In addition, the SOCCCD Equal Employment Opportunity Plan, 2016-2019, reflects the district's commitment to these principles in its hiring practices [IIIA-52]. SOCCCD does not discriminate in employment on the basis of race, color, ancestry, national origin, religious creed, sex, physical handicap, medical condition, age, sexual orientation, or marital status and is subject to Title IX of the Education Amendments of 1972, Title VII of the Civil Rights Act of 1964, as amended, Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, and California Labor Code 1102.1 [IIIA-53]. It is the district's policy to ensure that all qualified job applicants have full and equal access to employment opportunities and are not subjected to discrimination in any District program or activity. The District has an Equal Employment Opportunity (EEO) officer, who is also the Assistant Director of Human Resources. The EEO officer is responsible for ensuring that hiring committees comply with board policy and with established hiring procedures so that applicants receive fair and equitable treatment. The district's EEO Officer compiles and analyzes data related to applicant pool and workforce composition to monitor plan effectiveness and inform plan revisions [IIIA-54] [IIIA-55].

Moreover, all permanent positions require that applicants show "Evidence of sensitivity to and understanding of the diverse academic, socioeconomic, cultural, disability, and ethnic backgrounds of community college students," and this statement is contained on all job announcements.

The College's commitment to recognizing and addressing the importance of equity and diversity is demonstrated by the College's values statement, which guides the implementation of the College Mission Statement. One of the values listed in the statement is "inclusiveness," which holds that "we cultivate equity and diversity by embracing all cultures, ideas, and perspectives" [IIIA-56].

College initiatives such as the development of the Student Equity Plan engage students, faculty and staff from across the college in discussions about diversity issues and the development of action plans to outreach to underrepresented populations and serve students from various backgrounds. These discussions have referred to the need to support diverse personnel as part of a student engagement strategy. Other practices that support the college's diverse personnel include the participatory governance structure, grievance procedures, and a new problem-solving workgroup that provides support for addressing numerous issues that may arise in a diverse workplace.

ASG also financially supports campus activities, group projects, and a variety of events each year that support cultural diversity. Additionally, faculty and staff are invited to apply for grant funding for their own projects [IIIA-57]. The student clubs that foster appreciation of

different cultural experiences include Appreciation of Pilipino American Culture (APAC), the Black Student Union, the Campus Crusade for Christ, the Christian Students Club, the Gay & Straight Alliance, the German Club, the Latin American Film Club, Latter-Day Saint Students, and the Muslim Student Union [IIIA-58]. Through the efforts of the International Student Program Office, the College makes every effort to integrate the international student population into campus life [IIIA-59].

The Academic Senate also has an Equity and Diversity Committee that address diversity programing, teaching about diversity, recognizing different needs within a classroom, and hiring for diversity. This committee has been inactive for the past several years, but is in the process of being reformulated and revitalized.

ANALYSIS AND EVALUATION

Saddleback College and the SOCCCD support diversity on an ongoing basis. The District and College have established policies to address equity and diversity issues for all employees and students of the College. The policies are applied consistently and fairly. [IIIA-60]

The District is committed to administering hiring and staff development processes that support both equal opportunity and diversity and that provide equal consideration for all candidates as required in Federal and State law.

College faculty, staff, administrators, and managers recognize and celebrate diversity through various programs and within classes. Each year employees participate with ASG in the planning and execution of Multicultural Week and departments hold a variety of activities that deal with diversity issues such the Teach-in On Islam, Dia de los Muertos events, etc.

13. *The institution upholds a written code of professional ethics for all of its personnel, including consequences for violation.*

EVIDENCE OF MEETING THE STANDARD

The District and the College have written policies that provide standards for ethical conduct of its personnel to encourage them to conform to such standards as stated in Federal and State laws and by professional educational organizations. These policies also delineate processes for resolving internal disputes in a collegial and ethical manner.

The Board of Trustees sets standards for the conduct of its own members through Board Policy 110, Code of Ethics – Standards of Practice, for Members of the Board of Trustees [IIIA-61]. Additionally, the Board's prohibitions against divided loyalties (e.g., financial interest in contracts and holding incompatible offices) and the requirements of disclosure of certain economic interests are addressed in Board Policy 154 and Administrative Procedure 154, Conflict of Interest [IIIA-62]. All designated employees must abide by Administrative

Regulation 4000.9, Conflict of Interest Code [IIIA-63], which stipulates that must not make decisions based on their own financial interest or of their relatives or business associates. Together, these policies and procedures embody the institutional Conflict of Interest Code required by California law.

Each College employee group has a code of ethics:

- Administrators and Managers are expected to abide by the South Orange County Community College District Administrator and Manager Statement of Ethics [IIIA-64]
- Faculty are expected to abide by the Academic Senate's Faculty Code of Ethics and Professional Standards [IIIA-65].
- Classified staff are expected to abide by the CSEA Code of Ethics and Classified Senate Code of Ethics [IIIA-66].
- The Police Officers are expected to abide by the Law Enforcement Code of Ethics Statement [IIIA-67].
- Students are expected to abide by the Student Code of Conduct as printed in the student handbook, and the Associated Student Government Code of Ethics [IIIA-68].

Any unethical behavior is addressed through management and administration, through the evaluation process, or through specific procedures outlined in local policies and administrative regulations.

In addition, all constituents of the College, including students, staff, faculty, and management, worked together on a joint "Statement of Mutual Respect and Collegial Behavior," as described in I.C.8 above, and, in January 2016, Consultation Council approved an "Interpersonal Conflict Resolution Recommendation" that encourages all employees to participate in "professional development and training on topics including interpersonal conflict resolution, abusive conduct, effective communication, and pertinent state and federal legislation, local policies, and administrative regulations." The goal is for the recommendation to be a living document that fosters an environment of professional development, communication and collegiality. Administrators will be reminded at least annually to share, distribute and discuss the guidelines with their staff and faculty. [EVI]

ANALYSIS AND EVALUATION

While the College does not maintain a single college wide code of ethics pertaining to all employees, each constituent group maintains its own code of conduct [IIIA-70] [IIIA-71] [IIIA-72]. In addition, the College has reinforced the expectation of ethical behavior through dialogue resulting in the joint "Statement of Mutual Respect and Collegial Behavior" and "Interpersonal Conflict Resolution Recommendation." [IIIA-73]

14. *The institution plans for and provides all personnel with appropriate opportunities for continued professional development, consistent with the institutional mission and based on evolving pedagogy, technology, and learning needs. The institution systematically evaluates professional*

development programs and uses the results of these evaluations as the basis for improvement.

Both Saddleback College and the SOCCCD recognizes the importance of professional development for all its employees, as evidenced in the fact that one of the primary objectives in the 2014-2020 integrated strategic plan is to “increase professional development that potentiates employees’ talents and interests” (Objective 1.4). In order to meet this objective, numerous professional development opportunities are available for employees of all classifications. These include opportunities made available within the District and at the College, as well as the provision of funding for external professional development opportunities. Wherever possible, professional development offerings and activities are linked to the College’s mission, vision, and values [IIIA-56] [IIIA-69].

Each year, the College holds a PD Week, sometimes referred to as “Flex Week,” prior to the start of the fall and spring semesters. As part of the state’s flexible calendar plan for the promotion of professional development, the District’s academic calendar is able to devote nine of the required 175 annual teaching days to professional development. The Faculty Development Flex Committee of the Academic Senate oversees the planning and implementation of PD Week activities [IIIA-74]. Ideas for activities are solicited from the college community and through an employee survey, results from surveys taken during previous professional development activities, and discussions during the Academic Senate and other college committee meetings. Although organized through the Academic Senate, PD Week also includes a variety of activities for classified staff, managers, and administrators as well.

Per the faculty contract, all full-time faculty are required to participate in professional development activities for a minimum of 38 hours during each academic year [IIIA-75] [IIIA-20]. Faculty may elect to participate in the College’s PD Week to earn these hours, through other opportunities that are offered throughout the year, or through attendance at an external conference related to their assigned duties. Faculty can also apply to undertake and complete an individual project related to staff, student, or instructional improvement. To receive credit for outside conferences or individual projects, the faculty member must complete an evaluation form demonstrating how this activity benefited the individual and/or the College. This form is reviewed and approved by the Faculty Development Flex Committee, if credit is granted [IIIA-76].

The College Academic Senate, the faculty association, and OHR jointly present an orientation program for new full-time faculty during PD week and notify them of this obligation. Additionally, all probationary faculty are expected to provide documentation to their Tenure Review Committee (TRC) that they are actively maintaining currency in their discipline through professional literature, professional memberships, workshops, conferences, or other activities.

In addition to PD Week, various professional development activities are held at the College throughout the year. These include the Institute for Teaching and Learning workshops that focus on teaching and learning strategies, workshops or one-on-one sessions in the FCSS focusing on online teaching, AVID workshops, a CTE Conference, a Student Success Conference, and an Online Education Summit, among many others.

The college supports various professional development opportunities related to online education. In the past, faculty received reimbursement for completing a six-course online educator sequence, which was an in-house program for instructors interested in building their skills as related to online instruction. This program was eliminated after the state developed a similar program through @ONE. Faculty are now encouraged to complete this sequence of courses. However, the lack of an in-house training program has become evident, and the Online Education Committee is currently developing a 10-week certificate program in online instruction to be offered beginning in spring of 2017. Most faculty who teach online continue to be trained on a one-on-one basis with the staff of the FCSS. The center has three instructional technologists on staff to assist faculty in all stages of online course development and refinement. FCSS also offers numerous workshops on online instruction tools and technologies, in addition to other instructional technologies, throughout the year. PD Week offers a host of skills-based workshops and opportunities for faculty to learn about best practices in online education, including new technologies, Canvas, and online teaching pedagogies. AVID offered online education-focused workshops for faculty during the 2015 year, and Quality Matters offered free on-campus training sessions and certification as well. In addition, many faculty have used their professional development funding monies to attend online education-related events and activities such as the Online Teaching Conference, Quality Matters National Conference, Course Design Workshop for @ONE, and other institutions. Annually, the College has begun to host an Online Education Summit that includes dialogue about best practices for faculty and administration. Faculty can also apply for funds to attend outside conferences relating to their discipline or to teaching and learning. The Faculty Development Funding Committee of the Academic Senate is responsible for the distribution of funds available for faculty professional development [IIIA-7]. Currently, funding supports up to \$1,200 for full-time faculty and \$600 for part-time faculty [IIIA-40]. Each year hundreds of funding awards are made to both full-time and part-time faculty to attend conferences or work on independent projects. Professional development funding also provides an incentive for faculty to participate in conference planning, join a professional organization, serve on a panel, present academic papers, and conduct workshops.

Full-time faculty members are eligible to apply for sabbatical and professional development leaves as part of their collective bargaining agreement [IIIA-78]. The sabbatical is intended for the professional enhancement of the faculty member, which shall be to the benefit of the faculty member, his/her College, students, and/or the District. The value of what the faculty member may contribute following his/her return includes, but is not limited to, the areas of pedagogy, curriculum development, and the culture of the College and the community. Per

the Academic Employee Master Agreement [IIIA-17], the number of semesters available for faculty sabbaticals is calculated as 4.63% of the full-time faculty semester/year obligation as reported by the state chancellor's office to the District in the fall of that academic year. Upon completion of sabbaticals, recipients are required to submit a report of activities to the Sabbatical Leave Committee demonstrating their accomplishment of sabbatical goals. Sabbatical recipients also share their experiences with their colleagues through presentations during PD Week.

In addition, at the discretion of the board of trustees, the District may grant a faculty member a paid or unpaid leave of absence of up to two (2) years for professional development which may include, but is not be limited to, additional schooling and/or training, participation in faculty exchange programs, a project/activity that would benefit the College and/or District, involvement in research efforts, and acceptance of long-term assignments to other higher education institutions, agencies, corporations, foundations, or government (Calif. Ed. Code Section 87768)

Professional development is available throughout the year for classified staff, managers, and administrators as well. District Services has provided face-to-face training in Workday, the new financial system. The OHR hosts training activities specifically for administrators and managers. Using the results from an annual survey of the District Leadership Team (DLT), OHR designs professional development activities around the top priorities. For a number of years, the legal firm of Liebert Cassidy Whitmore has provided training on topics such as absenteeism prevention, performance management, the Education Code and Title 5, equal employment opportunity, and current developments in workers' compensation. The OHR coordinates and documents the state-mandated harassment-prevention training for all employees, which is conducted annually during PD Week and is also available online. The OHR also facilitates numerous performance evaluation trainings including a program called "FRISK" (Facts Rules Impact Suggestions Knowledge) for all administrators and managers [IIIA-32].

Classified staff are encouraged to participate in various professional development seminars and workshops. Classified staff are permitted and encouraged, with management approval, to attend PD Week activities, many of which are geared towards staff [IIIA-79], and other activities that take place throughout the year. During spring break, one day is set aside for districtwide classified staff professional development.

Professional development funds are available for classified staff, and each academic administrator has a modest budget for professional development within their area as well. A Staff Development Committee of the Classified Senate manages a professional development fund and allocates funding on a proposal basis, [IIIA-80] [IIIA-81]. Classified staff members are required to assess how professional development activities have benefited them and to report what they have learned by completing an accountability form required by the Classified Senate and the Staff Development Committee [IIIA-82].

Many of the classified staff attend formal classes with the goals of obtaining a degree or an advanced degree. Therefore, besides enhancing their work at the College, they are also provided with assistance in personal growth and advancement in their respective career goals. All permanent full- and part-time classified staff are eligible to receive funding for appropriate classes, books, tuition, and conference fees. Classified staff are encouraged to participate in different activities throughout the state to broaden their horizons and to create new learning opportunities for themselves and their colleagues. Classified staff members have attended the Community College League of California Conference (CCLC) and the Classified Leadership Institute (CLI), a yearly event sponsored by the California Community College Classified Senate.

The College and the District provide additional professional development training through their websites. Examples include a series safety videos [IIIA-83], technology training via Lynda.com, and online training videos, job aids, and instruction manuals [IIIA-84] [IIIA-85]. The Office of Planning, Research, and Accreditation provides support for in-house computer information technology systems, such as TracDat, the outcome assessment and PR/AUR system, inFORM, the District's data warehouse, and the chancellor's office Datamart, among others.

Board Policy 4111, Administrative/Classified Leadership Leave (Without Loss of Pay), provides up to 60 calendar days of leave for all administrators and classified managers [IIIA-4]. Because it is often difficult for an administrator or manager to participate in professional development activities that require an extended period of time, such as a university course or a certification program, this policy is available for such purposes. Administrators are not required to complete a written evaluation of their professional development activities. Instead, they provide oral reports to their colleagues and to their division or unit employees on relevant information [IIIA-86].

The College solicits evaluation surveys to identify areas of strength and areas that need improvement. The comments from these surveys are incorporated into the planning of future professional development programs and funding opportunities. Through constant reevaluation of programs, the College ensures meaningful professional development activities to all members of the College community [IIIA-87] [IIIA-88] [IIIA-89].

ANALYSIS AND EVALUATION

The College's commitment to professional development for all employees is evident in the number of professional development activities and funding it makes available each year. The total college wide expenditure for all professional development was \$632,393 in 2015-2016 [IIIA-90]. The District and the College provide a wide variety of professional development opportunities to College faculty, staff, administrators, and managers during both PD Week and throughout the year. The College evaluates professional development activities to identify areas of strength and areas that need improvement in order to ensure

meaningful professional development activities are available to all members of the College community.

In addition to evaluating the quality of the professional development events, faculty are evaluated on their participation in professional development activities. Full-time faculty are held accountable for their minimum 38 hours of professional development each year [IIIA-75].

15. *The institution makes provision for the security and confidentiality of personnel records. Each employee has access to his/her personnel records in accordance with law.*

EVIDENCE OF MEETING THE STANDARD

Extensive individual employee data are maintained in electronic form by the OHR. Employee data are managed with strict security and access is limited to Human Resources and supervisory personnel. Hardcopy personnel files, including evaluations for all employees, are maintained in secure fireproof cabinets in the OHR.

