reviews committee proposals to support the goals for academic committees.

Evidence

- IV.A.1-01: BP 2101 Delegated Authority to the President

- IV.A.1-04: Economic Report
- IV.A.1-05: Annual State of the College
- IV.A.1-06: SOCCCD Function Map
- IV.A.1-07: Governance Manual
- IV.A.1-08: Faculty Handbook
- IV.A.1-09: Employee Handbook

IV.A.2 The institution establishes and implements policy and procedures authorizing administrator, faculty, and staff participation in decision-making processes. The policy makes provisions for student participation and consideration of student views in those matters in which students have a direct and reasonable interest. Policy specifies the manner in which individuals bring forward ideas and work together on appropriate policy, planning, and special-purpose committees.

EVIDENCE OF MEETING THE STANDARD

The College relies on BPs, ARs, and College governance procedures to establish broad participation from constituent groups in the decision-making process. Faculty, students, staff, managers, and administrators have clearly defined voices and avenues for participation in the governance and resource allocation processes.

BP 107, Board Policy and Administrative Regulation, outlines the process whereby Districtwide policies and regulations are developed and approved. This policy states that recommendations for new or revised policies and regulations may be made by the Academic Senate, CS, ASG, bargaining units, and administration.

The participation of faculty in the decision-making process is authorized by BP 2100.1, Delegation of Authority to the Academic Senate, and BP 2100.2, Role and Scope of Authority of the Academic Senates. These policies acknowledge the right of faculty to participate in District and College governance and recognize the Saddleback College Academic Senate as the official governing body for faculty participation in developing policies related to academic and professional matters as mandated by Title 5, Section 53200-53205, and as the official faculty voice in such matters.

In accordance with the Higher Education Employer-Employee Relations Act (HEERA), SOCCCD recognizes the Faculty Association as the exclusive representative of full-time and part-time faculty of the SOCCCD for the purposes of collective bargaining on issues related to wages, evaluations, working conditions, and other matters in the scope of negotiations. In doing so, the District complies with Chapter 10 of the Meyers-Milias-Brown Act, which promotes full communication between public employers and their employees by providing a reasonable method of resolving disputes regarding wages, hours, and other terms and conditions of employment between public employers and public employee organizations.

Assembly Bill (AB) 1725 directs that the SOCCCD BOT provide an opportunity for classified staff input on all matters that affect staff. There are four organizations within the SOCCCD that assume this role:

- Saddleback College Classified Senate (SCCS)
- California School Employees Association CSEA)

- Police Officers Association (POA)

The CSEA and the POA are the exclusive collective bargaining representatives on issues related to wages, evaluations, and working conditions for the classified groups that they represent. All nonexempt classified employees other than police officers are represented by the CSEA. CSEA has the right to appoint the first representative to any committee and the SCCS has the right to appoint the second representative. As a practical matter, most governance committees offer seats to each exclusive representative and a representative from each Classified Senate.

Title 5, Section 51023.7 and BP 5627, Student Participation in Governance, authorize student participation in the decision-making processes that significantly affect them and recognizes the ASG at each college in the SOCCCD. In addition, BP 104, Student Member of the Board of Trustees, authorizes the election of one advisory student member of the board to be rotated between Saddleback College and Irvine Valley College. The student trustee is recognized as a full member of the board at public meetings, and is required to confer with the leaders of the ASG from both colleges prior to each meeting of the board in order to effectively represent student interests.

The College Governance and Organization Manual and the *SOCCCD District-wide Decision Making Manual 2015-2020* [pages 11-14] outline the roles and responsibilities of the major stakeholder groups. Representatives from each group sit on planning bodies including Chancellor's Council and the District-wide Planning Council (DWPC) at the District and Planning and Budget Steering Committee (PBSC), and CC at the College [EVI – Committee Compositions]. In each case, it is the responsibility of these representatives to carry input from the groups they represent to the decision-making bodies where the Mission, Vision, and Values of the College are determined so that all voices are heard.

While decision-making is organized through the formalized committee representation structure, individuals are welcome to attend all open governance meetings, including meetings of the BOT, and add action items to the agenda at these meetings. BP 128, Board Agendas, describes how individuals may request items be placed on the BOT meeting agenda through a written summary to the chancellor. For other committees, individuals may contact the committee chair or president to add items to the agenda. [BP 128, OTHER EVIDENCE-Senate processes?]. Meeting times, agendas, and minutes of meetings are posted to the websites of all committees and representative bodies so that individuals can effectively participate. The agendas of open meetings of the board and the Academic Senates provide for public comments on both items that are on the agenda and items that are not.

The District and College also have informal mechanisms that provide for input from members of all constituent groups. These include open forums held by the college president each year and by members of the BOT [EVI needed].

ANALYSIS AND EVALUATION

The District and College have established BPs, ARs, and other governance procedures to ensure the broad participation of all constituent groups in the decision-making and planning processes. All decision-making bodies require membership from each of the representative groups, and other committees and task forces allow for the appointment of members as the representative groups deem appropriate.

College leadership has worked with the South Orange County Community College (SOCCCD) BOT to increase the ability of faculty to serve in key leadership roles by increasing the amount of reassigned time and/or stipends available to faculty. The college president, the SOCCCD chancellor, and the SOCCCD BOT work closely with the College Academic Senate when making decisions on academic and professional matters. Similarly, the CS and the SOCCCD are discussing ways in which classified staff may have secure release time from their respective positions in order to help alleviate what the classified staff often perceive as a struggle with their limited ability to participate in governance processes while also meeting the demands and timelines specific to their positions on the staff of the College.

IV.A.3 Administrators and faculty, through policy and procedures, have a substantive and clearly defined role in institutional governance and exercise a substantial voice in institutional policies, planning, and budget that relate to their areas of responsibility and expertise.

EVIDENCE OF MEETING THE STANDARD

The College and SOCCCD derive their roles and responsibilities through Federal Government Code, the California Education Code (EC), and Title 5 of the California Code of Regulations (CCR). As such, both administration and faculty have substantive and clearly defined roles in the institutional governance of the District and College and both exercise an important voice in the institutional policies, planning, and budget decision-making that relate to their areas of responsibility and expertise. These roles and responsibilities are clearly delineated in BPs and ARs.

Administration

The authority of the chancellor, as CEO of the District, and the college president, as CEO of the College, is codified by California Education Code §70902 and SOCCCD BPs. BP 2100, Delegation of Authority to the Chancellor, gives the chancellor of the SOCCCD ultimate responsibility for the establishment and implementation of policies, planning efforts, and education leadership in the District.

BP 2101, Delegation of Authority to the College President, gives the college president ultimate responsibility for the implementation of District policies at the College and the establishment and implementation of policies, planning efforts, and educational leadership at the college level.

As the CEO, the president effectively oversees and actively leads the President's Executive Team (PET) composed of the president and vice presidents at the College; Management Team, a committee composed of all administrators and managers; and CC, a participatory governance committee and the primary planning and decision-making body at the College. Additionally, the vice president of instruction leads the Vice President for Instruction Council. This committee is comprised of all instructional deans, department chairs, the chair of the Curriculum Committee, and certain staff from the Office of Instruction. Although this group functions more as an avenue by which the top administration can funnel information to these administrators (versus a forum for planning and decision-making), it remains an important forum for deans and department chairs across campus to exchange ideas, problem-solve, develop professionally, etc.

Faculty

BP 2100.1, Delegation of Authority to the Academic Senate, in accordance with California Code of Regulations §53200-53205, gives the College Academic Senates ultimate responsibility for, and authority over, academic and professional matters at the District and College.

Through this policy, the SOCCCD BOT recognizes the Academic Senates as the representatives of the faculties at both colleges and relies primarily upon the advice and judgment of the Academic Senates in accordance with processes of collegial consultation as defined in BP 2100.1. In addition, BP 2100.2, Role and Scope of Authority of the Academic Senates, acknowledges the right of faculty to participate in District and College governance, to express their opinions at the College and District level and to ensure that these opinions are given reasonable consideration, to assume primary responsibility for making recommendations in the areas of curriculum and academic standards, and to jointly develop and approve hiring criteria, policies, and procedures in conjunction with District administration. Academic Senate representatives are included in the membership of all councils, committees, and task forces that deal with academic and professional matters.

Moreover, the SOCCCD Faculty Association is recognized by the District as the exclusive representative of faculty on issues related to wages, evaluations, and working conditions, and is thus included in the membership of all councils, committees, and task forces dealing with these issues.

ANALYSIS AND EVALUATION

Administrators and faculty have clearly defined and substantive roles in District and College governance and actively participate in the development of policies, planning, and budget development. These roles are defined in BPs and implemented through the participatory governance committee structure of the District and College.

DRAFT

IV.A.4 Faculty and academic administrators, through policy and procedures, and through well-defined structures, have responsibility for recommendations about curriculum and student learning programs and services.

EVIDENCE OF MEETING THE STANDARD

Through the creation, adoption, and implementation of BPs and ARs, the SOCCCD ensures that faculty and administrators have responsibility for recommendations about curriculum and student learning programs as well as student learning services. BP 2100.1, Delegation of Authority to the Academic Senate, delineates the scope of the College Academic Senate in response to Title 5, Sections 53200-53205. Consistent with Accreditation Standards, the BOT relies primarily upon the advice, counsel, and recommendations of the College Academic Senate on all and any academic and professional matters including:

1. Curriculum, including establishing prerequisites and placing courses within disciplines.
2. Degree and certificate requirements.
3. Grading policies.
4. Educational program development.
5. Standards or policies regarding student preparation and success.
6. District and college governance structures relating to faculty roles.
7. Faculty roles and involvement in accreditation processes, including self-study and annual reports.
8. Policies for faculty professional development activities.
9. Processes for Program Review.
10. Processes for institutional planning and budget development.
11. Other matters as mutually agreed upon between the SOCCCD BOT and the Academic Senate, or as otherwise provided by statute or regulation.

BP 2100.1 also specifies that policies and procedures addressing academic and professional matters are subject to creation or modification only through the processes of collegial consultation. The College Academic Senate honors requests from the SOCCCD BOT and/or its agents to review relevant policies, regulations, procedures, and guidelines at least every five years, or more frequently should the BOT and/or its agents believe that modifications are necessary or appropriate.

Multiple BPs have been developed to articulate how responsibility for recommendations about curricula and student learning programs and services are executed. The Academic Senate created

a college Curriculum Committee pursuant to BP 6100, Curriculum, which harmonizes with the scope of BP 2100. All established courses of instruction and educational programs at the College are prepared in compliance with guidelines from the California Community Colleges Chancellor's Office's (CCCCO) Program and Course Approval Handbook (PCAH).

Saddleback uses Governet software called CurricUNET for preparing and maintaining course outlines of record. Each new and revised course, both credit and noncredit, is scrutinized by faculty, including members of the curriculum leadership team, deans, and curriculum specialists before it is submitted for approval to the Curriculum Committee, a standing committee of the Academic Senate. Courses are then submitted for approval by the Academic Senate and the BOT before submission to the CCCCCO for approval. The Academic Senate requires that all Career and Technical Education (CTE) courses be reviewed and revised every two years and that all other courses be reviewed at least every five years.

The Academic Senate has a New Program Approval Policy and Process that faculty use in the creation of new programs. Again, following guidelines in the PCAH, programs are proposed using developed courses to meet requirements for certificates and degrees. CTE programs require labor market data to demonstrate need for a proposed program, and are additionally reviewed and endorsed by a regional CTE consortium as required by the CCCCCO. New and substantively changed programs are reviewed and approved by the Curriculum Committee, the Academic Senate, and the BOT on recommendation of the college president before being submitted to the CCCCCO for final approval. In addition, in compliance with California Education Code Section 78016, CTE programs are submitted for review by the BOT for documented labor market demand and evidence that they do not represent unnecessary duplication of other manpower training programs in the area.

The college president is the designated college administrator charged with forwarding curriculum to the SOCCCD chancellor and BOT. On this matter, BP 6100 sets forth the following clear and concise roles and responsibilities:

- All programs and courses approved by a college's Academic Senate are forwarded to the college president for his or her review. Once approved by the college president, the college president forwards the approved programs, courses, and recommendations for program deletions to the chancellor for his or her review and to the BOT for its review and final approval.
- No SOCCCD colleges may offer programs or courses that fail to meet the curriculum standards in the Program and Course Approval Handbook (PCAH), relevant state laws and regulations, and Accreditation Standards. If such a failure occurs, the college president shall direct the appropriate faculty immediately to conduct and complete curriculum review in order to bring the programs and courses into compliance.

The College also relies on its faculty and administration for recommendations about student learning programs and services. As such, the College, through policies and procedures, has well-defined structures to ensure that this reliance is both protected and maintained. New student learning program and service ideas may originate at any level of the institution. Grant proposals may be submitted to secure funds for pilot a program or service if there is faculty interest in championing a new initiative. Requests can be made through the resource allocation process for resources needed to pilot a new initiative. Programs and services are evaluated for effectiveness, and recommendations made by the faculty and administrators involved in institutionalizing successful new programs and services to a governance committee, such as the Planning and Budget Steering Committee or Consultation Council. Approval by the Consultation Council results in a recommendation to the president regarding new programs and services.

For example, a grant opportunity was provided by the Dell Foundation to implement an Advancement Via Individual Determination (AVID) for Higher Education program in fall 2013 with a cohort of financially needy students. Faculty involved in establishing the Student Success Coordinating Council championed the proposal, which was funded for three years. Resource requests to support the program were submitted and approved, and the program is currently undergoing analysis to determine if it should continue as it exists and become a national demonstration program for AVID for Higher Education.

ANALYSIS AND EVALUATION

The SOCCCD and the College meet the Standard.

Evidence

- IV.A.4.1 BP 2100.1, Delegation of Authority to the Academic Senate
- IV.A.4.2 BP 6100, Curriculum
- IV.A.4.3 Curriculum Committee
- IV.A.4.4 Education Planning and Assessment Committee
- IV.A.4.5 Online Education Committee
- IV.A.4.6 California Code of Regulations, Sections 66700, 70901, 78016, 70902

- IV.A.4.8 California Code of Regulations, Title 5, Sections 53200-53205
- IV.A.4.9 California Code of Regulations, Title 5, Section 55002(a)(1)
- IV.A.4.10 Saddleback College Curriculum Committee Bylaws (SharePoint address?)

IV.A.5 Through its system of board and institutional governance, the institution ensures the appropriate consideration of relevant perspectives; decision-making aligned with expertise and responsibility; and timely action on institutional plans, policies, curricular change, and other key considerations.

EVIDENCE OF MEETING THE STANDARD

The District and College maintain a governance structure that recognizes the need for all constituents to have a voice in all decision-making processes. Therefore, all decision-making councils and committees include membership from all constituent groups to ensure the participation of individuals with the background, expertise, and responsibility necessary for sound decision-making. These bodies, on the District level, include the Districtwide Planning Council (DWPC), Board Policy and Administrative Regulation Advisory Council (BPARAC), and the Chancellor's Cabinet, among others. On the College level, these bodies include the PBSC and CC, among others. All of these bodies meet regularly at set times in established locations, and the respective meeting agendas are prepared and disseminated to committee members in advance and made available to other interested parties. The meeting minutes of each of these governance bodies are prepared in a timely manner and distributed to members. Minutes are also posted on the website and/or SharePoint site of the respective council, committee, or task force.

The BOT includes seven elected officials and one student trustee, elected each year on an alternate basis from the student bodies of Irvine Valley College or Saddleback College. BOT meetings are held regularly each month at roughly the same time and in the same location. The specific start times are posted, along with the agenda, on the District website and in front of the board room at least 72 hours prior to the start of the meeting. Meeting dates for the following year are determined each December and posted to the District website. Special meetings are convened as needed and follow the appropriate notification required by the Brown Act. Representatives from administration and each constituent group, including students, are given a seat at the table directly facing the board at each meeting and are provided a microphone so that they can be recognized by the board president as they speak on agenda items during the meeting. Administration and each constituent group also provide brief reports at each meeting to keep the board apprised of their activities and concerns.

At the college level, each constituent group has a representative body through which their concerns and perspectives are discussed and formulated. These include the Membership Team for managers and administrators, Academic Senate for the faculty, Classified Senate and CSEA for the classified staff, and ASG for the students. In addition, various committees and task forces with broad membership exist to ensure careful consideration of all relevant perspectives. Each constituent group approves its own representatives to serve on committees and task forces. These bodies provide input and recommendations, especially relating to areas in which specialized knowledge is required, to the decision-making bodies on campus. A complete list of

committees, along with some task forces, can be found in the Saddleback College Governance and Organization Manual and on the College website. Below is a flowchart showing how feedback from these bodies is incorporated into the decision-making processes of the College.

Recommendation also occur through the biennial program and administrative review processes, outlined in I.x.xx above, through which resource allocations requests are made and curricular changes are developed. Annually, resource allocations requests go through the College resource allocation process during which all requests are prioritized according to specific criteria at four levels of analysis and discussion, as discussed more fully in I.x.xx. Curricular changes go through an annual technical review process overseen by the Curriculum Committee, a subcommittee of the Academic Senate. This process is discussed in detail in II.x.xx.

Additionally, both the College and the District leadership understand the importance of the decision-making process based on reliance of accurate and timely data and metrics. To this end, the District and the colleges leadership have embraced an ongoing conversation that promotes the addressing of barriers that were getting in the way of effectively make decisions utilizing data and metrics. A Districtwide barriers committee was established to provide recommendations to improve the process.

These recommendations included:

- Improve the usability of the data used in decision-making
- Evaluate products that allow for self-service data mining and analysis
- Increase the Districtwide commitment to data-based decision-making
- Improve transparency in the decision-making process
- Provide instructions and training related to accessing data

ANALYSIS AND EVALUATION

District and College governance processes ensure the consideration of all relevant perspectives. All constituent groups are represented on every decision-making body. Councils, committees, and task forces meet on a regular basis at set times and locations in order to ensure maximum opportunity for participation.

Data-supported decision-making has been supported at the College and District level. Financial decisions are based on information provided by College or District data warehouses that are made available through data management systems such as inForm and research provided by District and College research departments.

Evidence

- IV.A.5-1 *Saddleback College Governance Manual*
- IV.A.5-2 Barrier #2 Final Recommendation Summary, July 2014

IV.A.6 The processes for decision-making and the resulting decisions are documented and widely communicated across the institution.

EVIDENCE OF MEETING THE STANDARD

All BPs and ARs that describe decision-making processes are posted on the District website, where they are available to all employees and the general public. Changes to BPs and ARs go through a participatory governance process and are distributed through each of the representative group bodies. BP changes must be approved by the BOT, and are distributed via the BOT meeting agendas, which are posted on the District's website.

The governance and decision-making processes of the College are documented in the Saddleback College Governance and Organization Manual. The processes and procedures outlined in the manual are developed by PBSC and approved by the Consultation Council, both of which have representation from all representative groups on campus. The director of planning, research and accreditation is responsible for maintaining, updating, and posting the manual, which is available for employees and the public on the Office of Planning, Research, and Accreditation (OPRA) website. The manual is also available internally on SharePoint.

The governance and decision-making processes of Districtwide planning and committees are documented in the *SOCCCD District-wide Decision Making Manual 2015-2020*. The processes and procedures outlined in the manual are developed by the Districtwide Planning Council (DWPC), a shared governance body. To ensure continuous quality improvement, the DWPC undertakes a comprehensive revision of the manual every five years and makes minor updates annually. This evaluation process is overseen by the district director of research and planning, who is responsible for maintaining, updating, and posting the manual, which is available for employees and the public on the District's planning webpage. The manual is also available internally on SharePoint.

The BOT and the College Academic Senate adhere to the open meeting laws for public agencies as mandated by Section 54952 of the California Government Code (or Brown Act). Therefore, agendas and minutes are posted openly and all meetings include the opportunity for public comments. Decisions made by the BOT are posted as minutes on the District website. The district director of public affairs also publishes meeting highlights the day after each board meeting and emails these highlights to all employees of the District. The meeting highlights are also posted on the District website. Decisions made by the Academic Senate are posted as minutes on the Senate website.

At both the District and College levels, decisions made by all councils and committees not covered by the Brown Act are included in the minutes of meetings and posted on the SharePoint sites for each committee. In addition, representative group members of these councils and committees are tasked with bringing information back to their constituency. This information is delivered via reports given to representative group meetings and/or email.

ANALYSIS AND EVALUATION

The District and College decision-making processes are well documented in BPs, ARs, and governance manuals. These processes are made available to employees through the District and College websites and SharePoint sites.

The District and College comply with Brown Act requirements regarding the posting of agendas and minutes for the BOT and the Academic Senate. Information regarding decisions made in Districtwide and College councils and committees not covered by the Brown Act is also distributed through posted minutes and through reports made by representative group members of decision-making bodies. All constituent groups have representation on every decision-making body at the institution.

Evidence

IV.A.6-1 Saddleback College Planning and Governance Manual

IV.A.7 Leadership roles and the institution's governance and decision-making policies, procedures, and processes are regularly evaluated to assure their integrity and effectiveness. The institution widely communicates the results of these evaluations and uses them as the basis for improvement.

EVIDENCE OF MEETING THE STANDARD

The College regularly reviews and re-evaluates its leadership roles and its governance and decision-making policies, procedures, and processes in order to ensure their integrity as well as their effectiveness. Additionally, the College widely communicates the results of these reviews and evaluations and uses these results as a basis for continuous quality improvement both in its governance and decision-making processes as well as in the ever-evolving roles and responsibilities of its leadership.

Through the BPARAC, BPs and ARs are regularly reviewed and revised as needed. All councils and committees annually review their purpose and membership, including the designated chair, and revise as needed. Moreover, all committees perform annual surveys of their membership to ensure that they are functioning properly and make changes when needed.

Institutional Effectiveness

In 2016, the College created the Office of Institutional Effectiveness. The purpose and focus of the Office of Institutional Effectiveness is to coordinate the leadership and decision-making policies, procedures, and processes in areas that play a significant role in student success. The College established the position of assistant vice president of institutional effectiveness to lead the Office of Institutional Effectiveness.

The Office of Institutional Effectiveness oversees the following critical areas:

- Program and Administrative Reviews
- Federal and State Compliance
- Student Outcomes
- Student Success
- Research
- Accreditation
- Curriculum
- Online Education

Within these focal areas, the assistant vice president of institutional effectiveness's role is

1. to ensure institutional effectiveness, quality instruction, student learning, and instructional services at the College.

2. to ensure that all constituent groups have an opportunity in the governance of these leadership and decision-making areas and that all constituent groups are properly represented.
3. to provide leadership, coordination, and support for online education and for professional development Collegewide.
4. to perform assigned duties in compliance with applicable state and federal regulations and guidelines, SOCCCD policies and procedures, and the College's educational goals and objectives.

And additionally, the assistant vice president of institutional effectiveness charge includes

1. fostering a culture of collaboration, mutual respect, innovation, and continuous improvement throughout the SOCCCD.
2. participating actively in and supporting Districtwide participatory governance components and activities and other collaborative processes.
3. encouraging professional excellence among staff.
4. promoting an organizational culture of customer service, innovation, and quality services.

ANALYSIS AND EVALUATION

The College meets the Standard.

IV.B Chief Executive Officer

IV.B.1 The institutional chief executive officer (CEO) has primary responsibility for the quality of the institution. The CEO provides effective leadership in planning, organizing, budgeting, selecting and developing personnel, and assessing institutional effectiveness.

EVIDENCE OF MEETING THE STANDARD

The college president reports to, assists, and supports the SOCCCD chancellor in the performance of the duties delegated by BP 2100, Delegation of Authority to the Chancellor. Under this arrangement, the college president is granted broad authority for developing and implementing the College's integrated planning efforts and resource allocation processes and for implementing BPs. As such, the college president provides effective leadership in planning, organizing, budgeting, selecting and developing personnel, as well as assessing institutional effectiveness through the shared governance process and with the delegated authority that comes with his or her appointment by the chancellor with the approval of the SOCCCD BOT. The president's administrative organization is the established authority on campus and the college president is the final authority at the college level.

As the CEO, the president enhances administrative teamwork through principles of leadership, decision-making, and empowerment. The president effectively oversees and actively leads the PET, which is composed of the president and vice presidents at the college; the Management Team, a committee composed of all administrators and managers; and CC, a participatory governance committee and the primary planning and decision-making body at the College.

The duties and responsibilities of the president as stipulated by BP include the following:

- Provides leadership for the educational programs of the College, ensuring the effective operation of curriculum development, program review and academic planning processes, and instructional support services.
- Provides leadership for student support services necessary to ensure student access to College programs.
- Directs all aspects of College personnel management, including the selection of a qualified and diverse faculty and staff, effective evaluation processes, teaching and work assignments, professional development activities, contract administration, and disciplinary actions when necessary.
- Directs the development and management of annual College budgets, in accordance with accepted governance and accountability standards.

- Oversees and provides leadership for the development of the College's long-range and short-range planning efforts, including the Educational and Facilities Master Plan, Strategic Plan, and all integrated plans.
- Ensures that all plans consider Accreditation Standards and student success issues and that they drive the budget and resource allocation decision-making.
- Maintains an effective administrative organization and delegates appropriate responsibilities to the College administrative staff.
- Implements a college governance program which is participative, accountable, and effective.
- Promotes effective communication within the College, with the District, and with the BOT.
- Represents the College to the community, schools, four-year colleges and universities, state and national agencies, local businesses, professional organizations, and other public entities.

ANALYSIS AND EVALUATION

As the CEO, the college president effectively fulfills his primary responsibility of ensuring the overall quality of the institution and provides effective leadership in planning, in organizing, in budgeting, in selecting and developing personnel, and in assessing institutional effectiveness.

DRAFT

IV.B.2 The CEO plans, oversees, and evaluates an administrative structure organized and staffed to reflect the institution’s purposes, size, and complexity. The CEO delegates authority to administrators and others consistent with their responsibilities, as appropriate.

EVIDENCE OF MEETING THE STANDARD

The president is responsible for devising, overseeing, and evaluating the administrative structure of the College. The current administrative configuration was established in xxx when the president proposed the current administrative structure of the College that now includes administrative services, instruction, and student services. Prior to this, the College was only divided into instruction and student services. The addition of this third area also necessitated the creation and hiring of a third vice president to oversee College administrative services. Thus, the upper administration of the College includes:

The President’s Executive Team (PET)

The current president also instituted two additional bodies to extend participatory governance and empower leadership at the College. These are Management Team (MT) and CC. MT, which is composed of all college managers and administrators, meets biweekly and is chaired by the president. The purpose of MT is to provide an opportunity for leadership to discuss issues—including accreditation, strategic planning, budget, and governance—pertinent to College decision-makers and supervisors. (EVI-governance manual). CC is composed of representatives from all College constituent groups. It meets biweekly and is chaired by the president, who serves as a nonvoting member of the committee. CC serves as the College’s main strategic planning and recommending body, and all other committee decisions are discussed and considered by CC before final recommendations are presented to the president. (EVI - governance manual).

The president regularly evaluates the administrative structure at the College and makes recommendations for changes when necessary. These recommendations are vetted through the College participatory governance bodies, including CC, before a final recommendation is reached by the president in consultation with PET. Since the College’s last accreditation study, the president has created and promoted the following leadership positions:

- director of student life
- director of tutoring
- vice president of college administrative services
- assistant vice president of institutional effectiveness
- director of grants
- dean of online education and learning resources
- dean of community educations, emeritus institute, and K-12 partnerships
- director of economic and workforce development

In order to achieve the mission of the College and to improve institutional effectiveness, the president delegates responsibility and authority to all managers and administrators consistent with their responsibilities as listed in their job descriptions.

ANALYSIS AND EVALUATION

As the CEO, the college president effectively plans, oversees, and evaluates administrative structure, and consistently organizes and staffs this administrative structure in such a way as to reflect the institution's purposes, size, and complexity. Additionally, the College's CEO delegates authority to administrators and others consistent with their responsibilities, as appropriate.

IV.B.3 Through established policies and procedures, the CEO guides institutional improvement of the teaching and learning environment by:

- **establishing a collegial process that sets values, goals, and priorities;**
- **ensuring the college sets institutional performance standards for student achievement;**
- **ensuring that evaluation and planning rely on high quality research and analysis of external and internal conditions;**
- **ensuring that educational planning is integrated with resource planning and allocation to support student achievement and learning;**
- **ensuring that the allocation of resources supports and improves learning and achievement; and**
- **establishing procedures to evaluate overall institutional planning and implementation efforts to achieve the mission of the institution.**

EVIDENCE OF MEETING THE STANDARD

Through established policies and procedures, the college president guides institutional improvement of the teaching and learning environment by maintaining collegial processes that set values, goals, and institutional priorities. The college president does this by engaging in the College shared governance processes and by providing leadership and guidance to support major campus planning initiatives. Through his direction and oversight, the college president has created and maintained a well-developed, detailed, and collaborative integrative strategic process that is used to set the values, goals, and priorities of the College in order to support present and future student learning and student achievement. This process includes

1. The strategic planning process as discussed in Standard I and in the handbook. Focus on it being a collaborative process that begins with the setting of the mission and values, then goal setting.
2. How the College is currently using institution-set standards to document student learning and achievement.
3. The use of research in planning and evaluation.
4. The ways in which PRs and AURs are integrated into planning.
5. The resource allocation process and how it stems initially from PRs and AURs.
6. Annual evaluation of the plan and process to ensure continuous quality improvement.

The college president has made institutional effectiveness, educational planning, outcomes assessment, and continuous improvement priorities for setting and maintaining institutional performance standards for student achievement. The president has also created an environment in which constant improvement and institutional effectiveness has promoted student achievement and student success.

Through several mechanisms, the college president ensures that educational planning and distribution of resources is directly linked to student success and to student learning outcomes (SLOs). The college president fosters the development and adoption of the revised strategic planning processes by directly incorporating PRs, AURs, SLOs, and Administrative Unit Outcomes (AUOs) into ongoing evaluation and planning.

The president also relies on the processes implemented by the vice president for instruction (VPI). The VPI, in collaboration with the college deans, gathers data from the inFORM Data Warehouse for the purpose of ensuring that the College's evaluating and planning rely on high-quality research and analysis. The data gathered are used to monitor enrollment trends and to manage course offerings to ensure students meet their academic plans in a timely manner.

The president works to ensure that planning and evaluating rely on high-quality research and data through several processes. As part of this ongoing process, the president approves recommended procedures to evaluate overall institutional planning and implementation efforts by fostering the reconstitution of the PBSC to ensure that research and data are being used in resource allocation. The recommendations of the PBSC feed into the CC for deliberation and for a recommendation to the president for action.

Using the consultative process, the president accepted the recommendation of the governance group leadership and the CC to expand the College's research office by hiring a director of research, planning and accreditation. This position reports directly to the president through the Office of the Vice President of Instruction. OPRA provides institutional data collection and analysis on internal and external conditions that is used to support College planning and enhance institutional effectiveness and decision-making. The director of research, planning and accreditation also co-chairs the PBSC [what is this? Full formal name...] and serves on the CC. The input provided by the director of OPRA serves to reinforce the requirement that decisions are guided by institutional research, adhere to the College Strategic Plan, and are consistent with the College's Mission, Vision, and Values.

Again, as part of the consultation process, the president, after analyzing the roles and responsibilities of the Office of Instruction, determined the need for the creation an assistant vice president position focusing on institutional effectiveness. This new upper-management position reports to the president through the Office of the Vice President of Instruction and oversees Collegewide research, curriculum, ... [need to get Chris' job description]

Collaborating with the Academic Senate, the president supports and advocates for the appointment of a full-time faculty member to establish and to lead the EPA Committee and another to lead the PR process. These two positions work together to assist faculty, staff, and management in the assessment of SLOs and AUOs and create data-based reports for use in PR and AURs.

ANALYSIS AND EVALUATION

The College meets the Standard.

Evidence

- IV.B.3-10 Job description of VP/IE

IV.B.4 The CEO has the primary leadership role for accreditation, ensuring that the institution meets or exceeds Eligibility Requirements, Accreditation Standards, and Commission policies at all times. Faculty, staff, and administrative leaders of the institution also have responsibility for assuring compliance with accreditation requirements.

EVIDENCE OF MEETING THE STANDARD

Per BP 2101, the president has the primary leadership role for accreditation and for ensuring that the College meets or exceeds all Eligibility Requirements, Accreditation Standards, and Commission Policies at all times and on all levels. As such, all faculty, staff, managers, and administrators working to ensure that the College complies with the accreditation process and meets the standards and criteria established by the Commission work under the guidance and leadership of the president.

The accreditation process and self-evaluation has always been a top priority of the president. As evidence of this, the president reconfigured the role of the director of planning, research and accreditation so that compliance with Accreditation Standards was continuously considered and analyzed through the year and accreditation cycle. Accreditation is no longer seen as something that is done only for the purposes of completing the self-evaluation report, but, rather, is embedded in the institutional structure. Moreover, in order to ensure board participation in the accreditation process, the president created an Accreditation Steering Committee and appointed representatives from all three areas—faculty, staff, and administration—to serve as tri-chairs of the committee. The administration tri-chair is the vice president for student services, who also serves as the college accreditation liaison officer (ALO). Under the direction of the president, the Accreditation Steering Committee works to lead the accreditation self-evaluation process, a process that requires a thorough examination of College policies and practices with regard to the Accreditation Standards.

The Accreditation Steering Committee meets twice monthly throughout the self-evaluation process. At these meetings, the chairs of each of the Standards report on the work being done. The president regularly attends these meetings and provides input on the Standards as needed.

Both the board and chancellor openly support the president's role with regard to accreditation, and provide support to the president and College as needed. For example, administrators from District Services sit on the Accreditation Steering Committee and assist with addressing the Standards, particularly as related to the role of the board, the chancellor, and District Services in supporting College processes.

ANALYSIS AND EVALUATION

The president actively supports and leads the College's efforts in meeting and in exceeding the ACCJC Accreditation Standards, Eligibility Requirements, and Commission Policies at all times. The president has adjusted the administrative structure at the College to ensure that the Standards

are continuously addressed and has created a committee structure, which includes faculty, staff, administration, and students that encourages broad participation in this process. Moreover, the president attends the Accreditation Steering Committee regularly and participates in the development of self-evaluation reports.

| IV.B.4-4 | Chancellor email of June 14, 2016 | |

IV.B.5 The CEO assures the implementation of statutes, regulations, and governing board policies and assures that institutional practices are consistent with institutional mission and policies, including effective control of budget and expenditures.

EVIDENCE OF MEETING THE STANDARD

The president is responsible for the implementation of all statutes, regulations, and BPs at the College and works closely with the board and the chancellor to ensure that institutional practices are consistent both with the College mission and policies as well as with the effective control of the College budget and expenditures.

Per BP 2101, Delegation of Authority to the College President, it is the responsibility of the president to administer the policies adopted by the board, to execute all decisions of the board requiring administrative action, and to ensure compliance with all relevant laws and regulations. The president attends all BOT meetings and presents a monthly report on the activities of the College. The president also sits on Chancellor's Council, which sets the agenda for upcoming board meetings, discusses issues of importance to both colleges, such as regulatory changes, and reviews all proposed changes to BPs and ARs. The president also meets regularly with the chancellor and works closely with the district director of public affairs and government relations to discuss changes to laws and regulations at the local, state, and federal levels.

When new, revised, and deleted BPs and ARs are proposed by BPARAC, the president provides input and coordinates their review at the College through PET, MT, and CC and ensures that input is collected from all constituent groups on campus through representation at CC and on BPARAC. Copies of these proposals are distributed to all constituent groups and input received through their representatives on these committees.

Similarly, the college president effectively controls the College budget and expenditures by utilizing data and information provided by the vice president for college administrative services (VPCAS) and committees responsible for the allocation of resources. The VPCAS reports directly to the president and presents monthly expenditure simulations during PET meetings. The VPCAS ensures that the allocation of funds is made through the proper College processes and that each resource allocation decision is linked to the Strategic Plan and to the PR and AUR. Moreover, the College had established sound fiscal practices and processes that have consistently produced balanced budgets. These practices have resulted in healthy ending balances that have exceeded eight (8) percent of the total budget for the past xx years and have allowed for College contingency and enrollment growth.

Although the president assumes primary responsibility for the aforementioned matters, he also delegates authority to College managers and administrators for compliance appropriate to their areas of supervision, as discussed in IV.B.2 above.

ANALYSIS AND EVALUATION

The president is responsible for ensuring the implementation of statutes, regulations, and BPs and for ensuring that institutional practices are consistent with the College's mission and policies. PET and leadership committees are consistently involved with monitoring compliance with all statutes, regulations, and BPs. In addition, the president has established procedures to ensure the effective management of District and College resources. The president has delegated the primary responsibility of fiscally managing these resources to the VPCAS and addressed through the Planning and Budget Steering Committee (PBSC). In turn, the College budget is monitored through internal controls, including Budget Committee review, quarterly reports, and external audits.

Evidence

IV.B.5-1	BP-2101 Delegation of Authority to the College President
IV.B.5-2	BP 3610 Auxiliary Organizations
IV.B.5-3	Saddleback College Foundation Bylaws
IV.B.5-4	The Saddleback College President's Gaucho Gazette

IV.B.6 The CEO works and communicates effectively with the communities served by the institution.

EVIDENCE OF MEETING THE STANDARD

The president works and communicates effectively with the communities served by the institution on a number of levels and in a variety of ways, including student-focused outreach, community-focused outreach, the College Foundation, community outreach, economic and workforce development, and public information and marketing.

Student-Focused Outreach

To help raise the profile of the College in the neighboring communities, the college president annually invites all senior administration and trustees from the surrounding school districts to meet with College personnel, who showcase the College's programs, certificates, and degrees.

The president also regularly hosts events for high school counselors, graduating seniors, and incoming students. For the 2015-2016 academic year alone, the College sent a letter to over 7000 graduating high school seniors welcoming them to the College and inviting them to attend the College's annual Senior Day and to participate in Early Bird registration and the Transfer Agreement Guarantee (TAG) program. As a welcoming gesture, the president also sends new incoming seniors an official Saddleback College letter of acceptance.

While the College Senior Day is the largest planned gathering and planned student-focused outreach effort performed by the College, the president is also actively involved in the following student-focused outreach programs hosted by the College:

- Welcome Week
- Family Night
- High School Counselor Day
- Tech-Prep Day

Community-Focused Outreach

In partnership with the surrounding business community, the president continues to be one of the primary advocates for community economic development. Similarly, the College has been a leading advocate of the findings in the 2016 South Orange County Economic Report, a report which provides detailed and accurate information regarding the current and future economic trends of cities that partner with the College. South Orange County cities and their prominent business members have overwhelmingly accepted the findings and the proposals.

The Saddleback College Foundation and Community Outreach

Another method by which the president effectively engages the communities served by the College is through the Saddleback College Foundation Office. The Foundation solicits and

coordinates donations to the College, and it is organized exclusively for charitable and educational purposes as a 501(c)(3) of the Internal Revenue Code. The College Foundation is recognized as an auxiliary organization and operates under the guidelines established by BP 3610, Auxiliary Organizations.

The College Foundation accepts contributions from the public, initiates and coordinates college fundraising, ensures the appropriate distribution of funds and gifts, and provides judiciary oversight of contributions. The Foundation also serves as an important vehicle for engaging the College community through service on the Board of Governors and through its support of special events that have lasting public relations value.

The president is seeking to elevate the College presence within the surrounding community through the ever-increasing visibility of the Saddleback College Foundation. This goal has led the president to oversee the alignment of the College Foundation with the College's strategic directions with emphasis on increasing student scholarships, developing capital campaigns, and increasing the alumnae/i organization. Similarly, and under the aegis of the College Foundation, the president has established the President's Club. The President's Club comprises individual and corporate members who join with the College in fulfilling its commitment to improving the South Orange County communities and to providing expanded educational opportunities to all stakeholders within these same communities.

Economic and Workforce Development

In order to meet the needs of surrounding communities, the president created the Economic and Workforce Development Office headed by the director of economic and workforce development. Under the guise of the College, the primary task of the director of economic and workforce development is to establish relationships with the community in order to organize and to provide contract training and continuing education for business employees so that community business employees may more readily meet the needs and requirements of local employers.

Public Information and Marketing

The president works closely with the director of public information and marketing to disseminate information through the President's Gaucho Gazette, the Annual State of the College Report, and an ongoing series of press releases to local, regional, and national media.

For the 2015-2016 academic year, the College website was revised to focus on students in a way that marketed the College and made it easier for the community to access information. The College also reaches out to students and the community through active social media pages on platforms such as Facebook and Twitter.

(I want to run this by Jennie McCue as I believe there are other modes of communicating here as well, such as eBlasts, emails, news releases, etc.)

ANALYSIS AND EVALUATION

The president works and communicates effectively with the communities served by the College in a variety of ways including student outreach, the College Foundation, economic and workforce development, and public information and marketing.

Evidence

- IV.B.6-1 BP 3601, Auxiliary Organizations
- IV.B.6-2 Internal Revenue Service, Section 501 c (3)

DRAFT

IV.C.1 The institution has a governing board that has authority over and responsibility for policies to assure the academic quality, integrity, and effectiveness of the student learning programs and services and the financial stability of the institution.

EVIDENCE OF MEETING THE STANDARD

The College exists under the auspices of the SOCCCD. As the governing board for the College, the SOCCCD BOT, with the assistance of the district chancellor, has both the responsibility and the authority to establish policies to assure the quality, integrity, and effectiveness of student learning programs and services as well as the financial stability of the District and its colleges. BP 112, Duties and Responsibilities of the Board of Trustees, outlines these responsibilities in accordance with the authority granted the board by California Education Code. These responsibilities include establishing the District mission, establishing policies that implement the District mission, assuring the development and implementation of short-term and long-term educational and facilities plans, assuring the fiscal health and stability of the District, delegating power to the chancellor, working respectfully with all employees of the District, hiring and evaluating the chancellor, advocating for and protecting the District, and representing the public interest (PB 112).

The Board Policy and Administrative Regulation Advisory Committee (BPARAC), which includes representatives from all constituent groups in the District, is responsible for regularly evaluating BPs and drafting recommended changes to the policies and their associated administrative regulations. BP recommendations are then forwarded to the chancellor and the board for review and approval. ARs are approved at the chancellor level.

The district director of public affairs and government relations maintains the District's website, which includes all approved BPs, ARs, and other pertinent information. Thus, BPs and ARs are accessible to all employees and the public. The BPs and their aligned ARs are organized in numbered series by the following categories:

- | | | | |
|---|-------------|---|---------------------|
| • | 100 Series | – | Bylaws |
| • | 1000 Series | – | Community Relations |
| • | 2000 Series | – | Administration |
| • | 3000 Series | – | Business |
| • | 4000 Series | – | Human Resources |
| • | 5000 Series | – | Students |
| • | 6000 Series | – | Instruction |
| • | 8000 Series | – | Speech and Advocacy |

ANALYSIS AND EVALUATION

As established in policy and law—especially as it pertains to financial stability and the academic quality, integrity, and effectiveness of student learning programs—the SOCCCD board has authority over, and responsibility for, all aspects of the District and its colleges. BPs are regularly evaluated and revised by a Districtwide participatory governance committee and reviewed by the chancellor and board prior to approval. Revised policies are provided in meeting agendas, presented at meetings by the vice chancellor of business services, and openly discussed by the board members before approval.

Evidence

IV.C.1-1 https://www.socccd.edu/about/about_boardpolicynew.html

IV.C.2 The governing board acts as a collective entity. Once the board reaches a decision, all board members act in support of the decision.

EVIDENCE OF MEETING THE STANDARD

The SOCCCD BOT is committed to high standards of ethical conduct for its members, as delineated in BP 110, Code of Ethics – Standards of Practices. One of the basic principles contained within this policy is the recognition that the board acts as a whole and that authority rests only with the board in a legally constituted meeting, not with individual members (BP 110). Thus, while members of the board, at times, have differing opinions on items that come before them, once the board has reached a decision—either via consent or by vote—on an item, the board acts as a collective entity and all board members act in unison in support of the collective decision.

Additionally, all board members perform their duties and interact within the SOCCCD community with the intent of fostering a Districtwide culture of mutual respect, courteous interaction, open cooperation, and common civility with all stakeholders in the SOCCCD community as defined in BP 180, Respectful Interactions and Collaboration. Thus, SOCCCD board members are respectful and inclusive of all input and viewpoints when discussing topics in board meetings and prior to any voting. As evidence of their professional decorum, all board meetings are videotaped live and subsequently posted on the SOCCCD website for public viewing.

ANALYSIS AND EVALUATION

SOCCCD has developed and approved BPs that outline the ethical conduct for all elected board members; this specified conduct includes the requirement that the board act in unison once a decision is reached by the body. In addition, when disagreements arise, they are discussed openly and respectfully prior to the board reaching a collective decision. Videotapes of board meetings and minutes detailing board actions from recent years, both available on the District's website, substantiate behavior in accordance with these policies.

Evidence

- IV.C.2-1 BP – 112 Duties and Responsibilities of the Board of Trustees
http://www.socccd.edu/about/about_boardpolicy1.html
- IV.C.2-2 BP – 180 Respectful Interactions and Collaboration
http://www.socccd.edu/about/about_boardpolicy1.html
- IV.C.2-3 South Orange County Community College Board of Trustees Meetings
http://www.socccd.edu/about/about_board_minutes_video.html

IV.C.3 The governing board adheres to a clearly defined policy for selecting and evaluating the CEO of the college and/or the district/system.

EVIDENCE OF MEETING THE STANDARD

The board adheres to clearly defined policies for selecting and evaluating the chancellor of the SOCCCD. Three of these policies include BP 146, Chancellor Succession; BP 148, Evaluation of the Chancellor; and BP 4011.6, Employment Procedures for Chancellor. When taken in total, these three BPs clearly delineate the rules and requirements for hiring and evaluating the SOCCCD CEO. BP 146 delegates authority to the current chancellor to appoint an acting chancellor to serve in his or her absence for short periods not to exceed 60 calendar days at a time. The board appoints an acting chancellor for periods exceeding 60 calendar days. When a new chancellor is to be hired, the board adheres to the procedures outlined in BP 4011.6, which ensure that input from administration, faculty, and staff is obtained in order to select the most highly qualified individual to fill the vacancy. Once hired, the board conducts an annual evaluation of the chancellor as required by BP 148. The criteria for evaluation are based on board policy related to the duties and responsibilities of the chancellor (BP 2100, Delegation of Authority to the Chancellor), the chancellor job description, and established performance goals and objectives.

Per BP 2100, Delegation of Authority to the Chancellor, the chancellor is responsible for "hiring and evaluating the college presidents. The Chancellor delegates full responsibility and authority to the presidents to administer the colleges without interference and holds the presidents accountable for the operation of the colleges."

Thus, in accordance with BP 2100, the board delegates full authority to the chancellor in the hiring, supervising, and evaluating of the college president.

ANALYSIS AND EVALUATION

As established by BP, the board is responsible for selecting and evaluating the chancellor of the District. In compliance with the provisions of California Education Code, the board delegates full responsibility and authority to the chancellor to implement and administer BPs and conduct the business of the District and educational programs without interference, and holds the Chancellor accountable for the operation of the District. In turn, the chancellor is responsible for selecting and evaluating the college presidents. The chancellor delegates full responsibility and authority to the presidents to administer the colleges without interference and holds the presidents accountable for the operation of the colleges.

DRAFT

IV.C.4 The governing board is an independent, policy-making body that reflects the public interest in the institution's educational quality. It advocates for and defends the institution and protects it from undue influence or political pressure.

EVIDENCE OF MEETING THE STANDARD

The SOCCCD BOT is an autonomous policy-making body that attempts to reflect the public interest in the educational quality of the District. In so doing, the board advocates for and defends its colleges and protects the colleges from undue influence as well as from political pressure.

The SOCCCD BOT is comprised of seven members, each of whom resides in the geographical area he or she represents. Board members are elected at large to four-year terms by the voters in south Orange County. For the dual purposes of continuity and self-preservation, the terms of the seven board members are staggered, with elections being held every two years in connection with the state of California general election (BP 106). A student trustee is elected to a one-year term by the students of Saddleback and Irvine Valley colleges and has an advisory vote on all actions taken in open session (BP 104).

In accordance with law and BP 110, Code of Ethics – Standards of Practices, board members are agents of the public entrusted with public funds, and they must protect, advance, and promote the interest of all citizens while also maintaining independent judgment unbiased by private interests or special interest groups. They must also hold the educational welfare and equality of opportunity of the students of the District as their primary concern. BP 112, Duties and Responsibilities of the Board of Trustees, also lists advocating for and protecting the District and representing the public interest as two of the board's primary responsibilities. Board members consistently advocate for the interests of both of the public and District through their interaction with the community, legislators, local organizations, and students. Furthermore, as discussed in BP 130, Public Participation at Board Meetings, the board encourages public participation at their meetings. There is time allotted to public comments at each meeting, or written comments may be submitted. Members of the public may also place items on the prepared agenda in accordance with BP 128, Board Agendas. To validate and support transparency in all of its decision-making, the board conducts all District business in open public meetings, with the exception of legally-permitted closed sessions related to legal concerns, personnel, and collective bargaining. The board also consistently provides all of its business and other information to the public on the District's website. This information includes BPs, board self-evaluations, meeting agendas and minutes, and other relevant information.

ANALYSIS AND EVALUATION

The College meets the Standard.

Evidence

IV.C.4-1 Board of Trustees
https://www.socccd.edu/about/about_board.html

DRAFT

IV.C.5 The governing board establishes policies consistent with the college/district/system mission to ensure the quality, integrity, and improvement of student learning programs and services and the resources necessary to support them. The governing board has ultimate responsibility for educational quality, legal matters, and financial integrity and stability. The district/system's mission is reviewed annually with input from constituencies district-wide to ensure it continues to support the quality, integrity, and improvement of student learning programs.

EVIDENCE OF MEETING THE STANDARD

The board adheres to strict budget planning guidelines and fiscally conservative values. It maintains authority over all legal matters and decisions. The board ensures educational quality through BPs governing students and instruction. The board is updated annually with research and reports on institutional effectiveness, student success, and completion. Presentations are made annually in public board meetings to review and discuss the Student Success Scorecard and other metrics. The board routinely invites presentations on student success initiatives. The board has invested additional support toward the development of highly innovative technology tools which support educational quality and student success.

The first four pages of the District's Adopted Budget provide an overview of budget planning efforts, major capital projects, technology initiatives, budget resources, priorities, and the board's governing values regarding resource allocation.

Board presentations on Student Success – ESL & Basic Skills, Financial Aid, Learning Resource Center Tutorial Programs, Saddleback Learning Resource Center Tutorial Programs, Student Success Summits, College Scorecards, Enrollment Management plans, and Career Technical Education Certificate programs.

The District Resources Allocation Council (DRAC); the Basic Aid Allocation Recommendation Committee (BAARC); and BP 3110, Basic Aid Funds Allocation Process, govern the responsible allocation of all operating and capital outlay expenses to ensure educational quality and financial stability. Both committees are participatory governance committees representing all constituencies.

ANALYSIS AND EVALUATION

The SOCCCD meets the standard.

DRAFT

IV.C.6 The institution or the governing board publishes the board bylaws and policies specifying the board's size, duties, responsibilities, structure, and operating procedures.

EVIDENCE OF MEETING THE STANDARD

As alluded to in numerous standards throughout this self-evaluation, the SOCCCD and its BOT, in their efforts to validate and to support transparency in all decision-making and business, publish the District's bylaws and policies specifying the size, duties, responsibilities, structure, and operating procedures of the BOT. These policies are published on the District's website, where there are links to the District's BPs both from the homepage as well as from the SOCCCD BOT pages.

The BPs which delineate the structural and operational matters pertaining to the board are contained within the 100 series – Bylaws. These BPs include:

- BP 103, Board Membership, which specifies board membership and size
- BP 104, Student Member of the Board of Trustees, which specifies qualifications, requirements for office, term of office, and election
- BP 105, Organization of the Governing Board, which specifies election of officers and the establishment of a set time and place for regular meetings
- BP 106, Board Elections, which specifies the term of office for board members and the trustee geographical areas
- BP 108, Vacancies on the Board, which specifies how and when vacancies outside of the normal election cycle can be filled
- BP 109, Board Education, which demonstrates the board's commitment to ongoing development as a board and outlines the guidelines for conference participation
- BP 110, Code of Ethics – Standards of Practice, which outlines the basic ethical principles of the board
- BP 112, Duties and Responsibilities of the Board of Trustees, which lists the basic responsibilities of all board members
- BP 118, Committees of the Board, which indicates the ability of the board to establish committees
- BP 120, Regular Meetings of the Board, which specifies the location of regular board meetings
- BP 122, Closed Sessions, which specifies the items that can be considered in closed sessions
- BP 124, Special and Emergency Meetings, which describes the ability of the board to call special and emergency meetings
- BP 126, Quorum and Voting, which specifies the parliamentary rules to be used during board meetings
- BP 128, Board Agendas, which outlines the mandatory practices related to board meeting agenda development and publicizing

- BP 136, Minutes of the Board of Trustee Meetings, which specifies the how minutes will be taken and made available
- BP 154, Conflict of Interest, which specifies board members' obligations in relation to conflicts of interest
- BP 158, Political Activity, which outlines rules related to the political activities of board members
- BP 172, Board Self Evaluation, which states the board's commitment to regular self-evaluation and self-improvement
- BP 180, Respectful Interactions and Collaboration, which states the board's commitment to fostering a climate of mutual respect, cooperation, and civility

ANALYSIS AND EVALUATION

The BPs on bylaws related to structure and operating procedures are comprehensive and publicly available on the District website. These policies are regularly reviewed and revised by the board with assistance from the chancellor.

DRAFT

IV.C.7 The governing board acts in a manner consistent with its policies and bylaws. The board regularly assesses its policies and bylaws for their effectiveness in fulfilling the college/district/system mission and revises them as necessary.

EVIDENCE OF MEETING THE STANDARD

The BOT performs its duties and fulfills its responsibilities in a manner consistent with its BPs and its bylaws, and abides by BP 112, Duties and Responsibilities of the Board of Trustees, as discussed in IV.C.6 above. Additionally, through procedures established by BP 107, Board Policy and Administrative Regulation, and its associated AR, the board regularly assesses and revises its BPs and bylaws to ensure their effectiveness in fulfilling the missions and visions of the District and its colleges.

New policies and revisions to existing policies may originate from board members, the chancellor, employees of the District, or members of the public (BP 107). The primary body for reviewing BPs is BPARAC, as directed by AR107. BPARAC is a Districtwide participatory governance committee tasked with systematically reviewing and updating BPs and ARs. When reviewing BPs, BPARAC considers recommendations by the Community College League of California (CCLC) and changes to state and federal law. Whenever BPARAC members deem and approve revisions, updates, or deletions from a BP or AR, the changes are then submitted to Chancellor's Council for review and input. Chancellor's Council also has authority to approve ARs, as they simply outline the means by which policy is implemented. Once assessed by Chancellor's Council, all BPs are presented as a monthly agenda item for board review and discussion. Per BP 107, the new and revised policies receive at least two readings by the board and are agendaized the first time as "acceptance for review and study" and the final time as "approval." (Minutes) Once approved, revised, and updated, policies and/or ARs are posted on the District website for public view. The agendas and minutes of board meetings documenting these revisions are also posted on the District website. Additionally, agendas, minutes, and evidential documents from BPARAC and Chancellor's Council meetings are made available to all employees through the District's SharePoint site under Districtwide Committees.

ANALYSIS AND EVALUATION

As is clearly evident in the posted agendas, minutes, and videotapes of their board meetings, the SOCCCD BOT acts in accordance with established policies and bylaws. BPs are also reviewed regularly and revised as needed by all participatory governance groups through BPARAC and Chancellor's Council and by the BOT.

Evidence

IV.C.7-1 BP-107 Board Policy and Administrative Regulation

DRAFT

IV.C.8 To ensure the institution is accomplishing its goals for student success, the governing board regularly reviews key indicators of student learning and achievement and institutional plans for improving academic quality.

EVIDENCE OF MEETING THE STANDARD

The board is updated annually with research and reports on institutional effectiveness, student success, and completion rates. Presentations are made annually in public board meetings to review and discuss the Student Success Scorecard and other metrics. The Scorecard provides indicators of the colleges' performance regarding remedial instruction, job training programs, retention of students, and graduation and completion rates.

ANALYSIS AND EVALUATION

SOCCCD and the College meet the standard.

Evidence

IV.C.8-1 http://www.socccd.edu/board/highlights/documents/Scorecard2015PresentationBOT_Final.pdf

IV.C.9 The governing board has an ongoing training program for board development, including new member orientation. It has a mechanism for providing for continuity of board membership and staggered terms of office.

EVIDENCE OF MEETING THE STANDARD

The BOT has access to an ongoing training program for the development of its members. This training program includes orientation for new members of the BOT. Additionally, the SOCCCD has mechanisms in place to provide continuity of BOT membership that, among other points, includes staggered terms of office.

As discussed in BP 109, Board Education, the board is committed to its ongoing development as a board and to an individual trustee education program related to educational governance, policies, legislation, best practices, employee relations, leadership, and Accreditation Standards and expectations. The board has a comprehensive new board member orientation program that includes attendance at the CCLC's Effective Trusteeship Workshop. Locally, new trustees are given an orientation by the chancellor and the manager of the office of the chancellor and trustee services. They also meet with the vice chancellor of business services, the vice chancellor of human resources and employer/employee relations, and the vice chancellor of technology and learning services, as well as several other department managers.

The board prides itself on its professional demeanor and on its dynamic evolution both as an autonomous body as well as a body of professional individuals. As such, each member is encouraged to attend one conference per year that provides professional development of trustee-related knowledge and skills. These conferences include the CCLC's Effective Trusteeship Workshop, which is held annually in January, as well as various conferences hosted by the CCLC, the American Association of Community College (AACC), and the Association of Community College Trustees (ACCT). This commitment to professional development is evidenced by budget allocations allowing each trustee to participate in regional meetings and workshops and up to two District conferences each year. Following attendance at conferences, workshops, and meetings, trustees regularly share a written and oral report to the other trustees and the public at open board meetings (EVI-minutes).

As outlined in BPs 103, 104, and 106, and discussed in detail in IV.C.4, the board is comprised of seven members, each of whom resides in the geographical area he or she represents, and an advisory student member. Each board member is elected at large to an individual four-year term by the voters in south Orange County. For the dual purposes of continuity and self-preservation, the terms of the seven board members are staggered with elections being held every two years in connection with the state of California general election. The student trustee is elected annually by the students of Saddleback College and Irvine Valley College, with election alternating each year between the two colleges.

In the event of an unexpected vacancy, the board has adopted procedures to fill the vacancy either by election or provisional appointment (BP 108) in accordance with Education Code 5090 and Government Code 1770. The decision to order an election or appoint must be made within 60 days, and the election, if ordered, must be held at the next regular election date or within 130 days of the vacancy, whichever comes first. Provisional appointments are made only until the next regularly scheduled election.

ANALYSIS AND EVALUATION

The board is committed to the continued education of its members. New board members are given a comprehensive and robust orientation, and all board members are encouraged to continue their professional development through attendance at trustee-related meetings, workshops, and conferences. The board has enacted election practices ensuring the continuity of board membership through the staggering of seat terms, and has adopted procedures in the event of a vacancy.

Evidence

IV.C.9-1 BP 103

IV.C.9-2 BP 104

IV.C.9-3 BP 106

IV.C.9-4 BP 108

IV.C.9-5 BP 109

IV.CI9-6 Minutes of board meetings

IV.C.10 Board policies and/or bylaws clearly establish a process for board evaluation. The evaluation assesses the board’s effectiveness in promoting and sustaining academic quality and institutional effectiveness. The governing board regularly evaluates its practices and performance, including full participation in board training, and makes public the results. The results are used to improve board performance, academic quality, and institutional effectiveness.

EVIDENCE OF MEETING THE STANDARD

Each year the SOCCCD BOT conducts an evaluation of its performance in order to continually assess its effectiveness. This process includes surveys of board members and employees, discussion of the surveys, and a workshop to review outcomes and set goals. All employees are invited to participate in providing feedback through a survey. A special meeting of the board is publicized and conducted by a third-party facilitator. Information is posted on the District website for public transparency. The board fully reviews the surveys and board goals in an effort toward continual improvement and effectiveness.

The BOT also holds periodic trustee listening sessions for classified staff and faculty to hear issues. These sessions are publicized Districtwide. The board may subsequently ask the chancellor to follow up on any concerns or provide a public presentation or board report on a specific issue. The listening sessions help the board clarify and underscore its role at the policy level. The trustee listening sessions improve board performance by connecting the board members to the colleges and District. The chancellor, managers, and administrators are asked not to attend these sessions in order to facilitate a more open dialogue with board members.

ANALYSIS AND EVALUATION

The SOCCCD meets the standard.

Evidence

IV.C.10-1 BP 172: Board Self Evaluation

IV.C.10-2 Board of Directors Self Evaluation Results

<https://www.socccd.edu/about/BoardSelfEvaluation2015.html>

IV.C.11 The governing board upholds a code of ethics and conflict of interest policy, and individual board members adhere to the code. The board has a clearly defined policy for dealing with behavior that violates its code and implements it when necessary. A majority of the board members have no employment, family, ownership, or other personal financial interest in the institution. Board member interests are disclosed and do not interfere with the impartiality of governing body members or outweigh the greater duty to secure and ensure the academic and fiscal integrity of the institution.

EVIDENCE OF MEETING THE STANDARD

The SOCCCD BOT holds itself—and all employees—to a high code of ethics and to a clear conflict of interest policy. The behavior of board members is governed by BP 110, Code of Ethics – Standards of Practice, which includes both detailed standards of practice all board members must adhere to as well as clear and thorough guidelines for enforcing these standards of practice. The policy mandates standards of practice related to conflict of interest in financial dealings and nepotism, board decision-making, confidentiality, the protection of public funds, nondiscrimination, the primacy of the educational welfare and equality of opportunity for students, meeting participation and preparation, professional development, the promotion and maintenance of good relations with fellow board members, and the promotion of an effective working relationship with the chancellor and District staff. Violations of this policy can result in censure by the board.

Per California AB1234, Chapter 700, Statutes of 2005 (through the California Fair Political Practices Commission), and in its effort to support the BP governing ethical behavior, every board member is required to complete Chapter 700 ethics training. This training is free of charge and provided online. Upon completion of the training, a certification of completion is given and these certificates are kept on file in the Office of the Chancellor and Trustee Services.

As outlined in BP and AR 154, Conflict of Interest, every board member is also required to be both discerning and meticulous in disclosing any connections to personal or financial interests that may conflict with his or her responsibilities as a public steward, and in such instances he or she must abstain from any debate or decision-making related to such interests and have the disclosure noted in the official minutes of the meeting. A board member must also not engage in any employment or activity that is inconsistent with, incompatible with, in conflict with, or inimical to his or her duties as an officer of the District.

Within 30 days of assuming office, and annually thereafter, each board member must file a Statement of Economic Interests Form (Form 700) with the filing officer in the Office of the Vice Chancellor of Business Services. This form is then forwarded to the Orange County Board of Supervisors. Failure to comply in a timely manner with this policy can result in criminal and civil penalties including, but not limited to, late fines. Finally, as a way of bearing witness to

these processes, all SOCCCD BOT meetings are taped to provide further public transparency. These tapings are made available to the public on the District's website the day after a board meeting.

ANALYSIS AND EVALUATION

The board has clear code of ethics and conflict of interest policies. These policies establish the expected standards of practice for all members of the board, as well as processes for sanctioning behavior that violates the policies. Board members are fully aware of these standards and, to date, there have been no reported instances of violation by any board member or any sanctions discussed or imposed. Board members are required to file an annual Statement of Economic Interests Form with the Orange County Board of Supervisors.

Evidence

- IV.C.11-1 BP 110 – Code of Ethics – Standards of Practice
- IV.C.11-2 AB 1234, Chapter 700, Stats. of 2005
- IV.C.11-3 BP 154 – Conflict of Interest
- IV.C.11-4 AR 154 – Conflict of Interest

IV.D.1 In multi-college districts or systems, the district/system CEO provides leadership in setting and communicating expectations of educational excellence and integrity throughout the district/system and assures support for the effective operation of the colleges. Working with the colleges, the district/system CEO establishes clearly defined roles, authority and responsibility between the colleges and the district/system.

EVIDENCE OF MEETING THE STANDARD

The SOCCCD is a multi-college district and the chancellor is the CEO of the District. As such, the chancellor is charged with providing leadership in setting and communicating expectations of educational excellence and integrity throughout the system for effective operation of the District colleges: Irvine Valley College and Saddleback College. The SOCCCD BOT has approved BPs in order to ensure that the chancellor is able to establish clearly defined roles, authorities, and responsibilities among the colleges and the District. The two most pertinent policies are BP 2100, Delegation of Authority to the Chancellor, and BP 2101, Delegation of Authority to the College President. Furthermore, the chancellor has overseen the development of additional documents to clarify roles and responsibilities in the District. These documents include the District-wide Planning and Decision Making Manual and the Districtwide Function Map—both of which were developed through the District-wide Planning Council (DWPC), a participatory governance council with membership from all constituent groups within the District—as well as Roles and Responsibilities of Technology.

Moreover, the chancellor meets weekly with the Chancellor’s Executive Team, which includes all of the vice chancellors and the two college presidents. The chancellor also meets monthly with all District leadership at Chancellor’s Council, a participatory governance council charged with facilitating information exchange and dialogue on Districtwide issues and decisions, including governance.

Expectations of educational excellence and integrity are communicated through various means, such as the Chancellor’s Opening Session during Professional Development Week each year. The chancellor also meets with all new full-time faculty hires during their orientation session.

The chancellor also communicates regularly through the *Chancellor’s Perspective* newsletter, which is mailed out each semester to all employees, and is sometimes used to help clarify District functioning. For example, in the *Chancellor’s Perspective* from June 18, 2015 (<https://www.socccd.edu/RolesandResponsibilities.htm>), entitled “Roles and Responsibilities,” the chancellor reviews the roles of the board, chancellor, and college presidents. In it, he delineated the roles and responsibilities of each party as follows:

The Board

As elected officials, the board represents the interests of the public. They establish the mission of the district and set policies and standards to support the district’s mission and

goals. They bear primary responsibility for the district's fiscal health and stability. They monitor institutional effectiveness and quality and implementation of short and long term educational and facilities plans. The board manages one employee - the chancellor. They delegate full responsibility and authority to the chancellor to lead the district without interference. The board relies on the chancellor to act as the liaison between the colleges and the governing board, including evaluation of executive leadership.

The Chancellor

The chancellor is the CEO of the district and supervises the college presidents, vice chancellors and staff and operations of district services. The chancellor is responsible for implementation of the district's strategic plan, master plans, board policies and regulations and expectations for educational excellence and integrity. The chancellor provides for a fair distribution of resources, control of expenditures, accreditation and long term financial stability to ensure effective operation of the colleges. The chancellor is responsible for hiring and evaluating the college presidents and vice chancellors. The chancellor delegates authority to the presidents for instruction and college operations. More information can be found in Board Policy 2100 – Delegation of Authority to the Chancellor.

The College Presidents

The president is the CEO of the college and is the established authority on campus. The president is responsible for providing a participatory governance process and supporting learning, teaching and student success. The president provides leadership for developing and implementing strategic partnerships and career technical education offerings that meet the needs of the community. The president has the decision making responsibility and authority for all college hiring, discipline and termination, fiscal budgeting and prioritization, planning, and maintenance or improvement of facilities. More information can be found in Board Policy 2101 – Delegation of Authority to College President.

ANALYSIS AND EVALUATION

For the most part, the SOCCCD chancellor meets the Standard. There have been instances, however, when the district chancellor has appeared to fail to explain certain points of demarcation to the district presidents and their respective administrations. One such instance is the lack of clearly defined roles of authority with regard to the service areas for each college in the District. This ineffective delimitation and unsatisfactory definition of each college's outlining allocation has been cause for what some perceive as less-than-honest efforts of one college or the other to go beyond the bounds of a given college's defined service areas, thus creating a less-than-amiable relationship of trust and collaboration.

Additionally, the College and District have worked to improve this communication and decision-making barrier between the two colleges and the district office. The Districtwide effort to address this matter included the Barriers to Mutual Respect, Cooperation, and Collaboration Workshop, a dialogue wherein the colleges and District were represented by governance groups and stakeholders. The workgroup recommended improved dialogue between the colleges and District and the promotion of respectful interactions and greater understanding regarding specific roles and responsibilities.

Action Plan

In response to the somewhat ineffective District-imposed service areas on the colleges, in April 2016 the College's Academic Senate reviewed the salient points of the history of the service area and the service-area boundaries, as well as how and why this area and these boundaries no longer serve the better good of either Irvine Valley College or Saddleback College. The College's Academic Senate then unanimously passed a resolution entreating the SOCCCD to revisit the service area and service-area boundaries.

Evidence

- IV.D.1-1 BP 2100, Delegation of Authority to the Chancellor
https://www.socccd.edu/about/about_boardpolicy3.html
- IV.D.1-2 BP 2012, Delegation of Authority to the College President
https://www.socccd.edu/about/about_boardpolicy3.html
- IV.D.1-3 District-Wide Planning and Decision-Making Manual
- IV.D.1-4 Roles and Responsibilities of Technology
- IV.D.1-5 Saddleback College Academic Senate Minutes. April 27, 2016
- IV.D.1-6 Barrier #1 – Unhealthy competition within and between IVC, Saddleback, and District

IV.D.2 The district/system CEO clearly delineates, documents, and communicates the operational responsibilities and functions of the district/system from those of the colleges and consistently adheres to this delineation in practice. The district/system CEO ensures that the colleges receive effective and adequate district/system provided services to support the colleges in achieving their missions. Where a district/system has responsibility for resources, allocation of resources, and planning, it is evaluated against the Standards, and its performance is reflected in the accredited status of the institution.

EVIDENCE OF MEETING THE STANDARD

As established in BP, there is a clear delineation of functions and responsibilities of District Services from those of the colleges. These policies include:

- BP-112, Duties and Responsibilities of the Board of Trustees
- BP-2100, Delegation of Authority to the Chancellor
- BP-2100.1, Delegation of Authority to the Academic Senate
- BP-2100.2, Role and Scope of Authority of the Academic Senates
- BP-2101, Delegation of Authority to the College President
- BP-3001, Delegation of Authority
- BP-4309, Duties and Responsibilities of the Faculty
- BP-4056, Classified Employees Participation in Decision Making
- BP-5627, Student Participation in Governance

These policies are communicated by the chancellor in a variety of ways, including through the posting of BP to the District website.

In the June 18, 2015 *Chancellor's Perspective*, the chancellor outlined the distinction between the colleges and District Services, a distinction that is often misunderstood by District personnel. He wrote:

We are all part of the same organization – South Orange County Community College District. There are clear lines of authority established between the board and chancellor and the chancellor and presidents. Organizationally, neither the colleges nor district services reign over each other. Any assumptions that one entity is superior over another sets unreasonable expectations and fuels tensions. We are all part of the same family with differing roles and functions. Like musicians in an orchestra, each of us plays a part to bring this district to life.

The colleges serve our students by providing instruction and many, many operations and services needed to support students – curriculum, campus safety, facilities, and student services to name just a few. The chancellor delegates authority to the presidents to make decisions for the colleges. Decisions related to hiring, evaluation, discipline, promotion, termination, maintenance and budget priorities, and governance are all managed by the college presidents.

District Services provides centralized functions, enabling the district to operate more economically and efficiently. Accounting, payroll, purchasing, contracts, job recruitment, and IT systems security are examples of services performed for all departments, divisions and employees district-wide. Some people may not realize that District Services is also responsible for areas related to legal, compliance, policy, legislative, reporting, development, systems, employee complaints, research and planning. Sometimes District Services has to provide parameters, oversight or guidance to college or district services departments in these areas. Sometimes changes or limitations are needed and this can cause disappointment or conflict.

We are considered to be one of the most decentralized community college districts in the state.

Additionally, governance, fiscal, and operational responsibilities are often clarified and refined in the Districtwide participatory governance committees and councils, including:

- Basic Aid Allocation Recommendation Committee (BARC)
- Board Policy and Administrative Regulation Advisory Council
- Business Continuity Planning Committee
- Capital Improvement Committee (CIC)
- Chancellor's Council
- District Online Education Committee
- District Resource Allocation Committee (DRAC)
- District-wide Planning Council
- District-wide Technology Committee
- Learning Services Coordinating Committee

There are several functions that are centralized in District Services. These functions include human resources, technology and learning services, business services, and trustee services.

The Office of the Vice Chancellor for Human Resources and Employee/Employer Relations is responsible for facilitating the recruitment, selection, and orientation of new employees; mandated training and professional development; collective bargaining; compliance with state and federal laws and regulations; management of the performance evaluation process; and human resources information systems.

The Office of the Vice Chancellor of Technology and Learning Services coordinates educational programs, technology services, and Districtwide research. The vice chancellor also provides leadership in enrollment management; distance education; workforce development programs; online services, products, and programs; security, reliability, and continuity of all Districtwide network infrastructure, computer operations, and telecommunications; the maintenance of MIS data and reporting tools; and the maintenance of the student information system (SIS), My

Academic Plan (MAP), MySite, the learning management systems (Blackboard and Canvas), and Workday.

The Office of the Vice Chancellor for Business Services provides oversight of all business departments, including Fiscal Services; Facilities Planning and Purchasing; Accounting; Payroll; and Risk Management. The vice chancellor collaborates with the two colleges to prepare the tentative and final District budgets, and provide support and expertise to DRAC. The vice chancellor's office also provides oversight of the annual audit, new construction and facilities renovation, master plan development, and warehouse/mailroom services.

The Office of the Chancellor and Trustee Services is responsible for the coordination of all regular and special board meetings. This coordination includes notification, preparation, and distribution of agendas and minutes. Office responsibilities also include dissemination of information Districtwide; coordination of Districtwide events, such as the Chancellor's Opening Session during Professional Development Week each semester; and coordination of Districtwide committee meetings, including the Chancellor's Executive Team and the Chancellor's Council. Public Affairs, a division within the Office of the Chancellor, is responsible for coordinating marketing; government, community and public relations; and media relations.

The services provided to the colleges by District Services are evaluated through discussions in, and surveys for, the participatory governance committees. For example, the District's resource allocation process is evaluated by several committees, including CIC, BARC, and DRAC. Evaluation of services is also done through a biannual Districtwide climate survey. The survey is used to provide opportunities for employee feedback and identify future goals. Lastly, evaluation of services is also done by each District Services department through the use of administrative unit reviews, which include goals, action steps, and documented outcomes (link to AUR).

ANALYSIS AND EVALUATION

The SOCCCD meets the Standard.

DRAFT

IV.D.3 The district/system has a policy for allocation and reallocation of resources that are adequate to support the effective operations and sustainability of the colleges and district/system. The district/system CEO ensures effective control of expenditure.

EVIDENCE OF MEETING THE STANDARD

The District has established resource allocation policies and procedures that support the effective operations and sustainability of the colleges and District Services. Under the leadership of the chancellor, College and District Services personnel work together to ensure effective control of expenditures and the financial stability of the District.

The allocation of District general fund resources to the colleges occurs in accordance with BP 3100, Budget Preparation; BP 3101, Budget Management; BP 3101.5, Fiscal Management; and the Budget Development Guidelines contained within each proposed annual budget. The Budget Development Guidelines were developed DRAC, a participatory governance committee. They were developed in alignment with the board philosophy of ensuring wide and prudent use of public resources, promoting financial strength and stability, and maximizing educational opportunities for students in accordance with the District's Mission Statement (EVI-Budget Guidelines). The guidelines related to College allocations include:

- A general fund reserve for economic uncertainties of no less than 7.5 percent of the projected unrestricted revenue shall be maintained.
- Expenditure budgets for ongoing purposes shall be the resources that would have been available from state apportionment.
- Excess revenue above apportionment shall be allocated at the College or District for one-time purposes, such as to cover some of the unfunded obligations for the retiree benefit plans.
- Excess revenue above apportionment shall not be used for ongoing expenditures, such as salaries.
- Excess revenue above apportionment shall not be used for any purposes that will jeopardize the District's future financial stability.

The District has also established effective mechanisms to control expenditures. College and District financial statuses are regularly reported to, and reviewed by, the board (EVI-minutes); these reports include the presentation of monthly financial status reports (EVI), monthly basic aid reports (EVI), and adopted annual budgets (EVI). The District also commissions an annual audit report designed to provide reasonable assurance that the financial statements are free of material misstatement. The annual audit considers the District's internal controls over financial reporting in order to plan the audit but does not give an opinion on those controls. In addition, the District's participatory governance committees and collective bargaining groups also provide comprehensive budget and financial oversight, including reviews of the District's CCFS-320 filings and full-time faculty obligation number (FON).

ANALYSIS AND EVALUATION

The District has a long history of financial conservatism. District Services and the colleges adhere to standards of good practice that include the maintenance of adequate reserves, the development of annual budgets, and the reporting of financial statuses. Through the effective control of expenditures, District Services and the colleges have consistently had positive ending balances and a healthy reserve each year.

The District's Fiscal Services Department processes and facilitates the distribution of resources to the colleges in accordance with the DRAC model, state and federal categorical fund allocation guidelines, and BPs. Resources allocated to the colleges are based on both state-mandated guidelines and board-approved budget guidelines.

The College has been concerned about the perception that decisions made by District have lacked transparency and adherence to established policies, procedures, and protocols. This concern has been expressed to District leadership. In an effort to improve the relationship between the College and District, two workgroups were established to address the concerns and their effect on maintaining effective relationships between Saddleback College, Irvine Valley College, and the district office. The recommendations from these two workgroups promoted collegial interaction, defined roles and responsibilities, and improved communication. The recommendations from the workgroups are still being reviewed and implemented by the colleges and District.

Evidence

- IV.D.3-1 BP 3100, Budget Preparation
- IV.D.3-2 BP 3101, Budget Management
- IV.D.3-3 BP 3101.5, Fiscal Management
- IV.D.3-4 Budget Development Guidelines
- IV.D.3-5 Barrier #3 – Circumvention and lack of established policies, procedures, and protocols
- IV.D.3-6 Barrier #4 – Lack of district-wide perspective and mutual understanding and acceptance of the roles of each college and district services

IV.D.4 The CEO of the district or system delegates full responsibility and authority to the CEOs of the colleges to implement and administer delegated district/system policies without interference and holds college CEO's accountable for the operation of the colleges.

EVIDENCE OF MEETING THE STANDARD

As discussed in IV.D.2 above, the board has adopted policies that ensure that the chancellor designates full responsibility and authority to the college president. As detailed and defined in BP 2100, Delegation of Authority to the Chancellor, the board gives the power for hiring and evaluating the college presidents to the chancellor and maintains that the chancellor must delegate full responsibility and authority to the presidents to administer the colleges without interference (BP 2100).

BP 2100 states, "The Chancellor is responsible for hiring and evaluating the college presidents. The Chancellor delegates full responsibility and authority to the presidents to administer the colleges without interference and holds the presidents accountable for the operation of the colleges."

Additionally, BP 2101, Delegation of Authority to the College President, clearly outlines the roles and responsibilities of the college president. This policy establishes the college president as the final authority on the college level. In this role, the college president is expected to:

- "Provide leadership in the development and implementation of a sustainable master plan and integrated strategic plan."
- "Promote and support learning, teaching, and student success, including the maintenance and improvement of quality instructional and support services."
- "Provide leadership in the development and implementation of career technical education to meet the needs in the community."
- "Provide leadership in the development and implementation of a comprehensive enrollment management plan."
- "Develop and monitor the college budget and assume fiscal responsibility."
- "Propose strategies for selecting and retaining diverse high quality full-time faculty, staff and administrators."
- "Provide leadership and empower the administrative team."
- "Provide leadership focusing on accountability and professional conduct."
- "Assume a highly visible leadership role in the community and build strategic partnerships with corporate, educational and community-based organizations."

This authority is recognized by the District as evidenced in the adopted Districtwide Function Map, which delineates the distinction between the authority of the chancellor and that of the president. Through the evaluation process, the chancellor holds the college presidents accountable for the colleges' performance; however, the college presidents have the ability to direct the colleges and implement board policy without interference.

ANALYSIS AND EVALUATION

The chancellor delegates full responsibility and authority to the college presidents to implement BPs and ARs without interference. The college presidents serve as the CEOs of the respective colleges. As such, they are responsible for the quality and integrity of programs and services, accreditation, and the fiscal stability of each college.

IV.D.5 District/system planning and evaluation are integrated with college planning and evaluation to improve student learning and achievement and institutional effectiveness.

EVIDENCE OF MEETING THE STANDARD

The chancellor chairs the DWPC, which includes representatives from both colleges and District Services. The purpose of the council is to coordinate all Districtwide planning.

The DWPC is the primary body that led the creation of the *SOCCCD District-wide Strategic Plan 2014-2020*. The plan includes shared goals, objectives, and key performance indicators—all of which were developed over a two-year period that included over 100 hours of meetings, review, and discussion on priorities from both colleges and District Services. The DWPC meets twice a semester and holds an annual retreat to monitor and evaluate progress on the Strategic Plan and planning processes.

IV.D.6 Communication between colleges and districts/systems ensures effective operations of the colleges and should be timely, accurate, and complete in order for the colleges to make decisions effectively.

EVIDENCE OF MEETING THE STANDARD

The chancellor meets weekly with the college presidents to discuss executive issues and to maintain a high level of communication to ensure seamless operation of the colleges.

The district director of public affairs and government relations in the Chancellor's Office reports outcomes from board meetings via Board Highlights, a summary sent out via email Districtwide following each regular board meeting. These outcomes are also posted on the District website. The College's director of marketing and communications sends the College's weekly newsletters and announcements to all District Services and College employees. There is a high level of communication and coordination between District Services and the College.

Chancellor's Council meets monthly to discuss Districtwide topics, and all constituency groups are represented. Council members provide updates and are responsible for communicating information back to their constituencies in a timely manner.

The director of public affairs and government relations sends out announcements from District Services departments via Districtwide email to ensure a high level of effective operations and constant communication with employees.

ANALYSIS AND EVALUATION

The SOCCCD meets the Standard.

Evidence

IV.D.7 The district/system CEO regularly evaluates district/system and college role delineations, governance and decision-making processes to assure their integrity and effectiveness in assisting the colleges in meeting educational goals for student achievement and learning. The district/system widely communicates the results of these evaluations and uses them as the basis for improvement.

EVIDENCE OF MEETING THE STANDARD

The chancellor meets regularly with his executive team for advisory discussions on Districtwide items that may need recommendations or decisions by the chancellor and the BOT.

Additionally, the chancellor co-chairs the DWPC which reviews priorities in College and District Services planning agenda items and utilizes the Districtwide Planning and Decision Making Manual, a document which outlines the philosophy of decision-making; provides guiding principles; defines participation; and explains the development of integrated planning between the colleges and District Services. The manual also outlines budget priorities for planning.

The chancellor communicates the results of major decision in the Board Highlights, *Chancellor's Perspective* Newsletters, and District Updates sent out in Districtwide emails.

The *District-wide Planning and Decision Making Manual 2015-2020* outlines the timeline for major updates and revisions to major planning documents. Additionally, the District conducts a Districtwide climate survey every two years and annual Districtwide committee self-assessments.

The SOCCCD District-wide Function Map – currently being updated with ACCJC standards 2015 – narrative and assignment of responsibilities. The last function map was created with the previous standards from 2010.

In addition to the timeline outlined in the Districtwide Planning and Decision Making Manual, the chancellor coordinates and evaluates the following activities as part of District Services' annual assessment process, and Districtwide communications are sent out on these evaluations:

- Annual SOCCCD Board of Trustees' Self-Evaluation and Workshop
- <http://www.socccd.edu/about/BoardSelfEvaluation2016.html>
- District Services Administrative Unit Review

ANALYSIS AND EVALUATION

The SOCCCD meets the Standard.

Quality Focus Essay:

During the process of compiling its Accreditation Report, the College assessed the extent to which it evaluated the accomplishment of its mission and the ways in which it incorporates institutional processes that support, assess, and monitor academic quality, institutional effectiveness, and student achievement outcomes. The Accreditation Steering Committee convened on a bimonthly basis to review its progress on the Accreditation Report and to discuss topics that were relevant for the Quality Focus Essay (QFE). In summer 2016, the Accreditation Steering Committee, informed by discussions with stakeholders across the College, agreed that the QFE would focus on two areas: student success metrics for institutional effectiveness and online education.

Action projects were developed for each of these topics. The table below identifies the relationship of these action projects to the Accreditation Standards:

Action Project	Standards Related to Action Project		
Student success metrics for institutional effectiveness	I.A.2	I.B.4	I.B.9
	I.A.3	I.B.5	I.C.2
	I.B.1	I.B.6	IV.A.1
	I.B.3	I.B.8	
Online education	I.A.1	II.A.4	III.A.2
	I.A.3	II.A.5	III.A.3
	I.A.4	II.A.7	III.A.5
	I.B.1	II.A.9	III.A.6
	I.B.2	II.A.10	III.A.7
	I.B.3	II.A.12	III.A.14
	I.B.5	II.A.16	III.B.1
	I.B.7	II.B.1	III.B.2
	I.B.9	II.B.2	III.B.3
	I.C.1	II.B.3	III.B.4
	I.C.2	II.C.1	III.C.1
	I.C.4	II.C.2	III.C.2
	I.C.7	II.C.3	III.C.4
	I.C.8	II.C.5	III.C.5
	II.A.1	II.C.7	III.D.1
	II.A.2	III.A.1	IV.A.4

This QFE will identify the problem and outline the desired goals and outcomes as well as the action steps, timeline, involved parties, resources, and methods of assessment for each action project.

Action Project One: Student Success Metrics for Institutional Effectiveness

Introduction: Student Success Metrics for Institutional Effectiveness

Institutional effectiveness relates to the extent to which an institution can cultivate and sustain a culture of evidence to support the effectiveness of programs, services, and the institution at large. At the forefront of institutional effectiveness is continued leadership to support the examination of achievement outcomes relative to College goals, and to set new priorities, policies, procedures, and/or practices for the College. Statewide initiatives, such as the Institutional Effectiveness Partnership Initiative (IEPI), mandate that colleges begin the process of discussing broad student outcomes and creating both short and long-term goals for a set of broad student success metrics. The ACCJC has enforced adoption of federally mandated institution-set standards, which are minimum thresholds by which the College determines appropriate outcomes. Within these parameters, the College is expected to be fully engaged with the process of understanding its broad-based indicators, such as its goals and minimum thresholds for performance. An important factor for the successful launch of IEPI and institution-set standards is planning to grow a culture of evidence-based decision-making through the process of embedding meaningful and scalable approaches to data-driven dialogue. Moreover, these dialogues should continuously link back to goals for state or federal mandates as well as aligned with the mission, vision and strategic plan of the college. That is, data conversations about key student success metrics should affect the strategic planning process, so that the goals of the College are on par with expected trends in student success metrics, such as those displayed in the CCCO Scorecard or by institution-set standards.

A critical aspect of measuring institutional effectiveness resides within the process of focused goal-setting for the College. When goals appear arbitrary, the college's members may not understand the rationale for a predetermined target. With meaningful goal setting at the course, program, department, or administrative unit or student service level faculty, staff and administrators will be motivated to not only meet federal mandates, but to make changes to improve student achievement and outcomes on a daily basis. Guided by these goals, incremental changes that ensue become enacted college wide and align with appropriate success and achievement metrics. When these goals are richly documented in terms of their rationale, context, and history, the institution gains progress with respect to its own aspirations in addition to what might be required for external accountability, including accreditation. The College, in turn, has greater visibility into allocating resources and creating action steps that would affect changes at the institution. In other words, priorities for funding physical, technological, or human resources are adequately connected to goals because the goals are fully understood and, in turn, guiding activities.

Identification of the Problem and Action Project

At present, the College has a variety of platforms upon which data and broad goals are displayed. These platforms include Districtwide strategic planning, Collegewide strategic planning, and planning that occurs within programs, student support, and administrative units. Apart from goal-setting, the College also has the inFORM Data Warehouse with which virtually every employee of the campus can access data. The problem is not access to data, but instead a lack of tools to guide deeper inquiry about data as well as a lack of meaningful goal-setting for accreditation-based or state-required mandates. Data resources are myriad and accessible, but the College has lacked a formalized structure, process, and communication plan to tie the Scorecard metrics and institution-set standards to goals, findings, objectives and action steps. One possible reason for this is that the Office of Research, Planning and Accreditation (OPRA) did not have the charter or leadership to data-mine various trends in order to uncover the real “data story” behind patterns. OPRA has now undergone a leadership transition and has had significant professional development on mining data specifically for the purposes of uncovering these “data stories” from just a few pieces of the initial student success metrics.

The process of presenting goals relative to student success metrics first began by inviting the College into a discussion of metrics and goals at the College's first annual Student Success Metrics Summit in spring 2016. At this event, OPRA educated the College community about various metrics and also enhanced awareness among faculty, staff, management, and students regarding student success metrics on the Scorecard and the ACCJC Annual Report. It was also discovered that the College had inappropriately determined its institution-set standards and instead of using a minimum threshold for setting expectations, the College was actually calculating aspirational goals. As the College's stakeholders were largely unengaged in goal-setting for the last three years, it appeared that goal-setting was an exercise of compliance reporting rather than a meaningful activity that used data for evidence-based decision-making.

As it was the first of its kind, the Student Success Metrics Summit had a clear educational role. Faculty, staff, management, and students were provided with information about the IEPI and were also given multiple on-the-spot quiz questions (with live response data) about specific student success metrics in the Scorecard. From the live responses on the quizzes, it was determined that many individuals did not know what these metrics were. Participant comments at the summit also reflected a lack of understanding about how these metrics tied into the College's Strategic Plan. Individuals most wanted to know how these student success metrics influenced the College's Strategic Plan and how they informed the resource allocation and prioritization process. Based upon these findings, the college raised the need for data integration into planning to the level of needing a QFE.

Desired Goals/Outcomes: Student Success Scorecard and Institution-Set Dashboards for Goal-Setting

OPRA has been trained in data dashboard visualization and deployment through a well-respected business intelligence software company, Tableau. For this action project, the goal includes three broad areas:

- **Reflection and Assessment of Program Standards:** OPRA will create a first-pass for calculating program-level institution-set standards for review and input from division deans and department chairs using the calculation adopted for institution-wide set-standards. Feedback will be gathered and incorporated into program review.
- **Tool Creation:** OPRA will create innovative data visualizations that can profile cohorts of students across a broad array of indicators on the Scorecard and institution-set standards. The dashboards will allow for drill-down capabilities by department or program so that faculty and key stakeholders can understand the relative impact that their department or program will have on the eventual goals for the student success metrics outcomes. The project will begin with a developed or piloted data dashboard that will illustrate how Scorecard metrics and institution-set standards can be viewed at a department or program level that is relevant to the viewer.
- **External and Internal Support and Feedback:** In addition to soliciting feedback from shared governance groups on campus (including management, Consultation Council, the Classified and Academic Senates, and the Associated Student Government), the College will seek out consulting resources to ensure that dashboard utilization is integrated with the current culture of decision-making at the College.
- **Professional Development:** Professional development will be provided for faculty, administrators, and staff so that these dashboards can be utilized effectively with OPRA to support planning, decision-making, and to continually improve outcomes.
- **Date-Informed Planning:** Management, faculty, and staff will be encouraged and supported to use the dashboards and to reference them in relationship to their activities that support a goal or objective of the Strategic Plan, or any other plans utilized on campus (such as the Distance Education Plan or the Technology Plan).