Medical records are maintained in secure cabinets separate from the personnel files. The District protects all medical information regarding an individual according to the Confidentiality of Medical Information Act (CMIA), Calif. Civil Code, Section 56 et seq., and the Health Insurance Portability and Accountability Act (HIPAA), Public Law 104-196 [IIIA-91]. Employee fingerprint information is received and on a secure network computer in an internal, secure location. A Districtwide Records Retention Committee reviews all record-retention systems and make changes to ensure uniform access and storage.

Each employee has the right to inspect materials in his or her personnel file consistent with state law, board policy, and collective bargaining agreement provisions. A Human Resources employee is present when the records are reviewed and will make photocopies of any documents requested by the employee. The District does not charge a fee for employees to make copies of their personnel files.

Offices and file cabinets in the OHR that contain confidential documents are locked when unattended and at the end of each business day.

Board Policy 3310 [IIIA-92] and Administrative Regulations 3310 [IIIA-93] explain the process for retaining and destroying records, as described in the Records Retention Manual [IIIA-94]. Human Resources evaluates public records requests and subpoenas served on the College in order to ensure that any release of documents containing personal information conforms to board policy and to state and federal regulations.

ANALYSIS AND EVALUATION

The need for confidentiality of personnel records is continually stressed to all Human Resource personnel. There has never been an incident of inappropriate release of personnel information by Human Resources staff, and no staff member has ever been disciplined for inappropriate handling of personnel materials.

All District and College personnel are made aware of all board policies and administrative regulations that must be followed related to the release of personal, confidential, and privileged information.

Personnel files are maintained in fireproof filing cabinets in the OHR, and only Human Resources and supervisory personnel have access to these files. Employees may also view their own personnel files. There is a sign-out card for each file that records who has reviewed the files. When a file is being reviewed, a Human Resources staff member is present to ensure items placed in the files remain in the files and that no materials are added.

The District is implementing electronic personnel records using two complementary technologies: for historical information in a personnel file that is currently on paper, this information will be scanned and stored in a secure database (Perceptive Software's Image Now application) that is indexed by Employee ID, SSN and Name. For all new personnel information that normally would be placed in the personnel file, this information will be entered into the Districts' ERP, Workday. Portions of these technologies are currently in production and additional features are being implemented.

III.B. Physical Resources

- III.B.1. The institution assures safe and sufficient physical resources at all locations where it offers courses programs and learning support services. They are constructed and maintained to assure access, safety, security and a healthful learning and working environment.**

EVIDENCE OF MEETING THE STANDARD

The College engages in assessment, evaluation, prioritization, and allocation activities to ensure safe and sufficient facilities. The criteria and processes the College and District services use to evaluate the sufficiency and safety of its facilities when considering renovation, department relocation, or the building of a new facility are based on research, consultation, committee approval, and appropriate planning. The College supports and integrates college wide facility needs into its planning processes, including the College strategic planning process and the education and facilities master planning process. The College, thus, uses appropriate planning documents when addressing the needs and safety concerns of its facilities, such as the Educational and Facilities Master Plan (EFMP) [IIIB-1], the Facilities Condition Assessment (FCA) report, [IIIB-2], and the Five Year Construction Plan [IIIB-3].

The EFMP, which was last completed in 2011 and is currently being updated, provides a blueprint for the College and District through 2031 and serves as the basis for facility expansion and modification decisions and the implementation of expenditures provided to improve facilities. The EFMP includes five-, 10-, and 20-year time horizons. Each year, a Five-Year Construction Plan, derived from the EFMP, is updated and submitted to the CCC Chancellor's Office. This prioritized list of projects for the entire district is developed by the district Facilities Planning Office with input from the presidents of both colleges. The 20-Year Funding Plan for Saddleback College Facilities and Schedule Maintenance identifies the College's scheduled maintenance, renovations, and capital projects.

Since the last accreditation self-evaluation, the District and College have invested significant resources into campus buildings. Larger projects include an extensive renovation of a temporary classroom cluster known as "The Village," addition of an Automotive Technology/Transportation building, and the construction of the new Sciences building. These projects are now either complete or nearing completion. Since 2010, \$134 M has been allocated to Saddleback College for facilities upgrades through the basic aid allocation process [IIIB-4].

Facilities planning is integrated into the districtwide and college strategic planning processes. The College participates in the District-Wide Strategic Planning Council whose purpose is to coordinate all district-wide planning [IIIB-5]. The college's Six Year Strategic Plan process was informed by various data sources [IIIB-6] including the Facilities Maintenance and Operations Department Administrative Unit Reviews (AUR) [IIIB-7] and safety inspection reports

as commissioned by the Facilities Maintenance and Operations (FMO) management team [IIIB-8]. The Facilities Condition Assessment report of 2015 [IIIB-2] was a result of an integrated planning process to identify building and infrastructure needs and ensure appropriate funding is allocated to address these needs.

The Facilities, Maintenance, and Operations Department (FMO) at Saddleback College regularly reviews these plans and other documents to determine the sufficiency of the College's classrooms, lecture halls, labs, and other facilities, including online education needs. The plans provide direction to guide development of physical resources to accommodate student enrollment and student use of facilities for all of the College's educational programs. For example, in 2014 the college created 613 temporary parking spaces to address the college community need for additional student parking. **ALSO ADD SCIENCES BUILDING AS AN EXAMPLE.** In addition, the College president, the President's Executive Team (PET), and the senior director of facilities review proposed academic program plans and the Facilities Master Plan to ensure they are integrated and congruent.

The FMO Department is also responsible for the maintenance of all campus facilities to ensure compliance with District and College plans, to ensure a safe, secure, clean, accessible (ADA-compliant) environment, and to provide adequate maintenance of campus grounds. FMO implements scheduled maintenance and inspection checks of College facilities and equipment, including security checks when appropriate. While the senior director of facilities is the main point person to handle facilities concerns during normal business hours, the College also has an evening and weekend administrator program [IIIB-9] through which administrators and deans take turns serving as the point person in the evenings and on Saturdays to handle problems that arise, perform safety checks, and document and report facility concerns.

The College meets its facilities needs by assessing usage data and conducting evaluations and surveys to ensure the maintenance and safety of all campus buildings. Critical to this success are the monthly reports generated by the Advanced Maintenance Management System (AMMS) [IIIB-10]. The AMMS program allows users to track safety issues and emergency repair work. The user can track work that is performed in each building, who performed the work, and the duration of the project. The AMMS system can also help determine how timely work requests are completed and electronically maintains all records of past work orders. This information is useful in planning work schedules and evaluating staffing requirements.

The senior director of facilities reviews the monthly reports generated from the AMMS work order system and uses them as a management tool to monitor, supervise, and evaluate the workload and services provided to all College groups. Complaints received are filtered, and changes are proposed, approved, and implemented based on budget feasibility. The College prioritizes the needs identified from statements gathered in this evaluation process, shares accolades with FMO staff as appropriate, and consults on ways to improve services based on relevant factors such as enrollment growth and time constraints. The equipment that FMO maintains undergoes regularly scheduled preventative maintenance that is tracked in the annual inventory reports. In addition, through the program review (PR) and administrative unit

review (AUR) processes, described in I.x.xx above, each instructional program and student support and administrative unit selects and prioritizes needs to be supported through the resource allocation process. This includes funding for new facilities, equipment, and technology.

The College's radio and cable television stations are both part of instructional programs under the Communication Arts Department. Both of these broadcast facilities are on-air 24 hours a day, 7 days a week. A number of upgrades have taken place to improve this program in response to needs identified by the program. In 2015, for example, the College installed a new building to house the radio transmitter and antenna [IIIB-11 MJ/RM EXAMPLE OF THE PROCESS INCLUDING PROGRAM REVIEW, REQUEST, PRIORITIZATION, AND FUNDING]

The Office of Instruction selects off-site facilities with input from divisions to ensure the facilities are adequate and that they are in compliance with relevant safety and security requirements. Prior to contracting with an off-site location, College administration visits each proposed off-site location to ensure it is suitable, meets student and instructor needs, and is safe. During the course of the semester, administration staff visits the classes to evaluate the instructors and locations, and they work closely with the site owners to ensure the safety of students and College equipment. Faculty provide feedback if any problems arise during the semester and dean or vice president for instruction resolves any issues. If a site proves to be unsatisfactory, that site will not be used again. The College supports the use of off-site classes only when the location chosen meets student needs and on-campus classes are not adversely affected.

Safety

Annually, the Risk Management Department, with input from Keenan & Associates, reviews and updates the District's Injury and Illness Prevention Plan [IIIB-9]. The College's facilities staff also participates in monthly on-the-job safety training [IIIB-12]. The District property and liability carrier, Keenan & Associates, conducts annual inspections (State Wide Association of Community Colleges, SWACC) [IIIB-13] of College facilities to identify any potential safety risks and reports all risks to District Risk Management and the senior director of facilities for correction. The College is committed to maintaining a safe campus and addresses all recommendations in the Keenan & Associates report. Keenan & Associates completes a follow-up audit report to ensure all safety risks have been addressed. Consultation with the units of Disabled Students Programs and Services (DSPS), and the Campus Police ensures that the College provides safe ingress and regress travel access to all facilities.

The Board of Trustees approved basic aid funding of \$630,000 to engage ADA transition plan consultation services and approved these services at the February 2016 board meeting. The ADA Transition Plan Consultant, Cordoba Corporation, began surveying of all campus buildings and exterior pedestrian pathways in March 2016 to identify barriers to accessibility. All surveys were complete by August 2016. The results of the surveys were entered into a database for analysis and tracking purposes. The issues identified as non-ADA compliant have been prioritized and costs for correction of the items have been estimated. The means of correcting the identified issues vary between adjustments and repairs by campus maintenance staff, repairs and reconstruction by contractors and inclusion into future building

renovations. Funding sources will vary as well [IIIB-14 MJ ADA TRANSITION PLAN DOCUMENTATION PENDING].

It is currently the intent of the District to develop an achievable twelve-year execution plan. The Transition Plan is scheduled to be complete in fall 2016 and will continue to be a tool for analyzing, prioritizing, scheduling and monitoring ADA compliance in the future.

In addition, facilities plans are reviewed annually and approved to meet all appropriate building, fire, seismic, and environmental health laws and requirements. Facility deficiencies and safety concerns are addressed by developing a prioritized list of project needs and managing those projects (once they are approved) in the weekly facilities management meetings. The Facilities and Safety Committee, a participatory governance committee composed of classified staff, faculty, and administrators, ensures that the College complies with established safety standards. The College also has a silent witness program to ensure and maintain safety campus wide [IIIB-15].

Be Safe

The Saddleback College Police Department has researched, purchased and implemented a proactive emergency response system. This new program, called "Be Safe," is a very powerful data-driven tool that will increase our ability to maintain a safe campus and effectively respond to emergencies.

"Be Safe" provides police, fire, swat, and other emergency teams with accurate and detailed information on floor plans, building demographics, and many other unique features of the campus. This program provides emergency teams and administrators with up-to-date information about any facility on the Saddleback College campus. In the event of an emergency, this information is instantly accessible, thus allowing critical decisions to implement strategies to protect life and property to be made quickly and effectively.

"Be Safe" is a proactive system and it facilitates clear communications among College resources and emergency first responders with critical information about the entire campus. This system engages and integrates students, administrators, and emergency response teams and supports Emergency Services and FMO Space Inventory [IIIB-16].

Blackboard Connect™

Blackboard Connect™ is a mass notification system that can be used to inform the College or the District community of time-sensitive situations or just day-to-day events when safety, reliability, efficiency, and speed are needed. The Blackboard Connect™ service provides the College and the District with the capability to reach students, faculty, and staff via voice, text, and email. [IIIB-17 SADDLEBACK PIO TO PROVIDE – STEPHANIE OR JENNIE MCCUE].

CISCO AlertMe System on VOIP

The Cisco AlertMe System, or Informa Cast, is a mass broadcast and notification system that can be used by Saddleback College Police Department personnel to push immediate voice and text

messages to every telephone on campus. The voice-alert messages automatically sound on the telephone's external speakers, and the accompanying text message appears on the telephone's LCD display so the device receiver does not have to be picked up to receive these messages. In 2007, the CISCO AlertMe System proved very useful and helpful in facilitating the real-time evacuation of the campus when smoke from wildfires caused unhealthy air quality campus-wide. AlertMe has also been used to conduct building evacuations during fire drills and in other scenarios conducted by the Saddleback College Police Department and local law enforcement agencies in exercising mutual aid protocols and emergency response procedures [IIIB-18].

College Police Department Equipment Upgrade

The Saddleback College Police Department Campus Police completely upgraded its officers' uniforms and equipment, including less-than-lethal force options, tactical firearms, and light weight ceramic vests to provide protection against large caliber rounds and helmets. All officers have been equipped and trained on the M-4 rifles for active shooter incidents. New digital radios will be replacing the existing analog handheld radios. This will enable better communications between FMO, our IT department and the local law enforcement. Four emergency gas powered generators were also purchased and added to the inventory. These generators are equipped with lights and are capable of providing 110 and 220 ports.

In 2015, three new SUV patrol vehicles have been purchased and are in service by the police department. The vehicles can carry more emergency equipment and can provide as a platform for in-field command center until a formal base can be established.

All officers have successfully completed Peace Officers Standards and Training on the upgraded equipment and in the techniques of rapid deployment in response to immediate threats and in critical-incident management.

New Mobile Emergency Operations Center

When the College Communications Arts Department no longer needed an old recreational vehicle (RV) that was used for channel 39 and KSBR broadcasts, the Campus Police refurbished the RV and transformed it into an emergency mobile command post for the College. Today, the RV serves as a flexible and effective tool for emergency management.

Safety Videos

Ten short playing safety videos have been developed specific to the campus. The videos were intended to provide information during a variety of possible emergency situations such as earthquakes, fires, power or utility outages, active shooter incidents, disruptive students, and other emergency situation. Each video provides resource information and contact information for specific services provided by the college and what to do in emergency situations. The safety videos have been placed in the police department webpage for easy access and are open to anybody. It will also be included during the "onboarding process" for new district employees. [IIIB-19].

Video Camera System with Access Control Integration

Digital video cameras have been installed and utilized in some buildings. The use of this technology is a force-multiplier for the police department. Public hallways and roadways can be quickly checked from the dispatch center and can quickly be used to review incidents that have just happened. As new buildings are being completed, the addition of the video system has been included. Plans are underway to retro-fit existing buildings.

Access Control will be integrated with the video system. This will allow the ability to remotely lock and unlock building doors during emergency situations. As unlawful breaches are attempted, the uses of the video cameras can provide suspect information quickly and assist in directing officers to the proper location. The long-term goal is to have all buildings with video coverage and integrated access control.

Training

A program to train administrative, faculty, and staff for emergency situations via table top exercises has begun. The executive administration has completed a table top for active shooter incidents and another is planned for managers. Presentations have been given at management meetings and the annual retreat. Individual departments and divisions have requested and have been given safety training in their staff meetings.

The police department has been working closely with the Orange County Sheriff's Department for emergency preparedness. We have had active shooter training scenarios with OCSD for the past two years. Campus police have also trained with OCSD for Mobile Field Force (MFF) which is the county standard training for deployment of personnel during riots or mutual aid incidents.

Evaluation of Facilities

Effective use of facilities is determined in a number of ways. The College utilizes the Ad Astra scheduling system to ensure the efficient space use and space allocation. The five-year Education and Facilities Master Plan and the six-year Strategic Plan are followed, and each provides a mechanism for evaluation. Student and employee surveys and ongoing inspections by Administration, District Risk Management, Keenan & Associates and FMO are conducted. In addition, fire inspections and safety inspections are conducted by external entities, and the results are used as a basis for improvement. The results of the most recent employee survey are summarized below [IIIB-20]. Issues that arise unexpectedly are reported on the AMMS maintenance work order system and are addressed in a timely manner.

The Facilities, Maintenance, and Operations department reviews a number of plans and documents to determine the sufficiency of our classrooms, lecture halls, labs, and other facilities, including Distance Education (DE) equipment and facilities. The Educational Facilities Master Plan, which is updated every five years, comprehensively addresses the college's programs, including those in distance education. Other plans and documents include the Facilities

Administrative Unit Review and surveys.

According to the 2013 Employee Survey (n=334):

- Roughly 54% of the employees who completed the survey have worked at Saddleback College less than 10 years.
- Most employees feel that campus traffic congestion is a problem. Congestion is most evident during the first few weeks of each semester, when the College normally has a larger influx of new students.
- Most employees feel that while there is adequate parking during the workday, however, majority of employees felt that parking lots are not located favorably in regard to the layout of campus buildings.
- The majority of the respondents feel that the campus has adequate lighting.
- The vast majority of employees are very satisfied with the ease of travel on campus walkways and pathways.
- Roughly half of the employees that completed the survey feel that Campus Police officers are highly visible on campus, and over 70% of respondents also feel safe while on campus.
- About 40% of employees perceive that people with disabilities have reasonable access to all campus buildings.
- Majority of the employees feel that their actual physical work environment is adequate.
- More than half of the employees feel that our campus facilities support student learning.
- Most respondents agree that Facilities Maintenance and Operations Department respond to work orders accurately, courteously and in a timely manner.

ANALYSIS AND EVALUATION

The College has numerous plans and procedures in place to effectively manage physical resources and to ensure access, safety, security, and a healthful learning and working environment. The College planning processes are integrated and are used to identify facilities needs and strategies for accomplishing those needs.

The Advanced Maintenance Management System (AMMS) is a powerful recordkeeping and management tool. This system has the capabilities of providing management with accurate and useful data for decision-making. Management must and will provide additional training to staff to be able to fully generate and utilize AMMS reports. FMO purchased an \$11,000 AMMS upgrade in fiscal year 2015/2016 to increase the effectiveness and efficiency of the system and improve our ability to meet the needs of the College. Some of the new features in the upgrade include enhanced login and approval options, an improved scheduler function, ability to attach files, new reporting options, etc.

The College campus is clean, safe, and accessible. Student and employee surveys support the fact that the campus buildings and grounds meet these criteria. Off-campus facilities meet the

needs of College students as evidenced by long-standing agreements with these facilities. The College maintains sufficient control by eliminating the use off-campus facilities that do not adequately meet the needs of students, faculty, and staff.

A major challenge faced by the College is obtaining funding for new buildings and for upgrading existing facilities and land. The SOCCCD has not pursued a local bond for new facilities and facilities improvement and instead relies primarily on excess property tax revenue above apportionment to fund facilities, referred to as basic aid funding and described in III.D.1 below. Obtaining state funding and acquiring sufficient basic aid funds for meeting all identified college needs has proven to be a challenge. A positive step in the planning process has been the continued development of the Capital Improvement Committee (CIC). This participatory governance group makes recommendations on major districtwide facilities and related matters [IIIB-21]. CIC is now able to utilize the Facility Condition Assessment report (FCA) to inform its recommendations for facilities funding for the College [IIIB-2].

III.B.2. The institution plans, acquires or builds, maintains and upgrades or replaces its physical resources including facilities, equipment, land, and other assets, in a manner that assures effective utilization and the continuing quality necessary to support its programs and services to achieve its mission.

EVIDENCE OF MEETING THE STANDARD

The planning document that drives the building of new facilities and the major renovation of existing facilities and infrastructure is the Education and Facilities Master Plan (EFMP). The District, in collaboration with the College and using a consulting firm, oversaw the development of this 20-year plan utilizing data and information largely provided by the College. The plan evaluated current space inventory, broken down by category such as lab, classroom, and office space. An enrollment projection by discipline was established and then a long-term capital plan was developed to meet student needs by discipline. This plan projects out building needs to 2031, and breaks down implementation into three phases. The District and the college are scheduled to update the plan within the next year.

The Facilities Condition Assessment (FCA) report was originally completed in October 2015 and updated in February 2016. A FCA describes a physical evaluation of the existing condition of a facility and its systems. The report includes building systems; i.e. roof exteriors, plumbing, HVAC, etc., building components; i.e. chillers electrical panels, pumps, etc., equipment inventory; including photos and data, preventative maintenance schedules; and infrastructure. The findings are used with predictive cost models to estimate current and future funding requirements.

It is the responsibility of the College and District Facilities Departments to provide direction and oversight for facilities planning and construction. When planning building renovations and construction projects, the facilities departments review the Education and Facilities Master

Plan as well as the FCA report. These items are prioritized and referenced during the annual cycle for requesting funding.

If a project is included in either these plans then project proposals are submitted and evaluated through participatory governance groups such as the Capital Improvement Committee and the Basic Aid Allocation Resource Committee (BAARC) for funding recommendation. If funding is approved, consultation begins with the department heads and end-users to consider the needs of programs and define the project components that will meet the needs. The driving forces in building a campus structure are a needs assessment, a campus space review, and of course a review of the appropriate planning documents to integrate with the College's Strategic Plan. The institution and the FMO Department have been engaging in results-oriented planning processes on an on-going basis.

College plans for scheduled maintenance upgrades are developed by the College's Safety and Facilities Committee. As a first step, the Committee reviews the College's Strategic Plan, including its mission and vision, to ensure that the physical needs of all the College's programs and services are being met. Budget planning for physical resources is accomplished through integrated planning; needs identified through PRs and AUR that are in alignment with the college's strategic plan support budget requests for physical resources.

The Safety and Facilities Committee determines and prioritizes service and equipment replacement and maintenance needs. Documentation of meeting agendas and project status reports are recorded.

The Facilities Committee evaluates the effectiveness of the College's facilities and equipment in meeting the needs of programs and services through the College Resource Committee process. The FMO department also incorporates college physical resource needs into its own Administrative Unit Report with input from the professional trades and crafts experts on staff.

An FMO project in [IIIB.12] lists the current and completed projects and status reports from 2003 to the present. These reports are reviewed in weekly management meetings. The institution uses its facilities effectively by maintaining classrooms that support the recommended FTE ratio. Labs are maintained and used based on classes and lab integration. The physical condition of College facilities used by students, community education program, and the surrounding communities creates an environment conducive to an effective learning experience, as evidenced by student and staff surveys.

ANALYSIS AND EVALUATION

The College processes ensure effective utilization and the continuing quality necessary to support its programs and services to achieve its mission. The combined efforts of College planning and implementation by the FMO are effective and adequately meet the needs of students, faculty, and staff.

The Education and Facilities Master Plan has been followed within reasonable limits. Funding availability has led to adjustments to project prioritization. For example, when matching funds from the state were available for the Library remodel, that project moved to the top of the prioritized list. The Gateway project, scheduled for matching state funds in 2007, is still in the queue as a final project proposal (FPP) with the state. The Gateway delay provided an opening for the College to reprioritize the stadium improvement project with a projected construction start in October 2017 and a scheduled completion date of January 2019, which is much sooner than was originally planned.

Funding new buildings, scheduled maintenance, and facility and site upgrades continue to be a significant challenge. Facility needs are well researched and documented in reports such as the Facilities Condition Assessment Report, but the unfunded scheduled maintenance needs for the college remain high. The College will continue to work through the RFP process to develop a comprehensive funding plan to address these needs.

Equipment and technology has been well funded. Funds for technology have been allocated to the College through the basic aid allocation process, and regular annual allocations have allowed the College to aggressively fund technology on campuses.

Table x.x shows total equipment funds expended College-wide.

Table x.x
College Equipment
Expenditures, FY 2009-2010 to
FY 2014-2015

Year	Total Expenditures
2009-2010	\$ 1,255,233.25
2010-2011	\$ 3,167,646.13
2011-2012	\$ 1,307,195.44
2012-2013	\$ 1,803,468.36
2013-2014	\$ 1,868,165.18
2014-2015	\$ 4,900,695.17

III.B.3. To assure the feasibility and effectiveness of physical resources in supporting institutional programs and services, the institution plans and evaluates its facilities and equipment on a regular basis, taking utilization and other relevant data into account.

EVIDENCE OF MEETING THE STANDARD

The College primarily assesses the effectiveness of its facilities in supporting the College's program and services through PR and AUR. Every two years, each PR and AUR is required assess its physical resources and to complete a needs assessment. Facilities needs identified through the PR and AUR are prioritized for funding on an annual basis through the resource

allocation process led by the College Resource Committee (CRC). Long-term needs for facilities, including type and size, are assessed at the program level, and are utilized in the development of future education and facilities master plans.

The Safety and Facilities Committee also evaluates requests from the PRs and AURs and establishes a prioritized list of projects. The CRC integrates the prioritized lists from each area (e.g. facilities, equipment, staffing, technology, and other) into a consolidated list.

Evaluation of facilities is also done within areas and divisions. For example, on a regular basis student services, with input from each of the ten managers reporting to the vice president for student services (VPSS), assesses the usage of the Student Services Building and of other buildings and space on campus for delivering student services. Each assessment is shared first with the student services team and then with PET. This evaluation has resulted in improvements such as the mutual usage of space by compatible programs, the moving of programs to more adequate space, the moving of programs due to necessity in a remodeling process, and better usage of space to improve service to students. While many of these improvements are short-term, the identification of facility needs for delivering student services is integrated into long-term plans, such as the construction of the Gateway Building, which is identified on the EFMP.

PRs and AURs are also required to identify technology and equipment needs. Annually, each division submits prioritized requests to the Equipment Committee and the Technology Committee, based on information contained in PRs and AURs. Each division, through its own process, which includes faculty and staff participation, submits a prioritized list of equipment and technology needs to the appropriate committee. PRs and AURs also inform longer term planning through themes that are identified in the process.

The Equipment Committee verifies that the reviews have been completed for each request, and priority is given to those requests with a documented need identified during the PR/AUR process. The Technology Committee develops and maintains a six-year plan. The Technology Committee plans for and funds both hardware and software needs. The first priority of the plan is to maintain currency of technology in the classroom setting and to fund technology replacement needs. The Committee meets annually to review and revise the Technology Plan based in part on needs requested through the PR/AUR process.

A facilities update is submitted as part of the board agenda every month to ensure the board of trustees has current knowledge of facilities projects.

ANALYSIS AND EVALUATION

The College has multiple ways in which physical resource needs are planned and evaluated. The first step is identifying the needs of each instructional program and student support and administrative unit through the PR/AUR processes. The Facilities Committee, the Equipment Committee, and the Technology Committee as a whole represent the participatory governance

process at the college, and they do an effective job of prioritizing these needs to best support all programs and services. For facilities projects of larger scope, an annual recommendation is provided to CIC identifying the projects that the College would like to see funded. This participatory governance committee, composed of representatives from both colleges and the District, then advance recommendations for capital outlay projects districtwide and include them in the district's annual budget. This process is considered successful and the committee engages continuous improvement principles.

III.B.4. Long-range capital plans support institutional improvement goals and reflect projections of the total cost of ownership of new facilities and equipment.

EVIDENCE OF MEETING THE STANDARD

The EFMP is the document that drives the building and major renovation of facilities at the College. This long-range plan is the result of an extensive, collaborative process that includes significant participation of College faculty, staff, administration, and students.

This plan identifies in detail all existing facilities by building and also addresses circulatory and infrastructure needs. Full-time equivalent (FTES) student capacity needs are curriculum driven, and a plan to accommodate those needs is developed. The FTES projections and programmatic needs are developed by the vice presidents for instruction and student services and are supported by OPRA. This plan includes projected need for classrooms, laboratory space, athletic fields, student service space, office space, parking, and roads. The needs are prioritized and a phased plan was developed. This plan is used to supply the State Chancellor's Office with updates to the Five Year Plan regarding District priorities for facilities funding. Implementation of the plan depends on funding sources. As funding becomes available, the College follows the designated order of priority to implement projects. However, a lower-priority project may be advanced to take advantage of available funding. A recent example can be found in the Library Renovation project. This project had a lower priority than Advanced Technology and Applied Science Building renovation and was implemented first due to the receipt of matching state funds.

The College has significantly documented scheduled maintenance needs and struggles to meet those needs both from a funding and a human resources perspective. The 20-year Funding Plan for Middleback College Facilities and Scheduled Maintenance serves as an effective tool for documenting the scheduled maintenance needs of the College. This plan is referenced during the review for annual recommendations to the Capital Improvement Committee in accordance with the identified priorities.

The College uses an integrated strategy that considers building processes, plans, and equipment required to plan for total ownership costs of College facilities. District Facilities Planning professionals utilize a formula for new building construction that assumes the initial building cost is only a percentage of the total cost of ownership which includes maintenance and renovation needs. The College president, senior director of facilities, and the vice

president for college administrative services evaluate proposed projects and major equipment requests and analyze the anticipated return on investment and the effect the decision will have on the facilities and maintenance budgets now and in the future. They also balance equipment needs that may have higher costs with the educational component and the facilities component.

The planning process is integral part of ensuring that capital projects support College goals. The budget is driven by the long-range planning process. The process has proven to be effective, as measured by the College's ability to adequately maintain its facilities and project a budget for scheduled maintenance projects.

Over the years, the College has taken a proactive approach to utility savings, energy efficiency and sustainability measures. In 2003, The College installed a 1.5-megawatt cogeneration plant that produces over 8.5 million kilowatt-hours per year. The heat generated by this process is then utilized to supply thermal energy to the College's swimming pool and its buildings. This process results in an annual savings of approximately 350,000 therms of natural gas. And in January 2009, the installation of an absorption chiller was completed. An absorption chiller generates chilled water for air conditioning by utilizing heat generated from the electrical generators. This improvement provides over 400 tons of cooling capacity and will save an estimated 1.4 million kilowatt-hours and \$200,000 per year. This cooling system will provide all of the College's cooling needs during the winter and half of the cooling needs during the summer. The cost for these improvements, \$1.45 million, qualified for a public utility company rebate of \$408,000. Additional energy efficiencies were gained with Proposition 39 state funding, which enabled the college to install energy efficient LED devices in the parking lot. Other areas of sustainability that should be noted are the College's recycling program and the use of reclaimed water for irrigation. Each year since 2003 the recycling rate for the College's waste was over 50 percent of the total amount of waste generated by the campus. Since 1995 the College has been utilizing reclaimed water for the irrigation of landscaped areas, resulting in an annual savings of over \$75,000 and an annual reduced consumption of 68 million gallons of domestic water.

ANALYSIS AND EVALUATION

The College is serious in its efforts to address scheduled maintenance needs. The College has spent \$30 million in scheduled maintenance over the past ten years [IIIB-22]. Realizing this is a priority, in 2009-10 the board made this a districtwide goal [IIIB-23]. This goal led to the development of a 20-Year Funding Plan for Saddleback College Facilities and Maintenance, and in the past year into the Facilities Condition Assessment report to a funding plan for scheduled maintenance and facilities at Saddleback College.

The College has completed many successful new building construction projects and renovation projects. The College has experienced problems with the "low-bid process," which, unfortunately, does not ensure the best-qualified and most-competent contractors. Therefore, on major building construction and renovation projects, management has the

burden and expense to guard against subpar quality workmanship, project delays, and contractor errors and misjudgments, which could obviously lead to unnecessary litigation. A Design Build delivery method is employed when it makes sense to do so which allows for greater collaboration; in this method, design and construction services are contracted by a single entity. The design-build process is anticipated to yield better results, such as a lower overall cost. Shorter project duration superior project quality and better contract features and warranties.

Leadership in Energy and Environmental Design (LEED) is a nationally accepted standard that promotes healthier indoor air and efficiency in energy and water usage. In alignment with the mission, vision, and values of the College related to sustainability, the College has required LEED building certification for the new Sciences building. The College is committed to sustainability and intends to continue to explore sustainable alternatives, including the feasibility of LEED building certification and other alternatives. The new Sciences building is a gold-rated LEED certified building, and the College will continue to implement sustainable design and building principles throughout the campus as appropriate.

The College's investment in utility savings projects has been significant. In addition to reviewing the criteria for viability, before implementation of utility savings projects the long-range financial impact and the College's mission of sustainability is considered. Sustainability measures implemented at the College have resulted in annual savings of 2.4 million kilowatt-hours, removal from the electrical grid of an additional 5 million kilowatt-hours, a savings of 350,000 therms of natural gas, reducing consumption of domestic water by 68 million gallons, and a cost savings of \$905,000. Presently, there are several projects in process that will address additional sustainability issues. These include the installation of an upgraded energy-management system, a new cool-roof system for the Student Services Building, and an evaluation of campus irrigation systems by the Moulton Niguel Water District.