Timeline and Plan for Action Project One

Action Steps	Implementation Date	Completion Date	Responsible Parties	Resources	Assessment
Distribute a first-pass approach to creating program-level standards for review among deans and department chairs.	October 2016	January 2017	OPRA, EPA, Deans, Department Chairs	TracDat, SIS	Feedback on standards from division deans and department chairs
Integrate program-	February 2017	August	OPRA, EPA,	TracDat,	Proof of

Action Steps	Implementation Date	Completion Date	Responsible Parties	Resources	Assessment
level standards into program review template/process		2017	Deans, Department Chairs	Survey data, SIS	integrated program-level standards in program reviews
Hire a consultant for vetting the design and content of dashboards to promote meaningful goal-setting.	February 2017	December 2017	OPRA, consultant	Tableau consultant, potential IEPI leadership funding, consultants	Completion of feedback from focus groups and selection of content
Create a professional development plan to train faculty, staff and administrators on the use of dashboards for goal-setting.	April 2017	April 2017	OPRA, consultant, OHR	OHR, consultant, feedback from shared governance groups	Completion of professional development templates
Collect feedback on pilot rollout of using the success metrics' dashboards to set goals.	December 2017	January 2018	OPRA, consultant	OPRA, consultant, planning committees	Feedback report from consultant on utilization of dashboards for setting meaningful goals
Connect strategic planning goals or objectives to IEPI goals and institution-set standards.	January 2018	March 2018	OPRA, Planning and Budget Steering Committee (PBSC)	Participation from PBSC	Document dialogue connections between the College Strategic Plan, Scorecard metrics, and institution set-standards
Integrate student success metric into Strategic Plan activities.	April 2018	October 2018	PBSC	Coordination of PBSC team members	Success metrics integrated into College Strategic Plan action steps
Confirm approval of integrated metrics.	November 2018	November 2018	Consultation Council, president	Consultation Council and president	Success metrics integrated into

Action Steps	Implementation Date	Completion Date	Responsible Parties	Resources	Assessment
				approval	College Strategic Plan
Reflect on existing success metrics from dashboards and dialogue about process for setting new goals.	December 2018	March 2019	OPRA, division deans, department chairs, management	Consultant	Discussion and ideas for setting new goals at the College using dashboards and dialogue; design and structure are discussed
Create a process and standard for setting new goals and new standards each year.	March 2019	May 2019	Division deans, OPRA	Participation from PBSC, College constituent groups	New goal creation in a standard template that aligns with strategic planning process
Add student success metrics into resource allocation process.	June 2019	July 2019	PBSC, Consultation Council, College Resource Committee, president	TracDat system for resource allocation process	Success metrics integrated into resource allocation prioritization process

Action Project Two: Online Education

Introduction: Online Education

Given the recent initiatives connected to online education (referred to as distance education (DE) in the Accreditation Standards) at the state level, increased attention to learning management systems (LMSs) and support services, and changes in Accreditation Standards relating to online education, online education has become a major area for Collegewide reassessment and reconsideration. Moreover, the changes in enrollment patterns at the College, including the growth in online education and the constraints on physical classroom space, have created a need to rethink current practices at the College.

Leaders at the College have long recognized the importance of online education to the mission of the College, especially in terms of providing increased access and support to students. However, the growth of online education at the state level through well-funded initiatives, such as the Online Education Initiative (OEI), combined with College-level events, such as the evaluation of

the LMS, has brought renewed attention to online education as an essential element in need of analysis and assessment. This action project examines the current state of online education at the College and provides a roadmap for addressing three major areas: professional development, student support, and institutional practices.

Identification of the Problem and Action Project: A Need for Systematicity

The institution does not currently have an Online Education Plan, and this is due in part to changes in leadership. In 2011, the Division of Online Education and Learning Resources (OELR) was formed as a breakaway from an existing division; therefore, a new dean was introduced to lead this new division. Subsequently, this dean retired in spring 2015, and an interim dean was hired; a permanent dean was selected in August 2016. Therefore, within the last five years, there have been at least three administrators assigned to online education. Furthermore, the faculty coordinator for online education (appointed by the Academic Senate) has changed at least three times in the past five years; this led to two years of inactivity for the related Online Education Committee. As a result of this turnover in leadership, an Online Education Plan has not been developed, but there is a strong recognition among all stakeholders of the need for one. Development of the Online Education Plan would be a critical step toward reaching several objectives outlined in the Accreditation Standards.

The Online Education Plan would also address the need for a more systematic and Collegewide approach to online education that includes professional development, student support, and institutional practices. The College recognizes the need for more systematic approaches in all three areas. Currently, there are approaches that work individually in all of these areas, but they are not always systematically applied across the College. This has to do, in part, with the fact that the current model has grown organically with online education at the College. Despite the many positive elements of the current model, there are potential areas of improvement in terms of consistency with standards and messaging across the College. There is some concern that the decentralized nature of decision-making may diminish the College's ability to implement standards effectively as online education continues to grow.

The action project is part of the more general goal to help the College realize its vision and ensure student success. This project broadly addresses the need for improving:

- Student success, including improved retention, completion, and persistence.
- Professional development for faculty, staff, and administrators as envisioned through the College's Strategic Plan.
- Effective use of data and metrics in decision-making processes.

Desired Goals/Outcomes

The key outcomes in this action project are folded into the broader need for an Online Education Plan at the College. Therefore, the outcomes are described below as part of the larger effort to develop an Online Education Plan that encompasses these three key areas:

- **Outcome #1: Systematize Professional Development for Online Education**

- Standardize and implement a training and professional development program for faculty.
- Coordinate professional development for the staff members who support those faculty members teaching online courses.
- Standardize and increase professional development for administrators.
- Create a training program on compliance for accessibility in online courses.
- **Outcome #2: Coordinate Student Support**
 - Increase student readiness for students entering online courses.
 - Improve the communication about online education to students.
 - Improve the availability of support services for students enrolled in online courses.
- **Outcome #3: Align Institutional Practices**
 - Revisit the approval process for online courses.
 - Standardize practices to ensure consistent hiring for online teaching positions.
 - Collect and analyze data related to online classes, including SLOs, more systematically and utilize this information to make improvements in online courses and programs.
 - Systematize data gathering related services for online education, including services provided in the Faculty Center for Student Success (FCSS), the use of online tools such as the Paper Center, and other resources.

Actions Steps

A key first step is to solicit membership for a multidisciplinary work group that includes faculty, staff, students, and administrators who will outline, draft the plan, and solicit and incorporate feedback from all stakeholders. Once the membership of this work group has been confirmed, its members will develop, outline, and draft an implementation process for the Online Education Plan that will address these key areas:

1. **Systematize Professional Development for Online Education**
 - Complete an assessment of current professional development available at the College for staff, faculty, and administrators, and conduct a needs assessment.
 - Establish a plan to address needs for professional development for faculty, administrators, and staff who support online education.
 - Establish a plan to systematize training and professional development for faculty, administrators, and staff who support online education.
 - Establish a plan to systematize compliance and training for accessibility in online courses.
 - Share recommendations with stakeholders, solicit feedback, and make revisions as needed.
2. **Coordinate Student Support**
 - Complete an assessment of current support for students in terms of readiness (before entering online courses and while taking the courses).

- Establish a plan for addressing the need for additional or more effective student support, including the need for clearer communication in the Course Catalog and schedule of classes.
- Share recommendations with stakeholders, solicit feedback, and make revisions as needed.

3. Align Institutional Practices

- Complete an assessment of current practices related to online course approvals, make recommendations for changes, solicit feedback from stakeholders, and make revisions as needed.
- Systematize data-gathering related to online education support services, including the use of the FCSS.
- Implement the disaggregation of SLO data by teaching modality.
- Create an annual report on student success in online classes across the College as the basis for dialogue on continuous improvement, including increased student support, in the area of distance education.

Timeline and Plan for Action Project Two

Action Steps	Implementation Date	Completion Date	Responsible Parties	Resources	Assessment
Solicit membership for an interdisciplinary online education (OE) work group to draft the Online Education Plan.	August 2016	September 2016	Dean of OELR, faculty coordinator for online education	Invitations at constituent group meetings, email announcements, service hour credit for faculty	A complete list of work group members was shared with Accreditation Steering Committee in September 2016.
Complete an outline for the plan.	September 2016	October 2016	OE work group members, dean of OELR, faculty coordinator for online education	Work group members' expertise and feedback from the groups they represent; staff and administrative support from Division of OELR	An outline will be shared in October 2016 at the OE Committee meeting.

Action Steps	Implementation Date	Completion Date	Responsible Parties	Resources	Assessment
OE Committee reviews the outline and provides feedback.	October 2016	October 2016	Faculty coordinator for online education	Feedback from constituent groups, research from OPRA as needed	The minutes for the OE Committee will reflect approval of the outline.
Draft is completed	October 2016	December 2016	OE work group members, dean of OELR, faculty coordinator for online education	OE work group members' expertise and feedback from the groups they represent; staff and administrative support from Division of OELR	A completed draft will be shared with the Steering Committee members for feedback.
Draft is shared with OE committee	January 2017	January 2017	Faculty coordinator for online education	Feedback from constituent groups, research from OPRA as needed	The agenda for the OE Committee will reflect this item.
Draft is shared with governance groups	February 2017	March 2017	Dean of OELR, faculty coordinator for online education	Support from Academic Senate leadership, Classified Senate, Consultation Council	Minutes for meetings will reflect this item.
Additional Revisions are made	March 2017	April 2017	OE work group members, dean of OELR, faculty coordinator for online education	Feedback from constituent groups, research from OPRA as needed	Draft will reflect feedback from governance groups.

Action Steps	Implementation Date	Completion Date	Responsible Parties	Resources	Assessment
New draft is shared with OE Committee	April 2017	April 2017	Faculty coordinator for online education	Feedback from constituent groups, research from OPRA as needed	The minutes for the OE Committee will reflect approval of the draft.
New draft is shared with governance groups	April 2017	May 2017	OE work group members, dean of OELR, faculty coordinator for online education	Support from Academic Senate leadership, Classified Senate, Consultation Council	Minutes for meetings will reflect discussion, recommendation to Consultation Council.
Implementation dates/timeline are set	May 2017	May 2017	OE work group members, dean of OELR, faculty coordinator for online education	Support from Academic Senate leadership, Classified Senate, Consultation Council	A timeline will be shared with the Accreditation Steering Committee for feedback
Implementation begins for all major areas	August 2017	May 2017	OE work group members, dean of OELR, faculty coordinator for online education	Support from Academic Senate leadership, Classified Senate, Consultation Council	Additional details TBD for 2017-2018

THE ACCREDITATION SELF STUDY REPORT OF SADDLEBACK COLLEGE

Presented to the Western Association of Schools and Colleges

OVERSIGHT

2017

Introduction

Saddleback College, a public two-year community college, first opened its doors in fall 1968. What was then a small rural college with 1,536 students in 11 buildings on a few acres has grown into a large urban college on a 200-acre campus serving more than 25,000 students each semester.

As Saddleback College grew, so did its reputation for excellence, attracting teachers and administrators throughout the United States. Together they have created a dynamic, constantly evolving learning environment where students are challenged to fulfill their potential and encouraged to achieve their goals. The excellence of Saddleback College's programs and faculty can best be measured by the success of the College's alumni in their academic pursuits at four-year universities and in the professional world. The number one priority of the College is student success. From its renowned educational programs to its stellar student services, Saddleback College works tirelessly to ensure that students learn and achieve their goals, whether that be improving their English abilities, transferring to a four-year university, or retooling for a new career. To serve the diverse needs of our students, the College offers courses in a variety of formats (face-to-face, online, hybrid, full term, and short term) and at multiple locations. Innovative and experiential programs such as Study Abroad, Cooperative Work Experience, service learning, and an Honors Program are also offered. Student services are also geared to the diversity of our student population, with programs such as Extended Opportunity Programs and Services (EOPS), an International Student Office, Disabled Students Programs and Services (DSPS), the Child Development Center, and a Veterans Education and Transition Services (VETS) program.

Saddleback College is a comprehensive college, fulfilling all four missions of the community college system as outlined in AB 705, including baccalaureate quality transfer education, career and technical education, basic skills courses, and lifelong learning opportunities. The College offers over 300 associate degrees, certificates, and occupational skills awards in 190 programs. In addition, the College also offers a huge selection of student clubs and activities such as the Associated Student Government, a championship forensic team, an award-winning student newspaper, a radio station, and a television station.

In addition to being a center of learning, Saddleback College has developed into one of south Orange County's premier cultural and recreational sites. The campus hosts film festivals, music and dance concerts, and lectures by renowned newsmakers and scholars, and it is home to an award-winning theatre arts program. Its men's and women's intercollegiate athletic teams have achieved a solid reputation for success and hold more than 100 conference, state, and national titles. On-campus sports facilities include a golf driving range and putting greens, an aquatics complex, a football stadium, baseball and softball fields, gymnasium and fitness facilities, tennis courts, and an all-weather track.

Saddleback College has become an integral part of the south Orange County landscape,

linking education with community growth and vitality. After nearly five decades, Saddleback College continues to strengthen its ties with the communities it serves and to help residents fulfill their dreams and aspirations.

History of Saddleback College

The history of Saddleback College can best be understood by separating it into eight distinct periods. Each period is characterized by significant organization changes.

Period I (1967-1979)

From its founding in 1967 through 1979, Saddleback College and the District, then known as the Saddleback Community College District, operated as a single entity under a chief executive officer (CEO) who served as superintendent of the District and president of the College. At the time, south Orange County was a sparsely populated region of southern California, and the College was able to serve the needs of the community. During this period, however, College enrollment grew dramatically. In just one year, from Fall 1974 to Fall 1975, enrollments increased by 78 percent. Because of this precipitous increase, the District began to make plans for the opening of a satellite campus in the northern portion of the service area.

Period II (1979-1981)

In 1979 a satellite campus was opened in the city of Irvine, 11 miles to the north. Saddleback College was designated as the “main campus” and the satellite was designated as the “north campus.” Both operated as components of the single college, which retained the Saddleback College name. The CEO continued to serve as the superintendent-president. A dean of instruction headed the main campus and also served as assistant superintendent of the District.

Period III (1981-1983)

In 1981 the north campus was elevated from satellite to full-campus status, altering the organization structure to a multi-campus, single-college district. The superintendent’s position was changed to that of a chancellor, and presidents were appointed to serve as the CEOs at each campus. A new chancellor was appointed in 1982.

Period IV (1983-1985)

Discrete district offices were established in 1983 and were later expanded by the chancellor. The name of the main campus was changed to Saddleback College South, and a new president was appointed. The designation of the north campus was changed to Saddleback College North. During this period, certain functions were centralized under the District’s authority, while others were decentralized and became the responsibility of the campuses.

Period V (1985-1992)

In 1985 the Board of Trustees (BOT) adopted a new organizational structure and established a multi-college district. Saddleback College South emerged with its own identity as Saddleback College, while Saddleback College North was renamed Irvine Valley College (IVC). In 1986 a new chancellor was appointed and, in conjunction with the College

presidents, arranged for the further decentralization of District functions and increased decision-making authority for the Colleges.

Saddleback College enjoyed a stable organization, consistent leadership by the institution's president of nine years, and an effective system of governance. Although Saddleback College shared the financial concerns of all other California community colleges at the time, as well as the normal tensions inherent in any multi-college district, this period of stability permitted the College to focus its attention upon educational and institutional development.

Period VI (1992-2004)

The period between 1992 and the 2004 accreditation self-evaluation was marked by considerable administrative instability at both the College and the District. During this time frame, there were six changes in the presidency, four changes in the chancellor's position, and multiple changes in various other management positions at the College, such as the vice president for instruction and the vice president for student services.

In 1996 the BOT initiated a review of the District name, and in April 1997 the Board approved a name change from the Saddleback Community College District to the South Orange County Community College District (SOCCCD) in order to reflect the larger geographic base of the District.

The BOT also made sweeping adjustments in the administrative structures at both Saddleback College and IVC in July 1997. This resulted in the transfer of five Saddleback College deans to IVC and the expansion of duties for the four deans who remained at Saddleback, with each dean in charge of very large "mega-divisions." When it became evident that the reduction in the number of deans at the College was too severe, a number of additional organizational changes were initiated. With input from all segments of shared governance, the College recommended, and the BOT agreed, to realign responsibilities and expand the number of deans.

Such intense and profound change had a strong impact on all levels of the organization. It served as a litmus test of the true mettle of Saddleback College's administration, faculty, and staff, and the institution continued to strive toward excellence in its mission.

Period VII (2004-2010)

Between 2004 and 2010, the administrative structure was considerably more stable than in previous periods. The 2004-2005 academic year was the first in more than a decade in which there were no freshmen deans. There was a change in presidency due to the retirement of the previous president, who was an employee of the College for over 30 years and served as president for the last four of those years. The current president was hired in 2008. The previous chancellor resigned in 2010 and was replaced by the deputy chancellor, who had been an employee of the district for xx years. The vice president for student services retreated to the faculty of IVC in April 2010 and the vice president for instruction was hired as the president of Fullerton College. This opened up a new era of change at both the District and the College.

Period VIII (2010 to the present)

The period since the last accreditation self-evaluation has once again been marked by significant change. Adjustments to the administrative structure included the addition of a third vice president in xxxx – the vice president for administrative services – and an assistant vice president for institutional effectiveness in 2016. There has been considerable turnover at all levels of District and College administration. Only three of the current deans were hired into their positions prior to 2010. The current vice president for student services was hired in 2010 and the current vice president for instruction was hired in 2013. These changes have accelerated throughout the period, culminating in the resignation of the chancellor in fall 2016 and the resignation of the president at the end of spring 2017. Therefore, both the District and College will have a new CEO in 2017.

Description of Service Area

Community

Saddleback College, located in the city of Mission Viejo, is the older of two separately accredited colleges in the South Orange County Community College District (SOCCCD), which also includes Irvine Valley College (IVC), in the city of Irvine, as well as the new Advanced Technology & Education Park (ATEP), located in the city of Tustin. Overall, the College's major service area, sister campus, and district facilities are situated in a desirable location in close proximity to stunning coast lines, quality K-12 school districts, major freeways, booming businesses, and growing metropolitan areas.

Figure X. Map showing the location of Saddleback College, its sister campuses, and the surrounding communities. Source; Office of Planning, Research and Accreditation 2016.

When it was founded in 1967, Saddleback's neighboring areas were sparsely populated bedroom communities. Despite the Great Recession and collapse of the housing market in 2008 that was followed by a state budget crisis in 2009, the local area has continued to grow slowly through a gradually renewed economy. Recent development and reinvestment of single-family, multi-family, and commercial real estate properties continue to draw new residents and businesses alike. As recently as last year, the growth in single- and multi-family housing and retail centers has brought a fresh change after a five-year period of largely stagnant housing starts and retail development.

Community Demographics

The service area includes the cities and communities of Aliso Viejo, Capistrano Beach, Dana Point, El Toro, Ladera Ranch, Laguna Beach, Laguna Hills, Laguna Niguel, Laguna Woods, Lake Forest, Mission Viejo, Rancho Santa Margarita, San Clemente, San Juan Capistrano, and Trabuco Canyon. These cities and unincorporated areas cover 124.3 square miles of South Orange County (CSU Fullerton, 2014 Orange County Progress Report).

Saddleback's service area is home to over 600,000 total residents (EMSI 2015 Q3) of whom approximately 500,000 are 15 years or older (2010-2014 American Community Survey 5-Year Estimates; EMSI 2015 Q3). The adult-aged population in Saddleback College's service area is projected to grow about 3.6% by the year 2020 and is therefore expected to grow by 0.6% annually over the next four years (2011-2021 Saddleback College Education Masterplan).

As of 2014, 47.9% of residents were male and 52.1% female (2010-2014 American Community Survey 5-Year Estimates). In addition, the ethnic diversity of this service area is as follows (EMSI 2015 Q3):

0.19%	Native Hawaiian/Pacific Islander
0.17%	American Indian/Alaskan Native
1.29%	Black/African American
0.6%	Other
10.3%	Asian
10.35%	Hispanic (Alone or with another Race)
67.92%	White, Non-Hispanic

The service area is experiencing growth in ethnic diversity. The Hispanic/Latino ethnic group has increased 7% over the last five years (EMSI 2015 Q3 comparison data) while Asian residents have increased by 11% and Black/African American residents have increased by 10%.

The age profile of local residents continues to be a matter of concern in the service area. There has been a decline in the school age population (5-19 years old) in the last five years. This is a potential problem for education providers like Saddleback College as it relates to a shortage in future supply of students. Currently the young adult population (20-34 years old) has increased in the last five years, but the pace of growth is slow. In the short-term, the

college might benefit from the slowly growing young adult population. In the long term, the shrinking elementary and high school population will pose a problem for the College, in terms of total enrollments (Southern California Association of Governments). Further, an influx of adults over 60 years old is anticipated, as the Baby Boomer generation is expected to move to places like south Orange County for retirement living. The college's Emeritus program, which provides free education for older adults in order to promote life-long learning, is an example of the ways in which the College continues to meet the needs of the changing local environment and highlights one of the ways that it is preparing for the future.

Economically, the area has changed in the following ways in the past five years:

- The south Orange County population has experienced 2% growth
- Transportation infrastructure has not met the needs for a growing population
- The regional job market has had a 10.3% increase
- Unemployment rates have decreased
- Housing prices have continued to escalate, while affordable housing is shrinking
- Students living with parents for more affordable housing has increased
- Growth in the aging population has continued
- Need for workforce training to support middle and high-end jobs has increased

Education attainment levels in the service area continue to be very high. Completion of high school in the service area is very strong, with 94.7% of the population having a high school degree or more. In terms of post-secondary education, on average, the service area has a population where 31.1% of adults 25 or older have a bachelor's degree and another 18.4% have a graduate degrees-- so that almost half of the population has a bachelor's degree or higher (2010-2014 American Community Survey 5-Year Estimates). These rates stem from strong high school graduation rates for the two major feeder high school districts for the college (refer to chart X below).

Source. California Longitudinal Pupil Achievement Data System (CALPADS)

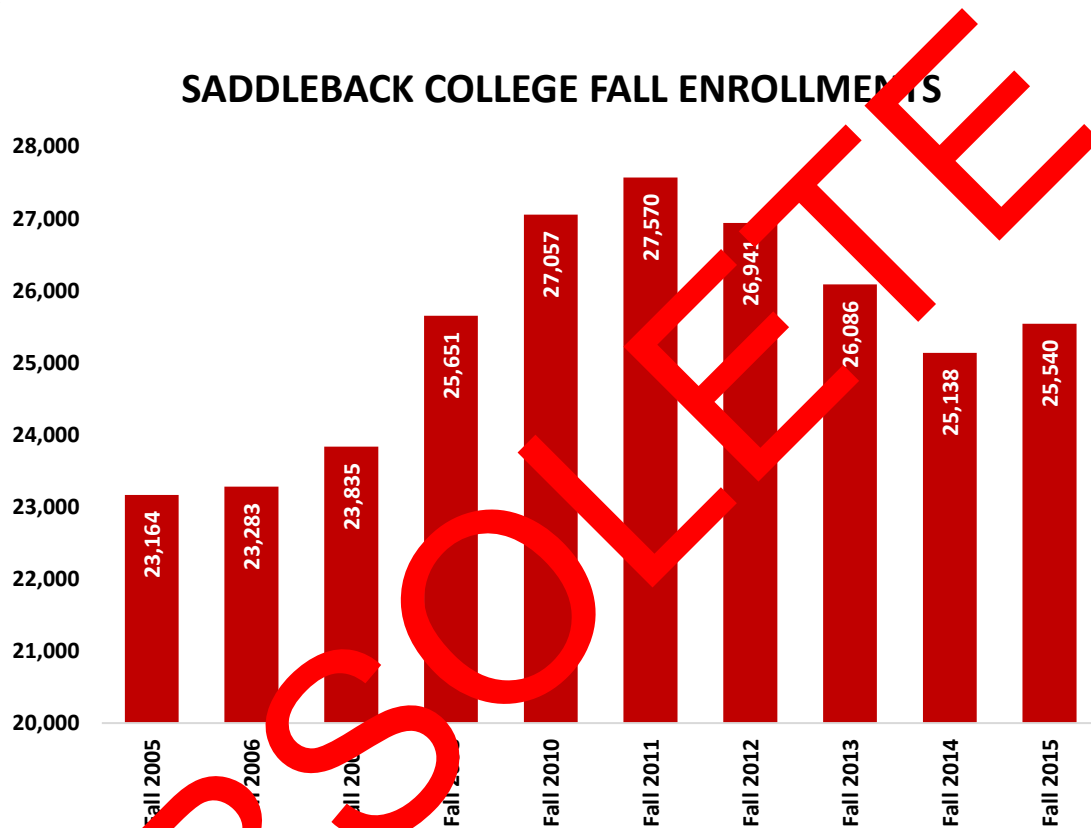

During the recent economic recovery, employment rates for workers with a high school diploma have not fared as well as employment rates for those with a bachelor's degree or higher. To better serve this need, the college has offered a variety of educational opportunities to promote economic and workforce development for those seeking high school completion. Adult education programs serve the region by collaborating with the Saddleback Valley Unified School District and the Capistrano Unified School district to provide adult education course in the areas of AESL (Adult Education English as a second language), citizenship, basic skills and high school equivalency, career technical education, and pre-apprenticeship programs. Students may also gain educational credit through the Cooperative Work Experience/Work Based Learning (CWE) program where students can obtain a variety of work-related experiences for their educational pursuits. The program promotes collaboration and dialogue between Saddleback College and the employer or supervisor of the student. In the future, initiatives statewide such as the Strong Workforce initiative will further promote skills-building opportunities through Career and Technical Education (CTE) pathways and programs.

For students seeking to transfer to a 4-year institution, the College has two major public institutions for students: University of California, Irvine, and California State University, Fullerton. However, since 2008, increased student fees, increased tuition, escalating housing costs, and growth in the number of impacted academic programs in public 4-year institutions have created a damper on the volume and rate of students transferring to these institutions (refer to chart below). The College's transfer center has responded by continuing to promote transfer-outs through referring students to a greater diversity of colleges beyond the two local public 4-year institutions. In doing so, Saddleback College has experienced significant growth in the volume of transfers to private and out-of-state institutions. In fact, transfers to private and in-state institutions have increased in-fold since the year 2000. Such findings are a sign that Saddleback College is responding to external forces that may impair 4-year transfers in the local post-secondary education market.

Enrollment Trends and Description of Student Population

Student enrollment increased dramatically during the first 20 years of the College's existence. During the second 20 years, the enrollments remained fairly constant; with numbers fluctuating between 22,000 and 24,000 students each fall and hallmarked by one significant dip to just over 19,000 fall enrolled students in 1995. Following the Great Recession, there has been a noticeable increase in students, as fall enrollments climbed to over 25,000 in 2008. Following a dramatic peak of enrollments in 2011, the college has experienced some enrollment decline.

Source: Institutional Effectiveness Annual Report (IEAR) inFORM Data warehouse

Students are drawn to Saddleback College from throughout the District's service area. The chart below shows the cities in which Saddleback's student population resided during the 2015-2016 academic year. As indicated by the chart, 88.5 percent of all students come from within the district.

WHERE SADDLEBACK COLLEGE STUDENTS RESIDE

Source: FORM Data warehouse

The ethnic composition of the student population closely represents the surrounding community. In fact, the College's Student Equity Plan (In-5) illustrated that there are no access issues in terms of disproportionate impact to historically underrepresented ethnic groups. Over the last five years, the College has seen a shifting demographic that illustrates a decrease in the proportions of White Non-Hispanic students and increased quantities of students from mixed, Hispanic/Latino, and Asian ethnicities.

Source. Institutional Effectiveness Annual Report (IEAR) inFORM Data warehouse

The portion of males to females has not changed dramatically in the last five years. Females continue to outnumber males by about seventeen percent.

Source. Institutional Effectiveness Annual Report (IEAR) inFORM Data warehouse

The College has seen modest increases in the number of students who are older than 59 years old in the last five years. Concomitantly, proportions of students from the 18-21 age group have been slightly decreasing. Such findings are in line with larger economic trends as discussed previously, where demographic projections indicate lower numbers of high school aged students and thus lower numbers attending Saddleback College. Similarly to economic reports, the College has seen a very modest uptick in the young adult population aged 22-29.

Source. Institutional Effectiveness Annual Report (IEAR) inFORM Data warehouse

Student educational goals reflect the diversity of programs offered at Saddleback College. Students enroll at the College in order to transfer to four-year colleges and universities (the largest percentage), to attain a degree or certificate without transfer, for career technical education, for career advancement, to improve their basic skills, or for personal development, with a fair number of students who have declared “undecided” as their educational goal. Such findings point to the need to understand the transient nature of educational goal-setting among the population of millennials, generation Y students and generation X students.

Educational Goal	FA 2010	FA 2011	FA 2012	FA 2013	FA 2014	FA 2015
Transfer	12,908	12,971	13,152	13,286	12,908	13,119

Total	27,057	27,570	26,941	26,086	25,138	25,540

Saddleback Institutional Effectiveness Annual Report (IEAR) inFORM Data warehouse

Employee Demographics

The college has seen gradual growth in employees over the past six years. The main contributions to this growth come from higher numbers of full- and part- time faculty. The largest category of employees is part-time faculty, followed by classified staff, full-time faculty, and then administrators and managers.

SADDLEBACK COLLEGE EMPLOYEES BY ROLE

Employee Role	FA 2010	FA 2011	FA 2012	FA 2013	FA 2014	FA 2015
Educational Administrator	14	16	19	21	20	20
Full-time Faculty	225	208	229	232	238	249
Part-time Faculty	554	632	607	591	604	640
Classified Staff	311	314	302	297	314	300
Saddleback Total	1,107	1,170	1,157	1,141	1,176	1,209

Source: California Community College Chancellor's Office (CCCCO) DataMart

Gender diversity of the employees at the college has not improved. In fact, the college continues to increasingly have more females than males. Given the regulation within the SOCCCD that an Equal Employment Opportunity representative is at every hiring committee [fact check this], the increase in females is unexpected. While there has been a steady split between male and female academic administrators over the past six years, the college is hiring more female full- and part-time faculty. In contrast, the college is seeing a gradual decrease in the number of female classified staff members concurrent with a steady state of classified male staff members.

SADDLEBACK COLLEGE EMPLOYEE DIVERSITY BY GENDER

Source: California Community College Chancellor's Office (CCCCO) DataMart

In terms of employee diversity, with respect to ethnicity, there are a number of positive changes that have taken place. First, the increase in Hispanic/Latino academic administrators has made this employee group more reflective of the local population. Classified staff also has become increasingly diverse. Among faculty, however, more diversity is needed. Overall, Asian employees are underrepresented in comparison to the local population. Because of the SOCCCD's hiring practices (put EEO stuff here) these ethnic diversity findings are an artifact- can we say something like this? I think it's fair.

Source. California Community College Chancellor's Office (CCCCO) DataMart
Note Percentages are calculated by role.

With respect to age group of various employees, there have been modest variations in the past six years. The demography shows a shifting age profile: whereas the largest share of administrators was the 55-59 age group, the largest group is now 60-64. Interestingly, the college has also brought on a wide array of younger administrators across a broad spectrum of age groups. Among full- and part- time faculty, age distributions have stayed the same. For classified staff a shift in lower numbers of those aged 18-34 has been offset by a higher number of those aged 50-54.

Presentation of Student Achievement Data and Institution-Set Standards

Student Achievement Data

Sharing of Student Achievement Data

As reflected in Standard I.B.3, the college widely and publically publishes achievement outcomes on important indicators of student success. The college's Office of Planning, Research and Accreditation (OPRA) widely presents ([In 1-1](#)) achievement outcomes on Saddleback College's performance on the CCCO Scorecard for the following constituent groups:

- Consultation Council ([In 1-2](#))
- Planning and Budget Steering Committee ([In 1-3](#))
- South Orange County Community College District Board of Trustees ([In 1-4](#))

The college's Office of Planning, Research, and Accreditation (OPRA) also maintains a website that hosts a compendium of publicly available analytical reports on achievement outcomes on the "College Data and Reports" microsite of the research website ([In 1-5](#)). These reports are not only maintained publically, but updated annually. These reports are externally available to encourage anyone at the college to use the information for both short- and long-term planning. Because data is disaggregated the longitudinal cohort studies, the findings are also used to inform the Student Equity Plan ([In 1-6](#)).

The college also widely shares and discusses information pertaining to student achievement data on the ACCJC annual report. The college's OPRA then presents the ACCJC Annual Report data and encourages discussion among the following constituent groups:

- Academic Senate ([In 1-7](#); [In 1-8](#))
- Consultation Council ([In 1-9](#))
- Planning and Budget Steering Committee ([In 1-10](#))

Analyses of Student Achievement Data

The publically available analytical reports that OPRA provides are categorized by cohort longitudinal studies (Scorecard) versus point-in-time analyses (DataMart, SIS). Both types of analytic reports are used to determine the degree to which the college continues to serve its mission. Cohort studies assesses longitudinal outcomes of students starting a degree, certificate or transfer-directed field of study and their outcomes as they pertain to four key outcomes: student progress and achievement defined as six-year completion rates ([In 1-11](#)); persistence rates defined as enrollment in three consecutive primary terms ([In 1-12](#)); 30 units rate defined as 6-year completion rates of 30 units ([In 1-13](#)); remedial completion rate defined as 6-year completion rate of remedial to college level courses ([In 1-14](#)). Point-in-time studies on the OPRA website highlight other key performance indicators such as successful course completion and course retention ([In 1-15](#)). Volume/Output studies assess trends in volume of degrees and certificates ([In 1-16](#)), and volume of transfers ([In 1-17](#)). The college also assesses the extent to which it serves its mission through demographic analyses ([In 1-18](#)) as well as through Student Equity Plan research ([In 1-19](#)).

Presentation and Definition of Achievement Data

This section will first describe the institutional process of reviewing and integrating student achievement outcomes, institution-set standards, and goals at the college. The section will conclude with a data table containing the college's definitions of the pertinent student achievement outcomes, the institution-set standards for these outcomes, goals, and recent performance in these areas.

Student Progress and Achievement Rate (SPAR)

Saddleback College addresses student achievement through accomplishment of its mission and district-wide objectives as stated in its strategic plan. Strategic objective 2.1 of the plan is to, "Increase student completion rates (degrees, certificates, and transfers) while preserving access, enhancing quality, and closing achievement gaps. The college and district participate in identifying stretch goals (called targets at the college) for SPAR (also known as 6-year completion rates) as part of its Districtwide Planning Council Annual Retreat ([In 1-20](#)). SPAR is further defined in the data table in the following section. As part of its strategic plan, Saddleback College aims to increase the SPAR by 2.5% by the year 2020. The strategic objective is outlined such that the college gradually increases this rate each year to hit the target by 2020. For 2014-2015, the college's goal was to hit a 58.1% SPAR and it exceeded its goal by getting a rate of 59%. Further data on SPAR is presented in the data table in the following section. The institution has not yet adopted institution-set standards for the SPAR rate (refer to college institution-set standard data table below) but plans to do so through participation in activities identified the QFE.

Transfers

The college assesses total transfer volume through broad-based dialogue and public presentations about trends on transfers ([In 1-21](#)). While the college has historically presented these institution-wide transfer trends, it has recently added more educational components related to transfer trends and the external factors surrounding transferability. As illustrated in the previous section of this document, transfer volume is on the rise, with the most recent report showing that the college transferred 3,933 students in 2014 vs. 2,236 in 2003. In the future, the college will create stretch goals for transfer numbers and integrate these into college planning activities, such as the strategic plan. The college also participated in an annual review of institution-set standards of transfers. The process of reviewing data on institution-set standards (ISS) for the volume of transfers revealed that the purpose and rationale of the ISS were misunderstood by previous leadership in the research department. This misunderstanding led to a calculation error, where instead of creating a baseline of achievement on transfer volume for the college, the calculation yielded the equivalent of stretch goals for the institution-set standard. Once this error and misunderstanding of the ISS was determined by new leadership in the research office, efforts were made to share the discovery as well as recommended changes with shared governance groups ([In 1-22](#)). The college has now adopted a new institution-set standard for transfers and has exceeded its set-standards by 4.32% (refer to Table X below). The college has been focused on diversifying transfer school options for students and is seeing dramatic growth outside of California (refer to chart below), thus, it is not surprising that the college has exceeded its recently adopted institution-set standards for transfer volume.

**SADDLEBACK COLLEGE IN-STATE VS.
OUT-OF-STATE
TRANSFERS TO A 4-YEAR INSTITUTION**

Degrees and Certificates

Trends in the volume of degrees and certificates are examined as part of the institution's program review process ([link use Diane's program review example 1.Bx](#)). Award data are examined for year-over-year trends and faculty are expected to reflect upon these trends as they relate to resource allocation requests and needs assessments. The college also conducts multi-year assessments of degree and certificate output ([ln 1-16](#)). These research reports are publically available on the college's OPRA website. From 2006/2007 through 2009/2010 the total number of awards increased by 114%; from 1,274 up to 2,732. Since that period, the college continues to have steady increases in its transfer volume.

In the future, award data will be used for the college's new Program Vitality Process, which will integrate with the college's educational master planning process. The college has conducted broad-based discussion of award data and trends through reviewing institution-set standards. The goals and institution-set standards are further articulated, along with the definition of this achievement outcome, in the table in the following section. The process of reviewing the data on institution-set standards (QFE) for award data indicated that the purpose and rationale of the ISS were misunderstood by previous leadership in the research department. This issue is further addressed in the QFE. In addition, through the QFE, the college will integrate the ISS for degrees and certificates into the college strategic plan.

Successful Course Completion

Successful course completion is examined as part of the institution's program review process ([link use Diane's program review example](#)). Course completion is examined for five-year trends and faculty are expected to reflect upon these rates as they relate to resource allocation requests and needs assessments. The college is currently a process of gathering information about creating appropriate institution-set standards for successful course completion within program review and planning ([link to EPA survey of program level institution-set standards?](#)). The college conducted broad-based discussion of course completion rates for the institution at large through its process of setting 1-year and 6-year goals ([In 1-23](#)). The goals and institution-set standards are further articulated, along with the definition of the achievement outcome, in the table in the section following. The college also participates in review of institution-set standards for course completion. The process of reviewing the data on institution-set standards (ISS) for successful course completion indicated that the purpose and rationale of the ISS were misunderstood by previous leadership in the research department. This is further addressed in the QFE.

The college's course completion rates in credit-bearing courses has been fairly flat over the past five years. Using the newly revised definitions of the college's institution-set standards, the college is 1.75% above the standard. Since identifying the change to the ISS, the college discussed in its strategic planning meetings through PBSC, that it needs to conduct further research on the top 5 areas with the highest volume of enrollments and the lowest completion rates. In addition, the Education Planning and Assessment team is working on a fine-tuned program-level analyses for institution-set standards on course completion. From this point, the college will need to gain support for activities to move the needle on successful course completion. The college is expected to better integrate this ISS into the strategic plan and program planning through the activities articulated in the QFE.

Job Placement Rates for CTE Programs

The college participates in an annual review of performance on job placement rates using institution set standards through reviewing KPI's related to strategic planning Goal 2, which is to, "Advance economic and workforce development through regional partnerships with educational institutions and industry and by strengthening career technical education." At the college, job-placement rates are identified through the Perkins Core Indicator report, with the exception of Nursing CTE programs. Job placement rates for the Nursing were identified through the California Board of Registered Nursing 2014-2015 Annual School Report ([In 1-24](#)). Program specific faculty content experts reviewed the job placement rates and had input into the job placement rates that were accepted as program-level ISS.

The college and district created a KPI that is a “stretch goal” for the college’s job placement rate. The stretch goal is calculated off of the percentage of CTE programs with more than 10 completers who were above the institution-set standard for job placement rates. As part of its annual strategic planning review process, Saddleback found that in 8 out of 9 programs (89%) that job placement rates were above the institution -set standard. At the college, institution-set standards for job-placement rates are identified through the Perkins core indicator report and the process is faculty-driven.

In terms of data on job placement institution-set standards, discussion, training and analysis have been done by various members of the college. For example, several administrators attended the CCCAOE conference to learn about job placement data and get trained on LaunchBoard. The College is now assessing new tools such as EMSI and LaunchBoard for program review and revitalization and has put more focus on completion rates and job placements. Please refer to (In 1-25) for the most recent analysis of all CTE programs.

Licensure Passage Rates

The college also participates in an annual review of programs for which an examination for licensure is required. For the institution-set standards (ISS) regarding licensure exam pass rates and job placement rates, faculty content experts set the ISS based on dialogue within their programs. Typically for ISS in the Health Sciences and Human Services (HSHS) Division related to licensure exam pass rates, ISS were set either at or above state and national averages. These pass rates have been described in program review for years, but were first identified as formal program level institution set standards in 2015. For example, Nursing utilized National Council for State Board of Nursing (NCSBN) licensure pass rates in 2014 for state (84%) and national (82%) level benchmarks. The Nursing program ISS was set at 90%, this 90% ISS has been a program benchmark for over a decade. (California Board of Registered Nursing 2014-2015 Annual School Report) National Council for State Boards of Nursing (NCSBN. Like Nursing, the Paramedic and Emergency Medical Technician programs used their accrediting or licensing agencies’ state and national data to set ISS for license pass rates and employment (In 1-26 Link to CoAE MSD).

College-wide Institution-set Standards

Achievement data are presented in the data tables below per the recommended reporting format of ACCJC. The first table outlines the institution-set standards for the institution overall. The second table identifies the institution-set standards for programs requiring an examination for licensure. The last table illustrates the institution-set standards for job placement for CTE programs with over 10 completers.

SADDLEBACK COLLEGEWIDE INSTITUTION-SET STANDARDS

Data Element	Definition of the measure	Institution Set Standard*	Stretch Goal	Most Recent Year's Performance	Previous Year Performance	Three-year average
Student Progress and Achievement Rate	Percentage of degree, certificate and/or transfer-seeking students starting first time in 2009-10 tracked for six years through 2014-15 who completed a degree, certificate or transfer-related outcomes	N/A	59.0%	58.1%	57.8%	59.7%
Course Completion Rate*	Applies to all students: Successful course completion, grade C or better if graded, over the number of students enrolled when the enrollment period ends*	71.6%	74.3%	72.92%	71.6%	71.6%
Completion of degrees and certificates combined	Unduplicated headcount of students who obtained a degree or a certificate	2,344	N/A	2,582	2,210	2,310
Completion of degrees	Unduplicated headcount of degrees (AA, AS, AST)	1,166	N/A	1,259	1,103	1,151
Completion of certificates	Unduplicated headcount of certificates of achievement, ASAs and Transfer Certificates	2,144	N/A	2,382	2,012	2,111
Transfers	Annual number of transfers to a 4-year institution	3,753	N/A	3,915	3,625	3,728

**Note. Based upon the new institution-set standards created after the 2016 ACCJC Annual Report.*

In its most recent year, college sit above all of the institution-set standards is has created.

SADDLEBACK LICENSURE PROGRAM INSTITUTION-SET STANDARDS

Data Element	Definition of the measure	Institution Set Standard	Stretch Goal	Most Recent Year's Performance	Previous Year Performance	Three-year average
Licensure Exam Passage rate- Nursing	The number of student who passed the licensure examination over all who took the examination.	90%	N/A	94%	96%	95%
Licensure Exam Passage rate- Paramedic	The number of student who passed the licensure examination over all who took the examination.	90%	N/A	99%	95%	90%
Licensure Exam Passage rate- EMT	The number of student who passed the licensure examination over all who took the examination.	60%	N/A	75%	75%	77%
Licensure Exam Passage rate- Cosmetology	The number of student who passed the licensure examination over all who took the examination.	75%	N/A	76%	80%	76%
Licensure Exam Passage rate- Medical Lab Technology	The number of student who passed the licensure examination over all who took the examination.	90%	N/A	100%	N/A	N/A
Licensure Exam Passage rate- Phlebotomy	The number of student who passed the licensure examination over all who took the examination.	76%	N/A	93%	91%	93%

SADDLEBACK LICENSURE PROGRAM INSTITUTION-SET STANDARDS

Data Element	Definition of the measure	Institution Set Standard	Stretch Goal	Most Recent Year's Performance	Previous Year Performance	Three-year average
Job Placement Rate* - Administrative Medical Assistant	The number of students who are employed in the year following completion of a certificate program.	60%	N/A	68%	62%	N/A
Job Placement Rate* - Alcohol and Drug Studies	The number of students who are employed in the year following completion of a certificate program.	60%	N/A	67%	63%	N/A
Job Placement Rate* - Cinema	The number of students who are employed in the year following completion of a certificate program.	50%	N/A	50%	25%	N/A
Job Placement Rate* - Clinical Medical Assistant	The number of students who are employed in the year following completion of a certificate program.	60%	N/A	77%	63%	N/A
Job Placement Rate* - Cosmetology	The number of students who are employed in the year following completion of a certificate program.	55%	N/A	67%	56%	N/A
Job Placement Rate* - Early Childhood Teacher	The number of students who are employed in the year following completion of a certificate program.	60%	N/A	64%	68%	N/A
Job Placement Rate* - Horticulture	The number of students who are employed in the year following completion of a certificate program.	60%	N/A	42%	61%	N/A
Job Placement Rate* - Paramedic	The number of students who are employed in the year following completion of a certificate program.	70%	N/A	100%	72%	N/A
Job Placement Rate* - Registered Nurse	The number of students who are employed in the year following completion of a certificate program.	80%	N/A	82%	62%	N/A

*Set-standards were based upon the Perkins Core indicator reports for placement; the college did not complete these data for a period of three years, thus a 3-year average is not applicable

Organization of the Self-Evaluation Process

Saddleback College began preparing for the accreditation self-evaluation in xxx, xxx months prior to our scheduled visit in February 2017. Dr. Juan Avalos, vice president for student services, was the Accreditation Liaison Officer (ALO). The Accreditation Steering Committee was co-chaired by Dr. Avalos, Dr. Bob Cosgrove, as representative of the Academic Senate, and xxx, as representative of the Classified Senate/CSEA.

The Committee has met every two weeks since xx, actively overseeing the entire self-evaluation process. Standard chairs were appointed, and committees for each standard were constituted in xxxx, following an in-service presentation on the process for the entire College community.

Throughout the entire process, measures were taken to ensure that the voices of all constituent groups were heard and that the entire College community was focused on accreditation. Below is a time line of the self-evaluation process, followed by the composition of the Accreditation Steering Committee and each of the Standard Committees.

Organizational Information

Saddleback College, as part of the SOCCCD, is governed by the SOCCCD Board of Trustees (BOT). The BOT comprises seven members elected at-large to four-year terms by the voters of south Orange County. A student trustee, elected by the students of both Saddleback College and Irvine Valley College, serves a one-year advisory term of office. The BOT is responsible for overseeing all academic programs and educational services of Saddleback College

SOCCCD Board of Trustees (as of November 8, 2016):

Timothy Jemal, President

James R. Wright, Vice President

David B. Lang, Clerk

T.J. Prendergast III, Member

Marcia Milchiker, Member

Barbara A. Jay, Member

Terrell Whitt, Member

Johnathan Forde, Student Member

Organizational Charts

Districtwide Function Map (can speak to it here in narrative form, but place it in Appendix B)

OBSOLETE

Certification of Continued Institutional Compliance with Eligibility Requirements

1. Authority

The institution is authorized or licensed to operate as a post-secondary educational institution and to award degrees by an appropriate governmental organization or agency as required by each of the jurisdictions or regions in which it operates.

Saddleback College operates as a public, two year community college and awards degrees under Ed Code Sect 70900-10901 (ER 1-1) by the authority of the Board of Governors of the California Community Colleges. Locally governed by an elected Board of Trustees, the College is authorized to operate (ER 1-2) as a post-secondary educational institution and to award degrees based on continuous accreditation by the Accrediting Commission for Community and Junior Colleges (ACCJC) of the Western Association of Schools and Colleges (WASC).

2. Operational Status

The institution is operational, with students actively pursuing its degree programs.

Saddleback College (SC) has operated continuously since it was established in 1967. Student enrollment declined from 27,057 students in fall 2010 to 25,158 in fall 2014 as a result of the Great Recession in late 2008 (link to ER data provided by team, this data was not in standard II). In 2015, the institution had 5,387 total awards. Institutional data show a dramatic increase in the number of certificates awarded between 2012 and 2014. Studies and reports have been conducted to identify trends as well as the context of these changes (ER 2-1.1, ER 2-1.2). Degrees awarded over the last six years have also increased with 1,222 degrees awarded in 2009-2010, and 1,423 total degrees awarded in 2015-2016 (ER 2-2). The college maintains a class schedule ([ER 2-3](#)).

3. Degrees

A substantial portion of the institution's educational offerings are programs that lead to degrees, and a significant proportion of its students are enrolled in them. At least one degree program must be at least two academic years in length.

Saddleback College offers 112 associate in arts degrees, 92 associate of science degrees, 89 certificates of achievement, 3 certificates of completion and 26 occupational skills awards for a total of 322 degrees and certificates. The college maintains a list of degrees with length of study required to complete each program (ER 3-1). The Associate in Arts degrees and Associate in Science involve satisfactory completion of a minimum of 60 semester units with a "C" average or higher, including the units required in each area of emphasis and fulfillment of either the Saddleback College general education (GE) requirements (ER 3-2), CSU GE, or IGETC. The college maintains an inventory of the catalog designation of college-level courses for which degree credit is granted (ER 3-3; missing). The Associate Degrees for Transfer require a minimum of 60 CSU-transferable semester units with an overall average grade of "C" or higher; 12 of these units must be completed at the college. Students enrolled full-time could complete the requirements in two academic years. Trends on enrollment in

each degree program and non-degree program are available (ER 3-4). The data illustrate that in 2015-2016 there were total of 164,419 enrollments with 39,771 unique students whereas in 2013-2014 there were 164,107 student enrollments with 39,817 unique students in credit and non-credit courses combined (ER 3-4).

4. Chief Executive Officer

The governing board of the South Orange County Community College District and announced the appointment of Dr. Tod Burnett as president of Saddleback College on June 24, 2008. He assumed his position in August of 2008. The College is aware of its responsibility to immediately notify ACCJC when there is a change in the chief executive officer. Authority to operate the College and implement the college's district policies through the role of the chief executive officer is reflected in Board Policy 2201 (ER 4-1).

5. Financial Accountability

The college reviews its past, current and proposed budgets ([ER 5-1](#)). Annual external financial audits by a certified public accountant are conducted of the South Orange County Community College District including financial aid programs. Saddleback College is not audited as a separate entity ([ER 5-2](#), [ER 5-3](#), [ER 5-4](#)). The audit includes an audit of the district's financial aid programs. The governing board reviews these reports in a regularly scheduled meeting during public session ([ER 5-5](#)), and the Combined District/Foundations Audit Committee reviews the audit reports to identify any needed actions (ER 5-6 [2014-15 Audit Schedule](#), [10-26-15 Exit Audit Meeting Minutes](#)). The District files audit reports with the Orange County Department of Education and any other public agencies, as required. The most recent audit was during the 2014-15 academic year. There were no findings in 2014-15 as a result of the audit.

Saddleback College default rates are within the acceptable range. The College's three-year cohort default rates are well below 20 percent. The 2011 three-year cohort default rate was 12.7%, the 2012 cohort default was 11.1%, and the 2013 cohort default rate is 10.8%.

Additional information regarding Saddleback College's compliance with Title IV federal regulations can be found in the College's response to the *Policy on Institutional Compliance with Title IV*.

Certification of Continued Compliance with Commission Policies

1. Standards and Performance with Respect to Student Achievement

The institution has defined elements of student achievement. The college identifies and analyses student progress and achievement, defined as six-year completion rates ([CP 1-1](#)); persistence rates defined as enrollment in three consecutive primary terms ([CP 1-2](#)); 30 units rate defined as 6-year completion rates of 30 units ([CP 1-3](#)); remedial completion rate defined as 6-year completion rate of remedial to college level courses ([CP 1-4](#)). The college identifies, analyzes and defines performance indicators for successful course completion and course retention ([CP 1-5](#)), degrees and certificates ([CP 1-6](#)) and transfers ([CP 1-7](#)). The college also assesses the extent to which it serves its mission through demographic analyses ([CP 1-8](#)) as well as through Student Equity Plan research ([CP 1-9](#)).

Through its program review process ([CP 1-10](#)) the institution has defined elements of student achievement performance in each program, and has identified the expected measure of performance within each defined element through its process of creating institution-set standards. The defined elements include, but are not limited to job placement rates for program completers, and for programs in fields where licensure is required, the licensure examination passage rates for program completers, as identified in the data tables in the section on student achievement and institution-set standards.

The institution-set standards across the institution are going through a more rigorous process to guide self-evaluation and institutional improvement. The beginning of these discussions occurred through the college's Planning and Budget Steering committee and culminated in the college's Institutional Effectiveness Partnership Initiative Annual Report ([CP 1-11](#)) as well as the college-wide through the Student Success Metrics Summit ([CP 1-12](#)).

Institution-set results are reported regularly across the campus and discussed among constituent groups ([CP 1-13.1](#), [CP 1-13.2](#), [CP 1-13.3](#)). The college also analyzes and publically discusses a holistic picture of its performance against targets ([CP 1-14.1](#)) for institution-wide planning, to evaluate how well the institution fulfills its mission, to determine needed changes to allocating resources, and to make improvements.

As outlined in the QIP, the defined data elements and expected performance levels through creation of institution-set standards as well as goals are going through a review process for creating greater relevance and meaningful integration into the college culture.

2. Credits, Program Length and Tuition

Through the curriculum process, programs are designed to meet the academic standards and rigor appropriate for higher education. Program quality is maintained through regular program review. The Program and Course Approval Handbook (PCAH) is the state-sanctioned handbook for curriculum development ([CP 2-1](#)). This handbook guides the development of new and revised programs and courses, including the assignment of credit hour and degree program length. Units of credit are awarded based on the Carnegie Unit, in which 18 hours of standard lecture and 36 hours of outside work equal 1 unit of credit. The basis for awarding credit is tied to each course's Methods of Evaluation (MOE).

The College ensures that, at the course level, its credits are consistent with accepted norms of higher education through its rigorous curriculum approval process during which Course Outlines of Record (CORs) are scrutinized carefully to ensure compliance with accepted state standards. Course outlines are revised and updated regularly in accordance with established state standards of scheduled review. Transferable courses are developed in compliance with guidelines established by the California State and University of California systems to ensure articulation (CP 2-2).

Tuition is consistent across degree programs (\$46/unit). This excludes all non-credit programs. Degree completion requires completion of a minimum of 60 semester units, and 18 units minimum in a discipline or specialization (CP 2-3).

As specified by the Program and Course Approval Handbook 6th Edition, which was created by the Academic Affairs Division of the State Chancellor's Office, the College follows federal standards for clock-to-credit hour conversion in the awarding of credit. This handbook states that "[t]he standard formula for credit hour calculations applies to the majority of courses and course types and is derived from the regulations in title 5, section 55002.5 [, which] requires colleges to define one unit of credit as a minimum of 48 total hours of student work, inclusive of all contact hours plus outside-of-class, or homework, hours" (CP 2-4).

3. **Transfer Policies**

A detailed outline of the various transfer policies, including articulation and transfer patterns [pages 132-139], can be found in the College Catalog [pages 36-49]. Policies are also made available to students through MAP, the Student Handbook, counseling classes, and the Transfer Center. All of these mediums provide students with the information they need to create an academic plan (CP 3-1).

Policy information includes transfer policies and planning tools, GE patterns, articulation agreements, the Associates Degree for Transfer (ADT), the Teacher Preparation Program, and the Honors Program. In addition, these mediums inform students of the Transfer Admission Guarantee (TAG) program, which provides guaranteed admission to six UC campuses for those California community college students who meet specific requirements. Students are also informed of the Articulation System Stimulating Interinstitutional Student Transfer (ASSIST), the online statewide database of articulation, and the College Catalog provide means of determining the comparability of course taken at other California public colleges and universities (CP 3-2).

To determine the College's articulation compliance for each institution, the College regularly reviews the articulation policies of the University of California (UC) and California State University (CSU) systems, as well as private and out-of-state colleges and universities. Often, private universities in California and out-of-state colleges present special articulation questions. In these cases, the Counseling Department and the Articulation Office coordinate

inquiries and, as needed, will request information and clarification from division and departmental discipline experts.

Students can access Saddleback College's articulation agreements with the UC and CSU systems. For information regarding institutions with which the College has no articulation agreement, students can consult the ASSIST database. The Saddleback College homepage and the Transfer Center website both provide links to the ASSIST website. The College also provides direct counseling to students on these policies and agreements in the Transfer Center and in Counseling Services (CP 3-3).

4. Distance Education and Correspondence Education

The College has rigorous curriculum review and program review processes which apply to all courses and programs and do not differentiate significantly between face-to-face and online modalities. For example, there is no distinction between the competency levels determined for online versus face-to-face courses. Similarly, the processes for establishing and evaluating courses and programs, including the determination of appropriate credit and articulation agreements, are the same for both modalities. Moreover, Carnegie Units, a standard metric used nationwide, are awarded in the same way for online courses and face-to-face courses. The college also revised the process for approving DE courses in the Curriculum Committee in 2015-2016 in response to requests from faculty and administrators for an updated, streamlined process. The college's new curriculum review process now includes the use of an Online Addendum form that is reviewed by at least 2-3 faculty members for approval of individual courses. In this process, faculty review and approve these forms in a sub-group of the Online Education Committee. Once the course is approved, the division dean has the right of assignment, and make individual decisions about assigning faculty to teach those approved courses (CP 4-1).

Several steps maintain the quality of online courses and online instruction. First, a subcommittee of the Curriculum Committee uses a separate approval process to ensure that the quality of online courses is consistent with that of face-to-face courses. The subcommittee also determines whether the intended methodology for the proposed online course is appropriate to the topic. The Distance Education Addendum confirms that faculty create assignments and grading strategies suited to an online environment. Through its representation on BPARC and DOEC, the college supported the revision of AR 6112, which is an Administrative Regulation that addresses the following areas: Definitions of a DE course, the role of the college's Curriculum Committee in approving DE courses, instructor contact, regular effective contact, notification of availability for faculty, content delivery and accessibility. AR 6112 is currently under review in BPARC, and is expected to be finalized by May, 2017 (CP 4-2).

Saddleback College uses the Blackboard Learning Management System (LMS) for its distance education classes. The College uses Microsoft Active Directory (AD) as the primary method of student authentication. Each student is provided with a unique username and password that students use to access the LMS and all relevant college related technology systems such as email. The LMS is hosted by Blackboard and the district has its own instance ensuring protection of student information. Students can only access the LMS with

their unique username and password. The automatic student account provisioning system ensures all students have their accounts created in a timely manner and also disabled when the student is no longer taking classes (CP 4-3).

Saddleback College provides a robust and redundant technology infrastructure that ensures students, faculty, staff, and management have access to the LMS and other technology resources. The College has a 1Gbps connection to the Internet through CENIC and a redundant 100Mbps. All College computers are on a gigabit network with ample bandwidth. The computers on campus are on a four year refresh cycle. There are 1,348 computers in instructional computer labs located throughout the College. The Learning Resource Center has over hundred fifty computers available for student use. Blackboard, the LMS used in distance education, is hosted by Blackboard and is integrated into our student information system. The Faculty Center for Student Success has a dedicated computer lab for instructors to use and it is staff with very knowledgeable application specialists and instructional technologist that assist faculty in their distance education courses and LMS. The district enters in a multi-year contract with the LMS provider to ensure continuity and system availability (CP 4-4).

5. Student Complaints

Saddleback College maintains formal policies and procedures for student complaints. These are provided for students on the College website (CP 5-1), the catalog (CP 5-2), and in the SOCCCD District's Board Policies and Administrative Regulations 3000 series (Human Resources) and 5000 series (Students), which are posted online (CP 5-3).

The college catalog (CP 5-4) includes several references for filing complaints regarding possible violations of the district's policies regarding equal employment opportunity, nondiscrimination, harassment, disability discrimination; and how to appeal grades, disqualification, academic conduct and disciplinary actions; these are reiterated in the annual Student Handbook (CP 5-5). The college catalog lists the contacts for various complaints and related processes. Students with complaints, grievances, and personal concerns about Saddleback College or any of its policies are encouraged to discuss them with the appropriate administrator or department chair.

Most student complaints are first filed with the Student Services. If the complaint is instruction related, it is referred to Academic Affairs. Personnel-related complaints including harassment and discrimination complaints are referred to the Human Resources Office. Student complaint files for the previous six years (since the last comprehensive evaluation) are available in the appropriate office (Vice President for Student Services, Vice President for Instruction, or district Human Resources); the files demonstrate accurate implementation of the complaint policies and procedures.

6. Institutional Disclosure and Advertising and Recruitment Materials

The college catalog is updated each year and is posted on the college website. The catalog provides detailed information on the college's courses, degree and certificate programs, and

completion requirements; policies on transfer; tuition, fees, and policies for refunds; information on the availability and requirements for financial aid; and rules regarding student conduct.

Each year the college's office of marketing and communications publishes an At a Glance brochure, which provides information on the college's demographics, academic and student support programs, and additional information on financial aid and scholarships, transfer, etc. The brochure is distributed to all administrators and managers to keep on file, and copies for the general public are located in various offices throughout campus. It is distributed by the outreach team during campus and community visits. The brochure is also posted on the college website.

The college website is continuously updated with information concerning the college's programs, services, and policies by trained and qualified staff. Each department on campus oversees the content on its webpages and updates accordingly.

The college's educational programs and services are the primary emphasis of college publications and promotional materials and are accurately represented.

The college catalog accurately reports the official college name, telephone numbers, and the street and website addresses; the college mission, vision and goals; programs and courses, and degree, certificate, and program completion requirements; faculty with degrees held and the conferring institution; institutional facilities readily available for educational use; rules and regulations for student conduct; the institution's academic freedom statement; tuition, fees, and other program costs; opportunities and requirements for financial aid; policies and procedures for refunding fees and charges to students who withdraw from enrollment; policies related to the transfer of credits to other institutions; statements of nondiscrimination; location or locations where other institutional policies may be found; members of the governing board; and the accredited status of the institution. This information is also found on the college website and in the college's At a Glance brochure. The accredited status of the institution and accreditation reports can be found on the website, one click from the home page.

Accurate information is provided in the course catalog on national and state legal requirements for eligibility and licensure on career programs including nursing and real estate. The college website provides current gainful employment data of all career technical education programs as required for Title IV federal financial aid.

7. Title IV Compliance

Saddleback College complies with Title IV federal financial aid regulations and ensures compliance through various quality improvement strategies and professional development of staff. Saddleback College was recertified to continue with the Department of Education federal financial aid program (CP 7-1). Recertification occurs every five years. The Financial Aid Office conducts compliance requirement checks on an annual basis by

following the US Department of Education's Federal Student Aid (FSA) assessment guide (CP 7-2).

Annual external financial audits by a certified public accountant are conducted of the South Orange County Community College District including financial aid programs. Saddleback College is not audited as a separate entity (CP 7-3). This audit includes an audit of the district's financial aid programs. The governing board reviews these reports in a regularly scheduled meeting during public session (CP 7-4), and the Combined District/Foundations Audit Committee reviews the audit reports to identify any needed actions (CP 7-5). The District files audit reports with the Orange County Department of Education and any other public agencies, as required. The most recent audit was during the 2014-15 academic year. There were no findings in 2014-15 as a result of the audit.

Saddleback College default rates fall within the acceptable range. The College's three-year cohort default rates are well below 20 percent. The 2011 three-year cohort default rate was 12.7%, the 2012 cohort default was 11.1%, and the 2013 cohort default rate is 10.8%. We attribute our success in keeping loan default rates at an acceptably low level by providing a financial aid orientation (CP 7-6) with a literacy component as a part of the loan process, and by providing a comprehensive Financial Aid Student Handbook (CP 7-8).

OBSOLETE

Standard III: Resources

The institution effectively uses its human, physical, technology, and financial resources to achieve its mission and to improve academic quality and institutional effectiveness. Accredited colleges in multi-college systems may be organized so that responsibility for resources, allocation of resources, and planning rests with the district/system. In such cases, the district/system is responsible for meeting the Standards, and an evaluation of its performance is reflected in the accredited status of the institution(s).

A. Human Resources

1. *The institution assures the integrity and quality of its programs and services by employing administrators, faculty and staff who are qualified by appropriate education, training, and experience to provide and support these programs and services. Criteria, qualifications, and procedures for selection of personnel are clearly and publicly stated and address the needs of the institution in serving its student population. Job descriptions are directly related to institutional mission and goals and accurately reflect position duties, responsibilities, and authority.*

EVIDENCE OF MEETING THE STANDARD

Employment procedures at Saddleback College are administered by the South Orange County Community College District (SOCCCD) Office of Human Resources (OHR) consistent with law, board policies, and administrative regulations. Board policies (BP) and administrative regulations (AR) related to employment of personnel are developed by the Board Policy and Administrative Regulation Committee (BPARC), which is comprised of constituency representatives throughout the district. These board policies and administrative regulations describe in detail the employment procedures used to ensure the recruitment and hiring of highly qualified personnel. Policies and regulations are in place to standardize the hiring for all full-time faculty (III.A.1-1), part-time faculty (III.A.1-2), classified staff (III.A.1-3), and administrators and managers (III.A.1-4). These board policies and administrative regulations reflect hiring processes that are specific to each position's role in the operation of the College. All hiring for permanent positions is conducted by committees that ensure applicants being considered for employment meet the qualifications outlined in the job descriptions and position announcement and that the most qualified applicant is offered the position. It is the responsibility of the College President to ensure the integrity of the recruitment and hiring processes at the college.

The qualifications for each job vacancy are linked to position requirements and responsibilities and to established standards. OHR establishes hiring criteria by matching position requirements and responsibilities to industry standards. For new classified and administrative positions, the job description content is drafted by the supervisor with assistance from OHR. The draft job description is reviewed by an outside consultant and

compared to the local labor market for comparable duties, salary, and minimum qualifications. Once the draft is formally reviewed and finalized, it is presented to the Board of Trustees (BOT) for approval. Job descriptions for classified staff, administrators, and classified management positions are posted on the job site. Job descriptions for faculty positions are developed by discipline experts within the field in accordance with Administrative Regulation 4011.1, Recruitment: Full-Time Faculty (III.A.1-5) and reflect the job duties outlined in Board Policy 4309, Duties and Responsibilities of the Faculty (III.A.1-6).

OHR uses various means to advertise college and district services job openings including internally (districtwide) and on various external sites. All job announcements are posted under the “jobs” link on the SOCCCD Web site and on the College cable television station. OHR maintains a high profile at the California Community College Registry job fairs and participates in many regional job fairs. Job openings are listed in the California Community College Job Registry, the “Chronicle of Higher Education,” major daily newspapers (as deemed appropriate), discipline-specific periodicals, and association publications. Job announcements and brochures are posted electronically as previously described and in print and include the position description, representative duties, education and experience requirements, compensation and benefits information, conditions of employment, required materials, and a description of the application and selection process.

All faculty and administrator hiring is made in strict compliance with the minimum qualifications for faculty and administrators as mandated by the California Community Colleges Chancellor’s Office (III.A.1-7). Moreover, the job announcements for all positions requiring expertise in online education, such as faculty positions and the dean of online education and learning resources, have language describing the required and desired experience and training in online teaching or administration.

The Office of Human Resources recruits for diversity by utilizing up to twenty-seven (27) different avenues to ensure access to employment opportunities. In addition, positions are advertised in specialty publications or websites directed towards underrepresented and diverse populations (III.A.1-8). The district’s Equal Employment Opportunity Plan serves as a recruiting guide (III.A.1-9). To ensure fairness in the recruitment and hiring process, OHR assigns a non-voting Equal Employment Opportunity (EEO) representative to each committee. OHR has conducted EEO training for managers at the colleges to streamline the commitment information process (III.A.1-10).

The employment procedures used to recruit faculty, classified staff, administrators, and managers vary, as described in the following sections.

Recruitment and Hiring of Full-Time Faculty

Administrative Regulation 4011.1 clearly defines the recruitment and hiring policy for full-time faculty (III.A.1-1), and a college process to develop faculty position prioritization recommendations is consistently applied. Each year the college develops a list of faculty

positions to be filled through a defined process established by the Academic Senate (III.A.1-12). First, a list of potential full-time positions are developed based upon analysis of identified program needs through the program review and college wide planning processes. Criteria include program accreditation considerations, student demand for classes, the ratio of full-time to part-time faculty in the discipline, and assessment of student learning. This list is subsequently prioritized by the Full-Time Hiring Prioritization Committee of the Academic Senate. The committee's recommendations regarding priorities for faculty positions are submitted to the College president, who determines the final list and forwards it the Board of Trustees for approval. Once a full-time faculty position has been approved, the appropriate division dean will submit a request to OHR in Workday, the district's enterprise resource planning system, to fill the position. OHR then appoints a human resources specialist to administer the hiring process for that position.

Each department approved for a new faculty hire forms a search committee of five to seven members, which generally includes the division dean, discipline faculty, and occasionally, classified staff. No fewer than three members of the committee must be experts in the academic or student services discipline of the recruited position. All faculty appointments to search committees are approved by the Academic Senate.

Search committees review applications for full-time faculty positions to rank applicants in relation to the required knowledge, education, and experience for the positions for which they have applied. Evaluation includes review of applications, cover letters, transcripts, curriculum vitae, and letters of recommendation. Based on this ranking, applicants are then selected for an interview and, depending on the position, a teaching demonstration.

Practices for determining whether an applicant is well-qualified in the field of online teaching varies across departments at the college. For all positions requiring online teaching, there is an emphasis on evaluating proficiency in online education. Evidence may include recent online teaching experiences, a teaching demonstrations that showcase candidates' abilities to teach online, responses to open-ended interview questions that ask about best practices in online teaching, references from other institutions, online teaching certifications (such as the CONE or Quality Matters certificates), and prior mentorship from experienced online instructors. Hiring committees for full-time positions which include online assignments will also ask applicants about their background in online teaching, experience with various Learning Management Systems, and their ability to leverage various technologies during the interview.

After the conclusion of the interviews, the committee forwards the names of candidates that qualify for a second-level interview with the College President and one of the College Vice Presidents. Prior to the second-level interview, the chair conducts a check of professional references. The College President consults with the search committee chair and discipline experts after the second-level interviews and before any offer of employment is made. The College President makes the final selection of the candidate for recommendation for

appointment to the job. Before a candidate's name is forwarded for Board of Trustees for approval, OHR reviews official transcripts and verifies employment history.

Recruitment and Hiring of Part-Time Faculty

There is an AR for part-time faculty recruitment and hiring. Applications for part-time faculty positions are continuously accepted and OHR maintains a candidate pool for each discipline of those applicants who meet the minimum qualifications for the position. Division deans and department chairs can access the application materials in each candidate pool online when a part-time appointment is needed.

Due to the nature of part-time faculty hiring, the hiring process for part-time faculty varies among divisions. The department chair or the division dean (sometimes with other faculty members) interviews part-time faculty applicants. Part-time faculty must meet the same minimum qualifications required of full-time faculty and submit official transcripts prior to Board approval. Division deans make hiring decisions after appropriate reference checks have been conducted.

Recruitment and Hiring of Classified Employees

Board policy 4011.3 defines the recruitment and hiring process for classified employees, and a college process to develop the prioritized recommendations for classified positions is consistently followed (III.A.1-12) (III.A.1-13). In October 2015, the district implemented a voluntary pilot project for recruitment and hiring of classified employees as the first step in evaluating the current board policy for possible revisions. While funding for replacement positions remains with the department, funding requests for new positions follow a competitive process. New staff positions are requested by supervisors through the program and administrative review processes, and these requests are consolidated by the appropriate Vice President, who organizes and brings the requests to the College Resource Committee, which reviews them prior to forwarding them to Consultation Council, the College's main governance group for new discussion and ranking of new staff position requests. The Consultation Council creates one prioritized listing of classified staff. The President finalizes the list based on available funding and other factors and submits it to the Chancellor.

Following the approval of the prioritized list of staff positions, the hiring process is started through the submission of a job requisition to OHR through Workday. Applications for classified positions undergo a rigorous review process. OHR screens applications for completeness and to ensure all applicants forwarded to the committee for review demonstrate the minimum knowledge, education, and experience specified in the job announcement. The search committee chair has the option to be involved in the minimum qualification screening process. If the need arises, OHR will consult with the chair on matters of interpretation of minimum qualifications. The pilot classified hiring process enables the

committee to confer regarding interpretation of minimum qualifications required for the position.

Search committees are formed for each position and consist of three to seven members, which may include classified staff, managers, administrators, and faculty, where applicable. The application materials for all applicants meeting the minimum qualifications for the position are reviewed and ranked online on the district's employment site by committee members in order to determine which applicants will be invited for an interview.

A human resources specialist and the search committee chair determine the lowest score to qualify for an interview and the number of applicants to be interviewed. In the pilot process, search committee discussion forms the basis of determination about which candidates will be interviewed.

Interview questions are asked to determine whether candidates can accomplish the tasks required of the positions for which they have applied. For staff positions related to instructional technology in online education, for example, candidates' applications are screened for experience and education related to online education and additional questions are asked about their abilities and training as part of the interview. At the conclusions of the interviews and any subsequent discussions, each committee member determines a final interview score for each candidate. The pilot hiring process involves progressive ranking after the completion of each interview (i.e., no scores are nullified). Reference checks are made in accordance with administrative regulation guidelines, and second-level interviews are frequently conducted prior to submission of the recommended applicant to the president. This process ensures that the applicant who is offered the position is the most qualified to support the programs and services of the College.

Recruitment and Hiring of Administrators and Managers

Academic administrators have two basic requirements: (1) possession of a master's degree, as defined in "Minimum Qualifications for Faculty and Administrators in California Community Colleges" and in Title 5, Sections 53400-53430, and (2) meet the needs of the college in the position for which they are hired. This second requirement may include more-specific degree requirements, degree majors, or additional educational or experiences requirements as defined by the needs of the college (III.A.1-7) (III.A.1-15).

Minimum qualifications for all classified, or non-academic, managers are determined by the needs of the district. Education, experience, and job requirements are developed by OHR in collaboration with the hiring manager and refined by an external consultant with information provided by periodic classification surveys with other community colleges. In general, classified managers must (1) possess, at minimum, a bachelor's degree in a specialized area and (2) meet or exceed the experience criteria based upon the needs of the position.

The recruitment and hiring process for College administrators and managers is set forth in Board Policy 4011, Employment Procedures for Administrators and Managers (III.A.1-4). When the need for hiring a new administrator or manager is determined, the president makes a recommendation to the chancellor. Once approved by the chancellor, a job requisition is submitted to OHR through Workday. OHR advertises the open position and is responsible for maintaining the recruitment file and application materials for each position.

Search committees for administrator and manager positions consist of between five and twelve members. The majority of the committee must be administrators and managers, but the committee must also include one faculty representative appointed by the Academic Senate President, one faculty representative appointed by the SOCCCD Faculty Association, and one classified employee appointed by the California School Employees Association. As with other positions, applications are screened for meeting the job qualifications as specified in the description and ranked. Interviews are held with the most qualified applicants, and three finalists are forwarded to the president for a second-level interview. The president conducts the second-level interview, inviting others to attend, and makes the final selection for the position. Reference checks are conducted by the committee chair or designate, and OHR reviews transcripts and verifies the employment history of the top candidate before an offer is made.

ANALYSIS AND EVALUATION

The College follows established procedures for the recruitment and hiring of all personnel. The determination of positions to be filled is based on the institutional needs of the College, and processes are followed to ensure that the College attracts and hires only the most qualified individuals for each position.

The College and District have policies and procedures in place to ensure that it continues to recruit, develop, and retain the best qualified personnel available to deliver and support quality programs and services. OHR ensures adherence to the California Education Code, California Code of Regulations, Title 5, collective bargaining agreements, board policies, and administrative regulations in the hiring and recruitment of personnel.

A common concern at the College revolves around the time it takes to fill an open position. The hiring process for classified staff is lengthy, due in part to a backlog of open positions and OHR's ability to work through the backlog, and due in part to the many steps required by the process itself. In an attempt to reduce the time and to improve the recruitment process, OHR has reorganized and hired additional staff. OHR has also implemented several process improvements such as the online screening of candidates by the committee members. In addition, college and district administrators have visited with human resources professionals at other community colleges to learn about their hiring processes, and the college is currently engaged in a classified staff hiring pilot process in an attempt to streamline and shorten the hiring process.

2. *Faculty qualifications include knowledge of the subject matter and requisite skills for the service to be performed. Factors of qualification include appropriate degrees, professional experience, and discipline expertise, level of assignment, teaching skills, scholarly activities, and potential to contribute to the mission of the institution. Faculty job descriptions include development and review of curriculum as well as assessment of learning. (ER 14)*

EVIDENCE OF MEETING THE STANDARD

Saddleback College seeks to hire the most qualified faculty in all disciplines. In order to be considered for a position, applicants must meet the minimum qualifications or the equivalent as described in the position announcement and established by State law (Title 5, Sections 53400-53430) (III.A.2-1). The Board of Governors of the California Community Colleges, in consultation with the Academic Senate for California Community Colleges, determines the minimum qualifications for faculty and publishes them in their "Minimum Qualifications for Faculty and Administrators in California Community Colleges" (III.A.2-2). Applicants who do not meet the minimum qualifications for a faculty position as published in the position announcement may apply for equivalency in accordance with the California Code of Regulations, Title 5, Section 53420 and the California Education Code §87359 (III.A.2-3). Equivalency policies are detailed in Board Policy 4011.1 (III.A.2-4).

Job descriptions for faculty positions are developed in accordance with Administrative Regulation 4011.1, Recruitment of Full-Time Faculty (III.A.2-5) and reflect the job duties outlined in Board Policy 4300, Duties and Responsibilities of the Faculty (III.A.2-6), which include curriculum development and the assessment of student learning, as well as the specific requirements of knowledge and expertise within their discipline. Beyond the minimum qualifications, each job description includes a list required experience and desired qualifications for the position, which are determined by the discipline experts at the College.

The college currently utilizes an effective process for hiring that ensures content area expertise for faculty hiring of full-time positions. All hiring committees must include no fewer than three members who are experts in the academic discipline of the recruited position, and these may be drawn from District faculty and staff or from external sources if necessary. All faculty appointments are approved by the Academic Senate.

Instructors are hired for a broad range of skills needed within their discipline, which may include expertise in online instruction. Search committees review applications for full-time faculty positions to ensure applicants have the appropriate knowledge, education, and experience for the position, as outlined in the job description.

ANALYSIS AND EVALUATION

Saddleback College has been successful in hiring and retaining highly qualified faculty. This is due to the well-developed job descriptions that outline the qualifications necessary for employment and the rigorous processes in place for recruiting and selecting candidates, as well as to the desirability of living and working in south Orange County. Many College faculty hold positions of leadership in statewide and national professional organizations and shape and influence community college education beyond Saddleback College. The College has a long-standing preference for filling full-time faculty positions with individuals who exceed the minimum qualifications. In addition, many part-time faculty, particularly in career technical education, are practitioners who work in the community and bring their unique experiences to the classroom.

A good indicator of the quality and the expertise of our faculty is their length of service to the College and their educational preparation and training. Their markedly long service record is an indication of the stability and consistency the College has been able to maintain with regard to human capital. According to the OHR:

- Nearly 60% of our tenured faculty have been with the College more than 10 years. More than 35% have 20 years or more of service to the College, and 12% have more than 30 years of service.
- More than 10% of our part-time faculty have been with the College more than 10 years and 9% have been with the College more than 15 years. Six part-time faculty have been with the College more than 30 years.
- Of our tenured faculty, 61 (34 percent) have doctorates, and 20 (29 percent) of our probationary faculty have doctorates. It is important to note that none of our faculty positions require this advanced degree. However, as the data indicate, faculty in all categories exceed the minimum requirements for their positions (IL.A.2-7).

Administrators and other employees responsible for educational programs and services possess qualifications necessary to perform duties required to sustain institutional effectiveness and academic quality.

EVIDENCE OF MEETING THE STANDARD

Academic Administrator's and Classified Managers Qualifications

Saddleback College seeks to hire the most qualified managers and administrators. In order to be considered for academic administrator position, applicants must meet the minimum qualifications or the equivalent as described in the position announcement, defined by the

California Code of Regulations, Title 5, Section 53420, and published by Board of Governors of the California Community Colleges in the document, "Minimum Qualifications for Faculty and Administrators in California Community Colleges" (III.A.3-1). The College also establishes required experience and desired qualifications for each position that above the minimum qualifications. These are described in the job announcement for each position.

Minimum qualifications for classified managers are contained in job descriptions developed by the OHR in collaboration with the hiring manager at the college. The College can also establish additional qualification in relations to education, experience, and job knowledge. These are described in the job announcement for each position. In general, classified managers must (1) possess, at minimum, a bachelor's degree in a specialized area and (2) meet or exceed the experience criteria based upon the requirements of the position.

Classified Employees' Qualifications

The qualifications for each classified staff position are linked to the position requirements and responsibilities and to standards established by the OHR. The Office of Human Resources establishes classified staff qualifications by matching the position requirements and responsibilities to industry standards. All classified position descriptions include minimum education and experience requirements, knowledge and abilities required by the position, and information regarding the working conditions, physical demands, and potential hazards, if any, related to the position.

Board Policy 4011.3 requires the OHR to verify a prospective employee's educational or professional certification, experience, or any other prerequisites for employment (III.A.3-2).

ANALYSIS AND EVALUATION

College administrators and other employees responsible for educational programs and services possess qualifications necessary to perform duties required to sustain institutional effectiveness and academic quality. The College develops job announcements that state all qualifications for positions, included desired qualifications, and adheres to established processes to ensure that only the most highly qualified individuals are hired.

4. *Required degrees held by faculty, administrators and other employees are from institutions accredited by recognized U.S. accrediting agencies. Degrees from non-U.S. institutions are recognized only if equivalence has been established.*

EVIDENCE OF MEETING THE STANDARD

The minimum qualifications for all positions describe both the required and desired educational credentials. All applicants for positions requiring higher education degrees are required to submit transcripts that indicate degree conferral. OHR reviews the validity of

each transcript and verifies educational degrees through the National Association of Credential Evaluation Services (NACES).

Individuals who have completed college or university course work or degrees at an institution in a country other than the United States must obtain a complete evaluation of foreign transcripts and degrees through a U.S. foreign transcript evaluation agency accredited by the State of California Commission for Teacher Credentialing such as Educational Records Evaluation Service and the International Education Research Foundation. The applicant bears the responsibility to complete and submit this evaluation. These evaluations are then verified by OHR. Degrees from non-U.S. institutions are recognized only if equivalence has been established.

ANALYSIS AND EVALUATION

The college follows appropriate procedures to ensure that all faculty, administrators, and other employees hold appropriate degrees. All transcripts and degrees listed on an individual's application are verified prior to hiring.

5. *The institution assures the effectiveness of its human resources by evaluating all personnel systematically and at stated intervals. The institution establishes written criteria for evaluating all personnel, including performance of assigned duties and participation in institutional responsibilities and other activities appropriate to their expertise. Evaluation processes seek to assess effectiveness of personnel and encourage improvement. Actions taken following evaluations are formal, timely, and documented.*

All personnel at the College are systematically and regularly evaluated through processes and procedures established by board policies, administrative regulations, and employee contracts. The evaluation process is overseen by OHR and all manager and administrators are responsible for ensuring that their employees are evaluated in a timely fashion. All employee evaluation reports and determinations are kept in the employee's personnel file, maintained by OHR. Employees have the right to provide a written response to his or her evaluation and have it placed in the personnel file. The evaluation procedures used to evaluate faculty, classified staff, administrators, and managers vary, as described in the following sections.

Evaluation of Faculty

Faculty evaluations follow the negotiated procedure described in the collective bargaining agreement between the District and the SOCCCD Faculty Association (III.A.5-1).

Evaluation procedures for probationary (tenure-track), tenured, and part-time faculty members are defined in the 2015-2018 Academic Employee Master Agreement (III.A.5-2).

The evaluation of probationary faculty is designed to serve two purposes: (1) to ensure that new faculty hires understand their responsibilities to the students, to the College, and to their own professional development and (2) to ensure that Saddleback College maintains high-quality instruction. Probationary faculty are evaluated annually throughout the four-year probationary period. The probationary faculty evaluation is a four-step process: The first step is a self-evaluation in the form of a portfolio. This is a new part of the evaluation process and allows the faculty member to include information regarding their accomplishments, course materials such as syllabi, and goals. The second step is the observation and report conducted by a tenure review committee (TRC). Each tenure track faculty member is assigned a TRC that follows the probationary faculty member through the probationary period. The TRC is appointed by the probationary faculty member's division dean, in consultation with the department chair, and comprises the dean and a minimum of two tenured faculty members from the department or from a related department (III.A.5-3). The TRC also includes a faculty mentor who has a non-evaluative role and is expected to serve as the advocate for the needs of the faculty member during the probationary period. The TRC conducts scheduled classroom/worksite/electronic visitation(s) as needed and submits written comments to the dean. The third step in the process is student evaluations. The student evaluations are arranged through the appropriate vice president's office and are obtained in each class. The student evaluations are made available for the faculty member to review and may be utilized by the TRC as part of the evaluation process. The fourth step is the completion of the Faculty Performance Evaluation Report by the TRC. This report is based on the observations of the faculty member made by the TRC and well as other items relevant to the instructional duties assigned to the probationary faculty member, including, but not limited to, participation in curriculum development and review and in the development and assessment of student learning outcomes (SLOs). Any information included in the probationary faculty member's evaluation regarding participation in the curriculum or the SLO processes are verified and documented. The TRC meets with the probationary faculty members to discuss its evaluation report. If the faculty member's performance is judged to be unsatisfactory or needs improvement, the TRC will develop a plan of action, which includes follow-up activities, dates of completion, and measurable outcomes to address the issues. Following each evaluation, the TRC makes a recommendation of renewal or nonrenewal of the faculty member's contract. This recommendation is submitted by the dean to the appropriate vice president, who then reviews the recommendation and forwards his or her recommendation to the president. The president reviews the recommendation and forwards his or her recommendation to the chancellor. The chancellor reviews the president's recommendation, and in turn, forwards his or her recommendation to the board of trustees.

The purpose of the tenured faculty evaluation process is "to improve the teaching/ learning process and the delivery of student services, to provide a basis for professional growth and development, and to comply with California State Community College laws and regulations" (III.A.5-4). Tenured faculty members are scheduled for evaluation at least once every three years. Evaluation is a four-part process that includes a self-evaluation portfolio, student evaluations, classroom/worksite observation, and a review report. The self-evaluation and

student evaluations are conducted in the same manner as for probationary faculty. The observation is conducted by the division dean or designee, who then completes the Faculty Performance Evaluation Report.

The evaluator seeks to assess the faculty member's overall performance, including teaching ability, subject matter competence, participation in campus life, and whether the faculty member meets professional expectations. The evaluator holds a final evaluation conference with the faculty member during which all items in the evaluation process are reviewed. If the evaluator feels that a faculty member's overall rating is unsatisfactory and is not meeting the expected performance level, then a plan of action is presented to the faculty member which details the activity or activities for enhancement, the date of completion for each activity, and material which will be acceptable as documentation of action completed. The faculty member will be evaluated again.

The faculty member being evaluated may also elect to have a second evaluation by a tenured faculty member of his or her choice. The second evaluation is intended for improvement of the faculty member, and it may become a part of the personnel file.

The part-time faculty evaluation process is also designed to improve the teaching/ learning process and delivery of student services, and to provide the part-time faculty member a basis for professional growth and development. Part-time faculty are evaluated once in the first semester of employment and every three years thereafter. The process followed is exactly the same as for a tenured faculty member and includes a self-evaluation portfolio, student evaluations, a classroom/ work site visit by the dean or department chair, and an evaluation report (III.A.5-5).

The format for evaluating online courses is described in the Academic Employee Master Agreement, which requires faculty who teach online to meet for at least 50 minutes with their supervisors to go over their online course. Evaluations make recommendations for improvement of online courses during the evaluation process, and faculty typically implement suggestions from peers and evaluators or through informal feedback.

The use of mentors, portfolios and meetings covers additional areas of growth and professional development, which would not typically be covered in a shorter, single observation. Faculty are evaluated in all areas, including preparation, effective instructional practices, outcomes assessment, and college service. Mentorships and interactions between colleagues also help to determine the effectiveness of personnel in performing their duties.

Through both formal evaluation processes and informal means, faculty are provided with opportunities to identify areas of improvement and participate in professional development to improve their teaching in both face-to-face and online courses or other areas of job performance.

Outside of the evaluation process, there are opportunities for faculty to improve their teaching skills in both face-to face and online classes. These include one-on-one meetings with professionals in the Faculty Center for Student Success, AVID workshops, Quality Matters sessions, and other professional development workshops. Faculty can also participate in committees that address teaching and learning. The Online Education Initiative has also offered some unique opportunities for faculty to improve their teaching methodologies in online education and to document evidence of effectiveness. The college currently serves as a pilot site for the OEI, and there are six OEI-engaged faculty members participating in varying levels within the pilot. These OEI-engaged faculty are reviewed and re-reviewed for improvement and are provided with ample opportunities to learn new skills, meet with instructional designers, and participate in workshops and training to improve their online teaching skills. The evaluation instrument, the OEI's Course Design Rubric, has been widely utilized and adopted in state level activities as promoting improvement and standards for effective teaching in online education, and the College is in the process of developing a new online teaching certificate based, in part, on this rubric.

Classified Staff Evaluation

Classified staff evaluations follow the procedures described in the collective bargaining agreement between the California School Employees Association, Chapter 586, and the District (III.A.5-6). The CSEA contract states that each permanent classified employee shall receive a written evaluation at least once every two years. New classified employees are placed on a 12-month probationary period. During this probationary period, employees are expected to be evaluated once during the initial six months of employment, and again prior to the end of the probationary period.

The OHR has developed a report, *Workday*, the college's enterprise resource planning tool that managers can use to determine when evaluations are due. OHR holds workshops on effective evaluation techniques. OHR receives all completed evaluations for inclusion in each employee's personnel file (III.A.5-7).

The evaluation process provides a method for measuring employee performance based on the employee's classification standards and requirements as stated in the employee's position description. Managers provide guidance to staff in support of their daily work activities. Evaluations for academic administrators and classified managers can now be conducted in *Workday*, which allows for input by the supervisor and the employee (III.A.5-8).

Once an evaluation is completed, the area administrator reviews the evaluation with the employee. When there is concern, the area administrator discusses strategies for improvement with the employee. Any negative evaluation includes specific recommendations for improvement such as a remediation plan and provisions for assisting the employee in implementing any recommendations made.

Evaluation of Police Officers

Classified employees holding those positions described as Campus Security Officer, Police Officer, and Police Officer Lead are evaluated using the procedures described in the collective bargaining agreement between the District and the South Orange County Community College District Police Officers Association (POA) (III.A.5-9). All officers on campus receive an annual written performance evaluation. New employees serve a one-year probationary period. During this probationary period, the work performance of the employee is evaluated by the immediate supervisor at three months, five months, and eleven months of employment.

Evaluations address those areas that need improvement and identify those areas in which an employee meets or exceeds police department standards. If necessary, the evaluation may also set forth an improvement plan developed by both the supervisor and the employee. The plan outlines specific steps that the employee can take to improve in the identified areas.

Evaluation of Administrators and Classified Managers

Board policy and administrative regulation 4090 govern the evaluation of academic administrators and classified managers (III.A.5-10) (III.A.5-11). Administrators and managers are evaluated semiannually during the first year of employment and annually thereafter. The evaluation is completed by the immediate supervisor on a Workday (III.A.5-12). These formal evaluations are designed for leadership personnel to achieve and maintain high levels of work performance. The evaluation process begins with the establishment of mutually agreed-upon goals and objectives for the year, which set the benchmarks against which the employee's accomplishments will be objectively reviewed. If necessary, a remediation plan is provided for "needs improvement" or "unsatisfactory" marks on the evaluation form.

The completed evaluation is shared with the employee, forwarded to the College president and the chancellor for review, and transmitted to OHR.