C. Technology Resources

1. Technology services, professional support, facilities, hardware, and software are appropriate and adequate to support the institution's management and operational functions, academic programs, teaching and learning, and support services.

EVIDENCE OF MEETING THE STANDARD

Saddleback College is a large complex institution that utilizes an array of technologies to meet its institutional goals and objectives. Technology permeates every division and department throughout the College. The roles of the College Technology Services Department and District IT department are closely linked, with each group providing critical services needed to support the college. College Technology Services provides technical support in an array of technologies. Specific areas of college technology support are categorized as follows:

Data Network Administration

- Routers
- Firewalls
- Network Switches
- Wired Infrastructure
- Wireless Access Points
- Network Access Control

Desktop Computers

- Faculty, Staff and Administrative Computers
- Student Computer Labs and Classroom Computers
- Open Access/General Use Computers

Telephones

- Adds, Moves and Changes
- Call Centers/Phone Trees
- Voicemail
- Fax Lines

Software & Database Support

- End User Support and Training
- District Application Support

Data Storage

- College Data Storage
- Storage Area Network Management
- Data Backup

Server Administration

- Instructional Servers
- Administrative Servers

Web Administration

- Manage College Web Servers
- Design and Update SharePoint
- Web Applications

College SharePoint Services

- Manage College SharePoint Servers
- SC Cloud-Services

Audio Visual Services

- Board Room Equipment Operation & Support
- Classroom Media Support
- Equipment Maintenance
- Equipment Installation
- Trouble Shooting
- Outdoor Media Systems

- System Maintenance
- System Operation
- Media Services
- Video Duplication

PoE IP-Based Camera

- Configure, Maintain, and Support Cameras and Servers
- Integrate Cameras with Alarm & video analytics

Learning Management System

- Support and Train

Applications Development

- Develop and Maintain In-House Applications
- College Specific Software & Database Installation and Support

Printing Management

- Maintain and Support All Printers
- Support All Printing Management Services

Electronic Medical Records

- Support and Maintain System

PoE Access-Control System

- Maintain all the servers and AD Integration
- Support all Door POE Access Control System
- Support Integration into Camera System

Instructional Computer Labs

- Collaborate with Instructors to Develop Images
- Trouble Shoot
- Software Installation and Configuration

College Technology Services provides technical support for faculty, staff, managers, and administrators. The hours of operation are from 7:30 a.m. to 8 p.m. Monday through Thursday, and 7:30 a.m. to 5 p.m. on Friday. There are 13 full-time technical staff, two sixty-percent technical staff, an administrative assistant, an assistant director, and a Director. The staff are well qualified to provide support in all the areas listed. Saddleback's television and radio educational programs use an extensive level of technology and they have dedicated video production specialist staff that assist in supporting this very successful and technically savvy program. Technology Services managers receive text messages via monitoring systems and respond to email after normal help desk hours and weekends.

District manages many core services used by Saddleback, IVC, and ATEP. A sample of these services are the student information system, email system, Internet connectivity, ERP system—Workday, mobile applications, and many other systems that are vital to the operation of the College.

Support—Student Technical Support Hours of Operation & Services Provided

To serve all college students, the Division of Online Education and Learning Resources under the Director of Learning Assistance, manages two student help desks and computer labs on the

2nd and 3rd floors of the Learning Resource Center. The computer lab on the 2nd floor is a shared space with Liberal Arts and contains 30 computers for the Language Lab and 48 computers for skills lab and open lab use. The computer lab on the 3rd floor has 46 open lab computers utilized for research and homework purposes. The student help desks offer students direct support either via telephone, email, or in person on their technical needs with their online or face-to-face classes. Effective spring 2015, the student help desks added a live online technical support chat to better assist our online students. Hours of operation are Monday through Thursday, 8 a.m. to 8 p.m., Friday 8 a.m. to 2 p.m., and Saturday 10 a.m.-3 p.m.

Support—Faculty Center for Student Success Hours of Operation

The Faculty Center for Student Success (FCSS) provides faculty with instructional technology training, workshops and continued support that promotes excellence in teaching and ensures the highest level of student learning for on-campus, blended, flipped, or fully online classes. There are three specialists and one office assistant who are available to assist faculty. Each semester the FCSS offers various instructional technology training options, such as specific department/discipline sessions, one-to-one assistance, and new faculty orientations as well as the following:

- Use of the campus learning management system (LMS) in both online and face-to-face classes
- Instructional design support for online classes
- Ways to incorporate instructional technology in classes, including the latest technologies
- Best teaching and learning practices specific to all learning modalities
- Managing, training and implementing captioning strategies
- Training on third-party apps such as VoiceThread, EduCanon, Google, etc.
- Other topics related to instructional technology

The center is open Monday through Thursday from 7 a.m. to 7 p.m. and Friday from 7 a.m. to 5 p.m. FCSS staff offer workshops on a wide variety of topics throughout each semester. Session topics range from the basics of LMS to How to Create Great Instructional Videos in Five Minutes or Less. In order to accommodate the varied faculty schedules, sessions are usually offered between one to two hours and are available at varying times—anywhere from 7 a.m. to 7 p.m. throughout the week days. Surveys are collected at the start and end of semesters to determine best times and which classes are to be offered in the future.

The FCSS and the Online Education Coordinator collaborate with our sister college, IVC, to organize yearly joint college events such as the Online Education Summit. FCSS also presents several sessions at each semester's PD week. FCSS also offers fully online or hybrid sessions such as How to Get Started Online and Getting Started with Camtasia. In addition to the week-long online sessions, FCSS also provides webinars for desktop learning loops and one-to-one assistance. Finally, the FCSS has a YouTube Channel and participates in various social media

platforms to keep faculty up-to-date with the latest trends in instructional technology and online teaching strategies.

The college's personnel work effectively to support online instruction, both in terms of its organization and its number. There are three full time staff members dedicated to instructional technology support for faculty (two applications specialist II positions, and one instructional technologist); there are also two full-time and one half-time positions at the college to support student technical support. Furthermore, the Division of Online Education and Learning Resources supports activities at the college that engage students, faculty and staff with online education. Activities include hosting a college wide Online Education Summit in November, 2015, Week of Workshop (WOW) sessions for students new to online education and ongoing workshops for instructional technology through the FCSS. FCSS surveys help the center to remain responsive to the needs of faculty and it helps the center to know that it is being effective in meeting the needs of faculty. The president's professional development survey included feedback about the support available for online education, and on learning needs and future interests. Ongoing feedback from the Online Education Coordinator, Dean of OELR, and FCSS supports the DE programs and services on campus. The Online Education Coordinator also solicits feedback from faculty on services and programs, and then shares this information back with the FCSS and the Dean of OELR. Finally, for new employees, there are onboarding opportunities that introduce faculty to technology skills and best practices in online education. For existing personnel, there is maintenance of skills through workshops and one-on-one training at the FCSS. Mentors also help to determine the needs for future professional development, and the Online Education Committee, District Online Education Committee, the Division of OELR and FCSS all make recommendations for additional needs.

Support—District IT Hours of Operation

District IT technical staff are physically present to answer helpdesk calls Monday through Friday from 7 a.m. to 6 p.m. Additionally, the department has a 24x7 emergency hotline where users can call and leave a message and District IT personnel are notified. District IT management also monitors and responds to email after normal helpdesk hours.

Facilities—Computer Labs on Campus

The College has thirty-four instructional computer labs located throughout the campus (see Table 1). All these instructional computer labs are available to students on campus with the exception of the FCSS for Student Success, which is dedicated to faculty use. The total number of computers in these labs total one thousand two hundred twenty five. The vast majority of the computers are Windows-based machines with three hundred eight devices operating an Apple O.S. The FCSS for Student Success operates Macintosh computers with dual capability of running Windows or Apple operating systems. All these systems are maintained and supported

by the Technology Services department. The demand for additional instructional computer labs continue. Each year, different divisions request new computer lab setups.

Table 1. Instructional Computer Labs

Description	Room	Count
Graphics Lab (Mac)	TAS 226	28
Graphics Lab (Mac)	TAS 227	31
Graphics Lab (Mac)	TAS 115	15
Comm Arts Audio Lab (Mac)	Vil 507	25
Comm Arts Video Lab (Mac)	Vil 508	4

Counseling Laptops (Windows)	SSC	30
TOTAL:		1297

Facilities—Faculty Center for Student Success

The facilities for the FCSS offer both a workspace and lounge area for any full-time and part-time faculty members who wish to stop by to work or simply relax. This faculty support area includes the following features:

- 20, 26" large screen MAC computers, MAC/PC compatible with five additional separate individual workstations available outside lab
- Capability on all computers to operate Windows and IOS
- Microsoft Office suites, as well as MAC Office suites, Adobe Creative Suite, which includes Photoshop and Illustrator as well as others, Camtasia video editing tools are available
- Two sound booths equipped with multimedia MAC/PC's, studio quality microphones and other video creation tools, including Camtasia and Adobe Premiere editing software
- Connected and wireless printers
- Copy machine, scanning capabilities
- Scattered electronic charging stations
- Extra supplies for last minute needs such as flash drive, dry markers, erasers, laser pointers

Facilities—Data Center Funds Allocated

The College has grown throughout the years and the demand for technology has skyrocketed. This demand required the development and installation of various technology that included additional hardware. The College has a main distribution frame (MDF) located in the first floor of the library resource center building. The MDF houses all the crucial servers, storage area network, core switches, and all other technology the College relies on to continue its operations. The MDF has grown organically over the years and now necessitates upgrades to continue to properly house these crucial systems.

A 2015-2016 funding request for \$2.9 million was submitted for approval to address the needs of the MDF. The request was approved and it is now in the project analysis phase. This will ensure all College systems are housed in a data center that contains all the necessary facility requirements.

The District developed a 20-year educational facilities master plan to address the needs of the college. The plan includes distance education and the plan is updated every five years. For example, a new science building is going live in fall 2016. A project to update the Advanced Technology & Applied Science building. Additionally, there are design discussions to building a new football stadium and relocating the practice fields.

Hardware—Computers

All full-time employees receive a computer and monitor. Based on employee request and approval of immediate supervisor, a second monitor is setup to aid in efficiency. The majority of employees receive a voice-over-IP phone. There are numerous printers and multi-function devices where employees can print. Divisions and departments have networked copiers that are used for printing, copying, or scanning. Additionally, the College has a reprographics department where larger or more complex print jobs are accommodated.

Student print is available in instructional labs. Additionally, students can print in any of the multiple locations on campus that have student print stations. Student print stations are located in the learning resource center, business general studies, health science, and science math buildings. The College is in the process of migrating to a web-based student print system that will allow students to send print jobs from a mobile device, laptops, or through the Internet and release the print at any of the print locations at Saddleback College or at Irvine Valley College.

Hardware—Audio Visual

All instructional classrooms have a projector, screen, computer, monitor, small speaker, and a teacher desk installed. Technology Services computer-audiovisual technicians support the classroom equipment and provide quick training to faculty and staff on the use of equipment. Additionally, technology services has specialized equipment to assist in outdoor activities that require audiovisual equipment. This specialized equipment typically involves large outdoor speakers, large projection screens, projectors, and cellular hotspots for Internet access.

It is common for a computer-audiovisual technician to attend multiple events during the week to help support the various events throughout campus and provide dedicated audiovisual support. The College submitted funding requests in 2015-2016 and 2016-2017 to refresh the technology in the classroom. The current equipment is showing signs of wear and with the fast-pace of technology, the vast majority of the rooms cannot accommodate digital connections, such as HDMI or mobile phone connections. A standard was developed through the Technology Committee outlining a minimum level of technology that should be in the classroom assisting faculty deliver their lectures. The standard was integrated into the Technology Plan.

Saddleback has made substantial investments in its technology infrastructure. The College has created an air-blown fiber infrastructure with two tubes going to each intermediate distribution frame (IDF) connecting to the MDF in a star topology. Twelve strands of fiber run between the MDF and each individual IDF. Additionally, the College upgraded all its Cisco switches from the edge to the core. Each IDF Cisco switch stack is connected with two 10 Gbps

modules creating a 20 Gbps bandwidth path between each IDF and MDF. Two core switches with fiber modules connect each IDF switch stack in a redundant manner.

The College is embarking on a wireless network upgrade. The goal is to have ubiquitous wireless coverage throughout the entire college including athletic fields, parking lots, and roads. Based on the radio frequency (RF) survey conducted, an additional six hundred access points will be required to achieve the goal. Funding requests were submitted for 2014-2015 and a subsequent funding request for 2016-2017 was submitted to complete the project.

Saddleback Technology Committee developed a replacement schedule for all computers on campus. All employee desktop and laptop computers are replaced every four years. Equivalently, all non-computer lab classroom computers are replaced every four years. The replacement cycles are balanced between even and odd years to ease the burden on the budgets and technical staff. Instructional computer labs have a different replacement schedule based on the instructional program housed in the lab. For example, Computer-Aided Design (CAD) lab computers are replaced every two years while the language lab computers are replaced every four years. The trickle-down of the CAD lab computers are fed to other lab that do not require a two-year replacement cycle.

All other technical equipment has a replacement cycle based on their lifespan. For example, projectors are replaced every seven years while the storage area network (SAN) is replaced every five years.

Software

Saddleback College uses a multitude of software to assist in the efficient running of its operation. From instructional program specific software to the student information system, the College relies heavily on software for its program and departmental operations. Faculty drives all classroom instructional software acquisitions and renewals and is based on program need. The assigned technician works closely with faculty members to understand the needs of the program and assist in researching, implementing, and maintaining software to keep the program relevant and meeting the needs of students. Technology Services is responsible for the renewal of instructional classroom software and is allocated a budget to successfully renew the software. The software used in instructional programs is extensive. Technology Services is also provided a budget to renew the majority of non-instructional software with the exception of grant-funded programs.

District IT provides online software systems that enable students and employees access to vital services. A key software tool provided to students is My Site and My Academic Plan (MAP).

MySite

MySite is the enterprise Web portal that provides personalized online services to faculty, staff, and students at Saddleback College and Irvine Valley College. It provides students the ability to add and drop classes, view their semester grades, review transcripts, track the status of classes during registration, access email, view college announcements, change their mailing address, forward their college email, review appointment dates, order textbooks, store personal Web links, set automatic reminder emails, and more.

Faculty can view their class schedules, download rosters, generate waitlists and late add permit codes (APCs), submit grades, order books, and manage their class Website. Employees can use MySite to perform all of the functions of the Student Information System (SIS).

The District continuously updates the software to ensure it meets the needs of students, faculty, staff, and management. In Fall 2016, a new version named MySite 3.0 will be released. This updated version will feature a student success dashboard that will provide students one place they can go to see the progress they are making toward achieving their academic goal(s). MySite 3.0 will be fully mobile-responsive and include advanced search capabilities to assist students in finding the information they need. Additionally, each page will include tutorial videos produced by the student design team—the very students who assist us in the design of all our systems.

SmartSchedule

The District deployed the SmartSchedule program in 2004 to provide students an intuitive way to find the most appropriate classes that meet their requirements. The District is currently leading a district-wide work group to update the SmartSchedule to be mobile friendly and add additional helpful features. The current program has many rich features, which include:

- Allows students to easily browse or search the class schedule including textbook information
- Provides link to faculty profile information
- Shows the location of the class on a campus map for on-campus classes and provides a regional map with driving directions
- Details page includes the catalog description, topics covered, learning objectives, methods of evaluation, waitlist count
- Details page also includes all of the important deadline dates for that class including first meeting, drop date, refund date, last day to add with instructor permission. Student can also request an email reminder for any date listed
- Allows students the ability to add classes to their personal shopping cart, which can be used to detect any registration restrictions prior to their registration appointment. Classes are displayed in a day/time grid that automatically expands to their schedule and displays the classes in an intuitive calendar style format

- Students can also request a daily email be sent to them with the status of the classes in their cart or they can subscribe to a personalized RSS feed that is updated every 5 minutes
- Advanced search capabilities allow students to find classes matching a wide range of criteria, including keywords in description fields, instructor, location, class length, transferability, subject area and the day/time the class meets

MAP

My Academic Plan (MAP) is a program designed to guide students through the process of creating their own personal academic plan. It serves as a self-service tracking system for students and counselors to monitor student academic goals. This planning tool provides the student with a complete list of courses that help them achieve the goal broken out by the various categories (e.g. general education, major preparation, electives, etc.) The program is fully integrated with the District Student Information System which allows MAP to evaluate the student transcript every time the plan is accessed. This provides a continuous progress report of how the student is accomplishing his/her goal.