ANALYSIS AND EVALUATION

College processes are in place to ensure evaluations are conducted by the employee's immediate supervisor on a regular basis as identified in the board policy, administrative regulation, and employee contract. OHR has now developed a report for monitoring due dates for staff and faculty evaluations to assist managers and administrators to complete evaluations in a timely fashion. A majority of administrators and classified managers have been trained by OHR to use the FRISK (Facts Rules Impact Suggestions Knowledge) evaluation model for employee performance documentation (III.A.5-13), and evaluation training has been provided in numerous sessions provided at College Management Team meetings and at District Administrators and Managers meetings (III.A.5-14) (III.A.5-15) (III.A.5-). The College is currently collaborating with the OHR to refine and execute an

improved process for tracking all evaluations to ensure they are conducted at stated intervals.

6. *The evaluation of faculty, academic administrators, and other personnel directly responsible for student learning includes, as a component of that evaluation, consideration of how these employees use the results of the assessment of learning outcomes to improve teaching and learning.*

Saddleback College is committed to student learning and student success. As part of their regular responsibilities, and in accordance with BP4309, Duties and Responsibilities of the Faculty, Saddleback faculty are required to engage in the assessment of student learning outcomes (SLOs) in all of their courses. Faculty, whether teaching face-to-face or online, are required to assess student learning. Counselors and librarians are also required to participate in SLO assessment as part of their responsibilities.

Faculty are evaluated, in part, on their compliance with the responsibility to evaluate student learning as part of the faculty evaluation process (PLA 8-1). The evaluation article in the faculty contract specifies that evaluation reports include information regarding participation in curriculum development and review and in development and assessment of student learning outcomes, and the evaluation instrument also includes this as one of the key ranking measures.

Administrators, classified managers, and staff who are closely linked to instruction, such as instructional assistants, recognize the role they play in student learning process and are involved in the development and assessment of either Student Learning Outcomes (SLOs) or Administrative Unit Outcomes (AUOs). Administrators and manager's work with staff and faculty in their areas to ensure that outcomes are being assessed and dialogue is taking place to lead to greater attainment of those outcomes. They also are responsible for evaluating faculty and staff relative to engaging in SLO or AUO assessment and to set employee goals related to assessment of learning, where applicable.

SLO assessment is conducted at the department level and department chairs are required to lead faculty assessment and dialogue. When student learning does not meet the criteria set by the department, department chairs facilitate discussion about needed improvements. Discussions about how to improve learning outcomes come in many forms and lead to a variety of plans. Program reviews and SLO assessment result are gathered by departments, which include information on student success and retention rates, among other data. Dialogue also takes place outside of departments in various committees and workshops. For example, the Online Education Committee regularly discusses online course outcomes, and members dialogue and disseminate information related to benchmarks, best practices, and uses of assessment data to increase in student success measures in online classes. As a result of this dialogue and the analysis of assessment data, resources are developed as to assist faculty throughout the college. These resources include the creation of documents,

such as checklists and best practices manuals, and professional development activities for faculty in collaboration with the staff at the Faculty Center for Student Success, an Online Educator program, the Online Education Summit, AVID online-focused workshops for faculty have all been a result of these discussions.

ANALYSIS AND EVALUATION

The faculty evaluation process requires the participation of classroom faculty, counselors, and librarians in the assessment of SLOs. The faculty evaluation process as a whole is meant to assess how effective instructors are at facilitating teaching and learning, and the use of learning outcomes is seen as a key component of their effectiveness. The College has proactively addressed faculty members' participation in SLO development and assessment by making it a part of the evaluation for all faculty. During the evaluation process, the evaluator is asked to evaluate the faculty member's participation level in creating, assessing, and/or discussing SLOs. Most faculty members are now fully engaged in using the SLO assessment process to improve their instruction and student learning.

Methods of assessing SLOs and the discussion and analysis of the results vary from department to department; some departments and individual faculty members are more deeply engaged than others, and the EPA Committee strives to continually increase engagement levels. Nonetheless, all departments participate in discussions related to SLOs. Some of the most extensive discussion related to SLOs occurs in committees such as the Online Education Committee, Curriculum Committee, and the Educational Planning and Assessment Committee. Faculty members from various disciplines serve on these committees, sharing their experiences and insight and carrying the discussion back to their respective departments and College wide during professional development activities.

Administrators are asked, as part of their annual self-evaluation, to identify their accomplishments based on SLOs and AUOs in their division. The participation of classified managers and staff in activities related to SLO and AUO assessment is considered as part of their evaluation as well.

The institution maintains a sufficient number of qualified faculty, which includes full time faculty and may include part time and adjunct faculty, to assure the fulfillment of faculty responsibilities essential to the quality of educational programs and services to achieve institutional mission and purposes. (ER 14)

EVIDENCE OF MEETING THE STANDARD

The College maintains an appropriate number of full-time and part-time faculty to ensure the quality of its educational programs and services. Moreover, the College recognizes the importance of having as many full-time faculty as possible. The California Code of Regulations, Title 5, Section 51025, requires each community college district to employ a

specified minimum number of full-time faculty. This requirement is expressed in terms of full-time equivalent positions and is commonly referred to as the full-time “faculty obligation number” (FON). Title 5, Section 51025, also requires community college districts to increase the number of full-time faculty annually in proportion to the amount of growth in credit-funded full-time equivalent students (FTES). In Fall 2015, the SOCCCD’s total Full-Time Equivalent Faculty was 381.2 for both Colleges in the District; this figure exceeds the full-time faculty obligation number (FON) of 366.8 for SOCCCD (III.A.7-1).

It is generally recognized campus wide that a robust team of full-time faculty are needed to effectively carry out the work of the College, especially as faculty duties related to evaluating and improving student learning outcomes, student equity, and student success have increased. As such, the college maintains a full-time faculty number for classroom and non-classroom faculty that is above the FON required by the California Community Colleges Chancellor’s Office (III.A.7-1) (III.A.7-2). College data show that from 2012 to spring 2016, full-time equivalent faculty have increased 15.5 percent, classified staffing increased 3.2 percent, and administrative and management staffing 16 percent. In this same time period, student enrollment was relatively unchanged (III.A.7-3). While some of the new classified and management positions were categorically-funded, the creation of these positions has enabled the college to meet new requirements related to initiatives such as matriculation, student success, and student equity.

Staffing for new full-time faculty positions is determined through a process that incorporates recommendations from the Faculty Hiring Prioritization Committee, which includes consideration of indicators of the sufficiency of faculty staffing levels contained in the program reviews, as well as analyses conducted by the college President that includes a broad view of the college’s mission and goals as well as fiscal considerations. Part-time faculty are hired on an as-needed basis to ensure that sufficient classes are offered in order for students to complete their program of study in a timely fashion.

ANALYSIS AND EVALUATION

The College has a variety of practices in place to ensure that a sufficient number of full-time and part-time faculty are maintained to fulfill all the responsibilities essential to the quality of educational programs and services at the College. The Faculty Hiring Prioritization process uses institutional and program review (PR) data to identify faculty needs and to ensure that those programs with the most demonstrated need are ranked highest. The actual number of full-time faculty hired is determined by the President based on these demonstrated needs, on College priorities determined through planning efforts, on the requirements of maintaining staffing levels above the FON, and on the College budget. PRs increase the correlation between institutional planning and staffing decisions to provide an improved methodology for maintaining the appropriate level of faculty required to maintain the depth, breadth, and responsiveness of the College’s quality programs and services.

Full-time faculty have a vested interest in the College and its students and contribute significantly to the success of its programs. Because of these factors, hiring more full-time faculty where needed has enhanced the quality and diversity of our program offerings.

In all programs and services at the College, part-time faculty are utilized when needed to fill classes and meet counseling and library needs. Each department maintains a pool of part-time faculty that can be hired when the need exceeds the current number of part-time faculty within the department.

8. *An institution with part time and adjunct faculty has employment policies and practices which provide for their orientation, oversight, evaluation, and professional development. The institution provides opportunities for the integration of part time and adjunct faculty into the life of the institution.*

EVIDENCE OF MEETING THE STANDARD

Part-time faculty at Saddleback College are seen as an essential component of student success and are, therefore, provided with all the tools necessary for their full integration into the life of the institution.

When hired, all part-time faculty at Saddleback College participate in two orientations. The first orientation is led by OHR prior to their start date and provides employment information on a number of important topics including benefit options, and procedures. The list of topics covered during this orientation includes contact information, designation of beneficiary, employment eligibility verification I-9, Title VII questionnaire, workers compensation, employee's withholding allowance certificate W-4, direct deposit, TB testing, parking permits, CalSTRS retirement salary schedules, pay dates, verification of academic and occupational work experience, Workday, network access, MySite, employee benefits, optional benefits, the grievance policy and complaint procedure, HIPPA notice of privacy practices, safety campus map, academic calendar, and the faculty employment agreement (III.A.8-1).

The second orientation occurs within the department or division in which the part-time faculty member will be working. These orientations are typically led by the department chair and includes details regarding the actual assignment and College and division procedures and policies. This orientation typically includes course syllabus design, handling registration emails, managing the faculty profile, downloading class rosters, add permit codes, navigating MySite, ordering textbooks and other resources through the College bookstore, maintaining a voicemail box, audio/visual instructions, referral for student conduct violations, employee identification card, library services, tutoring services, copy center, Faculty Center for Student Success (FCSS) offerings and other opportunities for professional development, college committees such as the Academic Senate, and Faculty Association membership.

A third optional training is provided by the Faculty Center for Student Success. Part-time Faculty get one on one training on how to use Blackboard, create an official class website, and assistance with processes related to the aforementioned training topics (e.g. faculty profile, class rosters, etc.)

All professional development opportunities available on campus are open to part-time faculty, and they are encouraged to participate. At times, a stipend is offered to part-time faculty for their participation. Each year, the College offers nine full-days of professional development activities during the Professional Development (PD) Week that precedes the start of each semester. During fall PD Week each year, the President hosts a part-time faculty dinner and resource fair, where they are given information on how to effectively participate in the academic and professional life of the College. For the past two years, a stipend was provided for all part-time faculty who attended this dinner, and this has greatly increased participation in the event (III.A.8-2).

In addition, through the Academic Senate part-time faculty can apply for up to \$600 to participate in outside professional development activities such as discipline-specific or teaching and learning conferences (III.A.8-3). Part-time faculty are encouraged to participate in college initiatives that frequently include professional development. These initiatives include AVID for Higher Education, grant-funded professional development (e.g. the STEM guitar workshop, Perkins-funded conference attendance, faculty externships), and categorically-funded professional development (e.g. through the Student Support and Success Program, the Basic Skills Initiative, and the Student Equity Plan). On-campus conferences open to both full-time and part-time faculty include a regularly scheduled CTE Conference, a Student Success Conference, and an Online Education Summit. Another professional development resource available to part-time faculty include workshops and one-on-one technical and online teaching training in the FCSS. The FCSS also maintains a website with significant resources available to part-time faculty including the *Faculty Guide to Online Education*, an effective online teaching rubric, and tips to increase student retention, among others.

Oversight and assistance for part-time faculty is included in the job description of division deans and in the board policy on the duties and responsibilities of department chairs (III.A.8-1). This oversight, which includes informal meetings, formal evaluations, and ongoing training and dialogue, ensures the highest quality of instruction and service by part-time faculty. As discussed in III.A.5 above, all part-time faculty are evaluated their first semester and every three years thereafter per the Academic Employees Master Agreement. The evaluation process is conducted through the division dean with assistance from the department chair. Part-time faculty are invited but not required to attend all division and departmental meetings and to become active in college committees. Moreover, the most recent faculty contract (2015-2018) incorporated payment for student consultation time into the part-time salary schedule.

ANALYSIS AND EVALUATION

As part-time faculty teach a significant number of classes at the College and provide valuable services to students in counseling and the library, the College recognizes the need to fully-integrate part-time faculty into the life and culture of the institution. The College's employment practices provide a comprehensive orientation to the policies and practices of the College and District, professional development opportunities, ongoing oversight and assistance, and regular evaluation for part-time faculty.

9. *The institution has a sufficient number of staff with appropriate qualifications to support the effective educational, technological, physical, and administrative operations of the institution.* (ER 8)

EVIDENCE OF MEETING THE STANDARD

The College has processes in place to determine its human resources needs. As previously mentioned, the College follows a standardized hiring prioritization process for faculty and staff positions. These processes are designed so that information from program and administrative unit reviews, other institutional data, and college priorities are considered in the ranking decision. Needs for classified manager and administrative positions are also informed by administrative unit reviews and other institutional data; these positions are fewer in number and are not formally ranked through the college's resource allocation process but are vetted through the compensation board, which is comprised of constituency group representatives.

Each administrative and student support unit on campus determines its staffing needs primarily through the AUR process. Classified staff, manager, and administrator requests are made through the College's resource allocation process and submitted into TracDat. During this AUR process, the need for classified staff is reviewed by considering department or unit needs and larger institutional needs and priorities as identified in the strategic planning process and the college budget. Needs are prioritized at the department/division level and then by the Vice Presidents of each area prior to being presented to the College Resource Committee for review. This is an annual process, which results in a funding for the position in the current year, deferral of funding to a future time, or non-funding.

The qualifications for each job vacancy are linked to position requirements and responsibilities and to standards established by OHR. OHR establishes hiring criteria by matching position requirements and responsibilities to industry standards. SOCCCD has established comprehensive practices to assure that qualifications for each position are closely matched to specific program needs and serve to support the goals of students. Job descriptions for classified staff, administrators, and classified management positions are posted on the job site. Human Resources technicians review all applications to ensure all applicants meet the position qualifications related to education and experience.

The table below shows the number of years of service for each employee; the personnel turnover rate at Saddleback College is low, and there have been very few terminations, indicating a good match between new employees' qualifications and their job responsibilities.

Count by Employee	<1 Year	1-4 years	5-9 years	10-14 years	15-19 years	20 years or more	Grand Total
District Services	9	19	25	16	13	14	96
Academic Administrators			1	1	1		3
Classified Administrators and Managers	2	6	9	6	5		33
CSEA	7	13	15	9	7	9	60
Saddleback College	51	139	121	95	58	113	577
Academic Administrators	2	5	9	2	2		20
Classified Administrators and Managers	5	6	2	5		10	28
CSEA	29	60	64	44	25	51	273
Faculty CTA	15	66	4	1	31	50	249
POA		2	2	1		2	7
Grand Total	60	158	146	111	71	127	673

ANALYSIS AND EVALUATION

The college has a sufficient number of staff to support the effective educational, technological, physical, and administrative operations of the institution. Where staffing levels are too low, staff planning processes are in place to ensure that issues documented in AURs inform staff resource request approval processes. Hiring practices ensure that staff have the qualifications they need for their positions. While classified staff hiring processes seems to be slow, the college and OHR are collaborating to implement a pilot process to improve these processes.

- The institution maintains a sufficient number of administrators with appropriate preparation and expertise to provide continuity and effective administrative leadership and services that support the institution's mission and purposes.*

EVIDENCE OF MEETING THE STANDARD

Saddleback College's senior management staff includes the College president, three vice presidents, and an assistant vice president of institutional effectiveness. In addition to the senior staff, the College employs 15 deans and other academic administrators and 35 classified managers. This complement of administrators and managers provides the leadership and expertise needed to ensure that the College fulfills its mission.

The administrative structure of the College is informed by AURs and the College Resource Committee (CRC) process previously described. Administrative reorganizations, however, are subject to approval by the chancellor and the board of trustees. In the past year, the college created one new administrative position, the associate vice president of institutional effectiveness, in order to ensure leadership for several important college initiatives. The need for the position was identified in the appropriate AUR and was vetted through the College's shared governance process. Classified staff, faculty, and all leadership personnel had an opportunity to review and provide input on the recommended reorganization before the recommendation was forwarded to the chancellor and the board of trustees. A statewide comparison of the number of students per administrator shows that Saddleback College is ranked 52 out of 113 California community colleges by college size (III.A.10-1).

The administrator recruitment and hiring processes outlined in sections III.A.1 and III.A.3 describe how the college ensures appropriate expertise among administrators. Saddleback College's Management and Administrative team has participated in an ongoing professional development series, "From Group to Team", which has supported the development of a cohesive management team at the college. The college was recently selected as one of the nation's "Great Colleges to Work For" based on a survey administered by the Chronicle of Higher Education. These survey results are an indication that the administrative team at the college is effective (III.A.10-2).

ANALYSIS AND EVALUATION

Saddleback College maintains an efficient number of administrators with appropriate preparation and expertise to provide effective leadership in support of the institution's mission and purposes. A statewide comparison of all districts indicates that Saddleback College has a median number of administrators across all colleges and districts in California. Administrators engage in ongoing professional development to ensure effectiveness.

11. *The institution establishes, publishes, and adheres to written personnel policies and procedures that are available for information and review. Such policies and procedures are fair and equitably and consistently administered.*

EVIDENCE OF MEETING THE STANDARD

The SOCCCD and Saddleback College strive for fairness and equity in all employment practices, and various policies and regulations are developed towards this end. A districtwide policy committee, the Board Policy and Administrative Regulations Advisory Council (BPARC), which represents all constituency groups, is charged with identifying and recommending all policies of the district, including those that are legally required by state

and federal law and by the accreditation commission. The BPARC maintains a systematic and periodic review of all existing District policies to ensure that they are legally current and in accordance with the provisions of Title 5 of the California Code of Regulations. Draft policies and administrative regulations developed by BPARC are sent out for review by all constituent groups. When feedback is received, a final draft is developed by BPARC, approved, and then forwarded to the chancellor for review and submission to the board of trustees for approval and adoption. This is an ongoing process that ensures that existing policies are reviewed regularly and new policies are developed when needed in order to maintain the district's commitment to unbiased and impartial treatment of its employees.

Reporting to the vice chancellor for business services, BPARC is the consultative body for policies and regulations. The council is composed of the three district vice chancellors, the vice presidents for instruction and vice presidents for student services from both Redwood College and Irvine Valley College, a classified leadership representative, an academic dean from both colleges, the Academic Senate presidents from both colleges, the Classified Senate presidents from both colleges, the SOCCCD Faculty Association president, the CSEA president, and ASG representatives from both colleges (III.A.11-1). BPARC meets approximately every two weeks. Support for BPARC's work is provided by the California Community College League's Board Policy and Administrative Procedure Service and by a consultant hired to oversee the process of board policy and administrative regulation revision and development. Through the league's policy and procedure service, the District is provided with regular updates of any legal or regulatory changes as well as legal opinions that may impact district policy.

Board policies and administrative regulations are divided into seven series including bylaws, community relations, administration, business, human resources, students, instruction, and speech and advocacy. They are available to all employees on the District's website and through the document link in MySite, the District's information portal (III.A.11-2). Board policies, administrative regulations, and collective bargaining agreements govern the personnel practices at the College and District. All personnel board policies and administrative regulations are located in the 4000 series on human resources. They are developed and widely disseminated to ensure that District policies and procedures regarding areas such as hiring procedures, equal employment opportunity, harassment and discrimination prevention, evaluation of employees, and resolution of employee complaints are applied fairly and consistently. The review and revision of board policies and administrative regulations for all human resource-related items is conducted by BPARC in collaboration with OHR as well as the various employee organization.

All hiring committees have an Equal Employment Opportunity (EEO) representative to ensure that selection procedures are applied fairly and consistently. EEO representatives are required to attend training prior to serving on the committee in this capacity. All employees who participate on a hiring committee are required to receive EEO training as well, and to complete confidentiality and conflict of interest statements prior to the screening and selection process. The EEO training outlines the laws regarding discrimination and the roles

of the EEO representative, the committee, and the committee chair. A majority of Saddleback College administrators and managers and many faculty have completed EEO training and are able to serve in the capacity of EEO representative on hiring committees (III.A.11-3).

In addition to board policies and administrative regulations, many personnel items are contained within the negotiated collective bargaining agreements relating to specific categories of personnel. The following collective bargaining agreements are in effect:

- Faculty – Academic Employee Master Agreement, 2015-2018 (III.A.11-4)
- Classified Staff – CSEA Contract, July 1, 2012 – June 30, 2015 (III.A.11-5)
- Police Officers – Police Officers Association Master Agreement, July 1, 2012 – June 30, 2015 (III.A.11-6)

Grievance procedures, which deal with contract violations, are defined under the individual employee agreements. Procedures governing grievances, procedures and appropriate forms can be accessed on the Human Resources page of the District's SharePoint site. OHR is responsible for ensuring that grievance procedures are consistently and fairly administered.

The SOCCCD Harassment Policy and Complaint Procedure Handbook, which outlines the various types of harassment that can exist and the procedures to follow if a student, employee, or third party believes that he or she has been harassed, is available to all on the District's website (III.A.11-7). An *Unlawful Discrimination Complaint Form* is also available on the website.

Questions about existing policies and regulations can be referred to appropriate administrator for clarity or directly to the OHR. OHR staff routinely address a range of questions regarding policy application with the goal of consistency in application and administration.

Changes in policies and procedures that are pertinent to specific employee groups are communicated to administrators and relevant employee organization, who, in turn, communicate information about the updated policies to employees.

Policies concerning discrimination, sexual harassment, and equal employment opportunity, and reporting procedures, exist in board policies and administrative regulations 4000.4 (III.A.11-8), 4000.5 (III.A.11-9) (III.A.11-10), and 4000.6 (III.A.11-11). Training in prevention of discrimination and harassment is required of all administrators and managers, and is held regularly during the College's PD Week. Equal employment opportunity training is available to all employees, and is required for EEO representatives serving on hiring committees.

ANALYSIS AND EVALUATION

Personnel-related board policies and administrative regulations are systematically developed and updated on an ongoing basis through a consultative process that includes all constituency groups to ensure the policies are fair and in accordance with law and collective bargaining agreements. All personnel policies are currently either up-to-date or are in the revision process.

Board policies and administrative regulations are posted on the District website and are also available to all employees through MySite. The District is quick to follow up on any known or reported policy violation, and investigates if necessary.

12. *Through its policies and practices, the institution creates and maintains appropriate programs, practices, and services that support its diverse personnel. The institution regularly assesses its record in employment equity and diversity consistent with its mission.*

EVIDENCE OF MEETING THE STANDARD

The College demonstrates its commitment to equity and diversity through its board policies and administrative regulations, its hiring practices, its grievance, complaint, and problem solving practices, and campus initiatives and activities for employees and students.

Moreover, the College's values statement, the Student Equity Plan, the Staff Development Plan, and Associate Student Government program among others, reflect the equity and diversity tenets addressed in Board policies and administrative procedures. The district's updated Equal Employment Opportunity plan is instrumental in support staff diversity.

Board policy 4010, entitled "Commitment to Diversity," sets the tone the entire District in relation to this commitment. It reads:

The District is committed to employing qualified administrators, faculty, and staff members who are dedicated to student success. The Board recognizes that diversity in the academic environment fosters cultural awareness, promotes mutual understanding and respect, and provides suitable role models for all students. The board is committed to hiring and professional development processes that support the goals of equal opportunity and diversity, and provide equal consideration for all qualified candidates (III.A.12-1).

These ideals are contained within many of the board policies that deal with fair employment practices, harassment and discrimination prevention, conflict of interest prohibitions, academic freedom, speech and advocacy, and student equity.

In addition, the SOCCCD Equal Employment Opportunity Plan, 2016-2019, reflects the district's commitment to these principles in its hiring practices (III.A.12-2). SOCCCD does not discriminate in employment on the basis of race, color, ancestry, national origin, religious

creed, sex, physical handicap, medical condition, age, sexual orientation, or marital status and is subject to Title IX of the Education Amendments of 1972, Title VII of the Civil Rights Act of 1964, as amended, Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, and California Labor Code 1102.1 (III.A.12-3). It is the District's policy to ensure that all qualified job applicants have full and equal access to employment opportunities and are not subjected to discrimination in any District program or activity. The District has an Equal Employment Opportunity (EEO) officer, who is also the Assistant Director of Human Resources. The EEO officer is responsible for ensuring that hiring committees comply with board policy and with established hiring procedures so that applicants receive fair and equitable treatment. The district's EEO Officer compiles and analyzes data related to applicant pool and workforce composition to monitor plan effectiveness and inform plan revisions (III.A.12-4) (III.A.12-5).

Moreover, all permanent positions require that applicants show "Evidence of sensitivity to and understanding of the diverse academic, socioeconomic, cultural, disability, and ethnic backgrounds of community college students," and this statement is contained on all job announcements.

The College's commitment to recognizing and addressing the importance of equity and diversity is demonstrated by the College's values statement, which guides the implementation of the College Mission Statement. One of the values listed in the statement is "inclusiveness," which holds that "We cultivate equity and diversity by embracing all cultures, ideas, and perspectives" (III.A.12-6).

College initiatives such as the development of the Student Equity Plan engage students, faculty and staff from across the college in discussions about diversity issues and the development of action plans to reach to underrepresented populations and serve students from various backgrounds. These discussions have referred to the need to support diverse personnel as part of a student engagement strategy. Other practices that support the college's diverse personnel include the participatory governance structure, grievance procedures, and a new problem-solving workgroup that provides support for addressing numerous issues that may arise in a diverse workplace.

ASG also financially supports campus activities, group projects, and a variety of events each year that support cultural diversity. Additionally, faculty and staff are invited to apply for grant funding for their own projects (III.A.12-7). The student clubs that foster appreciation of different cultural experiences include Appreciation of Pilipino American Culture (APAC), the Black Student Union, the Campus Crusade for Christ, the Christian Students Club, the Gay & Straight Alliance, the German Club, the Latin American Film Club, Latter-Day Saint Students, and the Muslim Student Union (III.A.12-8). Through the efforts of the International Student Program Office, the College makes every effort to integrate the international student population into campus life (III.A.12-9).

The Academic Senate also has an Equity and Diversity Committee that address diversity programing, teaching about diversity, recognizing different needs within a classroom, and hiring for diversity. This committee has been inactive for the past several years, but is in the process of being reformulated and revitalized.

ANALYSIS AND EVALUATION

Saddleback College and the SOCCCD support diversity on an ongoing basis. The District and College have established policies to address equity and diversity issues for all employees and students of the College. The policies are applied consistently and fairly (III.A.12-10).

The District is committed to administering hiring and staff development processes that support both equal opportunity and diversity and that provide equal consideration for all candidates as required in Federal and State law.

College faculty, staff, administrators, and managers recognize and celebrate diversity through various programs and within classes. Each year employees participate with ASG in the planning and execution of Multicultural Week, and departments hold a variety of activities that deal with diversity issues such the Teach-in On Día de los Muertos events, etc.

13. *The institution upholds a written code of professional ethics for all of its personnel, including consequences for violation.*

EVIDENCE OF MEETING THE STANDARD

The District and the College have written policies that provide standards for ethical conduct of its personnel to encourage them to conform to such standards as stated in Federal and State laws and by professional educational organizations. These policies also delineate processes for resolving internal disputes in a collegial and ethical manner.

The Board of Trustees sets standards for the conduct of its own members through Board Policy 150, Code of Ethics/Standards of Practice, for Members of the Board of Trustees (III.A.13-1). Additionally, the Board's prohibitions against divided loyalties (e.g., financial interests, contracts and holding incompatible offices) and the requirements of disclosure of certain economic interests are addressed in Board Policy 154 and Administrative Procedure 154, Conflict of Interest (III.A.13-2). All designated employees must abide by Administrative Regulation 4000.9, Conflict of Interest Code (III.A.13-3), which stipulates that must not make decisions based on their own financial interest or of their relatives or business associates. Together, these policies and procedures embody the institutional Conflict of Interest Code required by California law.

Each College employee group has a code of ethics:

- Administrators and Managers are expected to abide by the South Orange County Community College District Administrator and Manager Statement of Ethics (III.A.13-4)
- Faculty are expected to abide by the Academic Senate's Faculty Code of Ethics and Professional Standards (III.A.13-5)
- Classified staff are expected to abide by the CSEA Code of Ethics and Classified Senate Code of Ethics (III.A.13-6)
- The Police Officers are expected to abide by the Law Enforcement Code of Ethics Statement (III.A.13-7)
- Students are expected to abide by the Student Code of Conduct as printed in the student handbook, and the Associated Student Government Code of Ethics (III.A.13-8)

Any unethical behavior is addressed through management and administration, through the evaluation process, or through specific procedures outlined in board policies and administrative regulations.

In addition, all constituents of the College, including students, staff, faculty, and management, worked together on a joint "Statement of Mutual Respect and Collegial Behavior," as described in I.C.8 above, and, in January 2016, Consultation Council approved an "Interpersonal Conflict Resolution Recommendation" that encourages all employees to participate in "professional development and training on topics including interpersonal conflict resolution, abusive conduct, effective communication, and pertinent state and federal legislation, board policies, and administrative regulations." The goal is for the recommendations to be a living document that fosters an environment of professional development, communication and collegiality.

ANALYSIS AND EVALUATION

While the College does not maintain a single college wide code of ethics pertaining to all employees, each constituent group maintains its own code of conduct (III.A.13-9) (III.A.13-10) (III.A.13-11). In addition, the College has reinforced the expectation of ethical behavior through dialogue resulting in the joint "Statement of Mutual Respect and Collegial Behavior" and "Interpersonal Conflict Resolution Recommendation." (III.A.13-12)

The institution plans for and provides all personnel with appropriate opportunities for continued professional development, consistent with the institutional mission and based on evolving pedagogy, technology, and learning needs. The institution systematically evaluates professional development programs and uses the results of these evaluations as the basis for improvement.

Both Saddleback College and the SOCCCD recognizes the importance of professional development for all its employees, as evidenced in the fact that one of the primary objectives in the 2014-2020 integrated strategic plan is to "increase professional development that potentiates employees' talents and interests" (Objective 1.4).

In order to meet this objective, numerous professional development opportunities are available for employees of all classifications. These include opportunities made available within the District and at the College, as well as the provision of funding for external professional development opportunities. Wherever possible, professional development offerings and activities are linked to the College's mission, vision, and values (III.A.14-1) (III.A.14-2).

Each year, the College holds a PD Week, sometimes referred to as "Flex Week," prior to the start of the fall and spring semesters. As part of the state's flexible calendar plan for the promotion of professional development, the District's academic calendar is able to devote nine of the required 175 annual teaching days to professional development. The Faculty Development Flex Committee of the Academic Senate oversees the planning and implementation of PD Week activities (III.A.14-3). Ideas for activities are solicited from the college community and through an employee survey, results from surveys taken during previous professional development activities, and discussion during the Academic Senate and other college committee meetings. Although organized through the Academic Senate, PD Week also includes a variety of activities for classified staff, managers, and administrators as well.

Per the faculty contract, all full-time faculty are required to participate in professional development activities for a minimum of 38 hours during each academic year (III.A.14-4) (III.A.14-5). Faculty may elect to participate in the College's PD Week to earn these hours, through other opportunities that are offered throughout the year, or through attendance at an external conference related to their assigned duties. Faculty can also apply to undertake and complete an individual project related to staff, student, or instructional improvement. To receive credit for outside conferences or individual projects, the faculty member must complete an evaluation form demonstrating how this activity benefited the individual and/or the College. This form is reviewed and approved by the Faculty Development Flex Committee before credit is granted (III.A.14-6).

The College Academic Senate, the faculty association, and OHR jointly present an orientation program for new full-time faculty during PD week and notify them of this obligation. Additionally, all probationary faculty are expected to provide documentation to their Tenure Review Committee (TRC) that they are actively maintaining currency in their discipline through professional literature, professional memberships, workshops, conferences, or other activities.

In addition to PD Week, various professional development activities are held at the College throughout the year. These include the Institute for Teaching and Learning workshops that focus on teaching and learning strategies, workshops or one-on-one sessions in the FCSS focusing on online teaching, AVID workshops, a CTE Conference, a Student Success Conference, and an Online Education Summit, among many others.

The college supports various professional development opportunities related to online education. In the past, faculty received reimbursement for completing a six-course online educator sequence, which was an in-house program for instructors interested in building their skills as related to online instruction. This program was eliminated after the state developed a similar program through @ONE. Faculty are now encouraged to complete this sequence of courses. However, the lack of an in-house training program has become evident, and the Online Education Committee is currently developing a 10-week certificate program in online instruction to be offered beginning in spring of 2017. Most faculty who teach online continue to be trained on a one-on-one basis with the staff of the FCSS. The center has three instructional technologists on staff to assist faculty in all stages of online course development and refinement. FCSS also offers numerous workshops on online instruction tools and technologies, in addition to other instructional technologies, throughout the year. PD Week offers a host of skills-based workshops and opportunities for faculty to learn about best practices in online education, including new technologies, Canvas, and online teaching pedagogies. AVID offered online education-focused workshops for faculty during the 2015 year, and Quality Matters offered free on-campus training sessions and certification as well. In addition, many faculty have used their professional development funding monies to attend online education-related events and activities such as the Online Teaching Conference, Quality Matters National Conference, Course Design Workshop for @ONE, and other institutions. Annually, the College has begun to host an Online Education Summit that includes dialogue about best practices for faculty and administration. Faculty can also apply for funds to attend outside conferences relating to their discipline or to teaching and learning. The Faculty Development Funding Committee of the Academic Senate is responsible for the distribution of funds available for faculty professional development (III.A.14-7). Currently, funding supports up to \$1,200 for full-time faculty and \$600 for full-time faculty (III.A.14-8). Each year hundreds of funding awards are made to both full-time and part-time faculty to attend conferences or work on independent projects. Professional development funding also provides an incentive for faculty to participate in conference planning, join a professional organization, serve on a panel, present academic papers, and conduct workshops.

Full-time faculty members are eligible to apply for sabbatical and professional development leaves as part of their collective bargaining agreement (III.A.14-9). The sabbatical is intended for the professional enhancement of the faculty member, which shall be to the benefit of the faculty member, his/her College, students, and/or the District. The value of what the faculty member may contribute following his/her return includes, but is not limited to, the areas of pedagogy, curriculum development, and the culture of the College and the community. Per the Academic Employee Master Agreement (III.A.14-5), the number of semesters available for faculty sabbaticals is calculated as 4.63% of the full-time faculty semester/year obligation as reported by the state chancellor's office to the District in the fall of that academic year. Upon completion of sabbaticals, recipients are required to submit a report of activities to the Sabbatical Leave Committee demonstrating their accomplishment of sabbatical goals.

Sabbatical recipients also share their experiences with their colleagues through presentations during PD Week.

In addition, at the discretion of the board of trustees, the District may grant a faculty member a paid or unpaid leave of absence of up to two (2) years for professional development which may include, but is not be limited to, additional schooling and/or training, participation in faculty exchange programs, a project/activity that would benefit the College and/or District, involvement in research efforts, and acceptance of long-term assignments to other higher education institutions, agencies, corporations, foundations, or government (Calif. Ed. Code Section 87768)

Professional development is available throughout the year for classified staff, managers and administrators as well. District Services has provided face-to-face training in Word, the new financial system. The OHR hosts training activities specifically for administrators and managers. Using the results from an annual survey of the District Leadership Team (DLT), OHR designs professional development activities around the top priorities. For a number of years, the legal firm of Liebert Cassidy Whitmore has provided training on topics such as absenteeism prevention, performance management, the Education Code and Title 5, equal employment opportunity, and current developments in workers' compensation. The OHR coordinates and documents the State-mandated harassment-prevention training for all employees, which is conducted annually during PD Week and is also available online. The OHR also facilitates numerous performance evaluation trainings including a program called "FRISK" (Facts Rules Impact Suggestions Knowledge) for all administrators and managers (III.A.14-10).

Classified staff are encouraged to participate in various professional development seminars and workshops. Classified staff are permitted and encouraged, with management approval, to attend PD Week activities, many of which are geared towards staff (III.A.14-11), and other activities that take place throughout the year. During spring break, one day is set aside for districtwide classified staff professional development.

Professional development funds are available for classified staff, and each academic administrator has a modest budget for professional development within their area as well. A Staff Development Committee of the Classified Senate manages a professional development fund and allocates funding on a proposal basis, (III.A.14-12) (III.A.14-13). Classified staff members are required to assess how professional development activities have benefited them and to report what they have learned by completing an accountability form required by the Classified Senate and the Staff Development Committee (III.A.14-14).

Many of the classified staff attend formal classes with the goals of obtaining a degree or an advanced degree. Therefore, besides enhancing their work at the College, they are also provided with assistance in personal growth and advancement in their respective career goals. All permanent full- and part-time classified staff are eligible to receive funding for

appropriate classes, books, tuition, and conference fees. Classified staff are encouraged to participate in different activities throughout the state to broaden their horizons and to create new learning opportunities for themselves and their colleagues. Classified staff members have attended the Community College League of California Conference (CCLC) and the Classified Leadership Institute (CLI), a yearly event sponsored by the California Community College Classified Senate.

The College and the District provide additional professional development training through their websites. Examples include a series safety videos (III.A.14-15), technology training via Lynda.com, and online training videos, job aids, and instruction manuals (III.A.14-16) (III.A.14-17). The Office of Planning, Research, and Accreditation provides support for in-house computer information technology systems, such as TracDat, the outcomes assessment and PR/AUR system, inFORM, the District's data warehouse, and the Chancellor's Office Datamart, among others.

Board Policy 4111, Administrative/Classified Leadership Leave (Without Loss of Pay), provides up to 60 calendar days of leave for all administrators and classified managers (III.A.14-18). Because it is often difficult for an administrator or manager to participate in professional development activities that require an extended period of time, such as a university course or a certification program, this policy is available for such purposes. Administrators are not required to complete a written evaluation of their professional development activities. Instead, they provide oral reports to their colleagues and to their division or unit employees on relevant information (III.A.14-19).

The College solicits evaluation surveys to identify areas of strength and areas that need improvement. The comments from these surveys are incorporated into the planning of future professional development programs and funding opportunities. Through constant reevaluation of programs, the College ensures meaningful professional development activities to all members of the College community (III.A.14-20) (III.A.14-21) (III.A.14-22).

ANALYSIS AND EVALUATION

The College's commitment to professional development for all employees is evident in the number of professional development activities and funding it makes available each year. The total college wide expenditure for all professional development was \$632,393 in 2015-2016 (III.A.14-23). The District and the College provide a wide variety of professional development opportunities to College faculty, staff, administrators, and managers during both PD Week and throughout the year. The College evaluates professional development activities to identify areas of strength and areas that need improvement in order to ensure meaningful professional development activities are available to all members of the College community.

In addition to evaluating the quality of the professional development events, faculty are evaluated on their participation in professional development activities. Full-time faculty are held accountable for their minimum 38 hours of professional development each year (III.A.14-4).

15. *The institution makes provision for the security and confidentiality of personnel records. Each employee has access to his/her personnel records in accordance with law.*

EVIDENCE OF MEETING THE STANDARD

Extensive individual employee data are maintained in electronic form by the OHR. Employee data are managed with strict security and access is limited to Human Resources and supervisory personnel. Hardcopy personnel files, including evaluation forms for all employees, are maintained in secure fireproof cabinets in the OHR.

Medical records are maintained in secure cabinets separate from the personnel files. The District protects all medical information regarding an individual according to the Confidentiality of Medical Information Act (CMIA), Calif. Civil Code, Section 56 et seq., and the Health Insurance Portability Accountability Act (HIPAA), Public Law 104-196 (III.A.15-1). Employee fingerprint information is received and on a secure network computer in an internal, secure location. A Districtwide Records Retention Committee reviews all record-retention systems and makes changes to ensure uniform access and storage.

Each employee has the right to inspect materials in his or her personnel file consistent with state law, board policy, and collective bargaining agreement provisions. A Human Resources employee is present when the records are reviewed and will make photocopies of any documents requested by the employee. The District does not charge a fee for employees to make copies of their personnel files.

Offices and file cabinets in the OHR that contain confidential documents are locked when unattended at the end of each business day.

Board Policy 3310 (III.A.15-2) and Administrative Regulations 3310 (III.A.15-3) explain the process for retaining and destroying records, as described in the Records Retention Manual (III.A.15-4). Human Resources evaluates public records requests and subpoenas served on the College in order to ensure that any release of documents containing personal information conforms to board policy and to state and federal regulations.

ANALYSIS AND EVALUATION

The need for confidentiality of personnel records is continually stressed to all Human Resource personnel. There has never been an incident of inappropriate release of personnel information by Human Resources staff, and no staff member has ever been disciplined for inappropriate handling of personnel materials.

All District and College personnel are made aware of all board policies and administrative regulations that must be followed related to the release of personal, confidential, and privileged information.

Personnel files are maintained in fireproof filing cabinets in the OHR, and only Human Resources and supervisory personnel have access to these files. Employees may also view their own personnel files. There is a sign-out card for each file that records who has reviewed the files. When a file is being reviewed, a Human Resources staff member is present to ensure items placed in the files remain in the files and that no materials are added.

The District is implementing electronic personnel records using two complementary technologies: for historical information in a personnel file that is currently on paper, this information will be scanned and stored in a secure database (Perceptive Software's Image Now application) that is indexed by Employee ID, SSN and Name. For all new personnel information that normally would be placed in the personnel file, this information will be entered into the Districts' ERP, Workday. Portions of these technologies are currently in production and additional features are being implemented.

III.B. Physical Resources

- III.B.1. The institution assures safe and sufficient physical resources at all locations where it offers courses programs and learning support services. They are constructed and maintained to assure access, safety, security and a healthful learning and working environment.**

EVIDENCE OF MEETING THE STANDARD

The College engages in activities to ensure safe and sufficient facilities in all locations where it offers courses, programs, and student support services. This includes regular assessment and evaluation of facilities and the allocation of resources when needed. The processes used by the College and District Services to evaluate the sufficiency and safety of its facilities for renovations, relocations, and the building of new facilities are based upon established criteria and include extensive research, consultation, and dialogue within the appropriate committees. Moreover, the College integrates collegewide facility needs and safety concerns into its planning processes including the College Strategic Plan [IIIB-1], the Educational and Facilities Master Plan (EFMP) [IIIB-1], and the Five-Year Construction Plan [IIIB-1].

The EFMP, which was last completed in 2011 and is currently being updated, provides a blueprint for the College and District through 2031 and serves as the basis for facility expansion and modification decisions and the implementation of expenditures provided to improve facilities. The EFMP includes five-, 10-, and 20-year time horizons. Each year, a Five-Year Construction Plan, derived from the EFMP, is updated and submitted to the CCC Chancellor's Office. This prioritized list of projects for the entire district is developed by the district Facilities Planning Office with input from the presidents of both colleges. The 20-Year Facility, Renovation, and Scheduled Maintenance Plan identifies the College's scheduled maintenance, renovation, and capital projects. These plans are discussed more fully in III.B.2 below.

Facilities planning is integrated into the districtwide and college strategic planning processes. The College participates in the District-Wide Strategic Planning Council whose purpose is to coordinate all district-wide planning [IIIB-5]. The college's Six Year Strategic Plan process was informed by various data sources [IIIB-6] including the Facilities Maintenance and Operations Department Administrative Unit Reviews (AUR) [IIIB-7] and safety inspection reports as commissioned by the Facilities Maintenance and Operations (FMO) management team [IIIB-8]. The Facilities Condition Assessment report of 2015 [IIIB-2] was a result of an integrated planning process to identify building and infrastructure needs and ensure appropriate funding is allocated to address these needs.

The Facilities, Maintenance, and Operations Department (FMO) at Saddleback College regularly reviews these plans and other documents to determine the sufficiency of the College's classrooms, lecture halls, labs, and other facilities. The plans provide direction to guide

development of physical resources to accommodate student enrollment and student use of facilities for all the College's educational programs. For example, in 2014 the college created 613 temporary parking spaces to address the college community need for additional student parking. **ALSO ADD SCIENCES BUILDING AS AN EXAMPLE**. In addition, the College president, the President's Executive Team (PET), and the senior director of facilities review departmental program reviews and the Facilities Master Plan to ensure they are integrated and congruent.

Since the last accreditation self-evaluation, the District and College have invested significant resources into campus buildings. Larger projects include an extensive renovation of a temporary classroom cluster known as "The Village," addition of an Automotive Technology/Transportation building, and the construction of the new Sciences building. These projects are now either complete or nearing completion. Since 2010, \$134 M has been allocated to Saddleback College for facilities upgrades through the basic aid allocation process, described in detail in annex [IIIB-4].

The FMO Department is also responsible for the maintenance of all campus facilities to ensure compliance with District and College plans, to ensure a safe, secure, clean, and accessible environment that is compliant with all state and federal regulations, and to provide adequate maintenance of campus grounds. FMO implements scheduled maintenance and inspection checks of College facilities and equipment, including security checks when appropriate. The senior director of facilities is responsible for overseeing the work of the FMO Department, which operates during normal business hours. In addition, the College also has an evening and weekend administrator program [IIIB-9] through which administrators and deans alternate serving as the point person during these times in order to address problems that arise, perform safety checks, and document and report facility concerns.

The College meets its facilities needs by assessing usage data and conducting evaluations and surveys to ensure the maintenance and safety of all campus buildings. Critical to this success are the monthly reports generated by the Advanced Maintenance Management System (AMMS) [IIIB-10]. The AMMS program allows users to track safety issues and emergency repair work. The user can track work that is performed in each building, who performed the work, and the duration of the project. The AMMS system can also help determine how timely work requests are completed and electronically maintains all records of past work orders. This information is useful in planning work schedules and evaluating staffing requirements.

The senior director of facilities reviews the monthly reports generated from the AMMS work order system and uses them as a management tool to monitor, supervise, and evaluate the workload and services provided at the College. Complaints received are reviewed and changes are proposed, approved, and implemented based on budget feasibility. The College prioritizes the needs identified from statements gathered in this evaluation process, shares accolades with FMO staff as appropriate, and consults on ways to improve services based on relevant factors such as enrollment growth and time constraints.

The equipment that FMO maintains undergoes regularly scheduled preventative maintenance that is tracked in the annual inventory reports. In addition, through the program review (PR)

and administrative unit review (AUR) processes, described in I.x.xx above, each instructional program and student support and administrative unit selects and prioritizes needs to be supported through the resource allocation process. This includes funding for new facilities, equipment, and technology.

Regular assessment and evaluation of College facilities is done through the Facilities Maintenance and Operations Department administrative unit review (AUR) [IIIB-7], safety inspection reports as commissioned by the Facilities Maintenance and Operations (FMO) management team [IIIB-8], and the Facilities Condition Assessment report of 2016 [IIIB-2], which serves to identify building and infrastructure needs and ensure appropriate funding is allocated to address these needs.

In May 2016, Saddleback College received the Facility Condition Assessment Report (FCA) [IIIB-2]. Contracted by South Orange County Community College District in 2012, the final assessment focuses on (6) six main facilities' systems that make up the campus' physical resources: Mechanical, Electrical, Plumbing (MEP), roofs and interior finishes, ceilings, walls, floor coverings and a total evaluation of the campus infrastructure (includes partial mapping), and the underground storm drain system. All systems' assessments for each building are accompanied by a statement of current condition, estimated time of next repair/replacement, and estimated expense. This third-party evaluation of the campus grounds and facilities condition provide an invaluable forecasting/planning tool to assure issues are prioritized in accordance with the campus community's concerns and to address accessibility, health and safety concerns in a timely manner. In addition to the benefits realized by the campus community, the report provides a reliable third-party assessment for state-scheduled maintenance reporting. The FCA report has been integrated and incorporated into a School Dude planning module which houses a 20-Year Facility, Renovation, and Scheduled Maintenance Plan to identify project priorities and can be updated by the college as needed [IIIB-11].

The Office of Instruction selects off-site facilities with input from division deans and is responsible for ensuring that these facilities are adequate and that they are in compliance with relevant safety and security requirements. Prior to contracting with an off-site location, College administration visits each proposed off-site location to verify that it is suitable, meets student and instructor needs, and is safe.

During the semester, administration staff visits the classes to evaluate the instructors and locations, and they work closely with the site owners to ensure the safety of students and College equipment. Faculty provide feedback if any problems arise during the semester, and the responsible dean or the vice president for instruction resolves any issues. If a site proves to be unsatisfactory, that site will not be used again. The College supports the use of off-site classes only when the location chosen meets student needs and on-campus classes are not adversely affected.

Safety

Annually, the Risk Management Department, with input from Keenan & Associates, the District's property and liability carrier, reviews and updates the District's Injury and Illness Prevention Plan [IIIB-9]. The College's FMO staff also participates in monthly on-the-job safety training [IIIB-12]. Keenan & Associates conducts annual inspections (State Wide Association of Community Colleges, SWACC) [IIIB-13] of College facilities to identify any potential safety risks and reports all risks to District Risk Management and the senior director of facilities for correction. The College is committed to maintaining a safe campus and addresses all recommendations in the Keenan & Associates report. Keenan & Associates completes a follow-up audit report to ensure all safety risks have been addressed. Consultation with the units of Disabled Students Program and Services (DSPS), and the Campus Police ensures that the College provides safe ingress and regress travel access to all facilities.

Recently, the Board of Trustees (BOT) approved basic aid funding of \$650,000 to engage ADA transition plan consultation services and approved these services at the February 2016 board meeting. The ADA Transition Plan Consultant, Cordoba Corporation, began surveying all campus buildings and exterior pedestrian pathways in March 2015 to identify barriers to accessibility. All surveys were complete by August 2016. The results of the surveys were entered into a database for analysis and tracking purposes. The issues identified as non-ADA compliant have been prioritized and costs for correction of the items have been estimated. The means of correcting the identified issues vary between adjustments and repairs that can be completed by campus maintenance staff, repairs and reconstruction that require work by contractors, and work that will be included in future building renovations. Funding sources vary as well [IIIB-14]. It is the intent of the District to develop an achievable twelve-year execution plan. The Transition Plan is scheduled to be complete in fall 2016 and will continue to be a tool for analyzing, prioritizing, scheduling and monitoring ADA compliance in the future.

Facilities plans such as the EFMP and the 5-year construction plan are reviewed annually and implemented as appropriate to meet all relevant building, fire, seismic, and environmental health laws and requirements. Facility deficiencies and safety concerns are addressed by developing a prioritized list of project needs and managing those projects (once they are approved) in the weekly facilities management meetings. The Facilities and Safety Committee, a participatory governance committee composed of classified staff, faculty, administrators, and students, ensures that the College complies with established safety standards. The College also has a site witness program to enable members of the campus community to report concerns; this helps to ensure and maintain safety campus wide [IIIB-15].

Be Safe

The Saddleback College Police Department has researched, purchased, and implemented a proactive emergency response system. This new program, called "Be Safe," is a very powerful data-driven tool that will increase our ability to maintain a safe campus and effectively respond to emergencies.

"Be Safe" provides police, fire, swat, and other emergency teams with accurate and detailed

information on floor plans, building demographics, and many other unique features of the campus. This program provides emergency teams and administrators with up-to-date information about any facility on the College campus. In the event of an emergency, this information is instantly accessible, thus allowing critical decisions to implement strategies to protect life and property to be made quickly and effectively.

“Be Safe” is a proactive system, and it facilitates clear communications among College resources and emergency first responders with critical information about the entire campus. This system engages and integrates students, administrators, and emergency response teams and supports Emergency Services and FMO Space Inventory [IIIB-16].

Blackboard Connect™

Blackboard Connect™ is a mass notification system that can be used to inform the College or the District community of time-sensitive situations or just day-to-day events when safety, reliability, efficiency, and speed are needed. The Blackboard Connect™ service provides the College and the District with the capability to reach students, faculty, and staff via voice, text, and email. [IIIB-17].

CISCO AlertMe System on VOIP

The Cisco AlertMe System, or Informa Cast, is a mass broadcast and notification system that can be used by the College Police Department personnel to push immediate voice and text messages to every telephone on campus. The voice-alert messages automatically sound on the telephone's external speakers, and the accompanying text message appears on the telephone's LCD display so the device receiver does not have to be picked up to receive these messages. In 2007, the CISCO AlertMe System proved very useful and helpful in facilitating the real-time evacuation of the campus when smoke from wildfires caused unhealthy air quality campus-wide. AlertMe has also been used to conduct building evacuations during fire drills and in other scenarios conducted by the Saddleback College Police Department and local law enforcement agencies in exercising mutual aid protocols and emergency response procedures [IIIB-18].

College Police Department Equipment Upgrade

The College Police Department has completely upgraded its officers' uniforms and equipment, including less-than-lethal force options, tactical firearms, and light weight ceramic vests to provide protection against large caliber rounds and helmets. All officers have been equipped and trained on the M-4 rifles for active shooter incidents. New digital radios will be replacing the existing analog handheld radios. This will enable better communications between FMO, our IT department and the local law enforcement. Four emergency gas powered generators were also purchased and added to the inventory. These generators are equipped with lights and are capable of providing 110 and 220 ports.

In 2015, three new SUV patrol vehicles have been purchased and are in service by the police department. The vehicles can carry more emergency equipment and can provide as a platform for

in-field command center until a formal base can be established.

All officers have successfully completed the state mandated standard certification program, the Peace Officers Standards and Training (P.O.S.T.), on the upgraded equipment and in the techniques of rapid deployment in response to immediate threats and in critical-incident management.

New Mobile Emergency Operations Center

When the College's Communications Arts Department no longer needed an old recreational vehicle (RV) that was used for Channel 39 and KSBR broadcasts, the Police Department refurbished the RV and transformed it into an emergency mobile command post for the College. Today, the RV serves as a flexible and effective tool for emergency management.

Safety Videos

Ten short playing safety videos have been developed specific to the campus. The videos were intended to provide information during a variety of possible emergency situations such as earthquakes, fires, power or utility outages, active shooter incidents, disruptive students, and other emergency situation. Each video provides resource information and contact information for specific services provided by the college and what to do in emergency situations. The safety videos are available to employees, students, and the public on the Police Department webpage. It is also included during the onboarding process for new district employees. [IIIB-19].

Video Camera System with Access Control Integration

Digital video cameras have been installed and utilized in some buildings. The use of this technology is a force-multiplier for the Police Department. Public hallways and roadways can be quickly checked from the dispatch center and can quickly be used to review incidents that have just happened. As new buildings are being completed, the addition of the video system has been included. Plans are underway to retro-fit existing buildings.

Access Control will be integrated with the video system. This will allow the ability to remotely lock and unlock building doors during emergency situations. As unlawful breaches are attempted, the users of the video cameras can provide suspect information quickly and assist in directing officers to the proper location. All new buildings, including the recently constructed Sciences Building, will have video systems and access control incorporated; long-term goal is to have all buildings with video coverage and integrated access control.

Training

A program to train faculty, staff, managers, and administrators for emergency situations via table top exercises that include a review of plans and practice scenarios has begun. The President's Executive Team (PET) has completed a table top exercise for active shooter incidents and another is planned for delivery to college management personnel and will cover EOC and Policy Team roles and responsibilities. Presentations have been given at the college's Management Team meetings and the 2015 management retreat. Individual departments and divisions have

requested and have been given safety training in their staff meetings.

The College Police Department has been working closely with the Orange County Sheriff's Department (OCSD) for emergency preparedness. In 2014 and 2015 the college participated in live active shooter training scenarios both on the college campus and at a nearby mall, and in 2016 an officer trained with the local SWAT in classroom studies of tactics. The college's Police Chief has attended various OCSD patrol briefings to distribute campus maps and explain locations and routes for active shooter responses. College Police Department has also trained with OCSD for Mobile Field Force (MFF,) which is the county standard training for deployment of personnel during riots or mutual aid incidents. In June 2016, the college's lieutenant led an in-house training on tactics and multiple shooter scenarios.

Evaluation of Facilities Utilization

Effective use of facilities is determined in a variety of ways. The College utilizes the Ad Astra scheduling system to ensure the efficient space use and space allocation. The Five-Year Construction Plan and the six-year Strategic Plan drive decisions and serve as a mechanism for evaluation. Student and employee surveys and ongoing inspections by Administration, District Risk Management, Keenan & Associates and FMO are conducted. In addition, fire inspections and safety inspections are conducted by external entities, and the results are used as a basis for improvement. The results of the most recent employee survey are summarized below [IIIB-20]. Issues that arise unexpectedly are reported on the AMIS maintenance work order system and are addressed in a timely manner.

The Facilities, Maintenance and Operations department reviews College plans and other pertinent documents to determine the sufficiency of classrooms, lecture halls, labs, and other facilities. The Educational Facilities Master Plan, which is updated every five years, comprehensively addresses the College's programs, including those in distance education. Other plans and documents include the 2012 AUO.

According to the 2014 Employee Survey (n=334):

- Roughly 50% of the employees who completed the survey have worked at Saddleback College less than 10 years.
- Most employees feel that campus traffic congestion is a problem. Congestion is most evident during the first few weeks of each semester, when the College normally has a larger influx of new students.
- Most employees feel that while there is adequate parking during the workday, however, majority of employees felt that parking lots are not located favorably in regard to the layout of campus buildings.
- The majority of the respondents feel that the campus has adequate lighting.
- The vast majority of employees are very satisfied with the ease of travel on our campus walkways and pathways.
- Roughly half of the employees that completed the survey feel that Campus Police

officers are highly visible on campus, and over 70% of respondents also feel safe while on campus.

- About 40% of employees perceive that people with disabilities have reasonable access to all campus buildings.
- Majority of the employees feel that their actual physical work environment is adequate.
- More than half of the employees feel that our campus facilities support student learning.
- Most respondents agree that Facilities Maintenance and Operations Department respond to work orders accurately, courteously and in a timely manner.

ANALYSIS AND EVALUATION

The College has various plans and procedures in place to effectively manage physical resources and to ensure access, safety, security, and a healthful learning and working environment. The College planning processes are integrated and are used to identify facilities needs and strategies for accomplishing those needs.

The Advanced Maintenance Management System (AMMS) is a powerful recordkeeping and management tool. This system has the capabilities of providing management with accurate and useful data for decision-making. Management must and will provide additional training to staff to be able to fully generate and utilize AMMS reports. FMO purchased an \$11,000 AMMS upgrade in fiscal year 2015/2016 to increase the effectiveness and efficiency of the system and improve our ability to meet the needs of the College. Some of the new features in the upgrade include enhanced login and approval options, an improved scheduler function, ability to attach files, new reporting options, etc.

A major challenge faced by the College is obtaining funding for new buildings and for upgrading existing facilities and land. The Board of Trustees has not pursued a local bond for new facilities and facilities improvement and instead relies primarily on excess property tax revenue above apportionment to fund facilities, referred to as basic aid funding and described in III.D.1 below. Obtaining state funding and acquiring sufficient basic aid funds for meeting all identified college needs has proven to be a challenge. A positive step in the planning process has been the continued development of the Capital Improvement Committee (CIC). This participatory governance group makes recommendations on major districtwide facilities and related matters [IIIB-21]. CIC is now able to utilize the Facility Condition Assessment report (FCA) to inform its recommendations for facilities funding for the College [IIIB-2].

III.B.2. The institution plans, acquires or builds, maintains, and upgrades or replaces its physical resources including facilities, equipment, land, and other assets, in a manner that assures effective utilization and the continuing quality necessary to support its programs and services to achieve its mission.

EVIDENCE OF MEETING THE STANDARD

The planning documents that drive the building of new facilities and the major renovation of existing facilities and infrastructure are the Education and Facilities Master Plan (EFMP) and the Facilities Condition Assessment (FCA) report. The District, in collaboration with the college and using a consulting firm, oversaw the development of the EFMP utilizing data and information largely provided by the College. The plan evaluated current space inventory broken down by category such as lab, classroom, and office space. An enrollment projection by discipline was established and then a long-term capital plan was developed to meet student needs by discipline. This plan projects out building needs to 2031, and breaks down implementation into three phases. The District and the college are scheduled to update the plan within the next year.

The Facilities Condition Assessment (FCA) report was a multi-stage, comprehensive report that took several years to produce. The FCA describes a physical evaluation of the existing condition of a facility and its systems. The report includes building systems (such as roof exteriors, plumbing, and HVAC), building components (such as chillers, electrical panels, and pumps), equipment inventory (including as photos and data), preventative maintenance schedules, and infrastructure. The findings are used with predictive cost models to estimate current and future funding requirements. The FCA report has been integrated and incorporated into a School Dude planning module which identifies priorities for all identified projects and can be updated by the college as needed [EVIDENCE SCHOOL DUDE 20-YEAR PLAN REPORT].

It is the responsibility of the College and District facilities departments to provide direction and oversight for facilities planning and construction. When planning building renovations and construction projects, the facilities departments review the EFMP as well as the FCA report. These items are prioritized and referenced during the annual cycle for requesting funding.

If a project is included in either these plans then project proposals are submitted and evaluated through participatory governance groups such as the Capital Improvement Committee and the Basic Aid Allocation Resource Committee (BAARC) for funding recommendation. If funding is approved, consultation begins with the department heads and end-users to consider the needs of programs and refine the project components that will meet the needs. The driving forces in building a campus structure are a needs assessment, a campus space review, and of course a review of the appropriate planning documents to integrate with the College's Strategic Plan. The institution and the CMO Department have been engaging in results-oriented planning processes on an on-going basis.

College plans for scheduled maintenance upgrades are developed by the College's Safety and Facilities Committee. As a first step, the Committee reviews the College's Strategic Plan, including its mission and vision, to ensure that the physical needs of all the College's programs and services are being met. Budget planning for physical resources is accomplished through integrated planning; needs identified through PRs and AURs that are in alignment with the college's strategic plan support budget requests for physical resources.

The Safety and Facilities Committee determines and prioritizes service and equipment replacement and maintenance needs. Documentation of meeting agendas and project status reports are recorded.

The Safety and Facilities Committee evaluates the effectiveness of the College's facilities and equipment in meeting the needs of programs and services through the College Resource Committee process. The FMO Department also incorporates college physical resource needs into its own Administrative Unit Report with input from the professional trades and crafts experts on staff.

An FMO project list [IIB-22] lists the current and completed projects and status reports from 2003 to the present. These reports are reviewed in weekly FMO meetings held every Tuesday morning [IIB-23]. The institution uses its facilities effectively by maintaining classrooms that support the recommended cap-load ratio based on FTES. The physical condition of College facilities used by students, community education programs, and the surrounding community is maintained by FMO; FMO's mission is to create an environment conducive to an effective learning experience.

ANALYSIS AND EVALUATION

The College processes ensure effective utilization and the continuing quality necessary to support its programs and services to achieve its mission. The combined efforts of College planning and implementation by the FMO are effective and adequately meet the needs of students, faculty, and staff.

The EFMP has been followed within reasonable limits. Funding availability has led to adjustments to project prioritization. For example, when matching funds from the state were available for the Library remodel, the project moved to the top of the prioritized list. The Gateway project, scheduled to match state funds in 2007, is still in the queue as a final project proposal (FPP) with the state. The Gateway delay provided an opening for the College to reprioritize the stadium improvement project with a projected construction start in October 2017 and a scheduled completion date of January 2019, which is much sooner than was originally planned.

Funding new buildings, scheduled maintenance, and facility and site upgrades continue to be a significant challenge. Facility needs are well researched and documented in reports such as the Facilities Condition Assessment Report, but the unfunded scheduled maintenance needs of the college remain high. The College will continue to work through the CIC process to develop a comprehensive funding plan to address these needs.

Equipment and technology has been well funded. Funds for technology have been allocated to the College through the basic aid allocation process, and regular annual allocations have allowed the College to aggressively fund technology on campus. Specific discussion of funding

for distance education technology is discussed further in III.C., Technology Services.

Table x.x shows total equipment funds expended College-wide.

Table x.x
College Equipment
Expenditures, FY 2009-2010 to
FY 2014-2015

Year	Total Expenditures
2009-2010	\$ 1,255,233.25
2010-2011	\$ 3,167,646.13
2011-2012	\$ 1,307,195.44
2012-2013	\$ 1,803,468.36
2013-2014	\$ 1,868,165.18
2014-2015	\$ 4,900,555.17

III.B.3. To assure the feasibility and effectiveness of physical resources in supporting institutional programs and services, the institution plans and evaluates its facilities and equipment on a regular basis, taking utilization and other relevant data into account.

EVIDENCE OF MEETING THE STANDARD

The College primarily assesses the effectiveness of its facilities in supporting the College's program and services through the PR and AUR processes. Every two years, each program and student support and administrative unit is required to assess its physical resources and to complete a needs assessment. Facilities, technology, and equipment needs identified through the PR and AUR are prioritized for funding on an annual basis through the resource allocation process led by the College Resource Committee (CRC). Long-term needs for facilities, including type and size, are assessed at the program level, and are utilized in the development of future education and facilities master plans.

The Safety and Facilities Committee and the Technology Committee also evaluates requests from the PRs and AURs and each establishes a prioritized list of projects for their area. The CRC integrates the prioritized lists for each type of request (e.g. facilities, equipment, staffing, technology, and other) into a consolidated list.

Evaluation of facilities is also done within areas and divisions. For example, on a regular basis student services, with input from each of the ten managers reporting to the vice president for student services (VPSS), assesses the usage of the Student Services Building and of other buildings and space on campus for delivering student services. Each assessment is shared first with the student services team and then with PET. This evaluation has resulted in improvements such as the mutual usage of space by compatible programs, the moving of programs to more adequate space, the moving of programs due to necessity in a remodeling

process, and better usage of space to improve service to students. While many of these improvements are short-term, the identification of facility needs for delivering student services is integrated into long-term plans, such as the construction of the Gateway Building, which is identified on the EFMP.

The Technology Committee develops and maintains a six-year plan. The Technology Committee plans for and funds both hardware and software needs. The first priority of the plan is to maintain currency of technology in the classroom setting and to fund technology replacement needs. The Committee meets annually to review and revise the Technology Plan based in part on needs requested through the PR/AUR process.

A facilities update is submitted as part of the board agenda every month to ensure the board of trustees has current knowledge of facilities projects.

ANALYSIS AND EVALUATION

The College has multiple ways in which physical resource needs are planned and evaluated. The first step is identifying the needs of each instructional program and student support and administrative unit through the PR/AUR processes. The Safety and Facilities Committee, the Technology Committee, and the CRC, are participatory governance bodies at the College and effectively prioritizing identified needs to best support all programs and services. For facilities projects of larger scope, an annual recommendation is provided to CIC identifying the projects that the College would like to see funded. This participatory governance committee, composed of representatives from both colleges and the District, then advance recommendations for capital projects districtwide and include them in the district's annual budget. This process is considered successful and the committee engages continuous improvement principles.

III.B.4. Long-range capital plans support institutional improvement goals and reflect projections of the total cost of ownership of new facilities and equipment.

EVIDENCE OF MEETING THE STANDARD

The EFMP is the document that drives the building and major renovation of facilities at the College. This long-range plan is the result of an extensive, collaborative process that includes significant participation of College faculty, staff, administration, and students

This plan identifies in detail all existing facilities by building and also addresses circulatory and infrastructure needs. Full-time equivalent (FTES) student capacity needs are curriculum driven, and a plan to accommodate those needs is developed. The FTES projections and programmatic needs are developed by the vice presidents for instruction and student services and are supported by OPRA. This plan includes projected need for classrooms, laboratory space, athletic fields, student service space, office space, parking, and roads. The needs are prioritized and a phased plan was developed. This plan is used to supply the State Chancellor's

Office with updates to the Five-Year Plan regarding District priorities for facilities funding. Implementation of the plan depends on funding sources. As funding becomes available, the College follows the designated order of priority to implement projects. However, a lower-priority project may be advanced to take advantage of available funding. A recent example can be found in the Library Renovation project. This project had a lower priority than Advanced Technology and Applied Science Building renovation and was implemented first due to the receipt of matching State funds.

The College has significant documented scheduled maintenance needs and struggles to meet those needs both from a funding and a human resources perspective. The 20-Year Facility, Renovation, and Scheduled Maintenance Plan available through the college's School Dude planning module serves as an effective tool for documenting the scheduled maintenance needs of the College. This plan is referenced during the review for annual recommendations to the Capital Improvement Committee in accordance with the identified priorities.

The College uses an integrated strategy that considers building processes, plans, and equipment required to plan for total ownership costs of College facilities. District Services facilities planning professionals utilize a formula for new building construction that assumes the initial building cost is only a percentage of the total cost of ownership which includes maintenance and renovation needs. The College president, senior director of facilities, and the vice president for college administrative services evaluate proposed projects and major equipment requests and analyze the anticipated return on investment and the effect the decision will have on the facilities and maintenance budgets now and in the future. They also balance equipment needs that may have higher costs with the educational component and the facilities component.

The planning process is an integral part of ensuring that capital projects support College goals. The budget is driven by the long-term planning process. The process has proven to be effective, as measured by the College's ability to adequately maintain its facilities and project a budget for scheduled maintenance projects.

Over the years, the college has taken a proactive approach to utility savings retrofits and sustainability measures. In 2003, the College installed a 1.5-megawatt cogeneration plant that produces over 8.5 million kilowatt-hours per year. The heat generated by this process is then utilized to supply thermal energy to the College's swimming pool and its buildings. This process results in an annual savings of approximately 350,000 therms of natural gas. And in January 2009, the installation of an absorption chiller was completed. The chiller generates chilled water for air conditioning by utilizing heat generated from the electrical generators. This improvement provides over 400 tons of cooling capacity and will save an estimated 1.4 million kilowatt-hours and \$200,000 per year. This cooling system will provide all of the College's cooling needs during the winter and half of the cooling needs during the summer. The cost for these improvements, \$1.49 million, qualified for a public utility company rebate of

\$408,000. Additional energy efficiencies were gained with Proposition 39 state funding, which enabled the college to install energy efficient LED devices in the parking lot.

Other areas of sustainability that should be noted are the College's recycling program and the use of reclaimed water for irrigation. Each year since 2003 the recycling rate for the College's waste was over 50 percent of the total amount of waste generated by the campus. Since 1995 the College has been utilizing reclaimed water for the irrigation of landscaped areas, resulting in an annual savings of over \$75,000 and an annual reduced consumption of 68 million gallons of domestic water.

ANALYSIS AND EVALUATION

The College continually address its scheduled maintenance needs. The College has spent \$8 million in scheduled maintenance over the past ten years [IIIB-24]. Realizing this is a priority, in 2009-10 the District made this a districtwide goal [IIIB-25]. This goal led to the development of the Facilities Condition Assessment report and a 20-Year Facility, Renovation and Scheduled Maintenance Plan to address facilities needs at Saddleback College.

The College has completed many successful new building construction projects and renovation projects. The College has experienced problems with the "low-bid process," which, unfortunately, does not ensure the best-qualified and most competent contractors. Therefore, on major building construction and renovation projects, management has the burden and expense to guard against subpar quality workmanship, project delays, and contractor errors and misjudgments, which could obviously lead to unnecessary litigation. A Design Build delivery method is employed when it makes sense to do so which allows for greater collaboration; in this method, design and construction services are contracted by a single entity. The design-build process is anticipated to yield better results, such as a lower overall cost. Shorter project duration superior project quality and better contract features and warranties.

Leadership in Energy and Environmental Design (LEED) is a nationally accepted standard that promotes health, indoor air and efficiency in energy and water usage. In alignment with the mission, vision, and values of the College related to sustainability, the College has required LEED building certification for the new Sciences building. The College is committed to sustainability and intends to continue to explore sustainable alternatives, including the feasibility of LEED building certification and other alternatives. The new Sciences building is a gold-rated LEED certified building, and the College will continue to implement sustainable design and building principles throughout the campus as appropriate.

The College's investment in utility savings projects has been significant. In addition to reviewing the criteria for viability, before implementation of utility savings projects the long-range financial impact and the College's mission of sustainability is considered. Sustainability measures implemented at the College have resulted in annual savings of 2.4 million kilowatt-hours, removal from the electrical grid of an additional 8.5 million kilowatt-hours, a savings of 350,000 therms of natural gas, reducing consumption of domestic water by 68 million gallons, and a cost savings of \$905,000. Presently, there are several projects in process that will address

additional sustainability issues. These include the installation of an upgraded energy-management system, a new cool-roof system for the Student Services Building, and an evaluation of campus irrigation systems by the Moulton Niguel Water District.

C. Technology Resources

1. Technology services, professional support, facilities, hardware, and software are appropriate and adequate to support the institution's management and operational functions, academic programs, teaching and learning, and support services.

EVIDENCE OF MEETING THE STANDARD

The College is a large and complex institution that utilizes an array of technologies to meet its institutional goals and objectives. Technology permeates every division and department throughout the College. The roles of the College Technology Services Department and District IT department are closely linked, with each group providing critical services needed to support the College. College Technology Services provides technical support in an array of technologies. Specific categories of technology support at the College are as follows:

Data Network Administration

- Routers
- Firewalls
- Network Switches
- Wired Infrastructure
- Wireless Access Points
- Network Access Control

Desktop Computers

- Faculty, Staff, and Administrative Computers
- Student Computer Labs and Classroom Computers
- Open Access/General Use Computers

Telephones

- Adds, Moves, and Changes
- Call Centers/Phone Trees
- Voicemail
- Fax Lines

Software and Database Support

- End-User Support and Training
- District Application Support

Data Storage

- College Data Storage
- Storage Area Network Management
- Data Backup

Server Administration

- Instructional Servers
- Administrative Servers

Web Administration

- Manage College Web Servers
- Design and Update SharePoint
- Web Applications

College SharePoint Services

- Manage College SharePoint Servers
- SC Cloud-Services

Audio Visual Services

- Boardroom Equipment Operation & Support
- Classroom Media Support
- Equipment Maintenance
- Equipment Installation
- Troubleshooting
- Outdoor Media Systems

- System Maintenance
- System Operation
- Media Services
- Video Duplication

PoE IP-Based Camera

- Configure, Maintain, and Support Cameras and Servers
- Integrate Cameras with Alarm and Video Analytics

Learning Management System

- Support and Train

Applications Development

- Develop and Maintain In-House Applications
- College Specific Software & Database Installation and Support

Printing Management

- Maintain and Support All Printers
- Support All Printing Management Services

Electronic Medical Records

- Support and Maintain System

PoE Access-Control System

- Maintain all the Servers and AD Integration
- Support all Door PoE Access Control System
- Support Integration into Camera System

Instructional Computer Labs

- Collaborate with Instructors to Develop Images
- Troubleshoot
- Software Installation and Configuration

College Technology Services provides technical support for faculty, staff, managers, and administrators. Their hours of operation are from 7:30 a.m. to 8:00 p.m. Monday through Thursday, and 7:30 a.m. to 1:00 p.m. on Friday. There are 13 full-time technical staff, two 60 percent technical staff, an administrative assistant, an assistant director, and a director (III.C.1-1). The staff are qualified to provide support in all of the areas listed. The College's television and radio educational programs use extensive technology. They have dedicated video production specialist staff that assist in supporting these successful and technically adroit programs. Technology Services managers receive text messages via monitoring systems and respond to email after normal Help Desk hours and on weekends.

District manages many core services used by Saddleback, Irvine Valley College, and ATEP. These services include the student information system, the email system, CENIC internet lines, the Enterprise Resource Planning system, Workday, mobile applications, and many other systems that are vital to the operation of the College.

Support—Student Technical Support Hours of Operation & Services Provided

To serve all College students, the Division of Online Education and Learning Resources, under the director of learning assistance, manages two student Help Desks and computer labs on the

second and third floors of the Learning Resource Center. The computer lab on the second floor is a shared space with Liberal Arts and contains 30 computers for the Language Lab and 48 computers for Skills Lab and Open Lab use. The computer lab on the third floor has 46 open lab computers utilized for research and homework purposes. The student Help Desk offer students in both online and face-to-face classes direct technical support via telephone, email, or in person. In spring 2015, the student Help Desks added a live online technical support chat to assist online students. Hours of operation are Monday through Thursday, 8:00 a.m. to 8:00 p.m., Friday 8:00 a.m. to 2:00 p.m., and 10:00 a.m. to 3:00 p.m. Saturday.

Support—Faculty Center for Student Success Hours of Operation

The Faculty Center for Student Success (FCSS) provides faculty with instructional technology training, workshops, and continued support that promotes excellence in teaching and ensures the highest level of student learning for on-campus, blended, flipped, or fully online classes (III.C.1-2). There are three specialists and one office assistant who are available to assist faculty (III.C.1-3). Each semester, the FCSS offers various instructional technology training options, including specific department/discipline sessions, one-to-one assistance, and new faculty orientations as well as the following:

- Use of the campus learning management system (LMS) in both online and face-to-face classes
- Instructional design support for online classes
- Ways to incorporate instructional technology into classes, including the latest technologies
- Teaching and learning best practices specific to all learning modalities
- Managing, training, and implementing captioning strategies
- Training on third-party apps such as VoiceThread, eduCanon, Google, etc.
- Other topics related to instructional technology

The FCSS is open Monday through Thursday from 7:00 a.m. to 7:00 p.m. and from 7:00 a.m. to 5:00 p.m. Friday. FCSS staff offer workshops on a wide variety of topics throughout the semester. Session topics range from the basics of using the LMS to how to create instructional videos in five minutes or less. In order to accommodate varied faculty schedules, sessions are usually between one to two hours and are available at varying times while the FCSS is open. Surveys from both the start and end of the semester determine the best times for these workshops and which classes should be offered in the future.

The FCSS and the online education coordinator collaborate with Irvine Valley College to organize yearly joint college events, such as the Online Education Summit. FCSS also presents several sessions during PD Week each semester. FCSS also offers fully online or hybrid sessions, on topics such as how to get started online and getting started with Camtasia. In addition to the weeklong online sessions, FCSS also provides webinars for desktop learning loops and one-to-one assistance. Finally, the FCSS has a YouTube Channel and participates in various social media

platforms to keep faculty up-to-date with the latest trends in instructional technology and online teaching strategies.

The College's personnel work effectively to support online instruction. There are three full-time staff members dedicated to instructional technology support for faculty (two application specialist II positions, and one instructional technologist). At the College, there are also two full-time positions and one half-time position for student technical support located in the LRC.. Furthermore, the Division of Online Education and Learning Resources (OELR) supports activities at the College that engage students, faculty, and staff with online education. These activities have included the College wide Online Education Summit in November 2015, Week of Workshop (WOW) sessions for students new to online education, and ongoing workshops for instructional technology through the FCSS. FCSS surveys help the center to remain responsive to the needs of faculty and help the center gauge whether it is meeting the needs of faculty. The president's professional development survey included feedback about the support available for online education, learning needs, and future interests. Ongoing feedback from the online education coordinator, dean of OELR, and FCSS supports the distance education programs and services on campus. The online education coordinator also solicits feedback from faculty on services and programs, and then shares this information with the FCSS and the dean of OELR. Finally, there are onboarding opportunities that introduce new faculty to technology skills and best practices in online education. Workshops and one-on-one training at the FCSS help existing faculty to maintain skills. Mentors also help to determine needs for future professional development. Furthermore, the Online Education Committee, District Online Education Committee (DOEC), the Division of OELR and FCSS make recommendations for additional needs.

Support—District IT Hours of Operation

District IT technical staff answer Help Desk calls Monday through Friday from 7:00 a.m. to 6:00 p.m. Additionally, the department has a 24/7 emergency hotline; when users call and leave a message on this line, District IT personnel are notified. District IT management also monitors and responds to email after normal Help Desk hours.

Facilities—Computer Labs on Campus

The College has 50 instructional computer labs located throughout the campus (see: Table 1). With the exception of the FCSS, which is dedicated to faculty use, all of these labs are available to students on campus. There is a total of 1553 computers in these labs. The vast majority of these computers are Windows-based machines with 372 devices operating an Apple operating system. The FCSS operates Mac computers, which have the dual capability of running Windows or Apple operating systems. The Technology Services department maintains and supports all of these systems. There is a continued demand for additional instructional computer labs; each year, different divisions request new computer lab setups. The technology committee created

a new computer lab process to review requests and recommend options to the CRC committee (III.C.1-4).

Table 1. Instructional Computer Labs

Description & Location	Number of Systems

Facilities—Faculty Center for Student Success

The facilities for the FCS offer both a workspace and lounge area for any full-time and part-time faculty member who wish to work or relax. This faculty area includes the following features:

- 10 Mac computers with 26" large screens which are Mac/PC compatible with five additional individual workstations available outside of the lab
- Capability on all computers to operate Windows and IOS
- Microsoft Office suites, as well as Mac Office suites, Adobe Creative Suite, which includes Photoshop and Illustrator, Camtasia video editing tools, as well as others
- Two sound booths equipped with multimedia Mac/PCs, studio-quality microphones and other video creation tools, including Camtasia and Adobe Premiere editing software
- Connected and wireless printers
- Copy machine, scanning capabilities
- Scattered electronic charging stations

- Extra supplies for last-minute needs, such as flash drives, dry markers, erasers, and laser pointers

Facilities—Data Center Funds Allocated

The College has grown through the years, and the demand for technology has skyrocketed. This demand required the deployment and installation of technology that included additional hardware. The College has a main distribution frame (MDF) located on the first floor of the LRC and Library building. The MDF houses all the crucial servers, storage area network (SAN), core switches, and all other technology the College relies on to continue its operations. The MDF has grown organically over the years and now necessitates upgrades to continue properly housing these crucial systems.

A 2015-2016 funding request for \$2.9 million was submitted for approval to address the needs of the MDF. The request was approved, and it is now in the project analysis phase. This funding will ensure all College systems are housed in a data center that contains all the necessary facility requirements.

The District developed the 20-year Education and Facilities Master Plan to address the needs of the College. This plan is updated every five years and includes distance education needs as well as the technology needs for new buildings.

Hardware—Computers

All full-time employees receive a computer and monitor. Based on employee request and approval from an immediate supervisor, a second monitor is set up to aid in efficiency. The majority of employees receive a voice over IP (VoIP) phone. There are numerous printers and multifunction devices where employees can print. Divisions and departments have networked copiers that they use for printing, copying, and scanning. Additionally, the College has a reprographics department which accommodates larger and more complex print jobs.

Student printing is available in instructional labs. Additionally, students can print in any of the multiple locations on campus that have student print stations. Student print stations are located in the LRC, Business/General Studies, Health Science, and science and math buildings. The College is in the process of migrating to a web-based student print system that will allow students to send print jobs from mobile devices, laptops, or through the internet and then release the print at any of the print locations at Saddleback College or Irvine Valley College (III.C.1-5).

Hardware—Audio Visual

All instructional classrooms include a projector, screen, computer, monitor, small speaker, and a teacher desk. Technology Services computer/audiovisual technicians support classroom equipment and provide quick training to faculty and staff on the use of this equipment. Additionally, Technology Services has specialized equipment to assist in outdoor activities that require audiovisual equipment. This specialized equipment typically involves large outdoor speakers, large projection screens, projectors, and cellular hotspots for internet access.

Computer-audiovisual technicians typically attend multiple events during the week to help support various functions throughout campus and provide dedicated audiovisual support. The College submitted funding requests in 2015-2016 and 2016-2017 to refresh the technology in classrooms. The current equipment is showing signs of wear, and given the fast pace of technology, the majority of the rooms cannot accommodate digital connections such as HDMI or mobile phone connections. The Technology Committee developed a standard outlining the minimum level of technology needed in the classroom to assist faculty in the delivery of their lectures. The standard was integrated into the Technology Plan.

The College has made substantial investments in its technology infrastructure. The College has created an air-blown fiber infrastructure with two tubes going to each intermediate distribution frame connecting to the MDF in a star topology. Twelve strands of fiber run between the MDF and each individual intermediate distribution frame (IDF). Additionally, the College upgraded all of its Cisco switches from the edge to the core. Each IDF Cisco switch stack is connected with two 10 Gbps modules creating a 20 Gbps bandwidth path between each IDF and MDF. Two core switches with fiber modules connect each IDF switch stack in a redundant manner.

The College is embarking on a wireless network upgrade. The goal is to have ubiquitous wireless coverage throughout the college, including coverage of athletic fields, parking lots, and roads. Based on the radio frequency (RF) survey conducted, an additional 600 access points will be required to achieve this goal. Funding requests were submitted for 2014-2015, and a subsequent funding request for 2016-2017 was submitted to complete the second phase of the project. A third funding request is being submitted for 2017-2018 to complete the project.

The College's Technology Committee developed a replacement schedule for all computers on campus (see C.1-6). All employee desktop and laptop computers are replaced every four years. Equivalently, all classroom (non-computer lab) computers are replaced every four years. The replacement cycles are balanced between even and odd years to ease the burden on the budgets and technical staff. Instructional computer labs have a different replacement schedule based on the instructional program housed in the lab. For example, computer-aided design (CAD) lab computers are replaced every two years. Meanwhile, the Language Lab computers are replaced every four years. The trickle down of the CAD lab computers moves to other labs that do not require a two-year replacement cycle.

All other technical equipment has a replacement cycle based on its lifespan. For example, projectors are replaced every seven years, while the storage area network (SAN) is replaced every five years.

Software

The College uses a multitude of software to assist in the efficient running of its operation. From instructional program specific software, to the student information system, the College relies heavily on software for its program and departmental operations. The faculty drive all classroom instructional software acquisitions, and program need determine renewals. The assigned technician works closely with faculty members to understand the needs of the program and assist in researching, implementing, and maintaining software to keep the program relevant and meeting the needs of students. Technology Services is responsible for the renewal of instructional classroom software and is allocated a budget to successfully renew the software. The software used in instructional programs is extensive. Technology Services has a budget to renew the majority of non-instructional software with the exception of grant-funded programs.

District IT provides online software systems that enable students and employees access to vital services. Key software tools provided to students include MySite and My Academic Plan (MAP).

MySite

MySite is the enterprise Web portal that provides personalized online services to faculty, staff, and students at Saddleback College and Irvine Valley College (III.C.1-7). It provides students the ability to add and drop classes, view semester grades, review transcripts, track the statuses of classes during registration, access email, view college announcements, change ones mailing address, forward college email, receive appointment dates, order textbooks, store personal links, set automatic reminder emails, and more.

Faculty can use MySite to view their class schedules, download rosters, generate waitlists and late Add/Permit Codes (APCs), submit grades, order books, and manage their class website. Employees can use MySite to perform all of the functions of the student information system.

The District continuously updates MySite software to ensure that it meets the needs of students, faculty, staff, and management. In Fall 2016, a new version, MySite 3.0, will be released. This updated version will feature a student success dashboard that will provide students a unified place to see the progress they are making toward achieving their academic goal(s). MySite 3.0 will be fully mobile responsive and will include advanced search capabilities to assist students in finding the information they need. Additionally, each page will include

tutorial videos produced by the student design team—a group of students who assist the College in the design of all of its systems.

SmartSchedule

The District deployed the SmartSchedule program in 2004 to provide students an intuitive way to find the most appropriate classes that meet their requirements. The District is currently leading a Districtwide work group to update the SmartSchedule to make it mobile friendly and to add additional helpful features. The current program has many rich features, which:

- Allow students to easily browse or search the class schedule including textbook information.
- Provide links to faculty profile information.
- Show the location of classes on a campus map and provide a regional map with driving directions.
- Include a details page with Course Catalog descriptions, topics covered, learning objectives, methods of evaluation, and waitlist counts. In addition, the details page also includes all of the important deadline dates for a given class including the first meeting, drop date, refund date, and the last day to add with instructor permission. Students can also request an email reminder for any date listed.
- Allow students to add classes to their personal shopping cart; this feature can detect registration restrictions prior to their registration appointment. Furthermore, classes are displayed in a day/time grid that automatically expands to their schedule and displays the classes in an intuitive calendar-style format.
- Allow students to request a daily email with the status of the classes in their cart, or students can subscribe to a personalized RSS feed that is updated every 5 minutes.
- Include advanced search capabilities which allow students to find classes matching a wide range of criteria, including keywords in description fields, instructor, location, class length, transferability, subject area and the day/time the class meets.

MAP

MAP is a program which guides students through the process of creating their own academic plan (III.C.1-8). It serves as a self-service tracking system for students and counselors to monitor student academic goals. This planning tool provides the student with a complete list of courses broken out by various categories (e.g. general education, major preparation, electives, etc.) The program is fully integrated with the District student information system, which allows MAP to evaluate a given student's transcript every time the plan is accessed. This feature provides a continuous progress report on how the student is accomplishing his/her goal.

Workday

A key software tool provided to employees is the enterprise software Workday. Workday provides access to employee's vacation information, benefits information, organizational charts, payroll, and, in addition, is the financial system use to develop requisition and purchase orders. The software offers many intuitive videos and job aides that assist employee effectiveness and efficiency. Additionally, financial reports, budgets, and organizational charts are a sample of the various reports found within the system.

LMS and Building Blocks

Currently, the College is evaluating the LMS and considering both Canvas and Blackboard in this discussion. This is an inclusive process that calls for faculty, staff, and management to consider all aspects of a new LMS, including its instructional capacities, costs, support services, and other software/hardware needed to support it. The vendor supports the College's current LMS, Blackboard. The vendor maintains servers externally and provides student and technical support. Contractual service agreements with Blackboard ensure reliability, disaster recovery, privacy, and security.

The College's instructional technologists continuously investigate, pilot, and coordinate licensing for emerging instructional technology that can be easily integrated into the campus LMS. Some of these tools include applications (apps), such as VoiceThread, eduCanon, Turnitin, Google Tools, etc. These plugins are tested then presented to the Online Committee to determine use and/or subscriptions. Some apps may plug directly into the LMS. Some are free or inexpensive tools faculty can use in their classrooms and/or to create content. A good example of this is Monosnap and other video creation tools that faculty can use from their homes.

There is a long list of instructional software installed on computer labs throughout campus. Table 2 provides an example of the software available.

Table 2. Examples of Classroom Software Available to Students

Adobe Suite	Autodesk AutoCAD	Avid
Camtasia Studio	Citrix Tools for Virtual Machines	Dev-PHP
Eureka	Grammar Fitness	Geographical Information Systems
IronPython	Kurzweil 3000	LinQ
Maternity Mania	MathPlayer	Microsoft Office Suite
Microsoft SQL	Microsoft Visual Studio Professional	MODELA
Movie Magic	Packet Tracer	Persian Tutor
Psych Mania	Python	Pro Tools

QuickBooks	Reading Shape-Up	SOLIDWORKS
Soloist	SPSS—Statistical Analysis	TUKAcad
Vectorworks	Windows Operating System	Write It Right
ZoomText	ZXP Series Toolbox	Wireshark

ANALYSIS AND EVALUATION

The College has made significant investments in technology to provide up-to-date technological tools for all areas of the College.

The College uses various mechanisms to evaluate how effectively equipment and facilities meet the needs of programs and services for both classroom and online instruction. The Education and Facilities Master Plan includes information on online education and a 20-year plan, which is updated every five years (III.C.1-9). The District Technology and College Technology plans serve as additional means for evaluating the effectiveness of equipment and facilities related to online education. The FCSS is supported with staff and resources. Equipment in the FCSS is determined through needs assessments, surveys, resource allocation requests and committees, such as the Technology Committee, DOEC, the Online Education Committee and the DTC. These committees evaluate the effectiveness of equipment and facilities dedicated to online education. Basic Aid Allocation Recommendation Committee (BAARC) funding requests reflect the need for additional infrastructure to support online education. The FCSS computer lab and the student computer labs in the Library and LRC Tutoring Center are maintained and updated regularly per the equipment replacement schedule. Wi-Fi services allow students to use mobile devices for their online courses. Additional requests to update Wi-Fi coverage are considered through the DTC's allocation process.

The College has an equipment replacement schedule for labs, equipment, and other needs. Every four years, the College refreshes the technology in offices, labs, and classrooms (III.C.1-10; III.C.1-11). Resource allocation requests allow for off-cycle needs. The LMS is a key feature that supports online education and is maintained at high levels in a collaboration between the District and the College. The District ensures that the LMS has sufficient storage to meet the needs of faculty and students. As the use of the LMS has increased (due to increasing populations and offerings), so has additional support for the LMS through the District and College. Blackboard updates take place during times that will least impact students. Finally, the District has service-level agreements with the vendor Blackboard to ensure reliability, disaster recovery, privacy, and security.

The College's Technology Committee created technology replacement schedules to ensure all hardware is refreshed and meets the needs of the institution. The help desk software allows end-users to provide feedback on the support they receive. The majority of this feedback is positive with end users complimenting the support and expertise provided (III.C.1-

12).Technology. Discussion regarding technology needs take place at Technology Committee, and the committee can make recommendations for funding (III.C.1-13).

The College provides adequate professional support to ensure that the College meets its institutional goals and objectives. There is a firm commitment to providing up-to-date technology to all areas of the campus. The College follows the replacement schedules outlined in the Technology Plan and allocates sufficient funds to continue the refresh cycles.