Workday

A key software tool provided to employees is the enterprise software—Workday. Workday provides access to employee's vacation information, benefits information, organizational charts, payroll, and is the financial system use to develop requisition and purchase orders. The software offers many intuitive videos and job aides that help employees be more effective and efficient. Additionally, a variety of reports can be found within the system such as financial reports, budgets, and organizational charts to name a few.

LMS and Building Block

The college is currently engaged in a process to evaluate the LMS, and consider Canvas and Blackboard in this discussion. This is an inclusive process that calls for participation between faculty, staff, and management to consider all aspects of a new LMS, including its instructional capacities, costs, support services and other software/hardware needed to support it. The current LMS (Blackboard) is supported by the vendor, who maintains servers externally, and provides student and technical support. There are contractual service levels agreements with Blackboard to ensure reliability, disaster recovery, privacy, and security.

Saddleback instructional technologists continuously investigate, pilot, and coordinate licensing for emerging instructional technology that can be easily integrated into the campus standard LMS. Some of these tools include apps such as VoiceThread, EduCanon, Turnitin, Google Tools, etc. These plugins are tested then presented to the Online Committee to determine use and/or subscriptions. Some apps may not plug directly into the LMS. Some are simply free or

inexpensive tools faculty can use in their classrooms and/or to create content. A good example is MonoSnap and other video creation tools that faculty can use from their homes.

There is a long list of instructional software installed on computer labs throughout campus. Table 2 provides an example of the type of software available.

Table 2. Examples of Classroom Software Available to Students

Adobe Suite	Autodesk AutoCAD	Avid
Camtasia Studio	Citrix Tools for Virtual Machines	Dev-PHP
Eureka	Grammar Fitness	Geographical Information Systems
IronPython	Kurzweil 3000	LinQ
Maternity Mania	MathPlayer	Microsoft Office Suite
Microsoft SQL	Microsoft Visual Studio Professional	MODELA
Movie Magic	Packet Tracer	Perseus Tutor
Psych Mania	Python	Protocols
QuickBooks	Reading Shape-Up	Solidworks
Soloist	SPSS—Statistical Analysis	TUKAcad
Vectorworks	Windows Operating System	Write It Right
ZoomText	ZXP Series Toolbo	Wireshark

ANALYSIS AND EVALUATION

Saddleback College has made significant investments in technology to provide up-to-date technological tools for all users of the College.

Saddleback uses various mechanisms to evaluate how effectively equipment and facilities meet the needs of programs and services for both classroom and online instruction. The Educational Facilities Master Plan includes information on online education, which includes a 20-year plan, updated every five years. The District Technology Plan and College Technology Plan all serve as additional means for evaluating the effectiveness of equipment and facilities related to online education. The FCSS is supported with staff and resources, and equipment in the center is determined through needs assessments, surveys, resource allocation requests and committees such as the Technology Committee, DOEC, the Online Education Committee and the DTC, who all evaluate the effectiveness of equipment and facilities dedicated to online education. BAARC funding requests reflect the need for additional infrastructure to support online education. The FCSS lab and the student labs in the library and LRC Tutoring Center are maintained and updated regularly per the equipment replacement schedule. WiFi services allow students to

use their mobile devices for their online courses, and additional requests to update wifi coverage are considered through the DTC's allocation process.

The college has an equipment replacement schedule for labs, equipment and other needs, and every four years, the college refreshes the technology in offices, labs, and classrooms. Resource allocation requests allow for off-cycle needs. The LMS is a key feature that supports online education, and is maintained at high levels in a collaboration between the District and the College. The district ensures that the LMS has sufficient storage to meet the needs of faculty and students, and as the use of the LMS has increased (due to increasing populations and offerings), so has additional support for the LMS through the district and college. When Blackboard needs to be updated, this is done during times that would have the least impact on students. Finally, the District has service level agreements with the vendor Blackboard to ensure reliability, disaster recovery, privacy, and security.

The Saddleback Technology Committee created technology replacement schedules to ensure all hardware is refreshed and meets the needs of the institution. The Help desk software allows end-users to provide feedback on the level of support they receive and the vast majority of the feedback is positive with end-users giving compliments to the support and expertise provided. Technology needs are discussed at the Technology Committee and the committee can make recommendations for funding.

The College provides adequate professional support to ensure the college meets its institutional goals and objectives. There is a firm commitment to providing up-to-date technology to all areas of the campus. The replacement schedules outlined in the Technology Plan are followed and sufficient funds are allocated to continue the refresh cycles.

The facilities provided are adequate with thirty-two computer instructional labs and 1,297 computers. The upgrades to Saddleback's infrastructure has left the college well-poised to handle current and future bandwidth demands. The upgrade and expansion of the wireless network will ensure the college meets the needs of a mobile student body and workforce.

2. The institution continuously plans for, updates and replaces technology to ensure its technological infrastructure, quality and capacity are adequate to support its mission, operations, programs, and services.

EVIDENCE OF MEETING THE STANDARD

Technology Plan

Saddleback recognizes the importance of technology and has a Technology Committee whose purpose is:

To engage in collaborative discussions regarding college technology, disseminate information to the campus community, empower students, faculty, and staff through the deployment and availability of technology resources, consider the concepts of universal access and design, and provide direction for technology that advances and supports our strategic plans.

The Technology Committee has broad representation from college constituents groups, including students, faculty, classified staff, classified managers, and academic administrators. The committee is tasked with creating the technology plan, reviewing it every year during the spring semester, and updating it accordingly.

An Online Education Committee with heavy representation from faculty across the College engages in collaborative discussions affecting online education. The District has a centralized Learning Management System (LMS) that is the primary tool for online education. Saddleback and Irvine Valley College have representation in the District Online Education Committee (DOEC). DOEC meets once a month and discusses all items related to online education such as building blocks for the LMS, migration to Canvas, or other topics affecting online instruction. The District Technology Committee (DTC) has representation from all three entities Saddleback College, Irvine Valley College, and District Services. DTC discusses all items related to technology and creates the District Technology Plan. The District Technology Plan is updated every year. DTC has broad representation from all three entities.

During 2015, the committee worked on creating the 2015-2020 Saddleback College Technology Plan. A draft of the plan was discussed at various governance committees such as Consultation Council and Management Team. The Saddleback Technology Committee approved the final version in spring 2016. The plan has eight goals and thirty-four objectives. The technology goals align with Saddleback's strategic goals and with the District Technology Plan goals.

The Technology Plan was developed by members of the Technology Committee with input and feedback from faculty, students, staff, and management. The objectives were submitted from various areas of the college, reviewed, discussed at length in the technology committee, and finally approved and added to the plan. The discussion included engaging in discourse with the responsible parties of the objectives and agreeing on target completion dates.

Saddleback Technology Committee used four data gathering methods to guide the development of the Technology Plan. First, the committee conducted a very successful technology survey in fall 2014 that resulted in 1,528 student responses, 65 faculty responses, and 41 staff/ management responses. Second, the committee had two open forums that were attended by students, faculty, and staff/management. One forum was conducted mid-day

while the second in the evening to provide the college community with multiple options for attendance. The third data collection method was through an Internet blog. The fourth was discussion through various College governance groups. These methods resulted in the collection in very rich data that help guide the development of the plan. The outcome was data-driven technology goals and objectives that will aid the College to achieve its mission, vision, and strategic goals.

Saddleback strives to meet community, industry, and labor demands. As such, the College is in a constant state of flux. The College has a long-term 20-year construction plan. The Technology Committee develop a set of standards to better assist in classroom technology construction planning. The standards were developed to ensure there is a minimum level of technology in the classrooms and aid the architects when designing the buildings. Standardization of equipment assist in system integration, support, and maintenance of equipment. The classroom technology standards were embedded into the Technology Plan and are updated every spring semester with the rest of the plan.

Administrative Unit Reviews

All divisions and departments submit an Administrative Unit Review (AUR) that outlines unit objectives and needs. The AUR is used to document the need for the technology funding requests submitted by each area. Saddleback College uses a centralized planning process to determine the College's technological needs. The college resource allocation process is the main process used for technology funding requests. Based on division or departmental needs, all divisions and departments submit their technology funding requests every year through TracDat. The funding requests are compiled by wing and division/department and submitted to the College Resource Committee (CRC), the main governance body that reviews all such requests. CRC sends all technology funding requests to the Technology Committee for initial review, feedback, and ranking of high, medium, low.

Resource Allocation Process

Saddleback College engages in resource allocation yearly. During the spring semester, all divisions and departments submit their resource allocation requests, which includes technology-funding requests. All requests approved are used for budget planning. Additionally, major technology investments \$150,000 or above qualify for basic aid funding. Basic aid technology requests are submitted every year beginning in December with a deadline of January. All divisions and departments can submit technology funding requests either through the college resource allocation process or/and through the basic aid technology funding process.

The College uses these two primary forms of funding for technology projects:

1. General Fund

- a. Unrestricted: 010
 - b. Restricted : 011
2. Basic Aid or Capital Outlay Fund: Fund 40

The Annual Planning Prioritization and Resource Allocation Process is the college process for the request of funding of new technology. This process uses primarily general fund for the funding of technology requests approved.

All technology funding requests for Basic Aid or fund 40 are initiated at the colleges or district services. Each entity follows its own process for creation and prioritization of each request. Saddleback receives all basic aid funding requests from all divisions/departments and the Technology Services department compiles it. These requests are presented to the Management Team, Consultation Council, and Technology Committee. These governance groups provide their input into the priorities. A list of priorities is created and presented again to these governance groups before voting is conducted at the district-wide technology committee.

All entities' technology requests for Basic Aid funding are discussed and prioritized at the district-wide technology committee. The Basic Aid Allocation and Recommendation Committee (BAARC) makes the final recommendation to the Chancellor.

Saddleback and the district office recognize the need to support the LMS and related programs for the success of its online courses (including additional services such as Turnitin.com and LMS building blocks); the District and colleges work together to allocate resources to support these needs. The district also has an innovation fund to support new ideas and needs. The College has discussions, research and analysis during its resource allocation process, where each department and division selects and prioritizes its needs. This goes to the respective unit vice president for prioritization and then up to the CRC for allocation decisions. Resources are then utilized in a variety of ways; for example, new instructional technologies are typically piloted for a year, evaluated by the Online Education Committee and if they are effective, recommendations are made to institutionalize those resources. If hardware or equipment is needed, the process is similar. Requests are made through divisions, routed to the appropriate channels during the CRC process, and also routed to the Technology Committee for ranking and consideration.

Technology Replacement

There are two primary replacement schedules. There is a replacement schedule for computer instructional labs, which illustrates each lab and its replacement cycle. There is also a replacement plan for all other computers and operational systems. The computer instructional labs have a unique replacement need due to the various educational programs served by the labs. Saddleback replaces computers based on its approved computer replacement schedules. Figure 1 demonstrates the number of computers replaced in the last three years.

The College retains service maintenance agreements in all instructional software that entitles the programs to the latest software versions. This subscription enables instructional programs to stay current with technology and have access to the latest versions of the software.

Technology Services technicians in consultation with individual faculty members upgrade the software every semester. Furthermore, based on faculty requests, additional licenses are purchases to the meet the demands of growing enrollments.

Saddleback is currently assessing the possibility of migrating to Canvas—a new learning management system. A number of discussions and presentations have been conducted to offer faculty various opportunities for feedback and discourse. Discussion take place in the Online Education Committee as well as at the District Online Education Committee. Information has also been provided to the Academic Senate. The discussion on-going with plans to make a final determination in the spring of 2017.

Figure 1. Number of Computers Replaced by Year

There has been a multitude of infrastructure replacements over the past years. Saddleback has installed an air-blown fiber (ABF) infrastructure that connects every IDF to the MDF with two ABF tubes. Twelve strands of fiber are in one tube leaving the second tube available for future growth and demand. Saddleback College replaced all end and core Cisco switches after the ABF upgrade allowing gigabit bandwidth to the desktops. In 2015, the College purchased a new NetApp storage area network (SAN) and upgraded the controller in the existing NetApp SAN. The SANs are now setup in high availability (HA) mode. Additionally, the college replaced a number of servers to keep up with college demands.

Technology Services plans to expand the deployment of virtual desktop infrastructure (VDI) over the coming years. The department has purchased a Nutanix block as a foundational block to the expansion of VDI. The plan is to virtualize one-hundred desktops over the 2016-2017 fiscal year. Based on technology survey results, the top two technology items for students and college employees is wireless and classroom technology. Technology Services is embarking on a phased wireless network upgrade. The first phase will cover areas with high demand such as the learning resource center (LRC) and student services building. Cisco wave 2 wireless technology will be deployed to expand the wireless network. Phase two of the wireless expansion project will cover all athletic fields, open areas, parking lots, and rooms. Simultaneously, Technology Services is in the planning stages of securing funding to refresh all classroom technology. The plan is to follow the Technology Committee approved classroom technology standards and deploy these standards in every Saddleback classroom.

The College is migrating from SharePoint 2010 to SharePoint 2013 to take advantage of all the integration with Office 2013 and mobile technology. SharePoint is the main intra-net portal utilized by all committees for data storage and collaboration. Furthermore, Technology Services is replacing the multiple outdated backup solutions currently in place with a cloud-integrated data protection Barracuda backup solution. College physical and virtual systems and all institutional data will be protected through the Barracuda backup solution.

ANALYSIS AND EVALUATION

Saddleback has made substantial investments in its technical infrastructure over the last years. The College setup an air-blown fiber infrastructure that provides two tubes to each IDF homerun back to the MDF. One of the tubes has 12 strands of fiber. The second tube can be used for future growth. The College upgraded all its Cisco switch infrastructure. The upgrade included the core switches and the edge switches. Each switch stack in the IDF has two 10 Gbps modules connected with fiber back to the core switches. One of the 10 Gbps modules connect to one core switch while the other 10 Gbps module connect to the other core switch. This provide maximum infrastructure reliability.

Saddleback hired Veritas to conduct a radio frequency (RF) analysis and PlanNet to create a plan for complete wireless coverage of the entire college. This wireless expansion and upgrade project will take in consideration the realities of the number of wireless devices students bring with them. The first phase of the project will cover the learning resource center, the business/general studies, and student services buildings. The quad area—an external location—will also be covered in the first phase. These were selected because they have the highest use. The second phase is slated to cover all other areas including athletic fields and open areas.

Technology needs are integrated into the College's strategic planning process through the Technology Plan and administrative unit reviews. The various surveys, open forums, and blogs informed the Technology Plan. This centralized planning process allows student, faculty, staff,

and management input into the type and quality of campus technology and this input is considered during purchasing and upgrades.

Technology needs and funding requests are allocated through the resource allocation process or BAARC process, which occur yearly. The respective divisions or departments first rank all technology requests before they are submitted to the resource committee. The Technology Committee, College Resource Committee, Consultation Council, District-wide Technology Committee, and BAARC committee review their respective requests. All these governance groups have ample representation from all constituents.

The technology needs and funding requests process combined with the established equipment replacement schedules ensure the technology is adequate to support the College's programs and services. The process and replacement schedule effectively meet the needs of the college. Saddleback meets the standard and has committed significant monetary resources into enhancing and refreshing its technology.

3. The institution assures that technology resources at all locations where it offers courses, programs, and services are implemented and maintained to assure reliable access, safety, and security.

EVIDENCE OF MEETING THE STANDARD

The vast majority of Saddleback's courses, programs, and services are offered onsite. The College has a 1 Gbps Internet connection through CENIC managed by AT&T. The main Internet connection is provided by the district office. CENIC also configured a private Cox WAN to our sister college Irvine Valley as a backup Internet link. Until recently, that bandwidth had a CENIC hardware limitation of 100 Mbps. Once the CENIC hardware refresh is complete, this backup link should have a maximum capacity of 1.8 Gbps.

There is a 100 Mbps Internet connection as a backup via the district office. District Services is looking to configure another 1 Gbps connection with a carrier to serve as a backup and not rely on the 100 Mbps connection. Saddleback College houses the district office on half of the second floor of Health Sciences building and the entire third floor. However, Saddleback and the district offices have two separate networks.

The College has a satellite office located in Laguna Woods that houses five computers. This remote site connects through two Cisco VPN devices that create a site-to-site VPN. Saddleback contracts with Cox for a 100 Mbps Internet access business line. Technology Services provides full computer and network support for this site. All services provided to on-campus staff are provided to Laguna Woods.

Saddleback has three levels of security. The College has two firewalls configured active-passive. The firewalls are the first line of defense guarding our institutional network. These firewalls are configured to protect our computer systems. The next level of system protection is the systems' anti-virus. Symantec is used at the local workstations and servers to act as the anti-virus protection. The College has also deployed a network access control system that assists in providing network level protection to the network. All staff are required to login with a unique username and password per Board policy. Saddleback uses active directory to provide granular user permissions to systems and all technical resources. The use and access of our intranet portal, SharePoint, is protected through active directory authentication and requires a username and password. SharePoint access is controlled through user rights and permissions.

The expansion of the "Internet of Things", whereby more and more systems are connecting on the network, requires segmentation to ensure data security. Data protections are provided by logical segmentation of the network using virtual local area networks (VLANs). For example, the irrigation system is in its own VLAN, the HVAC system is in its own VLAN, the lighting system is in its own VLAN, and many other systems are segmented.

The College is implementing electronic access-control for all doors. This will provide the ability to our police department to lock all doors in case of an emergency. Additionally, this will enhance security. Saddleback has also implemented Internet Protocol (IP) cameras. These cameras reside on their own VLAN and only the police department can view the content of the cameras.

There is redundancy in every IP switch with two 10 Gbps fiber modules connected to each switch stack. Each 10 Gbps fiber module has a homerun connection to either core switch A or B. This type of network redundancy provides a high level of network reliability. Saddleback uses server virtualization technology and uses hardware redundancy to host these virtual servers. Server clusters with RAID are applied to all hardware to ensure reliability.

The College disaster recovery strategy makes use of replication between two identical storage area networks. One of the SANs is housed at Irvine Valley College while the primary SAN is housed at Saddleback. These two SANs replicate constantly throughout securing institutional data. The systems are also backed up daily and the College is looking to purchase a more robust backup system—Barracuda to further enhance its disaster recovery strategy.

Saddleback uses three primary technologies for emergency notification: Blackboard Connect, Informacast, and our Dark Site (i.e. our college website turning completely dark). Blackboard Connect is used for mass email and text message notification. Additionally, Informacast is used to send an emergency notification through our VoIP Cisco phones. The third method is turning the college website dark and providing only emergency

information. These systems are tested yearly during the great California Shakeout that occurs in October.

The District has two governance committees that focus on business continuity and proper use and destruction of records. The Business Continuity committee meets quarterly and has broad representation from Saddleback, IVC, and District Services. The committee's purpose is to integrate the district and college plans into a comprehensive, integrated business continuity plan and coordinate business continuity needs district-wide. In 2014, the business continuity committee provided all its members and District executives with priority calling cards. These cards can be used in case of an emergency and provide the user/caller with priority access to the phones lines.

The Custodian of Records Committee is charged with outlining a clear process flow chart with defined roles and responsibilities for proper response to all requests on records and it meets bi-monthly or as needed. The committee discusses how records need to be handled and stored from inception to deletion.

Per direction from the District's bank, the district contracts TrustWave as the PCI-DSS QSA (qualified security assessor). Services they provide are monthly external vulnerability scans of our PCI network as well as the SAQ (self-assessment questionnaire). Additionally, the District is currently working with TrustWave to finalize an SOV for a district-wide PCI gap analysis.

Saddleback College uses Blackboard as the LMS. It is hosted by Blackboard and students use their active directory ID and password to access the system. Blackboard is accessible at all times from any system that has Internet access. Blackboard's managed hosting has an uptime service level agreement at 99.9%. Additionally, the hosted solution provides for a 24/7/365 operations and support, tier-4 data center, tier-1 redundant Internet connections, and redundant data backups.

ANALYSIS AND EVALUATION

The Technology Services department has a professional technical team of 13 full-time employees, two part-time, an administrative assistant, an assistant Director, and a Director. This professional team of individuals manage and maintain the College's technological infrastructure and equipment. The District IT team also plays a crucial role in supporting the infrastructure and both departments work closely with each other.

Technology Services has deployed various technologies to aid in the maintenance and support of the infrastructure. Systems such as What's Up Gold monitor the network and send both email and text messages when systems malfunction. Fusion software to monitor projectors and

inform of anomalies is deployed. Additionally, LogmeIn is a tool utilized by the help desk to provide technical support remotely, which lowers the time a technician spends on the field.

Saddleback has redundancy throughout the network infrastructure. There are two core switches and each IDF switch stack has two 10 Gbps modules. One 10 Gbps module connects to one core switch while the other 10 Gbps module connects to the other core switch. This provides reliability and redundancy throughout the College network. Additionally, there is a 1 Gbps Internet connection and a 100 Mbps backup. The backup will soon be upgraded to 1.8 Gbps.

Technology Services has two identical SANs replicating all data. One SAN is housed at our sister college Irvine Valley while the primary SAN is housed at Saddleback's IDF. This is currently serving as our DR strategy. Additionally, the College is looking to consolidate its multiple backup systems into an enterprise backup technology solution from Barracuda. The Barracuda solution will be both on-premise and cloud software as a service. Saddleback meets the standard and has appropriate systems to ensure reliability and safety.

4. The institution provides appropriate instruction and support for faculty, staff, students, and administrators, in the effective use of technology and technology systems related to its programs, services, and institutional operations.

EVIDENCE OF MEETING THE STANDARD

Saddleback College offers various training and support opportunities throughout the year to enhance the technology knowledge of students, faculty, staff, and managers. One-on-one training—the preferred method of faculty, staff, and management—is offered throughout the year through the ITSS and Technology Services offices. Professional development week, which occurs twice in an academic year, is an additional way faculty receive appropriate instruction on the effective use of technology. A help desk is available for students, faculty, staff, and management is available to provide support on technology systems. There are thirty-four instructional computer labs available for students to ensure access and knowledgeable technicians, staff, or faculty supports them. Additionally, specialized technology systems and software are available for students with accessibility needs and these systems come with proper technical support.

Professional Development Week

Saddleback College offers one week (five days in the fall and four days in the spring) of professional development at the beginning of every semester. A wide-range of workshops are offered during this week aimed to train faculty and other in the effective use of technology

systems and make them aware of institutional operations. Here is a sample of workshops offered in spring 2016:

- Video Creation
- Common Assessment Initiative
- Our Favorite Apps
- Voice Thread
- Online Education Initiative
- Geek Report—the Internet of Things and Analytics

Throughout the year, the college also supports various professional development opportunities related to technology and online education.

Classified staff have an all-day staff development event, which provides a multitude of training activities. The technical staff of Technology Services has an online subscription to technical training videos, which has an extensive video library of technologies. Saddleback also provides Lynda.com—an online training website with a vast library of training videos—to all employees. College employees can set their own online learning pace and plan through Lynda.com.

Saddleback College uses surveys to understand preferred methods of training and professional development favorite by faculty, staff, and management. In the 2014 fall semester, the Technology Committee conducted a survey inquiring on the preferred training method by faculty. The findings showed that faculty prefer on-on-one training, with training videos as the second preferred method and group training as the least preferred. These findings informed the staff of who conduct on-on-one training regularly with faculty. The FCSS for Student Success is a dedicated resource for faculty to receive all the training necessary on the effective use of technology. The center has a dedicated computer lab with dual boot computer operating systems that faculty can use and hone their skills while assisted by professional staff.

Technology Services established a formal Help desk that provides support to all faculty, staff, and management. Knowledgeable and friendly technicians that assist college employees staff the Help desk. The majority of technical calls are resolved over the phone by either walking the caller through the steps on how to resolve the issue or doing a remote control of their system. The help desk is available Monday through Thursday from 7:30 a.m. to 8 p.m. and Friday from 7:30 a.m. to 5 p.m. Employees can either call the help desk, walk-in to the Technology Services department, email to create a work order, or submit a work order online. Additionally, an application specialist within Technology Services provides one-on-one training to staff and management. Training is requested by calling the Help desk, creating a work order, or informally by speaking with the application specialist.

The College offers various forms of support for students. There is a dedicated student technical support team that focuses in helping students in all areas related to technology, such as how to

access the LMS, password resets, email problems, etc. The student Help desk team is housed in the library for ease of access and assistance. They provide assistance both on the phone and in-person. In addition to technical support, Saddleback offers various financial workshops for students. Financial Aid offers free weekly workshops to help students complete the state and federal financial aid applications. Students receive hands-on assistance with applications.

Students have access to thirty-four instructional computer labs located throughout the campus with the exception of the FCSS for Student Success, which is dedicated to faculty use. The total number of computers in these labs total one thousand two hundred twenty five. The learning resource center houses close to two hundred computer systems for student use and is the heaviest used student computer lab on campus.

Figure 2. Learning Resource Center Computer Lab

The Disabled Students Programs and Services (DSPS) offers a wide variety of support services and specialized instruction. The department's High Tech Center uses the latest hardware technologies and provides a wide variety of software, such as Dragon, Naturally Speaking, Jaws, Zoomtext Extra, and Kurzweil 3000. The College follows Web accessibility guidelines in its services to people with disabilities.

Accessibility workshop and equipment available to 100+ tutors and 4K+ students in tutoring center

Beginning in 2014, all LRC tutors are now paid to attend mandatory professional development training four times a semester, for a total of 16 hours. The professional development sessions cover a wide variety of topics including, but not limited to, the Socratic tutoring method, time management, subject specific best practices and more. The LRC in collaboration with the DSPS department and the College's alternative media specialist, trained tutors on a variety of software and hardware systems in order to support all levels and types of learners. Additional training and support for Kurzweil, a cloud-based reading software, and SmartPens, recording hardware, are provided to tutors on a regular basis. Moreover, ten SmartPens and three

Kurzweil scanning equipment are available to tutors and students in the Center. Additional this semester tutors are being trained to identify students who are struggling with reading as they are often unaware that they are dealing with a possible issue like dyslexia, or mild ADD, ADHD, and that these realities may be the cause of their struggles.

Workshops for students on how to succeed in online education (WOW-week of workshops)

During professional development week in both fall and spring, Saddleback College hosts a Week of Workshops (WOW) for all students. The focus of WOW is to provide a mini professional development week for students. These faculty and student lead workshops are designed to help students prepare for their courses and creates a connection with faculty outside of the classroom. This college-wide effort has increased in size and scope, and has scored up successful workshops like, how to succeed in an online course. Last year ten workshops were specifically dedicated to the topic of how to succeed in an online course. WOW week participants were surveyed both before and after each workshop. 66% of WOW participants said they felt "Not Ready" or "Somewhat Ready" for their courses. However after the WOW workshop over 82% of the respondents indicated they felt "very ready" or "ready" for their courses in the upcoming semester.

ANALYSIS AND EVALUATION

The College provides effective and ongoing instructional support in the use of technology for students, faculty, staff, and managers.

The College has numerous training workshops for students throughout the academic year. These workshops survey the participating students to better understand their needs. This drives future topics for workshops. The very successful student technology survey in fall 2014 also guide the type of training for students. The volume and type of questions received into the Help desk also guide the type of training for students.

A professional development survey is sent to all college employees. The survey ask respondents a series of questions that help guide the type of training offered for employees as well as the modality of the training. During professional development week, the workshops have surveys to ascertain the value and effectiveness of the workshops. This helps guide the workshops offered for the next professional development week. The employee originates much of the technology training by calling the Help desk and making an appointment with the Application Specialist II that conducts one-on-one training with employees. The employee is then asked to provide feedback through the work order in the Help desk system.

In respect to online education training for students, Saddleback conducts WOW week workshops aimed to prepare student to be successful in online classes. These workshops are

led by faculty and students providing student participants with an opportunity to connect with faculty outside of the classroom.

FCSS is dedicated to faculty support and focuses primarily in training faculty in all technology manners related to instruction and, especially, online education. The instructional training options range from specific department/discipline sessions to one-to-one sessions, to new faculty orientations, to myriad workshops focusing on ways to incorporate the latest instructional technology in classes.

5. The institution has policies and procedures that guide the appropriate use of technology in the teaching and learning processes.

EVIDENCE OF MEETING THE STANDARD

The SOCCCD District has board policies and administrative regulations that guide the appropriate use of technology at the College.

There are primarily five board policies guiding the appropriate use of technology. These are BP 3310 Records Retention and Destruction, BP 3508 Public Safety Camera System, BP 3530 Compliance with Payment Card Industry Data Security Standards PCI-DSS, BP 4000.2 Electronic Communication, and BP 5615 Student Records, Compliance with Family Educational Rights and Privacy Act (FERPA). The board policies are more broad and strategic with the administrative regulations providing more operational detail.

There are nine administrative regulations (ARs) that cover appropriate use of technology. AR 4000.2 is intended to inform all users (employees, student, and guests) of the rules regarding use of the District's digital information network. This regulation has five main sections focusing on the permitted uses of the network, user responsibilities, prohibited uses, incidental personal use, and the enforcing of the regulation.

There are two ARs that focus on records including student records. AR-3310 defines records as records, maps, books, papers, data processing outputs, and documents of the District required by Title 2 to be retained, including but not limited to records created originally by computer and "electronically stored information" (ESI). This AR focuses on records retention and destruction. AR 5615 focuses on student records and this regulation implements the federal Family Education Rights and Privacy Act of 1974 (FERPA) and State law.

Administrative regulations 3726 to 3730 focus on information technology and they cover data classification, access control, physical security, logging and monitoring, and remote access. AR 3726 classifies data into three categories: public, internal, and restricted. This AR assists to understand the importance of securely handling information available and ensuring data

protection. AR 3727 focuses on access control and its objective is to provide internal controls for access to District sites, information, and applications. The purpose of AR 3728 is to properly protect from potential physical and environmental threats the confidentiality, integrity, and availability of the data contained within District's information systems. AR 3729 ensures proper logging and monitoring so that potential security incidents can be detected early and dealt with effectively. Finally, AR 3730's objective is to control access to District information systems when connections are made to those systems from a remote location.

AR 3508 was established to delineate the purpose and scope of the public safety camera system. It states the District operates a camera system to ensure a safe environment for those who live, work, and visit the District. Additionally, video from the cameras will be recorded on a 24-hour basis every day of the week. The video is to be kept for an entire year and then later erased with the written consent of the Campus Chief of Police.

The Saddleback student handbook provides a wealth of information for students outlining available services, success tools, program, and important college policies.

A good example of process is the current evaluation of Canvas as an appropriate replacement of the current LMS Blackboard. The process began by first having a request from faculty to participate in the Online Education Initiative (OEI). There are currently six faculty participating in the OEI and they are using Canvas as the LMS. The process of making a decision whether to select Canvas as the LMS and replace Blackboard has been very thorough. This is an inclusive process that calls for participation between faculty, staff and management to consider all aspects of a Canvas, including its instructional capabilities, costs, support services and other software/hardware needed to support it. Additionally, there has been plenty of discussion at the Online Education Committee and the District-wide Online Education Committee as well as presentations to the Academic Senate.

ANALYSIS AND EVALUATION

Saddleback College has several board policies guiding the appropriate use of technology. These policies cover a broad spectrum from FERPA to record retention and destruction. Complementing these board policies are administrative regulations, which provide more operational detail. The importance of information security is highlighted by five administrative regulations guiding it. The combination of Board policies and administrative regulations guides Saddleback College students and personnel on the appropriate use of technology.

Additionally, the student handbook is an excellent source for students to understand all College procedures and institutional policies.

The College established procedures to follow when entertaining different technologies in the classrooms. These procedures are being follow now with the evaluation of the learning management system Canvas as a potential replacement of the existing LMS.