The facilities provided, 50 computer instructional labs and 1553 computers, are adequate. Upgrades to the College's infrastructure have left the College ready to handle current and future bandwidth demands. Furthermore, the upgrade and expansion of the wireless network will ensure the College meets the needs of a mobile student body and workforce.

2. The institution continuously plans for, updates and replaces technology to ensure its technological infrastructure, quality and capacity are adequate to support its mission, operations, programs, and services.

EVIDENCE OF MEETING THE STANDARD

Technology Plan

The College recognizes the importance of technology and has a Technology Committee whose purpose is:

To engage in collaborative discussions regarding college technology, disseminate information to the campus community, empower students, faculty, and staff through the deployment and availability of technology resources, consider the concepts of universal access and design, and provide direction for technology that advances and supports our strategic plans.

The Technology Committee has broad representation from College constituent groups, including students, faculty, classified staff, classified managers, and academic administrators. The committee is responsible for creating the Technology Plan, reviewing it every year during the spring semester, and updating it accordingly.

An Online Education Committee with heavy representation from faculty across the College engages in collaborative discussions regarding online education. The District has a centralized LMS that is the primary tool for online education. Saddleback and Irvine Valley College have representation in DOEC. DOEC meets monthly and discusses all items related to online education, such as building blocks for the LMS, migration to Canvas, and other topics affecting

online instruction (III.C.2-1). The District Technology Committee (DTC) has representation from Saddleback College, Irvine Valley College, and district services. DTC discusses all items related to technology and creates the District Technology Plan. The District Technology Plan is updated annually. DTC has broad representation from all three entities.

During 2015, the College's Technology Committee worked on creating the *2015-2020 Saddleback College Technology Plan* (III.C.2-2). A draft of the plan was discussed at various. Various governance committees, such as Consultation Council and Management Team, discussed a draft of the plan. The College's Technology Committee approved the final version of the plan in spring 2016 (III.C.2-3). The plan has eight goals and 34 objectives. The technology goals align with the College's strategic goals and with the District Technology Plan goals.

Members of the Technology Committee, with input and feedback from faculty, students, staff, and management, developed the Technology Plan. The objectives were submitted from various areas of the College, reviewed, discussed at length in the Technology Committee, and finally approved and added to the plan. This discussion included engaging in discourse with the responsible parties of the objectives and agreeing on target completion dates.

The College's Technology Committee used four data gathering methods to guide the development of the Technology Plan. First, the committee conducted a successful technology survey in fall 2014 that resulted in 1528 student responses, 65 faculty responses, and 41 staff/management responses (III.C.2-4). Second, the committee had two open forums that were attended by students, faculty, and staff/management (III.C.2-5). One forum took place midday, while the second took place in the evening to provide the College community with multiple options for attendance. An internet blog was the third method of data collection. The fourth method was discussion through various College governance groups. These methods led to the collection of rich data that helped guide the development of the plan. The outcome was data-driven technology goals and objectives that will aid the College in achieving its mission, vision, and strategic goals.

The College strives to meet community, industry, and labor demands. As such, the College is in a constant state of flux. The College has a long-term 20-year construction plan. The Technology Committee developed a set of standards to better assist in classroom-technology construction planning (III.C.2-6). The committee developed these standards to ensure a minimum level of technology in classrooms and to aid architects when designing buildings (III.C.2-7). The standardization of equipment assists in system integration, support, and the maintenance of equipment. Classroom technology standards were embedded into the Technology Plan and are updated, with the rest of the plan, every spring semester.

Administrative Unit Reviews

All divisions and departments submit an administrative unit review (AUR) that outlines unit objectives and needs (III.C.2-8). The AUR documents the need for the technology funding requests submitted by each area. The College uses a centralized planning process to determine the College's technological needs. The College's resource allocation process is the main process used for technology funding requests. Based on their needs, all divisions and departments submit their technology funding requests every year through TracDat. The wing and division/department compile funding requests and submit them to the College Resource Committee, the main governance body that reviews such requests. CRC sends all technology funding requests to the Technology Committee for initial review, feedback, and ranking of high, medium, or low.

Resource Allocation Process

The College engages yearly in resource allocation. During the spring semester, all divisions and departments submit their resource allocation requests, which include technology funding requests. All requests approved are used for budget planning. Additionally, major technology investments of \$150,000 or above qualify for basic aid funding. Basic aid technology requests are submitted annually beginning in December and with a deadline of January. All divisions and departments can submit technology funding requests through the college resource allocation process and/or through the basic aid technology funding process.

The College uses two primary forms of funding for technology projects:

1. General Fund
 - a. Unrestricted: 010
 - b. Restricted : 011
2. Basic Aid or Capital Outlay Fund: Fund 40

The annual planning prioritization and resource allocation process is the College's process for requesting the funding of new technology (III.C.2-9). This process primarily uses general fund for the funding of approved technology requests.

All technology funding requests for basic aid or fund 40 initiate at the colleges or district services. Each entity follows its own process for the creation and prioritization of requests. The College receives all basic aid funding requests from all divisions/departments and the Technology Services department compiles them. These requests are presented to the Management Team, Consultation Council, and Technology Committee. These governance groups provide their input regarding priorities. A list of priorities is created and presented again to these governance groups before voting takes place at the Districtwide Technology Committee.

All entities' technology requests for basic aid funding are discussed and prioritized at the Districtwide Technology Committee. The BAARC makes the final recommendation to the Chancellor (III.C.2-10).

The College and the District recognize the need to support the LMS and related programs (such as Turnitin and LMS building blocks) for the success of online courses; the District and colleges work together to allocate resources to support these needs. In addition, the District has an innovation fund to support new ideas and needs. The College has discussions, research, and analysis as part of the resource allocation process, during which each department and division selects and prioritizes its needs. This information goes to the respective unit vice president for prioritization and then up to the CRC for allocation decisions. Resources are utilized in a variety of ways; for example, new instructional technologies are typically piloted for a year, evaluated by the Online Education Committee, and if they are effective, recommendations are then made to institutionalize those resources. The process is similar for needed equipment or hardware. Requests are made through divisions, and then routed to the appropriate channels during the CRC process as well as the Technology Committee for ranking and consideration.

Technology Replacement

There are two primary replacement schedules. There is a replacement schedule for computer instructional labs. These schedules illustrate each lab and its replacement cycle. There is also a replacement plan for all other computers and operational systems. The computer instructional labs have unique replacement needs due to the various educational programs served by the labs. The College replaces computers based on approved computer-replacement schedules. Figure 1 demonstrates the number of computers replaced in the last three years.

The College retains service maintenance agreements in all instructional software that entitles the programs to the latest software versions (III.C.2-11). This subscription enables instructional programs to stay current with technology and have access to the latest versions of the software. Technology Services technicians, in consultation with individual faculty members, upgrade the software every semester. Furthermore, based on faculty requests, additional licenses are purchased to meet the demands of growing enrollments.

The College is currently assessing the possibility of migrating to Canvas, a new learning management system. A number of discussions and presentations have been conducted to offer faculty various opportunities for feedback and discourse (III.C.2-12; III.C.2-13). Discussion take place in the Online Education Committee as well as at the District Online Education Committee. Information has also been provided to the Academic Senate. The discussion is ongoing with plans to make a final determination in spring 2017.

Figure 1. Number of Computers Replaced by Year

There has been a multitude of infrastructure replacement over the past years. The College has installed an air-blown fiber (ABF) infrastructure that connects every IDF to the MDF with two ABF tubes (III.C.2-14). Twelve strands of fiber are in one tube, leaving the second tube available for future growth and demand. The College replaced all end and core Cisco switches after the ABF upgrade, allowing gigabit bandwidth to all desktops. In 2015, the College purchased a new NetApp SAN and upgraded the controller in the existing NetApp SAN. The SANs are now setup in high availability (HA) mode. Additionally, the College replaced a number of servers to keep up with College demands.

Technology Services plans to expand the deployment of virtual desktop infrastructure (VDI) over the coming years. The department has purchased a Nutanix block as a foundational block to the expansion of VDI. The plan is to virtualize 100 desktops over the 2016-2017 fiscal year. Based on technology survey results, the top two technology items for students and College employees is wireless and classroom technology. Technology Services is embarking on a phased wireless network upgrade. The first phase will cover high-demand areas, such as the LRC, BGS, and student services buildings including the quad external area. Cisco Wave 2 wireless technology will be deployed to expand the wireless network. Phase two of the wireless expansion project will cover all the inside of the remaining buildings. The third phase will cover all athletic fields, open areas, parking lots, and roads. Simultaneously, Technology Services secured phase one funding for the refresh of all classroom technology. The plan is to follow the Technology Committee approved classroom technology standards and deploy these standards in every College classroom.

The College is migrating from SharePoint 2010 to SharePoint 2013 to take advantage of the integration with Office 2013 and mobile technology. SharePoint is the main intranet portal utilized by all committees for data storage and collaboration. Furthermore, Technology Services

replaced the multiple outdated backup solutions currently in place with a cloud-integrated data protection Barracuda backup solution. The Barracuda backup solution protects the College's physical and virtual systems and all institutional data.

ANALYSIS AND EVALUATION

The College has made substantial investments in its technical infrastructure. The College set up an air-blown fiber infrastructure that provides two tubes to each IDF homerun back to the MDF. One of the tubes has 12 strands of fiber. The second tube is available for future growth. The College upgraded its entire Cisco switch infrastructure. The upgrade included the core switches and the edge switches. Each switch stack in the IDF has two 10 Gbps modules connected with fiber back to the core switches. One of the 10 Gbps modules connects to one core switch, while the other 10 Gbps module connects to the other core switch. This setup provides maximum infrastructure reliability.

The College hired Veritas to conduct a radio frequency (RF) analysis and PlanNet to create a plan for wireless coverage of the entire college (III.C.2-15; III.C.2-16; III.C.2-17). This wireless expansion and upgrade project will take into consideration the reality of the number of wireless devices students use. The first phase of the project will cover the highest-used sites, including the LRC, the Business/General Studies, and student services buildings. The first phase will also cover the quad area, an external location. The second phase will cover all the inside of the buildings. The third phase will to cover all other areas including athletic fields and open spaces.

The Technology Plan and administrative unit reviews integrate technology needs into the College's strategic planning process. Various surveys, open forums, and blogs informed the Technology Plan. This centralized planning process allows student, faculty, staff, and management input into the type and quality of campus technology, and this input is considered during purchasing and upgrades.

The annual resource allocation and BAARC processes allocate technology needs and funding requests. The respective divisions or departments first rank all technology requests before submitting them to the Resource Committee. The Technology Committee, College Resource Committee, Consultation Council, Districtwide Technology Committee, and BAARC Committee review their respective requests. These governance groups have ample representation from all constituents.

The technology needs and funding requests processes, in combination with the established equipment replacement schedules, ensure that technology is adequate to support the College's programs and services. The process and replacement schedules effectively meet the needs of the College. The College has committed significant monetary resources to enhancing and refreshing its technology (III.C.2-18; III.C.2-19; III.C.2-20).

3. The institution assures that technology resources at all locations where it offers courses, programs, and services are implemented and maintained to assure reliable access, safety, and security.

EVIDENCE OF MEETING THE STANDARD

The majority of the College's courses, programs, and services are onsite. The College has a 1 Gbps internet connection through CENIC managed by AT&T. The District Services provides the main internet connection. CENIC also configured a private Cox WAN to sister college Irvine Valley as a backup Internet link. Until recently, that bandwidth had a CENIC hardware limitation of 100 Mbps. Once the CENIC hardware refresh is complete, this backup link should have a maximum capacity of 1.8 Gbps.

There is a 100 Mbps internet connection as a backup via District Services. District Services is looking to configure another 1 Gbps connection with a carrier to serve as a backup so as to not rely on the 100 Mbps connection. The College houses the District Services on part of the second floor of Health Sciences building and on the entirety of the third floor. However, the College and the District Services have two separate networks.

The College has a satellite office located in Laguna Woods that houses five computers. This remote site connects through two Cisco virtual private network devices that create a site-to-site virtual private network (III.C.3-1). The College contracts with Cox for a 100 Mbps internet-access business line. Technology Services provides full computer and network support for this site. The Laguna Woods office has access to the same services provided to on-campus staff.

The College has three levels of security. The College has two firewalls configured active/passive. The firewalls are the first line of defense guarding the institutional network. These firewalls are configured to protect computer systems. The next level of system protection is Symantec, which is used at the local workstations and servers as anti-virus protection. The College has also deployed a network access-control system that assists in providing network-level protection to the network. All staff must login with a unique username and password per Board Policy (BP). The College uses active directory to provide granular user permissions to systems and all technical resources. The use and access of the College's intranet portal, SharePoint, is protected through active directory authentication and requires a username and password. User rights and permissions control SharePoint access.

The expansion of the "Internet of Things," whereby more systems are connecting on the network, requires segmentation to ensure data security. Logical segmentation of the

network using virtual local area networks (VLANs) provides data protections. For example, the irrigation system is in its own VLAN, the HVAC system is in its own VLAN, the lighting system is in its own VLAN, among many other segmented systems (III.C.3-2).

The College is implementing electronic access control for all doors (III.C.3-3). This will give the Police Department the ability to lock all doors in case of an emergency. Additionally, this will enhance security. The College has also implemented Internet Protocol (IP) cameras. These cameras reside on their own VLAN, and only the Police Department can view the content of the cameras.

There is redundancy in every IDF with two 10 Gbps fiber modules connected to each switch stack (III.C.3-4). Each 10 Gbps fiber module has a homerun connection to either core switch A or B. This type of network redundancy provides a high level of network reliability. The College uses server virtualization technology and hardware redundancy to host these virtual servers. To ensure reliability, server clusters with RAID are applied to all hardware.

The College disaster recovery strategy makes use of replication between two identical SANs. Irvine Valley College houses one of the SAN, while the College houses the primary SAN. These two SANs replicate constantly, securing institutional data (III.C.3-5). The systems are also backed up daily, and the College purchased a more robust backup system, Barracuda, to further enhance its disaster recovery strategy (III.C.3-6).

The College uses three primary technologies for emergency notification: Blackboard Connect, InformaCast, and our Dark Site (wherein the College website turns completely dark). Blackboard Connect deploys mass emails and text message notifications. Additionally, InformaCast sends an emergency notification through the College's VoIP Cisco phones. The third method makes the College website appear dark, providing only emergency information. Every October, each of these systems is tested during the Great California ShakeOut.

The District has two governance committees that focus on business continuity and the proper use and destruction of records. The Business Continuity Planning Committee meets quarterly and has broad representation from Saddleback, IVC, and district services (III.C.3-7). The committee's purpose is to integrate the District and college plans into a comprehensive, integrated business continuity plan and to coordinate business continuity needs District-wide (III.C.3-8). In 2014, the Business Continuity Planning Committee provided all of its members and District executives with priority calling cards. These cards can be used in case of an emergency and provide the user/caller with priority access to the phones lines.

The Custodian of Records Committee—which meets bimonthly, or as needed—is responsible for outlining a clear process flowchart with defined roles and responsibilities for proper response to all requests on records (III.C.3-9; III.C.3-10). The committee

discusses how records need to be handled and stored from inception to deletion (III.C.3-11).

Per direction from the District's bank, the District contracts Trustwave as the PCI-DSS QSA (qualified security assessor). They provide monthly external vulnerability scans of the PCI network as well as the self-assessment questionnaire. Additionally, the District is currently working with Trustwave to finalize a statement of work for a Districtwide PCI gap analysis (III.C.3-12).

The College uses Blackboard as the LMS (III.C.3-13). Students use their active directory ID and password to access the system. Blackboard is accessible at all times from any system that has internet access. Blackboard's managed hosting has an uptime service-level agreement of 99.9%. Additionally, the hosted solution provides 24/7/365 operations and support, a Tier 4 data center, Tier 1 redundant internet connections, and redundant data backups.

ANALYSIS AND EVALUATION

The Technology Services department has a professional technical team of 13 full-time and two part-time employees, an administrative assistant, an assistant director, and a director. This professional team manages and maintains the College's technological infrastructure and equipment. The District IT team also plays a crucial role in supporting the infrastructure, and both departments work closely with each other.

Technology Services has deployed various technologies to aid in the maintenance and support of the infrastructure. Systems such as WhatsUp Gold monitor the network and send email and text messages when system malfunctions. Fusion software to monitor projectors and report anomalies is deployed. Additionally, LogMeIn is a tool utilized by the Help Desk to provide remote technical support; this feature lessens the time a technician spends in the field.

The College has redundancy throughout the network infrastructure. There are two core switches and each MDF switch stack has two 10 Gbps modules. One 10 Gbps module connects to one core switch while the other 10 Gbps module connects to the other core switch. This provides reliability and redundancy throughout the College network. Additionally, there is a 1 Gbps Internet connection and a 100 Mbps backup. The College will soon upgrade the backup to 1.8 Gbps.

Technology Services has two identical SANs replicating all data. Irvine Valley College houses one SAN, while the College's MDF houses the primary SAN. This is the current disaster recovery strategy. Additionally, the College is looking to consolidate its multiple backup systems into an enterprise backup technology solution from Barracuda. The Barracuda solution will use both

on-premises and cloud software. The College has appropriate systems to ensure reliability and safety.

4. The institution provides appropriate instruction and support for faculty, staff, students, and administrators, in the effective use of technology and technology systems related to its programs, services, and institutional operations.

EVIDENCE OF MEETING THE STANDARD

The College offers technology training and support opportunities throughout the year to enhance the knowledge of students, faculty, staff, and managers. On-one training—the preferred method of faculty, staff, and management—takes place throughout the year through the FCSS and Technology Services offices. Professional Development Week, which occurs twice each academic year, is an additional way faculty receive appropriate instruction on the effective use of technology. A Help Desk for students, faculty, staff, and management is available to provide support on technology systems. Technicians, staff, and faculty support 50 instructional computer labs available for students to ensure access and knowledgeable. In addition, specialized technology systems and software are available for students with accessibility needs, and these systems come with proper technical support.

Professional Development Week

At the beginning of every semester, the College offers one week (five days in the fall, and four days in the spring) of professional development (III.C.4-1). A wide range of workshops offered during this week make faculty and other attendees, aware of institutional operations and provide training in the effective use of technology systems. Here is a sample of the workshops offered in spring 2016:

- Video Creation
- Common Assessment Initiative
- Our Favorite Apps
- Voice Thread
- Online Education Initiative
- Geek Report—the Internet of Things and Analytics

Throughout the year, the College supports other professional development opportunities related to technology and online education.

Classified staff have an all-day staff development event, which provides a multitude of training activities (III.C.4-2). The technical staff of Technology Services have an online subscription to

technical training videos, which include an extensive video library of technologies. The College also provides Lynda.com—an online training website with a comprehensive library of training videos—to all employees. College employees can set their own online learning pace and plan through Lynda.com (III.C.4-3).

The College uses surveys to determine faculty, staff, and management's favored methods of training and professional development. In fall 2014 fall, the Technology Committee conducted a survey to determine the preferred training method of faculty. The findings showed that faculty prefer one-on-one training. Training videos were the second preferred method and group training was the least preferred. These findings were information to the staff who conduct one-on-one trainings with faculty. The FCSS is a dedicated resource for faculty to receive training on the effective use of technology. The center has a dedicated computer lab with dual boot computer operating systems that faculty, while assisted by professional staff, can use to hone their skills.

Technology Services established a formal Help Desk that provides support to all faculty, staff, and management. Knowledgeable and friendly technicians staff the Help Desk, and assist College employees. The majority of technical calls are resolved over the phone; staff either walk the caller through the steps on how to resolve the issue, or resolve the issue by taking remote control of the caller's system. The Help Desk is available Monday through Thursday from 7:30 a.m. to 8 p.m. and 7:30 a.m. to 5 p.m. Friday. Employees can call the Help Desk, walk-in to the Technology Services department, email to create a work order, or submit a work order online. Additionally, an application specialist within Technology Services provides one-on-one training to staff and management. Training is requested by calling the Help Desk, creating a work order, or by speaking with the application specialist.

The College offers various forms of support for students. There is a dedicated student technical-support team that focuses on helping students in all areas related to technology, including accessing the LMS, password reset, and email problems. The Library houses the student Help Desk team for ease of access and assistance. This team provides assistance both on the phone and in person. In addition to technical support, the College offers various financial workshops for students (III.C.4-4). Financial Aid offers free weekly workshops to help students complete the state and federal financial aid applications. At these workshops, students receive hands-on assistance with applications.

Students have access to 50 instructional computer labs located throughout the campus, while the FCSS is dedicated to faculty use. There is a total of 1553 computers in these labs. The LRC houses close to 200 computer systems for student use, and it is the most heavily used student computer lab on campus.

Figure 2. Learning Resource Center Computer Lab

The Disabled Students Programs and Services (DSPS) offers a wide variety of support services and specialized instruction. This department's High Tech Center uses the latest hardware technologies and provides a wide variety of software, such as Dragon NaturallySpeaking, JAWS, ZoomText Extra, and Kurzweil 3000. The College follows Web Accessibility guidelines in its services to people with disabilities.

Accessibility workshop and equipment available to 100+ tutors and 4K+ students in Tutoring Center

As of 2014, all LRC tutors are paid to attend mandatory professional development trainings. These professional development sessions cover a wide variety of topics, including, but not limited to, the Socratic tutoring method, time management, subject-specific best practices, and more. The LRC, in collaboration with the DSPS Program and the College's alternative media specialist, trained tutors on a variety of software and hardware systems in order to support all levels and types of learners. Additional training and support for Kurzweil (cloud-based reading software) and smartpen recording hardware is provided to tutors on a regular basis. Moreover, 10 smartpens and three Kurzweil scanning devices are available to tutors and students in the center. In addition, this semester, tutors are going through training to identify students who are struggling with reading as these students are often unaware that they are dealing with a possible issue like dyslexia, or mild ADD, ADHD, which may be the cause of their struggles.

Workshops for students on how to succeed in online education (WOW-week of workshops)

During Professional Development Week in both fall and spring, the College hosts the Week of Workshops (WOW) for all students (III.C.4-5). These faculty and student-led workshops are designed to help students prepare for their courses and to create a connection with faculty outside of the classroom. This Collegewide effort has increased in size and scope, and has scaled up successful workshops, including those that address how to succeed in online courses. Last year, 10 workshops focused on the topic of how to succeed in an online course. WOW

week participants took surveys before and after each workshop. Beforehand, 66 percent of WOW participants said they felt “not ready” or “somewhat ready” for their courses in the upcoming semester. However, after the WOW workshop over 82 percent of the respondents responded that they felt “very ready” or “ready” for their courses.

ANALYSIS AND EVALUATION

The College provides effective and ongoing instruction and support in the use of technology for students, faculty, staff, and managers.

The College has numerous training workshops for students throughout the academic year. These workshops survey participants to understand their needs. This feedback drives future topics for workshops. The successful student technology survey in fall 2014 also guides the training provided for students. The volume and type of questions the Help Desk fields also guide student trainings.

The College sends a professional development survey to all employees. The survey asks respondents a series of questions that help guide the type and modality of trainings offered for employees. During Professional Development Week, surveys assess the value and effectiveness of the workshops. This feedback helps guide workshops offered at the following Professional Development Week. Employees originate much of the technology training by calling the Help Desk and making an appointment with an application specialist II who conducts one-on-one training with employees. The employee is then asked to provide feedback through the work order in the Help Desk system.

The College conducts the Week of Workshops sessions meant to prepare students for success in online classes. Faculty and students lead these workshops, contact which provides student participants with an opportunity to connect with faculty outside of the classroom.

FCSS is dedicated to faculty support and focuses primarily on training faculty in all technology manners related to instruction and, especially, online education. Instructional training options range from specific department/discipline sessions to one-to-one sessions, to new faculty orientations, to myriad workshops focusing on ways to incorporate the latest instructional technology into classes.

5. The institution has policies and procedures that guide the appropriate use of technology in the teaching and learning processes.

EVIDENCE OF MEETING THE STANDARD

The SOCCCD has BPs and Administrative Regulations (ARs) that guide the appropriate use of technology at the College.

There are primarily five BPs guiding the appropriate use of technology (III.C.5-1; III.C.5-2; III.C.5-3; III.C.5-4; III.C.5-5). These are BP 3310, Records Retention and Destruction; BP 3508, Public Safety Camera System; BP 3530, Compliance with Payment Card Industry Data Security Standards PCI-DSS; BP 4000.2, Electronic Communication; and BP 5615, Student Records, Compliance with Family Educational Rights and Privacy Act (FERPA). The BPs are more broad and strategic, while ARs provide more operational detail.

There are nine ARs that cover appropriate use of technology (III.C.5-6; III.C.5-7; III.C.5-8; III.C.5-9; III.C.5-10; III.C.5-11; III.C.5-12; III.C.5-13; III.C.5-14). AR 4000.2 is intended to inform all users (employees, student, and guests) of the rules regarding use of the District's digital information network. This regulation has five main sections focusing on the permitted uses of the network, user responsibilities, prohibited uses, incidental personal use, and the enforcement of the regulation.

There are two ARs that focus on records, including student records. AR 3310 defines records as "records, maps, books, papers, data processing outputs, and documents of the District required by Title 5 to be retained, including, but not limited to records created originally by computer and 'electronically stored information.'" This AR focuses on record retention and destruction. AR 5615 focuses on student records, and this regulation implements the federal Family Education Rights and Privacy Act of 1974 (FERPA) and state law.

ARs 3726 to 3730 focus on information technology; they cover data classification, access control, physical security, logging and monitoring, and remote access. AR 3726 classifies data into three categories: public, internal, and restricted. This AR assists understanding of the importance of securely handling information and ensuring data protection. AR 3727 focuses on access control, and its objective is to provide internal controls for access to District sites, information, and applications. The purpose of AR 3728 is to protect the confidentiality, integrity, and availability of the data contained within the District's information systems from potential physical and environmental threats. AR 3729 ensures proper logging and monitoring so that potential security incidents can be detected early and dealt with effectively. Finally, AR 3730's objective is to control access to District information systems when connections are made to those systems from a remote location.

AR 3508 delineates the purpose and scope of the public safety camera system. It states that the District operates a camera system to ensure a safe environment for those who live, work, and visit the District. Additionally, video from the cameras will be recorded on a 24-hour basis, seven days a week. The video is to be kept for an entire year and thereafter erased with the written consent of the campus chief of police.

The Saddleback Student Handbook provides a wealth of information for students by outlining available services, success tools, programs, and important College policies (III.C.5-15).

Processes and procedures regarding technology at both the College and District-level are collaborative and ensure that the appropriate constituent groups are included in discussions and decision-making. A good example of this is the current evaluation of Canvas as a possible replacement of the current LMS, Blackboard. The evaluation process began by first procuring agreement from faculty to participate in the Online Education Initiative (OEI), which is a statewide initiative aimed at centralizing some of the online education services within the California Community College (CCC) system and transitioning all colleges to a common LMS, Canvas. The College has primarily been participating in the OEI as a pilot college for tutoring services. However, there are also currently six faculty piloting the Canvas LMS. The process of making a decision whether or not to replace Blackboard with Canvas has been very thorough and inclusive. There have been opportunities for participation by faculty, staff, and management to consider all aspects of Canvas, including its instructional capacities, costs, and support services as well as the other software/hardware needed to support it. Additionally, there has been discussion at the Online Education Committee and the Districtwide Online Education Committee as well as presentations to the Academic Senate.

ANALYSIS AND EVALUATION

The College has several BPs guiding the appropriate use of technology. These policies cover a broad spectrum from FERPA to record retention and destruction. Complementing these BPs are ARs, which provide more operational detail. The importance of information security is highlighted by the five ARs guiding it. The combination of BPs and ARs guides the College's students and personnel on the appropriate use of technology.

Additionally, the Student Handbook is an excellent source for students of all College procedures and institutional policies.

The College establishes procedures to follow when entertaining different technologies in classrooms. The College is following these procedures now as it evaluates Canvas as a potential replacement for the existing LMS, Blackboard.

Financial Resources

Planning

1. Financial resources are sufficient to support and sustain student learning programs and services and improve institutional effectiveness. The distribution of resources supports the development, maintenance, allocation and reallocation, and enhancement of programs and services. The institution plans and manages its financial affairs with integrity and in a manner that ensures financial stability. (ER 18)

EVIDENCE OF MEETING THE STANDARD

Saddleback College is part of the South Orange County Community College District (SOCCCD), which is a basic aid district. This means that the District receives money from local property taxes to fund its general operations rather than receiving money from the state. The board of trustees (BOT) has adopted budget development principles and practices that are designed to maintain the financial integrity of the District and the colleges. These principles and practices were developed jointly by the colleges in the District and are codified as BP/AR 3100, Budget Preparation, BP/AR 3101, Budget Management, BP 3101.5, Fiscal Management, and BP/AR 3110 [IIID-1] [IIID-2] Basic Aid Funds Allocation Process. BP 3100 establishes the Budget Development Guidelines, found within each year's adopted budget [IIID-3], as the guiding principles used in budget development within the District. The guidelines were developed by the District Resource Allocation Council (DRAC) and are based on the board philosophy of supporting and following fiscal policies that:

1. Ensure wise and prudent use of public resources.
2. Promote financial strength and stability.
3. Maximize educational opportunities for students, in accordance with the district's mission statement.

DRAC is a participatory governance council charged with making recommendations for the income allocation model on which the District's budget is based [IIID-4]. The model developed by DRAC and contained within the guidelines stipulate that the colleges and the District be allocated revenue using the state SB361 funding formula for all ongoing operating expenditures. Property tax revenue anticipated over and above the State funding formula is designated as Basic Aid funding and is used primarily for one-time expenditures.

The process for the allocation of basic aid funding is delineated in BP/AR 3110. This process ensures that basic aid funding is allocated for purposes related to capital construction, major renovation, infrastructure projects, and site development; the retirees benefit trust fund and other long term obligations; trustee elections, legislative advocacy, major legal fees and

judgments; major technology initiatives; and support for scheduled maintenance and smaller renovation projects.

The Basic Aid Allocation Resource Committee, (BAARC), a districtwide committee which has College and participatory governance representation [IIID-5], is responsible for making recommendations for the allocation of basic aid funds to the chancellor and ensuring that recommendations consider the other principles contained within the budget development guidelines., including the maintenance of at least a 7.5 percent general fund reserve.

A District budget allocation model [IIID-6] is the computational tool used to allocate general fund unrestricted resources to the colleges. The College and the District work together closely to determine FTES calculations and income projections, and they meet prior to submission of FS320 reports to ensure College FTES are reflected accurately.

Saddleback College has efficiently and prudently managed its financial resources. During College budget planning, the relationship between ongoing revenue and ongoing expenditure has always been considered, and the College has been careful not to obligate short-term revenue to long-term expenditures. As a result, the College has had sufficient resources to support existing instructional programs and support services and has been able to allocate resources to address institutional plans.

This planning strategy has served the College well and, during periods of reduced budgets (as experienced in the 2009-2010 fiscal year), has enabled the College to continue to support instructional services and student services without the need for sudden and dramatic budget cuts. Additionally, the College has been in a fiscal position to move forward and continue to apply funds to institutional plans. The College has consistently ended the fiscal year with a healthy ending balance. [IIID-7]

The College complies with California's 50 percent law, which requires that a calculation (by State formula) of 50 percent or more of the institution's resources be expended for direct instruction. The College complies the 50 percent law calculation based on College expenditures only. This enables the College to track its effect on the overall District calculation as well as to ensure maintenance of effort. The College has never fallen below the 50 percent benchmark and frequently far exceeds it [IIID-8].

In addition to the College's unrestricted general fund, the College receives restricted funds for state-funded categorical programs, local income (such as material fees, parking and health center revenue), grants and agreements, Community Education, and Student Government and Foundation revenue. In recent years the College has placed increased focus on revenue generation from successful grants, which has increased available resources [IIID-9]. The College's restricted and unrestricted general fund budget for the 2015-2016 fiscal year totaled \$131,616,423. The District budget for all funds totaled \$711,000,000 [IIID-10].

In compliance with the budget development guidelines, the District has established an unrestricted general fund contingency of 7.5 percent, and the College maintains an additional contingency within its operating budget, which is \$7 million for 2016-2017 [IIID-3]. The SOCCCD has prepared well for most long-term financial obligations such as retiree health benefits, and the College and the District have fully paid off all prior-year debt obligations.

ANALYSIS AND EVALUATION

The SOCCCD operates within a resource allocation model determined by the SB361 funding formula. By developing an operating budget in accordance with this resource allocation model, College operations are protected from the volatility of property tax revenue, thereby eliminating the possibility of devastating cuts to programs and services in case the District's Basic Aid status ever changes. Further, property tax revenue collected over and above the SB361 calculation is allocated and expended as received, and the District has not obligated future anticipated property tax revenue by incurring debt.

Both the District and the College allocate resources in a fiscally prudent and responsible manner. One of the College's strengths is the manner in which it approaches financial planning. College finances are managed conservatively to ensure students' needs are met on both a short- and a long-term basis. College financial planning, over recent years, anticipated declines in operational revenue combined with inflationary increases in expenditures. This short-range and long-range planning has enabled the College to maintain fiscal integrity, as evidenced by the College's actions during the nationwide economic recession and state budget crisis. No general fund layoffs took place, and the general fund offset a portion of the State reductions to categorical programs. Due to the College's conservative long-range fiscal planning, the College is able to develop a balanced budget with a sufficient contingency each year, and district reserves remain healthy. Benchmarks for fiscal stability are always met and are often exceeded.

College funds are sufficient to support educational improvement and innovation. The District's resource allocation process (AR 3110) ensures that funding recommendations are driven by the SOCCCD Educational and Facilities Master Plan (EFMP) [IIID-11], the 5-Year Construction Plan [IIID-12], the 20-Year Facility, Renovation, and Scheduled Maintenance Plan [IIID-13], the Districtwide Technology Plan [IIID-14] [IIID-15]; the 2014-2020 Strategic Plan [IIID-16]; and other college and districtwide plans. The College's budget development process [IIID-17] ensures that funding is set aside for resource needs in support of the college wide plans such as strategic plan action steps, the student equity plan, and the basic skills initiative, and in response to departmental plans developed through the assessment and program review process. The College Resource Committee (CRC) proposed \$1,477,320 for fiscal year 2015-2016 for allocations in support of needs expressed through the program

review (PR) and administrative unit review (AUR) processes and the strategic plan; these funds supported facilities, technology, equipment, and other institutional needs.

2. The institution's mission and goals are the foundation for financial planning, and financial planning is integrated with and supports all institutional planning. The institution has policies and procedures to ensure sound financial practices and financial stability. Appropriate financial information is disseminated throughout the institution in a timely manner.

EVIDENCE OF MEETING THE STANDARD

The mission and vision are the basis for all financial planning and decision-making at the College. The College's strategic planning process begins with the review and revision of the mission and vision statements, and they form the foundation from which all strategic goals, objectives, and action steps are developed [IIID-18]. All planning on the level of academic programs and administrative units also begins with the College mission. Each department and unit develops a mission statement in alignment with the College's mission, and during the program review (PR) and administrative unit review (AUR) processes create objectives to attain this mission.

The budget development and planning processes of the College ensures that financial resources are used to address College plans. The process of institutional planning and the integration of those plans are institutionalized within the College culture. The Planning and Budget Steering Committee (PBSC) and College Resource Committee (CRC) processes ensure that requests for funding are supported by assessment results and other data and that funded requests are in alignment with the College's mission and the 2014-2020 strategic planning goals [IIID-19].

PBSC oversees the implementation of strategic planning goals, objectives, and action steps and measures and evaluates progress. PBSC has co-chairs (the Director of Planning, Research and Accreditation, and the Director of Fiscal and Contract Services), which creates a working relationship between the two offices that strengthens the integration of planning and budget. All financial decisions go through this body to ensure that all requests for expenditure are in alignment with the College's Strategic Plan before they are forwarded to the Consultation Council (CC), which in turn makes recommendations to the president.

Both PBSC and CC include representatives of all College constituent groups, and both groups are primarily recommending bodies; final decisions and accountability rest with the president. Based on input from the recommending bodies, the President's Executive Team (PET), which includes the vice president for instruction, the vice president for student services, and the vice president for administrative services, meets with the president to set spending priorities and to ensure that these can be accomplished with a balanced budget.

Strategic planning is designed to lay the foundation for all resource decisions. The Saddleback College Strategic Plan reflects a strategic assessment of what will best support student needs, now and in the future, and how existing programs need to be adjusted to better address changing needs. PRs and AURs are conducted every two years by all instructional programs and student support and administrative service units of the College. These reviews are central to planning and allow for both short- and long-term planning. Additionally, PRs and AURs are the baseline document for programs and units to outline resource needs. On an annual basis, through the needs assessment process, resources are requested via the Resource Allocation Request form.

Resource allocation decisions are informed by the Strategic Plan, in conjunction with the needs of instructional programs and administrative units on campus as expressed in completed PRs and AURs. For example, all funding requests and allocation recommendations must include a justification that demonstrates an alignment between the Strategic Plan and a specific PR or AUR [IIID-20]. The College resource allocation model process documents describe the role of PBSC, the college's various planning committees, and CC in the planning and resource allocation process [IIID-1] [IIID-2] [IIID-21].

All resource allocation requests are submitted via TracDat and reference the relevant sections of the PR or AUR as well as the college's Strategic plan. After being extracted from TracDat by the Office of Planning, Research, and Accreditation (OPRA), each college "branch" (Instruction, Student Services, and Administrative Services) prioritizes the list. After the prioritized list is reviewed by the CRC, the list is passed out to the Technology Committee and the Safety and Facilities Committee for review and analysis. After input from the functional committees, the consolidated list is unified by CRC. PBSC will review CRC recommendations to ensure accuracy and adherence to the process and will forward the recommendations to the CC which in turn makes priority recommendations to the college president.

Annual budgets are developed as an outcome of the planning process and are reviewed and discussed in PBSC, Consultation Council, Management Team, and other college venues. [IIID-22] [IIID-23].

Based upon all of the College's planning decisions, a budget is developed each year. Due to insufficient information from the state prior to adoption of the annual budget and the uncertainty of the state making revisions to the budget during the funding cycle, the College's financial planning process is, by necessity, flexible. Within those parameters, the planning process is linked to the mission, the current strategic planning goals and objections and the EFMP [IIID-11].

Faculty have the most direct impact on students. Thus, requests for new faculty must demonstrate alignment with the College mission and the strategic goals that relate to student learning and success. The Academic Senate oversees a faculty hiring prioritization

process in which alignment with the College's Strategic Plan is one of the key determining factors. The resulting prioritized list is then forwarded to the president for further action. PBSC oversees the process for hiring new classified staff and managers, and this process also requires alignment with the Strategic Plan as well as PRs and AURs. Final approval of all positions rests with the president, who determines hiring priorities in conjunction with the budget and the most critical needs to meet College goals.

On an annual basis PBSC:

- Reviews resources and make recommendations for the College budget based on the calculations and assumptions outlined in the DRAC Model and the district's adopted budget.
- Monitors budget and resources to ensure success of the Strategic Planning Process.
- Completes an annual review of the Strategic Plan in the spring of each year and makes suggestions to CC for reprioritizing goals and strategies.
- Conducts an annual review of the CRC resource allocation process.

Each spring, CC may reprioritize strategies based upon the annual review and an evaluation of the accomplishments during the year. The strategic directions and goals, however, remain constant for the entire six-year period of the plan. This annual review allows for revision of the College mission, and every sixth year the College revises its values and vision along with the mission. This review also ensures that the College and District mission are in alignment as prescribed in BP 101, Missions, which requires an annual evaluation and, if necessary, revision [IIID-24].

There are a variety of financial control mechanisms in the form of policies and procedures to insure the District operates within its budget and remains financially sound. Board policies and accompanying regulations related to budgeting are in the 3000 (Business) series. These policies, along with the Budget Development Guidelines discussed in III.B.1 above, provide direction for budget development [IIID-27]. Another mechanism to insure control and prevent overspending is the District's financial software system, Workday, an enterprise resource planning program that prevents the submittal and authorization of requisitions when funds in the specified account are insufficient. The District consistently ends the fiscal year with a positive ending balance [IIID-7]. SOCCCD standard practice is to use one year's ending balance as the following year's beginning balance. The Annual Budget and Financial Report (CCFS-311) on the California Community College Chancellor's Office web page demonstrates sound financial practices and financial stability.

ANALYSIS AND EVALUATION

Saddleback College has a reputation for excellence in academics and service to students. As a result of the College's strong commitment to its mission and to continuous improvement and innovation, its financial resources are necessarily in great demand by all groups on

campus, thus increasing the importance of linking financial planning to institutional planning in order to make decisions that best utilize College resources.

Financial planning at Saddleback College is integrated with all institutional planning. The College's financial planning processes are structured to reflect and support the college's mission and institutional plans. Adequate policies and procedures are in place to ensure sound financial practices and financial stability. Leaders in the participatory governance process are integral to the College's planning and budget process, and through the participatory governance processes appropriate financial information is disseminated throughout the institution in a timely manner.

3. The institution clearly defines and follows its guidelines and processes for financial planning and budget development, with all constituencies having appropriate opportunities to participate in the development of institutional plans and budgets

EVIDENCE OF MEETING THE STANDARD

Both the District and College follow clearly defined policies, guidelines, and processes for financial planning and budget development. The District's budget is driven by the DRAC model and the basic aid allocation.

DRAC is the districtwide participatory governance body charged with making recommendations to the chancellor for the income allocation model upon which the budget is based and with the development and oversight of the allocation process for Unrestricted General Funds. As described in III.D.1 above, the DRAC model is an allocation model for the District which distributes available general fund unrestricted resources in accordance with the state's funding formula [MS-28]. DRAC ensures a fair and equitable distribution of unrestricted general funds to Saddleback College, Irvine Valley College, Contingency Reserve, General Expenditures, and District Services. In essence, the DRAC model allocates funding to the colleges in accordance with the SB361 funding formula, and after DRAC Model allocation the remaining funds are allocated by the Basic Aid Allocation procedure and process outlined in BP and 3110.

This Basic Aid Allocation process is implemented by the BAARC which is chaired by the vice chancellor for business services. BAARC ensures that basic aid funding is allocated for purposes related to capital construction, major renovation, infrastructure projects, and site development; the retirees benefit trust fund and other long term obligations; trustee elections, legislative advocacy, major legal fees and judgments; major technology initiatives; and support for scheduled maintenance and smaller renovation projects. BAARC projects available funding based upon a conservative estimate for property tax and student fee income, which makes up the total amount available for allocation. After funding is allocated for long term obligations and fixed expenses, this amount is subtracted from the total amount available for allocation to yield the net amount available for allocation. As outlined

in the board policy and administrative regulation, the net amount is allocated by BAARC based on recommendations by the Capital Improvement Committee (CIC) and the District Technology Committee (DTC); these recommendations are based on districtwide plans such as the EFMP [IIID-11], the 5-Year Construction Plan [IIID-29], the 20-Year Facility, Renovation, and Scheduled Maintenance Plan [IIID-12], and the Districtwide Technology Plan [IIID-13] as well as the Districtwide Strategic Plan, college strategic plans, and college technology plans. BAARC recommendations for the 2015-16 fiscal year totaled approximately \$57 million [IIID-30].

PBSC reviews and monitors resources and makes recommendations to CC for the college budget in accordance with the calculations and assumptions outlined in the DRAC Model and the district's adopted budget. PBSC and CRC processes ensure that requests for funding are supported by assessment results and other data and that funded requests are in alignment with the College's mission and the 2014-2020 Strategic Planning goals [IIID-31] [IIID-19].

ANALYSIS AND EVALUATION

The College's processes for financial planning and budget development are clearly defined and widely communicated through board policies and administrative procedures, the district's DRAC [IIID-4] and BAARC [IIID-32] committee charge and the models developed by these committees, and by the college's budget development and resource allocation processes as outlined by PBSC and CRC. Each of the District and College committees and processes identified include constituency group representation [IIID-33]. Committee information, including notes and handouts, are available on the College and District SharePoint sites [IIID-34] [IIID-35] [IIID-36] [IIID-37].

For College planning purposes the DRAC formula works very well. Because the formula is clearly understood and the fundamental principles of the model do not change, the College can clearly plan to allocate its resources with an understanding of the effect on income the following year [IIID-28]. Because the rules surrounding income generation for the College will not change unless a recommendation is submitted by DRAC and approved by the chancellor, the College is provided the tools to plan strategically. Additionally, the method used to calculate revenue and distribution through the model is reliable and consistent.

Fiscal Responsibility and Stability

4. Institutional planning reflects a realistic assessment of financial resource availability, development of financial resources, partnerships, and expenditure requirements.

EVIDENCE OF MEETING THE STANDARD

Assessment of available resources is an ongoing, year-round, multiyear process at Saddleback College. Funding for College programs and services is realized through multiple funding sources. The primary funding source is the general fund unrestricted allocation, which is calculated using a revenue-based District resources allocation model, and the allocation of these resources is guided by District Budget Development Guidelines and the basic aid funds allocation process. BAARC projects available basic aid funding based upon a conservative estimate for property tax and student fee income minus the colleges operating revenues, which makes up the total amount available for allocation. Property tax estimates are provided to the district by the County of Orange, and the South Orange County Community College District uses the most conservative estimates provided in its calculations.

Unrestricted general fund operating revenues allocated to the College are calculated using a revenue-based formula. While the College is part of a basic aid district, the District uses the state's S361 funding formula to calculate and allocate revenue to the colleges. In essence, the income projection used to fund the FTES is taken directly from the state apportionment calculation for the prior year, and adjustments in the final state budget, positive or negative, such as cost-of-living adjustments and growth, are factored into the revenue calculation. The implementation of this model is overseen by DRAC. The District model distributes available general fund unrestricted resources in accordance with the state's funding formula; remaining funds are allocated in accordance with the basic aid allocation procedure and process outlined in BP-3110 and AR-3110. The College allocation is then assessed for District Services such as payroll, accounting, and purchasing, and assessed for the contingency and for districtwide general expenditure items that cannot be attributed to one College or the other such as legal fees.

In addition to local funding through property taxes, the College also receives funds from additional sources such as state categorical programs; local revenue; grant revenue from Federal, State and local sources; Community Education; Associated Student Government; and Foundation revenue. Nonresident tuition FTES income, based on prior-year actual receipts, is added to the income formula. Prior-year ending balances for the District are added to the overall income, and a budget allocation is set for the College. The ending balance for the College, whether positive or negative, is added or subtracted to the College income allocation. Local income, such as parking revenue or health fee income, is budgeted at prior-year actual income levels. Student fee income is budgeted at prior-year income levels and is adjusted in the spring after spring enrollment revenues are known. Budgets are established for grant activities when formal grant award or partnership agreements are received and board-approved. Community Education revenues are budgeted slightly below prior-year actual income levels. Student Government revenue is calculated using the minimum guaranteed income derived from vending contracts as well as an estimate of revenue to be earned through sales of the ASB Stamp.

The College's planning process, which ultimately results in budget allocation, is a transparent process and is open to all who choose to participate. Planning and budget committees include:

- Consultation Council
- Planning and Budget Steering Committee
- Educational Planning and Assessment Committee
- Technology Committee
- Safety and Facilities Committee
- College Resources Committee
- Strategic Planning Goal Groups

The budget development and planning processes of the College ensure that financial resources are used to address College plans. PBSC and CRC processes ensure that requests for funding are supported by assessment results and other data and that funded requests are in alignment with the College's mission and the strategic planning goals. Resource allocation decisions at the College are informed by the Strategic Plan, in conjunction with the needs of instructional programs and administrative units on campus as expressed in completed PRs and AURs. For example, all funding requests and allocation recommendations must include a justification that demonstrates an alignment between the Strategic Plan and a specific PR or AUR.

PBSC, as its name indicates, reviews and studies budget materials for all funds, programs, grants, and projects [IIID-38]. This Committee makes recommendations to CC regarding the allocation of funds, and the CC, after review, will make a recommendation to the president, who ultimately makes the final decisions to the allocation of resources to address College plans [IIID-39]. Due to the College's conservative long-range fiscal planning, the College ensures that fiscal commitments are anticipated and that funds are allocated appropriately. As such, the College is able to develop a balanced budget with a sufficient contingency each year, and District reserves remain healthy. Benchmarks for fiscal stability are always met and are often exceeded.

ANALYSIS AND EVALUATION

The planning and budgeting process is robust and transparent. Information about available funds is available to planners and decision makers throughout the process and results planning that reflects realistic assessments of financial resource availability. The basic aid allocation process ensures that institutional priorities are addressed with the District's overall budget, and the College's resource allocation process ensures that institutional plans in support of the College's mission are funded appropriately. Institutional planning is conducted in accordance with a realistic assessment of available funds.

5. To assure the financial integrity of the institution and responsible use of its financial resources, the internal control structure has appropriate control mechanisms and widely disseminates dependable and timely information for sound financial decision making. The institution regularly evaluates its financial management practices and uses the results to improve internal control systems.

EVIDENCE OF MEETING THE STANDARD

The College uses accounting software program, Workday, to establish budget and expend resources. Budgets use an account code structure which allows the accounting system to direct transactions to those fiducially responsible for the accounts related to those specific transactions. Purchase orders are created online and go through an automated approval process, and those approval requirements are built into the system based on account code structure. Control mechanisms are in place to ensure that requisitions cannot be submitted unless sufficient resources are available. Approvals are in place for all requisitions, depending upon the classification of the expenditure; expenditure classifications and account code structures are used to route budget amendments, journal entries, expenses, invoices, and requisitions. For example, all requisitions using restricted funding sources such as instructional fee-based supplies are routed to a funding source manager to ensure they are appropriate. All departments have access to the Workday online system, and any College employee can access the system by requesting access. Users have access to all College accounts in the Workday system and can develop real-time reports if needed. If departments or employees request or require reports that are more complex than the reports that Workday provides, the College's Fiscal Office is available to assist.

Both the District and the College have controls in place that assure effective oversight of all financial matters. Acceptance of grant funds requires board approval. Once the grant has been authorized, the Fiscal Office prepares a budget amendment, which is submitted to the board. Once the budget is authorized, fund balances are entered into the accounting system, which prevents approval of purchase orders in excess of budgeted funds. Only authorized individuals can enter requisitions into the system, and all requisitions are scrutinized and approved by appropriate grant project staff and administrators as well as the college Fiscal Office. The grant project staff, in conjunction with a representative from the Grants Office, monitor fund expenditures to make certain that they are in compliance with the terms and conditions of the grant and other relevant accounting standards. Regular reporting is completed in accordance with grant specifications.

The District accounting staff reviews project reports to verify that they are accurate before the report is certified by the vice chancellor, business services, or designee. Similar processes are in place that assure the appropriate oversight and management of externally funded programs, such as Perkins appropriations and state-funded categorical programs.

All contracts are approved and executed by the Office of the Vice Chancellor, Business Services. Per BP 2100, Delegation of Authority to the Chancellor, and BP 3200, Purchasing and Contracts, the vice chancellor, business services, is given the authority to approve contracts that do not exceed \$100,000 [IIID-40]. The vice chancellor submits a report to the board on a monthly basis listing all contracts that have been approved for board ratification. Contracts that do not fall within the parameters set for the Vice chancellor are submitted to the board for approval before signature. Contract expenditures and payments are managed through the Workday accounting system, which monitors purchase orders and payments.

The College Foundation board of governors and the Foundation director are responsible for overseeing funds deposited with the Foundation, which includes funds generated by auxiliary organizations [IIID-41] [IIID-42]. Investment reports as well as income and expenditure documentation are submitted to the Foundation board of governors at their regularly scheduled meetings and presented to the SOCCCD board of trustees annually [IIID-43].

The Office of the Vice Chancellor, Business Services, manages institutional investments and asset management. Funds are invested in compliance with the law through the County Treasurer's Office. Monthly informational reports are submitted to the Board of Trustees [IIID-44].

An independent certified public accounting firm conducts a financial and compliance audit of the District Business Services Office annually, in accordance with CA Education Code 8848; the Student Financial Assistance Office, which accounts for financial aid in a separate fund, is also audited to ensure federal guidelines are followed. The annual financial and compliance audit is conducted in accordance with generally accepted auditing standards and is intended to obtain reasonable assurance that financial statements are free of material misstatement. This process includes examining and testing supporting documentation as well as examining internal controls. Reviewing internal controls is the mechanism that provides feedback on processes that require improvement or adjustments. The audit assesses the accounting principles used and ensures that management's estimates to provide reasonable assurance of detecting material misstatements that could affect the financial statements as a whole.

As part of the audit process, the adopted budget (expenditure plan) is compared to actual expenditures in an effort to establish any variance. The College is required to explain variances of any significance to the auditors to determine if funds were expended on the educational programs and activities as originally planned and intended.

Similarly, the Saddleback College Foundation Finance Committee annually prepares and adopts a budget of operations income and expenses [IIID-45]. At each of their meetings, the Finance Committee reviews actual versus budgeted expenditures and income and makes adjustments when necessary.

The Board of Trustees' Audit Committee is charged with monitoring the audit process and reviewing the final audits. Multiple signoffs are required on any type of College expenditure to ensure expenditures are compatible with College plans. The Strategic Planning Process Resource Request form [IIID-46] requires identification of outcomes and an assessment of the expenditure.

ANALYSIS AND EVALUATION

The internal control structures in place at the College and the District demonstrate effective control mechanisms and ensure information for sound financial decision making is dependable and timely. Financial management practices are aligned with generally accepted accounting principles, auditing guidelines, and federal guidelines. Ongoing business process analysis and related process improvements support continuous improvement of internal control systems.

6. Financial documents, including the budget, have a high degree of credibility and accuracy, and reflect appropriate allocation and use of financial resources to support student learning programs and services.

EVIDENCE OF MEETING THE STANDARD

An audit of the District's financial statements and supplementary information, including reports on compliance, is conducted in the fall of every year. This audit is performed by an independent certified public accounting firm. The audit is designed to provide reasonable assurance whether the financial statements are free of material misstatement. It considers the District's internal controls over financial reporting, which includes examining, on a test basis, evidence supporting the amounts and disclosures on financial statements. The audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall basic financial statement presentation [IIID-47].

An independent certified public accounting firm conducts a financial and compliance audit annually in accordance with California Education Code, Section 8848. The annual financial and compliance audit is conducted in accordance with generally accepted auditing standards and is intended to obtain reasonable assurance that financial statements are free of material misstatement. This process includes examining and testing supporting documentation as well as examining internal controls. Reviewing internal controls is the mechanism that provides feedback on processes that require improvement or adjustments.

As part of the audit process, the adopted budget (expenditure plan) is compared to actual expenditures in an effort to establish any variance. The College is required to explain variances of any significance to the auditors to determine if funds were expended on the educational programs and activities as originally planned and intended. The Board of

Trustees' Audit Committee is charged with monitoring the audit process and reviewing the final audits.

The College's budget sufficiently supports all instructional programs and this is verified through assessment of student learning. When assessment of student learning indicates that additional budget allocations are necessary to support improvement, the CRC process is utilized for the request, prioritization, and funding of programmatic needs.

ANALYSIS AND EVALUATION

The College regularly evaluates its financial management system and process, as well as all recommendations for system and process improvement, and it implements recommendations that are appropriate [IIID-48].

7. Institutional responses to external audit findings are comprehensive, timely, and communicated appropriately.

EVIDENCE OF MEETING THE STANDARD

As described in III.D.6 above, an audit of the District's financial statements and supplementary information, including reports on compliance, is conducted annually by an independent certified public accounting firm. [IIID-47] The Board regularly receives reports regarding the district and colleges' budget, fiscal conditions, financial planning, and audit results [IIID-49]. The Board of Trustees' Audit Committee is charged with monitoring the audit process and reviewing the final audits. All board agendas, attachments, and minutes are publicly available on the district website.

At the college level, CC PBSC, and the Management Team regularly review similar reports related to the college's budget, fiscal conditions, and financial planning activities.

The District's audit findings over the past six years have been minimal and all audits have resulted in unqualified reviews. Those minor findings that have been identified were resolved in a timely manner [IIID-50]. The results of these audits and the resolution of findings are made part of subsequent audit reports and are available on the district SharePoint site.

ANALYSIS AND EVALUATION

The District resolves all audit findings in a timely fashion. Information about the college and district budget, fiscal conditions affecting the college budget and financial planning, including audit results, are provided college wide and districtwide on a regular basis.

8. The institution's financial and internal control systems are evaluated and assessed for validity and effectiveness, and the results of this assessment are used for improvement.

EVIDENCE OF MEETING THE STANDARD

The annual financial and compliance audit is conducted in accordance with generally accepted auditing standards and includes examining and testing supporting documentation as well as examining internal controls. Reviewing internal controls is the mechanism that provides feedback on processes that require improvement or adjustments. The audit evaluates any variances between adopted budget and actual expenditures to determine if funds were expended on the educational programs and activities as originally planned and intended.

The College's accounting officer assists departments with categorical program accounting, and the senior accounting specialist in the College's grant office assists grant staff with grant accounting. The District's senior accounting specialist reviews expenditure reports on all categorical programs and grants to ensure reported expenditures are necessary, reasonable, allowable, and allocable. An independent certified public accounting firm conducts examinations and tests in accordance with state and federal audit guidelines, and government agencies conduct their own audits. External and governmental audits have not identified any spending irregularities requiring correction.

Staff responsible for categorical and grant-funded programs regularly attend state, regional, and nationwide conferences and participate in webinars that provide guidelines and interpretations of regulations to ensure compliance. Examples of improvements resulting from staff professional development include federal procurement guidelines as well as time and effort reporting improvements [IIID-51].

ANALYSIS AND EVALUATION

The College's financial and internal control systems are regularly evaluated and assessed. While repeated audits have found the College's financial and internal control systems to be sound, college and district staff regularly assess and refine processes [IIID-52].

9. The institution has sufficient cash flow and reserves to maintain stability, support strategies for appropriate risk management, and, when necessary, implement contingency plans to meet financial emergencies and unforeseen occurrences.

EVIDENCE OF MEETING THE STANDARD

The District is a locally-funded basic aid district, as described in III.D.A above, and the revenue received from property taxes exceeds the funds it would receive through SB361, the state's funding model for community colleges. Revenue is received monthly, with the largest

tax payments made in December and April. BP 3100, Budget Preparation, [IIID-1] states, “Unrestricted general reserves shall be no less than 7.5 percent.” In addition to this reserve required by policy, each College maintains its own reserve. The College is fiscally conservative, does not use its reserves, and typically maintains a healthy ending balance fiscal responsibility [IIID-7].

The capital outlay fund has a substantial cash balance committed to specific future capital projects [IIID-53]. This cash may be temporarily transferred to another fund for the payment of obligations in accordance with the State Budget and Accounting Manual [IIID-54].

The District is not self-insured but participates in several joint power agreements such as Statewide Association of Community Colleges (SWACC) for property and liability, Self-Insured Schools of California (SISC) for medical, and Protected Insurance Program for Schools (PIPS) for workers’ compensation, thus lessening risk factors and reducing costs. The District reviews its coverage annually in the spring and carries an excess liability policy. The District implemented an irrevocable trust for its other post-employment benefits (OPEB) obligation, such as retiree health benefits, in spring 2008 and fully funded the liability in June 2008 [IIID-55] [IIID-56].

The College and the District have taken numerous additional steps in recent years to reduce financial risk to the District. These include numerous professional development presentations on how to identify and reduce risk [IIID-57], the development and implementation of contract templates [IIID-58] and contract signing processes [IIID-59], and the hiring of a new district risk manager.

ANALYSIS AND EVALUATION

The college maintains healthy ending balances and the district’s unrestricted fiscal reserves have not dipped below 7.5% in accordance with district policy.

10. The institution practices effective oversight of finances, including management of financial aid, grants, externally funded programs, contractual relationships, auxiliary organizations or foundations, and institutional investments and assets.

EVIDENCE OF MEETING THE STANDARD

As described in III.B.3 above, the College’s accounting software program, Workday, is used to establish budgets and expend resources. This system assists the College in providing effective oversight of all its finances as all expenditures are input, tracked, and approved through this system.

The Student Financial Assistance Office determines eligibility and enters the awards into the PowerFAIDS system. The District Business Services Office draws down the funds (G-5) three days prior to the disbursement date, following the Federal guidelines that require the funds

must be spent within three days of receipt. After each check disbursement the Student Financial Assistance Office and the District Office compare revenues and expenditures. The College complies with the Blue Book (Accounting, Recordkeeping, and Reporting by Postsecondary Educational Institutions for Federally Funded Student Financial Aid Programs). An independent certified public accounting firm audits the Student Financial Assistance Office and the District Business Services Office as part of the annual audit. In the District's financial statements, financial aid is accounted for in a separate fund [IIID-60].

Every Saddleback College group or outside donor raising funds for College programs and scholarships is required to sign an account agreement with the Saddleback College Foundation Office. This agreement states that the group will follow established guidelines and procedures of the foundation and the SOCCCD. A group representative signs the document as the account administrator, the dean or supervisor cosigns, and the foundation director cosigns. This document then authorizes deposits and expenses from the account [IIID-61]. The account is assigned a name and given a code designation so it can be tracked in the Escape accounting system.

New account administrators are given a copy of the Saddleback College Foundation policy guidelines, procedures, and accepted nonprofit standards for fund expenditures [IIID-62]. Money raised from fundraising activity is recorded on a deposit advice form [IIID-63]. The money and the deposit advice form are given to a campus safety officer, who signs a receipt for the funds and hand-delivers them to the District Business Office. The District Business Office matches the amount of the deposit indicated on the form, prepares a bank deposit, and inputs the deposit into the accounting system. A second copy of the deposit advice form is sent to the foundation office, which checks to ensure that funds are coded correctly so they are deposited into the correct account. The donation information is then recorded as a permanent record into a donor database and tax ID letters are generated and sent. The computerized accounting record for each project can be accessed at any time for review by the foundation, the District, and the account administrators.

All funds expended from foundation accounts must be requisitioned by account administrators. An expense request goes through an approval process in the following order: cost center manager, dean, vice president, and then the foundation director. After approval by all, requisitions are sent to the District Business Office to be processed and checks cut. If the item or service is ordered, a purchase order and an invoice are required for payment. Before any expenses over \$10,000 can be approved by the foundation director, the requisitions are ratified the foundation's Board of Governors Finance Committee at its regular meeting.

As discussed in III.D.5 above, the District and the College also have various controls in place that assure effective oversight of all financial matters for grants, externally-funded programs, and contracts.

ANALYSIS AND EVALUATION

The College and the District exercise effective oversight and control over all financial and business activities of the College and the District. Systems are in place to provide checks and balances. Internal control is assessed by the District Business Office, and internal audits routinely take place to ensure compliance with generally accepted accounting principles and auditing guidelines. For each of the past six years the independent auditor reports have been unqualified for the District's financial statements. The District received unqualified reports from the auditors on compliance for the past six years and has no findings related to Federal Title IV Regulation compliance. The recommendations on all findings have been implemented.

Liabilities

11. The level of financial resources provides a reasonable expectation of both short-term and long-term financial solvency. When making short-range financial plans, the institution considers its long-range financial priorities to assure financial stability. The institution clearly identifies, plans, and allocates resources for payment of liabilities and future obligations.

EVIDENCE OF MEETING THE STANDARD

Saddleback College has efficiently and prudently managed its financial resources. During College budget planning, the relationship between ongoing revenue and ongoing expenditure has always been considered and the College has been careful not to obligate short-term revenue to long-term expenditures. As a result, the College has had sufficient resources to support existing instructional programs and support services and has been able to allocate resources to address institutional plans.

This planning strategy has served the College well and, during periods of reduced budgets, has enabled the College to continue to support instructional services and student services without the need for sudden and dramatic budget cuts. Additionally, the College has been in a fiscal position to move forward and continue to apply funds to institutional plans. The College has consistently ended the fiscal year with a healthy ending balance [IIID-7].

The College's restricted and unrestricted general fund budget for the 2015-2016 fiscal year totaled \$131,616,423. The District budget for all funds totaled \$711,000,000 [IIID-10].

The District has established an unrestricted general fund contingency of 7.5 percent, and the College maintains an additional contingency within its operating budget, which was \$2.75 million in 2015-2016. The SOCCCD has prepared well for most long-term financial obligations such as retiree health benefits, and the College and the District have fully paid off all prior-year debt obligations. All other post-employment benefits are fully funded, and the district

conducts an actuarial study on at least a biannual basis to ensure it remains fully funded [IIID-47].

ANALYSIS AND EVALUATION

The SOCCCD operates within a resource allocation formula by which College operations are protected from the volatility of property tax revenue, thereby eliminating the possibility of devastating cuts to programs and services in case the District's basic aid status ever changes. Further, property tax revenue collected over and above the SB361 calculation is allocated and expended as received, and the District has not obligated future anticipated property tax revenue by incurring debt.

Both the District and the College allocate resources in a fiscally prudent and responsible manner. One of the College's strengths is the manner in which it approaches financial planning. College finances are managed conservatively to ensure students' needs are met on both a short- and a long-term basis. College financial planning, over recent years, anticipated declines in operational revenue combined with inflationary increases in expenditures. This short-range and long-range planning has enabled the College to maintain fiscal integrity, as evidenced by the College's actions during the nationwide economic recession and state budget crisis. No general fund layoffs took place, and the general fund offset a portion of the State reductions to categorical programs [IIID-5]. Due to the College's conservative long-range fiscal planning, the college is able to develop a balanced budget with a sufficient contingency each year, and district reserves remain healthy. Benchmarks for fiscal stability are always met and are often exceeded.

12. The institution plan for and allocates appropriate resources for the payment of liabilities and future obligations, including Other Post-Employment Benefits (OPEB), compensated absences, and other employee related obligations. The actuarial plan to determine Other Post-Employment Benefits (OPEB) is current and prepared as required by appropriate accounting standards.

EVIDENCE OF MEETING THE STANDARD

The SOCCCD has prepared well for long-term financial obligations such as retiree health benefits, and the College and the District have fully paid off all prior-year debt obligations.

Government and Accounting Standard Board (GASB) Statements 43 and 45 require annual reporting of post-employment benefit liability [IIID-64]. These statements establish standards for the measurement, recognition, and display of OPEB expenses, expenditures, and related liabilities in the financial reports of state and local governmental employers. When these GASB provisions were enacted, the District hired a consultant to assist the District in the navigation of this process and a Retirement Board of Authority [IIID-65] was

established to guide and oversee the implementation of the GASB standards. The Futuris program, administered by Keenan and Associates, is a comprehensive GASB compliant retiree health and welfare benefit program. The District implemented an irrevocable trust for its OPEB obligation in spring 2008, it is fully funded, and the district conducts an actuarial study on at least a biannual basis to ensure it remains fully funded.

The District has also been impacted by the state pension liabilities that resulted in increases to the California Public Employees' Retirement System (CalPERS) and California State Teachers' Retirement System (STRS) employer rates. The District has covered these increases for all unrestricted general fund employees through the 2020-2021 fiscal year by placing adequate funds in a trust account. [IIID-55] [IIID-66].

ANALYSIS AND EVALUATION

The SOCCCD'S annual OPEB obligation is fully funded, as are all compensated absences and other employee related obligations. The District has also self-funded the CalPERS and CalSTRS employee contributions through 2020-2021 and placed the funds in a trust account.

13. On an annual basis, the institution assesses and allocates resources for the repayment of any locally incurred debt instruments that can affect the financial condition of the institution.

EVIDENCE OF MEETING THE STANDARD

The District has not issued any certificates of participation, or COPS, since 1999 and all COPS were paid in full by June 2008. The District has not issued any bonds. All long-term debt has been paid off, and the District has not entered into any additional debt agreements [IIID-47].

ANALYSIS AND EVALUATION

The College does not have difficulty meeting current obligations and does not have any long-term debt.

14. All financial resources, including short- and long-term debt instruments (such as bonds and Certificates of Participation), auxiliary activities, fund-raising efforts, and grants, are used with integrity in a manner consistent with the intended purpose of the funding source.

EVIDENCE OF MEETING THE STANDARD

The District and College carry no long-term debt, such as bonds or certificates of participation (COPS), and have fully funded all retiree other post-employment liabilities. The College is not engaged in any lease purchase agreements, and all capital, including facilities, technology,

and equipment, are purchased outright on an annual basis as funding permits. The DRAC model ensures that the SB361 calculation funds all ongoing operations and that the remaining funds are utilized for one-time needs and projects such as capital outlay.

As discussed above in III.D.5 and II.D.10, the College and District use grant and foundation funds with integrity. College procedures ensure that grant funding receives appropriate authorization from the board of trustees, that grant budgets and expenditures are aligned with grant funding, and that grant expenses are approved by appropriate persons to ensure that expenses charged to grants are reasonable, necessary, allowable, and allocable. Fiscal reporting for grants is certified by district accounting staff to ensure proper oversight.

The Saddleback College Foundation employs foundation fundraising guidelines to ensure that funds are raised and expended appropriately and with oversight by account administrators, cost center managers, and the Foundation's Board of Governors Finance Committee.

The Saddleback College Foundation Finance Committee annually prepares and adopts a budget of operations income and expenses [IIID-67]. At each of its monthly meetings, the Finance Committee reviews actual versus budgeted expenditures and income and makes adjustments when necessary. An annual report is presented to the SOCCCD Board of Trustees.

ANALYSIS AND EVALUATION

The financial resources of the District and College are used with integrity and in a manner consistent with its goals. Funding from external sources such as the Saddleback College Foundation, grants, and state categorical monies are all used according to their intended purpose. Grant and foundation fundraising efforts are aligned with the strategic plan of the college and serve the needs of college programs.

The District and the College excel in the area of planning for future liabilities and reducing or eliminating long-term debt commitments. Moreover, they are careful not to obligate future budget years with automatic debt payment, and when it has been fiscally prudent to do so, future debts have been retired ahead of schedule.

15. The institution monitors and manages student loan default rates, revenue streams, and assets to ensure compliance with federal requirements, including Title IV of the Higher Education Act, and comes into compliance when the federal government identifies deficiencies.

EVIDENCE OF MEETING THE STANDARD

The District is subject to an annual OMB A-133 audit [IIID-68], which allows the auditor to express opinion on compliance for the District's major federal programs including Title IV programs. For the year ending June 30, 2014, Saddleback College did not receive findings [I believe there were no findings for the year ending June 30, 2013 as well].

Federal Student Aid released the 2012 three-year cohort default rate for all schools in September 2015. The rate for Saddleback College is 11.1% (34/306), with 34 defaulters out of 306 borrowers in repayment. The official 2013 four-year cohort default rate will be released at the end of September 2016. This rate is critical as the Department of Education uses this as a measure to sanction schools; institutions with CDRs of 25% or greater for three years are subject to sanctions [IIID-69] [IIID-70].

The Saddleback College Financial Aid Office monitors the cohort rate annually, and is actively finding ways to educate students of the responsibilities and consequences of borrowing [IIID-71]. For example, the College provides financial literacy counseling to all students wanting to borrow. Students are also required to log into the National Student Loan Database System (NSLDS) [IIID-72] [IIID-73] and provide copy of their loan debt summary; if student has student loan debt incurred, must also provide copy of calculator page showing estimated repayment amount based on career objective [IIID-74].

ANALYSIS AND EVALUATION

The College's financial aid default rate for the last three years is less than half the sanctionable rate according to federal government regulations. Student loan default rates, revenues, and related matters are monitored and assessed to ensure compliance with Federal Regulations [IIID-72].

Contractual Agreements

16. Contractual agreements with external entities are consistent with the mission and goals of the institution, governed by institutional policies, and contain appropriate provisions to maintain the integrity of the institution and the quality of its programs, services, and operations.

EVIDENCE OF MEETING THE STANDARD

Contractual agreements with outside entities are governed by board policies and regulations, which are established to ensure that they are consistent with the mission and strategic goals of the College. This include BP/AR 3101.5, Fiscal Management, which states that the District must maintain sound fiscal management that ensures all activities comport with the educational objectives of the District [IIID-75]. The vice chancellor, business services, manages all contracts and has the authority to approve all contracts that do not exceed \$100,000 [IIID-40]. Contracts over that amount must be approved by the board.

Ultimately, it is responsibility of the board of trustees to oversee all contracts and to ensure that they maintain the integrity of the programs, services, and operations of the District and College.

The District provides numerous resources, available on the District's SharePoint site [IIID-76], to assist individuals at the College to successfully implement contract processes [IIID-77]. These resources include competitive bidding and public contracting guidelines [IIID-78] [IIID-79], contract process guidelines [IIID-80] [IIID-81], and a contract cover and routing sheet [IIID-82] that is utilized to document the purpose of the contract and ensure that appropriate college managers and administrators are aware of and approve of the contract. The District's SharePoint site also provides contract templates for numerous contract types including educational services agreements, field trips and educational tours, and independent contractor agreements.

The District has recently purchased a contract management tool, Total Contract Manager, and will soon be implementing this product to ensure that contracts are appropriately executed, serve as a document repository, and notify the appropriate individuals when contracts need to be renewed or rebid.

ANALYSIS AND EVALUATION

Contractual agreements established with external entities are consistent with the mission and goals of the College. Through their oversight, the board of trustees has ultimate responsibility to ensure that these contracts maintain the integrity of the College's programs, services, and operations. Managers who develop college contracts for approval by the Vice Chancellor of Business Services confirm adherence to board policies and are responsible for ensuring the contracts are consistent with the College's mission and goals [IIID-83] [IIID-84]. District administrators ensure that contracts are administered in adherence with all state and federal guidelines [IIID-85] [IIID-86].

Standard I:

Mission, Academic Quality and Institutional Effectiveness, and Integrity

A. Mission

1. The mission describes the institutions broad educational purposes, its intended student population, the types of degrees and other credentials it offers, and its commitment to student learning and achievement.

Eligibility Requirement 6

The institution's educational mission is clearly defined, adopted and published by its governing board, consistent with its legal authorization, and is appropriate to a degree granting institution of higher education, and the constituency it seeks to serve. The mission statement defines institutional commitment to student learning and achievement.

Evidence of Meeting the Standard

The Saddleback College mission, supported by the vision and values, clearly describes the College's educational purposes, the intended student population, the degrees and credentials offered, and its commitment to student learning and success. The mission, vision, and values are regularly reviewed and revised as needed to ensure that they continue to describe the primary educational purposes of the College. The current mission, vision, and values are below.

Our Mission:

Saddleback College empowers its students and the south Orange County community by providing a comprehensive array of high-quality courses and programs that foster student learning and success in the attainment of academic degrees and career technical certificates transfer to four-year institutions, improvement of basic skills, and lifelong learning.

Our Vision:

Saddleback College will be the first choice of students who seek a dynamic, innovative, and student-centered postsecondary education.

Our Values:

Saddleback College embraces:

Commitment

We commit to fulfilling our mission to serve the south Orange County community.

Excellence

We dedicate ourselves to excellence in academics, student support, and community service.

Collegiality

We foster a climate of integrity, honesty, and respect.

Success

We place our highest priority on student learning and delivering comprehensive support for student success.

Partnership

We strive to develop strong and lasting partnerships among students, faculty, staff, and the community.

Innovation

We anticipate and welcome change by encouraging innovation and creativity.

Academic Freedom

We endorse academic freedom and the open exchange of ideas.

Sustainability

We promote environmental sustainability and use our resources responsibly to reduce our ecological impact.

Inclusiveness

We cultivate equity and diversity by embracing all cultures, ideas, and perspectives.

Global Awareness

We recognize the importance of global awareness and prepare our students to live and work in an increasingly interconnected world (1.A.1.1).

Educational Purpose

The broad educational purpose of Saddleback College as described in the mission is to serve the varied needs of its students and the surrounding community. The College aims to promote student learning and success through consistently offering high-quality courses and programs that make it possible for students to achieve a variety of educational goals including academic degrees, career technical certificates, transfer to four-year institutions, improvement of basic skills, and lifelong learning. Through a comprehensive curriculum process, courses and programs are developed, reviewed, and updated to ensure the curriculum is of high quality, reflective of the current state of the discipline, and responsive to the changing needs of the students and the community. Through a well-integrated review process, courses, programs, student services, and administrative units are continuously evaluated and improved with a focus on supporting student achievement.

The mission is central to institutional planning and relies on data from internal and external scans to identify the educational needs of the students and of the community (1.A.1.2). External scans

are utilized to better understand the colleges' service area, demographic profile, enrollment trends, and labor market data. This data informs program and institutional planning through the program review and strategic planning processes. (1.A.1.2, 1.A.1.3). Data from surveys and scans identify target occupations, potential new programs, and describe gaps that exist between target occupations and educational opportunities (1.A.1.2, 1.A.1.3).

The mission of every instructional program, administrative unit, and student support service unit on campus is created in alignment with the college mission (1.A.1.2). In addition, the College mission is aligned with the South Orange County Community College (SOCCCD) mission, which reads:

South Orange County Community College District provides a dynamic and innovative learning environment dedicated to student success and economic growth of the region (1.A.1.3). The Saddleback College Mission meets the criteria established in the California Education code 66010.4 (1.A.1.4)

The mission describes the intended student population and includes students who strive to obtain academic degrees or career technical certificates, as well as those whose goal is to transfer to four-year institutions, to improve basic skills, and to continue with lifelong learning. The SOCCCD external scan and enrollment projections identify the potential student population in the Saddleback College service area. Although students seeking certificates, degrees, and transfer make up the majority of the College's demographics, the service area of the College has a higher median age than the rest of Orange County and thus lifelong learning continues to be a significant focus through the Emeritus Institute and Community Education (1.2). In addition, the number of students enrolling who are underprepared for college-level work is increasing, which necessitated a strengthening of the college's focus on basic skills instruction, including the addition of the Adult ESL program. The actual student population as well as their educational goals and objectives are identified primarily through data from the initial California Community College (CCC) application and registration updates. (1.A.1.5).

To meet the diverse needs of the community and its students, Saddleback College offers 135 Associate Degrees, 16 Certificates of achievement, and 32 occupational skills awards (1.A.1.6) The college enrolls approximately 26,000 students each semester. In 2016, over 1300 students transferred to four year institutions including 486 to the University of California (UC) and 903 to California State University (CSU) (1.A.1.7)

The College's commitment to basic skills education is evident in as enrollments have doubled since 2010 (1.5.5). The College commitment to lifelong learning is evident through the Community Education and Emeritus Institute offerings. Nearly 17,000 learners of all ages attended Community Education classes in 2014-2015. Through College for Kids, the After School Experience, and the Summer Experience, more than 600 arts, academic, STEM, personal and cultural enrichment classes were offered to almost 11,000 K-12 students in 2014 – 2015. In

2015 – 2016 the Emeritus Institute offered more than 200 course sections and enrolled 5,500 older adults (1.8).

Saddleback College also offers courses in a variety of instructional modalities including face-to-face, online, and hybrid, both online and in-person. Since 2010 there has been an **percent** increase in courses offered online, in large part due to student demand. Currently, approximately 20% of courses are offered online (1.5.2). As a result, the College also increased online tutoring and counseling in order to better serve the needs of online students. The commitment to online education is addressed in Standard II.A.5 and the QFE for online education.

The College's commitment to student success is evident in the variety of programs and services available to support student learning and achievement. In addition to standard student support programs such as counseling services and financial aid, the College also offers a variety of special programs and programs, many of which target specific populations. These include Advancement Via Individual Determination (AVID), a Bridge to Engineering program, a Career and Re-Entry Center, the Cooperative Agencies for Educations (CARE) program, the Freshman Advantage program, an Honors Program, a state of the art Library and Learning Resources Center (LRC), an Office of Student Development, the Program Assistant Student-Athlete Success (PASS) program, the Transfer Center, in person and online tutoring services, the Veterans Education and Transition Services Center (VETS), to name a few. ([Link to student services](#), and 1.8, 1.10) These are outlined in detail in **1.2** below. Saddleback's commitment to student learning is also evident through financial aid resources that have been allocated to students, including **over \$732,000** in scholarship awards ([citation](#)).

Analysis and Evaluation

The Saddleback College mission describes the College's educational purposes, the student population, and the degrees and credentials offered. It also reflects the College's commitment to student learning and success. The mission meets the criteria set forth by California Education Code 66010.4 (1.4). Grounded by the mission, the College responds to the needs of its students and the changing demographics of the community, and commits resources to promote learning and achievement for all students.

2. The institution uses data to determine how effectively it is accomplishing its mission, and whether the mission directs institutional priorities in meeting the educational needs of students.

Evidence of Meeting the Standard

Saddleback College uses data to: 1) review, revise, and align the mission; 2) direct institutional priorities; 3) assess student achievement; 4) evaluate outcomes at the course, program, unit, and institutional level; and 5) examine educational needs and opportunities ([Integrated Strategic Plan](#), [Current Strat Plan](#), [Scorecard data](#), [EPA annual report](#), [\(SSSP Report updated jp\)](#)). The Office of

Planning, Research, and Accreditation (OPRA), managed by the Director of Planning, Research, and Accreditation, is responsible for the coordination of research and data college wide.

Mission Review and Alignment

The College uses data to review and, if necessary revise, the mission statement on an annual basis, with a more comprehensive review and alignment every third through the strategic planning process. Annual review is guided by ongoing data analysis and sharing between the OPRA and all College entities to ensure that the college is informed about the students it serves and their specific needs. Data used by the Planning and Budget Steering Committee (PBSC) in the annual review of the mission is gathered from the annual Institutional Effectiveness Annual Report (IEAR), annual updates of institutional plans, student surveys, employee surveys, demographic analysis, and the South Orange County Economic Report among other sources.

Mission alignment analysis occurs every three years, coinciding with the beginning and midterm review of the strategic plan. Data from internal and external scans, including a comprehensive districtwide external scan conducted by the District and College research offices, inform the mission review and alignment as a key step in the strategic planning process and setting of institutional priorities. This includes student surveys, college-wide and districtwide employee surveys, the IEAR, ([Link OPRA x 3](#)). The districtwide external scan consists of a detailed data analysis about the demography of the region and the service area, changes in the labor market, and trends in higher education. The review and alignment of the mission ensures that the programs and services offered at the College meet the needs of both current and prospective students, as well as the larger community, and that the College's mission is in alignment with that of the District.

Institutional Priorities

The College's mission is central to the determination of institutional priorities. Through integrated institutional planning, data is used to direct goals, objectives, activities, and strategies, as well as to evaluate outcomes. The integrated plans and initiatives include the districtwide strategic plan, the college's strategic plan, the Student Success and Support Plan ([SSSP](#)), the Student Equity Plan ([SEP](#)), the Basic Skills Initiative ([BSI](#)), the Enrollment Management Plan ([EMP](#)), the Technology Master, and the Economic and Workforce Development Plan ([EWP](#)), just to name a few ([Link Docs here](#)). While each planning committee or work group uses data to direct and evaluate the effectiveness of their individual planning efforts, PBSC is responsible for coordinating regular reviews and updates to the strategic plan and ensuring the integration of all planning efforts ([Link to current Strat Plan](#)). Through evaluation of all integrated plans and initiatives, students' educational needs are identified and institutional priorities are realigned. See 1.B.9 for a more detailed discussion of integrated planning.

Student Learning and Achievement

The College uses data to assess student learning and achievement. Student success related to the attainment of academic degrees and career technical certificates, transfer to four-year institutions, and improvement of basic skills, is a central part of the College's mission, and is measured against data provided by the California Community Colleges Chancellor's Office MIS Data Mart Student Success Scorecard (CCCCO Student Success Scorecard) ([Link to Scorecard](#)). The Student Success Scorecard data tracks cohorts of students related to completion of degrees, certificates, transfer, persistence, 30-unit completion rate, and remedial math and English progress rates. These measures of achievement are further analyzed by OPRA and published in reports that examine Scorecard Data trends and historical analyses of degree certificates, success, and retention. ([link to reports OPRA website](#)). College data regarding historical transfer patterns, demographic characteristics, and locally-determined success metrics are also analyzed and published on the OPRA website ([Link here](#)). Achievement data is also examined at the program level and reported through program review. This data is automatically available disaggregated by teaching modality (face-to-face and online) and can be disaggregated for other specific populations such as gender, ethnicity, or age by a specific pull from the District's data warehouse known as inform (EVI – Program Review Report). Several programs report achievement data that have become program level institutional standards. ([Link to ACCJC annual report](#)). Annually, Scorecard data is presented to College administrative and faculty leadership and to the board of trustees ([Link July BOI presentation Management team minutes July 28, 2016 etc.](#)).

Outcomes Assessment

The College has had processes in place for over a decade that examine data to evaluate course, program, and institutional student learning outcomes, as well as student support unit and administrative unit outcomes. These processes were developed by the Educational Planning and Assessment committee (EPA) and are regularly revised and updated to ensure relevance and in response to external accreditation requirements ([Link to Handbooks SLO/AUO](#)). The SLO/AUO processes are described in more detail in I.B.2. Through the PR/AUR process, outcomes assessment data is evaluated to determine the ability of each program or unit to support the educational needs of students. The end result of the program and administrative unit review is a data-driven needs assessment that direct program and institutional priorities and resource allocations. Program and administrative unit review will be described in detail in I.B.5 ([PR/AUR Handbooks](#)). EPA oversees both the outcome assessment and review processes.

Educational Needs and Opportunities

The College systematically gathers information and examines data to explore the educational needs of students and to identify areas of opportunities and activities that have the potential to increase student success through grant-funded projects and initiatives ([SSSP, BSI, SEP](#)). Through these grants and initiatives, the College participates in data analysis of specific student populations and tracks outcomes at midpoints and at the end of the grant (initiative) term. The

outcomes of these analyses make it possible to direct institutional resources to meet the needs of specifically identified subpopulations of students.

Analysis and Evaluation

The College uses data to determine how effectively it is achieving its mission and to ensure that the mission directs institutional priorities to meet the educational needs of students. A culture of evidence and inquiry college-wide is coordinated and supported through the Assistant Vice President for Institutional Effectiveness (AVPIE), OPRA and, EPA promote data-driven planning and decision-making aligned with the college mission.

While data is well-integrated into the planning, achievement, outcomes assessment and PR/AUR processes at the College, there is a recognized need for an increased college wide understanding of data related to Student Success Scorecard metrics and the use of these metrics in setting institutional goals for student learning and achievement. In spring 2016, the AVPIE and the OPRA hosted the first annual Student Success Metrics Summit in an effort to educate and engage stakeholders in discussions regarding the CCCO Student Success Scorecard data, Institution Set Standards (ISS), and the Institutional Effectiveness Partnership Initiatives (IEPI). A Quality Focused Essay (QFE) was developed to further promote college wide, broad based understanding and use of Student Success data to direct planning, institutional priorities, goal setting and to evaluate accomplishment of the mission.

- 3. The institution's programs and services are aligned with its mission. The mission guides institutional decision-making, planning, and resource allocation and informs institutional goals for student learning and achievement.**

Saddleback College enriches its students and the south Orange County Community by providing a comprehensive array of high-quality courses and programs that foster student learning and success in the attainment of academic degrees and career technical certificates, transfer to four-year institutions, improvement of basic skills, and lifelong learning. (My reference) delete for final draft

Evidence of Meeting the Standard

Saddleback College offers over 1,700 courses and 70 instructional programs that are supported by more than 40 student support and administrative unit (1.A.3.1ACCJC Annual Report 2016). Through the program and administrative unit review process (PR/AUR), completed every two years, each program, student support unit, and administrative unit aligns future objectives with the College mission and vision (1.A.3.2, 1.A.3.3). Through this process, each program, student support unit, and administrative unit also describes its' specific mission and how it serves to support the College's mission, vision, and strategic plan. All instructional programs are required to go through the same PR process and address how the program is aligned with the mission in relation to all teaching modalities such as face-to-face and online.

During the review process, a thorough needs assessment is completed that addresses human resources, instruction, service, research, technology, equipment, facilities, marketing, and outreach needs. Once needs are identified, objectives and action steps to meet those needs are developed, and these, along with resource allocation requests, are input into TracDat. In order to qualify for resource allocations, the resource requests must be identified in the PR/AUR and linked to the strategic plan (1.A.3.4, 1.A.3.5, A.3 1.6 See Saddleback College Resource Allocation Process Model. Do we need any documents from the process as evidence?).

Ultimately, the PR/AUR process is intended to ensure quality programs and support services and effective use of the College's resources. PRs and AURs are key components, along with student learning outcomes (SLO) assessment, administrative unit outcomes (AUO) assessment, and ongoing curriculum assessment, utilized to evaluate institutional effectiveness at Saddleback College. The PR /AUR process is described in detail in I.B.5.

The mission is central to strategic planning at the College, and, through the strategic plan, it guides institutional decision-making. The first step of the strategic planning process is an annual review of the college mission statement ([Link Integrated Strat planning process](#)). Every three years the college also conducts a mission alignment analysis coinciding with the midterm review of the integrated strategic plan and the districtwide external scan. This alignment ensures that the programs and services offered at the College meet the needs of the current students and the College's intended population ([link Strategic Plan, updated Integrated Strat planning Process, minutes related to mission alignment external scan DWF, PBSC agenda/minutes 8/4/16](#)).

The strategic planning process is a comprehensive and collaborative tool that enables the College to accomplish its mission and move toward its vision ([updated Integrated Strat planning Process](#)). The 2014 – 2020 Strategic Plan includes four overarching goals that are aligned with the SOCCCD goals: 1) Respectful Interactions; 2) Student Success; 3) Economic and Workforce Development; and 4) Financial Health and Institutional Effectiveness. Other College plans and initiatives are integrated with the strategic plan, and therefore, are also aligned with the College Mission. These include the Student Equity Plan (SEP), the Basic Skills Initiative (BSI), the Technology Plan, the Economic and Workforce Development Plan and the Enrollment Management Plan. Evidence of how the mission guides institutional decision-making and resource allocation through the strategic plan can be found in the updated Strategic Plan ([Link to Strat Plan on OPR site](#)). The Saddleback College Integrated Strategic Planning Process will be discussed in detail in I.B.9 ([Link Saddleback College Integrated Strategic Planning Process](#)).

The College mission broadly states institutional goals for student learning and achievement as “success in the attainment of academic degrees, career and technical certificates, and transfer to four-year programs, as well as the improvement of basic skills and lifelong learning. ([Link Mission](#)). The broad goals in the mission are closely associated with the Student Success Scorecard metrics. To ensure that the mission is being accomplished, OPRA regularly generates reports that analyzes Scorecard data specific to the College with attention to historical

performance and trends to allow comparisons to statewide performance. These reports include: 1) Milestones: Persistence Rate 30 Units Rate Five Year Trends; 2) Saddleback College Degree/Transfer Completion Rates, Career Technical Education Completion Rates, and Career Development College Preparation Completion Rates; 3) Basic Skills Success; 4) Saddleback College Awards 2014/2015 Academic Year Data and Long Term Trends in Degrees and Certificates Awarded; 5) Saddleback College Awards 2014/2015 Academic Year Data and Long Term Trends in Degrees and Certificates Awarded; 6) Saddleback College Transfers 2003 to 2013 Long Term Trends; and 7) Measures of Saddleback College's Demographic and Academic Characteristics of Students 2013-2015 (Fall Semesters) ([Links x 7 to OPRA files](#)) These reports provide the college community, especially planning and decision-making bodies, the information needed to both set appropriate goals for student achievement and to measure success.

At the state and federal levels, recent mandates focused on student success metrics including the Student Success Scorecard metrics, institution-set standards (ISS) and the Institutional Effectiveness Partnership Initiative (IEPI) have required the college to explicitly state goals related to student success and achievement. In spring 2016 in response to those requirements, the Student Success Metrics Summit was hosted by the AACC and CACRA ([Minutes or link to presentation](#)). This Metrics Summit served as a way to educate the college community and to begin college wide dialogue about student success metrics including the CCCCO Scorecard and the ACCJC annual report.