OBSOLETE

Financial Resources

Planning

1. Financial resources are sufficient to support and sustain student learning programs and services and improve institutional effectiveness. The distribution of resources supports the development, maintenance, allocation and reallocation, and enhancement of programs and services. The institution plans and manages its financial affairs with integrity and in a manner that ensures financial stability. (ER 18)

EVIDENCE OF MEETING THE STANDARD

Saddleback College is part of the South Orange County Community College District (SOCCCD), which is a basic aid district. This means that the District receives the money from local property taxes to fund its general operations rather than receiving money from the state. The board of trustees has adopted budget development principles and practices that are designed to maintain the financial integrity of the District and the Colleges. These principles and practices were developed jointly by the colleges in the District and are codified as BP/AR 3100, Budget Preparation, BP/AR 3101, Budget Management, BP 3101.5, Fiscal Management, and BP/AR 3110 [3.200] [3.207]. Basic Aid Funds Allocation Process. BP 3100 establishes the Budget Development Guidelines, found within each year's adopted budget [3.207], as the guiding principles used in budget development within the District. The guidelines were developed by the District Resource Allocation Council (DRAC) and are based on the board philosophy of supporting and following fiscal policies that:

1. Ensure wise and prudent use of public resources.
2. Promote financial strength and stability.
3. Maximize educational opportunities for students, in accordance with the district's mission statement.

DRAC is a participatory governance council charged with making recommendations for the income allocation model on which the District's budget is based [3.219]. The model developed by DRAC and contained within the guidelines stipulate that the Colleges and the District be allocated revenue using the state SB361 funding formula for all ongoing operating expenditures. Property tax revenue anticipated over and above the State funding formula is designated as Basic Aid funding and is used primarily for onetime expenditures.

The process for the allocation of basic aid funding is delineated in BP/AR 3110. This process ensures that basic aid funding is allocated for purposes related to capital construction, major renovation, infrastructure projects, and site development; the retirees benefit trust fund and other long term obligations; trustee elections, legislative advocacy, major legal fees and

judgments; major technology initiatives; and support for scheduled maintenance and smaller renovation projects.

The Basic Aid Allocation Resource Committee, (BAARC), which has College and participatory governance representation [3.202], is responsible for making recommendations for the allocation of basic aid funds to the chancellor and ensuring that recommendations consider the other principles contained within the budget development guidelines., including the maintenance of at least a 7.5 percent general fund reserve.

A District budget allocation model [3.203] is the computational tool used to allocate general fund unrestricted resources to Saddleback College. The College and the District work together closely to determine FTES calculations and income projections, and they meet prior to submission of FS320 reports to ensure College plans are reflected in the FTES submission.

Saddleback College has efficiently and prudently managed its financial resources. During College budget planning, the relationship between ongoing revenue and ongoing expenditure has always been considered, and the College has been careful not to obligate short-term revenue to long-term expenditures. As a result, the College has had sufficient resources to support existing instructional programs and support services and has been able to allocate resources to address institutional plans.

This planning strategy has served the College well and, during periods of reduced budgets (as experienced in the 2009-2010 fiscal year), has enabled the College to continue to support instructional services and student services without the need for sudden and dramatic budget cuts. Additionally, the College has been in a fiscal position to move forward and continue to apply funds to institutional plans. The College has consistently ended the fiscal year with a healthy ending balance. [3.204]

The College complies with California's 50 percent law, which requires that a calculation (by State formula) of 50 percent or more of the institution's resources be expended for direct instruction. The College complies the 50 percent law calculation based on College expenditures only. This enables the College to track its effect on the overall District calculation as well as to ensure maintenance of effort. The college has never fallen below the 50% benchmark and frequently far exceeds it [3.267].

In addition to the College's unrestricted general fund, the College receives restricted funds for state-funded categorical programs, local income (such as material fees, parking and health center revenue), grants and agreements, Community Education, and Student Government and Foundation revenue <https://www.saddleback.edu/uploads/cc/intro.pdf>. In recent years the College has placed increased focus on revenue generation from successful grants, which has increased available resources [3.205]. The College's restricted and unrestricted general fund budget for the 2015-2016 fiscal year totaled \$131,616,423. The District budget for all funds totaled \$711,000,000 [3.206].

In compliance with the budget development guidelines, the District has established an unrestricted general fund contingency of 7.5 percent, and the College maintains an additional contingency within its operating budget, which was \$7 million in 2016-2017 [3.207]. The SOCCCD has prepared well for most long-term financial obligations such as retiree health benefits, and the College and the District have fully paid off all prior-year debt obligations.

ANALYSIS AND EVALUATION

The SOCCCD operates within a resource allocation model determined by the SB361 funding formula; by developing an operating budget in accordance with this resource allocation model, College operations are protected from the volatility of property tax revenue, thereby eliminating the possibility of devastating cuts to programs and services in case the District's Basic Aid status ever changes. Further, property tax revenue collected over and above the SB361 calculation is allocated and expended as received, and the District has not obligated future anticipated property tax revenue by incurring debt.

Both the District and the College allocate resources in a fiscally prudent and responsible manner. One of the College's strengths is the manner in which it approaches financial planning. College finances are managed conservatively to ensure students' needs are met on both a short- and a long-term basis. College financial planning, over recent years, anticipated declines in operational revenue combined with inflationary increases in expenditures. This short-range and long-range planning has enabled the College to maintain fiscal integrity, as evidenced by the College's actions during the nationwide economic recession and state budget crisis. No general fund layoffs took place, and the general fund offset a portion of the State reductions to categorical programs. Due to the College's conservative long-range fiscal planning, the college is able to develop a balanced budget with a sufficient contingency each year, and district reserves remain healthy. Benchmarks for fiscal stability are always met and are often exceeded.

College funds are sufficient to support educational improvement and innovation. The District's resource allocation process (AR 3110) ensures that funding recommendations are driven by the SOCCCD Educational and Facilities Master Plan (EFMP) [EVI], the 5-Year Construction Plan [3.268], the 20-Year Funding Plan for Saddleback College Facilities and Scheduled Maintenance Plan [3.214]; the Districtwide Technology Plan [3.215] [3.215a]; the 2014-2020 Strategic Plan [3.208]; and other college and districtwide plans. The College's budget development process [3.209] ensures that funding is set aside for resource needs in support of the college wide plans such as strategic plan action steps, the student equity plan, and the basic skills initiative, and in response to departmental plans developed through the assessment and program review process. The College Resource Committee (CRC) proposed \$1,477,320 for fiscal year 2015-2016 for allocations in support of needs expressed through

the program review (PR) and administrative unit review (AUR) processes; these funds supported facilities, technology, equipment, and other institutional needs.

2. The institution's mission and goals are the foundation for financial planning, and financial planning is integrated with and supports all institutional planning. The institution has policies and procedures to ensure sound financial practices and financial stability. Appropriate financial information is disseminated throughout the institution in a timely manner.

EVIDENCE OF MEETING THE STANDARD

The mission and vision are the basis for all financial planning and decision-making at the College. The College's strategic planning process begins with the review and revision of the mission and vision statements, and they form the foundation from which all strategic goals, objectives, and action steps are developed [3.056a].

All planning on the level of academic programs and administrative units also begins with the College mission. Each department and unit develops a mission statement in alignment with the College's mission in order to develop Student Learning Outcomes (SLOs) or Administrative Unit Outcomes (AUOs).

The budget development and planning processes of the College ensures that financial resources are used to address College plans. The process of institutional planning and the integration of those plans are institutionalized within the College culture. The Planning and Budget Steering Committee (PBSC) and College Resource Committee (CRC) processes ensure that requests for funding are supported by assessment results and other data and that funded requests are in alignment with the College's mission and the 2014-2020 strategic planning goals [3.21].

The PBSC oversees the implementation of strategic planning goals, objectives, and action steps and measures and evaluates progress. The PBSC has co-chairs (the Director of Planning, Research, and Accreditation, and the Director of Fiscal and Contract Services), which creates a working relationship between the two offices that strengthens the integration of planning and budget. All financial decisions go through this body to ensure that all requests for expenditure are in alignment with the College's Strategic Plan before they are forwarded to the Consultation Council (CC), which in turn makes recommendations to the president.

Both the PBSC and the CC include representatives of all College constituent groups, and both groups are primarily recommending bodies; final decisions and accountability rest with the president. Based on input from the recommending bodies, the President's Executive Team (PET), which includes the vice president for instruction, the vice president for student

services, and the vice president for administrative services, meets with the president to set spending priorities and to ensure that these can be accomplished with a balanced budget.

Strategic planning is designed to lay the foundation for all resource decisions. The Saddleback College Strategic Plan reflects a strategic assessment of what will best support student needs, now and in the future, and how existing programs need to be adjusted to better address changing needs. PRs and AURs are conducted every two years by all instructional programs and student support and administrative service units of the College. These reviews are central to planning and allow for both short- and long-term planning. Additionally, PRs and AURs are the baseline document for programs and units to outline resource needs. On an annual basis, through the needs assessment process, resources are requested via the Resource Allocation Request form.

Resource allocation decisions are informed by the Strategic Plan, in conjunction with the needs of instructional programs and administrative units on campus as expressed in completed PRs and AURs. For example, all funding requests and allocation recommendations must include a justification that demonstrates an alignment between the Strategic Plan and a specific PR or AUR (EVIDENCE CRC RESOURCE REQUEST TEMPLATE). The College resource allocation model process documents describe the role of PBSC, the college's various planning committees, and CC in the planning and resource allocation process [3.200][3.201][3.265].

All resource allocation requests are submitted via TracDat and reference the relevant sections of the PR or AUR as well as the college's strategic plan. After being extracted from TracDat by the Office of Planning, Research, and Accreditation (OPRA), each college "branch" (Instruction, Student Services, and Administrative Services) prioritizes the list. After the prioritized list is reviewed by the CRC, the list is parsed out to the Technology Committee and the Safety and Facilities Committee for review and analysis. After input from the functional committees, the consolidated list is unified by CRC. PBSC will review CRC recommendations to ensure accuracy and adherence to the process and will forward the recommendations to the CC, which in turn makes funding recommendations to the college president.

PBSC collaborates with the Facilities Planning Committee, the Faculty Hiring Prioritization Committee, and the Academic and Classified Senates to develop annual budgets and make midyear adjustments as needed. The president presents budget and financial data at periodic planning retreats for review and recommendation by a broad representation of campus constituents (EVIDENCE CONSULTATION COUNCIL AGENDAS AND MINUTES, PBSC AGENDAS AND MINUTES).

Based upon all of the College's planning decisions, a budget is developed each year. Due to insufficient information from the state prior to adoption of the annual budget and the uncertainty of the state making revisions to the budget during the funding cycle, the College's financial planning process is, by necessity, flexible. Within those parameters, the

planning process is linked to the mission, the current strategic planning goals and objections and the EFMP.

Faculty have the most direct impact on students. Thus, requests for new faculty must demonstrate alignment with College mission and the strategic goals that relate to student learning and success. The Academic Senate oversees a faculty hiring prioritization process in which alignment with the College's Strategic Plan is one of the key determining factors. The resulting prioritized list is then forwarded to the president for further action. PBSC oversees the process for hiring new classified staff and managers, and this process also requires alignment with the Strategic Plan. Final approval of all positions rests with the president, who determines hiring priorities in conjunction with the budget and the most critical needs to meet College goals.

On an annual basis PBSC:

- Reviews resources and make recommendations for the College budget based on the calculations and assumptions outlined in the DRAG Model and the district's adopted budget.
- Monitors budget and resources to ensure success of the Strategic Planning Process.
- Completes an annual review of the Strategic Plan in the spring of each year, and makes suggestions to CC for reprioritizing goals and strategies.

Each spring, CC may reprioritize strategies based upon an annual review and an evaluation of the accomplishments during the year. The strategic directions and goals, however, remain constant for the entire three-year period of the plan. This annual review allows for revision of the College mission, and every third year the College revises its values and vision along with the mission. This review also ensures that the College and District mission are in alignment as prescribed in B-10, Missions, which requires an annual evaluation and, if necessary, revision [3.209].

At all levels College leadership is intimately involved in this process. An annual presentation is made to the board describing the College strategic planning and budget process [3.211] [3.211a] [3.211b].

There are a variety of financial control mechanisms in the form of policies and procedures to insure the District operates within its budget and remains financially sound. Board policies and accompanying regulations related to budgeting are in the 3000 (Business) series. These policies, along with the Budget Development Guidelines discussed in III.B.1 above, provide direction for budget development [evidence financial development booklet]. Another mechanism to insure control and prevent overspending is the District's financial software system, Workday, an enterprise resource planning program, that prevents the submittal and authorization of requisitions when funds in the specified account are insufficient. The District consistently ends the fiscal year with a positive ending balance [3.204]. SOCCCD standard practice is to use one year's ending balance as the following year's beginning balance. The

Annual Budget and Financial Report (CCFS-311) on the California Community College Chancellor's Office web page demonstrates sound financial practices and financial stability.

ANALYSIS AND EVALUATION

Saddleback College has a reputation for excellence in academics and service to students. As a result of the College's strong commitment to its mission and to continuous improvement and innovation, its financial resources are necessarily in great demand by all groups on campus, thus increasing the importance of linking financial planning to institutional planning in order to make decisions that best utilize College resources.

Financial planning at Saddleback College is integrated with all institutional planning. The College's financial planning processes are structured to reflect and support the college's mission and institutional plans. Adequate policies and procedures are in place to ensure sound financial practices and financial stability. Leaders in the participatory governance process are integral to the College's planning and budget process, and through the participatory governance processes appropriate financial information is disseminated throughout the institution in a timely manner.

3. The institution clearly defines and follows its guidelines and processes for financial planning and budget development, with all constituencies having appropriate opportunities to participate in the development of institutional plans and budgets

EVIDENCE OF MEETING THE STANDARD

Both the District and College follow clearly defined policies, guidelines and processes for financial planning and budget development. The district's budget is driven by the DRAC model and the basic aid allocation.

DRAC is the district wide participatory governance council charged with making recommendations for the income allocation model upon which the budget is based. It is charged with development and oversight of the allocation process for Unrestricted General Funds and makes recommendations to the chancellor. As described in III.D.1 above, the DRAC model is an allocation model for the district which distributes available general fund unrestricted resources in accordance with the state's funding formula [3.266]. DRAC ensures a fair and equitable distribution of unrestricted general funds to Saddleback College, Irvine Valley College, Contingency Reserve, General Expenditures, and District Services. In essence, the DRAC model allocates funding to the colleges in accordance with the SB361 funding formula, and after DRAC Model allocation the remaining funds are allocated by the Basic Aid Allocation procedure and process outlined in BP and 3110.

This Basic Aid Allocation process is implemented by the BAARC) which is chaired by the vice chancellor for business services. BAARC ensures that basic aid funding is allocated for

purposes related to capital construction, major renovation, infrastructure projects, and site development; the retirees benefit trust fund and other long term obligations; trustee elections, legislative advocacy, major legal fees and judgments; major technology initiatives; and support for scheduled maintenance and smaller renovation projects. BAARC projects available funding based upon a conservative estimate for property tax and student fee income, which makes up the total amount available for allocation. After funding is allocated for long term obligations and fixed expenses, this amount is subtracted from the total amount available for allocation to yield the net amount available for allocation. As outlined in the board policy and administrative regulation, the net amount is allocated by BAARC based on recommendations by the Capital Improvement Committee (CIC) and the District Technology Committee (DTC); these recommendations are based on districtwide plans such as the EFMP [ADD EVIDENCE LINK], the 5-Year Construction Plan [3.213], the 2-Year Facility, Renovation, and Scheduled Maintenance Plan [3.214], and the Districtwide Technology Plan [3.215] as well as the Districtwide Strategic Plan, college strategic plans, and college technology plans. BAARC recommendations for the 2015-16 fiscal year totaled approximately \$57 million [3.216].

PBSC reviews and monitors resources and makes recommendations to CRC for the college budget in accordance with the calculations and assumptions outlined in the DRAC Model and the district's adopted budget. PBSC and CRC processes ensure that requests for funding are supported by assessment results and other data and that funded requests are in alignment with the College's mission and the 2015-2020 Strategic Planning goals [EVIDENCE CRC ALLOCATION REQUEST TEMPLATE, and 3.211].