Analysis and Evaluation

Through the well-established PR/AUR processes that have existed for more than a decade, every instructional program, student support unit, and administrative unit on campus has a mission that is aligned with and supportive of the College mission. The review process also enables programs and units to develop objectives and action steps and request funding to ensure that the mission is accomplished. Through the College's strategic plan, as well as integrated plans and initiatives, the mission informs institutional goals and guides institutional decision-making, planning, and resource allocation. The College recognizes that although there is broad-based participation in planning, decision-making, and the resource allocation process, there exists a lack of understanding related to student success metrics and setting institutional goals for student learning and achievement. A QFE was developed to promote institutional effectiveness through the use of student success metrics to inform goals.

- 4. The institution articulates its mission in a widely published statement approved by the governing board. The mission statement is periodically reviewed and updated as necessary.**

Evidence of Meeting the Standard

The College articulates its mission in a widely published statement that is reviewed annually by the college and the SOCCCD Board of Trustees (BOT), and was most recently reviewed and

approved by the BOT on May 18, 2015 in accordance with Board Policy 101 (1.A.4.1). The Planning and Budget Steering Committee (PBSC) initiates a review of the mission statement on a regular basis to ensure that the programs and services offered at the College meet the needs of current students and the College's intended population. Data from internal and external scans inform the mission review. These include student surveys, employee surveys, demographic analysis, the IEAR, and the South Orange County Economic Report, among others. Alignment with the SOCCCD mission is also an essential component of the mission review. (1.A.4.1 PBSC Agenda Minutes Nov November 12, 2015, student survey link, employee survey link and district wide climate survey link and citations?) A review of the mission may also be undertaken outside of the regular review process in response to data from internal or external scans, in response to a changes in the strategic plan, or at the recommendation of any participatory governance group.

Proposed changes to the mission are presented by PBSC to Consultation Council, whose members solicit input from the different constituent groups on campus including the Academic Senate (AS) for faculty, the Associated Student Government (AGS) for students, CSEA and Classified Senate for staff, as well as from managers and administrators. (Citations from AS, ASG, CC, CSEA meetings). (1.A.4.2). Recommendations from Consultation Council are forwarded to the College President by April of each year and sent to the BOT for approval in May. The BOT reviews and approves the mission statement annually at either their May or June meeting (Link to previous 5 years of BOT approvals needed). The most recent review of the mission occurred through a request from faculty in fall 2015. A revision of the mission to more directly address online education was proposed and a discussion of all participatory groups ensued. While it was noted that there has been an increased emphasis on online education at the College, it was determined that the current mission adequately encompasses our online offerings (AS minutes). The final version was approved by Consultation Council and forwarded to the President in April, then approved by the BOT in May 2016. Every three years, the College also conducts a mission alignment analysis coinciding with the midterm review of the strategic plan and the districtwide external scan to ensure that the College and District missions are consistent (link integrated strategic planning process). Most recently, the College mission was aligned with the mission of the SOCCCD as part of the districtwide strategic planning process for 2014-2020 (EVI).

The Saddleback College mission is widely publicized and published on the College website (1.A.4.5) and in various documents including the:

- College Catalog (1.A.4.4)
- Student Handbook (1.A.4.6)
- Faculty Handbook (1.A.4.7)
- SLO Handbook: A Guide to the Writing, Assessing and Reporting of Student Learning Outcomes (SLOs) at Saddleback College (1.A.4.1.8)
- AUO Handbook: A Guide to the Writing, Assessing and Reporting of Administrative Unit Outcomes (SLOs) at Saddleback College (1.A.4.9)

- Program Review Handbook for Instructional Programs (1.A.4.10)
- Administrative Unit Review Handbook for Student Support and Administrative Services (1.A.4.11)
- Faculty, staff, manager, and administrator business cards

In addition, the mission appears on all Consultation Council agendas to serve as a reminder that the College mission must be considered in planning and decision-making. The mission, vision, and values are displayed in all division offices, in the library, and in the Student Services Center, as well as in lecture halls, conference rooms, and classrooms across campus. Finally, as part of the program review and administrative and student support unit review process, each program and administrative and student support unit has a mission that is aligned with the mission of the college and reviewed every two years. (1.A.4.8, 1.A.4.9, 1.A.4.10, 1.A.4.11).

Analysis and Evaluation

The Saddleback College mission is widely publicized and serves to guide all planning and decision making at the College. The mission is reviewed regularly through the College's planning process, as part of the integrated strategic planning process, in response to data from internal and external scans, or at the recommendation of any participatory governance group (1.A.4.12, 1.A.4.10, 1.A.4.11). All constituent groups, including students, faculty, staff, managers, and administrators, participate in the review and revision of the mission of the College.

Evidence Forthcoming

OBSOLETE

Standard I:

Mission, Academic Quality and Institutional Effectiveness, and Integrity

B. Assuring Academic Quality and Institutional Effectiveness – Academic Quality

- 1. The institution demonstrates a sustained substantive and collegial dialog about student outcomes, student equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement.**

Evidence of Meeting the Standard

Saddleback College faculty, classified staff, administration, and student engage in sustained and substantive dialogue regarding student outcomes, student equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement. The College has structured this dialogue through 1) academic departments and divisions and student support and administrative units, 2) participatory governance groups and committees, 3) planning groups and committees, including strategic planning groups, and decision-making bodies, and 4) professional development activities.

Academic Departments and Divisions and Student Support and Academic Units

In academic departments and divisions and in student support and administrative units, faculty, staff, administrators, students, and advisory group members work together to improve courses and programs and to develop strategies to improve student outcomes, academic quality, and institutional effectiveness. Extensive dialogue occurs through the program review (PR), and administrative unit review (AUR) processes (see I.B.5 for more detail). Program and administrative unit review teams select, analyze, and interpret data regarding programs and services and make recommendations to improve their effectiveness (Link PR/AUR Handbooks). PRs are discussed in Academic Senate meetings and approved and AURs are discussed in Management Team meetings and approved. Once approved, the reviews are posted in TracDat, and on the EPA Sharepoint site, where they are available to all employees. In many cases, PRs and AURs are also posted on the department or unit web page where they are available to the public. Once every four years, each academic program, student support unit, and administrative unit presents a summary of accomplishments, challenges, needs, and plans to Consultation Council (CC), the principle decision-making body at the College (minutes of CC with PR shared). This presentation is followed by questions and discussion.

In academic departments and divisions, faculty work collaboratively and engage in ongoing discussions as they determine how to use SLO results to improve instruction and increase student success. In student support and administrative units, administrators, managers, faculty, and staff work collaboratively and engage in ongoing discussions as they determine how to use AUO results to improve their services and more effectively contribute to increased student success.

Participatory Governance Groups and Committees

Participatory governance is an essential part of planning and decision making at Saddleback and it is the cornerstone of dialogue at the College. Each constituent group is represented by a body, which serves as the voice of that group in planning and decision-making. During constituent group meetings, dialogue and debate is essential prior to consensus or voting. Each group also elects their own representatives to collegewide and districtwide participatory governance committees.

The Academic Senate represents faculty, and is primarily responsible for making recommendations with respect to academic standards and professional matters. The California School Employees Association (CSEA) and Classified Senate represents classified employees and their interests. Through the Associated Student Government (ASG), students participate in governance and planning as well as other college and districtwide committees ([Link to Governance Manual Committee descriptions p. 11 & 12](#)). In participatory governance committees, members are tasked with soliciting input from their peers and representing them at the meetings. Broad participation in meetings is encouraged and input from committee members from each constituent group is given serious consideration prior to consensus or voting. Committees that provide a forum for sustained collegial dialogue on outcomes, equity, quality, effectiveness, and continuous improvement are many and include the: program advisory groups, Accreditation Steering Committee and standard teams, Basic Skills Initiative Committee, Curriculum Committee, Economic and Workforce Development Committee, Educational Planning and Assessment Committee, Equity and Diversity Committee, Honors Board, Matriculation Advisory Committee, Online Education Committee, Outreach Committee, strategic planning groups, Student Equity Plan Committee and work groups, the Student Services Coordinating Committee and work groups, and the Technology Committee, among others (LINKS). ([Committees from Academic Senate Web site link here](#))

All meetings are open to the college community, and in order to communicate the work of the committees, all member minutes are posted on each committee's SharePoint site. Members also make regular presentation at their constituent group meetings..

Planning Groups and Committees

The primary planning and decision-making committees at the College are Consultation Council (CC) and PBSC, supported by the work of other committees such as the strategic planning groups, EPA, Enrollment Management Committee, Student Equity Plan Core Team, Student Success Coordinating Committee, and Technology Committee, among others. The CC is the college's main strategic planning and recommending body and is composed of members from all constituent groups. PBSC is the college's coordinating body for planning and budgeting processes at the College, including strategic planning ([link](#)). These committee engage with and regularly dialogue about outcomes, equity, academic quality, institutional effectiveness, and

continuous improvement of student learning and achievement. EPA has the explicit responsibility to oversee the College's efforts to engage in ongoing quality improvement and to document how the College fulfills its mission through outcomes assessment and systematic review at the program and administrative unit level. EPA also promotes collegewide dialogue related to outcomes assessment and PR/AUR through ongoing presentations during professional development week, at Academic Senate and Membership Team meetings, and during special programming such as the Student Success Metrics Summit and the Online Education Summit ([B.1.1.11 Educational Planning and Assessment \(EPA\). \(Link to PD schedule or presentation\)](#)). The co-chairs of PBSC oversee and coordinate all planning processes at the College, and ensure the strategic plan as well as integrated plans and initiatives are updated regularly and broadly communicated.

Dialogue related to the activities of all planning and decision-making groups are well documented and shared through websites and SharePoint sites of the committees, and work groups involved in establishing and evaluating these processes ([Link SSSP, SLP, BSI, EMP, EWD and TP minutes](#)). A more detailed discussion of the integrated strategic planning process can be found in I.B.9 below. OPRA and the AVPIE have also promoted dialogue campus wide presentations and discussions related to student success metrics, institutional set standards (ISS), and the institutional effectiveness partnership initiatives (IEPI). ([Minutes to PBSC, student success metrics summit, etc](#)).

Professional Development Activities

The College offers employees, particularly faculty, a variety of opportunities to participate in professional development (PD) and to dialogue about academic quality and continuous improvement of student learning. Each semester PD week provides multiple opportunities for faculty to meet and discuss student learning outcomes, student equity, the quality of programs and services, and initiatives related to student achievement. Experts on teaching and learning, including Saddleback College faculty, share their knowledge, skills, and expertise on topics such as new instructional strategies, the use of technology in the classroom, responding to changing student demographics, improving computer skills, and utilizing campus resources to improve student outcomes and success ([link to the PD schedule here](#)). Every year during PD week, the chancellor and college president report on the state of the District and College, including all planning efforts and continuous improvement activities. ([1.B.1.1 Annual State of the College: A Culture of Excellence need link](#)). Presentations are also made by committees and planning groups such as the Accreditation Steering Committee, EPA, the Student Success Coordinating Committee, and Student Equity Plan Core Team in relation to their activities, achievements, and ongoing work to support students and support their success ([1.B.1.2, Student Success Coordinating Committee Update – need link and Student Equity Plan Presentations – need links to spring 2016 flex week presentations x 3](#)).

Ongoing dialogue around best practices in teaching and learning has resulted in the updated Faculty Center for Student Success (FCSS) and the reinvigorated Institute for Teaching and Learning (ITL). Workshops and seminar presented by the FCSS and the ITL include class assessment practices, basic skills instruction across the curriculum, online course design, and best practices in online instruction, among others. Through the FCSS, one-on-one, small group, and online meetings promote dialogue related to instruction and technology, and are widely available for faculty with the goal of improving instructional delivery and student learning ([link to website](#)). In addition to professional development opportunities on campus, funding is available through the Academic Senate for full-time and part-time faculty who seek to attend off-campus conferences and workshops ([should we say over XXX faculty received funding for professional development in 2015 – 2016.](#)). The College also offers faculty the opportunity to participate in The Great Teachers Seminar, an annual off-campus retreat that allows faculty to share best practices and improve instruction and student learning in a collegial, supportive environment (EVI). Dialogue related to the need for increased PD opportunities for classified staff to improve their ability to support student learning and institutional effectiveness has resulted in new PD opportunities. ([Link to Group to Team?](#))

Sustained dialogue related to online education occurs in the Online Education Committee (OEC). Two fulltime faculty members co-chair the OEC, with support from the dean of online educations and learning resources (OELR). Discussions during OEC meetings focus on quality instruction, instructional technology best practices in online education, faculty training, curriculum approval for online courses, and the evaluation of learning management systems (LMSs) ([Cite minutes from a typical meeting](#)).

The evaluation of academic quality for both face-to-face and online courses occurs in the Academic Senate, the Curriculum Committee, the EPA, and in the OEC. Dialogue related to student outcomes and the comparability of student experiences based on instructional method also takes place in these committees.

Analysis and Evaluation

Saddleback College has a variety of forums that promote dialogue on outcomes, student equity, academic quality, institutional effectiveness, and the continuous improvement of student learning and achievement. Sustained collegial dialogue is evident through academic divisions and departments, student support units, administrative units, and in committees across the campus, as well as during special programming on these topics. A comprehensive approach to assessing SLOs/AUOs coupled with ongoing PR and AUR fosters dialogue among faculty, staff, administrators and students to continually improve the College's courses, programs, and services in the in order to increase student learning. ([See 1.B.2 SLOs, 1.B.5 PR/AUR and 1.B.9 institutional planning](#)) ([Link to SLO, AUO, PR, AUR handbooks and links](#)). The Employee Survey found that 67 percent of all employees reported to have participated in PR/AUR within their department or unit, ([Link to Employee Survey 2013](#)).

Participatory governance groups and committees, as well as planning groups and committees, focus on continuous improvement of student learning and achievement. Through the College strategic planning process, including evaluation of the goals and objectives, dialogue is substantive, sustained, and central to the College's commitment to student success, basic skills instruction, student equity, academic quality, institutional effectiveness, professional development, and online education.

Although the college websites and SharePoint sites are replete with evidence of dialogue from programs and units, participatory governance groups, and planning committees and groups, evidence of dialogue from committees outside of these key bodies is inconsistently documented. An opportunity to expand and sustain dialogue collegewide through an improved consistent committee process and documentation of dialogue was identified and approved through the Accreditation self-evaluation process. Improved processes related to college committees including roles, structures, and communication were approved through the participatory governance process and communicated through the Organizational Planning Manual ([pending approval Link](#)). Additionally, a QFE related to Student Success Metrics was undertaken to enrich the dialogue and to encourage the integration of Student Success Metrics in discussions related to student outcomes, equity, academic quality, effectiveness and continuous improvement of student learning and achievement.

2. The institution defines standards, assesses student learning outcomes for all instructional programs and student and learning support services. (ER 11)

ER 11 The institution defines standards for student achievement and assesses its performance against those standards. The institution publishes for each program the program's expected student learning and any program specific-achievement outcomes. Through regular and systematic assessment it demonstrates that students who complete programs no matter how or where they are offered, achieve the identified outcomes and that the standards for student achievement are met.

Evidence of Meeting the Standard

Student Learning Outcomes for Instructional Programs

The College evaluates student achievement through the assessment of student learning outcomes (SLOs) and through the assessment of student success indicators during the program review (PR) process. The assessment of student learning outcomes (SLOs) has been in place at the College for over a decade utilizing the process described in the *SLO Handbook: A Guide for the Writing, Assessing, and Reporting of Student Learning Outcomes (SLOs) at Saddleback* ([I.B.2.1](#)) and the *Program Review Handbook for Institutional Programs* ([LINK](#)). SLO assessment is a means to discover if students are learning what they are expected to learn in courses and programs ([Link](#)

I.B.2.1). The use of SLO assessment results is meant to stimulate discussion and direct activities to improve instructional delivery and student support on campus.

Faculty within a department or program develop course-level SLOs, program SLOs (PSLOs), and program specific-achievement outcomes related to indicators such as success rates, retention rates, or specific ISSs, as discussed in more detail in I.B.5 below. The College, through its Educational Planning and Assessment Committee (EPA) has also developed Institutional Student Learning Outcomes (ISLOs), which show the knowledge, skills, and abilities that students should expect to achieve as the result of completing a degree at Saddleback College.

Courses must have a minimum of three to five associated SLOs and programs must have a minimum of three to five PSLOs. Course-level SLOs are assessed annually in each course taught. SLOs are placed on course syllabi so students are aware of what they can expect to learn by the end of the course [reference Senate resolutions April 2014]. SLOs are stored in the TracDat system, along with methods of assessment, criteria for success, and assessment results. Department chairs are primarily responsible for entering SLO information in TracDat as well as the overall coordination, development, assessment, and reporting of SLOs. Division deans collect course syllabi each semester to verify that SLOs are placed on every syllabus. Although SLOs are not currently an official part of the course outlines of record (CORs), this is currently being rectified as each course goes through the curriculum review process and is therefore expected to be complete over the next five years. Nonetheless, these SLOs are available to all faculty on TracDat and to students through course syllabi. They are also posted on many department and program web pages. PSLOs are also published on department and program web pages and included in the College Catalog, and ISLOs are published on the College website and in the College Catalog (Link catalog).

Within TracDat, course-level SLOs are linked to PSLOs and to ISLOs, so that attainment of criteria at each level can be evaluated. Every two years during PR, the department chair will run the TracDat Comprehensive SLO Report, which provides a summary of all SLOs, criteria for success, assessment results, and the uses of those results. This report forms the basis of dialogue within the department.

During the PR process, program review teams (PRTs), led by the department chair, engage in dialogue about SLO attainment and provide examples of how SLO results have been used in courses and programs to make changes, such as in curriculum or teaching methodologies (Link PR Handbook). The PR process includes an examination of how SLO assessments contribute to overall PSLO and ISLO attainment, and how SLOs have been used to improve courses and programs. PRTs also analyze SLO results to determine if there are differences in results when comparing face-to-face courses to online education courses and identify actions to remedy any differences identified.

In 2014-2015, 100% of 838 unique courses had established SLOs, 2581 (98.5%) were assessed, and 2,366 (90.3%) of course-level SLOs met their criteria. ([Annual SLO Report 1.B.2.3](#)).

Examples of how SLO results have been used by faculty to make courses and programs more effective are recorded in TracDat and summarized in the Annual SLO Report produced by EPA. Examples of changes include, altering the mode of instruction, revising course outlines, creating rubrics to clarify assignments, increasing referrals to tutors in the LRC Tutoring Center, modifying the admission criteria for the nursing program, and adding lecture content and learning activities to enhance student skills. ([Annual SLO report; Link to Saddleback College SLOs, PSLOs, ISLOs Results and Using Them, Fall 2015](#)). Examples of PSLO attainment and the use of PSLO results from 2014-2015 are also published in the Annual SLO report ([Annual SLO Report p. 7 – 10](#)). Several programs have also set achievement goals that have become program specific ISSs. These have been reported in the ACCJC Annual Report and are posted on the EPA web page ([Link ACCJC Annual Reports 2015, 2016 and EPA Website](#)).

As a result of a student's overall experience at Saddleback College students should expect to develop knowledge, skills, and abilities across four broad areas identified by the following ISLO categories: effective communication, intellectual and practical skills, community/global consciousness and responsibility, and breadth of subject area knowledge. In TracDat, SLOs and PSLOs are mapped to ISLOs. This "roll up" has made it possible to create a report that can be used to evaluate ISLO attainment. While this report currently does exist, it is difficult to interpret and use in an efficient meaningful way. The EPA is currently working on revising the report to make it more useful. ISLOs, however, are currently evaluated through other means such as faculty ISLO activity reports, through CLA+ testing, and through activities in the Leadership lab. Faculty ISLO activity reports are reports generated by faculty that describes activities that build ISLO attainment. CLA+ is a external performance based assessment test used to evaluate critical-thinking, written communication skills, analysis and problem-solving, scientific and quantitative reasoning, and critical reading and evaluation. CLA+ assessment was implemented to evaluate student attainment of ISLOs in the 2015-2016 academic year ([Link to results](#)). In addition, a pilot project on the use of ePortfolios as a method to assess ISLO attainment was conducted in 2015-2016. The model used required students to upload signature assignments that assessed one or more of the College's ISLOs and to write a short reflection on their realization of those ISLOs. The pilot was considered successful by the faculty who participated and the ePortfolio evaluation task force, and plans for college wide implementation are currently underway ([Annual SLO Report p.14](#)).

Administrative Unit Outcomes for Student Support Services

The assessment of administrative unit outcomes (AUOs) in student support and administrative units is also well established at the College as described in the *AUO Handbook: A Guide for the Writing, Assessing, and Reporting of Administrative Unit Outcomes (AUOs) at Saddleback College* ([1.B.2.2](#)) and the *Administrative Unit Review Handbook for Student Support and*

Administrative Services ([Link](#)). AUO assessment is a means to discover if student support and administrative units are providing effective services to their constituencies, be they students, employees, or the community (1.B.2.2) AUO assessment results stimulate discussion and direct activities to improve student support and administrative services on campus. During the AUR process, administrative unit review teams (AURTs) examine the effectiveness, efficiency, quality, and relevance of their unit. The goal of the AUR process is to improve student learning and success through appropriate student support and administrative services ([Link AUR Handbook](#)). Examples of improved outcomes includes as a result of AUR include changes in the hours of service, increasing of one-on-one student contact, revised documentation, and increased access to services online.

Disaggregation of Results

The disaggregation of achievement results according to student characteristics (such as age, gender, and ethnicity) is possible through the inFORM Data Warehouse and includes retention, success rates, certificate or degree completion, and transfer (See more detail in 1.B.5 and 1.B.6 SEP). Through InFORM, programs are also able to disaggregate data by instructional mode (online versus face-to-face) in terms of success, retention and completion rates of individual courses. These reports are mandatorily run every two years when a program undergoes PR, and it is one of the primary sources of data used in the PR process.

The disaggregation of SLO results in TracDat has only recently been required and is limited to method of delivery. Many programs are still in the process of implementing this change. In relation to student characteristics, however, the College has always used aggregated data in order to discuss overall results with a course and program without linking it back to particular faculty or students. The College believes that the purpose behind SLO assessment is to engender a vital dialogue amongst faculty about how to improve instruction in order to achieve greater student success. If results were attributable to individual students and thus individual faculty, this would compromise the essential dialogue. Ongoing dialogue is taking place within the EPA committee about the benefits of moving to a disaggregated method of obtaining and reporting SLO assessment results. In fall 2016 the EPA implemented a method to input SLO data by method of instruction so comparisons can be made between courses offered face-to face and courses offered online.

Analysis and Evaluation

Saddleback College has well-established processes that define and assess outcomes for all courses, instructional programs, student support and administrative units, and degrees. SLOs and AUOs are assessed annually and serve as a basis for dialogue related to continuous quality improvement within all departments, programs and student support and administrative units. SLO, PSLO, AUO, and program-specific achievement data are evaluated through the PR and AUR process. Although programs have access to significant student success data disaggregated

by student characteristics and instructional method in the PR data sets available through the inFORM data warehouse, the college has only recently begun to disaggregate SLO data by instructional method. The disaggregation of SLO data by student characteristics is still under consideration by the College, and would require a significant shift in how this data is currently collected and reported.

QFE statement needed for success metrics

3. The institution establishes institution-set standards for student achievement, appropriate to its mission, assesses how well it is achieving them in pursuit of continuous achievement, and publishes this information.

Eligibility Requirement 11 Student Learning and Student Achievement

The institution defines standards for student achievement and assesses its performance against those standards. The institution publishes for each program the program's expected student learning and any program specific achievement outcomes. Through regular and systematic assessment, it demonstrates that students who complete programs, no matter how or where they are offered, achieve the identified outcomes and that the standards for student achievement are met.

Evidence of Meeting the Standard

The College has established institution-set standards (ISS) for all required student achievement metrics. The ISS are assessed annually, published in the ACCJC annual report and posted on the OPRA website and SharePoint site where they are available to all college employees. (Evidence 1.B.3.1 [Link to ACCJC Annual Reports 2014, 2015, 2016](#)). In 2012 – 2013 the Office of Planning, Research, and Accreditation (OPRA) lead collegewide dialogue related to setting internal standards of performance. The OPRA developed three methodologies to identify and adopt standards that included using state and national data bases to identify peer institutions as well as historical institutional performance. These three approaches to ISS development were presented and discussed by the Academic Senate, the EPA committee, the VPI Council (consisting of instructional plans and academic and classified administrators), the broader college management team, and the Consultation Council (main planning and decision making body at the college). The College developed institution-set standards for three metrics in the annual report: course completion rate, completed awards/certificates and annual transfers. The standards adopted for all three metrics were set by adding the three-year standard deviation to a three-year running average. This method was used to present the ISS in the 2014, 2015 and 2016 ACCJC Annual Reports ([Link to ACCJC Annual Reports 2014, 2015, 2016](#)).

In 2015-2016 new leadership in research and institutional effectiveness re-engaged in dialogue about set-standards and identified that the approach and calculations previously used were more reflective of set-standards that would be aspirational in nature rather than minimum thresholds or baseline expectations. Following this dialogue, the OPRA proposed a change to the calculation

of the set-standards (using the three year running average minus one standard deviation) so that the resulting ISS would be reflective of minimum thresholds rather than aspirational goals. These modifications were approved through the college's shared governance process and the proposed changes were additionally highlighted at the Student Success Metrics Summit and in governance meetings ([Link, Student Success Metrics Summit, AS, PBSC, CC minutes](#)). In the next 2017 ACCJC annual report, the college will adopt this new calculation for set standards.

Annually the College evaluates performance against the ISS, and promotes dialogue about ISS through instructional areas, and constituent groups, especially through the AS, the PBSC, and CC (AS, PBSC, CC minutes 3/816). Deeper dialogue through instructional areas and constituent groups and investigation by the research department is conducted especially when the college does not meet the ISS, to examine the college's performance ([Link Trend and Historical Reports OPRA](#)). Institution set standards for student achievement appropriate to the mission informs both the College and district wide strategic plans ([Link Standard 2 Success and transfer rates in Strategic Plan](#)). Finally, the College reports the findings to the ACCJC in the annual report, and publishes the report on the OPRA website and SharePoint sites ([Minutes CC and PBSC](#)).

In addition to the required ISS, the College chose to set program-level ISS for specific CTE programs in 2015. Although many of these programs have had standards of achievement for years through the internal program review process, formally identified ISS for CTE programs were first reported in the ACCJC Annual Report in 2015. Licensure examination pass rates and graduate employment rates were also added to the college ACCJC Annual Report in 2015. The achievement of each programs' specific ISS are published in completed program reviews, entered into TracDat, and posted on the LSA SharePoint site. Instructional programs set standards for achievement through the use of state and national benchmarks and trends, historical data, input from advisory boards, and labor market trends. For programs that are regulated by external accreditation standards, the program ISS are typically either at or above the state and national averages. If a program falls below their set standards action plans are put in place through program faculty and administrators to improve outcomes and published in the PR. The charts below constitute how all programs exceed their ISS for student achievement in licensure exam pass rates and job placement rates.

Program Level Institutional Set Standards

Program Title	Institutional-set Standard for Licensure Exam Pass Rate	Licensure Exam Pass Rate 2013 - 2014
Cosmetology	75%	76.5%
Emergency Medical Technician	60%	63%
Medical Lab Technician	90%	100%
Nursing	90%	94%
Paramedic	90%	99%

Licensure Exam Pass Rates

Program Level Institutional Set Standards

Program Title	Institutional-set Standard for Job Placement Rate	Job Placement Rate 2013 - 2014
Administrative Medical Assistant	60%	68.4%
Alcohol and Drug Studies	60%	66.7%
Cinema	50%	50%
Clinical Medical Assistant	60%	77.3%
Cosmetology	55%	66.7%
Early Childhood Teacher	60%	64.4%
Horticulture	60%	61.7%
Nursing	80%	80.0%
Paramedic	70%	100%

Job Placement Rates

Analysis and Evaluation

Institution set standards are used to analyze institutional effectiveness and academic quality. Methods used to set ISSs are aligned with common practices statewide. Institution set standards are aligned with the Mission of the College and are integrated into the Saddleback College Strategic Plan. The College has also adopted standards beyond those required by the Commission to include program-level institutional set standards related to licensure and graduate employment.

Although the College first set ISSs in 2014, when reevaluating the process used to set ISS in 2016, it was determined that there was an error in the calculation used to produce the ISS and the intent of the ISS for setting a minimum threshold. The calculation error was identified by the new director of research. The methodological concern was quickly reported to the ACCJC and was cited as an error in the previous year's approach ([Link to communication email evidence](#)). The ISSs are intended to reflect a minimum standard of performance so when results are below the set standard the institution is alerted to a problem and corrective action can be initiated to improve institutional performance. As a result of the previous method used to set the ISS, the standards that were set were very high and actually unrealistic. After studying historical data and trends, it was determined that a much more appropriate ISS would be derived from using the three-year average minus one standard deviation rather than plus one standard deviation. The difference in reference to course completion was an institutional set standard of 70.39% as opposed to the previously calculated 74.17%. The proposed method to set appropriate ISS was presented to planning and governance committees and shared at the spring Student Metrics Summit by the director of the planning, research and accreditation and approved ([Link to minutes AS, CC, PBSC and Metric summit presentation](#)). Initially in response to this discovery the college was going to submit the college ACCJC annual report late with a notation about changes to the ISS, but subsequently determined, in correspondence with ACCJC, that a late

annual report to ACCJC would not be prudent ([Link to correspondence](#)). Thus, the college kept its ISS the same as prior years, but has already addressed the change collegewide and is addressing the issues that came up with ISS in this self-study report. These changes will be reflected in the upcoming ACCJC report. The College has undertaken a QFE on student Success Metrics to formalize the structure, process and communication surrounding Student Success Metrics including ISS.

4. The institution uses assessment data and organizes its institutional processes to support student learning and student achievement.

Evidence of Meeting the Standard

The College uses assessment data to support student learning and student achievement. Data from assessment of students, courses, programs, and services, as well as assessment data at the institutional level, is used to improve processes and student outcomes (See 1.B.2, 1.B.3, 1.B.5, 1.B.9). Assessment data constitutes the foundation for student placement, SLO/AUO attainment, the review of programs and student support and administrative units, and the evaluation of student achievement. (1.A.2, 1.B.1, 1.B.2, 1.B.3, 1.B.5). Assessment data is integral to the strategic plan and integrated plans including the student equity plan (SEP), the technology plan, the economic and workforce development (EWD) plan, and the enrollment management plan (EMP) as described in 1.B.2, 1.B.3, 1.B.5, 1.B.6, and 1.B.9.

The assessment of students and obtaining of data begins as soon as a student applies to the College. Important information regarding student characteristics and educational goals are gathered at this time. Through the matriculation process, students are then assessed to ensure placement in appropriate courses. This placement makes it possible to identify students at risk, track cohort achievement, traps, and institute needed services to improve student learning outcomes and achievement. **Assessing overview statement** about SSSP activities that changed processes to promote learning and achievement like Freshman Advantage, Refresh, AVID, BSI tutoring etc,... In addition, each semester a Class Profile of student characteristics and matriculation levels of enrolled students is provided to each faculty member so that teaching methods can be correlated to the student readiness within the class (EVI).

Assessment of SLOs and AUOs is a well-established process that has been in place for over a decade at the college, as described in 1.B.2 above. Through the use of SLO and AUO assessment results, changes are made to courses, programs, and student support and administrative services. This data, along with the PR data sets on student success and retention rates within courses, is used by programs and units to evaluate their strengths and weakness during to PR and AUR process and to make the necessary changes to improve student learning and achievement.

Data from PRs/AURs is utilized to identify needs and to derive resource requests, as well as to address progress in meeting objectives from the previous PR/AUR. Examples of PR/AUR assessment to support student learning and achievement include: [\(solicit examples from dept chairs and administrators\)](#). Labor Market data is also included in PRs for CTE programs. Several CTE programs have used labor market data to support growth and expansion including the Health Information Technology program, the Medical Assisting program, and the Drug and Alcohol Education Program ([Link to the PR of these programs](#)). Through the AUR process organizational processes that have changed include: [\(solicit examples from dept chairs and administrators\)](#) to promote student achievement.

The position of the Assistant Vice President for Institutional Effectiveness (AVPIE) was created in 2015 in order to coordinate collegewide efforts to use assessment data for the improvement of institutional effectiveness and in support learning and achievement. The AVPIE reports to the Vice President of Instruction (VPI) and works closely with the director of PRA. In addition to institutional effectiveness, the AVPIE is responsible for online education, curriculum, and student success ([See org chart AVPIE and VPI](#)). The director of OPRA is responsible for leadership, coordination, and advocacy related to strategic planning, institutional research, and achievement metrics, as well as federal and state compliance to ensure institutional effectiveness.

Achievement metrics including completion rates (for prepared and underprepared students), degrees, certificates, transfer, and achievement gaps are integrated into strategic planning through goals and objectives related to success and their related indicators. Achievement relative to institution set standards (ISS) is reported annually to the ACCJC, published in ACCJC Annual Report, and available on the OPRA website ([Link to ACCJC Report 2016](#)). In addition, through OPRA, institutional assessment and achievement data is further analyzed from a historical perspective to identify trends and to enable statewide comparisons. These analyses include Scorecard Trend Reports, DataMart Trend Reports, and Institutional Data Trend Reports, all of which are available on the OPRA website ([Link to Research OPRA College Data Website](#)). If institutional performance falls below the ISS, the college takes action and initiates strategies to improve performance, as described in 1. B.3. The AVPIE and director of PRA also assist the strategic planning groups in the use of assessment data to set goals and evaluate performance relative to the Institutional Effectiveness Partnership Indicators (IEPIs) ([Link to Saddleback College Institutional Effectiveness Partnership Initiative](#)).

OPRA also supports collegewide needs for data and research. In addition to the director, OPRA is composed of a senior research and data analyst, a research and data analyst, and a project specialist for research. OPRA's research responsibility includes working closely with the AVPIE, as well as college faculty, administrators, and PRTs/AURT to provide data analysis and outcomes assessment related to SLOs/AUOs, PSLOs, ISLOs, program operations, and program impact. Research staff members also support college data collection and reporting needs as

required by state and federal accountability initiatives and compliance with state and federal laws and regulations. Research staff members work closely with and support the **Education Planning and Assessment Committee (EPA)**.

EPA coordinates and oversees the college's efforts to engage in comprehensive review and outcomes assessment in all courses, programs, and student support and administrative units in order to document ongoing quality improvement efforts as well as student learning and achievement. PR/AUR, SLO/AUO assessment, and curriculum all fall under the auspices of EPA. EPA is co-chaired by a faculty member and the director of planning, research, and accreditation. SLO/AUO assessment and PR/AUR are overseen by faculty coordinators and curriculum is overseen by a faculty chair of the Curriculum Committee. The effectiveness of the PR/AUR, SLO/AUO and curriculum processes to support student learning and achievement are regularly evaluated, updated, and improved by EPA, with approval from PBSC and Academic Senate ([Link to current SLO, AUO, PR, AUR Handbooks](#)).

PBSC is a participatory governance committee that is responsible for coordinating the college's planning efforts, including strategic planning, budget processes, and dialogue regarding student success metrics, ISSs, and IEPs. The PBSC makes recommendations to CC. CC is a participatory governance council and serves as the college's main planning and recommending body, responsible for making final recommendations to the college president.

In addition to the data available through the California Community College Chancellors Office (CCCCO) [Student Success Scorecard](#) and the CCCC Management of Information Systems DataMart, the College has access to quantitative institutional data continuously through the InFORM Data Warehouse. Through InFORM, various data sets and reports can be generated and disaggregated to provide detailed information by section, course, program, division, or the College as a whole about enrollment, productivity, fill rates, retention, success rates, student counts by age, gender, ethnicity, educational goal (including transfer), and awards by age, gender, major, and type of award, among others.

Analysis and Evaluation

The College regularly and systematically uses assessment data to support student learning and achievement. Assessment data comes from a variety of sources and is integrated planning, program and administrative unit review, resource allocations, and the evaluation of institutional effectiveness through student success metrics, available both externally and internally. The addition of the AVPIE, a fully staffed OPRA, and the [InFORM Data warehouse supported by district services personnel](#) are evidence of the College's commitment to an organizational structure and processes that are focused on using assessment data to support student learning and student achievement.

Although data is widely available at the College, dialogue related to student success and achievement in relationship to goal setting and the monitoring of goal attainment is limited. As a result, there are missed opportunities to disseminate effective strategies utilized to set meaningful goals and to expand on past work that has the potential to more broadly support learning and achievement. Therefore, the College has identified the need for a Quality Focused Essay related to the development of a deeper understanding of student success metrics collegewide, and the role that individual departments and units can have on larger institutional outcomes and student achievement.

- 5. The institution assesses accomplishment of its mission through Program Review and evaluation of goals and objectives, student learning outcomes, and student achievement. Quantitative and qualitative data are disaggregated for analysis by program type and mode of delivery.**

Evidence of Meeting the Standard

Every two years, all instructional programs at the College undergo program review (PR) ([Link to PR handbook](#)) and all student support and administrative units undergo administrative unit review (AUR) ([Link to AUR handbook](#)). These reviews are used to evaluate the effectiveness of programs and units in meeting the mission of the College, develop objectives and action steps for continuous quality improvement, and provide information for decision making in collegewide planning and resource allocation processes.

PR is a systematic process for the collection, analysis, and interpretation of data concerning a program and its curriculum and is utilized to make recommendations to improve student learning, student achievement, and program effectiveness. Data from a variety of sources is analyzed in the completion of the PR, including staffing reports, SLO assessment results (TracDat Comprehensive Program SLO Report), program progress reports (TracDat Program Objectives and Action Steps Progress Report), student achievement data from the data warehouse (inFORM Program Review Data Set), and, for CTE programs, labor market data from Economic Modeling Specialists, Inc. (EMSI). Additional research can also be requested from OPRA and included in the analysis. All data available through the inFORM data warehouse can be disaggregated by program and instructional method (such as face-to-face and online). The College has also recently begun to collect and report SLO data by instructional method.

As described in the Program Review Handbook for Instructional Programs, the main objectives of PR are to:

1. State program objectives and align future objectives with the college's mission and vision.
2. Collect and analyze data on key performance indicators, student learning outcomes (SLO)s, program activities, and accomplishments.

3. Examine and document the effectiveness of programs.
4. Develop recommendations and strategies concerning future program directions and needs (e.g., budget, staffing, and resources).
5. Provide an opportunity for programs to assess their relevance and position within the division and the college and with all other stakeholders.
6. Comply with federal and state law, Title 5, Student Equity, Perkins, the Student Success and Support program (formerly known as matriculation), ADA (Americans with Disabilities Act), and other legal or certification requirements. (PR Handbook, p. 3 08/15/2014).

The PR is completed by a program review team (PRT) composed of the department chair, one or more faculty subject experts, and other faculty staff, and/or administrators deemed necessary by the department chair. PR has three sections including the program overview and objectives, the review report, and a needs assessment. The appendices include copies of all data sources used in the completion of the report. The program overview and objectives provides a broad understanding of the program, current trends related to the program's mission, how the program meets the overall mission and/or vision of the College, how the program has used SLO results to make improvements to the program and its curriculum, how SLO assessments contributed to overall PSLO and ISLO attainment, and the program objectives for the upcoming two-year period. A detailed assessment of the program is completed in the review report section based on the collected quantitative and qualitative data. This section addresses issues related to staffing, curriculum and instruction, student success, facilities, technological infrastructure, and resources, and service, community outreach, and economic development. The final section, the needs assessment, is a summary of program needs as described in the review report. These includes human resource needs, instructional/service needs, research needs, technology, equipment, and other resource needs, facilities needs, and marketing and outreach needs.

Student support and administrative units undergo a similar process for AURs. AUR is a systematic process for the collection, analysis, and interpretation of data concerning an administrative unit, and is utilized in making recommendations to improve the effectiveness of the unit and its impact on student learning and student success. Data from a variety of sources is analyzed in the completion of the AUR, including staffing reports, AUO assessment results (TracDat Comprehensive Unit AUO Report), unit progress reports (TracDat Unit Objectives and Action Steps Progress Report), and student achievement data from the data warehouse (inFORM Division Administrative Unit Review Report), if applicable. Additional research can also be requested from OPRA and included in the analysis. Assistance for the collection and interpretation of data for PRs and AUR is provided by the Educational Planning and Assessment Committee (EPA), the faculty PR/AUR coordinator, and the Office of Planning, Research, and Accreditation (OPRA).

Annually, resource allocation requests are developed for new resources that impact the program's ability to fulfill its mission. ([Link to Resource Allocation Process and Model](#)). In

order to submit a resource allocation request, the need must be documented and specifically referenced in the most recent PR/AUR. Preference is given to needs also identified in the current strategic plan. The prioritization of resources is completed first at the division level, then at the “branch” or vice president level, then at the college level by the College Resource Committee (CRC). The President approves the final allocation of resources. The PBSC reviews budgets, and recommends funding to apply CRC priorities, and finally, the College Administrative Services allocates funds for the approved requests. As a result of this process, instructional programs, as well as student support and administrative services are able to identify needs, solicit resources, and implement changes to improve institutional effectiveness and academic quality.

Evaluation and Analysis

The College assesses the accomplishment of the mission through PR and AUR, which includes an evaluation of program/unit objectives and action steps, SLOs/AUOs, and student achievement data. Program/unit objectives and action steps are aligned with the College mission, vision and strategic plan, and each PR/AUR addresses the way in which it serves to help the College achieve its stated mission. PR/AUR is a means of ensuring that the college's programs and services are effective and responsive to its student body and the local community within the limitations of available resources. Through a review of SLOs/AUOs, key program indicators, and detailed data sets on student achievement, the College is able to evaluate its educational effectiveness and develop plans for ongoing improvement. The results of PR/AUR are incorporated into the strategic planning and resource allocation processes of the College and provide information for future planning and improvement with the College's programs and services.

Data required to support PR is readily available through the inFORM data warehouse, TracDat, and EMSI. Additional research, including student surveys, is also supported by OPRA. Both qualitative and quantitative data are disaggregated for analysis by program and instructional method. In the past, SLO data was not disaggregated by instructional method. The field for instructional method was added into TracDat in 2015-2016 and all future assessment reporting will be collected, reported, and analyzed in disaggregated form.

Although PR/AUR are aligned with the college Mission, and the results of PR/AUR are incorporated into strategic planning and resource allocation, it was identified that at the program, student service and administrative unit levels, more could be done to impact and support student achievement at the institutional level. A quality focused essay that addresses authentic goal setting and utilizing data and research to support student achievement and success at the institutional level emerged from the self-evaluation for accreditation.

- 6. The institution disaggregates and analyzes learning outcomes and achievement for subpopulations of students. When the institution identifies performance gaps, it implements strategies, which may include allocation of human, fiscal and other resources, to mitigate those gaps and evaluates the efficacy of those strategies.**

Evidence of Meeting the Standard

Saddleback College disaggregates and analyzes learning outcomes and achievement data for subpopulations of students in many of its processes in order to examine performance gaps. The primary mechanism for identifying and addressing performance gaps is through the Student Equity Plan (SEP). In addition to the SEP, disaggregated data is used in the measurement of key performance indicators relevant to student success in the College strategic plan, to assess the success of projects from the Basic Skills Initiative (See BSI link), and to analyze and address student success and achievement gaps through the program review (PR) process.

The Saddleback College Student Equity Plan

In 2014, the Student Equity Taskforce, with representation from all participatory governance groups, revised and aligned the Student Equity Plan (SEP) with new state mandates ([Link to Membership SEP](#)). The taskforce developed the updated SEP that is focused on improving student success for specific populations who may be disproportionately impacted by college practices, programs, or services. ([Link SEP 2015 p. 29](#)).

The SEP analyzes student outcome and achievement data to measure the required student equity success indicators including access, course completion, English as a Second Language (ESL) and basic skills completion, degree and certificate completion, and transfer. The SEP identifies the disproportionate impact within specified populations for each indicator. The targeted populations include:

- American Indians/Alaska Natives
- Asians/Pacific Islander
- African Americans
- Hispanics
- Whites, Non-Hispanic
- Men
- Women
- Current or former foster youth
- Persons with disabilities
- Low-income students
- Veterans ([Link to findings most current SEP See Link Disproportionate Impact Summary of Findings SEP p. 7](#))

Student equity work groups composed of members from all participatory governance groups were established to address each of the student equity success indicators (access, course

completion, English as a Second Language (ESL) and basic skills completion, degree and certificate completion and transfer). OPRA created a detailed report for each of the indicators in relation to the aforementioned populations in order to identify any disproportionate impact at the College. Student Success Scorecard data from the State Chancellors Office was utilized to complete this report. Using this data, work groups composed of members from all participatory governance groups analyzed the data for disproportionate impact; developed strategies, goals, and activities to increase the success rates of the populations impacted; proposed timelines for completion of the identified actions and a budget; and recommended a means of evaluating outcomes. ([Link SEP Plans 2014, 2015](#)).

Funding for the student equity plan initiatives was provided by the State Chancellors Office. The amount received by Saddleback College was just over \$2 million, with \$714,516.00 allocated for the 2014 – 2015 academic year and \$1,314,425.00 allocated for the 2015 – 2016 academic year. These funds enabled additional services for targeted populations in research, outreach, matriculation, counseling, financial aid, tutoring, and student mentoring. Specific actions taken included the hiring of a student equity outreach aide and additional financial aid specialists, the extension of cohort-based learning communities and peer mentors, extended tutoring hours, the development of “fast track” pathways, and the establishment of a bilingual (English/Spanish) transfer mentoring program ([Link to Presentation regarding SEP strategies and activities](#))

For all three completion metrics included in the Scorecard (Degree/Transfer Completion, CTE Completion and CDCP Completion), Saddleback College success rates exceeded the rates statewide ([1.B.6.9](#)). The Degree/Transfer Completion Rate at Saddleback for college prepared students equals the state average, while for unprepared students, Saddleback College exceeds the state average. Completion rates for all metrics at Saddleback College are increasing faster than statewide increases. Since Hispanic students are seeking degrees or transfers at a rate that exceeds their representation in the student body, equity efforts in this area appear to be having a positive impact ([1.B.6.8](#)). (See [Figure 1 Saddleback College and Statewide Trends in Completion Rates by level of preparation](#))

The SEP is integrated into the Strategic Plan and aligned with major planning efforts and initiatives, including SSSP and BSI ([Link to Strat Plan and BSI](#)). The evaluation of the SEP is monitored and coordinated by the SEP core indicator groups in partnership with major College leadership councils including the Consultation Council, the Student Success Coordinating Committee and the Planning and Budget Steering Committee. Activities and progress toward meeting the goals of the SEP are reported to the Student Success Coordinating Committee and integrated into the Strategic Plan as part of Goal two (See [SSSP update book reference to SEP](#)). The SEP is then forwarded to the PBSC and Consultation Council for input and discussion as well as to address and barriers to successful achievement of the identified goals ([Link to SEP in Goal two Strat plan, PBSC or CC minutes](#)). The SEP is a three-year plan that is evaluated annually and updated or revised as indicated.

The SEP, including activities, action steps and progress towards achieving goals are shared

widely. Each fall the SEP is shared with each participatory governance group and the BOT, who are provided an opportunity to engage with the SEP Chair, core team leaders, and work group members ([Link to the SEP PowerPoint 2015 on SharePoint now as well as minutes from participatory gov group presentations](#)). The SEP activities and outcomes are also shared widely in Professional Development week ([Link to professional development schedule spring 2016](#)).

Program Review and Achievement Data

The PR process requires each program to conduct a regular self-evaluation that leads to program improvements, the identification of program needs, and resource allocation requests. Data used for the completion of the PR includes information on student achievement disaggregated by student characteristics. The inFORM PR data set includes five years of detailed information about a program's course, enrollments, productivity, fill rates, retention, success rates, student counts by age, gender, ethnicity, and educational goal, and awards by age, gender, major, and type. These data sets can be run by instructional method as well in order to analyze differences in success and retention rates of courses taught face-to-face and online for those programs with significant online offerings. Additional disaggregation of data can be requested from OPRA. During PR, SLO assessment data is also analyzed. The TracDat Comprehensive Program SLO Report includes all active course-level SLOs, assessment methods, criteria for success, results, and the use of results. With changes made in TracDat in spring 2016, data on SLO attainment can be reported and analyzed by instructional method ([Link PR handbook, evidence from Manual](#)).

When programs identify performance gaps through the analysis of this data, objectives and action steps are developed. These may include changes related to access, curriculum, or teaching methods, among others. The effectiveness of the objectives and action steps developed through PR are reviewed every two years and revised as needed. [SLO report link or see 1.B.2](#)

Saddleback Strategic Plan

In the College's current strategic plan, one of the main objectives is to "increase student completion rates (degrees, certificates, and transfer) while preserving access, enhancing quality, and closing achievement gaps ([Link to it here](#)).” This objective integrates activities from the Student Success and Support Programs (SSSP) plan, the Enrollment Management Plan (EMP), the Basic Skills initiative (BSI), ([See Strategic Plan BSI Level up grant information \\$1.5 million](#)), the Technology Plan and the Student Equity Plan (SEP). The key performance indicators for this objective are based on the Student Success Scorecard metrics provided by the State Chancellor's office. These completion metrics can be disaggregated by gender, age group, ethnicity, disability status, and economically disadvantaged status.

Analysis and Evaluation

The College uses disaggregated achievement data for many of its analysis and reports including the SEP, PR, and the strategic plan. The SEP has identified those areas with disproportionately impacted student populations and indicators as prescribed by the California Community Colleges

Chancellor's Office. Through the SEP, strategies and activities are implemented, goals and key performance indicators are set, and resources are allocated to mitigate gaps. In addition to SEP, instructional programs use disaggregated data during program review and develop objectives and actions steps to address the gaps that are identified. Beginning in spring 2016, the College began to disaggregate SLO data by instruction method. Discussions are also underway regarding the collection and reporting of disaggregated SLO data by student characteristics. [1.B.6.8](#), [1.B.6.9 links](#),).

In terms of student achievement, the OPRA has demonstrated how data mining and the increased use of disaggregate data has the potential to uncover data stories and create a culture of evidence based dialogue, planning and decision making to support student success to a degree never enjoyed at the college before. As a result, the College has undertaken a Quality Focus Essay on student success metrics including the ability to disaggregate data and to integrate student success metrics into broad based dialogue, planning, decision making, and resource allocation to promote institutional effectiveness.

- 7. The institution regularly evaluates its policies and practice across all areas of the institution, including instructional programs, student and learning support services, resource management, and governance processes to assure their effectiveness in supporting academic quality and the accomplishment of mission.**

Evidence of Meeting the Standard

The District and the College review and revise all policies and procedures regularly to assure their effectiveness in supporting academic quality and the accomplishment of its mission. Board policies and administrative regulations are reviewed and revised through the Board Policy and Administrative Regulation Council (BPARC). This is a shared governance committee with representation from all constituent groups and chaired by the vice chancellor of business services. The committee reviews all board policies on a regular cycle and makes recommendations for revision to the Chancellor's Council prior to going to the Board of Trustees for study, review, and approval [[EVI-Committee Composition and Purpose](#)]. BPARC may also revise policies and/or procedures in response to changes in external regulation, legal or accreditation requirements, or to align with templates provided by the Community College League of California (CCLC) ([Link to Bill Kelly's BPAR calendar](#)). BPs and ARs address the following broad categories: bylaws, community relations, administration, business, human resources, students, instruction, and speech and advocacy. Board policies and administrative regulations are available to students, employees, and the public on the District website.

College policies and procedures are developed and revised regularly on an as needed basis, as part of the institutionalized planning cycle, or to align with revised board policies and administrative regulations. At the College, the primary body responsible for the review of

policies and procedures and for making recommendations to the president for approval is Consultation Council (CC). ([Link to Saddleback College Governance and Decision Making Manual 2016 steps in strategic planning process p. 18](#)).

As described in the Saddleback College Governance and Decision Making Manual 2016 and in accordance with Title 5, Saddleback College ensures the participation of all constituent groups in governance and decision-making, including faculty, classified staff, administrators, managers, and students ([Link Governance Manual](#)). In making policy and procedural recommendations, faculty are represented by the Academic Senate, staff are represented by the California Schools Employee Association (CSEA) and the Classified Senate, and students are represented by the Associated Student Government (ASG). The review and revision of policies and procedures may be initiated from any interested person, committee, or representative group in the College.

Policies and Procedures Related to Instructional Programs and Student Success

Policies and practices related to instructional programs and student success are primarily under the purview of the Academic Senate, as well as the Curriculum Committee, the Online Education Committee, EPA, and VPI Council.

The Academic Senate is the representative body of faculty that is responsible for participating in formulation of college and district policy related to academic and professional matters as required by BP 2100.1, Delegation of Authority to the Academic Senate, BP 2100.2, Role and Score of Authority of the Academic Senates, and Title 5 of the California Code of Regulations. The Academic Senate regularly evaluates and revises as necessary policies and practices related to:

1. Curriculum, including establishing prerequisites and places courses within disciplines;
2. Degree and certificate requirements;
3. Grading policies;
4. Educational program development;
5. Standards or policies regarding student preparation and success;
6. District and college governance structures, as related to faculty roles;
7. Faculty roles and involvement in accreditation processes, including self-study and annual reports;
8. Policies for faculty professional development activities;
9. Processes for program review;
10. Processes for institutional planning and budget development;
11. Other academic and professional matters as mutually agreed upon.

Evidence of recent changes made by the Academic Senate in these areas include grading and independent study and can be found on the committee SharePoint site ([Link to a couple representative changes i.e. BP 5300 Grading, BP 5626 Independent Study – unless AS has other recommendations](#)).

The Curriculum Committee, a standing committee of the Academic Senate, is responsible for recommending approval of both credit and non-credit courses on the basis of such standards as grading policy, units, prerequisites, academic rigor, course content, course objectives, repeatability, assignments, instructional methodology, and methods of evaluation. The committee is also responsible for developing all policies and procedures that affect the development and approval of curriculum at the College, and to recommend approval of such policies and procedures to the Academic Senate ([EVI-Curriculum Committee Bylaws 2011?](#)). Curriculum processes and practices are evaluated regularly by the committee and went through significant changes in 2014 to improve the efficiency and effectiveness of the curriculum processes, particularly in response to the increase in online courses ([see Curriculum minutes related to CLTs](#)). The online approval process is currently under revision and was the subject of one of the quality focused essays.

The Online Education Committee (OEC), a standing committee of the Academic Senate, is responsible for developing policies and procedures related to online education at the College. Currently, the OEC is reviewing and revising existing policies and practices related to issues such as curriculum approval, faculty training, and student support, with a focus on quality as part of the development of the new online education plan. This is discussed in detail in the quality focused essay on online education.

The Educational Planning and Assessment Committee (EPAC), a college committee jointly chaired by an Academic Senate appointee and the director of planning, research, and accreditation, oversees the college's efforts to engage in an ongoing quest for quality improvement, and to document how well we fulfill our mission and goals by employing a comprehensive system of planning and outcomes assessment in all programs, student support units, and administrative service units on campus. The policies and procedures under the purview of EPA are those related to SLO/AUC assessment and PR/AUR. These policies and procedures are updated on a regular basis to ensure they effectively promote continuous improvement of courses, programs, and student support and administrative units ([See PR AUR Handbook for SLO and AUC handbooks](#)). A recent procedural change includes the submission of SLO results by instructional method so that data can be analyzed separately for face-to-face and online classes. This necessitated a change in the TracDat fields and a shift in the way data was collected and reported by departments. ([Link EPA minutes](#)).

The VPI council is composed of all academic administrators responsible for instruction, enrollment management, strategic planning, scheduling, faculty hiring, and classroom issues ([minutes or link](#)). This council is responsible for planning and evaluation of courses, (traditional and online), and instructional programs as well as overseeing assessment practices and establishing policies and practices to ensure instructional quality and effectiveness.

Policies and Practices Related to Resource Management

Policies and Practice related to resource allocations are primarily addressed by the Planning and Budget Steering Committee (PBSC), the College Resource Committee (CRC), and Consultation Council (CC). The current resource allocation process was evaluated and revised in fall 2015 to include explicit timelines and more clearly describe the roles of both PBSC, CRC, and CC in resource allocation ([Link to the Process and the Model, see 1.B.5](#)). The revised resource allocation process requires that instructional program and administrative unit needs are referenced in the PR/AUR and tied to the mission and/or strategic plan.

Upon completing the resource allocation process cycle annually, the effectiveness of the process is evaluated by PBSC and revised as necessary. Moreover, one of the objectives in the current strategic plan is that “Saddleback College will strengthen long term financial health and institutional effectiveness through integrated planning and resource allocation.” ([SBC Strategic Plan](#)). Therefore, through the annual evaluation of the College’s strategic plan, the resource evaluation process, policies, and practices are also being examined to ensure that the resource allocations are based on substantial verifiable data ([SBC Strategic Plan 4.1.1](#)).

The SOCCCD Districtwide Integrated Budget and Planning Resource Guide demonstrates how planning processes at the district level are linked to budget allocation ([See Link](#)). This guide is updated regularly and includes the Budget Development Guidelines, which are reviewed and approved twice a year by the board of trustees. The District Resource Allocation Council (DRAC) model, and BP and AR 3110, Basic Aid guide the budget development for districtwide allocation of unrestricted general fund and basic aid funds. The District Resources Allocation Committee (DRAC) is a participatory governance group charged with developing and maintaining the income allocation model on which the district budget is based. It is also charged with development and oversight of the allocation process for unrestricted general funds. The Basic Aid Allocation Recommendation Committee (BAARC) is also a participatory governance committee charged with allocating basic aid funds in accordance with BP and AR 3110 and in alignment with planning elements developed by the Districtwide Planning Council (DWPC), the Districtwide Technology Committee (DTC), and the Capital Improvement Committee (CIC). ([Districtwide Planning and Decision Making Manual 2015 - 2020](#)). All district councils and committees evaluate their practices annually through a membership survey and make changes as needed.

Policies and Practices Related to Governance Processes

The Saddleback College Organizational Planning Manual documents the policies and practices related to decision making and governance processes at the College ([Link Organizational Planning Manual – draft form](#)). The manual includes roles and responsibilities of councils, committees, work groups, and individuals that play a role in planning and decision making on campus. Timelines for college and districtwide planning and resource allocation are included in the manual. The college strategic planning and integrated planning processes, as well as the alignment to districtwide processes, are described in the Organizational Planning Manual. The Organizational Planning Manual is reviewed regularly, to ensure that the processes, practices,

and policies related to planning and decision making are current, efficient, effective, and support academic quality and accomplishment of the mission. A review of the Organizational Planning Manual is initiated by the OPRA when significant changes to the planning or governance processes occur. The most recent update to the manual occurred in fall 2016. Prior to approval of the update to the Organizational Planning Manual and policies and practices within, the manual is shared with participatory governance groups for input prior to recommendation for approval by the PBSC and approval by the CC (Minutes AS, PBSC, VPI, Management Team, CC Sept, Oct 2016).

The District annually evaluates its policies and procedures related to planning, governance, and resource allocation, and publishes the them in the SOCCCD District-wide Planning and Decision Making Manual 2015-2020 and District-wide Integrated Budget Planning Resources Guide ([Link to both here](#)). DWPC is responsible for overseeing the review and revision of the manual and guide.

Analysis and Evaluation:

The College regularly reviews its policies and procedures across all areas, including instructional programs, student and learning support services, resource management, and governance processes. BPs and ARs are reviewed and revised by BPARAC, a districtwide committee. They are then approved by Chancellor's Cabinet. In the case of BPs, the Board of Trustees.. On the college level, the CC is the primary body that approves policies and procedures, which emerge out of various college committees. The Academic Senate, is primarily responsible for the evaluation of policies and practices to ensure effective instruction, academic quality, and student success, with other committees also playing a role. PBSC regularly evaluate the goals, objectives and outcomes of the strategic plan, and makes recommendations to policies and practices to ensure effectiveness, academic quality, and accomplishment of the mission (see 1.B.9). Resource management is evaluated at the district-level by the DWPC and at the college level through PBSC, CC, and CC, as well as by all programs, student support, and administrative services that participate in the resource allocation process. Policies and practices related to governance are evaluated regularly by key participatory governance planning and decision making councils, committees, task forces, and work groups.

While participatory governance and planning committees regularly evaluate their policies and practices in supporting the accomplishment of the mission, the college lacks a standardized approach for committees to communicate their purpose and to evaluate their effectiveness. This is being rectified by PBSC and CC, which recently approved new committee practices to align with current practices in districtwide committees, including communication about each committees' purpose, membership and annual self-evaluations. (PBSC minutes 8/25, [Link to Organizational Planning Manual](#)). The goal is to increase and sustain collegewide dialogue by making employees more aware of participation opportunities through standardized practices and improved record keeping.

8. The institution broadly communicates the results of all of its assessment and evaluation activities so that the institution has a shared understanding of its strengths and weaknesses and sets appropriate priorities.

Evidence of Meeting the Standard

The results of assessment and evaluation activities are communicated broadly via documents and minutes posted on the College website and SharePoint sites primarily through the Office of Planning Research and Accreditation (OPRA), the Education Planning and Assessment committee (EPA), and the Planning and Budget Steering Committee (PBSC). Assessment and evaluation results are broadly communicated through collegewide presentations as well as in presentations made to key planning and governance council and committees. On a regular basis, internal scans and surveys are also completed to further understand institutional strengths and weaknesses and to inform priorities and future planning efforts ([1.B.8.1](#), [1.B.8.2](#), [1.B.8.3](#), [1.B.8.4](#), [1.B.8.5](#)).

Results of assessments and evaluations that are posted on the OPRA website include, but are not limited to, climate and college employee survey results, strategic plan evaluations, Student Success Scorecard information, and internal documents that further analyze Scorecard data, historical performance, and trends ([1.B.8.6](#), [1.B.8.7](#), [1.B.8.8](#), [1.B.8.9](#), [1.B.8.10](#), [1.B.8.11](#), [1.B.8.12](#), [1.B.8.13](#), [1.B.8.14](#), [1.B.8.15](#), [1.B.8.16](#), [1.B.8.17](#), [1.B.8.18](#), [1.B.8.19](#), [1.B.8.20](#), [1.B.8.21](#)).

EPA is responsible for completing annual SLO/AUO assessment reports and posting completed PRs and AURs. AUO reports are posted in TracDat and on the committee SharePoint site ([1.B.8.22](#), [1.B.8.23](#)). Completed PRs and AURs are reviewed by EPA and the Academic Senate (for PRs) or Management Team (for AURs), shared with Consultation Council every four years, and considered in strategic planning and resource allocations decisions. (Link [1.B.8.24](#) to an example of a specific PR/AUR, [1.B.8.25](#) Minutes of Senate with PR approval, [1.B.8.26](#) minutes of Consultation council with PR/AUR presentation, [1.B.8.27](#) evidence of PR influencing strategic plan).

Additionally, the College communicates results of assessment and evaluations through a variety of activities including the Presidents Annual State of the College report during professional development week, the Presidents update during monthly BOT meetings, professional development week presentations, reports at planning and decision making committees, and at department and division meetings ([1.B.8.28](#), [1.B.8.29](#), [1.B.8.30](#), [1.B.8.31](#), [1.B.32](#)). [Key committees that](#) communicate assessment and evaluation results include: the Planning and Budget Steering Committee (PBSC), the Education Planning and Assessment (EPA) committee,

the Academic Senate and the strategic planning committees especially the student success coordinating committee and work groups (1.B.8.33 minutes from PBSC strategic planning update, 1.B.8.34 minutes of EPA, 1.B.8.35 Academic Senate minutes, 1.B.8.36 SSCC update). See discussion in I.B.1

Analysis and Evaluation

Results of assessment and evaluations are communicated through a variety of methods such as presentations that are captured in meeting minutes and documents that are publicly available on the College and committee websites. Reporting on assessment data related to SLOs/AUOs and on evaluations contained in PRs/AURs is overseen by EPA, and includes regular reports by all programs and student support and administrative units to CC and the college president. Institutional assessments related to strategic planning and Scorecard data are overseen by the PBSC and OPRA and available on College websites and SharePoint sites available to all employees. Internal scans and surveys conducted by OPRA provide additional information related to college strengths and weakness and inform college priorities. Through a revitalized OPRA assessment and evaluation activities are broadly communicated. The Public Information Office and the College president regularly communicate overall strengths, weakness, and priorities through a variety of collegewide forums including annual state of the college presentations.

- 9. The institution engages in continuous, broad based, systematic evaluation and planning. The institution integrates program review, planning, and resource allocation into a comprehensive process that leads to accomplishment of its mission and improvement of institutional effectiveness and academic quality. Institutional planning addresses short- and long-range needs for educational programs and services and for human and physical, technology and financial resources. (ER 19)**

Eligibility Requirement 9: The institution systematically evaluates and makes public how well and in what ways it is accomplishing its purposes, including assessment of student outcomes. The institution provides evidence of planning for improvement of institutional structures and processes, student achievement of educational goals, and student learning. The institution assesses progress toward achieving its stated goals and makes decisions regarding improvement through an ongoing and systematic cycle of evaluation, integrated planning, resource allocation, implementation, and reevaluation

Evidence of Meeting the Standard

Saddleback College, in conjunction with the SOCCCD, engages in continuous broad based, systematic evaluation and planning. As described in Standards I.B.1, 1.B.2, 1.B.3, and 1.B.5, the College integrates program review/administrative unit review (PR/AUR), short-term planning, long-term planning, and resource allocation into a comprehensive process that leads to the

fulfillment of its mission and improvement of institutional effectiveness and academic quality ([Link to Program Review Handbook for Instructional Programs, Administrative Unit Review Handbook for Student Support and Administrative Services, Resource Allocation Process, Resource Allocation Process Model, SLO Annual Report, Saddleback College Strategic Plan,](#)).

The SOCCCD 2011-2031 Education and Facilities Master Plan (EFMP) outlines a long-term plan for continuous quality improvements focusing on strategies for academic excellence and facilities improvements. The purpose of the EFMP is to establish clear direction for the District and each of its colleges, and to serve as a primary resource for development of college long-range planning activities ([Link to 2011-2031 EFMP Vol 1 p.6](#)). Integrated short-term planning consists of the districtwide and college strategic plans. The SOCCCD Strategic Plan 2014-2020, the districtwide short term plan, was developed through the leadership of the Districtwide Planning Council. Supported by data from an external scan of the community, an integrated strategic planning model was developed for the district and colleges with shared goals, objectives, and key performance indicators (KPIs). The external scan of the community provided five major areas of review as a basis for planning and included enrollment projections, labor market analysis, student success policy, research, and accountability, budget and the economy, and technology ([Link District-wide Strategic Plan Board of Trustees Presentation 2014 - 2020](#)).

The purpose of developing an integrated districtwide strategic plan is to make the strategic planning process more efficient, to improve collaboration, and to encourage a commitment toward common goals and objectives using common indicators, timelines, and reporting requirements. Ultimately the integrated strategic planning process is intended to improve the effectiveness of the colleges and to promote better-informed decisions regarding the allocation of resources.

Integrated Planning

The Saddleback College Strategic Plan is, therefore, aligned with the SOCCCD strategic plan and is the foundation for college planning and resource allocation decisions. The College strategic planning process is a comprehensive and collaborative tool for enabling the college to continuously improve, effectively achieve its mission, and move toward its desired vision. Steps in the strategic planning process are fully described in the Organizational Planning Manual ([Link Organizational Planning Manual in draft form Development of the Saddleback College Strategic Plan p. 25](#)).

The Saddleback College Strategic Plan for 2014 – 2020 has four overarching goals. Each goal is aligned with the SOCCCD goals and addressed by strategic planning groups led by a chairperson or cochairmen. These strategic planning goals/groups are known as:

Saddleback College Strategic Planning Goals for 2014-2020

1. Saddleback College will foster an environment characterized by creativity, innovation, respectful interactions and collaboration. *(AKA Respectful Interactions)*
2. Saddleback College will promote students' success by enhancing the teaching and learning environment. *(AKA Student Success)*.
3. Saddleback College will advance economic and workforce development through regional partnerships with educational institutions and industry and by strengthening career technical education. *(AKA Economic and Workforce Development)*
4. Saddleback College will strengthen long-term financial health and institutional effectiveness through integrated planning and resource allocation. *AKA Financial Health and institutional Effectiveness* ([1.B 1.9 Link updated Saddleback College Strategic Plan 2014 – 2020](#)).

The College engages in other short-term planning processes focused on specific initiatives and grant funded projects that include the SEP, the Technology Plan, Economic and Workforce Development Plan, the Student Success Coordinating Plan, and the Basic Skills Plan. These plans inform one another and are integrated into the Strategic Plan model. ([Link to BSI, SEP, SSSP](#)). ([Link to EWD, and EMP](#)). ([Link Tech Plan](#)).

X Indicates where plan is linked by explicitly to the College's Strategic Plan																

X Indicates where plan is linked by explicitly to the College's Strategic Plan

The Office of Planning Research and Accreditation (OPRA) leads the development of the College's Strategic Plan. The director of OPRA oversees its implementation, monitors progress toward achieving goals, outcomes, and key performance indicators, and assists in evaluation of the planning process. OPRA facilitates collegewide data driven decision-making, accountability,

and continuous improvement through the integration of strategic planning and institutional research. ([Link to Strategic Plan](#)).

The Planning and Budget Steering committee (PBSC), co-chaired by the director of planning, research, and accreditation and the director of fiscal services. PBSC coordinates collegewide planning and budgeting process, including the strategic plan, and makes recommendation for procedural changes to CC. CC serves as the College's main strategic planning and recommending body and is composed of representatives from all constituent groups on campus. Sustained broad based collegial dialogue informs all planning processes at the College. ([Saddleback Integrated Strategic Planning](#)).

A chairperson or chairmen for each goal is responsible for reviewing progress toward the strategic planning goals, including measuring action steps completed, and tracking key performance indicators. The chairperson or chairmen also are ultimately responsible for the achievement of each strategic planning goal. Responsibility for the outcomes of the Strategic Plan are widespread, and are shared within each planning group by committees, councils, work groups, and individuals ([Link to updated Strategic Plan](#)).

Periodic evaluation and review is an essential part of all planning at the College. For example, the strategic planning process and outcomes of the plan are evaluated to ensure the needs of the College and its constituents are being met. Each year, progress is measured in terms of the action steps completed. The achievement of outcomes is monitored through annual tracking of key performance indicators, action steps, and the degree to which performance targets have been achieved ([Statement on Annual update of meeting minutes or link](#)). Through the integrated strategic planning process, the College collectively identifies, prioritizes, and takes action to meet college-wide goals and objectives. The result of the strategic planning process is a strategic plan that provides short-term direction for the College.

Program and Administrative Unit Review

Program and administrative unit review inform strategic planning and resource allocation decisions and along with SLO/AUO assessment are key to appraising academic quality and institutional effectiveness. Planning for instructional programs, student support and administrative services occurs through the PR/AUR every two years ([Link to PR/AUR Handbooks](#)). Through PR and AUR data related to SLOs, courses, programs, curriculum, and support services, is collected and analyzed, and recommendations are made to improve student learning, student success, programs, student support and administrative services. Program reviews and AURs are a means of ensuring that the college's programs and services are effective and responsive to the local college community within the limitations of available resources.

Annually, resource allocation requests for *NEW resources* are derived from the needs assessment in the PR/AUR processes ([Link to Resource Allocation Process and Resource Allocation](#)

Model). Requests for faculty can be expressed through the PR/AUR process, but are formally requested through the faculty hiring and prioritization process. Through the PR/AUR processes, planning addresses needs for academic programs, and student and administrative services for human resources, instructional/service needs, research needs, as well as technology, equipment, facilities, other resources, marketing and outreach. The College has a well prescribed plan for annual resource allocation ([Link to Resource Allocation Process and Model](#))

Human Resources

Every PR/AUR addresses the human resource needs within the program or unit and uses a five-year staffing profile for faculty, classified staff, managers, and administrators as the basis of analysis. Requests for additional staffing are included in resource allocation requests, and funding decisions by the College Resource Committee (CRC) for these requests are based upon demonstrated need and alignment with the College strategic plan. Classified staff positions go through the standard resource allocation request process described in [xx.x.x.x](#). Faculty positions, however, are prioritized by the Faculty Hiring Prioritization Committee, an Academic Senate committee composed of the faculty and dean representatives from each academic division). Prioritization of positions is done annually by the committee and their recommendations are forwarded to the Academic Senate, college president, and board of trustees for approval. This list includes a ranking of all positions requested, and the college president, in consultation with the President's Executive Team (PET), will determine the number of positions to be hired each year from this list based on budgetary considerations.

Physical Resources

Physical resource needs, including facilities, furniture, and equipment (over \$500), are also determined and requested through the PR/AUR and resource allocation processes. Equipment requests are prioritized by the resource allocation request process and decisions are made by the CRC based on documented need and alignment with the strategic plan. In addition to demonstrating a link to the strategic plan, facilities requests must conform to standards set by the Safety and Facilities Committee for further review and must be in alignment with the College's Education and Facilities Master Plan. ([Link Saddleback College EMFP](#)).

Technology Resources

Technology needs are generally maintained by the Saddleback College Technology Plan, which has established a replacement schedule for classroom, faculty, manager/administrator, staff, and other technology on campus. The College Technology Committee with representation from all participatory governance groups creates the Technology Plan to provide a strategic pathway to guide the College in its implementation of technology. The purpose of the Technology Committee is to engage in collaborative discussions regarding College technology, disseminate information to the campus community, empower students, faculty, and staff through the deployment and availability of technology resources, consider the concepts of universal access and design, and provide direction for technology that advances and supports the strategic plans ([Link 2015-2020 Saddleback College Technology Plan, on SharePoint](#)).

Requests for funding new technology needs (over \$500), are identified through the College's PR/AUR resource allocation process, and includes review by the Technology Committee prior to final CRC ranking and approval. Funding for larger college technology needs can be requested through the basic aid process at the district-level. The Basic Aid Allocation and Recommendation Committee (BAARC) reviews the requests and final recommendations to the Chancellor for funding ([Link to Technology Plan p.8](#)).

Financial Resources

All programs and units receive annual budgets to support operational costs. These funds are reviewed regularly by PBSC and recommendations for augmentations to these budgets are forwarded to the CC and college president for approval. The need for additional funds for staffing, facilities, and equipment and technology exceeding \$500 can be documented through the PR/AUR and requested through the resource allocation request process. ([Linked statement from standard III here](#)).

Analysis and Evaluation

The College engages in broad based systematic evaluation and planning within programs and units, collegewide, and districtwide. PR/AUR, short-term and long-term planning, and resource allocation are integrated into a comprehensive process to ensure that all of the academic program, student support, and administrative needs are met in order to fulfill the mission of the College. In an effort to continually improve short and long term planning, and decision making, the OPRA is working with departments and programs as well as with planning and decision making groups to more fully understand data and student success metrics in order to improve outcomes at the course program and institutional level to ensure accomplishment of the mission. A QFE on student success metrics has been developed to address this college wide goal and to ensure that success metrics have a place in the strategic plan and resource allocation process.

Evidence Forthcoming

Standard I:

Mission, Academic Quality and Institutional Effectiveness, and Integrity

C. Institutional Integrity

- 1. The institution assures the clarity, accuracy and integrity of information provided to students and prospective students, personnel, and all persons or organizations related to its mission statement, learning outcomes, educational programs, and student support services.**

Evidence of Meeting the Standard

Saddleback College provides information about its mission, educational programs, student learning outcomes, available student support systems, and accreditation status in a clear, complete, and accurate manner for students, prospective students, employees, and the public. The primary sources of information on these items are the College Catalog and the College's website, which are both regularly reviewed for accuracy and completeness and updated as necessary. An electronic version of the College Catalog is posted on the College homepage. A paper version is printed for the use in counseling and other offices, but is no longer available for sale in the bookstore. While the College website is a "living" entity that can be updated frequently as policies and procedures change, the College Catalog is only updated annually and the curricular information contained within has significance for students starting coursework at the college, as it describes the program requirements for which can be granted "catalog rights" as described in [II.A.x](#) below.

The College's mission statement, along with its vision and values, can be found in both the College Catalog and on the website, and is also prominently displayed in various locations on campus, such as conference rooms and administrative offices, and even printed on the back of employee business cards (Ev. 6, 7, 8).

Information about the College's educational programs is included in the College Catalog. This includes a comprehensive list of all the College's degrees, certificates, and awards; a description of each program, including its PSLOs and required courses; and a detailed explanation of the three possible transfer/general education patterns, discussed in detail in [II.A.x](#). Program information can also be found on program web pages, including, in many cases, a list of PSLOs and course SLOs. The College's ISLOs can also be found in the College Catalog and on the College website.

Course information and section availability is available on the electronic class schedule, which can be found on the College homepage. Many elements of the course outlines of record (CORs) are accessible to students and the public on the detail page of the class schedule including topics covered, learning objectives, and methods of evaluation. The public can also find the full COR by doing a course search in CurricUNET, the curriculum system used by the College. Information about the articulation agreements for courses is also available through assist.org.

All students are provided syllabi for the courses in which they are enrolled on the first day of class, and these always include general information about the course including the SLOs.

Information about student support systems is also available on the College website and in the College Catalog. In 2015, the College website was completely redesigned to make information students need to be successful easier to access. A link on the homepage entitled “Student Success” provides a quick link to all of the student support programs available. In addition, the counseling department produces a Student Handbook each year that also describes many of the services at the College. This handbook is available online on the counseling services web page and in print at various locations around campus, such as at the Student Services Building information desk and in the library. A statement regarding the accreditation status of the college can be found on the homepage of the College’s website and in the College Catalog. More detailed information is available on the accreditation page of the website, which can be linked to directly from the statement or by navigating to the page from the main menu. This page includes relevant documentation such as a copy of the most recent self-evaluation reports as well as any communication received from the ACCJC regarding the College’s accreditation.

Analysis and Evaluation

Saddleback College ensures the clarity, accuracy and integrity of information provided to students, prospective students, employees, and the public in regards to its mission, educational programs, student learning outcomes, available student services, and accreditation status. The College’s website and College Catalog are the two primary sources of this information, although there are number of other locations where detailed information can be found such as in the Student Handbook. Course syllabi are the primary source of course information, and faculty are required to include the course SLOs on these documents. PSLOs and ISLOs are published in the Course Catalog and on the website. The accreditation status of the college is prominently displayed on the College website, and detailed information about accreditation, including all documentation, is available on the accreditation page of the website.

Action Plan

- Saddleback College needs to create procedures and guidelines by which all divisions and departments and division offer a required set of information on their homepages.
- 2. The institution provides a print or online catalog for students and prospective students with precise, accurate, and current information on all facts, requirements, policies, and procedures listed in the “Catalog Requirements.”**

Evidence of Meeting the Standard

Saddleback College produces a comprehensive College Catalog linked directly on the homepage of the website so it is easily accessible for students, prospective students, and the public. The catalog provides precise and accurate information on its programs, policies, and services. The online College Catalog is configured online in pdf format, both in its entirety and also separated

its various sections, so that it can be more easily accessed and printed if desired. In addition, catalogs from the past 19 years are also available on the website. A limited number of paper copies of the catalog are produced each year for use by counselors and others. In the past, printed copies of the catalog were also available for sale in the college bookstore, but that practice was eliminated in 2012-2013.

The catalog is revised annually and tremendous efforts are made to ensure that it contains the most accurate information possible. If errors are found or changes made, however, an addendum is also published for that year and posted to the website.

The Office of Instruction coordinates the development and organization of the catalog through a collaborative effort with various departments and individuals on campus including, Campus Police, Counseling, Curriculum, Financial Aid, Matriculation, the Office of Student Services, division deans, and department chairs

The College Catalog contains the following information and major headings:

- Catalog Year
- Academic Calendar
- Name, Address, and Phone Number of the College
- Statement of Accreditation Status
- ACCJC Contact Information
- Non-Discrimination Statement
- Name, Address, and Phone Number of the District
- Vision, Mission and Strategic Planning Goals of the SOCCCD
- District Administration
- Board of Trustee Meetings
- President's Message
- College Administrators
- Academic Divisions, Contact Information, and Associated Departments
- Vision, Mission, and Values of Saddleback College
- Saddleback College Institutional Student Learning outcomes (ISLOs)
- Información en Español
- Admission Requirements
- Matriculation Services
- Registration for Classes
- Student Fees/Refunds/Credits
- Student Support Services
- Student Activities/College Life
- Students' Rights and Responsibilities
- Academic Regulations
- Credit by Exam
- Honors Program
- Alternative Credit Options
- College Credit for International Baccalaureate Exams (IB exams)

- College Credit for CLEP Exams
- Other College Programs
- Graduation Requirements
- Degrees, Certificates, and Awards
- Articulation/Transfer Patterns
- Announcement of Courses
- Enrollment Limitations for Active Participatory Courses That Are Related in Content
- Course Listing by Academic Discipline
- Emeritus Institute Courses
- Adult Education Courses
- Faculty Directory

http://www.saddleback.edu/uploads/cc/15-16_full_catalog.pdf
https://www.saddleback.edu/uploads/cc/15-16_addendum.pdf

Analysis and Evaluation

The College Catalog is updated annually and available to students and the public on the College's homepage. It provides precise, accurate, and current information on a variety of essential information for students including but not limited to admission policies, matriculation, student fees, student support services, degree and certificate requirements, transfer patterns, and a description of all courses.

3. The institution uses documented assessment of student learning and evaluation of student achievement to communicate matters of academic quality to appropriate constituencies, including current and prospective students and the public.

Eligibility Requirement 1: The institution systematically evaluates and makes public how well and in what ways it is accomplishing its purposes, including assessment of student outcomes. The institution provides evidence of planning for improvement of institutional structures and processes, student achievement of educational goals, and student learning. The institution assesses progress toward achieving its stated goals and makes decisions regarding improvement through an ongoing and systematic cycle of evaluation, integrated planning, resource allocation, implementation, and reevaluation

Evidence of Meeting the Standard

Saddleback College compiles student achievement and learning outcomes data and makes it available to all constituencies including students, prospective students, and the public. The Office of Planning, Research, and Accreditation (OPRA) and the Educational Planning and Assessment Committee (EPA) are the primary entities at the College responsible for collecting, analyzing, and publishing student achievement and learning outcome data. The Student Success

Scorecard information, which demonstrates how well colleges are doing in remedial instruction, job training programs, retention of students, and graduation and completion rates, is linked from the College website homepage and is also publicly available at the State Chancellor's office website.

Student achievement data is available in several reports on the OPRA website. This includes Student Success Scorecard trends, analyses of historical trends in degree and certificate awards, retention, and success, historical transfer patterns, and ACCJC annual reports, among others. Information on the Institutional Effectiveness Partnership Initiative (IEPI) is also available on the OPRA website. This initiative provides a framework for assessing the effectiveness of colleges by looking at nine core indicators such as course completion rates, accreditation status, fund balance, and compliance.

Program-specific student achievement and SLO assessment data is available in the program review reports, updated every two years. The SLO Comprehensive SLO Report, which is part of the program review, provides historical assessment results as well as information on how those results were utilized to improve the program. Within the program reviews, faculty also reflect on the achievement and SLO data and develop actionable objectives for the coming two-years. Program Reviews are posted on department websites and the OPRA website.

Analysis and Evaluation

TBD

4. The institution describes its certificates and degrees in terms of their purpose, content, course requirements and expected learning outcomes.

Evidence of Meeting the Standard

All certificates and degrees offered through Saddleback College are described in the college catalog and include the purpose, content, course requirements and learning outcomes ([1.C.4.1](#)). The catalog is available online and is linked to the homepage of the college website. The catalog may be downloaded and printed in pdf format. Degrees certificates and awards are searchable through the catalog by division, program, alphabetically and by degree ([1.C.4.2](#)).

Divisions, departments and programs also describe certificates, degrees, course requirements and learning outcomes on their websites and in program specific brochures ([1.C.4.3](#), [1.C.4.4](#)). Course level learning outcomes are provided to all students by faculty in course syllabi. Department chairs ensure that course syllabi are available to all students and that individual sections of courses adhere to published student learning outcomes through the prescribed SLO evaluation and reporting process ([1.C.4.5](#), [1.C.4.6](#)).

Analysis and Evaluation

Clear accurate descriptions of certificates and degrees including their purpose, content, course requirements, and learning outcomes are found in the college catalog, on division, department and program websites, and through program specific brochures.

5. The institution regularly reviews institutional policies, procedures, and publications to assure integrity in all representations of its mission, programs, and services.

Evidence of Meeting the Standard

The District and the College review and revises policies, procedures, and publications regularly to assure integrity in all representations of the mission, programs and services. Board policies and administrative regulations are reviewed and revised through the Board Policy and Administrative Regulation Council (BPARAC). This is a shared governance committee with representation from all constituent groups in the District and chaired by the Vice Chancellor of Business Services. The committee reviews all board policies on a regular cycle and makes recommendations for revisions to the Chancellor's Council prior to going to the Board of Trustees for study, review, and approval [EVI-Committee Composition and Purpose]. BPARAC may also revise policies and/or procedures in response to changes in external regulations, legal or accreditation requirements or to align with templates provided by the Community College League of California (CCLC) (Link to Bill Kelly's BPAR calendar). BPs and ARs address the following broad categories: bylaws, community relations, administration, business, human resources, students, instruction, and speech and advocacy. Board policies and administrative regulations are available to students, employees, and the public on the District website.

Saddleback College Catalog 2016 – 2016

SOCCCD Board Policies

Saddleback College Governance and Decision Making Manual 2016

SOCCCD District-wide Planning and Decision Making Manual 2015-2020

Saddleback College Communications and Graphics Manual

Student Handbook

Faculty Handbook

College policies and procedures are developed and revised regularly on an as needed basis, as part of the institutionalized planning cycle or to align with revised board policies or administrative regulations. At the College, the primary body responsible for the review of policies and procedures and for making recommendations to the President for approval is the

Consultation Council. (Link to Saddleback College Governance and Decision Making Manual 2016 steps in strategic planning process p. 18).

As described in the Saddleback College Governance and Decision Making Manual 2016 and in accordance with Title 5, Saddleback College ensures the participation of all constituent groups in governance and decision-making, including faculty, staff, and students. In making policy and procedural recommendations, faculty are represented by the Academic Senate, staff are represented by the California Schools Employee Association (CSEA) and the Classified Senate, represented by the California Schools Employee Association (CSEA) and the Classified Senate, and students are represented by the Associated Student Government (ASG). The review and revision of policies and procedures may be initiated from any interested person, committee, or representative group at the College.

Publications

The College publishes its mission, key institutional policies and procedures, and a description of its programs and services in the College Catalog, which is reviewed, revised, and updated annually as discussed in I.C.2 above. The catalog is available on the College's website. The College also regularly reviews, revises, and publishes the Governance and Decision Making

Manual, which is maintained by the Office of Planning, Research, and Accreditation (OPRA), the Student Handbook, which is maintained by counseling services, and the Faculty Handbook, which is maintained by the Academic Senate. All of these documents contain key policies and procedures at the College and are available on the college website and in print versions (Link to Student Handbook, Faculty Handbook). The integrity of publications is ensured through guidelines set forth by the Public Information Officer and in the Communications and Graphics Manual (Link to the Saddleback College Communications and Graphics Manual).

Analysis and Evaluation

Saddleback College policies, procedures and publications are reviewed regularly to assure integrity in all representations of its mission, programs, and services. This review occurs through a shared governance process that involves all constituent groups. To ensure ongoing integrity in representation of the Mission, and inclusion of the most current policies and procedures, programs and services in the catalog, the Governance Manual and the student and faculty handbooks, an annual production timeline is recommended. This production timeline should provide ample time for a thorough review of all aspects of the college catalog prior to printing, and should be widely distributed and publicized to all parties responsible for information in these publications.

6. The institution accurately informs current and prospective students regarding the total cost of education, including tuition, fees and other required expenses, including textbooks, and other instructional materials.

Evidence of Meeting the Standard

Saddleback College accurately informs current and prospective students on the total cost of education at the College through multiple information channels, including the College's website, the College Catalog, the online class schedule, the student portal (MySite), and various publications and workshops available in the Financial Aid Office. The College Catalog has a section on Student Fees, Refunds, and Credits that accurately outlines all mandatory and voluntary student fees, including Associated Student Body (ASB) stamp fees, enrollment fees, health fees, material/lab fees, returned check fees, transcript/verification fees, and non-resident fees. The catalog also outlines deadlines for the payment of fees as well as procedures for obtaining credits and refunds. In addition, students are provided information about the fees associated with their classes and the cost of textbooks, as well as payment and refund information, on the online class schedule and on the their MySite portal.

The Financial Aid Office provides information to students on the availability of financial assistance including fee waivers, scholarships, grants, loans, and work study positions. The Financial Aid Office produces a Financial Aid Student Handbook, which describes available aid opportunities and application deadlines. In addition, student consumer information is available on the Financial Aid including the total price of attendance, the net price calculator, tax credits, textbook information, and gainful employment disclosures regarding the success of student in certificate programs that lead to employment. The gainful employment page is designed to help students make informed choices about the colleges, universities, and programs of study they select by providing the following information for each certificate program at the college: graduation rates, total estimated education costs, and the median debt of students who completed the certificate. Workshops are also offered on a regular basis on topics such as scholarships, Financial Aid Shopping Sheet (FAFSA) filing, and the Dream Act application.

Analysis and Evaluation

Saddleback College accurately informs current students and prospective students regarding the total cost of education, including fees and other related expenses through a variety of means including the College's website, especially the Financial Aid web page, the College Catalog, and the MySite portal. The catalog clearly lists all voluntary and non-voluntary student fees and refund policies and procedures. Student are also informed about their current semester fees, as well as any additional or course specific fees (such as a materials fee) in the online schedule of classes and on their MySite portal.. Students are also given information about meeting the costs of education and financial aid assistance through the Financial Aid Office.

- 7. In order to assure institutional and academic integrity, the institution uses and publishes governing board policies on academic freedom and responsibility. These policies make clear the institutions commitment to the free pursuit and dissemination of knowledge, and its support for an atmosphere in which intellectual freedom exists for all constituencies, including faculty and students.**

Eligibility Requirement 13 The institution's faculty and students are free to examine and test all knowledge appropriate to their discipline or area of major study as judged by the academic/educational community in general. Regardless of institutional affiliation or sponsorship, the institution maintains and atmosphere in which intellectual freedom and independence exist.

Evidence of Meeting the Standard

The Saddleback College and South Orange County Community College District's (SOCCCD) commitment to academic freedom and responsibility within the institution is guided by Board Policy 6120 on Academic Freedom which reads:

The South Orange County Community College District Board of Trustees seeks to encourage and to protect academic freedom and responsibility. The SOCCCD is committed to the free pursuit and dissemination of knowledge, and it seeks to foster the integrity of the teaching-learning process. The SOCCCD Board of Trustees, administration, faculty, staff, and students all bear an obligation to protect, to preserve, and to promote academic freedom and academic responsibility within the institution.

This board policy is published and is available to students, employees, and the public on the South Orange County Community College District website,

Academic Freedom is also one of the core values embraced by the College, as shown below:

Our Values

Saddleback College embraces:

Commitment: We commit to fulfilling our mission to serve the south Orange County community.

Excellence: We dedicate ourselves to excellence in academics, student support, and community service.

Collegiality: We foster a climate of integrity, honesty, and respect.

Success: We place our highest priority on student learning and delivering comprehensive support for student success.

Partnership: We strive to develop strong and lasting partnerships among students, faculty, staff, and the community.

Innovation: We anticipate and welcome change by encouraging innovation and creativity.

Academic Freedom: We endorse academic freedom and the open exchange of ideas.

Sustainability: We promote environmental sustainability and use our resources responsibly to reduce our ecological impact.

Inclusiveness: We cultivate equity and diversity by embracing all cultures, ideas, and perspectives.

Global Awareness: We recognize the importance of global awareness and prepare our students to live and work in an increasingly interconnected world.

This list of values is posted on the College webpage, published in the Course Catalog, and posted, along with the mission, in various locations around campus.

The commitment to academic freedom and responsibility is also reflected in the Faculty Code of Ethics and Professional Standards, posted on the Academic Senate web page and published, in part, in the College Catalog. In relation to students, the following is written in the code:

Ethical Principle:

"As teachers, professors encourage the free pursuit of learning in their students. They hold before them the best scholarly and ethical standards of their disciplines. They demonstrate respect for students as individuals, and adhere to their proper roles as intellectual guides and counselors. Professors make every reasonable effort to foster honest academic conduct and to ensure that their evaluations of students reflect each student's true merit. They respect the confidential nature of the relationship between professor and student. They avoid any exploitation, harassment, or discriminatory treatment of students. They acknowledge significant academic or scholarly assistance from them. They respect their academic freedom." (American Association of University Professors Statement, 1990)

Standards of Conduct:

- a. Faculty treat all students with fairness and respect.
- b. Faculty encourage the free exchange of ideas between themselves and students.
- c. Faculty conscientiously strive to be fair and balanced in their evaluation of student work.
- d. Faculty should not exploit their students for personal gain.
- e. Faculty should be fair and objective when providing references for students.

- f. Faculty shall not disclose information about students obtained in the course of professional service unless disclosure serves a compelling professional purpose or is required by law.
- g. Faculty-student personal relationships are unethical when they hinder any student's academic progress or create a situation in which any student is either favored or negatively impacted on grounds other than academic performance.
- h. Because a teacher/student relationship is inherently unequal, a member of the faculty should not enter into a sexual relationship with his/her student while engaged in a professional relationship.
- i. Faculty have the obligation to meet classes as scheduled, to maintain office hours and to provide reasonable means for student access to course information.

Board Policies and Administrative Regulations pertaining to Instruction

BP-6120 Academic Freedom

http://www.socccd.edu/about/about_boardpolicy7.html

Analysis and Evaluation

Saddleback College is committed to the free pursuit and dissemination of knowledge in the academy. This commitment is contained in Board Policy BP-6120 on Academic Freedom, in the core values of the College, and in the Faculty Code of Ethics and Professional Standards.

8. The institution establishes and publishes clear policies and procedures that promote honesty, responsibility and academic integrity. These policies apply to all constituencies and include specifics relative to ethics, including student behavior, academic honesty and consequences for dishonesty.

Evidence of Meeting the Standard

Saddleback College and the South Orange County Community College District (SOCCCD) have various policies and procedures concerning principles of academic honesty, responsibility, and integrity. The commitment to academic freedom and responsibility for all constituents is contained in Board Policy BP-6120, as discussed in I.C.7 above. Additionally, all constituents of the College, including students, staff, faculty, and management, worked together on a joint "Statement of Mutual Respect and Collegial Behavior" in 2015-2016. The statement was approved by all the constituent groups and the College's Consultation Council. It is posted in various offices and meeting rooms around campus and on the College website. It reads:

We, the students, faculty, staff, and management at Saddleback College, are instrumental in providing an environment in which students can successfully achieve their educational goals, and in which employees can maximize their performance. Saddleback College embraces the core values of commitment, excellence, collegiality, success, partnership, innovation, academic freedom, sustainability, inclusiveness, and global awareness. Saddleback College defines the

ethical person as one who is consistently fair, honest, straightforward, trustworthy, objective, and unprejudiced. At Saddleback College, the ethical person models civility and concern for others, and is conspicuously unflinching in the exercise of integrity to sustain the credibility that is the expectation of public servants and scholars.

In enacting the college's core values, members of the Saddleback College community shall treat others with civility and respect, recognizing that disagreement and informed debate are pervasive in an academic setting. They shall not seek to abridge for any purpose the freedoms of employees, students, or the public, nor support retaliatory behavior for any reason.

The following statements are intended as principles for ethical behavior at Saddleback College:

- Provide and protect access to the educational resources of Saddleback College.
- Act as stewards of the campus, protecting and providing for environmental sustainability and beauty through conscientious conduct.
- Protect human dignity and freedom of expression in the academic and working environment, and assure that all are respected as individuals.
- Facilitate a climate of collegiality, independent decision making, and the right to dissent.
- Encourage open dialogue and positive contributions to Saddleback College by inviting all constituencies to participate in the governance process.
- Use care and integrity in managing confidential information, fulfilling commitments, and sharing credit for accomplishments.
- Provide accurate, objective, and clear information so that decisions are made that are in the best interests of students, employees, Saddleback College, and the public.
- Foster openness and courtesy by encouraging and maintaining communication consistent with Saddleback College's organizational and administrative protocols.
- Abide by established college and district policies and procedures and act within applicable laws, codes, and regulations.

While these ethical principles apply to all members of the academic community, this document is not meant to be a comprehensive list of the ethical responsibilities of each member.

Recognizing the differences of members and the different levels of authority that come with them, we thus affirm that:

- Students are expected to abide by the Student Code of Conduct as printed in the student handbook, and the Associated Student Government Code of Ethics.
- Faculty are expected to abide by the Academic Senate's Faculty Code of Ethics and Professional Standards.
- Classified staff are expected to abide by the CSEA Code of Ethics and Classified Senate Code of Ethics.
- Administrators and Managers are expected to abide by the South Orange County Community College District Administrator and Manager Statement of Ethics.

While each constituent group has campus has its own code of conduct, as mentioned, this joint statement was meant to reinforce the values of honesty, responsibility, and integrity shared by all members of the College community.

Finally, Board Policy and Administrative Regulation AR-5401 on Student Conduct outlines the rights and responsibilities of students. It includes the expectations in regards to honesty and integrity and describes the procedures that are in place when the policy is violated. The administrative regulation describes in detail the steps to be taken in case of a violation, the possible disciplinary actions, and the process for contesting such actions. The policy and regulation can be found on the District's website and the College's website and is published in both the College Catalog and the Student Handbook.

<https://www.saddleback.edu/la/acts-academic-dishonesty>

https://www.saddleback.edu/faculty/trampley/Taryn_Rampley/Archives/00%20Academic%20Integrity%20Contract%20Saddleback.pdf

<http://www.saddleback.edu/uploads/asenat/documents/FacultyHandbook1213updated.pdf>

<http://www.saddleback.edu/uploads/vpss/CodeofConduct.pdf>

Analysis and Evaluation

The District and the College have developed policies and procedures that address codes of conduct, including honesty, responsibility, and academic integrity for students, staff, faculty, and management. Board Policy BP-6120 addresses issues of academic freedom and Board Policy and Administrative Regulation AR-5401 addresses student conduct and responsibilities. Moreover, the College constituent groups have reasserted their shared commitment to these principles through the joint development of the "Statement of Mutual Respect and Collegial Behavior."

9. Faculty distinguish between personal conviction and professionally accepted views in a discipline. They present data and information fairly and objectively.

Evidence of Meeting the Standard

Saddleback College expects faculty to present data and information fairly and objectively and to provide an environment that fosters the free pursuit and exchange of ideas. The Faculty Code of Ethics and Professional Standards, developed by the Academic Senate, lists the following expectations of faculty in relation to students:

- a. Faculty treat all students with fairness and respect.
- b. Faculty encourage the free exchange of ideas between themselves and students.
- c. Faculty conscientiously strive to be fair and balanced in their evaluation of student work.
- d. Faculty should not exploit their students for personal gain.

- e. Faculty should be fair and objective when providing references for students.
- f. Faculty shall not disclose information about students obtained in the course of professional service unless disclosure serves a compelling professional purpose or is required by law.
- g. Faculty-student personal relationships are unethical when they hinder any student's academic progress or create a situation in which any student is either favored or negatively impacted on grounds other than academic performance.
- h. Because a teacher/student relationship is inherently unequal, a member of the faculty should not enter into a sexual relationship with his/her student while engaged in a professional relationship.
- i. Faculty have the obligation to meet classes as scheduled, to maintain office hours and to provide reasonable means for student access to course information.

In addition, Board Policy 6120 on Academic Freedom states that it is the responsibility of faculty, among others, to protect, preserve, and promote academic freedom at the College. Thus, when faculty are evaluated on their compliance with Board Policies, it is evident that they are expected to promote professionally-accepted practices of academic freedom and responsibility in their classes. Moreover, the evaluation instrument also assesses faculty on the use of instructional practices that "encourage student learning, critical thinking, and academic initiative," on interactive with students that "demonstrates tolerance of different perspectives," and on the demonstration of "current knowledge of [the] discipline." Combined, all these different expectations of faculty ensure that faculty distinguish between their own views and those of the discipline, promote critical thinking and academic initiation, and tolerate different opinions and views in their classes.

Analysis and Evaluation

Faculty are expected to create an environment of free inquiry, critical thinking, academic initiative, and tolerance within their classes. Faculty present information regarding their discipline in a fair and objective, but also encourage dialogue and debate. The faculty evaluation process reinforces these expectations.

- 10. Institutions that require conformity to specific codes of conduct of staff, faculty, administrators, or students, or that seek to instill specific beliefs or world views, give clear prior notice of such policies, including statements in the catalog and/or appropriate faculty and student handbooks.**

Evidence of Meeting the Standard

Saddleback College is a public institution. As such, Saddleback College is open to all students regardless of race, religion, ethnicity, or preference. Saddleback College does not require conformity to specific beliefs or world views of students nor employees. This standard is therefore not applicable to the College.

Analysis and Evaluation

This standard is not applicable.

11. Institutions operating in foreign locations operate in conformity with the Standards and applicable Commission policies for all students. Institutions must have authorization from the Commission to operate in a foreign location

Evidence of Meeting This Standard

Saddleback College does not operate in foreign locations; therefore, this standard is not applicable to the College.

Analysis and Evaluation

This standard is not applicable.

12. The institution agrees to comply with Eligibility Requirements, Accreditation Standards, Commission policies, guidelines and requirements for public disclosure, institutional reporting, team visits, and prior approval of substantive changes. When directed to act by the Commission, the institution responds to meet requirements within a time period set by the Commission. It discloses information required by the Commission to carry out its accrediting responsibilities.

Evidence of Meeting the Standard

Saddleback College complies with all requirements of the Accrediting Commission for Community and Junior College (ACCJC). Saddleback College's compliance includes upholding Eligibility Requirements, Accreditation Standards, and all Commission policies, guidelines and requirements relating to public disclosure, institutional reporting, team visits, and prior approval of substantive changes. Saddleback College has and continues to respond to all requirements of the ACCJC in a sincere and timely manner, including regular self-evaluations, requested follow-up reports, midterm reports, annual reports, and substantive change reports.

Saddleback College has been accredited since its founding in 1967, and it communicates its accreditation status to students and the public both on its homepage and in its online Catalog . An accreditation page on the website houses all documents related to the most recent accreditation, including the self-evaluation report, requested follow-up reports, and all communication received from the Commission. Older accreditation materials are archived in the Office of the President.

Analysis and Evaluation

The college has a long-standing record of compliance with all of the Commission's requirements for timely submission of all documents required in the accreditation process including self-evaluations, follow-up reports, midterm reports, and annual reports. The College has previously submitted substantive change reports on Distance Education and Off-Site Offerings, both of which have been approved by the Commission. Recently, two additional substantive change reports have been submitted on x and x.

I.C. 13 The institution advocates and demonstrates honesty and integrity in its relationships with external agencies, including compliance with regulations and statutes. It describes itself in consistent terms to all of its accrediting agencies and communicates any changes in its accredited status to the Commission, students and the public.

Eligibility Requirement 21 The institution provides assurance that it adheres to the Eligibility Requirements, Accreditation Standards and Commission policies, describes itself in identical terms to all of its accrediting agencies, communicates and changes in its accredited status, and agrees to disclose information required by the Commission to achieve its accrediting responsibilities. The institution will comply with Commission requests, directives, decisions and policies and will make complete, accurate and honest disclosure. Failure to do so is sufficient reason, in and of itself, for the Commission to impose sanction, or to deny or revoke candidacy or accreditation.

The institution provides assurances that it adheres to the Eligibility Requirements, Accreditation Standards and Commission policies, describes itself in identical terms to all its accrediting agencies, communicates and changes in its accredited status, and agrees to disclose information required by the Commission to achieve its accrediting responsibilities. The institution will comply with Commission requests, directives, decisions and policies, and will make complete, accurate, and honest disclosure. Failure to do so is sufficient reason, in and of itself, for the Commission to impose sanction or to deny or revoke candidacy or accreditation.

Evidence of Meeting the Standard

The College and programs within the College comply with standards, criteria, regulations and statutes as required by external agencies. Some of the external agencies that the College interacts with regularly include; the ACCJC, the California Community College Chancellors Office (CCCCO), and U.S. Department of Education, the California Department of Education, the Orange County Department of Education, the California Community College Athletic Association (CCCAA) as well as program related accreditation agencies and agencies that award grants to the College (Links to each here?).

The College has several programs that are accredited by external agencies including the Registered Nursing (RN) Program, the Health Information Technology (HIT) Program, the Paramedic Program, and the Alcohol and Drug Studies Program. The Nursing Program has

been approved by the California Board of Registered Nursing (BRN) since 1970 and was most recently reapproved in 2013. The Registered Nursing Program has been nationally accredited since 1988 and was most recently reaccredited by the National League for Nursing Accrediting Commission (now the Accreditation Commission for Education in Nursing ACEN) in 2010. The Health Information Technology Program (HIT) was initially accredited in 2015 by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM). The Saddleback Paramedic Program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) upon the recommendation of the Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions (CoAEMSP). The Paramedic program has maintained ongoing accreditation since 2003. The Alcohol and Drug Studies Program is accredited by California Association for Alcohol and Drug Education (CAADE) and has maintained ongoing approval since its inception in 1977.

The accreditation status and agency information is available for each of the above programs on the program website, in the College Catalog, and in program reviews. The College, as well as the accredited programs within the College, are responsive to and consistently demonstrate compliance with the regulations and statutes of accrediting agencies as evidenced by their long term, ongoing accreditation status.

Analysis and Evaluation

The College responds expeditiously, honestly, accurately, and consistently to all accrediting agencies, external agencies and regulatory organizations. The College responds to requests from external agencies in a timely manner (Link Accreditation Website or docs). The College discloses all required information to the agencies, the students, and the public. Information relevant to accreditation is provided via the College's website, the College Catalog, in program review, and in program specific self-studies.

14. The institution ensures that its commitments to high quality education, student achievement and student learning are paramount to other objectives such as generating financial returns for investors, contributing to a related or parent organization, or supporting external interests.

Evidence of Meeting the Standard

Saddleback College is a publicly funded, open-access, not-for-profit community college that functions for the benefit of its students. As such, Saddleback College does not generate financial returns for investors or contribute to any outside organization to enhance or to promote any outside organization's financial gain. All financial arrangements entered into by the College are approved by the governing board and closely monitored by College and District administration.

Student achievement and student learning are central to the mission of the College, which affirms that the institution exists to enrich "...its students and the South Orange County Community College District community by providing a comprehensive array of high-quality courses and programs that foster student learning and success." Standard I.A of this self-evaluation assesses how Saddleback College's mission directs institutional priorities in meeting the educational needs of its students.

Saddleback College's commitments to high quality education, to student achievement, and to student learning are also supported by the Saddleback College Foundation. The Foundation offers comprehensive fund-raising for scholarships, programs, instructional equipment, employee development and campus improvement, with the mission of "...enhancing the quality of Saddleback College's higher education." The Saddleback College Foundation provides student scholarships and partners with Saddleback College in specific resource-development initiatives. The majority of funds donated to Saddleback College by the Saddleback College Foundation are endowed scholarships. The Saddleback College Foundation promotes charitable giving and entrepreneurial revenue generation through its varied activities, conversely the proceeds from these foundational activities directly benefit the educational programs and the mission of Saddleback College.

Analysis and Evaluation

Saddleback College is a not-for-profit public institution and does not generate returns for investors, contribute to related or parent organizations, or support external interests. All financial arrangements entered into by the College are approved by the governing board and closely monitored by the College and District administration. The College is solely committed to providing a high-quality education for its students.

OBSOLETE

- II.A.1. All instructional programs, regardless of location or means of delivery, including distance education and correspondence education are offered in fields of study consistent with the institution's mission, are appropriate to higher education, and culminate in student attainment of identified student learning outcomes and achievement of degrees, certificates, employment, or transfer. (ER 9 and ER 11)**

EVIDENCE OF MEETING THE STANDARD

Saddleback College offers 112 associate in arts degrees, 92 associate of science degrees, 89 certificates of achievement, 3 certificates of completion and 26 occupational skills awards for a total of 322 degrees and certificates. These degrees, awards, and certificates are reflective of the College's mission, which is to enrich "students and the south Orange County community by providing a comprehensive array of high-quality courses and programs that foster student learning and success in the attainment of academic degrees and career technical certificates, transfer to four-year institutions, improvement of basic skills, and lifelong learning." [Evidence A.1]

To ensure that all programs reflect this mission, the program review process every two years, requires faculty to address how their programs serve to support the College's mission statement. [Evidence A.3; page 9] In addition, each program is required to have program-level SLOs (PSLOs) documenting the knowledge, skills and abilities that students can expect to attain as a result of having completed a degree or certificate. These PSLOs are listed in the College Catalog and on program web pages.

Programs are designed to meet the academic standards and rigor appropriate for higher education through the curriculum process and the quality is maintained through regular program review. The *Program and Course Approval Handbook (PCAH)* is the state-sanctioned handbook for curriculum development which guides the development of new and revised programs and courses. At the course-level, the college ensures that its credits are consistent with accepted norms of higher education through its rigorous curriculum approval process where Course Outcomes of Record (CORs) are carefully scrutinized to ensure compliance with accepted State standards. Course outcomes are revised and updated regularly in accordance with established State standards of scheduled review. Transferable courses are developed in compliance with guidelines established by the Cal State and University of California systems to ensure articulation.

All 113 California Community Colleges, including Saddleback College, maintain three general education patterns including the Intersegmental General Education Transfer Curriculum (IGETC) for students planning to transfer to the University of California (UC) system, the California State University (CSU) General Education Requirements (CSU GE) for students planning to transfer to

the CSU system, and a local general education pattern defined by Title 5. In order to transfer to a UC or CSU campus, students generally are required to complete a minimum of 60 transferable units, including general education, major preparation, and elective units.

Program Development and Revisions

The process by which the College develops its academic programs is guided by the College's Curriculum Committee. When a department/division decides to develop a new program, the department/division must first create a program proposal, which provides justification, sequencing of courses, and minimum qualifications for faculty to teach the courses. In the case of a new transfer program, the department would need to show that the new (or revised) program would meet 51% of a transfer institution's program lower division requirements. Once this step has been completed, the department/division would then forward its proposed program to the College's Curriculum Committee, which will determine if the course meets the standards of Title 5. These standards include grading policies, units, intensity, pre-requisites and co-requisites, basic skills requirements, and difficulty and level. [PCAH 29-30] In conjunction with the curriculum chair, the College's articulation officer then ensures that articulation agreements will exist for the newly developed program. Saddleback College maintains articulation agreements with its most common transfer institutions, including all UC and CSU campuses as well as many private and out-of-State colleges and universities. These agreements are published at ASSIST.org as well as on the College's articulation web page. New and revised programs are then approved by the Academic Senate, the Board of Trustees, and the State Chancellor's office.

In the case of CTE programs, curriculum approval is a three-step process. While curriculum for CTE programs is first approved locally by the College's Curriculum Committee, Academic Senate, and Board of Trustees, CTE curriculum must then be approved by a regional consortium known as the Los Angeles/Orange County Regional Consortium (LA/OCRC), which includes representation from all 27 community colleges in the Los Angeles and Orange County area. This consortium ensures that a new or substantially changed program has positive labor market data and employment opportunities and that the program doesn't have disruptive competition with other regional colleges. The final step is approval from the State Chancellor's office.

When choosing fields of study for CTE programs, faculty will recommend a program or program modification, then follow the state-mandated process for program approval. The college will then look to demand for this program by researching the number of occupations the program would support, the rate of pay for the occupation, and comparable programs, among other things. Data is obtained from various sources such as EMSI, which includes local labor market statistics, and Edsmart, a database tied to the State Chancellor's office that provides enrollment rates, persistence rates, success rates, and the types of certificates and degrees that are awarded for similar programs in the area. In conjunction with this data, the College takes into consideration the demographics and student populations related to the schools that offer said program. After researching demand, the college will then seek input from industry

personnel through advisory committees. Based on all this information, faculty will develop the curriculum and send it through the regular curriculum approval process.

Similar to CTE, Community Education classes are developed and offered in response to community need as identified by feedback from participants, enrollment history, popularity of similar programs offered elsewhere, and current trends. The department welcomes new program proposals from the general public or College faculty and staff as well. All proposals are reviewed by program specialists and the dean. New proposals are accepted based on the anticipated needs of the community and financial viability. All recommended Community Education classes are reviewed by Academic Senate for duplication with credit offerings and approved by the Board of Trustees before being offered.

In addition to Community Education, the College illustrates its commitment to the life-long learner through the Emeritus Institute (EI), which offers non-credit academic programs to an older adult population. These courses go through the same approval process as other academic courses but, as they are non-credit and non-transferable, do not go through a regulation. Central to the mission and goals of the EI is "the College's commitment to offer opportunities for intellectual stimulation and cultural enrichment to all members of the community (AUR 1). Furthermore, courses offered through EI are "academically-rigorous, socially-engaging, mentally-stimulating, and physically-strengthening for older adult students" (AUR 8).

When programs are either considered obsolete or are demonstrating a consistently low enrollment, these programs can be re-evaluated through the *Program Vitality Inquiry Policy and Process*, which allows struggling programs an opportunity to assess the program's viability. This process can be initiated by either faculty or administration, and the possible outcomes include program continuance, program revitalization, or program discontinuance.

Course and Program Evaluation

The college addresses the assessment of courses and programs for currency, appropriateness within higher education, teaching and learning strategies, and student learning outcomes through a process known locally as technical review, which is required every five years for non-CTE courses and every two years for CTE courses in compliance with Title 5. All courses and course revisions are written by faculty experts within a department and approved by the College's Curriculum Committee, which looks for appropriate rigor, content, standards, and expectations, the Academic Senate, the Board of Trustees, and the State Chancellor's Office.

All instructional programs, including academic programs, CTE, and the EI, have course-level SLOs, which drive the curriculum. Course SLOs are linked to both PSLOs and the College's ISLOs, and as part of the bi-annual program review process, faculty are asked to reflect on how course SLO assessments contribute to overall PSLO and ISLO attainment.

All ISLOs are tied to the College's mission of fostering learning and student success, and they focus on Effective Communication, Intellectual and Practical Skills, Community/Global Consciousness and Responsibility, and Breadth of Subject Area Knowledge. In Spring of 2015, a work group of the Educational Program and Assessment (EPA) committee of the College

researched ePortfolios and their use for gathering subjective data from students related to attainment of ISLOs. The research found ePortfolios to be a sound approach and source of rich ISLO attainment data because they allow students to reflect on both classroom and non-classroom activities related to ISLOs. In spring of 2016, approximately 12 faculty piloted the use of ePortfolios in their classes. This pilot is being evaluated by the work group during fall 2016, and a plan for college-wide implementation of ePortfolios is being devised. Further discussion of SLOs can be found in II.A.3.

Student Success and Academic Planning

The institution provides each student with a clear roadmap or pathway that leads to further education and/or employment through the Student Success and Support Program (SSSP). As a result of the SB1456: Student Success Act, SSSP requires all students to follow the matriculation process, unless they have already earned a minimum of an AA/AS degree from an accredited U.S. college, are concurrently enrolled at another 4-year college, are taking classes for personal development, or are concurrently enrolled in grades K-11. This requirement, along with the college's enrollment processes, ensures that students will be properly placed and guided toward their majors early on. As part of the initial enrollment process, students must take the following steps:

1. Orientation
2. Assessment
3. Advisement
4. Educational Plan

Students are guided through this process by a program known as My Academic Plan (MAP), which can be accessed through My Site and which is required of all students who want a certificate, a two-year degree, or who want to transfer to a four-year university. [screenshot of MAP in **Evidence A.1**]

Information on graduation requirements is available on the College website and in the College Catalog, which includes a description of all degree and certificate requirements, as well as the general education transfer patterns. In addition, the College's Transfer Center and academic counselors aid students with their educational goals.

Data that students progress through and complete degrees and certificates, gain employment, or transfer to four-year institutions is collected annually in the *Saddleback College Institutional Effectiveness Report* [**Evidence A.1**], which analyzes retention and success rates over the past five years. The report includes student progress, student transfer rates, and degrees earned by transfer students at universities within the CU and UC systems.

Additional data in relation to student progression and achievement will soon be available through the Community College Survey of Student Engagement (CCSSE), to which the district joined and became a member in 2015. The CCSSE helps community colleges assess their educational practices by analyzing the use of active and collaborative learning, student effort, academic challenge, student-faculty interaction, and learning support services. [**Evidence A.1**]

Beyond insuring academic success, the college also seeks to ensure employment for the CTE students. All CTE programs are required to reach out to the community to make sure the programs meet employment needs. The college also monitors labor market data to see if programs are still relevant.

While the college does not have any programs that are exclusively offered through distance education, courses within programs are offered online and many of our programs provide the ability to complete 50% or more of the degree online. The College relies upon discipline experts within programs, such as department chairs, to determine if online courses are applicable to the program and their students. In addition, advisory boards within CTE programs provide additional guidance on the applicability and need for online offerings, as in the examples of Child Development, HIT, and Real Estate. Considerations for decisions affecting whether or not to offer online courses include analysis of student access, community needs, historical data for enrollment patterns, fill rates, demand, and student success rates

ANALYSIS AND EVALUATION

Saddleback College offers a wide variety of courses and programs that are aligned with the College's mission. The degrees and certificates offered meet the needs of our students, and are regularly assessed to ensure relevancy, academic rigor, and student achievement, regardless of location or means of delivery. Students earning degrees or certificates are prepared to transfer or enter the workforce. The Curriculum Committee reviews programs on a regular basis to ensure the program supports the College's mission and is appropriate to higher education. Programs are assessed through a comprehensive program review process every two years, which includes an analysis of SLO attainment and student achievement data.

- II.A.2. Faculty, including full-time, part-time, and adjunct faculty ensure that the content and methods of instruction meet generally accepted academic and professional standards and expectations. Faculty and others responsible act to continuously improve instructional courses, programs and directly related services through systematic evaluation to assure currency, improve teaching and learning strategies, and promote student success.**

EVIDENCE OF MEETING THE STANDARD

All faculty, regardless of mode of delivery, are expected to teach the approved Course Outline of Record (COR), which describes the requirements for the course including topics covered, course objectives, typical assignments and readings, methods of instruction, and methods of evaluation (EVI). Regular evaluation of both full-time and part-time faculty is practiced to determine that faculty are teaching to the COR.

Faculty, both full-time and part-time, work collaboratively to regularly review and revise the CORs and to evaluate their programs through the curriculum revision and development process and through program review.

Regular evaluation of program curriculum is conducted in accordance with Title 5 section 55130(d) and Education Code section 78016 as overseen by the Curriculum Committee, as described in II.A.1 above.

Program Review

During the bi-annual program review process, overseen by the Educational Planning and Assessment Committee (EPA), each instructional program conducts a thorough self-evaluation addressing such areas as staffing, curriculum and instruction, student success, teaching modalities, facilities and infrastructure, and community outreach. As described in the *Program Review Handbook* [Evidence 1.16], the objectives of Program Review are to:

1. State program objectives and align future objectives with the college's mission and vision.
2. Collect and analyze data on key performance indicators, SLOs, program activities, and accomplishments.
3. Document and discuss the effectiveness of programs.
4. Develop recommendations and strategies concerning future program directions and needs (e.g., budget, staffing, and resources).
5. Provide an opportunity for programs to assess their relevance and position within the division and the college and with all other stakeholders.

In conjunction with the program assessment process, significant emphasis has been placed on the use of data in the continuous improvement of the College's course, program, and degree

offerings. Faculty are expected to provide detailed data reports in relation to their programs, which includes the inFORM Program Review Data Set, the TracDat Comprehensive Program SLO Report, the EMSI Report (if CTE), and the TracDat Program Objectives and Action Steps Progress Report [PR page 15]. The inFORM Program Review Data Set provides five years of data on a variety of indicators as a way of analyzing a program for its effectiveness. These indicators, which can be separated by mode of delivery, include course productivity, course fill rates, success rates, retention rates, student demographics, and awards conferred[15]. In addition, the research office supports the Program Review process by ensuring that a research analyst is available to help faculty with their research needs. Finally, an important component of the Program Review process is the faculty dialogue about the data, including SLO assessment results, which have led to a number of changes within instructional programs including changes in curriculum, teaching methods, and the delivery modalities in which a course is offered, based on outcomes assessment as evidenced by the EPA reflective document, which is discussed further in II.A.3. In general, teaching methodologies and delivery modalities are selected based on course content, student need, applicability to discipline, and faculty's interest and teaching style. The variety of teaching modalities offered at the college include face-to-face, online, hybrid, eight-week, accelerated, and late-start classes—all of which enable the college to meet the needs of students so that they can achieve their educational goals in a timely fashion. At the same time, the efficacy of the varying delivery modes is also assessed based on student success and retention rates. Based on an evaluation of the data available, each program sets objectives and action steps during the program review process in order to improve their programs. [EVI page 12 of PR]

Faculty Dialogue and Professional Development

Beyond program review, faculty-led dialogue about effective teaching strategies is ongoing and pervasive. Each semester, a week of professional development activities is offered for all faculty. This professional development week often includes workshops on teaching strategies, overviews of new technologies tied to education and training tied to the College's learning management system. [Evidence Flex Calendar in A.2] These conversations continue into the division and departmental meetings, which are open to both full-time and part-time faculty. Examples of ongoing professional development opportunities include the implementation of AVID for Higher Learning in Fall 2016 for which the College received a 3-year Dell grant, the Basic Skills Initiative (BSI), which has allowed the College to focus specifically on faculty projects tied to the basic skills center, the CTE Enhancement Funds, which can be used to help align curriculum with industry standards, and the Institute for Teaching and Learning, an umbrella entity which offers ongoing workshops and training on a variety of teaching strategies and methods.

Further training and support is also available to faculty through the Faculty Center for Student Success (FCSS). Formerly known as the Center for Instructional Design & Distance Education (CIDDE), the FCSS provides exemplary faculty support and training services that focus on online education and instructional technology. Currently, the FCSS staff are working closely with the Online Education Coordinator and the Dean of Online Education and Learning Resources to continue improving the quality of online, hybrid, and enhanced education. This support

includes training in online technologies through workshops and one-to-one advisement and collaborating with DSPS specialists on the latest best practices to provide continual updates on accommodation needs and emerging technology options. Furthermore, there are multiple, varied opportunities for faculty to consider teaching methodologies for online courses. Support staff in the FCSS are well-versed with the tools and building blocks within the Learning Management System, and frequently update and refresh their skills to better support faculty members. Individual faculty members also participate in @ONE training courses virtually, and participate in staff-led workshops in the Faculty Center. Saddleback College was at the forefront of training for our online faculty, and in the past we offered a six-course skills award for faculty. This program was discontinued when @ONE created their online program, and it was believed that faculty would complete their program instead. While many faculty have completed the @ONE program, it became evident that a locally-devised program should be created as well. Therefore, a 10-week certificate course was created in the summer and fall 2016 and will be offered for the first time in spring 2017.

Faculty Evaluation

All faculty are evaluated by the dean or designee on a regular basis, as outlined in the Academic Employee Master Agreement for 2015-2018. Probationary, tenure-track faculty are evaluated yearly through their fourth-year. Tenured and part-time faculty are evaluated at least once every three years. The evaluation process is negotiated by the Faculty Association, in consultation with the Academic Senate, and district administration. The process includes a faculty-prepared portfolio, a classroom/worksite observation, student evaluations, and an administrative review by the dean or designee. In the case of probationary faculty, a tenure review committee (TRC) is created to monitor the progress of the faculty member and make recommendations on their tenure status. The evaluation of faculty is based on criteria such as the maintenance of currency in their field, the use of effective instructional methodologies and practices which encourage student learning and critical thinking, the teaching of the approved curriculum, and participation in outcomes assessment and program review.

ANALYSIS AND ASSESSMENT

The College has effective processes for establishing, evaluating, and maintaining quality courses that are taught in a variety of delivery modalities including face-to-face, hybrid, and online. These processes are fully guided by faculty and include curriculum development and technical review, program review, outcomes assessment, and program discontinuance inquiry. All faculty are responsible for student success and are evaluated on a regular basis to ensure currency in their field, the use of effective teaching methodologies, adherence to the course curriculum, and participation in outcomes assessment and program review.

- II.A.3. The institution identifies and regularly assesses learning outcomes for courses, programs, certificates and degrees using established institutional procedures. The institution has officially approved and current course outlines that include student learning outcomes. In every class section students receive a course syllabus that includes learning outcomes from the institution's officially approved course outline.**

EVIDENCE IN MEETING THE STANDARD

The College recognizes three levels of learning outcomes – course SLOs, which pertain to the knowledge and abilities that students gain within a single course; Program-level SLOs (PSLOs), which pertain to the knowledge and abilities that students gain within their field of study, and Institutional SLOs (ISLOs), which pertain to the knowledge and abilities that students gain by having completed a degree or transfer program at the College. All of these SLOs have been identified and ongoing assessment has been in place since 2005. In addition, the College has also identified Administrative Unit Outcomes (AUOs) for each administrative and student support unit on campus and assessment of these outcomes has also been underway for a number of years. The coordination of these assessment activities is through the Educational Planning and Assessment Committee (EPA), in collaboration with the Curriculum Committee, the Academic Senate, and the Planning and Budget Steering Committee (PBSC).

All active courses at the college have related SLOs, which are required to be listed on the syllabus of each section offered, and one or more of these SLOs is assessed in each section of the course annually and the results stored within *TracDat*, the system used to house the College's SLO data. In order to input assessment results into *TracDat*, department chairs meet with their faculty to engage in dialogue on the results and to make changes, such as to their curriculum or teaching methods, in order to increase SLO attainment. Evidence of this assessment activity, as well as assessment results and the ways in which results have been utilized by programs, are contained in the *TracDat Comprehensive SLO Report*, which is run and analyzed by each program during the program review process. At present, the College is working on including SLOs on the COR for each course. This necessitated both a technical change on *Curricunet*, the system used to house the college's curriculum, and a processual change in the curriculum process. Due to the five-year cycle for course review and the need for all changes to the COR to go to the State Chancellor's office for approval and the articulation process, this change will take several years to complete in each course cycles through the system. Faculty are evaluated, in part, on their participation in SLO assessment activities and in the placement of SLOs on their course syllabi.

Program Student Learning Outcomes (PSLOs) have also been identified for each certificate and degree program at the College. These are published in the College Catalog and posted on the web pages of most programs. Within *TracDat*, course SLOs are mapped to the relevant PSLOs, and reports can be run to allow for the analysis of PSLO attainment based on the roll-up of course assessment data. Direct assessment of PSLOs also occurs in many programs, especially those with capstone courses or licensure exams, such as nursing or child development, where a

single course, exam, or signature assignment is required for all students graduating with a certificate or degree in that program. Due to the nature of community colleges, this is not true for most programs, so the College has been investigating various options. At present, the College is initiating a rollout plan for student ePortfolios for the purpose of direct ISLO assessment. Once institutionalized, this can be used by programs for PSLO assessment as well.

The College has also identified a set of Institutional Student Learning Outcomes (ISLOs) that are related to degree requirements. These are published in the College Catalog, in the Student Handbook, and on the College's website. Within *Tracdat*, course SLOs are mapped to the relevant ISLOs, and reports can also be run for the analysis of ISLO attainment based on the roll-up of course assessment data. The College has identified a number of methods for direct ISLO assessment that include the following:

- **ePortfolios:** an ePortfolio (electronic portfolio) is an electronic collection of writing samples, photos, research undertakings, creative projects, student reflections, and/or mentor feedback that document a student's academic journey while at the College and beyond. ePortfolios allow students to report on both classroom assignments and non-classroom accomplishments related to ISLOs. During 2014-2015, a joint working group of the Student Success Committee and the EPA Committee conducted research and developed a ePortfolio pilot, which took place in spring of 2015 [EVI-ePortfolio handbook and website]. During the pilot, approximately 100 faculty used ePortfolios in their classes. The students involved in the project created their ePortfolios on one of two platforms, uploaded a signature assignment given to them by their professors which directly assessed one or more of the College's ISLOs, and wrote a brief reflection on their attainment of that ISLO. A plan for the collegewide rollout of ePortfolios is being devised during fall 2016 for implementation in spring 2017.
- **Testing students through CLA+:** CLA+ is a standardized exam for SLO assessment that is used by many four-year colleges and universities. It can provide an external validation that students have attained the College's ISLOs. During the pilot implementation of CLA+, 100 students were tested. An assessment of its usefulness for the college is taking place in fall of 2016. [EPA draft report, page 17]
- **Interactive workshops:** in fall of 2016, the EPA Committee began holding interactive workshops with faculty during the College's professional development week as a way to identify the ways in which ISLOs are being assessed across the campus. Much like a focus group, these workshops are useful in collecting indirect data on ISLOs. [EPA draft report, pages 13-15]
- **Department Chair Surveys:** in fall of 2016, the EPA Committee will send annual surveys to department chairs as an additional way of identifying the ways in which ISLOs are being assessed across the campus. These surveys will also provide indirect data on ISLOs.

ANALYSIS AND EVALUATION

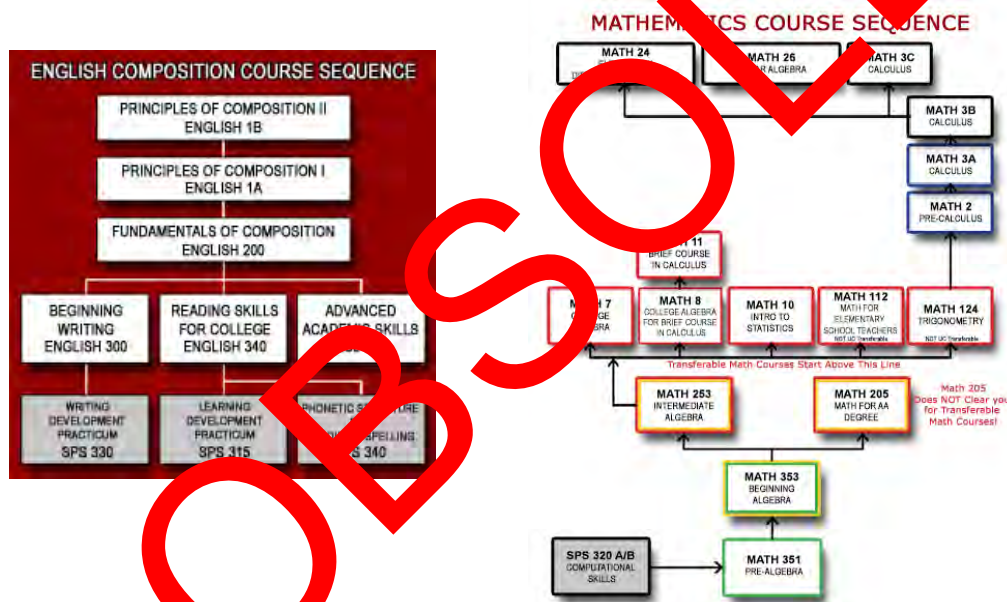

The College has identified course SLOs for all courses it offers, PSLOs for all certificate and degree programs, and ISLOs for general education outcomes. All course SLOs are being assessed on a regular basis, which rolls up to PSLOs and ISLOs, providing data for a dialogue on their attainment through the program review process. The College is working diligently on finding ways to more directly assess PSLOs and ISLOs, such as through the promising use of ePortfolios. For many years faculty have been asked to place SLOs on their course syllabi, but it became evident that there were pockets in which this was not being done. In order to rectify this, in 2015 the Academic Senate approved a mandate that all course syllabi must include the approved SLOs, and faculty are now evaluated on adhering to this mandate [EVI]. The College is working on integrating SLOs into official course outlines. Finally, although course SLOs have been assessed in all courses and in every delivery mode, the data has been aggregated so that results cannot be analyzed by modality, unlike other success indicators such as success and retention rates, which are disaggregated. The EPA Committee is currently working on a new process that will require that SLO result data be separately reported and analyzed. Adoption of this new process will occur for the 2016-2017 assessment results.

OBSOLETE

- II.A.4. If the institution offers pre-collegiate level curriculum, it distinguishes that curriculum from college level curriculum and directly supports students in learning the knowledge and skills necessary to advance to and succeed in college level curriculum.**

EVIDENCE OF MEETING THE STANDARD

The College offers pre-collegiate level curriculum in English, Math, Reading, and English as a Second Language (ESL). Pre-collegiate level courses are designed to prepare students for college-level coursework, and as such are non-transferable. This pre-collegiate curriculum is distinguished from college-level curriculum through the use of course-sequencing numbers, which have been established through the College's Curriculum Committee. All basic skills courses are numbered in the 300s and are designed to prepare students who aren't ready for college-level curriculum. Developmental courses are in the 200s and are geared toward students who are higher than basic skills students but still not ready for college-level curriculum. Transfer courses are numbered from 1-199 for transferability to the CSU and 1-99 for transferability to the UC. This sequencing system is available to students in the College Catalog (page 140).

Information about the course sequencing system is also available in MAP when students develop their academic plans and by clicking on the “Knowledge Base” at the bottom of the electronic Class Schedule home page. (screenshot of *Class Schedule* and *Knowledge Base* in **Evidence A.4**). The College does not differentiate sequence by teaching modality, so face-to-face and online courses are numbered in the same way. For those students working on stackable certificates (which allow students to start with a low unit certificate that provides employable skills that can then be combined with another certificate or degree to lead to expanded skills and higher pay) the numbering system, along with the official course description, will clarify when their work becomes college level.

The College establishes and evaluates pre-collegiate courses and programs through the scheduled Technical Review as outlined in II.A.2 above. As there is no distinction between faculty who teach Basic Skills courses and faculty who teach transferable courses, dialogue regarding departmental mapping of courses, alignment of SLOs, and the integration of compressed or accelerated curriculum is a department-wide discussion. Curricular changes are made in the interest of promoting student success. As an example, the English department has been reviewing and revising each course in its composition sequence, taking into consideration the State’s coding rubric for course content and sequencing. In addition, the English department has examined issues with success rates and retention in relation to the multiple exit-points that a Basic Skills student would encounter. “Exit points” refers to the increased number of courses the Basic Skills student takes in order to enter college-level curriculum. With each additional class, it is less likely that the student will reach his/her academic goals. In response to this concern, the department will pilot an accelerated course in Spring 2016. This course, ENG 390, will remove an exit point and allow students who successfully complete the course to enter into college-level writing.

Prior to beginning coursework at the college, all students are required to complete the matriculation process unless they have already earned a minimum of an AA/AS degree from an accredited U.S. college, are concurrently enrolled at another 4-year college, are taking classes for personal development, or are concurrently enrolled in grades K-11. After reviewing the New Student orientation, students are assessed in Reading, English, Math, and ESL (when applicable). Once their skill level has been determined, students are advised and given a first semester education plan. As a result, the criteria by which the College decides to offer developmental, pre-collegiate, continuing adult community education, short-term training, or contract education programs is based first on student need as established through matriculation testing. The College also works with the K-12 system to understand its various student populations and their needs. The decision of whether to offer these pre-collegiate courses in face-to-face or online modalities is determined by the faculty within the department. The vast majority of these courses are only offered face-to-face, but some English and math courses are offered online in response to student demand. Student success, retention, and persistence rates in these course are continually monitored to determine if they are being offered in the correct modalities.

An example of a recently developed program that illustrates the College’s responsiveness to K-12 needs is the new non-credit ESL Adult Education program, which is offered through the

Division of Community Education and provides Basic Skills classes for adult English language learners, a program previously offered only through the extension program of the K-12 districts. This program provides an example of a clear pathway that beginning ESL students can take in preparation for college courses. Starting in Fall 2015 and geared specifically for the Basic ESL population, the ESL adult education curriculum provides a seven-level class sequence that leads from Basic Literacy to Advanced-High ESL, a class just below the lowest level of ESL offered at the College. Class sequencing numbers have been assigned in the 700 range, to illustrate that these classes are below the 300 level-courses and are designed to prepare students to for the ESL courses offered through the regular College curriculum.

Along with student need, the criteria for offering Basic Skills can also be tied to employer demand, especially for CTE and EWD. Contract education and training programs are customized to industry's needs and are initiated through the EWD Division, Corporate Services Office. [EWD 6] For example, the Health Science department offers Basic Skills courses/programs with contextualized basic skills. These are Basic Skills offerings are designated specifically for health science students and include contextualized and applied learning. [EWD Plan, page 11] Industry need drives the EWD course and training offerings [EWD Plan 6]. In the Guiding Principles of the College's EWD plan, "The EWD program will include seamless services and instruction (i.e. a 'pipeline of services') within the college and external partners" as well as "track student progress and success from enrollment to employment" [EWD Plan 1]. For example, their Job Placement Officer works with students and industry partners to make employment connections for our students.

Basic Skills students are supported by the Student Success Support Program (SSSP) through the matriculation process, by counseling services in the development of academic plans and explanation of course sequencing, and by the Learning Resources Center (LRC) tutoring program that helps students to succeed in their classes. All of these services assist students in their academic progress and in the illumination of pathways to college certificates and degrees..

ANALYSIS AND EVALUATION

The College is dedicated to the educational needs of our community. Providing pre-collegiate courses, along with support services, is essential for students who desire a college certificate or degree but who are not prepared to succeed in college-level coursework. However, the persistence and success rates of these students is, unfortunately, fairly low. In Fall 2015, the College's BSI committee published a report that addresses the success rates of students who moved from pre-collegiate to collegiate courses. [Evidence A.4] Following a cohort from Fall 2012 to Fall 2015, the data shows that only 42% of the students successfully passed a college-level English course within three years and only 6% passed a college-level math course within three years. This is an ongoing concern that is being address in a variety of ways. One of the reasons why students have not progressed quickly into college-level courses is due to the number of courses in the sequences. Therefore, faculty from several departments have started to work together to shorten the time that it takes students to prepare for college-level transfer courses. For example, curriculum in ESL 350 was revised to align with ENG 300 so that students

|

can go right into the ENG 200 intermediate skills class without having to take ENG 300 as well. This has been accomplished through the alignment of SLOs in the two courses. Additionally, ESL faculty have changed the way ESL 356, Academic Success Strategies, is taught so that students who are concurrently enrolled in ENG 200, receive additional support. The ESL department also developed additional courses which aid in academic success such as ESL 354, Vocabulary Skills for College, ESL 355, ESL Reading for College: American Literature, and ESL 357, Grammar Review for College.

OBSOLETE

- II.A.5. The institution's degrees and programs follow practices common to American higher education, including appropriate length, breadth, depth, rigor, course sequencing, time to completion, and synthesis of learning. The institution ensures that minimum degree requirements are 60 semester credits or equivalent at the associate level, and 120 credits or equivalent at the baccalaureate level.**

EVIDENCE OF MEETING THE STANDARD

The College's Curriculum Committee is responsible for maintaining high-quality, broad-based, rigorous programs that follow standard practices in American higher education. When new or revised curriculum is proposed, the college's Curriculum Committee determines the course level and sequencing through a number of techniques. When applicable, the Curriculum Chair will first look to the rubrics from the State-Chancellor's office and apply them to the course description to determine if a course has been appropriately sequenced and has the appropriate level of rigor. In particular, the chair will look to the rubrics when assessing developmental courses in Math, English, Reading, and ESL. While reviewing the proposed course, the chair will look to see how the course aligns with the rubric and if it is appropriately placed within a program's sequence. In cases when there are no rubrics (most often for courses that are designed for transfer or for CTEs), the chair will look to Bloom's Taxonomy to assess the course along with reviewing the Methods of Evaluation (MOE). The state-approved Course Outline of Record (COR) is a key metric in ensuring that the College's offerings are reflective of the practices common in American higher education.

The Curriculum Committee also ensures that new and revised associate degree programs have at least 60 units, which are comprised of general education requirements and at least 18 degree-specific units in accordance with Board Policy 5600, Article 5, Section 33060 et seq. All degree programs can be completed in two years if a student attends the College on a full-time basis with a minimum of 15 units per semester.

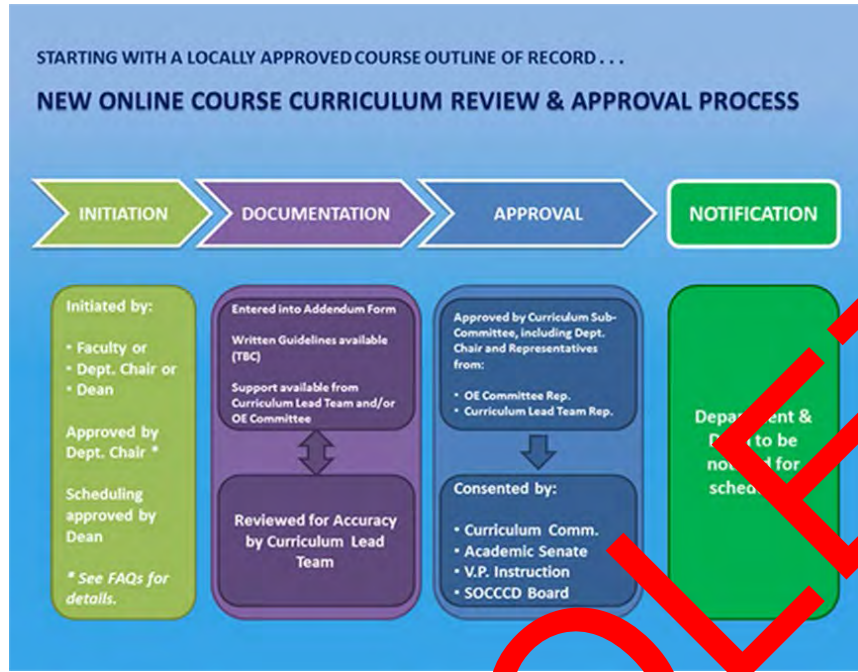

Another way that the college ensures that its programs and degrees follow practices common to American higher education is through articulation, where the College's articulation officer makes sure that the courses offered align with those of higher or equal institutions. These articulation agreements ease a student's ability to transfer. Articulation agreements are developed and updated based upon student need. The College maintains articulation agreements with its most common transfer institutions including all CSU and UC campuses as well as many private and out-of-State colleges and universities. All articulation agreements are published at ASSIST.org as well as the Saddleback College articulation website. **[embed hyperlink]**. Evidence of the efficacy of these agreements can be found in various degree pathways that are offered including the Associate of Arts for Transfer (AA-T) degrees. The AA-T degree ensures that students who earn an AA-T and meet the CSU minimum eligibility requirements are guaranteed admission to a CSU. To date, the College offers 19 majors which have been approved for the AA-T, in addition to the 185 AA and AS degrees offered by the College.

The quality of programs is maintained by the College's formalized program review process. All programs are subject to review on a two-year cycle and include an analysis of the program's relevance to the College mission. Courses that have not been offered in three years are generally eliminated from the College Catalog while those programs that are determined to be outdated or unnecessary are subjected to the Program Discontinuance Inquiry Policy [Evidence A.5]. This policy takes into account the following issues: "effect on students, college curriculum balance, educational and budget planning, regional economics and training, [and] collective bargaining agreements." [cite policy] Though rarely implemented, the presence of this policy reinforces the connection between courses offered and student need.

High-quality instruction is ensured through the hiring process and through evaluations for both full-time and part-time faculty every three years. All faculty must meet minimum teaching qualifications. District administration and the Faculty Association have established the faculty evaluation process in accordance with Education Code. The process is regularly reviewed and updated by the Academic Senate, Faculty Association, and administration and implemented by the faculty and administration to ensure that probationary, tenured and part-time classroom and non-classroom faculty are evaluated by division deans or their designees with regard to faculty expertise, organization, communication skills, variety of teaching methods, and the quality of their assessments. [Evidence A.5]

Quality of online courses and online instruction is maintained through several means. First, a sub-committee of the Curriculum Committee ensures that the quality of online courses is consistent with that of face-to-face courses through a separate approval process. The sub-committee also determines that the methodology intended to be used in the proposed online course is appropriate to the topic. The Distance Education (DE) addendum confirms that faculty have created assignments and grading strategies to better suit an online environment.

Figure 7: Flow-chart for D.E. Curriculum Approval Process

The second means by which quality of online courses is maintained is through faculty evaluation. Similar to a face-to-face evaluation, the evaluation of online classes is done by the dean or dean's designee. The evaluation is completed through a 15-minute meeting between the instructor and the evaluator in which the instructor will walk the evaluator through the online class.

ANALYSIS AND EVALUATION

The College follows practices common to institutions of higher education in the development of its certificate and degree programs. Following Title 5 and Board Policy 5600, all associate degrees require a minimum of 60 semester units. As the College's content experts, faculty are primarily responsible for all matters concerning breadth, depth, rigor, sequencing, time to completion, and criteria for evaluation of courses and programs through the curriculum and technical review processes. All programs are evaluated for their effectiveness every two years through program review and quality instruction is maintained through the evaluation of faculty, in both face-to face and online courses, every three years.

II.A.6. The institution schedules courses in a manner that allows students to complete certificate and degree programs within a period of time consistent with established expectations in higher education.

EVIDENCE OF MEETING THE STANDARD

The College creates a course schedule that allows students to complete certificate and degree programs within a period of time consistent with established expectations in higher education. Coursework leading to a degree, an occupational skills award, or a certificate is offered during the fall, spring and summer semesters and is sequenced to enable students to complete requirements in a timely fashion. Courses are offered in various locations within the community, such as at local high schools, in both day and evening time blocks, and for varying terms lengths, as well as in different modalities. In addition, the state requires that courses be offered at least once every two years, ensuring that students will be able to complete their degree in the specified timeframe.

The College utilizes a number of data-driven methods to ensure that courses are scheduled in alignment with student needs and program pathways. Through Sharepoint, department chairs have access to an enrollment management site that provides data on course times, enrollments, and section counts [Evidence A.6]. This provides evidence of demand. Further evidence of demand can be found through the inForm data warehouse, which provides statistics and data related to enrollment trends, retention, and success rates. Course waitlists are also useful for determining demand. If waitlists for courses are long, additional sections can be added at the time of demand if classroom space and faculty are available.

Programs are also encouraged to create scheduling templates so that students are aware of when all courses will be offered over the coming two-year period and can plan their schedules accordingly, and many programs, such as Automotive Technology and Human Services, have done so. All provide clear roadmaps and are efficiently sequenced. This is particularly important for CTE programs, which tend to have a smaller number of courses that are offered only once every two years. This information is therefore vital for students to know as they are creating their academic plans. The goal is for all programs to create their templates on a yearly basis and publish them to their website so that students and counselors will be able to reference them. In addition, as more students complete their academic plans through MAP, it is expected that the College will be able to use this information to effectively predict which courses will be of high demand in which semesters and locations and thereby offer the correct number of sections to meet student needs.

Finally, the College has recently taken several steps to ensure that students complete their coursework in a timely fashion, such as the introduction of accelerated courses and changes in placement assessment. For example, the accelerated course English 390 is a one-semester course designed for students who have placed two levels below college transfer. Once the course is completed, students are ready for college-level English. Furthermore, both the introduction of a multiple measures assessment process and the Refresh Program, which allows students who have placed into beginning or developmental courses the opportunity to take a

free workshop, ensure that students are both appropriately placed and on a clear pathway toward their career goals.

ANALYSIS AND EVALUATION

The College has worked hard at enrollment management to ensure that students are able to complete their certificates and degrees in a timely manner. An important re-design of course scheduling is reflected in the new Block Schedule instituted in 2015-2016, [Evidence A.6], designed to allow for the most efficient scheduling of courses to meet the needs of students. The College has recently completed a comprehensive enrollment management plan [Evidence A.7] that addresses additional ways to improve student progression through their programs. This plan was approved by the Consultation Counsel in March of 2016 and has since been implemented.

OBSOLETE

II.A.7. The institution effectively uses delivery modes, teaching methodologies and learning support services that reflect the diverse and changing needs of its students, in support of equity in success for all students.

EVIDENCE OF MEETING THE STANDARD

In order to best meet the needs of a diverse student population, the College uses a variety of teaching methodologies and delivery modes, including face-to-face, online, hybrid, field studies, service learning, and cooperative work experience (CWE). These various modes of delivery are designed to address the various learning styles and delivery needs of the student population.

The College's diverse teaching methodologies are also reflected in the numerous ways in which SLOs are assessed, as outlined in the *Saddleback College SLO Handbook*. These methodologies include the use of field research, written evaluations, group presentations, exams, and performances, among others. [cite and link handbook] Evidence that the college meets the needs and learning styles of its students is also tied to enrollment numbers and program review. An important component of the bi-annual program review is the evaluation of the effectiveness of delivery modes. [cite and link] While some programs, like Real Estate, are almost entirely online, other programs like Sociology have a variety of delivery modes including face-to-face, hybrid, and online.

In addition, the College's online courses offer a wide array of instructional methods that can be used to address the multiple learning styles of the online student. Online instruction can include a variety of methods for student/instructor and student/student interaction such as collaborative activities, discussion boards, and synchronous instruction as well as various methods of content delivery such as video, audio, and written lectures. Through the Turnitin database, which is incorporated in the LMS platform, instructors can provide feedback on student work through grading rubrics, typed notes, and voice memos. These are all tied to multiple intelligences and the instructor's ability to engage students with different learning styles. The College also works to ensure that all student populations within the college are equitably served by the student support programs on campus, and various methods are used to identify populations that are disproportionately affected, such as the *Student Equity Plan*, which "[is designed to] transform services by recommending best practices, activities and interventions to better serve students on campus."

Some of the support programs that serve the diverse and changing needs of our students include:

- The **Community Education Department** has been responsible for adult not-for-credit programming, including educational and personal enrichment classes, as well as guided travel opportunities. In 2013, Community Education Department programming expanded to include: (1) after-school and enrichment programs for K-12 and (2) oversight of intensive language courses offered to international students.

- The **Saddleback College Emeritus Institute** promotes lifelong learning by offering academically rigorous, mentally stimulating, socially engaging, and physically strengthening classes for older adult students in South Orange County.
- The **Disabled Students Programs and Services (DSPS)** program provides support services, specialized instruction, and authorized educational accommodations for students with disabilities so that they can participate fully and benefit equitably in their college experience.
- **Support for the College's large veteran population is provided by the Veterans Education and Transition Services Center.** A reflection of this effort can be seen in the vast amount of counseling support, dozens of community partners, student activities, Veterans Memorial, and VETS Center. [EVI A.7]
- **EOPS** is a state-funded program, which serves students who are educationally and financially disadvantaged. Services may include academic, career, and personal counseling; book service; priority registration and assistance in transferring to four-year colleges and universities.
- **CARE:** As a supplement program of EOPS, CARE provides educational support services for EOPS-eligible students who are single heads of households receiving CalWORKS (California Work Opportunity and Responsibility to Kids).
- **CalWORKS** is a welfare program that provides cash aid and services to eligible needy California families. In addition to providing educational planning and counseling, we also help students navigate the community college system, coordinate with county welfare offices, and provide a bridge to other on-campus and off-campus services.
- The **Saddleback College Economic and Workforce Development Initiative** facilitates a variety of solutions for employment development and workforce training. The Economic and Workforce Development Initiative can help businesses and the individual student navigate through the array of options at Saddleback College and a network of resources throughout California.

Additional learning support services can be found in the Learning Resource Center (LRC) and includes face-to-face and online tutoring; the Paper Center which provides 24 hour feedback on uploaded papers; and extended hours to meet the needs of non-traditional students. All of this ensures greater success for students who utilize the tutoring center.

Moreover, numerous professional development opportunities are available to faculty and staff to assist them in addressing the diverse needs of students. These include best teaching practices for online instruction, accessibility training, and basic skills workshops, among others.

ANALYSIS AND EVALUATION

Saddleback College has carefully evaluated the needs of its diverse student population and constantly seeks to develop and reinforce programs that will aid them in their academic goals. Courses are scheduled in a variety of delivery modes, locations, term lengths, and time blocks. Student support services are also offered online and on campus, as well as during day and

evening hours. Professional development opportunities are provided to faculty and staff to enable them to assist them in addressing the diverse needs of students. As discussed in the 2010 report, the college had created the Institute for Teaching and Learning, which provided in-house training for faculty in online instruction through a series of two-unit courses. Due to low enrollment, these courses were phased out in 2012. Faculty are now directed to @one [onefortraining.org—in Evidence A.7], an outside provider that partners with the state Chancellor's Office to provide training and certification for online instructors. Furthermore, online assistance and support are offered through The Faculty Center for Student Success (formally known as CIDDE), which provides support for effective use of instructional technology both inside the classroom and in online courses. FCSS regularly provides training to faculty staff during in-service and Flex Week as well as ongoing workshops, training and support for instructional technologies throughout the year.

OBSOLETE

- II.A.8. The institution validates the effectiveness of department-wide course and/or program examinations, where used, including direct assessment of prior learning. The institution ensures that processes are in place to reduce test bias and enhance reliability.**

EVIDENCE OF MEETING THE STANDARD

The College validates the effectiveness of standardized testing when utilized in its programs. The only areas of the College where standardized testing are currently used is in the Student Success and Support Program (SSSP; formerly matriculation) and the nursing and reading programs for placement purposes only. SSSP assesses all new degree and certificate students for placement into the correct level of English, math, reading, and ESL courses.

When a new standardized test is adopted, a validation study and report will be conducted, looking specifically for test bias and student equity. Such was the case when SSSP shifted to the CTEP for student placement in 2013. A validation report of the CTEP [Evidence A.7] was published in the spring of 2014. In areas where student equity was not reached, the college disaggregated the data to assess specific target groups and discussed how to reach them. The Student Success Coordinating Committee Update Report [Evidence A.8] and the College Student Equity Plan also illustrate how specific groups who may struggle are provided extra support when preparing for the placement test, thus reducing test bias and enhancing reliability. For example, the College has just implemented the Refresh program where students can work with English and Math instructors in a 21-hour workshop environment and then re-take the placement test.

Beyond general placement, those programs that require further assessment for student placement work hard to validate their tests and ensure greater test reliability. For example, the nursing department conducts exams that directly assess prior learning for entrance to the nursing program. Students must take the Test of Essential Academic Skills (TEAS) [Evidence A.8], which covers knowledge of Reading, Mathematics, Science, and English and Language Usage. There is a minimum score (62%) overall that students must achieve in order to be eligible to apply for the nursing program. Since admission to the nursing program is awarded by multiple criteria, the TEAS test can have a significant impact on whether or not a student is allowed admission into the program. In addition, for those students who transfer from other nursing programs or who are Licensed Vocational Nurses (LVNs) and would like to become an RN, Nursing administers several nationally normed tests from Assessment Technologies Incorporated (ATI) to assess prior learning and to determine recommended placement in the program. By law, an Associate Degree nursing program that admits LVNs has to have a path that makes it possible for LVNs to complete in one year. However, the Nursing department has studied patterns of success and found that students who score low on the nationally normed ATI Medical Surgical test are not as successful as those who score higher, thus reinforcing the test's reliability. The reading program also uses a standardized exam, the Lexile Diagnostic, to accurately place students into reading courses. Recently, the department shifted to this exam

after having used the Nelson-Denny exam for many years. The decision to shift to the Lexile Diagnostic was based on the realization that students would test more accurately if they were not timed, especially as English 340 attracts a large number of English as a Second Language students and Special Services students (with a broad spectrum of learning disabilities). A timed test with the level of difficulty of the Nelson-Denny did not accurately reflect the reading comprehension abilities of those students. The Lexile Diagnostic and Vocabulary pretest are untimed tests, and the results of these assessments more accurately match the student's comprehension and vocabulary skill level.

ANALYSIS AND EVALUATION

There is an active effort throughout the college to ensure that standardized examinations, where used, are an accurate reflection of students' abilities. All tests are assessed by faculty for inter-rater reliability, content, and construct validity.

OBSOLETE

II.A.9. The institution awards course credit, degrees and certificates based on student attainment of learning outcomes. Units of credit awarded are consistent with institutional policies that reflect generally accepted norms or equivalencies in higher education. If the institution offers courses based on clock hours, it follows Federal standards for clock-to-credit-hour conversions. (ER 10)

EVIDENCE OF MEETING THE STANDARD

According to Board Policy 5600, associate degrees are awarded to a student “who has demonstrated competence in reading, written expression and mathematics, and who has satisfactorily completed at least 60 semester units of college work.” Units of credit are awarded based on the Carnegie Unit, in which 18 hours of standard lecture and 36 hours of outside work equal 1 unit of credit. The basis for awarding credit is tied to each course’s Method of Evaluation (MOE), which in turn are linked to the course’s SLOs. These outcomes can be assessed through a variety of mediums, thus tailoring the MOE to the SLO. Because the MOEs and SLOs are connected, and because SLOs are rolled up into PSLOs, the College can ensure that the achievement of stated programmatic learning outcomes is the basis for awarding degrees and certificates. In addition, degrees or certificates awarded are based on completion of requirements of course work and experiential training as published in the annual catalog.

The articulation process has been streamlined by C-ID, a course identification numbering system that was made possible by a grant through the state chancellor’s office. Through C-ID, “Individual community colleges [can] submit local course outlines that are judged by faculty evaluators against the descriptors, and each course designated as a match will have the specific C-ID supranumber appended to its local number designation. Each C-ID number identifies a specific lower-division, transferable course commonly articulated between the CCCs and UC and CSU, as well as with many of California’s independent colleges and universities.” (screenshot **Evidence A.9**) As a result, C-ID will simplify the articulation process, matriculation, and student placement.

When creating and approving new curriculum, the College follows the Federal standards for clock-to-credit hour conversion in the awarding of credit as specified by the *Program and Course Approval Handbook 6th Edition*, which was created by the Academic Affairs Division of the State Chancellor’s Office. This handbook states that “[t]he standard formula for credit hour calculations applies to the majority of courses and course types and is derived from the regulations in title 5, section 5002.5 [, which] requires colleges to define one unit of credit as a minimum of 48 total hours of student work, inclusive of all contact hours plus outside-of-class, or homework, hours.” [page 7]

Through detailed department and division webpages, counseling, and the official college catalog, the College ensures that current and prospective students receive clear and accurate information about courses and programs, including a description of degrees and certificates in terms of their purpose, content, course requirement, and expected PSLOs [pg. 52 in 2016

catalog]. All course syllabi are required to contain the course SLOs, which are assessed yearly, as described in II.A.3 above. These SLOs are designed as “a means to discover if students, are, in fact, learning what they are expected to learn in courses and programs throughout the college.”

[Evidence A.9] While the College does not award credit based on SLO *assessment*, it does award credit based on SLO *attainment* as there is a direct connection between SLOs and overall course objectives. Students are given grades based on their ability to achieve these course objectives, which are designed as a result of stated learning outcomes. This correlation between SLOs and the listed methods of evaluation reinforces each course’s intended purpose. For example, the English department assesses SLOs based on student writing, which is an important method of evaluation in all levels of composition and which is a method of evaluation on all CORs in the composition strand.

Through systematic program review, faculty illustrate how course-level SLOs are linked to both PSLOs and one or more of the Institutional SLOs (ISLOs), which are listed in II.A.4 below. ISLOs are the competencies and general education SLOs that students will attain as a result of completing a degree or transfer program at Saddleback College. The ISLOs were developed by the EPA, approved by the Academic Senate, and are published in the College Catalog and The Student Handbook and are posted on the College’s website. **[include links for all the]**

The College has rigorous curriculum review and program review processes, which apply to all courses and programs and do not differentiate significantly between face-to-face and online modalities. For example, there are no separate “competency levels” determined for online courses that vary from face-to-face courses. Similarly, the processes for establishing and evaluating courses and programs, including the determination of appropriate credit and articulation agreements, are the same for both modalities. Moreover, credit for online courses is awarded the same way as credit for face-to-face courses through the use of Carnegie Units, a standard metric used nationwide. Faculty determine credits for all courses based on their discipline expertise, and these must be the same for both face-to-face and online courses as they adhere to the same COR and students are expected to meet the same competencies, regardless of delivery mode.

ANALYSIS AND EVALUATION

There is a direct correlation between the credits, degrees, and certificates awarded by the College and the attainment of student learning outcomes, which are instrumental in the development of course objectives. Furthermore, there is a rigorous curriculum-development and approval process to ensure that students leave with credits, degrees, or certificates that reflect the generally accepted norms of higher education. Evidence of the College’s academic standards can be found in the numerous articulation agreements that the College maintains with UC, CSU, private, and out-of-State colleges and universities, and by the integration of the Federal standard for clock-to-credit conversion hours as maintained by the Carnegie Unit. These standards and criteria are applied to all modes of delivery, including both face-to-face and online classes.

- II.A.10.** The institution makes available to its students clearly stated transfer-of-credit policies in order to facilitate the mobility of students without penalty. In accepting transfer credits to fulfill degree requirements, the institution certifies that the expected learning outcomes for transferred courses are comparable to the learning outcomes of its own courses. Where patterns of student enrollment between institutions are identified, the institution develops articulation agreements as appropriate to its mission.

EVIDENCE OF MEETING THE STANDARD

Articulation agreements for the transfer of Saddleback College courses to the UC and CSU systems, as well as some private and out-of-state colleges, are updated and reviewed annually (assist.org) [Evidence A. 10] In addition, the College has articulation policies in place to ensure that students are given credit for classes taken at other institutions. These policies are developed and reviewed annually by the College's Articulation Officer (AO), the Curriculum Committee, the General Education (GE) Committee, the Academic Senate, and the Curriculum Office. Students have access to these policies through a variety of mediums, including on the College's website and through face-to-face with counselors and support staff. A detailed outline of the various transfer policies can be found in the College Catalog [pages 36-49], including articulation and transfer patterns [pages 132-139]. Policies are also made available to students through MAP, the Student Handbook, Counseling classes, and the Transfer Center. Through all of these mediums, students are provided with the information they need in order to create an academic plan. The information includes: transfer policies and planning tools, transfer patterns, Articulation agreements, the Associates Degree for Transfer (ADT), the Teacher Preparation program, and the Honors Program. In addition, students are informed of the Transfer Admission Guarantee (TAG) program, which provides guaranteed admission to six UC campuses for those California community college students who meet specific requirements. (Evidence A.10)

The College may grant credit for college coursework earned at regionally accredited institutions of higher education. Comparability of courses taken at other California public colleges and universities can be determined by the Articulation System Stimulating Inter-institutional Student Transfer (ASSIST) the online statewide database of articulation, and by the College Catalog. Generally, the Counseling Department determines equivalency of courses; specifically, the College's Articulation Officer in consultation with the appropriate discipline faculty expert, determines any questions on a course credit application. The College registrar ensures that the transcript is official and that the institution is regionally accredited.

When reviewing coursework from other institutions, the AO takes into consideration the following components when determining if courses are comparable to those offered by the College: Course Objectives, Student Learning Outcomes, and Content Area. Where it may not be readily apparent if a course from another institution is comparable, the student is asked to obtain an official course outline. If the counselor and/or the college AO cannot make a determination on comparability, the course outline is submitted to the chair of the discipline of the appropriate dean. The faculty or the dean makes the final determination on course comparability.

While the College offers many online courses, we do not offer online degrees, although in many programs over 50% of the courses can be taken online. As a result, the development, implementation and evaluation of articulation agreements for online courses are handled in the same manner as our regularly scheduled courses. [Evidence A.10—link isn't working]. Full reciprocity exists for courses completed at Irvine Valley College that have comparable courses at Saddleback College.

ANALYSIS AND EVALUATION

Saddleback College regularly reviews the articulation policies of the University of California system, the California State University (CSU) system, and of private and out-of-state colleges and universities to determine the College's articulation compliance for each institution. Often, private universities in California and out-of-state colleges present special articulation questions. In such cases, the Counseling Department and the Articulation Officer coordinate inquiries and will request information and clarification from division and departmental discipline experts as needed.

Students can access Saddleback College's articulation agreements with UC and CSU universities, and for institutions with which Saddleback has no articulation agreement, students can consult the ASSIST database. Links to the ASSIST Web site have been provided on the Transfer Center site and Saddleback College homepage. The College also provides direct counseling to students on these policies and agreements in the Transfer Center and in General Counseling.

- II.A.11.** The institution includes in all of its programs, student learning outcomes, appropriate to the program level, in communication competency, information competency, quantitative competency, analytic inquiry skills, ethical reasoning, the ability to engage diverse perspectives, and other program-specific learning outcomes.

EVIDENCE OF MEETING THE STANDARD

For the sake of clarity, Saddleback College's ISLOs are organized into four broad categories. They are as follows:

Preamble:

Saddleback College's primary mission is to foster learning and student success. Students should expect to develop knowledge, skills and abilities across four broad areas as a result of their overall experience at Saddleback College. The broad areas are defined by the Institutional Student Learning Outcomes (ISLOs) listed below:

I. Effective Communication

Students completing a degree or transfer program at Saddleback College will be able to:

- Demonstrate the ability to understand, evaluate, and analyze readings from a variety of texts and to apply that ability in academic, personal, and professional contexts.
- Demonstrate the ability to clearly express themselves and the knowledge they have attained in various forms of writing.
- Demonstrate the ability to orally communicate ideas to others in a clear, coherent, and succinct fashion when speaking in one or more of the following modes: interpersonal, in small group settings, or in public presentations.

II. Intellectual and Technical Skills

Students completing a degree or transfer program at Saddleback College will be able to:

- Demonstrate competence in fundamental computing and information technology.
- Demonstrate competence in scientific and quantitative reasoning necessary for informed judgment and decision-making.
- Conduct effective research, including the identification, evaluation, synthesis, and responsible use of sources and information.
- Analyze information and ideas independently and logically in order to arrive at reasoned, meaningful, and creative conclusions.

- Work with others to develop creative, logical, and reasoned solutions to problems.
- Develop cognitive, physical, and affective skills which will afford students the opportunity to be well-rounded individuals.

III. Community/Global Consciousness and Responsibility

Students completing a degree or transfer program at Saddleback College will be able to:

- Demonstrate knowledge of cultural diversity and awareness of multiple perspectives in the U.S. and globally.
- Demonstrate the ability to effectively communicate and interact with others in academic, personal, and professional contexts.
- Demonstrate awareness of the necessity for social responsibility and accountability of citizenship in a democratic society.
- Demonstrate an awareness of the necessity for ethical conduct in academic, personal, and professional contexts.

IV. Breadth of Subject Area Knowledge

Students completing a degree or transfer program at Saddleback College will be able to:

- Describe the scope, key principles, and defining framework of the discipline of study within the natural sciences and mathematics, including understanding of the methods of scientific inquiry.
- Describe the scope, key principles, and defining framework of the discipline of study within the arts and humanities in order to understand the rich history of human knowledge, discourse, and achievement.
- Describe the scope, key concepts, and defining framework of the discipline of study within the social and behavioral sciences in order to understand the complexities of social interactions and human experiences.

The ISLOs are published in the College Catalog and the Student Handbook and are available on the College's website.

All course-level SLOs are linked to PSLOs and to one or more of the ISLOs so that each student knows what they can expect to attain as the result of completing a degree program at the College, and the College can determine if the expectations for PSLO and ISLO attainment is being met.

The college currently approaches PSLO and ISLO assessment in three ways. The first is through the mapping of SLOs to PSLOs and ISLOs, so that the results of course SLO assessment for the various courses that meet each PSLO and ISLO can be compared and analyzed. This is done as part of the program review process. The second is through ePortfolios, where students report on both classroom and non-classroom accomplishments related to the ISLOs. The third method is through the CLA+ pilot, which may provide an external validation that students have attained the college's ISLOs. Pilots on ePortfolios and CLA+ were just completed at the end of spring 2016 and plans for their institutionalization are currently underway for the 2016-17 academic year.

While the ability to make connections between SLOs and ISLOs is recently done, assessment of ISLOs has proven more challenging, which is why the College has actively focused on improving and clarifying the assessment tools. [EVI page 21 EPA report]. Even as the assessment process is being refined, evidence that students are achieving the intended outcomes listed in the College's ISLOs is tied to student completion rates as PSLOs (and subsequently PSLOs and ISLOs) drive the curriculum. This evidence is further reinforced by program completion data—with the exception of CTE, which offers a more nuanced look at the definition of a program's success. Often, the CTE programs have more exit points than the GE or degree-specific programs. A CTE student who is already working in his/her field may take 1 or 2 classes in order to remain current or as a refresher course. As a result, a student will not complete an entire program because that student has already attained his/her academic goal, which is to find employment within a particular field. For example, certain programs, like real estate and automotive technology, do not have to be completed in order for the student to be successful within the industry. On the other hand, programs like nursing must be completed in order for the student to pursue a job within that field.

Moreover, some of the ISLOs are not attained within classes but through extra-curricular activities as well. To promote student understanding and appreciation of diverse perspectives, for example, there are numerous ASG clubs on campus and special cultural events to highlight the diverse interests and background of the student population. The various student clubs include: ACLAMO Club, which assists Chicanos and Latinos in removing educational barriers, Anime Club, which promotes interest in Japanese anime, Astronomy and Physics Club, which is geared toward the sciences, Ba'hai Club, which is tied to the Ba'hai faith, and Pride Awareness Club, which promotes love and acceptance of all people regardless of gender or sexual orientation. This is but a sampling of the numerous clubs across campus. Beyond student life,

faculty also contribute to the diverse perspectives through the invitation of speakers and organizing cultural events like a celebration for El Dia de los Muertos. Weekly screenings of Ted Talks [Evidence A.11] provide additional diverse perspectives and ideas.

ANALYSIS AND EVALUATION

The College's ISLOs include outcomes related to communication competency, information competency, quantitative competency, analytic inquiry skills, ethical reasoning, and the ability to engage diverse perspectives. The College sees all of these as essential skills for students who leave the College with an associate degree or who transfer. Tremendous effort has been made to find meaningful ways in which student learning in and out of the classroom aligns with the College's ISLOs. Through a variety of methods, the College has illustrated how these outcomes can be assessed and are indeed incorporated into a diverse array of programs and activities across the campus.

OBSOLETE

- II.A.12.** The institution requires of all of its degree programs a component of general education based on a carefully considered philosophy for both associate and baccalaureate degrees that is clearly stated in its catalog. The institution, relying on faculty expertise, determines the appropriateness of each course for inclusion in the general education curriculum, based upon student learning outcomes and competencies appropriate to the degree level. The learning outcomes include a student's preparation for and acceptance of responsible participation in civil society, skills for lifelong learning and application of learning and a broad comprehension of the development of knowledge, practice, and interpretive approaches in the arts and humanities, the sciences, mathematics, and social sciences.

EVIDENCE OF MEETING THE STANDARD

In accordance with Board Policy 5600, all associate degree programs at Saddleback College require the completion of a minimum of 18 semester units of general education, which include the natural sciences, social and behavioral sciences, humanities, language and rationality, and mathematics [EVI]. Students at the College can elect to follow one of three general education patterns – IGETC, CSU GE, or the College's general education requirements, as described in II.A.1 above. The general education patterns are described in the College Catalog. The philosophy that drives general education requirements is based on the idea that general education is not an isolated endeavor. In fact, as stated in the College Catalog, "the general education experience allows the associate degree graduate to analyze, understand, appreciate, and modify the global society in which we live. Combined with an in-depth study in a selected field of knowledge, general education will contribute to and support the pursuit of lifelong learning." [hyperlink] This general education philosophy is reflected in the broad range of courses required for the degree and in the expected Institutional Student Learning Outcomes (ISLOs).

At the time of course development review, faculty in any discipline can propose that the course be considered for general education. The General Education (GE) Committee, composed of faculty members from each of the divisions and chaired by the Curriculum Chair, also a faculty member, is responsible for determining if the course meets the criteria for general education. While at one time, the GE Committee had a handbook of criteria by which they could determine which courses to include within the G.E. program, there is no handbook currently used. As a result, the G.E. Committee plans to either adopt a handbook from another college or to rewrite the criteria so that guidelines for including courses within the G.E. program can be clearer. The Curriculum chair hopes to have guidelines in place by Fall 2016.

In conjunction with the GE Committee, the Articulation Officer (AO), a faculty member, also plays a role in determining G.E. coursework. The Articulation Officer supports faculty in their curriculum development to help ensure that coursework meets general education requirements. While faculty have the freedom to create their curriculum, the AO will verify that courses meet the criteria established by transfer institutions before forwarding to the GE

Committee for approval. Once approved by the GE Committee, courses must then be approved by the Academic Senate and the Board of Trustees, before being sent to the CSU Chancellor's Office and UC Office of the President for final approval.

Evidence that the program of general education includes student learning outcomes related to preparation for and acceptance of responsible participation in civil society, skills for lifelong learning and application of learning and a broad comprehension of the development of knowledge, practice, and interpretive approaches in the arts and humanities, the sciences, mathematics, and social sciences can be seen in the scope of the College's ISLOs, as shown in II.A.11 above, which are developed by the Educational Planning and Assessment Committee (EPA) in alignment with Lumina Foundation's Degree Qualifications Profile (DQP) and approved by the Academic Senate.

G.E. courses are offered in a variety of modalities, including both face-to-face and online. The decision of which modalities to offer G.E. courses is faculty-driven and is related to the particulars of the discipline. If a course is to be offered online, there is a separate approval process developed by the Curriculum Committee in order to ensure that students develop the listed G.E. skills. Regardless of delivery mode, the same SLOs are used and assessments for face-to-face courses.

Evidence that content and methodology of G.E. courses is determined by appropriate discipline faculty can be provided by the Curriculum Committee Bylaws [Evidence A.12], which specify that the General Education Committee will be comprised of faculty from a variety of disciplines and backgrounds. "Membership is limited to one faculty member per division selected by the division and approved by the Academic Senate." [page 5] In addition, the quality and academic rigor of G.E. courses, regardless of modality, is maintained through the curriculum-approval process.

ANALYSIS AND EVALUATION

All associate degree programs at the College require the completion of general education courses. The general education philosophy is developed locally by the GE Committee and is published in the College Catalog. Courses are eligible for inclusion in one of the three GE patterns based on review by local faculty through the GE Committee and by faculty at transfer institutions through the articulation process. The College's general education courses are mapped to one or more of the ISLOs and through regular outcomes assessment the institution determines the effectiveness of its programs.

ACTIONABLE IMPROVEMENT PLANS

The G.E. Committee is in the process of creating clearer guidelines for the inclusion of new curriculum within the G.E. program. These guidelines will provide clearer evidence that the institution has determined standards for the skills in general education. The guidelines will also help the G.E. committee determine if proposed courses will fit into the general education

|

requirements. In addition, the committee is working on integrating the assessment of SLOs as a component to determining course approval to the G.E. program. NEED SPECIFIC TIMELINE.

OBSOLETE

- II.A.13. All degree programs include a focused study in at least one area of inquiry or in an established interdisciplinary core. The identification of specialized courses in an area of inquiry or interdisciplinary core is based upon student learning outcomes and competencies, and include mastery, at the appropriate degree level, of key theories and practices within the field of study.**

EVIDENCE OF MEETING THE STANDARD

In addition to the general education requirements, Board Policy 5600 stipulates that all associate degree programs at the college must require the completion of a minimum of 18 units in a major or area of emphasis for a total minimum of 60 units [BP 5600; [embed hyperlink to transfer page](#)]. The core area of inquiry is outlined in the Program Student Learning Outcomes (PSLOs), which are established by all programs and are published in the College Catalog [page 50]. The PSLOs, developed by the discipline experts within each department, along with the related course objectives and SLOs, demonstrate the level of mastery of key concepts, theories, and practices that students will attain by completing a degree within that discipline.

Verification that students have achieved mastery of key theories and practices within the field of study is done primarily through the successful completion of all required courses. Courses required within a program are devised so that each of the PSLOs is achieved upon completion of a degree or certificate. Faculty within a program regularly evaluate the success of their programs through the annual assessment of course SLOs and through various methods of direct PSLO assessment including discipline-specific exams, signature assignments, and ePortfolios, which are designed to highlight student achievement as it relates to that student's educational goals. Furthermore, in the program review, faculty are asked to discuss how SLO assessment leads to overall PSLO attainment.

ANALYSIS AND EVALUATION

All degree programs at the College focus on one or more disciplines or areas of study. Curriculum is developed with objectives and SLOs that demonstrate the key concepts, theories, and practices that students should master in a course. The outcomes of courses are then mapped to the PSLOs that students within a particular field of study should master. The tie between curriculum development, SLOs, and PSLOs illustrates that SLOs are accurately reflective of higher learning, appropriate to the course level, and include mastery of key theories and practices within the field of study. All of the courses within transferable degree programs are articulated with the UC and/or CSU system so that the objectives and SLOs are in alignment with the norms of the discipline.

II.A.14. Graduates completing career-technical certificates and degrees demonstrate technical and professional competencies that meet employment standards and other applicable standards and preparation for external licensure and certification.

EVIDENCE OF MEETING THE STANDARD

Saddleback College has one of the most diverse offerings of Career Technical Education (CTE) programs in the region. In the 2015-2016 academic year, the college offered 100 awards in 45 departments at the College. [CTE web page] Information regarding degrees and certificates is made available to students in the College Catalog and on the College website, as well as through a variety of marketing measures [EVI].

The ability to prepare students for external licensure, certification, and employment standards is embedded in the curriculum approval process, SLO assessment, and program review. As discussed in II.A.1 above, all CTE programs must go through local, regional, and state approval. The regional approval is done through the Los Angeles/Orange County Regional Consortium (LA/OCRC), which scrutinizes each new or substantially-revised program to ensure that there are demonstrated employment opportunities, that the program meets the needs of local business and industry, that it is not in competition with other programs in the region, and that the courses adhere to employment and/or licensure standards.

Programs are constantly being proposed and revised in order to better align with the ever-changing employment opportunities in the area. As part of the two-year program review process, labor market data is monitored and analyzed to see if programs are still relevant. In addition, all CTE programs engage in outreach to the community to make sure the programs meet employment needs. This includes the formation of advisory committees, the participation in regional economic workforce and development, and the engagement with regional business organizations such as the CTE consortium. An important Title 5 requirement for all CTE program is this ongoing engagement with the advisory committees. These committees, which are composed of local employers, community members, faculty, staff, and students, provide valuable input related to program content and relevance to industry standards and/or needs by making recommendations tied to curriculum, equipment, and program outcomes. Faculty utilize this input and also back it up with labor market information and other internal student success data to design educational programs with industry standards. While each advisory group meets at least once a year, most choose to meet more often. The College also ensures and verifies the currency and relevancy of its programs through a regular review of all CTE courses during the Technical Review process every two years.

Many CTE programs that require licensure include curriculum in their program that helps students prepare for the licensure exam. For example, the curriculum in the Nursing program helps prepare students for the national CPA exam; the Cosmetology curriculum includes 1600 hours, which meets the required hours for student to qualify for their state licensure; and the Alcohol and Drug Studies Certificate program prepares students for state-required certification so they are able to practice as a Certified Addiction Treatment Counselor [Evidence A.14]

SLOs for CTE courses are designed and implemented to meet employment standards. Competency levels and measurable SLOs are determined through exams and pass rates. As SLOs and exams are faculty-driven, faculty play a heavy role in evaluating if students have mastered the course content.

ANALYSIS AND EVALUATION

All of the CTE programs at Saddleback College are development and revised in alignment with industry standards so that students are well-prepared for employment and/or certification and licensure by external agencies. This is evidenced in particular by the exam pass rates and employment rates of students who complete these programs [EVI]. Programs engage in continuous evaluation to ensure that they continue to meet local business and industry needs, through advisory committees, SLO assessment, technical review of curriculum, and program review.

<http://scorecard.cccco.edu/scorecard.aspx>

<http://datamart.cccco.edu/Outcomes/Default.aspx>

OBSOLETE

- II.A.15. When programs are eliminated or program requirements are significantly changed, the institution makes appropriate arrangements so that enrolled students may complete their education in a timely manner with a minimum of disruption.**

EVIDENCE OF MEETING THE STANDARD

The College has a process for evaluating the viability of a program called the *Program Vitality Inquiry Policy and Process*, in accordance with Title 5, Section 51022, and Education Code, Section 78016. This process can be initiated by any faculty member or administrator and the possible outcomes include program continuance, program revitalization, or program discontinuance. While few programs have been slated for elimination, there are provisions to allow students to complete such programs. The policy states that once a program has been slated for discontinuance, "a plan and timeline for phasing out the program will be completed. The plan shall include procedures to allow currently enrolled students to complete their programs of study in accordance with the rights of students as stipulated in the college catalog." These rights are known as "catalog rights." **[Evidence A.15]**

As described in the College Catalog, students may establish "catalog rights" based on the catalog that was in effect when they first started to take classes at Saddleback College as long as they maintained continuous enrollment or were on a documented military, medical, or educational leave. These rights protect students from being held to additional requirements that may be added to a later catalog. It also allows them to complete programs that may have been eliminated during the time of their enrollment at the College. Beginning in fall 2009, the number of years allowed for students to complete a certificate or degree program and maintain catalog rights from when they first took class at Saddleback College is six years. **[page 30 in catalog]** Students who were enrolled prior to fall 2009 are granted catalog rights for longer than six years as long as they have maintained continuous enrollment during the entire period **[page 30 in the catalog]**.

Catalog rights apply only to Saddleback College graduation and program requirements. If other institutions change their requirements for entrance, graduation, or satisfaction of general education patterns, it may be necessary for the student to meet the new requirements upon transfer even if continuous enrollment was maintained. Catalog rights must be requested by students on their *Petition to Graduate* [F-1].

ANALYSIS AND EVALUATION

The College has procedures and policies in place to ensure that students have the opportunity to complete their education in a timely manner following the elimination of a program. Within recent years, no programs have been discontinued.

Formatted: No bullets or numbering

- II.A.16. The institution regularly evaluates and improves the quality and currency of all instructional programs offered in the name of the institution, including collegiate, pre-collegiate, career-technical, and continuing and community education courses and programs regardless of delivery mode or location. The institution systematically strives to improve programs and courses to enhance learning outcomes and achievement of students.**

EVIDENCE OF MEETING THE STANDARD

Through systematic outcomes assessment, program review, and curricular review, the College regularly evaluates and improves the quality and currency of all instructional programs, including collegiate, pre-collegiate, career-technical, and continuing education, regardless of delivery mode or location. SLO assessment, described in I.B.2 and II.A.3 above, is conducted annually in every course offered, both credit and non-credit, to ensure that course objectives are being met, and the results are evaluated and discussed within programs. Program review, which is conducted by all programs every two years as described in I.B.5 above, assesses the relevance, appropriateness, currency, and predicted future needs of all instructional offerings at the College as well as their overall effectiveness. It includes a comprehensive analysis of SLO assessment data, student success indicators, and other measures of effectiveness, and results in actionable objectives for the improvement of programs. Formal curricular review of all approved college courses is required at least once every five years, as described in II.A.1 above, to ensure that official course outlines retain their relevance and articulation with transfer institutions, although curricular changes of courses and programs often occur prior to their scheduled review based on the results of program review. This applies to collegiate, pre-collegiate, and EI courses, all of which are approved and evaluated through the same curricular process. Although there are now a few certificate programs that can be completed fully online (such as the HIT certificate and various child development certificates), most programs include a variety of delivery modes and evaluate the effectiveness of each through program review, during which student success indicators are assessed with respect to the modality in which they are taught.

Evidence that the criteria for the College's program review process include relevancy, appropriateness, achievement of student learning outcomes, currency, and planning for the future can be found on page 3 of the *Program Review Handbook* [Evidence A.16]. This page outlines the objectives of program review as follows:

1. State program objectives and align future objectives with the college's mission and vision.
2. Collect and analyze data on key performance indicators, SLOs, program activities, and accomplishments.
3. Document and discuss the effectiveness of programs.
4. Develop recommendations and strategies concerning future program directions and needs (e.g., budget, staffing, and resources).

5. Provide an opportunity for programs to assess their relevance and position within the division and the college and with all other stakeholders.

These objectives enable faculty to reflect on the multiple ways in which their program and its curriculum tie to the College's mission and goals. The results of program review are also directly tied to institutional planning and the allocation of resources. As part of the program review process, objectives and action steps for a two-year period are input into *TracDAT* and linked to annual resource allocation requests and are included in the decision-making process. In subsequent reviews, programs reflect on the achievement of their objectives and make recommendations for continued improvement through the creation of new or refined objectives.

All educational programs go through this process with the exception of Community Education. Classes offered through our Community Education program are not State-approved and therefore do not go through the same curricular process; they are approved only locally by the Board of Trustees, following review by the Academic Senate. Community Education classes are regularly evaluated by the division dean for quality and relevance. Evaluations of their offerings are generally done through Student surveys and the analysis of participation rates. Feedback from these surveys is used by the presented to improve their class. Success and viability of a class is most often determined by the number of participants. Classes may be canceled due to low enrollment, and when this happens the courses, a program is deemed not to meet the needs of the community and is no longer offered. For example, the case of College For Kids and After-School Experience programs, they are able to survey large groups of participants. Their last survey took place in August of 2016. It was carried out through Constant Contact, their online marketing and communication service, and sent to the parent/guardian of every College For Kids and After-School Experience participant that summer. The survey was comprised of 10 questions and included opportunities for feedback along with suggestions for future program options.

ANALYSIS AND EVALUATION

The College strives to continuously and systematically improve its courses and programs to enhance student learning outcomes and improve student success. All courses are regularly evaluated through annual Student assessment and through the five-year curricular review process. Programs are evaluated through a comprehensive process of program review undertaken every two years. Moving from a five-year to a two-year program review cycle in 2011 and including the creation of program-specific objectives that link to the College's strategic planning efforts have had an increased positive impact on closing the loop between program assessment, program dialogue and reflection, and the projecting of future program needs. In combination, the College's systematic review processes are used to assess course and program relevance, appropriateness, currency, and effectiveness and to identify future needs, and to ensure that the success of students is at the forefront of all planning and decision-making. The review

processes determine the needs for curriculum, services, staffing, facilities, and equipment, and are linked to budgeting and resource allocation decision-making.

In 2015, the College created a new administrative position: Assistant Vice President of Institutional Effectiveness. The primary purpose for this position was to refocus and refine the workload handled by existing vice presidents and to address the areas where the college wished to improve. The assistant vice president was hired in fall 2015 and began his role in spring 2016. In the creation of this position, the College illustrated that it recognized the need to create an administrative position to oversee several areas that are tied specifically to curriculum, research, online education, student success, and the various components of Institutional Effectiveness, including the writing of the Institutional Effectiveness report [Evidence A.16]. While this upcoming report will address a wide range of areas, it will also include goals that are related to Program Review and the Program Review process. In particular, these goals are to analyze each department's ability to meet Program Review deadlines and to write successful program reviews that indicate they have met Program Review Standards. Embedded in this is the assessment of each department's ability to meet SLO, PSLO, and ISLO goals and deadlines, focusing specifically on assessment and use of resources.

The College's systematic review of its curriculum and instructional programs, as well as the review of all student support and administrative units on campus, is serving students well, and improvements have been made across the campus as a result of these ongoing processes.

II.B.1: *The institution supports student learning and achievement by providing library, and other learning support services to students and to personnel responsible for student learning and support. These services are sufficient in quantity, currency, depth, and variety to support educational programs, regardless of location or means of delivery, including distance education and correspondence education. Learning support services include, but are not limited to, library collections, tutoring, learning centers, computer laboratories, learning technology, and ongoing instruction for users of library and other learning support services.*

EVIDENCE OF MEETING THE STANDARD

The College supports student learning and achievement by providing extensive learning support services for students. The recently renovated, state-of-the-art Library and Learning Resource Center (LRC) houses many of these services. The LRC includes the Library and Computer Lab on the third floor; the Academic Reading Center, computer labs, the Language Lab, the LRC Tutoring Center, and the Writing Center on the second floor; and the Television Studio and classrooms on the first floor.

Library

The mission of the Saddleback College Library is as follows:

The Library supports the success of our diverse student population by teaching information competency skills and offering guidance and encouragement to students as they pursue the achievement of student learning outcomes. The Library provides all users with access to a learning environment and information resources designed to support the achievement of the academic and personal goals.

To fulfill this mission, the Library provides all users with a safe and welcoming environment conducive to learning and collaboration. Librarians actively participate on College and District committees, such as Academic Senate, Curriculum, EPA, Online Education, and Student Success, where student support needs are identified and discussed. In support of the College's mission, the Library offers a diverse collection of information resources and facilitates access to them by providing multiple access points that support the needs of both traditional and online students. Librarians teach students, faculty, staff, and administrators how to find, evaluate, and use information ethically in their academic, professional, and personal lives.

The Library is part of the Division of Online Education and Learning Resources (OE & LR). The Library faculty and staff work under the supervision of the dean of online education and learning resources. In order to serve students, the Library currently has six full-time faculty librarians, three part-time faculty librarians, five full-time staff members, and one part-time staff member. During fall and spring semesters, the Library is open Monday through Thursday, 8:00 a.m. to 8:00 p.m. and Fridays, 8:00 a.m. to 2:00 p.m. for a total of 54 hours per week. Saturday hours vary semester to semester depending on funding. All students, including those enrolled in online courses, have equal access to Library resources. Students who visit the Library virtually are supported through digital resources such as research databases, instructional websites, demonstrational online videos, information literacy workshops, Ask a Librarian, and telephone/chat reference services.

In addition to the Library collection discussed below, the Library provides students open study space with large tables and chairs as well as individual reading areas. Students can also reserve any of the seven group study rooms, which provide them with an area for collaborative work. These study rooms are equipped with tables, chairs, and whiteboard walls that students can write on with erasable markers. In addition to offering a variety of places for study, the Library has become, since its reopening, a popular space for students, staff, and faculty to gather.

Library Collections and Services

Book and eBooks

The Library's collection of books and eBooks is sufficient in quantity, currency, depth, and variety to support the College's educational programs, regardless of means of delivery. Librarians stay abreast of collection needs in various ways, including reading program reviews and by reviewing new course proposals or revisions as they come through the curriculum process.

The Library's collection includes 36,000 print books, 87,000 eBooks, other media including DVDs and CDs, and print/online periodicals. In addition, students can easily request materials outside of the Library's collection via Interlibrary Loan, which enhances access to library materials not available at the Saddleback or Irvine Valley College libraries.

Audiovisual Materials

Informed primarily by faculty requests, the Library continues to acquire audiovisual materials. Per ADA Sec. 508, all audiovisual materials acquired by the Library must be closed captioned titles. The Library has discarded most VHS videos and purchased replacement DVDs whenever possible. In fall 2015, the Library received a budget augmentation to add Films on Demand, which maintains a database of over 22,000 streaming videos that are closed captioned and available to students, faculty, and staff both on and off campus.

Database Collection and Database Usage

Regardless of location, students, faculty, and staff can access the Library's online database collection at any time; authentication is provided by EZproxy. The library has increased its online collection from 46 databases in 2010 to 118 in 2015-2016. The Library budget for information resources (print and online) has remained stable. The Library's annual budget of approximately \$150,000 provides most of the funding for the online databases. In addition, the Library's EBSCO Academic Search Premier suite is paid for by the Community College League.

The Library collects usage statistics for all of the databases. Annually, this data is used to make renewal decisions. For the 2015-2016 academic year there were a total of XXX,XXX searches conducted in all of the Library databases. There was a total of 158,078 searches conducted in the statewide Academic Search Premier suite.

Reference Services

The reference librarian on duty provides reference assistance via chat, email, phone, and in person during the hours the Library is open. By submitting the request form prominently displayed on the Library website, students can request an individual, one-on-one consultation

for in-depth research assistance with a librarian. The librarians promote this consultation service in Library credit classes, workshops, and all bibliographic instruction sessions.

Library Website

The Library website provides information regarding all services, access to information resources, research tools, EasyBib (citation management software), online study room reservations, online Library workshop registration, and much more. Through the chat reference service, the College's librarians can remotely serve the community and the College's students without having to be on campus. This service is a particularly valuable service for students taking online courses.

Through Google Analytics, the Library collects data on the number of Library webpage views. Between August 17, 2015 and May 23, 2016, the Library webpage was visited 28,310 times, 341 chat reference questions were answered, there were 1913 study room bookings and 255 students signed up for at least one Library workshop using WCONLINE, an online scheduling software piloted in 2015-2016.

Periodical Collection

Over several years, the College's librarians have gradually reduced the print periodical collection in favor of the full-text, online format. Consistent with national academic library trends, the print periodical collection has diminished in size and demand as access to full-text electronic resources has increased rapidly. At the time of the College's 2010 self-study, the Library had 130 print periodical subscriptions; today it has only 70. The librarians conduct an annual review of the print periodical collection usage to make decisions about print subscriptions and renewals.

WorldShare (Library Catalogs)

The Library has a discovery service through the WorldShare integrated library system (WMS). Students can locate books, DVDs, and articles from a single search platform by using the Library WMS meta-search platform (including the Library catalog) that uses its knowledge base to provide links to relevant materials in several of the Library databases. Although WMS is a significant upgrade from the past integrated library system, Discovery Services continues to have some limitations. As a result, librarians encourage students to search individual databases directly as those search results will return more relevant articles for student research assignments.

Reserve Collection

The Library maintains a reserve collection of over 950 textbooks and other course materials all searchable through WMS. The Library makes every effort to provide as many textbooks as possible, though emphasis remains on the most heavily used textbooks. For several years, the Library has partnered with the College's bookstore, which provides a \$10,000 annual grant to purchase textbooks. Additionally, the Library encourages departments and individual instructors to place desk copies of textbooks in the reserve collection for student use. Accounting for 79 percent of overall circulation in 2015-2016, the Library's reserve collection is by far the most heavily utilized portion of the Library collection.

Library Access for Online Students

All students, including those enrolled in online courses, have equal access to Library resources. Students who visit the Library virtually are supported through digital resources such as the research databases, instructional websites, demonstrational online videos, information literacy workshops, Ask a Librarian, and telephone/chat reference services. Both of the Library's credit courses, Library 100 and Library 2, are taught exclusively online. In addition, the Library has added online versions of some information competency workshops. Both of these examples highlight the Library's responsiveness to student needs by making instruction available 24/7. Standard II.B.3 discusses these courses and workshops in greater detail.

LRC Tutoring Center Services

The LRC Tutoring Center shares the Learning Resource Center (LRC) building with the Library, and is open 8:00 a.m. to 8:00 p.m. Monday through Thursday, 8:00 a.m. to 2:00 p.m. on Friday, and 10:00 a.m. to 3:00 p.m. on Saturdays during fall and spring, for a total of 54 hours. During the summer, the Tutoring Center is open 8:00 a.m. to 7:00 p.m. Monday through Thursday and 9:00 a.m. to 2:00 p.m. on Friday, for a total of 45 hours. Current staffing includes the director of learning assistance (who reports to the dean of OE & LR), 106 tutors, and three part-time and one full-time staff member. Faculty are also present in the Center for every hour that the LRC Tutoring Center is open. These faculty oversee the tutors, provide tutor training, and assist students. Currently, 10 part-time faculty support the Tutoring Center and its expanding services.

All tutoring services are free to students at the College. To use the tutoring services available, students enroll in Fundamentals of Tutoring (TU 300). TU 300 is a noncredit course that is free for all currently enrolled students and can be added at any time during the semester. The Tutoring Center provides students with help in English, ESL, humanities, foreign languages, science and math, as well as many other subjects. Students can schedule 30-minute appointments to work with a tutor in any of these areas. One-hour appointments are available for students enrolled in a foreign language class, DSPS students, veterans, or at the discretion of the tutor. Appointments can be made at the front counter of the Tutoring Center or online. Drop-in tutoring, for which no appointment is needed, is available for all areas of math and most sciences.

The LRC Tutoring Center has expanded support for DSPS students by ensuring that counselor-referred students can secure appointments that are an hour in length for any discipline. A DSPS counselor also spends eight hours a week in the center to assist both students and the tutors. In addition, LRC tutoring is offered in the Veterans Education and Transitions Services (VETS) Center Monday through Thursday from 12:00 p.m. to 3:00 p.m. These tutors are trained specifically to work with the veteran student population through the VET NET Ally Program.

Online Tutoring

Starting in fall 2014, tutoring options expanded to include online as well as onsite tutoring.

Link-Systems International provides the online tutoring software WorldWideWhiteboard, which provides one-on-one tutoring online. Currently, online tutoring is available for students taking English and math courses at the College. In spring 2015, the Tutoring Center started providing online assistance to students in English courses through the Paper Center. Through this service, students can upload their essays and receive feedback from a tutor within 24 to 48 hours. On average, the Paper Center receives approximately 250 submissions per semester, and is expanding this service to support students who need assistance with their essays and writing related assignments in additional disciplines. The Tutoring Center also serves as a pilot college for the tutoring platform of the Online Education Initiative (OED) and is collaborating with Irvine Valley College to select a more effective online tutoring platform for the District.

Embedded Tutors and Supplemental Instruction

The Tutoring Center also provides embedded tutors for a variety of courses including English, science, math, and ESL classes. In an effort to improve student success rates, embedded tutors promote collaborative learning among faculty, peer tutors, and students. Additionally, students in math classes can receive tutoring through the BSI Math Tutoring Center located in LRC 208. With support from the director of learning assistance, a full-time math professor Deanna Valdez coordinates the hiring, training, and evaluation of BSI math tutors.

In spring 2015, the College implemented the Refresh Program. This program—which is coordinated by LRC tutoring, matriculation, and the math and English departments—provides students who have matriculated into basic skills math courses (MATH 251, 351) and basic skills English and reading courses (ENG 340, 300 and 200) the opportunity to attend a multiday workshop. These workshops refresh students' skills, build their confidence, and expose them to test taking best practices. On the final day of the workshop, students who successfully meet the requirements of the workshop have the opportunity to re-matriculate. The success of this program is evidenced by fact that of those students who retested, 56 percent placed into higher-level English course, 58 percent placed into a higher-level reading course, and 48 percent placed into a higher-level math course. Further analysis is needed to determine the long-term success rates of these students in their coursework.

Program Assisting Student-Athlete Success

LRC Tutoring also works collaboratively with the athletic department to support athletes through the PASS program (Program Assisting Student-Athlete Success). The PASS program provides coaches with weekly updates regarding student athlete attendance and use of tutoring services, requires athletes to complete two grade checks throughout the semester, and supports the overall academic success of student athletes. There are six tutors reserved specifically for players on both an appointment and drop-in basis. In addition, athletic counselors provide drop-in counseling in the LRC Tutoring Center four days a week to help players reach or maintain their eligibility. Due to this program, in spring 2015 all nine athletic programs had team GPAs of 3.0 or higher for the first time in the school's history. During the 2015-2016 academic year, sixteen out of nineteen teams obtained team GPAs of 3.0 or above.

AVID

The College also has a partnership with AVID for Higher Education which encourages and supports adoption of the Socratic tutoring process. All of the College's tutors are required to attend at least four professional development trainings, totaling approximately ten hours of professional development per semester. Six of the ten hours are dedicated to introducing and mastering Socratic tutoring. Socratic tutoring encourages the formation of interactive study groups to create responsible and independent students. In addition, Socratic tutoring encourages tutors to engage in what is referred to as 80/20 tutoring. During a Socratic tutoring session, the student is required to take an active role by asking questions, solving problems, and modeling behavior 80 percent of the time. Meanwhile, the tutor uses strategic questions to guide the student the remaining 20 percent of the time. This model ensures that students understand their vital role in the learning process and encourages them to take the lead. After implementing the Socratic tutoring process, Saddleback tutors have been featured in AVID training videos which will be shared across the county. Additionally, AVID has selected the Tutoring Center to receive their **National Tutoring Center of the Year award**, which will be presented at AVID's national conference in July 2016.

Directed Learning Activities (DLA)

In spring 2016, the LRC Tutoring Center, in coordination with the English Department, began developing Directed Learning Activities (DLA). A DLA is an exercise designed by faculty from a specific department. Students complete each DLA with the support of a tutor in the Tutoring Center. DLAs assist students in developing essential skills and strategies needed to succeed in their courses. For maximal benefit, DLAs should be integrated into the curriculum of the host course, so instructors can connect the information and skills from the DLA to class discussion, tests, quizzes, projects, and other in-class activities. Most DLAs take approximately an hour to complete and give students the opportunity for independent study with immediate feedback from tutors. In addition to the English Department, a summer work group was created that consists of faculty from English, Math, Library, Reading, and the Social and Behavioral Sciences Division. These faculty members will work with their departments over the summer and fall to develop over 60 DLAs that will support and remediate essential skills for students in developmental courses.

Computer Labs and Learning Technology

The LRC building has two open computer labs: the LRC Computer Lab (second floor) and the Library Computer Lab (third floor). Both labs are equipped with a total of 90 thin-client computers as well as copy machines and printers. Scanning capabilities are planned to be added to the printers during 2016-2017. All campus computer labs, and the software made available to students and faculty, are outlined in detail in Standard III.C.1.

The Student Technical Support Desk staff, located on the second and third floors of the LRC, answer computer-related questions and help students to reset passwords, use software and Blackboard; this support is available in person, by phone, chat and via email. The Student Technical Support Desks are conveniently located next to the computer laboratories on the second and third floors of the LRC.

Academic Reading Center (second floor of the LRC): The Academic Reading Center offers ENG 332 and 333, which are open-entry/open-exit courses that students may register for and complete anytime throughout the semester. The Academic Reading Center is used in the co-requisite reading programs. Instructors, instructional assistants, and tutors work with students to improve their skills in reading comprehension and vocabulary acquisition, essay and textbook reading, and study skills. The Academic Reading Center has 112 computers available to students.

Faculty Center for Student Success (BGS 249): The Faculty Center for Student Success (FCSS) provides all professional development on campus for faculty. The FCSS provides faculty workshops and training that promote excellence in teaching to ensure the highest level of instruction for on-campus, blended, flipped, or completely online classes. The FCSS also offers Professional Development Week activities annually. The FCSS has 32 computers, and two sound booths that faculty can use to create and edit instructional videos.

Language Lab (second floor of the LRC): The Language Laboratory provides instructional resources and activities to support and enhance language learning for students studying Arabic, Chinese, ESL, French, German, Hebrew, Italian, Japanese, Korean, Persian, Portuguese, and Spanish. Students enroll in a self-paced lab class that develops, expands, and reinforces multiple second-language skills. The Language Lab has 10 computers available for students.

Library Instruction Classroom (third floor of the LRC): The instruction classroom is equipped with 30 laptops, one instructor station, an overhead projector, and a scanner.

Writing Center (second floor of the LRC): The Writing Center offers two classes, ENG 301 and ENG 310. There, students receive additional support in learning about writing concepts and practice writing. The Writing Center has 55 computers.

In addition, the College has a number of dedicated computer labs associated with particular programs, for example Automotive Tech, Culinary Arts, Digital, Graphics, and Rapid Prototyping labs. A complete list of these labs is provided in Standard III.C.1.

Ongoing Instruction for Users of the Library and Other Learning Support Services

The Library offers numerous programs and services for students and faculty, including librarian-led information competency workshops. Instruction sessions are offered at the request of discipline faculty. In addition, librarians also teach two for-credit classes. (II.B.3)

Support Services for Faculty

A librarian staffs the reference desk during regular hours of operation and provides research assistance to faculty in-person, via email, chat, or telephone. Instructors can schedule an orientation for their students during class time with a librarian in the Library's computer classroom. Faculty can request an orientation in-person or via telephone or email. Also, instructors can place textbooks and other course materials on reserve. While most instructors provide their own copies of textbooks for the Reserve Collection, they can also request to place Library materials on reserve for their courses. The librarians make an effort to offer Library-related professional development opportunities for faculty every academic

year. Librarians facilitate workshops that market Library services to faculty, such as new databases and other electronic resources.

ANALYSIS AND EVALUATION

The College supports student learning and achievement by providing tutoring, learning support services, and personnel responsible for student learning and support. These services are sufficient in quantity, currency, depth, and variety to support the College's educational programs, regardless of location or means of delivery, including online education. Learning support services include, but are not limited to, Library collections, tutoring, learning centers, computer laboratories, learning technology, and ongoing instruction for users of the Library.

OBSOLETE

II.B.2: *Relying on appropriate expertise of faculty, including librarians, and other learning support services professionals, the institution selects and maintains educational equipment and materials to support student learning and enhance the achievement of the mission.*

EVIDENCE OF MEETING THE STANDARD

At Saddleback College, the selection and maintenance of educational equipment and materials to support student learning and enhance the achievement of the College's mission relies on the expertise of librarians, faculty, and learning support services professionals. The College provides formal and informal processes for faculty and learning support services professionals, as well as others within the College community, to offer input regarding the selection of instructional equipment and materials.

The acquisition of materials for the Library is driven by the Library's *Collection Development Policy*, which is periodically updated, most recently in April 2015. Collection development, including the identification, purchasing, processing, and delivery of educational resources, is a primary function of the Library. Library faculty select and maintain traditional, electronic, and web-based learning and information resources. The Library faculty assess the effectiveness of the collection development processes through the biennial Administrative Unit Review (AUR).

Librarians actively solicit recommendations from faculty and learning support service professionals. Library faculty also consider the needs of students and community members when making purchasing decisions. Every semester, the Library sends an email message to faculty requesting their subject expertise and recommendations for Library materials acquisitions. In addition, the Library regularly receives requests for new titles through email, telephone, and in person. Librarians also meet with individual faculty members to go over the information covered in their courses, and when gaps in resources are found, the librarians order materials. Moreover, each librarian serves as a liaison to several more academic divisions and is responsible for maintaining the print and eBook collection in those subject areas. To select new materials and review existing collections, librarians use professional selection tools, such as *Library Journal*, *American Libraries*, and *Choice*, along with publishers' catalogs, online resources including GOBI (Global Online Bibliographic Information), and instructor bibliographies, as well as faculty recommendations.

The Library assesses student learning needs through an annual student survey delivered via the Library's webpage. The analysis of survey responses further assists the Library faculty in their acquisition of materials and equipment. Data analysis from database and catalog use offers additional insight into student use of the Library. Gift materials from faculty, staff, and the community are also welcome and added when appropriate to support the College's curriculum.

Librarians strive to keep the collection current and relevant by staying abreast of newly published titles of interest to the community and by making purchases as the budget allows. The librarians also participate actively on several College committees that inform collection development.

One full-time librarian is a member of the Curriculum Committee and helps provide those instructors creating new courses guidance about the integration of information competency. That

librarian also reviews all new and revised courses and programs. If there are any gaps in the Library's collection, the librarian consults with the faculty member proposing the course and additional resources are purchased to support the course's student learning outcomes.

Another full-time librarian serves on the Online Education Committee to both ensure that the Library's online materials meet the needs of students and faculty engaged in online education courses and to improve access to those materials.

The librarians periodically review their collection areas and cull worn, outdated or superseded materials. They refer to usage statistics from the Library's WorldShare integrated library system. Following the Library's *Collection Development Policy*, instructional faculty may be consulted in the identification and removal of outdated materials.

In addition, the Library reviews its electronic resources collection each year. The librarians assess all of the databases to which the Library currently subscribes, the number of times each database was accessed throughout the year, and the cost-effectiveness of each database. Furthermore, the Library evaluates journal databases under consideration for purchase against the options already offered by the current collection.

The Tutoring Center and other learning support services areas select additional materials based on the expertise of faculty and staff responsible for the day-to-day operation of those services. Outcomes assessment data is also used to highlight areas of need.

Selection of equipment and software for the Library and learning support areas undergoes a similar process except when the cost is greater than the Library's budget allocation. In these instances, the request would be subject to the College's resource allocation process. If the cost for a particular item is considered too large for College funding, alternate funding is sought, such as through the Basic Aid funds Allocation Process described in I.B.7 and I.B.9 above. For example, in 2012 the Irvine Valley College and Saddleback College libraries used the Basic Aid Funds Allocation Process to request the acquisition of a new integrated library management system, WorldShare, which was purchased and implemented in 2014.

The College Technology Services department handles selection and maintenance of technology-related equipment across campus. As outlined in the *Saddleback College Technology Plan 2015-2020*, Technology Services follows College-defined standards for the scheduling of equipment replacement and maintenance. However, if the need arises, there is flexibility for the purchasing of equipment outside of these guidelines. The College Technology Committee reviews the standards, selection, and maintenance of technology-related equipment. The College uses a districtwide support portal and help desk ticket management system to request software and hardware support. The portal creates an efficient workflow for staff requesting support from College and District technology services.

The College relies on the staff expertise of Technology Services to provide the copying equipment and services used by students, faculty, and staff. Maintenance of this equipment is coordinated by the Technology Services department and arranged through an equipment lease or service contract.

Each of the College's divisions is given a budget for the purchase of educational materials and equipment for its area. The College also has competitive equipment and technology processes that allow for the request of items that exceed a division's budget. Discipline experts make these requests through program or administrative unit review, and funds are allocated based on alignment with the College's mission and strategic planning goals, as discussed in I.A.3.

ANALYSIS AND EVALUATION

The College has established processes for the selection and maintenance of educational equipment and materials that support student learning and assist in the achievement of the mission. Through direct solicitation, surveys, committee participation, and regular assessments, the Library and the LRC Tutoring Center ensure that the expertise of faculty and learning support services professionals is central to the collection development processes. Annual division funding and the resource allocation request process ensure that educational materials needed in instructional areas, as determined by discipline experts, are distributed as needed to ensure student learning and success.

OBSCOLENT

II.B.3 *The institution evaluates library and other learning support services to assure their adequacy in meeting identified student needs. Evaluation of these services includes evidence that they contribute to the attainment of student learning outcomes. The institution uses the results of these evaluations as the basis for improvement.*

EVIDENCE OF MEETING THE STANDARD

The Library and all other learning support services on campus regularly evaluate and assess their services and programs to ensure they are meeting the needs of the College and its students. The results of these evaluations inform and improve planning and decision-making in areas related to use, access, and learning outcomes.

The Library participates in the College's administrative review process, which is used for planning and resource allocation. This biennial process allows for the creation and tracking of operational objectives and action steps, as well as the assessment of program-level student learning and administrative unit outcomes. The Library is scheduled to complete its next comprehensive AUR in fall 2016.

The Library also gathers data through surveys, statistics, Google Analytics, and database usage. Statistics collected at the circulation and reference desks are used to track and evaluate the demand for services provided by Library staff. These statistics inform decisions related to staffing, scheduling, and collection development. Statistical reports are also generated from the integrated library system and electronic databases. These reports are used to evaluate usage of Library materials.

The Library administers at least one survey annually to evaluate and help improve services. The latest student satisfaction survey was conducted in spring 2016. 82.93 percent of responding students reported they strongly agreed or agreed with the statement "I find the information, books or articles I need when I use the library." Furthermore, 85.60 percent of the responding students reported they strongly agreed or agreed with the statement "Using the Library contributes to my overall college success." The survey also shows that over 75 percent of the students access the library remotely, a piece of information which demonstrates the need for online services for students in both online and face-to-face classes.

The librarians assess the Library instruction program and Library services in order to evaluate the Library's impact on student success. Based on this data, necessary changes are made to Library courses and services to improve their effectiveness.

Library Instruction

Credit Courses: The Library offers two online credit courses that teach information literacy and research skills. LIB 100 is a 1-unit course that is transferable to the CSU system and LIB 2 is a 3-unit honors course that is transferable to the CSU and UC systems. SLOs are assessed every semester for these courses to provide data necessary for course improvement and redesign. Both full-time and part-time librarians teach these courses.

Library Workshops: In addition to for-credit courses, the Library provides point-of-need, drop-in, and online workshops throughout the semester to support faculty and course information competency requirements. These workshops provide instruction and interactive, hands-on practice for students. Faculty give credit for workshop completion based on attendance. The SLOs for the workshops are based on the Association of College & Research Libraries new *Framework for Information Literacy for Higher Education*. Due to student demand, the Library has added two additional online workshops: 1) Avoiding Plagiarism and 2) Finding Information. Adding more online workshops simultaneously increased online enrollment and decreased in-person attendance, demonstrating the need for more online offerings among students in both online and face-to-face courses. To address this need, the instruction librarian and the distance learning librarian are currently working to create more online workshops. The effectiveness of these online workshops is demonstrated by the fact that 90 percent of students who take the online workshops meet the SLO with a competency rate of 70 percent or higher, a competency rate equal to that of in-person workshops. In fall 2015 and spring 2016, 1262 students completed Library workshops either online or in person.

During spring 2016, the following information literacy workshops were offered:

- Avoiding Plagiarism (online)
- Books and eBooks
- EasyBib Citations
- Finding Articles (also available online)
- Finding Information (online pilot)
- Internet Searching
- Planning Your Research

Faculty Requested Instruction: The Library provides specialized instruction for students in classes that have tailored assignments or in which student needs align with research and Library materials. Each class that has an individualized instruction session receives a customized research guide highlighting the resources utilized and of value to the assignment. Librarians travel to classrooms across campus or secure the Library classroom, LRC 314, where students can utilize the Library's resources for hands-on practice. During fall 2015 and spring 2016, the Library had 41 instruction requests from discipline faculty. Typically, students visit the Library for a 50-minute session accompanied by their instructor.

Library Consultation: The Library offers one-on-one appointments for students to receive in-depth research support based on the student's schedule and availability. During fall 2015, the Library began marketing this service on its homepage. Some faculty have incorporated these consultations into their classes by offering extra credit to those students who meet with a librarian for research assignments. Faculty who have actively promoted the consultation service to their students have given positive feedback related to the quality of work submitted after the consultation and the students' response to the service. During the 2015-2016 year, 104 students used the research consultation service. Starting in fall 2016, the Library will implement a short student survey after each consultation to assess the value of this service.

In spring 2016, the Library piloted a program to visit English classes for a 10-minute orientation which highlights basic Library services, resources, and information competency support. All

faculty who requested the orientations stated that they found the information helpful and would request the orientation again. During the pilot, 17 English classes were visited reaching a total of 449 students.

LRC Tutoring

The College's tutoring programs also participate in a review process. In fall 2012 the Learning Assistance Program was renamed LRC Tutoring. The renaming took place when the building in which the Library and tutoring program is housed was renamed the Learning Resource Center (LRC). LRC Tutoring completed its most recent AUR in July 2016.

As part of the review process, LRC Tutoring uses online surveys which assess student satisfaction and the program's effectiveness. This survey is posted on the LRC Tutoring website, and students are encouraged to complete the survey after each tutoring session. The survey is reviewed on a regular basis by tutorial staff to determine program strengths as well as areas in need of attention.

LRC Tutoring also works with a research analyst from OPBA to determine the impact of its services on student success. According to the data provided by the analyst, those students who utilized tutoring services for six or more hours per semester during the 2014-2015 academic year had greater success, retention, and persistence rates than the general student population at the College. Significant increases in the success rate (from 71 percent to 80 percent) and persistence rates (from 79 percent to 93 percent), demonstrate the effectiveness of this program.

LRC Tutoring provides its services across disciplines for over 160,000 hours per academic year. In addition to onsite tutoring, students in online and face-to-face courses can receive online tutoring through WorldWideWhiteboard, a program that allows remote access in both synchronous and asynchronous formats. The College also provides an online Paper Center through which students can submit papers via Blackboard for review by a tutor within 48 hours.

LRC Tutoring serves approximately 3,200 students per semester. In fall 2015, 3,578 students enrolled in TU300 and completed a total of 64,810 positive attendance hours in the Tutoring Center. In spring 2016, 3,192 students enrolled in TU 300 and completed a total of 62,277 positive attendance hours. The Tutoring Center provides tutoring by appointment and, for high-demand subjects such as math and the sciences, on a drop-in basis. Recently, the Tutoring Center has developed embedded tutoring as a way of improving the success of at-risk students in English, math, ESL, and science courses. Each semester, embedded tutors reach approximately 2,100 students in more than 45 sections.

ANALYSIS AND EVALUATION

The College regularly evaluates Library and other learning support services to ensure that student needs are met. The Library and LRC Tutoring use outcomes assessment data, statistics, student surveys, and input from faculty and staff to help evaluate their services and to provide insight into areas that can be improved to better support learning and achievement. This data is systematically evaluated during the biennial administrative review process.

II.B.4: *When the institution relies on or collaborates with other institutions or other sources for library and other learning support services for its instructional programs, it documents that formal agreements exist and that such resources and services are adequate for the institution's intended purposes, are easily accessible and utilized. The institution takes responsibility for and assures the security, maintenance, and reliability of services provided either directly or through contractual arrangement. The institution regularly evaluates these services to ensure their effectiveness.*

EVIDENCE OF MEETING THE STANDARD

The Library and LRC Tutoring maintain collaborative relationships with other institutions and contract with library service providers to enhance library services and learning support services. Contractual agreements provide resources and services that are adequate and accessible for students. The librarians, tutoring staff, and Technology Services (TS) collaborate to ensure the security and reliability of all contracted services. These services are regularly assessed, often annually, and improvements are made as needed.

Library

Faculty and staff at the libraries of Saddleback College and Irvine Valley College collaborate on an ongoing basis, primarily through email, telephone calls, and meetings. As an example, the District moved to a new integrated library system (ILS) during the summer of 2014. Both colleges were heavily involved in the selection and implementation of this new ILS process which took over a year to complete. During this time, the faculty and staff at both colleges met regularly to discuss and coordinate the migration to the new ILS.

The Saddleback College and the Irvine Valley College libraries continue to have an inter-college lending program to serve students at both colleges. Saddleback College utilizes the ILS WorldShare to manage patron and material records and as the backend of the online public access catalog. Library patrons have the option to search both colleges' collections individually or collectively, and they can request items from either campus through the online catalog. A daily courier between Saddleback College and Irvine Valley College ensures that requested materials are available for the patron to check out from their home library in one to two days. In addition, patrons can now use the online catalog to search the collections of libraries around the world and request items from those libraries through Interlibrary Loan. Through the Interlibrary Loan service, the Library works with other libraries around the country to find a copy of the requested item that can be sent to the Library for the patron to check out, often at no charge. Previously, Interlibrary Loan requests required the patron to visit the Library during regular business hours to fill out a paper form with assistance from a librarian. To better serve both face-to-face and online students, this service is now offered online 24 hours a day, 7 days a week. After the implementation of the online system, the number of Interlibrary Loan requests submitted has increased dramatically.

In addition, the Library maintains a formal borrowing agreement with FLS International, which is affiliated with the College Community Education program. Students enrolled at FLS International (a nearby language school) enjoy limited borrowing privileges at the Saddleback College Library by presenting their FLS International ID. In addition, through a formal agreement, Saddleback students enrolled in the College Honors Program enjoy borrowing privileges with the UC Irvine and UCLA libraries. All formal agreements are evaluated

periodically.

Vendor Services

The College collaborates with many commercial vendors and organizations to provide a full range of quality library services. The following are a list of current vendor contracts:

- 100 Planos Premier Solutions (Guide on the Side)
- 26 Design (WCONLINE)
- Better World Books
- Bibliotheca
- California Community Colleges Council of Chief Librarians Consortium
- Compendium Library Services (DeskTracker)
- EBSCO
- EZproxy
- Nub Games, Inc. (LibraryH3lp Chat Service)
- OCLC (WorldShare)
- SARS
- Unique Management Services, Inc. (UMS)
- Xerox
- Library of Congress (Classification Web)
- American Library Association (RDA Toolkit)
- Yankee Book Peddler

The librarians review vendor services regularly to ensure that they continue to meet the library's needs and provide reliable maintenance and service, product support, and security. The College documents vendor service agreements, and the contracts are negotiated and maintained by the District business services office.

LRC Tutoring

The College maintains contracts with several commercial vendors to provide a range of support services in the LRC Tutoring Center. The following is a list of current vendor contracts:

- 26 Design (WCONLINE)
- Link-Systems (NetTutor, WorldWideWhiteboard)
- Nub Games, Inc. (Library H3lp Chat Service)
- SARS

To more effectively serve online students as part of our involvement with the Online Education Initiative, the College is currently piloting online tutoring services with Link-Systems' NetTutor and WorldWide Whiteboard software.

Security, Maintenance and Reliability of Services

The Library purchased a Radio Frequency Identification (RFID) system that was installed in the renovated Library in 2012 to replace our 3M Tattle-Tape security system. The Library has RFID

security gates at both entrances to help maintain the security of the collection. All Library materials are embedded with RFID tags. For online resources, the Library uses EZproxy as a secure login system to authenticate off-campus users. EZproxy ensures that usage conforms to agreements we have with our providers.

Technology Services ensures that the computer systems are secure from unauthorized access or use, and are safe from destruction, theft, and damage. For community users (nonstudents and nonstaff), the Library provides a guest log-in that requires users to sign up and to provide a photo ID. Guest usernames and passwords are created in Active Directory by circulation staff. With a username and password, guests can log in to the District network and use on-site computers and Library resources. This guest log-in does not permit off-campus access to Library resources.

The College's wireless network has been operational campuswide for over a decade, and during that time the College has tried to keep up with growing demand. In spring 2016, the College started another Wi-Fi upgrade project to improve the signal's strength and reliability across campus. The Technology Services department's network security measures protect the Library and learning support service computers against security breaches.

The College installed three security cameras on the outside perimeter of the Learning Resource Center building in 2013. The three Advitia A-54 IR cameras are located on the second and third-floor exterior stair wells, and on the second-floor emergency exit door.

The Library and LRC Tutoring computer and software are maintained by Technology Services. The College and the District use an online work request system to respond to computer technology equipment repair notifications using the District-wide Support Portal; critical repair items that impact daily operations of services are immediately assessed and routed to the appropriate TS staff or vendor. The College's 2015-2020 *Technology Plan* addresses the maintenance and scheduled replacement of computer equipment.

WorldShare is cloud-based software. The District's Information Technology department works with OCLC, the vendor for WorldShare, to maintain the software and to ensure the security of the system.

The Library and LRC Tutoring public copiers and printers are currently maintained through a Xerox service agreement. The College moved to Xerox during spring 2016 as our previous vendor was no longer meeting the needs of the students. Under the Xerox contract, new features are available to our students, including Follow-You Printing, free scanning, and the ability to print from a mobile device.

ANALYSIS AND EVALUATION

The Library and the LRC Tutoring Center regularly collaborate, both formally and informally, with other institutions, organizations, and vendors. The College documents all formal agreements and contracts with outside organizations or vendors, evaluates outside library and learning support services for quality and suitability, and ensures that outside services meet the College's requirements for data security, reliability, and maintenance.

II.C.1 The institution regularly evaluates the quality of student support services and demonstrates that these services, regardless of location or means of delivery, including distance education and correspondence education, support learning, and enhance accomplishment of the mission of the institution.

EVIDENCE OF MEETING THE STANDARD

The College evaluates and assesses the quality of student support services and demonstrates that these services, regardless of location or method of delivery, support student learning and enhance the mission of the institution. The quality of student support services is primarily assessed through the administrative unit review (AUR) process. One of the major functions of AUR is to ensure that all units are aligned with the mission and goals of the College. Student learning outcomes (SLOs) and administrative unit outcomes (AUOs) are used to improve services and are an integral part of the review process. AUOs and SLOs are addressed in II.C.2.

The College provides comparable student support services to online education students. Each student support unit uses a variety of technologies—such as email, telephone contact, the College website, and online chats—to extend access to all students, including online students. Online student services were originally developed with online education students in mind, but these services have become popular with all students. Students can use the College website to apply, attend the new student orientation, begin the financial aid process, order books, contact a counselor, add or drop classes, request transcripts, seek student technical support, participate in online tutoring, and use library databases.

Admissions, Records and, Enrollment Services

The Office of Admissions, Records, and Enrollment Services assists with applications for enrollment and all enrollment-related services; with registration and transcript requests; and with degrees, certificates, and occupational certificates. All admissions and records policies and regulations adhere to state, federal, and local rules and regulations.

This services of this office include the following:

- Maintaining permanent academic records for current and former students
- Providing transcripts and enrollment information upon request
- Creating and maintaining class lists, grade lists, and grade reports
- Graduation activity support
- Graduation certification
- Statistical reporting
- Transcript evaluation

Career and Re-Entry Center

The primary focus of the Career and Re-Entry Center is to offer career exploration, career counseling, advisement, and support to individuals who are searching for a new major, as well as services to assist individuals with career and life development. This center provides both career guidance services and re-entry services to all students. It also maintains a website that describes the center's offerings and provides a variety of resources. The center currently

employs two full-time year-round employees, one career guidance technician, and two part-time office assistants.

Career guidance services are available to students and community members. These services include career books and resources; information regarding majors; educational and training information; financial aid, grants, and scholarship information; college catalogs and other resources; interest, values, skills, and personality assessments; and standardized testing.

Re-entry Services has an open door policy for all students and community members and has never denied services based on a specific definition of "re-entry student." The center's intention is to support all re-entry students and promote the success of their educational, career, and personal goals. Services include needs assessments; advisement; resources; referrals to appropriate contacts; education and career guidance; educational and informational sessions (in English and Farsi); support groups; conferences; and scholarship information. Each April, Re-entry Services holds an annual event that features community speakers, workshops, and a nonprofit resource fair.

The Career and Re-Entry Center offers assistance face-to-face, via email, and by phone. The center's website provides a starting point for many services and also provides a variety of tools for students. The following services and research tools are provided free to students: CaCareerCafe.com, CaCareerZone.org, Vocational Biographies, CareerCruising.com, Kahn Academy, Occupational Outlook Handbook, and O*Net.

Career Placement Services

The career placement officer operates in the Economic and Workforce Development and Business Science Division. The position provides campuswide job preparation services and supports students in the areas of job searching, resume writing, interviewing, as well as social media issues impacting the job search. The position also provides organizations opportunities to recruit and hire students through On-Campus Recruitment (OCR), career fairs, and job postings on Gaucho Jobs. The career placement officer is the system administrator for Gaucho Jobs, an online student employment system averaging 20,000+ visits per year, 200-300 job posts per month, and 2000+ employer contacts. Furthermore, Gaucho Jobs averages approximately 500 students searching for employment each month spending over six minutes per visit. In addition, the career placement officer coordinates the annual career fair, which is consistently one of the highest-rated career fair events in the region and brings nearly 100 organizations and 1000+ job-seekers to campus.

Counseling Services

Consistent with the College mission, Counseling Services supports student learning and success by regularly evaluating the quality of its student support services. Feedback about student services is collected through both the annual college wide survey and the Counseling Division student surveys. In April 2009 and fall 2013, student surveys were administered in the Counseling Division. The surveys addressed students' satisfaction with Counseling Services and included questions about student satisfaction with their development of an educational plan, appointment length, information provided, quality of counselor support, and appointment

availability. The 2009 survey contained data from 138 students, and the 2013 survey contained data from 100 students.

The results of the student surveys regarding the development of educational plans demonstrate the Counseling Services Division's success in supporting learning and enhancing the mission of the College. Data from the 2013 survey states that 95 percent of the students who made appointments for academic counseling indicated that they had developed a complete academic plan during their appointment using My Academic Plan (MAP). MAP is a computerized online academic planning tool created by the College and IVC counselors in 2007 to create comprehensive student educational plans. MAP, which interfaces with ASSIST.org, is utilized by all counselors in all departments of student services. Recent data concerning the development of academic plans by students further validates this point by showing an exceptional increase in the number of MAPs being developed by students over the past three years as well as the number of comprehensive academic plans being approved by counselors. Recent data shows that since fall 2012, 19,368 comprehensive academic plans were approved by counselors at the College, and, between the academic year 2013-2014 and 2014-2015, there was a 25 percent increase in approved comprehensive academic plans. Since MAP can be accessed and completed on the student's computer at any time and in any location, this data includes distance education and correspondence education students. Whether working directly with the student in an appointment or over the phone, a counselor can check and approve a student's MAP by accessing it on a computer.

The results from the 2009 and 2013 student surveys indicated that the majority of students were consistently satisfied with their contact with a counselor. Since student success is the goal of all counseling appointments—whether the appointments are for academic, career or personal counseling—this data further demonstrates Counseling Services' ability to support student learning. Results also indicate that satisfaction with counseling has been growing in recent years.

Results of the 2009 and 2013 survey results are shown below:

In addition to monitoring appointment satisfaction, the Counseling Services Division works consistently to improve the counseling experience for DE students. Online versions of counseling classes continue to be added, and updates and improvements to the online academic planning tool MAP occur on a regular basis.

Group counseling is another innovative way the Counseling Services Division is meeting the needs of a growing student population. During the summer and fall 2015, the Counseling Services Division participated in a formal research study to measure the effectiveness of using group counseling to assist students with the development of a comprehensive academic plan. To determine if group counseling could be an effective method of assisting students in developing a comprehensive academic plan, the REL West and MDRC research groups partnered to undertake a research study with the Counseling Division at the College. A random sample of students was selected to attend academic planning groups using MAP. These MAP workshops were designed to provide counseling to groups of five to ten students with the goal of assisting each student with the development of a comprehensive academic plan. These students were compared to a random sample of students who received individual counseling appointments with the same goal of developing a comprehensive academic plan. As a result of the Counseling Division's participation in this study, MAP Workshops are now an integral delivery method for counseling students at Saddleback College. MAP Workshops provide the Counseling Division with the flexibility to respond to student demand and meet student needs regarding the development of comprehensive academic plans. MAP Workshops can be added to a counselor's schedule when student demand for counseling appointments becomes greater than counseling appointment availability.

In addition, every two years, the Counseling Services Division evaluates its student support services through an AUR. The AUR speaks to Division strengths, opportunities, challenges and needs, as well as their future objectives. Each AUR also presents the completion of previous objectives. The AUR is a comprehensive and thorough document that demonstrates support of student learning and enhances the mission of the institution. [2.00 PR]

Disabled Students Program and Services

Disabled Students Program and Services (DSPS) regularly evaluates the quality of their department's services through surveys, the evaluation of usage data, the review of AUOs, and the completion of AURs.

DSPS sends out a student survey during the spring semester. Direct student feedback about DSPS provides immediate data following student appointments for DSPS Counseling, Learning Disabilities Assessment, Accommodated Testing Services and Alternate Media Production, as well as other services provided for deaf and hard of hearing students, students in need of adaptive furniture, or those in need of "on campus" transportation. The surveys distributed during the spring term are then reviewed and the results are included in the DSPS program's administrative unit outcomes and also used for administrative unit reviews. The surveys address students' satisfaction with DSPS services and include questions about student satisfaction with appointment availability, information provided, new learnings, and the quality of counselor support. The 2009 survey contained data from 75 students, and the 2015 survey contained data from 42 students.

Results from the 2015 DSPS student survey showed that students were extremely satisfied with their contact with a counselor, learning disabilities specialist or DSPS specialist. 86 percent of responding students strongly agreed or agreed with the statement "I felt the counselor/LD

Specialist/DSPS Specialist responded to my questions thoroughly.” In 2009, 93 percent of the students indicated that their appointment provided them with new knowledge or skills related to academic, career, or personal goals.

The DSPS Program also analyzes students' use of their services. Through SARS, which records all student contacts, the College is able to determine the most significant services and programs utilized by students. This information provides insight into student needs and the ways in which DSPS should focus its goals, strategies, and planning to provide greater access to services through advanced technology, equipment, and additional programs and services.

In 2009, DSPS Alternate Media Production evaluated the number of students who attended their initial appointment after being referred to Alternate Media Production by a DSPS counselor. During the spring semester, 134 students were referred to Alternate Media Production. Of that number, 70 percent kept an appointment and submitted books/class material for production into an alternate media format. In 2015, 150 students met with the alternate media specialist and 175 books/materials were converted to Kurzweil or another media format.

This kind of evaluation occurs regularly in all areas of DSPS. In addition, the DSPS Program completes a program review every two years. The program review allows the DSPS Program to connect their services, programs, and instruction to the mission of the College.

Once a student is verified as having a disability, an interaction process during an accommodations appointment with the student determines what accommodations and auxiliary services would be effective for optimal learning. Accommodations apply to students for in class, Distance Education, and Continuing Education. If a student discovers that one of their accommodations cannot be applied, the student reports this information to their instructor and DSPS. DSPS and the instructor of record will then work together to make sure that the accommodation is provided. DSPS is aware of where their students are from as this is part of the application packet for DSPS services. Counseling appointments regarding DSPS accommodations, orientation, and counseling for DE students, can take place through Skype or phone conversations. These methods can be used for students who need access to Alternate Media Production, and materials can be delivered through email or physical mail. For those DE students whose accommodations include extended time on tests, DSPS provides the accommodation information to the instructor, who then adjusts the time allotment for tests on Blackboard or other technological access points for the student.

EOPS/CARE and CalWORKs

Consistent with the College mission, EOPS/CARE and CalWORKs supports student learning and success by regularly evaluating the quality of its student support services. The annual Collegewide survey collects feedback about student services, as does the review of AUOs and the completion an AUR. In addition, EOPS/CARE and CalWORKs faculty and staff have biweekly meetings to discuss the progress of the student support services that these programs offer to students. In 2013, the EOPS/CARE and CalWORKs Program conducted a student survey to evaluate the services offered through these programs. The survey addressed students' satisfaction with EOPS/CARE and CalWORKs services, information provided by the counselors,

mode of information delivery, quality of counselor support, and their completion of a student educational plan. The 2013 survey contained data from 60 students.

The results of the student surveys demonstrate the EOPS/CARE and CalWORKs Program's success in supporting learning and enhancing the mission of the College through the development of education plans. Data from the 2013 survey states that 95 percent of responding students agreed or strongly agreed with the statement "the EOPS Counselor developed an understandable educational plan that reflects my career or academic goals." All educational plans completed by EOPS/CARE and CalWORKs counselors are approved and signed by the student and the counselor. 93 percent of students agreed or strongly agreed that their EOPS counselor was knowledgeable about academic programs, general education and transfer requirements; 90 percent of responding students utilized priority registration and 81 percent utilized book vouchers or borrowed text books from the EOPS book loan program.

Financial Aid

The Student Financial Assistance and Scholarship Office provides FAFSA guidance and support to students who are eligible for federal, state, private, or institutional financial assistance. There are many financial aid programs that can help students with fees, books, supplies, transportation, housing, and other related educational expenses. Based on their financial need, students may be eligible for some form of assistance.

The financial assistance programs offered at the College include the following:

- Federal Pell Grant
- Board of Governors Fee Waiver Program (BOGFW)
- Federal Supplemental Educational Opportunity Grant (FSEOG)
- Extended Opportunity Program and Services Grant (EOPG)
- California Grant Program
- Bureau of Indian Affairs Grant (BIA)
- Saddleback College Scholarship Program
- Federal Work-Study (FWS)
- Federal College-Eligible National Direct Student Loan (Formerly NDSL)
- Federal Stafford Loan (both subsidized and unsubsidized)
- Saddleback College Emergency Short-term Loan Program
- California Chafee Grant Program
- Child Development Grant Program

International Student Office

The International Student Office provides services to international students who hold F-1 student visas. These services include assisting students in the admissions, assessment, and orientation processes. Furthermore, the International Student Office guides international students through the transfer and graduation process and helps students with the preparation of home-stay and visa applications as well as documents required by the United States Citizenship and Immigration Services. In addition, the International Student Office both coordinates events on campus to

promote global awareness and cooperates with community organizations in international friendship programs.

Level Up Basic Skills and Student Outcomes Transformation Grant

The College was awarded \$1.5 million for the three-year Level Up Basic Skills and Student Outcomes Transformation Grant, which began in fall 2016. The grant will focus on factors students say they need to feel in order to succeed in college: directed, focused, nurtured, engaged, connected, and valued. The grant will supplement ongoing college success efforts, such as AVID. The grant addresses four objectives:

- 1) Adopt the Common Assessment Initiative and Multiple Measures Assessment indicators, and evaluate and place students in college-level courses.
- 2) Increase the placement of students directly in gateway English and mathematics courses, transferable to a UC or CSU, with remedial instruction, as appropriate for underrepresented students.
- 3) Contextualize remedial instruction in foundational skills for the specific academic and career pathways in which students seek to advance.
- 4) Provide proactive student support that is integrated with instruction.

The College will also use the grant to advance existing practices that are productive, to employ professional development to create awareness and practice of these strategies and perspectives, and to develop a Collegewide culture, both in the classroom and in areas of student support, that bolsters basic skills success. In addition, the College will use existing District technology to create a new class schedule that will integrate a given student's matriculation results, high school transcripts, completed coursework, academic plan, as well as create an individualized class schedule. The grant will also create six positions to expand tutoring, and provide stipends for curriculum redesign and professional development.

Student Health Center

The Student Health Center offers quality, confidential medical health care and psychological therapy for currently enrolled students who have paid their health fee. The Health Center staff is comprised of physicians, registered nurses, psychologists, and counseling interns. The student health fee includes treatment for acute, short-term illnesses as well as injuries, health education, referral, and general health screening, including mental health therapy and women's health. A minimal fee does apply to some procedures, tests, labs, and prescriptions.

The College has a Crisis Intervention Team (CIT) which includes staff from the Student Health Center and Counseling Services. This team is available when a College student or staff member has a psychological emergency. In addition, the Student Health Center subscribes to *Student Health 101*—a monthly online magazine that covers a variety of pertinent college health issues, such as colds and flu, stress, depression, sleep, nutrition, alcohol, and sexual behavior.

Student Success and Support Program (Formally known as Matriculation Department)

The Student Success and Support Program (SSSP) evaluates its student support services through student surveys, the review of AUOs, and the completion of AURs. In spring 2012, a sample of 287 students who had completed matriculation at the College responded to a matriculation satisfaction survey. All questions on this survey were graded on a scale of 1-5 with 5 being the highest score. As a result of this survey, efforts were made to improve 1) the College's orientation and advisement and 2) the language on the matriculation website to better explain the process for submitting alternative evidence to meet the prerequisites for English and math requirements.

Students must now show information mastery while completing the online orientation. This demonstrates consistent student learning while completing the orientation process. A student must get 80 percent of the orientation questions correct in order to clear this required step of the matriculation process.

The SSSP program review along with the SSSP credit and non-credit plans are used to measure the program's progress and to monitor any unmet needs of SSSP/Matriculation. Below reflects the Matriculation services provided to potential College students during the 2014-2015 academic year. [2.00 Orientation Outcomes]

Orientation is mandatory for all students whose educational goal includes matriculation. During the 2014-2015 academic year, 92 percent of first time students completed orientation.

The College is able to meet all student orientation needs as this service is entirely available online. Only students whose educational goal does not require orientation are permitted to register for classes without having completed all SSSP core services. An effort is being made through Sherpa "nudge" technology to follow-up with students who have applied, but who have not completed the SSSP core services nor enrolled.

SSSP supports the Counseling student learning outcomes (SLOs) by introducing new students to campus support programs including: Counseling courses; categorical programs such as DSPPS, EOPS, CalWORKS; veteran services; the Transfer Center; the Health Center; free tutoring in the LRC; FERPA; and Title IX. The successful completion of the online orientation module's exit exam demonstrates evidence of student learning.

SSSP continually conducts evaluations of programs and activities coordinated. Turning Technologies, an electronic polling system purchased through SSSP, is used regularly to conduct pre and post surveys from students attending in-person orientations. In addition, a variety of SSSP/Matriculation workshops are held throughout the year.

Transfer Center

It is the mission of the Transfer Center (TC) to provide resources and counseling services that empower students, so they can achieve their desired transfer goals and career objectives. In order to transfer to a four-year institution, students must meet specific momentum points dependent on their transfer goal. The general points are deciding on a major and career goal, math and English requirement completion, completion of a specific number of units, completion

or partial completion of a general education pattern, lower-division major preparation, and maintenance of a competitive grade point average.

The Transfer Center regularly evaluates the quality of support services provided to students through student surveys, by reviewing AUOs, completing AURs, and evaluating data. Furthermore, the support services provided by the center support learning and enhance the accomplishment of the mission of the institution and, in particular, the mission of student transfer to 4-year institutions. Students have multiple means of making contact with the Transfer Center; they can access the center through its website, schedule individual appointments at the center, call the office and be placed on a call-back list during walk-in periods, or email the center with questions via a designated general email address provided on the center's website. The counselor/coordinator and the eight part-time counselors also deliver services through presentations in academic classes, workshops for students, open application labs, personal statement essay reviews, and quad visits. These class visits and workshops are regularly evaluated through a paper survey that is uploaded to Class Climate. In addition, as part of the administrative review process, a student satisfaction survey was conducted in 2014. To provide access to the survey for distance education students and those who had already transferred, the survey was sent to students who had made an appointment through their College email. Students who visited the office were given a paper survey. Through both means of deliver, 83 students participated in the survey total.

Appointment processes: The survey results demonstrated that 56 percent of students made appointments over the phone and 36 percent made appointments in person. Eight percent of students who completed the survey had never made an appointment with a Transfer Center counselor. It is possible that these students completed the survey while they were in the office during walk-in transfer express times. 56 percent of students found the appointment making process to be very easy, while 18 percent found it easy. Meanwhile, 14 percent of the students found the process to be difficult and 7 percent found it very difficult.

Counseling: Nearly 68 percent of students were "very satisfied" with their counselor's thoroughness. Seventy-one percent of students were satisfied with their counselor's explanation of specific transfer steps. Sixty-nine percent of students rated their satisfaction with MAP as "very satisfied." 56 percent rated their satisfaction with application help as "very satisfied." Finally, 63 percent of students were "very satisfied" with the length of their appointment.

Transfer Center counseling related to college choices was the highest rated reason for visiting the Transfer Center at 71 percent, followed by help with counseling assistance for class scheduling at 66 percent. Nearly 35 percent of students surveyed used the center for transfer workshops, followed by 15 percent for university representative visits, 11 percent for college fairs, and 6 percent for careers in teaching.

The Transfer Center determines AUOs each year to guide priorities and provide focus for the academic year. The Transfer Team, composed of both faculty and staff, meets each Monday to review progress and plan for upcoming student transfer needs. In addition, counseling faculty

meet monthly for a Counselor Forum to consider case studies, policy review, and four-year institution research.

Veterans Education & Transition Services Program (VETS)

The VETS Program is not mandated or required through Title 5 or state or federal regulation; it functions and is supported at the will of the College. The mission of the VETS Program is to provide United States Military Veterans, active military, and the families of both, access to educational opportunities and the necessary support services to reach academic success as well as transition back into civilian and college life. In achieving this mission, the College will stand as a leader among post-secondary institutions in serving those who have served us.

The VETS Program regularly evaluates the quality of support services provided to students through the assessment of AUOs and through the AUR process. The program works with District IT staff to assess completion rates, retention rates, participation rates, and demographic information of student veterans, active duty personnel, and military dependents. Furthermore, the Vets Program also reviews the efficiency and efficacy of its services. For summer 2016, the program planned a deeper review of student veterans, the impact that the use of services has on those students, as well as an overall satisfaction survey. Once completed, this assessment will inform the future direction of the VETS Program. In spring 2016, a review of the physical VETS Center took place. In this review, students showed extreme dissatisfaction with the size and layout of the current location, SSC 207. As a result, a report has been developed and will be delivered to the College administration to seek a new, larger, and more accessible location to serve student veterans.

The VETS Program provides phone and online services for off-site active duty personnel, veterans, or family members, who are often either deployed or on a military installation outside of the area. For example, when a student comes to the program with limitations based on geography or the inability to be given leave by a commanding officer to come to campus, an appointment is scheduled and a counselor calls the student and engages with them online to review records and documents simultaneously; in addition, the program offers counseling at Camp Pendleton Marine Corps Base. Many veteran students come from the northern part of Camp Pendleton, and yet they still struggle to get to campus due to active duty commitments.

Veterans Affairs and Services

The Veterans Office assists students in completing paperwork required for VA education benefits. The College encourages students who qualify for VA education benefits to take advantage of their entitlement. In addition to providing education benefits to veterans, the Veterans Office provides education benefits to dependent children and spouses of veterans who died or are permanently and totally disabled due to a service-connected disability. Veterans Affairs and Services regularly evaluates the quality of support services provided to students through the process of reviewing AUOs and completing AURs.

ANALYSIS AND EVALUATION

The College makes every effort to provide comparable support services regardless of the method and location of instruction. The College regularly evaluates student services through administrative review and point-of-service surveys. By utilizing these evaluations, student

support services can ensure that services meet the needs of the students and support the mission of the College. In addition, this process ensures that the College provides high-quality services that support student learning, and helps to identify additional needs and services.

OBSOLETE

II.C.2 The institution identifies and assesses learning support outcomes for its student population and provides appropriate student support services and programs to achieve those outcomes. The institution uses assessment data to continuously improve student support programs and services.

EVIDENCE OF MEETING THE STANDARD

The College is committed to providing high-quality student support services, regardless of location or means of delivery, to promote student success and the mission of the College. Student Services defines and assesses AUOs for a diverse student population, provides appropriate support programs and services to achieve those outcomes, and uses subsequent results to make changes and improvements.

The College currently does not have any programs that are offered solely online. As an open institution, the College does not restrict access to any of its courses and works to ensure the success of all students, both face-to-face and online, by providing necessary resources and services. The College assesses and utilizes outcomes assessment data for all support services, whether these services are provided face-to-face or online. In addition, the College requires all student and learning support services to participate in the biennial AUR process.

Counseling Services

Counseling Services identifies and assesses learning support outcomes and provides appropriate student services by regularly participating in the administrative unit outcomes (AUOs) process and by assessing student learning outcomes (SLOs) related to counseling courses taught through the Counseling Department. Counselors work with students to create a plan that mirrors student goals whether that goal is a certificate, associate degree, or to transfer to a four-year institution. All necessary courses in this plan can be changed by semester to provide students with a visual outline of their remaining courses for completion. My Academic Plan (MAP) is always accessible to students through the MySite portal.

The Counseling Division tracks the number of academic plans that are made on MAP as well as the number of plans that have been approved by a counselor. MAP has proven to be a useful and innovative tool for counselors as well as students to promote student learning. The results of the aforementioned mentioned 2009 and 2013 Counseling Division student surveys (in II.C.1) show student satisfaction with their ability to develop a comprehensive academic plan using MAP.

The Counseling Division also assesses student outcomes through SLOs related to counseling courses taught through the Counseling Services Division. Counseling courses are taught in subjects including: career exploration, academic planning, human relationships, and study skills. Each class has a specific list of SLOs that students are expected to achieve by the end of the course. Class assignments and exams are means to measure SLOs. Comparable counseling courses, whether taken in person or online, have the same SLOs. Therefore, online students can expect to receive the same information as face-to-face students and will achieve the same learning outcomes. In order for students to accomplish the competencies necessary to earn a certificate, degree, and/or transfer, all course-level SLOs are linked to PSLOs and ISLOs. In the

latest measurement of SLOs in Counseling Services courses in 2015, 100 percent of counseling courses met their SLO goals. The chart below describes how specific counseling SLOs were measured. [2.00 SLOs]

Disabled Students Programs and Services

Through DSPS administrative unit outcomes, DSPS assesses how adequately it meets the needs of students in a timely manner. In 2013-2014, the AUO was assessed through institutional data collection. SARS was used to examine the time between a student's first contact with DSPS (submission of the DSPS Application for Services) and the time the student received their initial appointment. It was found that only 61 percent of the students applying for services received an appointment within two weeks of their first contact. These results indicated that there was an inadequate number of appointments available, perhaps partly due to budget reductions since 2008. In addition, the DSPS student count has increased significantly since 2008. There were 1800 DSPS students in 2008 and 2500 hundred students by 2014. In response to this increase, DSPS has added counselors to meet student needs.

DSPS also assesses student outcomes through student learning outcomes related to Special Services courses taught through DSPS as well as the adaptive PE courses (KNEA) taught through DSPS. Special Services courses cover various subjects including: Alternative Learning Strategies, Personal Awareness and Success Strategies, Memory and Attention Skills, Success Strategies for Basic Mathematics, Basic Computational Skills, Phonetic Structure for Reading and Spelling, and Adaptive Computer Learning. KNEA courses include: Adaptive Strength Training, Water Exercise and Swimming, Cardiovascular Conditioning, Adapted Sports, and Survey and Assessment of Fitness, among others. Each class has a specific list of SLOs that students are expected to achieve by the end of the course. SLOs are measured through class participation, assignments and exams.

Early Alert

A new early alert, or Progress Report, was launched in summer 2016 to all faculty whose students are in jeopardy of not attaining the outcomes for the course. Progress Report was piloted in spring 2016 by 25 faculty, and over 400 Progress Report nudges were sent to students. This new early alert system is an opportunity for faculty to continue to communicate with their students, particularly to express any concerns that they have regarding their students' class performance. Faculty can use Progress Reports to communicate to a student that he/she may be missing assignments, poor performance on a test, or absences. Since College counselors will also have access to these Progress Reports during individual counseling appointments with students, Progress Report will allow for a holistic and intrusive approach to counseling. Furthermore, counselors will proactively use Progress Report analytics to reach out to students who are in need and direct them to campus services for support.

Progress Report nudges include referrals to the Learning Resource Center, the College's free tutoring center, instructor office hours, and counseling. While Progress Report is voluntary tool for our faculty, this function can easily be accessed with any class roster found in MySite. Professional development workshops will address how to use Progress Report; in the meantime,

this intuitive tool is already available to faculty. Approximately 1,800 students end each semester on academic or progress probation. Beginning fall 2016, students on academic probation are in serious jeopardy of losing their financial aid. Progress Report can serve as a preventative tool to help all students succeed. Finally, Progress Report can also send positive nudges, which will allow counselors to reinforce positive classroom performance. This early alert system is a Districtwide project funded through SSSP. Instructional and counseling faculty, staff, research and District IT worked together on this collaborative effort to provide a needed and beneficial student support tool.

EOPS/CARE and CalWORKs

Every three years, EOPS/CARE and CalWORKs identifies and assesses administrative unit outcomes (AUOs). The EOPS faculty and staff members have biweekly staff meetings to discuss and evaluate AUOs. During these meetings, staff report the outcomes of their activities in relation to AUOs. For example, all EOPS active students are required to attend three counseling meetings per semester; during these meetings, the counselor ensures that the student develops an educational plan. All current EOPS students have a comprehensive student educational plan.

In addition, students are contacted via email and phone with reminders about their priority registration, counseling contacts, book vouchers, the book loan program, and other student support services—such as holiday events, grants and scholarships available to students. The AUOs are assessed in several ways. The EOPS program specialist uses a database to run daily reports on those students who utilize each support service and on the student support services provided. The EOPS/CARE programs have a tracking system where all student contact is documented and all services are tracked. In order to plan for the following year, all AUOs are assessed at the end of each calendar year. In addition, the EOPS/CARE programs have mandated reports. The reporting forms required by the Chancellor's Office during the fiscal year include the Proposed Budget, Final Expenditure Report, and Program Plan Report.

SSSP

SSSP assesses and provides for student needs by including in the orientation topics mandated by Title 5, section 55021, as well as any additional information, policies and/or procedures that the College or District determines necessary to include in a comprehensive orientation. The orientation includes all mandated topics as well as additional topics, such as, programs and majors, the SSSP process, student services, academic planning, campus life, and student conduct and safety.

SSSP addresses student need regardless of location. The program responds daily to email messages from students and the community regarding SSSP-related questions and concerns. All student services-related departments, as well as instructional support divisions and departments, contact SSSP regarding matters of assessment, at which time the SSSP coordinator and/or staff address each inquiry on a case-by-case basis. All SSSP information is available to students and the community via the SSSP website. In spring 2016, the College participated in a CESSE student survey. [2.00 add survey results]

SSSP provides online orientation and online advisement for students unable to participate in in-

person SSSP services. Students outside of a 150-mile radius of campus and out of state can complete assessments with off-site proctoring services nationwide through the College's membership with NCTA. Through Comevo, the same provider of online orientation, online probation workshops are available to students.

SSSP ascertains the effectiveness of student support services through department surveys and event evaluations. Evaluations are collected from Freshman Advantage Fridays, Refresh, WOW, Probation Workshops and during administrative review, typically using Class Climate and now Turning Technologies. SSSP staff use data to help update and improve service and program delivery. The SSSP researcher regularly assists the staff with data analysis.

Transfer Center

Students work with counselors in the Transfer Center to prepare for transfer, to apply, and to follow the steps for transferring which, in many cases, take approximately one year from application to the first semester at a given transfer campus.

To determine whether students are achieving anticipated outcomes and to improve services, the Transfer Center assesses the following:

- Assessment of approved MAPs completed by counselors in the Transfer Center
- Assessment of the number of CSU and UC applications and admissions each year
- Private and out-of-state college admissions
- Tracking of Honors Program and Teacher Preparation Pipeline students
- Assessment of student use of the Transfer Admission Planner (TAP) which is a service/online planner administered by the University of California
- Assessment and follow-up of students through the UC Data Sharing Program

Veterans Education & Transition Services Program

Plans are in place to evaluate the efficacy of VETS Program services; to date, no formal assessment has taken place. Internal assessments include student wait time for counseling, counselor efficiency, VETS Center utilization, accuracy of MAP majors to VA Once submissions, event participation rates, and overall veteran participation rates at the College. The VETS Program is currently up for administrative unit review (AUR) and will incorporate specific metrics into both the planning process and AUR.

Distance Education

In response to student need, the College is currently piloting online tutoring services, an online Paper Center, and live tutoring. The LRC Tutoring Center is offering WOW workshops for students taking online courses. The Tutoring Center has also added some embedded tutors for online courses. In addition, the Library is offering online Library Workshops and will add additional online workshops in 2017.

Counselors provide online/phone counseling to help meet the growing needs of online students. To ensure reasonable academic accommodations for students enrolled in online courses, DSPP has online procedures to accommodate students who have disabilities.

AURs and PRs flag additional student needs and enable a link to resource allocations. In addition, student surveys and committees—including the District Technology Committee, College Technology Committee, DOEC, and College Online Education Committee—offer the College opportunities to assure the quality of student support, identify needs for support services, and ensure that those needs are met.

ANALYSIS AND EVALUATION

The College provides a broad range of student services and programs to support student success. The College utilizes several methods for identifying and assessing outcomes for its learning support services and then uses that data to provide appropriate student support services to achieve those outcomes. Information on all student programs and services is available to students and the public through the College Catalog, which is available in print and online, as well as hyperlinks on the Student Services website. Furthermore, student orientation, campus events and personal development course curriculum, provide students with information on College services. The College was an early adopter of student services SLOs and AUOs, and all student support services have completed multiple AUO assessment cycles.

OBSOLETE

II.C.3 The institution assures equitable access to all of its students by providing appropriate, comprehensive, and reliable services to students regardless of service location or delivery method.

EVIDENCE OF MEETING THE STANDARD

The College provides appropriate, comprehensive and reliable student services that promote equal opportunity and access to all students, regardless of location or means of delivery. The College actively evaluates both student needs and student support services to ensure the quality of programs and their effectiveness in enhancing student success. To ensure quality of student support services regardless of location or means of delivery, all student support services participate in the College planning, evaluation, and review process.

Admissions, Records and Enrollment Services

The Office of Admissions, Records and Enrollment Services assists with application for enrollment, all enrollment-related services, registration and transcript requests, as well as degree and certificate conferral. The office collects, processes, and maintains student grades and completion records of certificates and degrees. The staff processes residency redeterminations and transcript requests, and enforces academic regulations such as course repetition, academic renewal, and enrollment priority. Most transactions can be completed online, and the Office of Admissions, Records and Enrollment Services serves traditional and online education students.

Counseling Services

Comprehensive and reliable counseling services include academic counseling, personal counseling, and career counseling, all of which can be obtained in person, on the telephone, and on online. Counseling Services is open for day and evening appointments every day of the week, excluding weekends and holidays.

Many high school students attend the College through dual enrollment. Additionally, in 2012, the College began offering counseling courses (then titled Applied Psychology) at local high school campuses. Serving a population of 400 high school students, the Counseling 100 courses are now offered at 13 local high schools. Students who participate in the high school courses are more prepared for college and have higher persistence rates.

Disability Student Programs and Services

DSPS at the College ensures that students with disabilities have equitable access to all support services and educational/academic classes and programs in the following ways: educational accommodations for academic limitations due to verified disability; academic, personal, and career counseling; priority registration; accommodated testing; mobility orientations and campus-accessibility maps; note-taking assistance, reader and transcription services; alternative media production; adapted computer labs; sign-language and real-time captioning; and liaison with faculty and community agencies. These services apply to students in both face-to-face and online classes, and appointments are available in person, by phone, or by Skype. In addition, DSPS offers specialized courses in strategies training, basic academic skills, lip-reading and hearing conservation, and adapted kinesiology (adapted PE). The DSPS Learning Disabilities Center offers free learning disability assessments to students who have never been diagnosed

with a disability, but who are struggling academically and want to determine if a learning disability is contributing to their difficulties.

Due to the increase in the disabled student population, DSPS services were required to hire additional faculty and staff. This growth created space constraints that made it extremely difficult to meet the service needs of students, so the College increased the facilities space available to DSPS. This additional space was added in multiple locations throughout the campus. Having multiple locations has created a barrier to access of services in a timely and effective manner. The College is aware of this issue; the long-range plan is to move DSPS into the Gateway Building after its completion.

Due to the size and topography of the campus, the College will always need to provide “on-campus” transportation for students with mobility issues. DSPS provides campus transportation by way of two golf carts (one cart is wheelchair accessible) between building locations, the parking lot, and the ACCESS bus stops, as well other areas on the campus.

EOPS/CARE and CalWORKs

EOPS/CARE and CalWORKs is committed to providing comprehensive student support services for EOPS/CARE and CalWORKs eligible students through the following services: career, personal, and academic counseling; priority registration; assistance with registration; book vouchers; assistance with scholarship applications; application fee waivers to four-year institutions; the Book Loan Program; Cap & Gown; cultural and social events; and extended tutoring services and grants.

The EOPS/CARE Program provides support services to those students who qualify for and are accepted into their program. Students can reach the program in person, by telephone, or online. The EOPS/CARE and CalWORKs Office is open daily, excluding weekends and holidays. All forms are readily available via the College's EOPS/CARE and CalWORKs website.

Counseling is the primary student support service offered to EOPS/CARE and CalWORKs students. Each program has its own eligibility requirements based on Title 5 regulations. In order to be eligible for the EOPS/CARE program a student must have an educational and socio-economic disadvantage and have completed less than 70 degree-applicable units. In order to be eligible for the CalWORKs Program, students must be CalWORKs or TANF recipients and have a Welfare to Work contract with the Department of Social Services. EOPS/CARE and CalWORKs students utilize personal, career, and academic counseling. EOPS/CARE and CalWORKs counselors develop comprehensive academic plans for students through the District's MAP software. Each student's MAP is reviewed and updated on a semester basis.

Follow-up services are communicated in person, by email or phone. EOPS/CARE students also have access to priority registration and can apply for associates degrees, vocational certificates, or occupational awards online through their MySite portal.

Financial Aid

The financial aid staff are responsible for the initiation, supervision, disbursement, and monitoring of funds provided by federal, state, and local government agencies in the form of

grants, employment wages, loans, and scholarships. Financial aid programs assist eligible students from all income levels, and specifically those students from low and middle-income families. All students have access to the application for financial aid online, as well as related forms. In addition, financial aid support is provided face-to-face, via email, or by telephone.

International Student Office

The International Students Office coordinates events on campus to promote global awareness and also cooperates with community organizations in international friendship programs. The office's website provides links to the international student application as well as information about activities and events. Students can interact with the College's International Student Program using Facebook, Twitter, and YouTube.

Student Equity Plan (SEP)

The College provides appropriate, comprehensive, and reliable services to all students. The College's culture of support strives to ensure equitable access to support services for all segments of the student population. The College uses a multifaceted approach to ensure this equitable access for all students. The College utilizes the Student Equity Plan (SEP) to support and move each student toward academic and personal achievement. Categorical programs, student equity, basic skills, and student success and support programs ensure students many opportunities to achieve this success. The College's SEP aligns with Objective 2.1 of the Strategic Plan which calls for "closing the achievement gap." The SEP focuses on increasing access, course completion, English as a Second Language (ESL) and basic skills completion, degrees and certificates, and transfers for all students, as measured by success indicators linked to the California Community Colleges Student Success Scorecard and other measures developed in consultation with local colleges. [2.0 SEP]

Student Success and Support Program (SSSP)

SSSP ensures regular evaluation of equitable access by meeting with the English, Reading, ESL and Math department chairs to conduct validations. The English, Reading, ESL and Math departments are currently preparing for implementation and validation of the new Common Assessment and reviewing multiple measures.

SSSP ensures that manipulation testing is available to remote students through the utilization of NCTA (National College Testing Association) to provide proctored assessment services to students who are out of state or outside of a 150-mile radius of the College. All other SSSP services, including orientation and advisement, are available online.

SSSPt can monitor, track, and study the use of online orientation and online advisement. As of March 2016, a satisfaction survey form is collected from students using NTCT. In addition, the SSSP coordinator is a member of the High School Partnership Council and receives regular feedback from area high school officials regarding the College' off-campus assessment service provided at area high schools.

Reliable SSSP services (orientation, advisement and probation) are available online. Out-of-the-area and out-of-state students are given the option to be proctored at a NCTA site throughout the United States and soon the College will offer the California Common Assessment; this means

that any student within California can test at any community college campus and their placement results will be available to the College through CCAssess.

The College discovered there is a need to offer off-campus assessment more than once at many area high schools. Due to the overall number of high school seniors requiring assessment and the College's current practice of capping test sessions to 50 students, the College will offer assessment at some of the larger high schools for a second time. In addition, the College discovered the need to return to high schools for additional testing sessions in order to meet the needs of students who required an evening test session due to extracurricular activities. This year the College is testing at local private schools, starting as early as October. The High School Partnership Program has improved relationships with neighboring parochial schools.

A greater effort is also being made to bring the College assessment to the broader community. A small working group made up of SSSP staff and discipline experts in English, reading, ESL, and math, are preparing a list of community sites—such as libraries, Boys & Girls Clubs, and military stations—where the College can host regular assessment testing sessions.

As a pilot test college for the Common Assessment Initiative (CAI), the College looks forward to bringing the Common Assessment to the community. We believe the CAI platform will be adaptive, mobile, and better suited for off-campus testing than the current exams—CTEP, MDTP, and CELSA.

Transfer Center

The Transfer Center provides equitable access to students through appointments, walk-ins, transfer-related workshops, computer application labs, transfer fairs, class visits, counselor call-backs, and counselor e-mail follow up through SCTCO. Students who meet with a counselor complete an academic plan (CAP). Counselors use their notes and documentation from appointments to facilitate continuity of services since, in many instances, the student will see more than one counselor in their community college career. Counselors who meet with the student after their Transfer Center appointment can use these notes, as can evaluators at the time of a given student's graduate transfer. The Transfer Center has extended hours from Monday through Thursday to accommodate students who are unable to access services during the day. The Transfer Center invites representatives from four-year colleges to visit the College's campus in person or to meet virtually with potential transfer students; both of these methods provide access to students who may not have the means to travel to prospective transfer campuses. The Transfer Center offers tours to each of the three local transfer options including UC, CSU and private institutions. In addition, there are counselors available in the Transfer Center with language proficiency in Spanish and Farsi. With the new SEP-funded CLASE Transfer Mentor Program, the Transfer Center also provides a bilingual/Spanish transfer information program for new students and their parents; this is an effort to provide equitable access to a population who is disproportionately impacted at our campus in the area of transfer.

VETS

The offering of VETS on the Camp Pendleton Marine Corps Base and via phone and online is advertised on the program website and communicated to students in the VA Office. These services are also promoted at the School of Infantry Joint Education Center.

ANALYSIS AND EVALUATION

The College provides equitable, appropriate, comprehensive, and reliable information and services to students using multiple methods to assure access for all students. The quality, reliability, and accessibility of all College student services are reviewed through comprehensive program review, annual updates, as well as annual student learning outcomes assessment. When additional needs are identified, new methods are developed and made available to students.

OBSOLETE

II.C.4: Co-curricular programs and athletics programs are suited to the institution's mission and contribute to the social and cultural dimensions of the educational experience of its students. If the institution offers co-curricular or athletic programs, they are conducted with sound educational policy and standards of integrity. The institution has responsibility for the control of these programs, including their finances.

EVIDENCE OF MEETING THE STANDARD

The College offers a wide variety of co-curricular and athletic programs that align with the College mission and provide expanded social, cultural, and educational activities for students. To ensure they meet College standards, all academic and student service programs—including ASG, athletics, and fine arts programs—are reviewed through the College PR/ASR process in the same manner.

Student Development

The Student Development Office's primary goal is to support student leadership and personal growth through the following: Campus Life activities, the Leadership Lab, Associated Student Government (ASG), and student clubs. The ASG participates in a student-driven leadership program that is an integral part of campus life and shared governance. ASG, in partnership with the staff of Student Development, is responsible for administering the annual ASG student elections and the SOCCCD Student Trustee Election.

All co-curricular activities adhere to state regulations as well as District policies and procedures. These include California Education Code and California Community College regulations governing eligibility to hold a student government office as well as board policies related to ASG organization, election of officers and student trustees, free speech, use of facilities, and student appointment to college committees.

ASG strives to meet the diverse needs of the student population by supporting student clubs and organizations on campus through the Inter-Club Council. In spring 2016, there were 40 recognized clubs covering a wide range of student interests. These clubs include Anime, Business, Gay, Straight, Alliance, Meditation and Mindfulness Realization, and Psi Beta and Psychology club. Students interested in forming a club must complete a Club Activation Form which includes acknowledgement the club will create and abide by a constitution and set of bylaws. All clubs must go through a short orientation as well as additional training in order to host off campus events, fundraise, and expend funds. All club applications are reviewed and approved by Student Development and ASG. These policies are designed to ensure the integrity of all co-curricular activities.

ASG sponsors events and programs that speak to students' interests and needs. Examples include the International and Diversity Student Council (IDSC), Taste of Saddleback, Red Cross Blood Drives, veteran student events, and a water fountain renovation campaign. Through the Campus Life Activities arm of Student Development, there are many activities and events available to students that foster campus engagement. These activities include the Game Lounge, weekly ping pong tournaments, free Moonlight Movie Nights, and monthly food trucks. The Leadership Lab, also overseen by the Student Development Office, offers a variety of workshops and live events—such as public viewings of Ted Talks on Tuesdays—created with the goal of building within our students a robust sense of leadership as well as

professional and personal development. The Leadership Lab provides workshops including Stress and Anxiety Relief, Franklin Covey's 7 Habits of Highly Successful College Students, Understanding and Practicing Growth Mindset, The Power of Motivation, and How to Make the Most of Your Twenties. ASG works collaboratively with faculty, departments, and divisions by providing funding opportunities for educational activities, such as guest speaker series and conferences fees. ASG Grant Assistance has funded specific activities including Day of Silence, Ability Awareness Week, International Film Festival, NSNA Convention, Science Lecture Series, Cheerleading Training Camp, Transfer Day, Women's Conference, Math Triathlon, and VETS Resource Fair.

ASG is funded through a share of the College bookstore sales, cafeteria/lodging sales, and Associated Student Body (ASB) \$10 activity sticker sales. ASG's finances are governed under board policy 5420. In 2015-2016, 60 percent of the operating budget was comprised of on-campus service contract revenue and the remaining 40 percent of the budget was derived from the sale of ASB activity stickers.

Athletics

The College's athletic programs are housed within the Kinesiology and Athletics Division with direct supervision and oversight by the athletic director/dean of kinesiology and athletics. Each sport program is offered as a for-credit educational course. Athletics has two financial sources: 1) an allocation from the College's general fund operating budget, 2) team fundraising. The College provides the budget for athletics, which includes allocations for transportation, equipment, meals, and officiating fees. Fundraising by each individual sport helps with additional supplies and other costs. The Kinesiology and Athletics Division also actively reviews its PR annually in preparation of the alignment of its annual resource allocation requests for additional funding for the program.

The College currently offers twenty intercollegiate sports programs throughout the academic year:

- Baseball
- Basketball, Men's and Women's
- Beach Volleyball, Women's
- Cross Country, Men's and Women's
- Football
- Golf, Men's and Women's
- Soccer, Women's
- Softball
- Swimming & Diving, Men's and Women's
- Tennis, Men's and Women's
- Track & Field, Men's and Women's
- Volleyball, Women's
- Water Polo, Men's and Women's

The sports programs adhere to the sport codes, policies, procedures, and bylaws established and administered by the California Community College Athletic Association (CCCCA), the SOCCCD Board of Trustees (Board Policy 5230), State Education Code Section 67360-67365, and Federal Register of Title IX. The CCAA maintains general oversight of all athletic sport programs in the California Community College System. Annual gender equity and financial reports are submitted to the U.S. Department of Education (Equity in Athletics Disclosure Act) and to the CCAA to provide statistics and information to the public. These reports are submitted in October and are inclusive of the prior year's activity within the program.

The CCCAA constitution, articles, and bylaws govern the integrity of student athletes. Student athletes must also follow specific rules and regulations as set forth by the CCCAA, including academic policies and integrity. All freshman athletes must be enrolled in 12 units during their season of participation. Of these 12 units, nine must be academic. Before playing their second season of competition, sophomore athletes must have passed 24 units, 18 of which must be academic, with a minimum GPA of 2.0. The CCCAA requires all staff who are directly involved with athletics—from the athletic director (AD) to the head and assistant coaches—to complete an annual exam regarding compliance with CCCAA articles and bylaws, and they must earn a minimum score of 80 percent.

Division of Fine Arts and Media Technology

The Division of Fine Arts and Media Technology offers a large number of co-curricular activities throughout the year geared toward providing students an opportunity to receive college credit while also receiving real-world experience. The division provides activities which include cinema and television production, art gallery shows, music performance, theatre performances, speech and debate team competition, and photography displays. The division plays a vital role in adding a social and cultural dimension, not only to the College, but to the community as a whole.

The Department of Theatre Arts produces several diverse performances each fall and spring semester. In addition, the department has the strong Summer Theatre program. During summer 2016, the program performed *Beauty and the Beast* and *Little Shop of Horrors*. The College also participates in the Kennedy Center American College Theater Festival. These co-curricular programs offer students and community members the opportunity to participate in and attend performances and productions. The Theatre Arts Department serves as an educational base, a vocational training ground, and an artistic resource for students and the community, and is a leader in performing arts in Orange County.

The Cinema program has been part of the College for more than 25 years and provides students “real world”/hands-on experience. The program submits productions each year to the Newport Beach Film Festival where the students have the ability to expand their impact to a broader audience. Additionally, students participate in the radio stations KSBR and OC Rock internet radio as well as Channel 39, a local television channel.

The Music Department has a comprehensive program and many co-curricular programs, such as concert and recital. These programs offer students and community members the opportunity to perform and/or enjoy music by students and professionals. The department has several performance groups made up of students, community members, and professional musicians, including Big Band, Concert Choir and Contemporary Vocal Ensemble, Jazz Lab Ensemble, Keyboard, Symphony Orchestra, and Wind Ensemble. Many of these groups will have the opportunity to perform with a nationally known artist.

One Book, One College

In spring 2016, the College held its first annual One Book, One College—a reading program designed to promote discussion and understanding of the broader issues we face, both locally and globally. The One Book, One College Committee selected the novel *Fives and Twenty-Fives* to be read across the campus by students, faculty, staff, and administrators throughout the semester.

Many faculty across disciplines chose to integrate the book into their courses. A robust series of community events were offered on campus related to the novel, including panel discussions, film showings, book readings, fine art exhibits, and artistic performances. The semester-long program culminated in a campus visit by the author, Michael Pitre, which was attended by over 400 students, faculty, staff, administrators, and community members.

This pilot project was funded by the College's general fund and a grant from the Associated Student Government. The College Foundation also created an account for the One Book, One College program, to which community members may contribute donations. Given the highly successful turnout of the program, the One Book, One College Committee is looking to institutionalize funding in order to continue the program annually. Funding requests for the program have been included in the College's resource allocation process.

ANALYSIS AND EVALUATION

Co-curricular and athletics programs offered at the College are appropriately aligned with the institutional mission and provide cultural and social experiences for students and the community at large. The programs are designed and offered to complement and enhance the educational experience of the students who participate. These opportunities play a vital role in connecting students to the campus community; this connection being a critical component in student success. These programs reflect the interests of students as well as those of local and surrounding communities.

II.C.5 The institution provides counseling and/or academic advising programs to support student development and success and prepares faculty and other personnel responsible for the advising function. Counseling and advising programs orient students to ensure they understand the requirements related to their programs of study and receive timely, useful, and accurate information about relevant academic requirements, including graduation and transfer policies.

EVIDENCE OF MEETING THE STANDARD

The College is committed to supporting student development and success by providing counseling and academic advising programs to orient students and ensure that they understand their program of study requirements. These programs also ensure that students receive timely, useful, and accurate information including graduation and transfer policies. Through the replacement of the Matriculation process with the new Student Success and Support Program (SSSP), the College has examined all processes and materials related to student progress from application to completion.

Virtual counseling services are available and accessible to all students from any location. To meet the needs of students who are not in the area, the College relies heavily on phone calls for academic and other counseling services. An increased number of counselors are using technologies such as Zoom to communicate with students. For out-of-area students, there is a need for a more standardized approach to student support. Currently, the Counseling Division is looking into a universal counseling platform for counseling services. The platform in use for this pilot is Cranium Cafe. The evaluation of services for Counseling for online students relies mostly on anecdotal evidence and reflective discussions amongst counselors. Some of the challenges with standardization have to do with the fact that Counseling has had three administrators within the past year.

Counseling Services

The Counseling Services Division provides academic, career, and personal counseling to support student development and success. The mission of the College's Counseling Division is to “provide current and prospective students with the counseling and instruction necessary to successfully reach their academic, career, and personal goals.” Counselors instruct counseling classes as well as conduct individual appointments, walk-in appointments, group counseling/advisement, workshops, and online advisement.

The College prepares counselors to be effective in academic, personal and career counseling. All counselors attend a weekly articulation meeting for critical academic updates and training regarding transfer policies. All new, part-time faculty receive one hour of training per week with a full-time counselor for the first semester of their employment at the College. In addition, a Friday training institute was created in 2015 to continually train part-time counseling faculty. The Counseling Division has a Crisis Intervention Team that works collaboratively with the Student Health Center and campus police to provide updates, in compliance with all related laws, about personal counseling practices and responding to students in crisis.

In addition, counselors are highly trained in MAP—an online academic planning tool utilized by all counselors in all departments of student services, which interfaces with ASSIST.org. Any counselor in any department of student services can view student academic plans. This connectivity allows for more accuracy and continuity in information dispersed to students by counselors. MAP ensures that students understand requirements related to their programs and academic goals. Students are able to access MAP remotely and are given the tools to understand, to read, and even create their own academic plans. Students are encouraged to have all plans reviewed regularly by a College counselor. Usage of MAP has grown dramatically in the past few years, enabling students to feel more confident about graduation and transfer policies. Since fall 2012, a total of 19,368 comprehensive academic plans have been completed using MAP. Over that same period of time, College students have created tens of thousands of additional MAPs.

Another way the Counseling Services Division has supported student development and success is through partnership with AVID for Higher Education. AVID was incorporated into freshman seminar courses (Counseling 140), and instructors for these courses collaborate with other faculty and support programs on campus to ensure student development and success. Since the inception of AVID at the College, AVID experts have trained counselors, tutors, and faculty across the campus in AVID's high engagement teaching and learning strategies. AVID for Higher Education is a model for student support and demonstrates the Counseling Services Division's dedication to providing comprehensive, timely, useful, and accurate information. According to the AVID for Higher Education Student Survey results: In fall 2014 and 2015, a research study conducted by Gibson Consulting Group, showed that those students who took courses taught using AVID strategies displayed higher percentages of retention of course content, skills and confidence, connection to peers and the college when compared to those students who took non-AVID courses. Analogous results were found between fall 2014 and 2015. [2.00 Tables]

Simply stated, students in sections with higher degrees of student-centered pedagogy and skill-building activities content are significantly more likely to feel that the course 1) improved their skills and 2) confidence that they will be successful in college. This information implies that instruction emphasizing research-based, student-centered pedagogy matters and resonates with college freshmen. Furthermore, when AVID-based content and pedagogy are present and student confidence levels are higher, students are more likely to make meaningful connections to other students in their classes; indicate a willingness to lead or participate in peer study groups; visit their professors during office hours; and make use of the campus tutoring centers; behaviors which all indicate higher attachment to the college or university.

Disabled Students Programs and Services

Disabled Student Programs and Services (DSPS) provides academic, career, personal, and disability management counseling to support student development and success. DSPS is committed to providing quality support services and specialized instruction, which enable students with verified disabilities to access and participate in all programs at the College.

DSPS counselors conduct individual counseling appointments, drop-in appointments, and workshops. Special Services classes provide resources for strategies and success.

Newly hired DSPS counselors are trained intradepartmentally in the process for verifying disabilities, providing appropriate education accommodations, and understanding Title 5 regulations. All DSPS counselors attend articulation meetings for critical academic updates and training regarding transfer policies, MAP, as well as on-going professional development opportunities. Additionally, all DSPS counselors and learning disability specialists attend weekly meetings for discussion of student concerns as well as department updates, etc.

DSPS students participate in the College's application and enrollment process and receive current and up-to-date information regarding transfer. All DSPS students can access DSPS counselors for academic planning as well as support for academic and disability-related challenges.

EOPS/CARE and CalWORKs

The EOPS/CARE and CalWORKs Program provide academic, career, and personal counseling to support student development and success. The Extended Opportunity Program and Services (EOPS) at the College is committed to the success and retention of college students. The EOPS Program is designed to assist students from educationally and socioeconomically disadvantaged backgrounds: "The goals of the EOPS Program are to prepare students to transfer to four-year universities, complete an Associate Degree or achieve a vocational certificate."

All EOPS students complete a Comprehensive Educational Plan during their initial semester of the program. This Comprehensive Educational Plan is important to the EOPS/CARE students and includes a long-term sequence of courses to be taken and a specific timeframe for course completion. This plan is not just a list of student course requirement. The plan is approved, with a signature, by both the counselors and the student. Furthermore, the EOPS/CARE and CalWORKs Program require that all counseling session be documented. This documentation is done through the new Student Informational System (SIS).

EOPS counselors are highly trained in assisting students from educationally and socioeconomically disadvantaged backgrounds. In addition to the requirements of a general counselor, according to Educational Code 56264, EOPS counselors must have also completed a minimum of nine semester units of college course work predominantly relating to ethnic minorities or persons handicapped by language, social, or economic disadvantages.

All counselors attend a weekly articulation meeting for critical academic updates and training regarding transfer policies. All new, part-time counselors begin with one full week of shadowing other EOPS/CARE and CalWORKs part-time counselors to assure that they are trained in the College's EOPS/CARE and CalWORKs policies and procedures. Part-time counselors are also highly encouraged to attend Friday institute counseling training.

In addition, EOPS/CARE and CalWORKs counselors attend CSU, UC, and private university counselors conferences to stay abreast of any changes that are occurring in the universities' admissions policies or articulation agreements. Counselors also attend an annual EOPS

conference to assure that they stay up-to-date with any changes that are occurring with EOPS/CARE across the state. All EOPS/CARE counselors are highly trained in the use of MAP. EOPS/CARE and CalWORKs students review their MAP regularly with their EOPS/CARE counselor.

Once admitted into the EOPS/CARE and CalWORKs programs students participate in mandatory EOPS/CARE and CalWORKs orientation. Students are familiarized with the EOPS/CARE Program policies and procedures; eligibility; the location and functions of the College and EOPS programs and services; the College Catalog; the application and registration process, with emphasis on academic and grading standards; college terminology, and course add and drop procedures and related rules.

Student Success and Support Programs (SSSP)

By increasing the length of counseling appointments from 30-minutes to 60-minutes, SSSP encourages students to participate in personal development activities. In-person advisement has been reinstated and is available to all College students. In addition, four full-time counselors have been hired, and SSSP is proposing to hire an additional three full-time counselors with preference for those counselors able to provide counseling services in Farsi and Spanish.

To maximize the number of available hours for students, part-time counselors are scheduled to work at their maximum allowable hours. Also, in an effort to maximize office space, counselors will be assigned to provide counseling appointments in instructional divisions and departments throughout the campus. Online counseling is available to students, using Zoom software and e-SARS, and additional online modalities are being explored. Counselors are mobile and provide services in high traffic areas, such as the Learning Resource Center and Library and the campus quad.

In an effort to help students make more informed decisions regarding withdrawal, the Talk Before You Drop counseling campaign has scheduled information booths across campus several weeks before the final class drop date. MAP Workshops are held each semester; students nearing the criteria for a Comprehensive Plan hold are sent a digital reminder to complete a MAP using Sherpa technology. High school seniors participating in Freshman Advantage Fridays receive targeted in-person advisement.

Categorical programs provide ongoing, targeted advisement for students participating in DSPS, EOPS, CalWORKs, and **S.T.E.P.S.** Veteran students also receive additional targeted counseling.

The steps being taken to increase the utilization of advisement includes intrusive advising, where counselors and student success mentors contact students in a variety of ways: Sherpa nudge emails, e-alerts through the student's college portal, text messages, and even phone calls. The new Student Success Dashboard, partially funded with SSSP funds, will be an improved student portal; each time a student logs in to their portal, they will see where they stand toward SSSP services completion, their units earned, their GPA, prerequisites, and how close they are to completing their intended educational goal.

Additional Counseling Services include:

- 60-minute counseling appointments
- Walk-in counseling appointments daily, 8:00 a.m. to 6:45 p.m.
- Online counseling appointments
- Weekly MAP Workshops
- Weekly small group, in-person advisement sessions (provided Saturdays, too)
- Spring semester Freshman Advantage Fridays (22 sessions)
- Week of Workshops (WOW) in August and January for students seeking to enroll last minute for the upcoming semester
- Mobile counseling in divisions, departments, the cafeteria, library, and student quad.
- College counseling appointments at local, feeder high schools in the spring semester, scheduled after the Counseling 100 class.

The probation process at the College consists of intrusive, direct counselor-student contact. In addition, a PB hold is placed on registration for students identified on first-time probation. To remove the PB hold, students are required to attend a 90-minute Probation Workshop. The workshop helps students identify strategies for improving their academic standing and develop plans for getting off of probation.

The Probation Workshop objectives are as follows:

1. Define and clarify academic policy in regards to academic probation and progress probation.
2. Identify issues students experience that lead to lack of academic success.
3. Create strategies that allow students to improve their academic standing.
4. Identify campus resources available to help students stay off probation.

A new proactive process to be implemented in the 2015-2016 academic year will send email messages to students with GPAs between 2.0-2.2. These messages will inform students of the consequences of falling below a 2.0 GPA and provide information on various student success resources (the LRC and other support centers) on campus.

District research monitors an ongoing probation report on College students. Using a student identification number, students' progress can be monitored as they work their way off of academic and progress probation.

Students are placed on dismissal after three consecutive semesters (not including summer) of probation. Students who are dismissed must take leave for a semester before they are able to submit an appeal for readmission. Once these students return, they are required to meet with a counselor and draft a plan for re-applying. The Academic Appeals Committee meets weekly to review each of the appeals. This committee is led by the dean of admissions, records and enrollment services and the dean of counseling, and is composed of both counseling faculty and instructional faculty.

Transfer Center

Counseling in the Transfer Center is conducted by the transfer center coordinator/counselor and by part-time counselors who are generally trained in counseling as well as specifically trained in:

1. Counseling related to transfer
2. Counseling related to the Honors Program
3. Grant-specific counseling for the Bridge to Engineering and Teacher Preparation Pipeline programs

The information provided to students and the policies the Tutoring Center interprets are dynamic and dependent upon a given student's transfer goals and transfer campus. In many cases, the College's students apply broadly to many campuses and systems, a method which increases their chances for admittance. For this reason, counselors in the Transfer Center must stay abreast of CSU, UC, out-of-state, and private institution admission, application testing, general education, and major requirements. With the assistance of the articulation officer, the counselor stay abreast of articulation agreements in order to appropriately advise students.

The coordinator/counselor meets weekly with the staff and counselors of the Transfer Center for training and updates. The coordinator/counselor also participates in monthly Region 8, Transfer Center, and Articulation meetings. These meetings provide updates from Region 8 universities including CSU, Fullerton; CSU, Long Beach; Cal Poly Pomona; and UC Irvine. This information is distributed to the counselors in the Transfer Center via weekly meetings and to counselors across campus through a weekly e-newsletter, *TC Weekly News*. The coordinator/counselor also participates in annual meetings with USC, UCLA and UCI and disperses information through training sessions, meetings and newsletters.

Transfer Center counselors are encouraged to participate in, and have funding available to attend, the annual CSU Counselor Conference, the UC Counselor Conference, the UC Ensuring Transfer Success Conference as well as other campus-specific conferences, such as the CSULB Counselors' Conference and the annual UCI Counselor Conference. Transfer Center counselors also take students on tours of local campuses which provide first-hand experiences to share with other students.

New counselors are mentored by 1:1 training with the coordinator/counselor, during which they observe a more experienced counselor during appointments and are then shadowed by a more experienced counselor or the coordinator/counselor until they have a solid understanding of their role and functions. The coordinator/counselor also seeks out training opportunities—such as webinars, reading materials and websites—for counselors to maintain their knowledge and keep current on transfer issues.

Counselors in the Transfer Center attend a weekly articulation meeting for academic updates critical to their roles. In addition, they participate in a monthly Counselor Forum with their peers in the Transfer Center to review any difficult counseling issues, to discuss these issues, and provide resolution and sharing of knowledge. Because all counselors cannot attend every professional development opportunity related to transfer, this time is also used for information sharing related to conference attendance, college tours, and webinar participation.

Students are oriented to transfer by participation in transfer workshops and through counseling appointments. Students are also invited to transfer fairs hosted on campus so they can meet with representatives from California, out-of-state, and international colleges. When students are ready to apply for transfer, they are invited to one of several CSU/UC Open Labs offered in the fall semester. At the open labs, students sit at a computer and work on their applications while counselors assist them with any questions, review their applications, and give them resources for their next steps in the process. These next steps include petitioning for degrees and certificates as well as planning for graduation and commencement ceremonies. After the filing period ends, the coordinator/counselor receives names of students who applied for a CSU Associate Degree for Transfer (ADT) and these names are placed into a Sherpa Profile by the senior transfer center specialist. The coordinator also receives the names of students who applied to a UC campus and gave permission to participate in a UC data sharing project. These students are also placed into a Sherpa Profile. The CSU-ADT students and the UC applicants are provided with timely and accurate information through Sherpa Profiles for events and programs related to their transfer goals. They are also sent reminders about deadlines related to transfer, such as their deadlines to submit supplemental applications, apply for housing, and make their deposits.

VETS

The VETS Program provides support services and acts as a bridge to external support services for student veterans, active military personnel, and their loved ones. VETS Program services include, but are not limited to: new student guidance, veteran counseling, scholarship and financial aid assistance, a link to the Veterans Student Council, Veterans Outreach, a venue for community-building, and more. The VETS Program hosts events aimed at reintegration into civilian and college life. The program has also developed counseling and other support services in an online format based on individual student need. Adjustments and modifications are made often to ensure that student veterans receive timely and accurate online support wherever they may reside.

ANALYSIS AND EVALUATION

The College provides comprehensive services at each step of the students' progress toward their academic goals. Counselors and advisors meet regularly to keep updated on academic requirements, graduation transfer policies, and other training to ensure student success.

II.C.6 The institution has adopted and adheres to admission policies consistent with its mission that specify the qualifications of students appropriate for its programs. The institution defines and advises students on clear pathways to complete degrees, certificates, and transfer goals.

EVIDENCE OF MEETING THE STANDARD

The College follows practices that are consistent with the District admission policy BP 5604, Admissions, approved by the Board of Trustees, and consistent to the mission of the College. This policy ensures that, unless specifically exempted by statute or regulation, every course is fully open to enrollment and participation by any person who has been admitted to the College. The College Catalog, available online, outlines admissions criteria.

Special admissions criteria are available for high school students and international students. Also, the College website and Catalog outline specific admissions criteria for vocational programs requiring special preparation, such as health occupations. The Associate of Science in Nursing Degree is an example of a program with specific admissions criteria. Special admissions criteria for this program can be found online and in the College Catalog.

Counseling Services

Counselors assist students in selecting clear pathways to complete degrees, certificates, and transfer goals through MAP. MAP enables students and counselors from all areas of the College—general counseling, DSPS, EOPS, VETS, Transfer, as well as college evaluators—to view the same academic plan. This ensures continuity of information. Students are able to access MAP online at any time, allowing DE students to stay as informed of their educational goals as traditional, in-person students. MAP provides a structure for all students, even those who are undecided about their majors, to begin working toward their academic goals. Undecided major workshops, career/personal counseling, and additional forms of support assist students who have not yet chosen a major.

Disabled Students Programs and Services

DSPS counselors assist students in selecting pathways to complete degrees, certificates, and transfer goals. These counselors utilize a variety of resources which include MAP, assessment and development of employment skills, and opportunities for disabled students with academic challenges to consider a variety of exit points that may include noncredit pathways. In conjunction with other support services and community agencies, DSPS is currently preparing other pathways for this population to transition to employment.

EOPS/CARE and CalWORKs

Using My Academic Plan (MAP), EOPS/CARE and CalWORKs counselors assist students in selecting pathways to complete degrees, certificates, and transfer goals. All possible pathways are communicated to a given student during their counseling appointment and then transferred onto the student's MAP.

Transfer Center

Counselors in the Transfer Center help students to choose their transfer pathway using ASSIST,

MAP and four-year institution websites. Counselors encourage students to complete an AA, AS, AAT or AST degree and CSU, GE or IGETC Certification (as appropriate) prior to transfer and show students how they can best utilize the courses they have already taken toward earning a degree. This is done through appointments and walk-ins as well as advising tools such as MAP, Associate Degree for Transfer worksheets, and the UC Transfer Pathways website. The College currently offers 19 Associate Degrees for Transfer, and faculty are developing more.

Additional Pathways

The College is actively involved in creating pathways for students whose goals include a degree, certificate, and/or transfer. The College works on and off campus with students to help them meet their goals. Students are provided information about each program in various ways including, print, online, and face-to-face communication.

CTE Pathways

The College provides disclosure information for each of its state-approved Career Technical Education (CTE) certificates. The College offers 100 certificates of achievement in 34 program areas. Current and prospective students will find information about the careers for which each certificate provides training on program webpages and on the College website, a site which also includes Gainful Employment Disclosure Statements and course requirements.

In 2014, the California Department of Education awarded Orange County Career Pathways partnership (OCCPP) a 15 million dollar California Career Pathways Trust grant. This grant will focus on three primary industry sectors: advanced manufacturing/engineering, healthcare/biotechnology, and information/communication technology/digital media. OCCPP is led by the College and the Orange County Department of Education (OCDE) and is the first countywide consortium to include fifteen Orange County school districts, nine community colleges, UCI, CSUF, regional occupational programs, workforce investment boards, Vital Link, and over 100 business and industry partners. In December 2015, the inaugural OC Pathways Showcase took place bringing together high school students, college students, and industry to display the regional collaboration and progress in pathway alignment. The State of California is looking at OCCPP as a possible regional curriculum model for the rest of the state.

CTE Transitions

CTE Transitions is a program designed to connect several educational organizations by means of formal articulation agreements. The Carl D. Perkins Career Technical Education Improvement Act (Perkins V) funds CTE Transitions at the College. The program allows high school and regional occupational program (ROP) students to take college-level courses that articulate with the College. Once the student transfers to the College, they will not be required to repeat courses that have been articulated. Currently, there are 119 articulation agreements, which cover 18 different subject areas, in our regional high schools. Starting in fall 2016, the Career and Technology Education Management Application (CATEMA) system will track students from high school to college or to the workforce. CATEMA provides a web-based program that can track enrollment, student completion, and employment outcomes. Initially, the funding for CATEMA will be made possible by the California State Chancellor's Office.

K-12 Outreach

The College has expanded outreach activities to all high schools in the area, and has created partnerships with Capistrano Unified School District (CUSD), Saddleback Valley Unified School District (SVUSD), and Laguna Beach Unified School District (LBUSD). The focus on high school partnerships began in 2009 with the creation of the outreach and recruitment position. By 2011, the College had begun developing the High School Partnership Program (HSPP), and in 2013 the College signed a memorandum of understanding with the CUSD and SVUSD. The HSPP seeks to improve postsecondary performance and increase enrollments by establishing a 360-degree partnership between the College, students, parents/guardians, and high schools that will help students prepare for success after high school. In support of the HSPP, the College participates in the High School Partnership Counsel where all public high schools in South Orange County meet monthly to discuss current issues.

Adult Education

Adult Education provides educational opportunities and services to guide adults toward a better quality of life. After the passage of AB86, and a year-long assessment, the College, in partnership with SVUSD, took on the administrative role of Adult Education courses in noncredit ESL, citizenship, and high school equivalency (HSE), and noncredit pathways to Career and Technical Education (CTE). At that time, the District received \$388,469 to help create the AB 86 South Orange County Regional Consortium, which includes the following colleges and school districts: Saddleback College, Irvine Valley College, Capistrano Unified School District, Saddleback Valley Unified School District, Laguna Beach Unified School District, Irvine Unified School District, and Tustin Unified School District. The consortium has developed working relationships with regional occupational programs/centers, local workforce investment boards, library literacy programs, Orange County Job Corps, and Orange County Department of Education. Many of the courses offered through the Adult Education program will lead a given student on their path to the College.

English Professional Learning Council

The English Professional Learning Council (PLC) began an intersegmental program in 2010 by reaching out to colleagues who teach English in area high schools, aligning curriculum, sharing teaching strategies, and working to better prepare high school students for a successful experience at the College. The 2015-2016 PLC project placed the College's English instructors in high school English classes, where they discussed the College's curriculum, matriculation process, and support services designed to assist students in their academic and career pathways.

Economic and Workforce Development (EWD)

The Economic and Workforce Development and Business Science Division prepares its students for employment, career advancement, and continuing education opportunities in accounting, business, computer applications, computer information systems, and real estate.

As a result of the changes in Economic and Workforce Development (EWD) over the last decade, the College has made a concerted effort to evaluate its role in the region vis-à-vis technological advances, globalization of markets, and demographic changes. A taskforce comprised of faculty, staff, management, and community developed the College's *EWD Plan*

2015-2020. The EWD Plan links CTE programs and other services throughout the College to the economic well-being of the community. To lead the EWD efforts in 2015, the College hired a new dean of economic and workforce development and business science, dean of advanced technology and applied science, and director of economic and workforce development.

The EWD Plan is organized around three themes: 1) student success, 2) community connection, and 3) regional leadership. One of the guiding principles for this EWD Plan and the College's EWD program is that "Saddleback students and graduates will be desired by employers in the region." The EWD program will assist students to identify career interests and goals, select a career pathway, and successfully complete a program of study leading to employment and/or higher degree.

Pathway to Law School 2+2+3

The College is one of 28 California Community Colleges selected to participate in a new initiative with the State Bar of California and the UC Regents. This initiative will provide students a pathway to six of California's most prestigious undergraduate universities and their affiliated law schools. The first group of students entered the program during fall 2016.

The Community College Pathway to Law School 2+2+3 Initiative (CCPLSI) is an unprecedented program created to enhance opportunities and advancement in the legal profession for diverse populations, particularly those populations that have been traditionally underrepresented in the legal profession. All students are welcome to apply and first-generation college students, veterans, underrepresented student populations and other nontraditional students interested in learning more about careers in the legal field are encouraged to participate. Pathway to Law School Scholars will spend two years at the College while completing their general education requirements and the CCPTLS curriculum. They will then receive special recognition for transfer to one of the participating undergraduate institutions to complete their bachelor's degree and again when they apply to a participating law school.

The following are participating undergraduate institutions and affiliated law schools: Loyola Marymount University and LMU School of Law, Santa Clara University and Santa Clara School of Law, UC Davis and Dinkler Hall (Davis) School of Law, UC Irvine and UCI School of Law, University of San Francisco and USF School of Law, and University of Southern California and USC Gould School of Law.

The program benefits include:

- Individual counseling and mentoring, including financial aid counseling
- Exposure to careers in law, service learning, job shadowing, internships and more
- Networking and learning opportunities, state-wide conference attendance
- Saddleback College Pre-Law Society and related events
- Academic and LSAT prep support
- Support of the Law School Admissions Council and DiscoverLaw.org
- Special recognition admissions review at participating undergraduate institutions and affiliated law schools

- Law school application fee waivers

Teacher Preparation Pipeline

The Teacher Preparation Pipeline (TPP) is a grant-funded program that identifies future teachers and gives them an opportunity to start their career pathway to teaching at the community college level. This program is designed to support students that are interested in K-12 education with a focus on STEM and CTE teaching. TPP students also have opportunities to participate in class observations, hear teaching related speakers during the What's Up Wednesday program, volunteer in elementary school classrooms, participate in STEM-related internships, and attend teaching conferences off campus.

TPP students receive support in the following areas:

- Academic transfer counseling specifically for teaching pathways
- Assistance with volunteer or internship placement
- Transportation to teaching conferences, university campus tours, and science-related programs

Health Science and Human Services

The Division of Health Science and Human Services at the College is a model of CTE programming, student success, and EWD working together to provide students career opportunities. Faculty mentors advise students on pathways to certificates, degrees, or transfer. The division has created several pathways to ready students for high-demand jobs.

In 2013, the College was awarded a \$2.75 million Trade Adjustment Assistance Community College and Career Training Program (TAACCT) grant funded by the United States Department of Labor. The grant's primary goal is to enhance current allied health career training programs and develop new programs in response to the changing health care industry. Through this grant, the division has focused on creating pathways to high-skilled and high paying jobs in the following areas:

- Health Care Career Transitions – Fast Track to Success
- Health Information Technology
- Medical Assistant
- Medical Lab Technician
- Transition programs: RN to BSN, HIT

Health Information Technology (HIT)

The HIT Program incorporates the disciplines of medicine, management, finance, information technology, and law into one curriculum. Due to this unique mixture, HIT graduates can choose from a variety of work settings across an array of healthcare environments. This program was developed to meet changing and growing demands in the health care industry.

In 2009, the Health Information Technology for Economic and Clinical Health Act (HITECH) was signed into law. The goal of this new law was to improve healthcare delivery and patient

care through Health Information Technology, an online environment. This law caused rapid change in the field and created a void of qualified employees. As a result, in 2010, the College applied for, and received, a \$378,000 American Recovery and Reinvestment Act of 2009, Health Information Technology Extension Program grant to create and offer an AS degree in Health Information Technology as an extension to the Medical Assistant (MA) Program. Initially the HIT Program was a part of the Medical Assistant Program and required 56 units to complete. However, in 2014, the HIT Program became a standalone program and reduced the total number of required units to 46. In March 2013, the program received accreditation from the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM).

Human Services (Division of Health Sciences and Human Services)

Human Services provides certificate of achievement awards in four career pathway areas and offers an Occupational Skills Award for Eating Disorders Studies. These programs are designed to educate and train students for careers in the treatment of substance use disorders, mental health, and the social services fields. All programs can lead to an associate degree and/or certificate of achievement.

The Alcohol and Drug Studies certificate program is accredited by the California Association for Alcohol/Drug Educators (CAADE). Students who complete the Alcohol and Drug Studies track are prepared and eligible to sit for the CAADE exam to become a certified alcohol and drug treatment counselor. This certification is required by the State of California for individuals who wish to practice in state-licensed alcohol and drug treatment facilities. The Human Services faculty are dedicated to supporting student academic and career success and providing guidance and support throughout the program. Information on the various pathways are both available online and provided by the faculty.

The following are the five Human Services certificate program areas:

- Human Services Generalist
- Alcohol & Drug Studies
- Community-Based Corrections
- Mental Health Worker
- Occupational Skills Award for Eating Disorders Studies

The Human Services Department hosts several important annual events, including an active Human Services Advisory Meeting comprised of community partners who serve as advisory members, faculty, current students, and alumni. In addition, Human Services hosts an annual Human Services Panel Presentation comprised of faculty, alumni, and community partners who provide students with information on employment trends, training, internship and volunteer opportunities, with an emphasis on continuing education. The College's Human Services Department and the Associated Student Government will sponsor the 26th Annual Red Ribbon Resource and Career Fair on October 26, 2016. The Red Ribbon event is attended by community partners and agencies that provide students and the public with training, internship, volunteer, and career information and opportunities, as well as community-based services. The first statewide Red Ribbon campaign began in 1985 when a DEA Agent, Enrique Camarena, was

killed by drug traffickers. The campaign was given the name Red Ribbon in 1987 symbolizing the on-going emphasis on drug prevention and the programs that embrace that idea. Red Ribbon is a nationwide campaign.

Human Services was recently awarded the Health Resources and Services Administration (HRSA) FY 2016 Behavioral Health Workforce Education and Training for Paraprofessionals and Professionals Award. The Human Services Department was one of only 34 awardees across the country to be awarded this federal grant. Funds from this grant will help increase access to and awareness of Human Services' unique Mental Health Certificate and related Human Services programs and will provide financial assistance to students to help them meet their educational and training goals.

Nursing Program

The College's Nursing Program is highly successful and is respected both locally and nationally. The Nursing Program is consistently ranked in the top 10 percent of all nursing programs in the United States, and is often in the top five percent. The faculty are dedicated, competent, compassionate, and creative nurses committed to the scholarship of the discipline. The Nursing Program prepares students for entry-level practice in nursing.

The Nursing Program currently has articulation agreements with nine universities that result in a bachelor's degree in nursing. The College also has agreements with two universities where graduates can continue on their education to obtain a master's degree in nursing. In addition, the College offers dual enrollment programs with CSU Fullerton (CSUF) and Vanguard University. Typically, 15 to 20 percent of nursing students are dually enrolled by the time they graduate from the College.

2+2+2 is a new program in development. This program provides seamless articulation from high school to the College to CSUF (Irvine Campus) and provides students with the opportunity to obtain a bachelor's degree in nursing four years after high school graduation. The program will be cohort based and students will identify as early as their sophomore year in high school. In their junior and senior years, high school students will complete prerequisite classes for the associate degree in nursing. After completing the two-year nursing program at the College, participating students will transfer to CSUF (Irvine) and complete their BSN requirements in the last two years of the program.

Emergency Medical Technician

Due to changes in EMT training at the national level, the College's Emergency Medical Technician (EMT) program was modified in 2012 from a 6-unit program to a 12-unit program. The program changes were accepted by the National Registry, and the program was reaccredited in 2022. An unforeseen consequence of the restructuring of the program was a decline in enrollment. This decline was due to the increase of required units from 6 to 12, which led to the loss of one section of the former 6-unit program. The ambulance companies who provide internships could not sustain the number of students for the increased number of hours of internship required by the new program. The EMT program is very successful and has a pass rate of over 80 percent, which qualifies student to take the National EMS Certification examination.

ANALYSIS AND EVALUATION

The College has adopted and adheres to admission policies consistent with its mission. The College regularly evaluates admissions practices to ensure that the student population appropriately reflects the District service area; the depth and breadth of programs offered at the College supports the open access mission of the community college. The College defines and advises students on clear pathways to help facilitate completion of degree, certificate, and transfer requirements. Information on certificates, degrees, and transfer pathways is available to students on the College website and in Counseling Services.

OBSOLETE

II.C.7: The institution regularly evaluates admissions and placement instruments and practices to validate their effectiveness while minimizing biases.

EVIDENCE OF MEETING THE STANDARD

As an open-access institution, Saddleback College does not utilize an instrument to determine student admission. The College admits students according to BP 5604, Admissions, based on California Education Code (76000). All applicants who have a high school diploma or equivalent, or who are 18 years of age or older, and who can benefit from instruction are admitted. The only exceptions to this admission policy are for international and concurrent enrollment high school students who must meet additional admission criteria. Currently, the College does not offer a fully online degree program, so no separate measures are used in admissions for online students.

In March 2016, Matriculation began using NCTA to administer matriculation/assessment tests to students in remote areas, a process that enables students to take tests without coming to the College. As of fall 2016, approximately 35 students have used this service. Students can learn about this option by contacting the Matriculation Office by phone or email.

The majority of students apply to the College using the (CCC Apply). Paper applications are also available upon request from the Office of Admissions and Records.

The application complies with legal and practical reporting requirements for the gathering of student demographic information. Since contracting with CCCApply, the application has been modified to capture relevant data, such as veteran information. Bilingual support is offered by phone, by email, or in person through the Office of Admissions, Records and Enrollment Services. The office lobby was recently modeled to provide ten internet-based computer workstations and printers for students to use for the online admission and registration processes.

As a part of the enrollment process, new students are assessed for placement in ESL, English, mathematics, and reading. Placement testing is offered year-round, on a drop-in basis or by appointment through the Matriculation Office. The placement assessment is administered electronically on campus. The College uses MDTP for math placement, CELSA for ESL placement, and CTEP for English and reading placement. Beginning in 2014, in preparation for a computerized common assessment, the College's English Department and OPRA conducted an internal validation to begin using a computerized version of CTEP for English and reading course placement. CTEP was already being used within the District, as CTEP was the placement test IVC faculty had validated. Additionally, Saddleback College and Irvine Valley College share prerequisite tokens within the student information system, MySite, permitting ease in cross-enrollment. The transition from Accuplacer to CTEP was relatively seamless. Third-party providers designed all of the College's test instruments.

New students are assessed for placement in ESL, English, mathematics, and reading as a part of the enrollment process. The placement assessment is administered electronically on campus. Off-campus paper-pencil tests are administered at all area high schools at least once a year.

The College uses only state-approved assessment placement tests. These tests are locally validated and have minimum cultural and linguistic biases. Validation studies are conducted by the subject matter department chairs and the Office of Planning, Research and Accreditation. All tests use multiple measures that are conducted through a student survey during the assessment session for ESL, English, reading, and math. Designated questions are weighted within the survey to emphasize assessment areas that have been identified as important to student success. The raw score plus the weighted scores are used to determine placement. These measures are incorporated electronically into all placements.

The College is a pilot school for multiple measures and has begun the conversion to use overall high school transcripts from local area feeder high schools for initial placement. For this effort, overall grades from sophomore and junior year will be analyzed. The Common Assessment would then become the challenge test for this cohort of freshman. Using the statewide multiple measures branching tree for placement would benefit our local area high school students as freshman. All research thus far suggests that moving in this direction would benefit all of our area high school students and, in particular, have a positive effect on our disproportionately impacted students.

All placements are accepted Districtwide as long as the placement courses are equivalent between the colleges. Colleges outside of the District must provide the same exams as the College to be accepted; additionally, students must turn in a full score report showing exam types, exam levels, and raw scores for every exam and placement. The College does not accept any placement test results from adult education programs. The College campus community eagerly awaits the new Common Assessment.

Re-test policies are explained verbally to every student when they leave the testing center. In addition, their testing packet also includes these policies in document format. Re-test policies are also posted on the Matriculation website. Students may retest every three months. Senior matriculation specialists meet with English, Reading, Math, and ESL department chairs to discuss retest policies regularly.

A ten-question student survey is included in both the placement exam for ESL placement and in the battery of placement exams for math, English, and reading placement. Each area has two to four questions that add additional points to the student's raw test scores. As a multiple measures pilot school for the statewide multiple measures project now joined with the Common Assessment Initiative, the College administered over 2,000 grit or self-efficacy surveys to students during the assessment process. After fall 2015 grades are received, a comparison will be made of a student's grit score (the number on the grit scale that indicates perseverance and passion for long-term goals) to their actual class completion. The hypothesis is that a student's grit score will be one predictor of their success in the classroom. This type of student information combined with predictive analytics will help the College provide more intrusive counseling to students at risk. A more comprehensive report on this study will be provided in the College's next SSSP update. The idea of helping students before they get into academic trouble is exciting and will benefit a large number of students.

In spring 2014, the English Department and OPRA conducted a validation on the CTEP Assessment instrument. These reports are kept on file in the SSSP/Matriculation Office and the District Research and Planning Office. Reports were prepared by the English Department chair and the district researcher.

Steps being taken to improve access and increase the availability of assessment to help meet the needs of first-time students include offering more evening and Saturday testing sessions and increasing the number of off-campus testing sessions. The most significant effort to provide greater access, however, will be the forthcoming opportunity to direct potential distance education learners to a local California Community College in their region where they will be able to take the Common Assessment.

Undecided students are contacted throughout the semester and directed to attend Undecided Major Workshops; beginning in spring 2016, Undecided Major Fairs will take place each semester for both daytime and evening students. The working group for the Undecided Major Fair effort will be spearheaded by instructional faculty from the College's Student Success Committee.

Students who receive a recommended placement in a basic-level writing course, rather than a college-level writing course, as a result of the initial assessment process and who wish to be considered for placement in college-level writing should take the Writing Sample Appeal. During the Writing Sample Appeal, students write an essay based on a prompt and passage provided by the Matriculation Office. An Appeals Committee will meet and review the Writing Sample Appeal within five working days. If the appeal is approved, the student will be allowed to enroll in the higher-level course. If the appeal is denied, the student will not be eligible for the higher-level course and will be dropped if prior enrollment was allowed. Appeal results are final and placement cannot be appealed again. Dates and times of the Writing Sample Appeals are available in the Matriculation Office or online at www.saddleback.edu/matriculation.

Mathematics Challenge Process

A student who seeks placement in a higher-level mathematics course than resulted from their assessment exam must turn in the High School Math Challenge Form and a copy of their high school transcript (not report card) to the Matriculation Office in Village 8-5. High school transcripts can be used as a challenge only after the student has completed the math assessment with the Matriculation Office or turned in alternative evidence for math placement.

A grade of "C-" or lower is not satisfactory, and courses taken at continuation schools, out-of-district schools, high school, summer, or adult education programs, are not accepted for this challenge.

Mathematics Appeal Process

A student who seeks placement in a higher level mathematics course than resulted from the usual assessment process, and who has been denied placement from the Math Challenge Process, may complete an Appeal Petition in the Mathematics, Science, and Engineering Division Office. The following documents must be attached to the Appeal Petition:

1. The student's high school transcript.
2. College transcript and college catalog description of each mathematics courses on the transcript.
3. The results of the appropriate Saddleback College mathematics assessment test.

Students seeking enrollment in MATH 353 must complete either the level 1 or level 2 mathematics placement test. Those seeking enrollment in MATH 205 or 253 must complete either the level 2 or level 3 mathematics placement test. Students who wish to enroll in MATH 7, 8, 10, 11, 112 or 124 must complete the level 3 placement test. Students must complete the level 4 mathematics placement test for all higher-level math courses.

An Appeals Committee will meet to review the Appeal Petition and supporting documents within five working days. If the appeal is approved, the student will be allowed to enroll in the higher-level course. If the appeal is denied, the student will not be eligible for the higher-level course and will be dropped if prior enrollment was allowed.

Any student who feels they have experienced discrimination regarding the matriculation process has the right to file a grievance. Information may be obtained in the Office of the Vice President for Student Services.

Common Assessment Initiative

The College is currently a grant partner in the third of a five-year statewide grant for the Common Assessment Initiative (CAI). This grant will total approximately four million dollars over those five years. With a primary focus on professional development for the CAI, the College's team has successfully completed project outcomes, maintained and exceeded required timelines, and implemented major steps in providing professional development to the 113 colleges in the state. Most of these outcomes have been achieved through a careful and inclusive collaboration with College team members (including faculty, staff, researchers and administrators) and the College grants office. Furthermore, over the past three years, the College's team has remained responsive to the project plan and needs of the state's colleges while engaging with other grant partners from Butte College, Cal-Pass Plus, and Educational Results Partnership to update, assess and evaluate outcomes for the Common Assessment Initiative Grant. Part of this engagement has entailed extensive participation in statewide workgroups, regional meetings, and steering committees; the team has engaged with stakeholders both at the College and at the state level to ensure the success of this project. Participation as a grant partner has been transformative for the College, which aims to implement multiple measures and a more accurate assessment process for students. The discussions and professional development related to piloting and partnering on the CAI aim to reduce unnecessary remediation as well as improve retention, persistence and completion for students. Finally, the College's involvement in the Multiple Measures Assessment Project (MMAP) has involved a multidisciplinary team from the College, including department chairs, matriculation and assessment staff, faculty, and administrators. The MMAP ties directly in to both the CAI and the basic skills grant, targeting placement, assessment, and focusing on transforming our current processes. The MMAP and CAI engagement are examples of successful implementation by College team members which

emphasize the College's ability to collaborate, transform current practices, and engage in a statewide dialogue with colleagues to understand and integrate best practices.

As a pilot college, Saddleback has participated in several rounds of item and field testing for the technology platform. The feedback and information gathered from students during this phase inform the entire Common Assessment mechanism during statewide implementation. College team members are able to see student outcomes based on the new test as well as comparisons for placement with the former test and multiple measures. These studies of student outcomes, conversations and acts of collaboration led to many changes in support services for students, such as the introduction of the Refresh program, a revisiting of multiple measures in mathematics, and even a proposal for the Level Up Basic Skills and Student Outcomes Transformational Basic Skills Grant, for which Saddleback was awarded 1.5 million dollars.

ANALYSIS AND EVALUATION

The College admissions and placement policies and practices are tied to Board Policies and Regulations and California Community College Chancellor's Office reviews. The College complies with the standards for admission required by California Education Code, Title 5. The admission application is free and may be submitted electronically using the online application system, in-person, or via postal mail using the paper application form. The College regularly establishes the effectiveness of placement instruments via rigorous validation studies, and ensures that issues of effectiveness, consistency, and potential for bias are addressed.

II.C.8 The institution maintains student records permanently, securely, and confidentially, with provision for secure backup of all files, regardless of the form in which those files are maintained. The institution publishes and follows established policies for release of student records.

EVIDENCE OF MEETING THE STANDARD

The College maintains student records permanently, securely, and confidentially, with secure backup of all files in accordance with BP 5615, Student Records, Compliance with Family Educational Rights and Privacy ACT (FERPA). In the Admission and Records Office, student records (for example, residency reclassification and academic petitions) are maintained permanently and securely in fireproof filing cabinets. These documents are also scanned and are purged according to retention requirements for class three disposable records. In addition, electronic student records are secured via the ImageNow and MySite systems. The District SIS database is the primary repository for electronic student information. District IT backs up this system up nightly, and the backup is electronically and securely transferred to a secure off-campus storage that is cloud hosted; backups are maintained for two months. Access to the files is limited and is based on employee's job classification.

The College continues to maintain hard copies of College student transcripts prior to 1981 in fire-protected vaults within secure mobile storage containers on campus property. Physical documents that are accepted by the Office of Admissions, Records and Enrollment Services are imaged on site using ImageNow. Employees gain access through the use of a username and password. The various documents imaged are assigned a document type. The level of access has been predetermined based on the employee's job description, for which there must be a legitimate educational interest expected for a person with specific responsibilities. Electronic documents are stored on a secured server in the District IT data center, and this server is backed up on a nightly basis. During 2012-2014, the College converted all applications and enrollment data being preserved and retained on microfilm and microfiche to digital images.

Students are issued randomly generated Student Identification numbers to protect their privacy and the security of their Social Security numbers. A student may change his/her password by selecting "Forgot my Pin" in the MySite landing page. The student then enters a Username or Student ID number. The Student is then prompted to answer the Secret Question he/she created. If the answer is correct, the student may enter a new Pin Number. Students can access their College records via MySite, the College's secure Web portal, with their unique user ID and PIN. Students requesting their records or completing enrollment transactions in person are required to present authorized photo identification.

All student records are securely maintained in the Admissions and Records Office. The College adheres to strict confidentiality standards, Title 5 and the Family Educational Rights and Privacy Act of 1974 (FERPA). Furthermore, all student services offices follow state and District mandates. The College publishes information on the requirements for the release of student records in the College Catalog, Financial Aid Student Handbook, the Student Handbook, and on the College website. The release of student records is in accordance with FERPA and District guidelines. Staff members participate in training on records systems and security as well as the protocols for confidentiality of records and for releasing information to students. Information

regarding release of student records is part of the New Student Orientation.

ANALYSIS AND EVALUATION

The College ensures a high standard for confidentiality, security, and maintenance of student records. The College publishes and follows established policies for release of student records and follows FERPA standards on confidentiality and release of records to parents, et al. Students can access their own records via MySite; using their unique ID and password, students can gain access to the system for much of their information. All College staff members who work directly with student records are trained in record confidentiality and security. The College publishes and follows established policies for release of student records.

OBSOLETE

Standard III: Resources

The institution effectively uses its human, physical, technology, and financial resources to achieve its mission and to improve academic quality and institutional effectiveness. Accredited colleges in multi-college systems may be organized so that responsibility for resources, allocation of resources, and planning rests with the district/system. In such cases, the district/system is responsible for meeting the Standards, and an evaluation of its performance is reflected in the accredited status of the institution(s).

A. Human Resources

1. *The institution assures the integrity and quality of its programs and services by employing administrators, faculty and staff who are qualified by appropriate education, training, and experience to provide and support these programs and services. Criteria, qualifications, and procedures for selection of personnel are clearly and publicly stated and address the needs of the institution in serving its student population. Job descriptions are directly related to institutional mission and goals and accurately reflect position duties, responsibilities, and authority.*

EVIDENCE OF MEETING THE STANDARD

Employment procedures at Saddleback College are administered by the South Orange County Community College District (SOCCCD) Office of Human Resources (OHR) consistent with law, board policies, and administrative regulations. Board policies (BP) and administrative regulations (AR) related to employment of personnel are developed by the Board Policy and Administrative Regulation Committee (BPARC), which is comprised of constituency representatives throughout the district. These board policies and administrative regulations describe in detail the employment procedures used to ensure the recruitment and hiring of highly qualified personnel. Policies and regulations are in place to standardize the hiring for all full-time faculty [IIIA-1] [IIIA-2], part-time faculty [IIIA-2a], classified personnel [IIIA-3], and administrators and managers [IIIA-4]. These board policies and administrative regulations reflect hiring processes that are specific to each position's role in the operation of the College. All hiring for permanent positions is conducted by committees that ensure applicants being considered for employment meet the qualifications outlined in the job descriptions and position announcement and that the most qualified applicant is offered the position. It is the responsibility of the College President to ensure the integrity of the recruitment and hiring processes at the college.

The qualifications for each job vacancy are linked to position requirements and responsibilities and to established standards. OHR establishes hiring criteria by matching position requirements and responsibilities to industry standards. For new classified and administrative positions, the job description content is drafted by the supervisor with assistance from OHR. The draft job description is reviewed by an outside consultant and

compared to the local labor market for comparable duties, salary, and minimum qualifications. Once the draft is formally reviewed and finalized, it is presented to the Board of Trustees (BOT) for approval. Job descriptions for classified staff, administrators, and classified management positions are posted on the job site. Job descriptions for faculty positions are developed by discipline experts within the field in accordance with Administrative Regulation 4011.1, Recruitment: Full-Time Faculty [IIIA-5] and reflect the job duties outlined in Board Policy 4309, Duties and Responsibilities of the Faculty [IIIA-6].

OHR uses various means to advertise college and district services job openings including internally (districtwide) and on various external sites. All job announcements are posted under the “jobs” link on the SOCCCD Web site and on the College cable television station. OHR maintains a high profile at the California Community College Registry job fairs and participates in many regional job fairs. Job openings are listed in the California Community College Job Registry, the “Chronicle of Higher Education,” major daily newspapers (as deemed appropriate), discipline-specific periodicals, and association publications. Job announcements and brochures are posted electronically as previously described and in print and include the position description, representative duties, education and experience requirements, compensation and benefits information, conditions of employment, required materials, and a description of the application and selection process.

All faculty and administrator hiring is made in strict compliance with the minimum qualifications for faculty and administrators as mandated by the California Community Colleges Chancellor’s Office [IIIA-13]. Moreover, the job announcements for all positions requiring expertise in online education, such as faculty positions and the dean of online education and learning resources, have language describing the required and desired experience and training in online teaching or administration.

The Office of Human Resources recruits for diversity by utilizing up to twenty-seven (27) different avenues to ensure access to employment opportunities. In addition, positions are advertised in specialty publications or websites directed towards underrepresented and diverse populations [IIIA-7]. The district’s Equal Employment Opportunity Plan serves as a recruiting guide [IIIA-8]. To ensure fairness in the recruitment and hiring process, OHR assigns a non-voting Equal Employment Opportunity (EEO) representative to each committee. OHR has conducted EEO training for managers at the colleges to streamline the committee information process [IIIA-9].

The employment procedures used to recruit faculty, classified staff, administrators, and managers vary, as described in the following sections.

Recruitment and Hiring of Full-Time Faculty

Administrative Regulation 4011.1 clearly defines the recruitment and hiring policy for full-time faculty [IIIA-1], and a college process to develop faculty position prioritization recommendations is consistently applied. Each year the college develops a list of faculty

positions to be filled through a defined process established by the Academic Senate [EVI]. First, a list of potential full-time positions are developed based upon analysis of identified program needs through the program review and college wide planning processes. Criteria include program accreditation considerations, student demand for classes, the ratio of full-time to part-time faculty in the discipline, and assessment of student learning. This list is subsequently prioritized by the Full-Time Hiring Prioritization Committee of the Academic Senate. The committee's recommendations regarding priorities for faculty positions are submitted to the College president, who determines the final list and forwards it the Board of Trustees for approval. Once a full-time faculty position has been approved, the appropriate division dean will submit a request to OHR in Workday, the district's enterprise resource planning system, to fill the position. OHR then appoints a human resources specialist to administer the hiring process for that position.

Each department approved for a new faculty hire forms a search committee of five to seven members, which generally includes the division dean, discipline faculty, and occasionally, classified staff. No fewer than three members of the committee must be experts in the academic or student services discipline of the recruited position. All faculty appointments to search committees are approved by the Academic Senate.

Search committees review applications for full-time faculty positions to rank applicants in relation to the required knowledge, education, and experience for the positions for which they have applied. Evaluation includes review of applications, cover letters, transcripts, curriculum vitae, and letters of recommendation. Based on this ranking, applicants are then selected for an interview and, depending on the position, a teaching demonstration.

Practices for determining whether an applicant is well-qualified in the field of online teaching varies across departments at the college. For all positions requiring online teaching, there is an emphasis on evaluating proficiency in online education. Evidence may include recent online teaching experiences, a teaching demonstration that showcase candidates' abilities to teach online, responses to open-ended interview questions that ask about best practices in online teaching, references from other institutions, online teaching certifications (such as the CONE or Quality Matters certificates), and prior mentorship from experienced online instructors. Hiring committees for full-time positions which include online assignments will also ask applicants about their background in online teaching, experience with various Learning Management Systems, and their ability to leverage various technologies during the interview.

After the conclusion of the interviews, the committee forwards the names of candidates that qualify for a second-level interview with the College President and one of the College Vice Presidents. Prior to the second-level interview, the chair conducts a check of professional references. The College President consults with the search committee chair and discipline experts after the second-level interviews and before any offer of employment is made. The College President makes the final selection of the candidate for recommendation for

appointment to the job. Before a candidate's name is forwarded for Board of Trustees for approval, OHR reviews official transcripts and verifies employment history.

Recruitment and Hiring of Part-Time Faculty

There is an AR for part-time faculty recruitment and hiring. Applications for part-time faculty positions are continuously accepted and OHR maintains a candidate pool for each discipline of those applicants who meet the minimum qualifications for the position. Division deans and department chairs can access the application materials in each candidate pool online when a part-time appointment is needed.

Due to the nature of part-time faculty hiring, the hiring process for part-time faculty varies among divisions. The department chair or the division dean (sometimes with other faculty members) interviews part-time faculty applicants. Part-time faculty must meet the same minimum qualifications required of full-time faculty and submit official transcripts prior to Board approval. Division deans make hiring decisions after appropriate reference checks have been conducted.

Recruitment and Hiring of Classified Employees

Board policy 4011.3 defines the recruitment and hiring process for classified employees, and a college process to develop the prioritized recommendations for classified positions is consistently followed [Classified Hiring Process, IIIA-10, IIIA-11]. In October 2015, the district implemented a voluntary pilot project for recruitment and hiring of classified employees as the first step in evaluating the current board policy for possible revisions [IIIA-12]. While funding for replacement positions remains with the department, funding requests for new positions follow a competitive process. New staff positions are requested by supervisors through the program and administrative review processes, and these requests are consolidated by the appropriate Vice President, who prioritizes and brings the requests to the College Resource Committee, which reviews them prior to forwarding them to Consultation Council, the College's main governance group for new discussion and ranking of new staff position requests. The Consultation Council creates one prioritized listing of classified staff. The President finalizes the list based on available funding and other factors and submits it to the Chancellor.

Following the approval of the prioritized list of staff positions, the hiring process is started through the submission of a job requisition to OHR through Workday. Applications for classified positions undergo a rigorous review process. OHR screens applications for completeness and to ensure all applicants forwarded to the committee for review demonstrate the minimum knowledge, education, and experience specified in the job announcement. The search committee chair has the option to be involved in the minimum qualification screening process. If the need arises, OHR will consult with the chair on matters of interpretation of minimum qualifications. The pilot classified hiring process enables the

committee to confer regarding interpretation of minimum qualifications required for the position.

Search committees are formed for each position and consist of three to seven members, which may include classified staff, managers, administrators, and faculty, where applicable. The application materials for all applicants meeting the minimum qualifications for the position are reviewed and ranked online on the district's employment site by committee members in order to determine which applicants will be invited for an interview.

A human resources specialist and the search committee chair determine the lowest score to qualify for an interview and the number of applicants to be interviewed. In the pilot process, search committee discussion forms the basis of determination about which candidates will be interviewed.

Interview questions are asked to determine whether candidates can accomplish the tasks required of the positions for which they have applied. For staff positions related to instructional technology in online education, for example, candidates' applications are screened for experience and education related to online education and additional questions are asked about their abilities and training as part of the interview. At the conclusions of the interviews and any subsequent discussions, each committee member determines a final interview score for each candidate. The pilot hiring process involves progressive ranking after the completion of each interview (i.e., no scores are nullified). Reference checks are made in accordance with administrative regulation guidelines, and second-level interviews are frequently conducted prior to submission of the recommended applicant to the president. This process ensures that the applicant who is offered the position is the most qualified to support the programs and services of the College.

Recruitment and Hiring of Administrators and Managers

Academic administrators have two basic requirements: (1) possession of a master's degree, as defined in "Minimum Qualifications for Faculty and Administrators in California Community Colleges" and in Title 5, Sections 53400-53430, and (2) meet the needs of the college in the position for which they are hired. This second requirement may include more-specific degree requirements, degree majors, or additional educational or experiences requirements as defined by the needs of the college [IIIA-13] [IIIA-14].

Minimum qualifications for all classified, or non-academic, managers are determined by the needs of the district. Education, experience, and job requirements are developed by OHR in collaboration with the hiring manager and refined by an external consultant with information provided by periodic classification surveys with other community colleges. In general, classified managers must (1) possess, at minimum, a bachelor's degree in a specialized area and (2) meet or exceed the experience criteria based upon the needs of the position.

The recruitment and hiring process for College administrators and managers is set forth in Board Policy 4011, Employment Procedures for Administrators and Managers [IIIA-4]. When the need for hiring a new administrator or manager is determined, the president makes a recommendation to the chancellor. Once approved by the chancellor, a job requisition is submitted to OHR through Workday. OHR advertises the open position and is responsible for maintaining the recruitment file and application materials for each position.

Search committees for administrator and manager positions consist of between five and twelve members. The majority of the committee must be administrators and managers, but the committee must also include one faculty representative appointed by the Academic Senate President, one faculty representative appointed by the SOCCCD Faculty Association, and one classified employee appointed by the California School Employees Association. As with other positions, applications are screened for meeting the job qualifications as specified in the description and ranked. Interviews are held with the most qualified applicants, and up to three finalists are forwarded to the president for a second-level interview. The president conducts the second-level interview, inviting others to attend, and makes the final selection for the position. Reference checks are conducted by the committee chair or designate, and OHR reviews transcripts and verifies the employment history of the top candidate before an offer is made.

ANALYSIS AND EVALUATION

The College follows established procedures for the recruitment and hiring of all personnel. The determination of positions to be filled is based on the institutional needs of the College, and processes are followed to ensure that the College attracts and hires only the most qualified individuals for each position.

The College and District have policies and procedures in place to ensure that it continues to recruit, develop, and retain the best qualified personnel available to deliver and support quality programs and services. OHR ensures adherence to the California Education Code, California Code of Regulations, Title 5, collective bargaining agreements, board policies, and administrative regulations in the hiring and recruitment of personnel.

A common concern at the College revolves around the time it takes to fill an open position. The hiring process for classified staff is lengthy, due in part to a backlog of open positions and OHR's ability to work through the backlog, and due in part to the many steps required by the process itself. In an attempt to reduce the time and to improve the recruitment process, OHR has reorganized and hired additional staff. OHR has also implemented several process improvements such as the online screening of candidates by the committee members. In addition, college and district administrators have visited with human resources professionals at other community colleges to learn about their hiring processes, and the college is currently engaged in a classified staff hiring pilot process in an attempt to streamline and shorten the hiring process.

2. *Faculty qualifications include knowledge of the subject matter and requisite skills for the service to be performed. Factors of qualification include appropriate degrees, professional experience, and discipline expertise, level of assignment, teaching skills, scholarly activities, and potential to contribute to the mission of the institution. Faculty job descriptions include development and review of curriculum as well as assessment of learning. (ER 14)*

EVIDENCE OF MEETING THE STANDARD

Saddleback College seeks to hire the most qualified faculty in all disciplines. In order to be considered for a position, applicants must meet the minimum qualifications or the equivalent as described in the position announcement and established by State law (Title 5, Sections 53400-53430) [IIIA-14]. The Board of Governors of the California Community Colleges, in consultation with the Academic Senate for California Community Colleges, determines the minimum qualifications for faculty and publishes them in their "Minimum Qualifications for Faculty and Administrators in California Community Colleges" [IIIA-13]. Applicants who do not meet the minimum qualifications for a faculty position as published in the position announcement may apply for equivalency in accordance with the California Code of Regulations, Title 5, Section 53420 and the California Education Code §87359 [IIIA-15]. Equivalency policies are detailed in Board Policy 4011.1 [IIIA-1].

Job descriptions for faculty positions are developed in accordance with Administrative Regulation 4011.1, Recruitment of Full-Time Faculty [IIIA-5] and reflect the job duties outlined in Board Policy 4309, Duties and Responsibilities of the Faculty [IIIA-6], which include curriculum development and assessment of student learning, as well as the specific requirements for knowledge and expertise within their discipline. Beyond the minimum qualifications, each job description includes a list required experience and desired qualifications for the position, which are determined by the discipline experts at the College.

The college currently utilizes an effective process for hiring that ensures content area expertise for faculty hiring of full-time positions. All hiring committees must include no fewer than three members who are experts in the academic discipline of the recruited position, and these may be drawn from District faculty and staff or from external sources if necessary. All faculty appointments are approved by the Academic Senate.

Instructors are hired for a broad range of skills needed within their discipline, which may include expertise in online instruction. Search committees review applications for full-time faculty positions to ensure applicants have the appropriate knowledge, education, and experience for the position, as outlined in the job description.

ANALYSIS AND EVALUATION

Saddleback College has been successful in hiring and retaining highly qualified faculty. This is due to the well-developed job descriptions that outline the qualifications necessary for employment and the rigorous processes in place for recruiting and selecting candidates, as well as to the desirability of living and working in south Orange County. Many College faculty hold positions of leadership in statewide and national professional organizations and shape and influence community college education beyond Saddleback College. The College has a long-standing preference for filling full-time faculty positions with individuals who exceed the minimum qualifications. In addition, many part-time faculty, particularly in career technical education, are practitioners who work in the community and bring their unique experiences to the classroom.

A good indicator of the quality and the expertise of our faculty is their length of service to the College and their educational preparation and training. Their markedly long service record is an indication of the stability and consistency the College has been able to maintain with regard to human capital. According to the OHR:

- Nearly 60% of our tenured faculty have been with the College more than 10 years. More than 35% have 20 years or more of service to the College, and 12% have more than 30 years of service.
- More than 10% of our part-time faculty have been with the College more than 10 years and 9% have been with the College more than 15 years. Six part-time faculty have been with the College more than 30 years.
- Of our tenured faculty, 61 (34 percent) have doctorates, and 20 (29 percent) of our probationary faculty have doctorates. It is important to note that none of our faculty positions require this advanced degree. However, as the data indicate, faculty in all categories exceed the minimum requirements for their positions. (IA-16)

Administrators and other employees responsible for educational programs and services possess qualifications necessary to perform duties required to sustain institutional effectiveness and academic quality.

EVIDENCE OF MEETING THE STANDARD

Academic Administrator's and Classified Managers Qualifications

Saddleback College seeks to hire the most qualified managers and administrators. In order to be considered for academic administrator position, applicants must meet the minimum qualifications or the equivalent as described in the position announcement, defined by the

California Code of Regulations, Title 5, Section 53420, and published by Board of Governors of the California Community Colleges in the document, "Minimum Qualifications for Faculty and Administrators in California Community Colleges" [IIIA-13]. The College also establishes required experience and desired qualifications for each position that above the minimum qualifications. These are described in the job announcement for each position.

Minimum qualifications for classified managers are contained in job descriptions developed by the OHR in collaboration with the hiring manager at the college. The College can also establish additional qualification in relations to education, experience, and job knowledge. These are described in the job announcement for each position. In general, classified managers must (1) possess, at minimum, a bachelor's degree in a specialized area and (2) meet or exceed the experience criteria based upon the requirements of the position.

Classified Employees' Qualifications

The qualifications for each classified staff position are linked to the position requirements and responsibilities and to standards established by the OHR. The Office of Human Resources establishes classified staff qualifications by matching the position requirements and responsibilities to industry standards. All classified position descriptions include minimum education and experience requirements, knowledge and abilities required by the position, and information regarding the working conditions, physical demands, and potential hazards, if any, related to the position.

Board policy requires the OHR to verify a prospective employee's educational or professional certification, experience, or any other prerequisites for employment [IIIA-1].

ANALYSIS AND EVALUATION

College administrators and other employees responsible for educational programs and services possess qualifications necessary to perform duties required to sustain institutional effectiveness and academic quality. The College develops job announcements that state all qualifications for positions, included desired qualifications, and adheres to established processes to ensure that only the most highly qualified individuals are hired.

4. *Required degrees held by faculty, administrators and other employees are from institutions accredited by recognized U.S. accrediting agencies. Degrees from non-U.S. institutions are recognized only if equivalence has been established.*

EVIDENCE OF MEETING THE STANDARD

The minimum qualifications for all positions describe both the required and desired educational credentials. All applicants for positions requiring higher education degrees are required to submit transcripts that indicate degree conferral. OHR reviews the validity of

each transcript and verifies educational degrees through the National Association of Credential Evaluation Services (NACES).

Individuals who have completed college or university course work or degrees at an institution in a country other than the United States must obtain a complete evaluation of foreign transcripts and degrees through a U.S. foreign transcript evaluation agency accredited by the State of California Commission for Teacher Credentialing such as Educational Records Evaluation Service and the International Education Research Foundation. The applicant bears the responsibility to complete and submit this evaluation. These evaluations are then verified by OHR. Degrees from non-U.S. institutions are recognized only if equivalence has been established.

ANALYSIS AND EVALUATION

The college follows appropriate procedures to ensure that all faculty, administrators, and other employees hold appropriate degrees. All transcripts and degrees listed on an individual's application are verified prior to hiring.

5. *The institution assures the effectiveness of its human resources by evaluating all personnel systematically and at stated intervals. The institution establishes written criteria for evaluating all personnel, including performance of assigned duties and participation in institutional responsibilities and other activities appropriate to their expertise. Evaluation processes seek to assess effectiveness of personnel and encourage improvement. Actions taken following evaluations are formal, timely, and documented.*

All personnel at the College are systematically and regularly evaluated through processes and procedures established by board policies, administrative regulations, and employee contracts. The evaluation process is overseen by OHR and all manager and administrators are responsible for ensuring that their employees are evaluated in a timely fashion. All employee evaluation reports and determinations are kept in the employee's personnel file, maintained by OHR. Employees have the right to provide a written response to his or her evaluation and have it placed in the personnel file. The evaluation procedures used to evaluate faculty, classified staff, administrators, and managers vary, as described in the following sections.

Evaluation of Faculty

Faculty evaluations follow the negotiated procedure described in the collective bargaining agreement between the District and the SOCCCD Faculty Association [IIIA-17].

Evaluation procedures for probationary (tenure-track), tenured, and part-time faculty members are defined in the 2015-2018 Academic Employee Master Agreement [IIIA-17].

The evaluation of probationary faculty is designed to serve two purposes: (1) to ensure that new faculty hires understand their responsibilities to the students, to the College, and to their own professional development and (2) to ensure that Saddleback College maintains high-quality instruction. Probationary faculty are evaluated annually throughout the four-year probationary period. The probationary faculty evaluation is a four-step process: The first step is a self-evaluation in the form of a portfolio. This is a new part of the evaluation process and allows the faculty member to include information regarding their accomplishments, course materials such as syllabi, and goals. The second step is the observation and report conducted by a tenure review committee (TRC). Each tenure track faculty member is assigned a TRC that follows the probationary faculty member through the probationary period. The TRC is appointed by the probationary faculty member's division dean, in consultation with the department chair, and comprises the dean and a minimum of two tenured faculty members from the department or from a related department. [IIIA-18]. The TRC also includes a faculty mentor who has a non-evaluative role and is expected to serve as the advocate for the needs of the faculty member during the probationary period. The TRC conducts scheduled classroom/worksite/electronic visitation(s) as needed and submits written comments to the dean. The third step in the process is student evaluations. The student evaluations are arranged through the appropriate vice president's office and are obtained in each class. The student evaluations are made available for the faculty member to review and may be utilized by the TRC as part of the evaluation process. The fourth step is the completion of the Faculty Performance Evaluation Report by the TRC. This report is based on the observations of the faculty member made by the TRC and well as other items relevant to the instructional duties assigned to the probationary faculty member, including, but not limited to, participation in curriculum development and review and in the development and assessment of student learning outcomes (SLOs). Any information included in the probationary faculty member's evaluation regarding participation in the curriculum or the SLO process must be verified and documented. The TRC meets with the probationary faculty members to discuss its evaluation report. If the faculty member's performance is judged to be unsatisfactory or needs improvement, the TRC will develop a plan of action, which includes follow-up activities, dates of completion, and measurable outcomes to address the issue. Following each evaluation, the TRC makes a recommendation of renewal or nonrenewal of the faculty member's contract. This recommendation is submitted by the dean to the appropriate vice president, who then reviews the recommendation and forwards his or her recommendation to the president. The president reviews the recommendation and forwards his or her recommendation to the chancellor. The chancellor reviews the president's recommendation, and in turn, forwards his or her recommendation to the board of trustees.

The purpose of the tenured faculty evaluation process is "to improve the teaching/ learning process and the delivery of student services, to provide a basis for professional growth and development, and to comply with California State Community College laws and regulations" [IIIA-19]. Tenured faculty members are scheduled for evaluation at least once every three years. Evaluation is a four-part process that includes a self-evaluation portfolio, student

evaluations, classroom/worksite observation, and a review report. The self-evaluation and student evaluations are conducted in the same manner as for probationary faculty. The observation is conducted by the division dean or designee, who then completes the Faculty Performance Evaluation Report.

The evaluator seeks to assess the faculty member's overall performance, including teaching ability, subject matter competence, participation in campus life, and whether the faculty member meets professional expectations [IIIA-20]. The evaluator holds a final evaluation conference with the faculty member during which all items in the evaluation process are reviewed. If the evaluator feels that a faculty member's overall rating is unsatisfactory and is not meeting the expected performance level, then a plan of action is presented to the faculty member which details the activity or activities for enhancement, the date of completion for each activity, and material which will be acceptable documentation of action completed. The faculty member will be evaluated again.

The faculty member being evaluated may also elect to have a second evaluation by a tenured faculty member of his or her choice. The second evaluation is intended for improvement of the faculty member, and it may become a part of the personnel file.

The part-time faculty evaluation process is also designed to improve the teaching/ learning process and delivery of student services, and to provide the part-time faculty member a basis for professional growth and development. Part-time faculty are evaluated once in the first semester of employment and every three years thereafter. The process followed is exactly the same as for a tenured faculty member and includes a self-evaluation portfolio, student evaluations, a classroom/worksite visit by the dean or department chair, and an evaluation report. [IIIA-21]

The format for evaluating online courses is described in the Academic Employee Master Agreement, which requires faculty who teach online to meet for at least 50 minutes with their supervisors to go over their online course. Evaluations make recommendations for improvement of online courses during the evaluation process, and faculty typically implement suggestions from peers and evaluators or through informal feedback.

The use of mentors, portfolios and meetings covers additional areas of growth and professional development, which would not typically be covered in a shorter, single observation. Faculty are evaluated in all areas, including preparation, effective instructional practices, outcomes assessment, and college service. Mentorships and interactions between colleagues also help to determine the effectiveness of personnel in performing their duties.

Through both formal evaluation processes and informal means, faculty are provided with opportunities to identify areas of improvement and participate in professional development to improve their teaching in both face-to-face and online courses or other areas of job performance.

Outside of the evaluation process, there are opportunities for faculty to improve their teaching skills in both face-to face and online classes. These include one-on-one meetings with professionals in the Faculty Center for Student Success, AVID workshops, Quality Matters sessions, and other professional development workshops. Faculty can also participate in committees that address teaching and learning. The Online Education Initiative has also offered some unique opportunities for faculty to improve their teaching methodologies in online education and to document evidence of effectiveness. The college currently serves as a pilot site for the OEI, and there are six OEI-engaged faculty members participating in varying levels within the pilot. These OEI-engaged faculty are reviewed and re-reviewed for improvement and are provided with ample opportunities to learn new skills, meet with instructional designers, and participate in workshops and training to improve their online teaching skills. The evaluation instrument, the OEI's Course Design Rubric, has been widely utilized and adopted in state level activities as promoting improvement and standards for effective teaching in online education, and the College is in the process of developing a new online teaching certificate based, in part, on this rubric.

Classified Staff Evaluation

Classified staff evaluations follow the procedures described in the collective bargaining agreement between the California School Employees Association, Chapter 586, and the District. [IIIA-22] The CSEA contract states that each permanent classified employee shall receive a written evaluation at least once every two years. New classified employees are placed on a 12-month probationary period. During this probationary period, employees are expected to be evaluated once during the initial six months of employment, and again prior to the end of the probationary period.

The OHR has developed a report, *Workday*, the college's enterprise resource planning tool that managers can use to determine when evaluations are due. OHR holds workshops on effective evaluation techniques. OHR receives all completed evaluations for inclusion in each employee's personnel file [IIIA-23].

The evaluation process provides a method for measuring employee performance based on the employee's classification standards and requirements as stated in the employee's position description. Managers provide guidance to staff in support of their daily work activities. Evaluations for academic administrators and classified managers can now be conducted in *Workday*, which allows for input by the supervisor and the employee [IIIA-24] [IIIA-25] [IIIA-26].

Once an evaluation is completed, the area administrator reviews the evaluation with the employee. When there is concern, the area administrator discusses strategies for improvement with the employee. Any negative evaluation includes specific recommendations for improvement such as a remediation plan and provisions for assisting the employee in implementing any recommendations made.

Evaluation of Police Officers

Classified employees holding those positions described as Campus Security Officer, Police Officer, and Police Officer Lead are evaluated using the procedures described in the collective bargaining agreement between the District and the South Orange County Community College District Police Officers Association (POA) [IIIA-27]. All officers on campus receive an annual written performance evaluation. New employees serve a one-year probationary period. During this probationary period, the work performance of the employee is evaluated by the immediate supervisor at three months, five months, and eleven months of employment.

Evaluations address those areas that need improvement and identify those areas in which an employee meets or exceeds police department standards. If necessary, the evaluation may also set forth an improvement plan developed by both the supervisor and the employee. The plan outlines specific steps that the employee can take to improve in the identified areas.

Evaluation of Administrators and Classified Managers

Board policy and administrative regulation 4090 govern the evaluation of academic administrators and classified managers [IIIA-28] [IIIA-29] [IIIA-30]. Administrators and managers are evaluated semiannually during the first year of employment and annually thereafter. The evaluation is completed by the immediate supervisor in Workday [IIIA-31]. These formal evaluations are designed for leaders to personnel to achieve and maintain high levels of work performance. The evaluation process begins with the establishment of mutually agreed-upon goals and objectives for the year, which set the benchmarks against which the employee's accomplishments will be objectively reviewed. If necessary, a remediation plan is provided for "needs improvement" or "unsatisfactory" marks on the evaluation form.

The completed evaluation is shared with the employee, forwarded to the College president and the chancellor for review, and transmitted to OHR.

ANALYSIS AND EVALUATION

College processes state that evaluations are conducted by the employee's immediate supervisor on a regular basis as identified in the board policy, administrative regulation, or employee contract. The college is challenged, however, to ensure that evaluations are conducted in a timely manner for all employees. While the College intends to provide timely and effective performance feedback to employees, this is currently a challenge because: 1) the due dates and current status of evaluations are not regularly tracked by the OHR and reported to the college; and 2) the time managers must take to conduct evaluations is significant. Evaluations of tenure-track faculty happen regularly in accordance with the faculty contract and the tenure evaluation form, but evaluations of other groups do not

happen systematically and at stated intervals. A suggestion to improve administrator evaluation practices by including broader input has been made but not adopted.

OHR has now developed a report for monitoring due dates for staff and faculty evaluations to assist managers and administrators to complete evaluations in a timely fashion. A majority of administrators and classified managers have been trained by OHR to use the FRISK (Facts Rules Impact Suggestions Knowledge) evaluation model for employee performance documentation [IIIA-32], and evaluation training has been provided in numerous sessions provided at College Management Team meetings and at District Administrators and Managers meetings [IIIA-33] [IIIA-34] [IIIA-35]. The College is currently collaborating with the OHR to refine and execute an improved process for tracking all evaluations to ensure they are conducted at stated intervals.

6. *The evaluation of faculty, academic administrators, and other personnel directly responsible for student learning includes, as a component of that evaluation, consideration of how these employees use the results of the assessment of learning outcomes to improve teaching and learning.*

Saddleback College is committed to student learning and student success. As part of their regular responsibilities, and in accordance with BP 209, Duties and Responsibilities of the Faculty, Saddleback faculty are required to engage in the assessment of student learning outcomes (SLOs) in all of their courses. Faculty, whether teaching face-to-face or online, are required to assess student learning. Counselors and librarians are also required to participate in SLO assessment as part of their responsibilities.

Faculty are evaluated, in part, on their compliance with the responsibility to evaluate student learning as part of the faculty evaluation process [IIIA-18] [IIIA-19]. The evaluation article in the faculty contract specifies that evaluation reports include information regarding participation in curriculum development and review and in development and assessment of student learning outcomes, and the evaluation instrument also includes this as one of the key ranking measures.

Administrators, classified managers, and staff who are closely linked to instruction, such as instructional assistants, recognize the role they play in student learning process and are involved in the development and assessment of either Student Learning Outcomes (SLOs) or Administrative Unit Outcomes (AUOs). Administrators and manager's work with staff and faculty in their areas to ensure that outcomes are being assessed and dialogue is taking place to lead to greater attainment of those outcomes. They also are responsible for evaluating faculty and staff in relation to engaging in SLO or AUO assessment and to set employee goals related to assessment of learning, where applicable.

SLO assessment is conducted at the department level and department chairs are required to lead faculty assessment and dialogue. When student learning does not meet the criteria set

by the department, department chairs facilitate discussion about needed improvements. Discussions about the how to improve learning outcomes come in many forms and lead to a variety of plans. Program reviews and SLO assessment result are gathered by departments, which include information on student success and retention rates, among other data. Dialogue also takes place outside of departments in various committees and workshops. For example, the Online Education Committee regularly discusses online course outcomes, and members dialogue and disseminate information related to benchmarks, best practices, and uses of assessment data to increase in student success measures in online classes. As a result of this dialogue and the analysis of assessment data, resources are developed as to assist faculty throughout the college. These resources include the creation of documents, such as checklists and best practices manuals, and professional development activities for faculty in collaboration with the staff at the Faculty Center for Student Success, an Online Educator program, the Online Education Summit, AVID online-focused workshops, for faculty have all been a result of these discussions.

ANALYSIS AND EVALUATION

The faculty evaluation process requires the participation of classroom faculty, counselors, and librarians in the assessment of SLOs. The faculty evaluation process as a whole is meant to assess how effective instructors are at facilitating teaching and learning, and the use of learning outcomes is seen as a key component of their effectiveness. The College has proactively addressed faculty members' participation in SLO development and assessment by making it a part of the evaluation for all faculty. During the evaluation process, the evaluator is asked to evaluate the faculty member's participation level in creating, assessing, and/or discussing SLOs. Most faculty members are now fully engaged in using the SLO assessment process to improve their instruction and student learning.

Methods of assessing SLOs and the discussion and analyses of the results vary from department to department; some departments and individual faculty members are more deeply engaged than others, and the EPA Committee strives to continually increase engagement levels. Nonetheless, all departments participate in discussions related to SLOs. Some of the most extensive discussion related to SLOs occurs in committees such as the Online Education Committee, Curriculum Committee, and the Educational Planning and Assessment Committee. Faculty members from various disciplines serve on these committees, sharing their experiences and insights and carrying the discussion back to their respective departments and college wide during professional development activities.

Administrators are asked, as part of their annual self-evaluation, to identify their accomplishments based on SLOs and AUOs in their division. The participation of classified managers and staff in activities related to SLO and AUO assessment is considered as part of their evaluation as well.

7. *The institution maintains a sufficient number of qualified faculty, which includes full time faculty and may include part time and adjunct faculty, to assure the fulfillment of faculty responsibilities essential to the quality of educational programs and services to achieve institutional mission and purposes. (ER 14)*

EVIDENCE OF MEETING THE STANDARD

The College maintains an appropriate number of full-time and part-time faculty to ensure the quality of its educational programs and services. Moreover, the College recognizes the importance of having as many full-time faculty as possible. The California Code of Regulations, Title 5, Section 51025, requires each community college district to employ a specified minimum number of full-time faculty. This requirement is expressed in terms of full-time equivalent positions and is commonly referred to as the full-time “faculty obligation number” (FON). Title 5, Section 51025, also requires community college districts to increase the number of full-time faculty annually in proportion to the amount of growth in credit-funded full-time equivalent students (FTES). In Fall 2015, the SOCCCD’s total Full-Time Equivalent Faculty was 381.2 for both Colleges in the District; this figure exceeds the full-time faculty obligation number (FON) of 366.8 for SOCCCD [IIIA-36].

It is generally recognized campus wide that a robust team of full-time faculty are needed to effectively carry out the work of the College, especially as faculty duties related to evaluating and improving student learning outcomes, student equity, and student success have increased. As such, the college maintains a full-time faculty number for classroom and non-classroom faculty that is above the FON required by the California Community Colleges Chancellor’s Office [IIIA-36] [IIIA-37]. College data show that from 2010 to spring 2016, full-time equivalent faculty have increased 5.5 percent while student enrollment was relatively unchanged [IIIA-38]. This increase in the number of faculty has enabled the college to ensure adequate faculty engagement with new requirements related to initiatives such as matriculation, student success, and student equity.

Staffing for full-time faculty positions is determined through a process that incorporates recommendations from the Faculty Hiring Prioritization Committee, which includes consideration of indicators of the sufficiency of faculty staffing levels contained in the program reviews, as well as analysis conducted by the college President that includes a broad view of the college’s mission and goals as well as fiscal considerations. Part-time faculty are hired on an as-needed basis to ensure that sufficient classes are offered in order for students to complete their programs of study in a timely fashion.

ANALYSIS AND EVALUATION

The College has a variety of practices in place to ensure that a sufficient number of full-time and part-time faculty are maintained to fulfill all the responsibilities essential to the quality of educational programs and services at the College. The Faculty Hiring Prioritization process uses institutional and program review (PR) data to identify faculty needs and to ensure that those programs with the most demonstrated need are ranked highest. The actual number of full-time faculty hired is determined by the President based on these demonstrated needs, on College priorities determined through planning efforts, on the requirements of maintaining staffing levels above the FON, and on the College budget. PRs increase the correlation between institutional planning and staffing decisions to provide an improved methodology for maintaining the appropriate level of faculty required to maintain the depth, breadth, and responsiveness of the College's quality programs and services.

Full-time faculty have a vested interest in the College and its students and contribute significantly to the success of its programs. Because of these factors, hiring more full-time faculty where needed has enhanced the quality and diversity of our program offerings [IIIA-1].

In all programs and services at the College, part-time faculty are utilized when needed to fill classes and meet counseling and library needs. Each department maintains a pool of part-time faculty that can be hired when the need exceeds the current number of part-time faculty within the department.

8. *An institution with part time and adjunct faculty has employment policies and practices which provide for their orientation, oversight, evaluation, and professional development. The institution provides opportunities for integration of part time and adjunct faculty into the life of the institution.*

EVIDENCE OF MEETING THE STANDARD

Part-time faculty at Saddleback College are seen as an essential component of student success and are, therefore, provided with all the tools necessary for their full integration into the life of the institution.

When hired, all part-time faculty at Saddleback College participate in two orientations. The first orientation is led by OHR prior to their start date and provides employment information on a number of important topics including benefits, policies, and procedures. The list of topics covered during this orientation includes contact information, designation of beneficiary, employment eligibility verification I-9, Title VII questionnaire, workers compensation, employee's withholding allowance certificate W-4, direct deposit, TB testing, parking permits, CalSTRS retirement, salary schedules, pay dates, verification of academic and occupational work experience, Workday, network access, MySite, employee benefits, optional benefits, the harassment policy and complaint procedure, HIPPA notice of privacy practices, safety, campus map, academic calendar, and the faculty employment agreement [IIIA-39].

The second orientation occurs within the department or division in which the part-time faculty member will be working. These orientations are typically led by the department chair and includes details regarding the actual assignment and College and division procedures and policies. This orientation typically includes course syllabus design, handling registration emails, managing the faculty profile, downloading class rosters, add permit codes, navigating MySite, ordering textbooks and other resources through the College bookstore, maintaining a voicemail box, audio/visual instructions, referral for student conduct violations, employee identification card, library services, tutoring services, copy center, Faculty Center for Student Success (FCSS) offerings and other opportunities for professional development, college committees such as the Academic Senate, and Faculty Association membership.

A third optional training is provided by the Faculty Center for Student Success. Part-time Faculty get one on one training on how to use Blackboard, create an official class website, and assistance with processes related to the aforementioned training topics (e.g. faculty profile, class rosters, etc.)

All professional development opportunities available on campus are open to part-time faculty, and they are encouraged to participate. At times, a stipend is offered to part-time faculty for their participation. Each year, the College offers nine full-days of professional development activities during the Professional Development (PD) Week that precedes the start of each semester. During fall PD Week each year, the President hosts a part-time faculty dinner and resource fair, where they are given information on how to effectively participate in the academic and professional life of the College.

In addition, through the Academic Senate part-time faculty can apply for up to \$600 to participate in outside professional development activities such as discipline-specific or teaching and learning conferences [IIIA-10]. Part-time faculty are encouraged to participate in college initiatives that frequently include professional development. These initiatives include AVID for Higher Education, grant-funded professional development (e.g. the STEM guitar workshop, Pennis-funded conference attendance, faculty externships), and categorically-funded professional development (e.g. through the Student Support and Success Program, the Basic Skills Initiative, and the Student Equity Plan). On-campus conferences open to both full-time and part-time faculty include a regularly scheduled CTE Conference, a Student Success Conference, and an Online Education Summit. Another professional development resources available to part-time faculty include workshops and one-on-one technical and online teaching training in the FCSS. The FCSS also maintains a website with significant resources available to part-time faculty including the *Faculty Guide to Online Education*, an effective online teaching rubric, and tips to increase student retention, among others.

Oversight of and assistance for part-time faculty is included in the job description of division deans and in the board policy on the duties and responsibilities of department chairs

[IIIA-41]. This oversight, which includes informal meetings, formal evaluations, and ongoing training and dialogue, ensures the highest quality of instruction and service by part-time faculty. As discussed in III.A.5 above, all part-time faculty are evaluated their first semester and every three years thereafter per the Academic Employees Master Agreement. The evaluation process is conducted through the division dean with assistance from the department chair. Part-time faculty are invited but not required to attend all division and departmental meetings and to become active in college committees. Moreover, the most recent faculty contract (2015-2018) incorporated payment for student consultation time into the part-time salary schedule.

ANALYSIS AND EVALUATION

As part-time faculty teach a significant number of classes at the College and provide valuable services to students in counseling and the library, the College recognized the need to fully-integrate part-time faculty into the life and culture of the institution. The college's employment practices provide a comprehensive orientation to the policies and practices of the College and District, professional development opportunities, ongoing oversight and assistance, and regular evaluation for part-time faculty.

9. *The institution has a sufficient number of staff with appropriate qualifications to support the effective educational, technological, physical, and administrative operation of the institution. (ER 8)*

EVIDENCE OF MEETING THE STANDARD

The College has processes in place to determine its human resources needs. As previously mentioned, the College follows a standardized hiring prioritization process for faculty and staff positions. These processes are designed so that information from program and administrative unit reviews, other institutional data, and College priorities are considered in the ranking decision. Needs for classified manager and administrator positions are also informed by administrative unit reviews and other institutional data; these positions are fewer in number and are not formally ranked through the college's resource allocation process but are vetted through the consultation council which is comprised of constituency group representatives.

Each administrative and student support unit on campus determines its staffing needs primarily through the AUR process. Classified staff, manager, and administrator requests are made through the College's resource allocation process and submitted into TracDat. During this AUR process, the need for classified staff is reviewed by considering department or unit needs and larger institutional needs and priorities as identified in the strategic planning process and the College budget. Needs are prioritized at the department/division level and then by the Vice Presidents of each area prior to being presented to the College Resource Committee for review. This is an annual process, which results in a funding for the position in the current year, deferral of funding to a future time, or non-funding.

The qualifications for each job vacancy are linked to position requirements and responsibilities and to standards established by OHR. OHR establishes hiring criteria by matching position requirements and responsibilities to industry standards. SOCCCD has established comprehensive practices to assure that qualifications for each position are closely matched to specific program needs and serve to support the goals of students. Job descriptions for classified staff, administrators, and classified management positions are posted on the job site. Human Resources technicians review all applications to ensure all applicants meet the position qualifications related to education and experience.

The table below shows the number of years of service for each employee; the personnel turnover rate at Saddleback College is low, and there have been very few terminations indicating a good match between new employees' qualifications and their job responsibilities.

Count by Employee	<1 Year	1-4 years	5-9 years	10-14 years	15-19 years	20 years or more	Grand Total
District Services	9	19	25	16	13	14	96
Academic Administrators			1	1	1		3
Classified Administrators and Managers	2	6	9	6	5	5	33
CSEA	7		15	9	7	9	60
Saddleback College	51	139	12	95	58	113	577
Academic Administrators	2	5	9	2	2		20
Classified Administrators and Managers	5	6	2	5		10	28
CSEA	29		64	44	25	51	273
Faculty CTA		66	44	43	31	50	249
POA		2	2	1		2	7
Grand Total		158	146	111	71	127	673

ANALYSIS AND EVALUATION

The college has a sufficient number of staff to support the effective educational, technological, physical, and administrative operations of the institution. Where staffing levels are too low, staff planning processes are in place to ensure that issues documented in AURs inform staff resource request approval processes. Hiring practices ensure that staff have the qualifications they need for their positions. While classified staff hiring processes seems to be slow, the college and OHR are collaborating to implement a pilot process to improve these processes.

- The institution maintains a sufficient number of administrators with appropriate preparation and expertise to provide continuity and effective administrative leadership and services that support the institution's mission and purposes.*

EVIDENCE OF MEETING THE STANDARD

Saddleback College's senior management staff includes the College president, three vice presidents, and an assistant vice president of institutional effectiveness. In addition to the senior staff, the College employs 15 deans and other academic administrators and 35 classified managers. This complement of administrators and managers provides the leadership and expertise needed to ensure that the College fulfills its mission.

The administrative structure of the College is informed by AURs and the College Resource Committee (CRC) process previously described. Administrative reorganizations, however, are subject to approval by the chancellor and the board of trustees. In the past year, the college created one new administrative position, the associate vice president of institutional effectiveness, in order to ensure leadership for several important college initiatives. The need for the position was identified in the appropriate AUR and was vetted through the College's shared governance process. Classified staff, faculty, and all leadership personnel had an opportunity to review and provide input on the recommended reorganization before the recommendation was forwarded to the chancellor and the board of trustees. A statewide comparison of the number of students per administrator shows that Saddleback College is ranked 52 out of 113 California community colleges by college size [IIIA-42].

The administrator recruitment and hiring processes outlined in sections III.A.1 and III.A.3 describe how the college ensures appropriate expertise among administrators. Saddleback College's Management and Administrative team has participated in an ongoing professional development series, "From Group to Team", which has supported the development of a cohesive management team at the college. The college was recently selected as one of the nation's "Great Colleges to Work For" based on a survey administered by the Chronicle of Higher Education. These survey results are an indication that the administrative team at the college is effective [IIIA-43].

ANALYSIS AND EVALUATION

Saddleback College maintains a sufficient number of administrators with appropriate preparation and expertise to provide effective leadership in support of the institution's mission and purpose. A statewide comparison of all districts indicates that Saddleback College has a median number of administrators across all colleges and districts in California. Administrators engage in ongoing professional development to ensure effectiveness.

11. *The institution establishes, publishes, and adheres to written personnel policies and procedures that are available for information and review. Such policies and procedures are fair and equitably and consistently administered.*

EVIDENCE OF MEETING THE STANDARD

The SOCCCD and Saddleback College strive for fairness and equity in all employment practices, and various policies and regulations are developed towards this end. A districtwide policy committee, the Board Policy and Administrative Regulations Advisory Council (BPARC), which represents all constituency groups, is charged with identifying and recommending all policies of the district, including those that are legally required by state and federal law and by the accreditation commission. The BPARC maintains a systematic and periodic review of all existing District policies to ensure that they are legally current and in accordance with the provisions of Title 5 of the California Code of Regulations. Draft policies and administrative regulations developed by BPARC are sent out for review by all constituent groups. When feedback is received, a final draft is developed by BPARC, approved, and then forwarded to the chancellor for review and submission to the board of trustees for approval and adoption. This is an ongoing process that ensures that existing policies are reviewed regularly and new policies are developed when needed in order to maintain the district's commitment to unbiased and impartial treatment of its employees.

Reporting to the vice chancellor for business services, BPARC is the consultative body for policies and regulations. The council is composed of the three district vice chancellors the vice presidents for instruction and vice presidents for student services from both Saddleback College and Irvine Valley College, a classified leadership representative, an academic dean from both colleges, the Academic Senate presidents from both colleges, the Classified Senate presidents from both colleges, the SOCCCD Faculty Association president, the CSEA president, , and ASG representatives from both colleges [BPARC- Committee charge and composition]. BPARC meets approximately every two weeks.

Support for BPARC's work is provided by the California Community College League's Board Policy and Administrative Procedure Service and by a consultant hired to oversee the process of board policy and administrative regulation revision and development. Through the league's policy and procedure service the District is provided with regular updates of any legal or regulatory changes as well as legal opinions that may impact district policy.

Board policies and administrative regulations are divided into seven series including bylaws, community relations, administration, business, human resources, students, instruction, and speech and advocacy. They are available to all employees on the District's website and through the documents link in MySite, the District's information portal [IIIA-44]. Board policies, administrative regulations, and collective bargaining agreements govern the personnel practices at the College and District. All personnel board policies and administrative regulations are located in the 4000 series on human resources. They are developed and widely disseminated to ensure that District policies and procedures regarding areas such as hiring procedures, equal employment opportunity, harassment and discrimination prevention, evaluation of employees, and resolution of employee complaints are applied fairly and consistently. The review and revision of board policies and administrative regulations for all human resource-related items is conducted by BPARC in collaboration with OHR as well as the various employee organization.

All hiring committees have an Equal Employment Opportunity (EEO) representative to ensure that selection procedures are applied fairly and consistently. EEO representatives are required to attend training prior to serving on the committee in this capacity. All employees who participate on a hiring committee are required to receive EEO training as well, and to complete confidentiality and conflict of interest statements prior to the screening and selection process. The EEO training outlines the laws regarding discrimination and the roles of the EEO representative, the committee, and the committee chair. A majority of Saddleback College administrators and managers and many faculty have completed EEO training and are able to serve in the capacity of EEO representative on hiring committees [IIIA-45].

In addition to board policies and administrative regulations, many personnel rules are contained within the negotiated collective bargaining agreements relating to specific categories of personnel. The following collective bargaining agreements are in effect:

- Faculty – Academic Employee Master Agreement 2015-2018 [IIIA-17]
- Classified Staff – CSEA Contract, July 1, 2012 – June 30, 2015 [IIIA-22]
- Police Officers – Police Officers Association Master Agreement, July 1, 2012 – June 30, 2015 [IIIA-27]

Grievance procedures, which deal with contract violations, are defined under the individual employee agreements [IIIA-27]. Procedures governing grievances procedures and appropriate forms can be accessed on the Human Resources page of the District's SharePoint site. OHR is responsible for ensuring that grievance procedures are consistently and fairly administered.

The SOCCCD Harassment Policy and Complaint Procedure Handbook, which outlines the various types of harassment that can exist and the procedures to follow if a student, employee, or third party believes that he or she has been harassed, is available to all on the District's website [IIIA-46]. An *Unlawful Discrimination Complaint Form* is also available on the website.

Questions about existing policies and regulations can be referred to appropriate administrator for clarity or directly to the OHR. OHR staff routinely address a range of questions regarding policy application with the goal of consistency in application and administration.

Changes in policies and procedures that are pertinent to specific employee groups are communicated to administrators and relevant employee organization, who, in turn, communicate information about the updated policies to employees.

Policies concerning discrimination, sexual harassment, and equal employment opportunity, and reporting procedures, exist in board policies and administrative regulations 4000.4

[IIIA-47], 4000.5 [IIIA-48] [IIIA-49], and 4000.6 [IIIA-50]. Training in prevention of discrimination and harassment is required of all administrators and managers, and is held regularly during the College's PD Week. Equal employment opportunity training is available to all employees, and is required for EEO representatives serving on hiring committees.

ANALYSIS AND EVALUATION

Personnel-related board policies and administrative regulations are systematically developed and updated on an ongoing basis through a consultative process that includes a constituency groups to ensure the policies are fair and in accordance with law and collective bargaining agreements. All personnel policies are currently either up-to-date or are in the revision process.

Board policies and administrative regulations are posted on the District website and are also available to all employees through MySite. The District is quick to follow up on any known or reported policy violation, and investigates if necessary.

12. *Through its policies and practices, the institution creates and maintains appropriate programs, practices, and services that support its diverse personnel. The institution regularly assesses its record in employment equity and diversity consistent with its mission.*

EVIDENCE OF MEETING THE STANDARD

The College demonstrates its commitment to equity and diversity through its board policies and administrative regulations, its hiring practices, its grievance, complaint, and problem solving practices, and campus initiatives and activities for employees and students.

Moreover, the College's values statement, the Student Equity Plan, the Staff Development Plan, and Associate Student Government programs, among others, reflect the equity and diversity tenets addressed in Board policies and administrative procedures. The district's updated Equal Employment Opportunity plan is instrumental in support staff diversity.

Board policy 4010, entitled "Commitment to Diversity," sets the tone the entire District in relation to this commitment. It reads:

The District is committed to employing qualified administrators, faculty, and staff members who are dedicated to student success. The Board recognizes that diversity in the academic environment fosters cultural awareness, promotes mutual understanding and respect, and provides suitable role models for all students. The Board is committed to hiring and professional development processes that support the goals of equal opportunity and diversity, and provide equal consideration for all qualified candidates [IIIA-51].

These ideals are contained within many of the board policies that deal with fair employment practices, harassment and discrimination prevention, conflict of interest prohibitions, academic freedom, speech and advocacy, and student equity.