ANALYSIS AND EVALUATION

The College's processes for financial planning and budget development are clearly defined and widely communicated through board policies and administrative procedures, the district's DRAC [3.219] and BAARC [3.218] committee charge and the models developed by these committees and by the college's budget development and resource allocation processes as outlined by PBSC and CRC. Each of the District and College committees and processes identified include constituency group representation [EVIDENCE GOVERNANCE MANUAL]. Committee information, including notes and handouts, are available on the College and District SharePoint sites [COLLEGE COMMITTEES PAGE ON SADDLEBACK SHAREPOINT, DISTRICT COMMITTEES PAGE ON SOCCCD SHAREPOINT.][3.220] [3.220a].

For College planning purposes the DRAC formula works very well. Because the formula is clearly understood and the fundamental principles of the model do not change, the College can clearly plan to allocate its resources with an understanding of the effect on income the following year [3.266]. Because the rules surrounding income generation for the College will not change unless a recommendation is submitted by DRAC and approved by the chancellor, the College is provided the tools to plan strategically. Additionally, the method used to calculate revenue for distribution through the model is reliable and consistent.

Fiscal Responsibility and Stability

4. Institutional planning reflects a realistic assessment of financial resource availability, development of financial resources, partnerships, and expenditure requirements.

EVIDENCE OF MEETING THE STANDARD

Assessment of available resources is an ongoing, year-round, multiyear process at Saddleback College. Funding for College programs and services is realized through multiple funding sources. The primary funding source is the general fund unrestricted allocation, which is calculated using a revenue-based District resources allocation model, and the allocation of these resources is guided by District Budget Development Guidelines and the basic aid funds allocation process. BAARC projects available basic aid funding based upon a conservative estimate for property tax and student fee income minus the colleges operating revenues, which makes up the total amount available for allocation. Property tax estimates are provided to the district by the County of Orange, and the South Orange County Community College District uses the most conservative estimates provided in its calculations.

Unrestricted general fund operating revenues allocated to the College are calculated using a revenue-based formula. While the College is part of a basic aid district, the District uses the state's S361 funding formula to calculate and allocate revenue to the colleges. In essence, the income projection used to fund the FTES is taken directly from the state apportionment calculation for the prior year, and adjustments in the final State budget, positive or negative, such as cost-of-living adjustments and growth, are factored into the revenue calculation. The implementation of this model is overseen by the DRAC. The DRAC model distributes available general fund unrestricted resources in accordance with the state's funding formula; remaining funds are allocated in accordance with the basic aid allocation procedure and process outlined in SP-3110 and SP-3110. The College allocation is then assessed for District Services such as payroll, accounting, and purchasing, and is assessed for the contingency and for districtwide general expenditure items that cannot be attributed to one College or the other such as legal fees.

In addition to local funding through property taxes, the College also receives funds from additional sources such as state categorical programs; local revenue; grant revenue from Federal, State and local sources; Community Education; Associated Student Government; and Foundation revenue. Nonresident tuition FTES income, based on prior-year actual receipts, is added to the income formula. Prior-year ending balances for the District are added to the overall income, and a budget allocation is set for the College. The ending balance for the College, whether positive or negative, is added or subtracted to the income allocation. Local income, such as parking revenue or health fee income, is budgeted at prior-year actual income levels. Student fee income is budgeted at prior-year income levels and is adjusted in the spring after spring enrollment revenues are known. Budgets are established

for grant activities when formal grant award or partnership agreements are received and board-approved. Community Education revenues are budgeted slightly below prior-year actual income levels, and Student Government revenue is calculated using the minimum guaranteed income derived from vending contracts.

The College's planning process, which ultimately results in budget allocation, is a transparent process and is open to all who choose to participate. Planning and budget committees include:

- Consultation Council
- Planning and Budget Steering Committee
- Educational Planning and Assessment Committee
- Technology Committee
- Safety and Facilities Committee
- College Resources Committee

The budget development and planning processes of the College ensures that financial resources are used to address College plans. PBSC and CRC processes ensure that requests for funding are supported by assessment results and other data and that funded requests are in alignment with the College's mission and the strategic planning goals. Resource allocation decisions at the College are informed by the Strategic Plan, in conjunction with the needs of instructional programs and administrative units on campus as expressed in completed PRs and AURs. For example, all funding requests and allocation recommendations must include a justification that demonstrates an alignment between the Strategic Plan and a specific PR or AUR.

PBSC, as its name indicates, reviews and studies budget materials for all funds, programs, grants, and projects [3.222c]. This Committee makes recommendations to CC regarding the allocation of funds, and the CC, after review, will make a recommendation to the president, who ultimately makes the final decision as to the allocation of resources to address College plans [3.222b]. Due to the College's conservative long-range fiscal planning, the college ensures that fiscal commitments are anticipated and that funds are allocated appropriately. As such, the college is able to develop a balanced budget with a sufficient contingency each year, and district reserves remain healthy. Benchmarks for fiscal stability are always met and are often exceeded.

ANALYSIS AND EVALUATION

The planning and budgeting process is robust and transparent. Information about available funds is available to planners and decision makers throughout the process and results planning that reflects realistic assessments of financial resource availability. The Basic Aid allocation process ensures that institutional priorities are addressed with the district's overall budget, and the college's resource allocation process ensures that institutional plans in support of the college's

mission are funded appropriately. Institutional Planning is conducted in accordance with a realistic assessment of available funds.

5. To assure the financial integrity of the institution and responsible use of its financial resources, the internal control structure has appropriate control mechanisms and widely disseminates dependable and timely information for sound financial decision making. The institution regularly evaluates its financial management practices and uses the results to improve internal control systems.

EVIDENCE OF MEETING THE STANDARD

The College uses accounting software program, Workday, to establish budgets and expend resources. Budgets use an account code structure which allows the accounting system to direct transactions to those fiducially responsible for the accounts related to those specific transactions. Purchase orders are created online and go through an automated approval process, and those approval requirements are built into the system based on account code structure. Control mechanisms are in place to ensure that requisitions cannot be submitted unless sufficient resources are available. Approvals are in place for all requisitions, depending upon the classification of the expenditure; expenditure classifications and account code structures are used to route budget amendments, journal entries, expenses, invoices, and requisitions. For example, all requisitions using restricted funding sources such as instructional fee-based supplies are routed to a fund manager to ensure they are appropriate. All departments have access to the Workday online system, and any College employee can access the system by requesting access. Users have access to all College accounts in the Workday system and can develop real-time reports if needed. If departments or employees request or require reports that are more complex than the reports that Workday provides, the College's Fiscal Office is available to assist.

Both the District and the College have controls in place that assure effective oversight of all financial matters. Expenditure of grant funds requires board approval. Once the grant has been authorized, the Fiscal Office prepares a budget amendment, which is submitted to the board. Once the budget is authorized, fund balances are entered into the accounting system, which prevents approval of purchase orders in excess of budgeted funds. Only authorized individuals can enter requisitions into the system, and all requisitions are scrutinized and approved by appropriate grant project staff and administrators as well as the college Fiscal Office. The grant project staff, in conjunction with a representative from the Grants Office, monitors fund expenditures to make certain that they are in compliance with the terms and conditions of the grant and other relevant accounting standards. Regular reporting is completed in accordance with grant specifications.

The District accounting staff reviews project reports to verify that they are accurate before the report is certified by the vice chancellor, business services, or designee. Similar processes

are in place that assure the appropriate oversight and management of externally funded programs, such as Perkins appropriations and state-funded categorical programs.

All contracts are managed by the Office of the Vice Chancellor, Business Services. Per BP 2100, Delegation of Authority to the Chancellor, and BP 3200, Purchasing and Contracts, the vice chancellor, business services, is given the authority to approve contracts that do not exceed \$100,000 [EVIDENCE]. The vice chancellor submits a report to the board on a monthly basis listing all contracts that have been approved for board ratification. Contracts that do not fall within the parameters set for the Vice chancellor are submitted directly to the board for approval. Contract expenditures and payments are managed through the Workday accounting system, which monitors purchase orders and payments.

The College Foundation board of governors and the Foundation director are responsible for overseeing funds deposited with the Foundation, which includes funds generated by auxiliary organizations [3.232][3.233]. Investment reports as well as income and expenditure documentation are submitted to the Foundation board of governors at their regularly scheduled meetings and presented to the SCCCSD board of trustees annually [EVIDENCE BOARD PRESENTATION].

The Office of the Vice Chancellor, Business Services, manages institutional investments and asset management. Funds are invested in compliance with the law through the County Treasurer's Office. Monthly informational reports are submitted to the Board of Trustees [EVIDENCE BOARD REPORTS].

An independent certified public accounting firm conducts a financial and compliance audit of the District Business Services Office annually, in accordance with CA Education Code 8848; the Student Financial Assistance Office, which accounts for financial aid in a separate fund, is also audited to ensure federal guidelines are followed. The annual financial and compliance audit is conducted in accordance with generally accepted auditing standards and is intended to obtain reasonable assurance that financial statements are free of material misstatement. This process includes examining and testing supporting documentation as well as examining internal controls. Reviewing internal controls is the mechanism that provides feedback on processes that require improvement or adjustments. The audit assesses the accounting principles used and ensures that management's estimates to provide reasonable assurance of detecting material misstatements that could affect the financial statements as a whole.

As part of the audit process, the adopted budget (expenditure plan) is compared to actual expenditures in an effort to establish any variance. The College is required to explain variances of any significance to the auditors to determine if funds were expended on the educational programs and activities as originally planned and intended.

Similarly, the Saddleback College Foundation Finance Committee annually prepares and adopts a budget of operations income and expenses [3.231]. At each of their meetings, the

Finance Committee reviews actual versus budgeted expenditures and income and makes adjustments when necessary.

The Board of Trustees' Audit Committee is charged with monitoring the audit process and reviewing the final audits. Multiple signoffs are required on any type of College expenditure to ensure expenditures are compatible with College plans. The Strategic Planning Process Resource Request form [3.234] requires identification of outcomes and an assessment of the expenditure.

ANALYSIS AND EVALUATION

The internal control structures in place at the College and the District demonstrate effective control mechanisms and ensure information for sound financial decision making is dependable and timely. Financial management practices are aligned with generally accepted accounting principles, auditing guidelines, and federal guidelines. Ongoing business process analysis and related process improvements support continuous improvement of internal control systems.

6. Financial documents, including the budget, have a high degree of credibility and accuracy, and reflect appropriate allocation and use of financial resources to support student learning programs and services.

EVIDENCE OF MEETING THE STANDARD

An audit of the District's financial statements and supplementary information, including reports on compliance, is conducted in the fall of every year. This audit is performed by an independent certified public accounting firm. The audit is designed to provide reasonable assurance whether the financial statements are free of material misstatement. It considers the District's internal controls over financial reporting, which includes examining, on a test basis, evidence supporting the amounts and disclosures on financial statements. The audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall basic financial statement presentation [3.236]

An independent certified public accounting firm conducts a financial and compliance audit annually, in accordance with California Education Code, Section 8848. The annual financial and compliance audit is conducted in accordance with generally accepted auditing standards and is intended to obtain reasonable assurance that financial statements are free of material misstatement. This process includes examining and testing supporting documentation as well as examining internal controls. Reviewing internal controls is the mechanism that provides feedback on processes that require improvement or adjustments.

As part of the audit process, the adopted budget (expenditure plan) is compared to actual expenditures in an effort to establish any variance. The College is required to explain

variances of any significance to the auditors to determine if funds were expended on the educational programs and activities as originally planned and intended. The Board of Trustees' Audit Committee is charged with monitoring the audit process and reviewing the final audits.

The College's budget sufficiently supports all instructional programs and this is verified through assessment of student learning. When assessment of student learning indicates that additional budget allocations are necessary to support improvement, the CRC process is utilized for the request, prioritization, and funding of programmatic needs.

ANALYSIS AND EVALUATION

The College regularly evaluates its financial management system and process, as well as all recommendations for system and process improvement, and it implements recommendations that are appropriate [EVIDENCE BPA SESSIONS AND RELATED PLANS].

7. Institutional responses to external audit findings are comprehensive, timely, and communicated appropriately.

EVIDENCE OF MEETING THE STANDARD

As described in III.D.6 above, an audit of the District's financial statements and supplementary information, including reports on compliance, is conducted annually by an independent certified public accounting firm. [3.231]. The board regularly receives reports regarding the district and colleges' budget, fiscal conditions, financial planning, and audit results [3.237]. The Board of Trustees' Audit Committee is charged with monitoring the audit process and reviewing the final audits. All Board of Trustees agendas, attachments, and minutes are publicly available on the District website.

At the college level, CC, FSC, and the Management Team regularly review similar reports related to the college's budget, fiscal conditions, and financial planning activities.

The District's audit findings over the past six years have been minimal and all audits have resulted in unqualified reviews. Those minor findings that have been identified were resolved in a timely manner [3.235]. The results of these audits and the resolution of findings are a part of subsequent audit reports and are available on the district SharePoint site.

ANALYSIS AND EVALUATION

The District resolves all audit findings in a timely fashion. Information about the college and district budget, fiscal conditions affecting the college budget and financial planning, including audit results, are provided college wide and districtwide on a regular basis.

8. The institution's financial and internal control systems are evaluated and assessed for validity and effectiveness, and the results of this assessment are used for improvement.

EVIDENCE OF MEETING THE STANDARD

The annual financial and compliance audit is conducted in accordance with generally accepted auditing standards and includes examining and testing supporting documentation as well as examining internal controls. Reviewing internal controls is the mechanism that provides feedback on processes that require improvement or adjustments. The audit evaluates any variances between adopted budget and actual expenditures to determine if funds were expended on the educational programs and activities as originally planned and intended.

The College's accounting officer assists departments with categorical program accounting, and the senior accounting specialist in the College's grant office assists grant staff with grant accounting. The District's senior accounting specialist reviews expenditure reports on all categorical programs and grants to ensure reported expenditures are necessary, reasonable, allowable, and allocable. An independent certified public accounting firm conducts examinations and tests in accordance with state and federal audit guidelines, and government agencies conduct their own audits. External and governmental audits have not identified any spending irregularities requiring correction.

Staff responsible for categorical and grant-funded programs regularly attend state, regional, and nationwide conferences and participate in webinars that provide guidelines and interpretations of regulations to ensure compliance. Examples of improvements resulting from staff professional development include federal procurement guidelines as well as time and effort reporting improvements [EVIDENCE TAACCCT GRANT MANUAL].

ANALYSIS AND EVALUATION

The College's financial and internal control systems are regularly evaluated and assessed. While repeated audits have found the College's financial and internal control systems to be sound, college and district staff regularly assess and refine processes [EVIDENCE WORKDAY FISCAL TEAM MEETING AGENDAS, MINUTES, AND TASK LISTS].

9. The institution has sufficient cash flow and reserves to maintain stability, support strategies for appropriate risk management, and, when necessary, implement contingency plans to meet financial emergencies and unforeseen occurrences.

EVIDENCE OF MEETING THE STANDARD

The District is a locally-funded Basic aid district, as described in III.D.A above, and the revenue received from property taxes exceeds the funds it would receive through SB361, the

state's funding model for community colleges. Revenue is received monthly, with the largest tax payments made in December and April. BP 3100, Budget Preparation, [3.200] states, "Unrestricted general reserves shall be no less than 7.5 percent." In addition to this reserve required by policy, each College maintains its own reserve. The College is fiscally conservative, does not use its reserves, and typically maintains a healthy ending balance fiscal responsibility [3.204].

The capital outlay fund has a substantial cash balance committed to specific future capital projects [EVIDENCE CAPITAL OUTLAY FUND BUDGET REPORTS]. This cash may be temporarily transferred to another fund for the payment of obligations in accordance with the State Budget and Accounting Manual [EVIDENCE].

The District is not self-insured but participates in several joint power agreements, such as Statewide Association of Community Colleges (SWACC) for property and liability, Self-Insured Schools of California (SISC) for medical, and Protected Insurance Program for Schools (PIPS) for workers' compensation, thus lessening risk factors and reducing costs. The District reviews its coverage annually in the spring and carries an excess liability policy. The District implemented an irrevocable trust for its other post-employment benefits (OPEB) obligation, such as retiree health benefits, in spring 2008 and fully funded the liability in June 2008 [EVIDENCE BOARD AGENDA ITEM AND CURRENT ACTUARIAL STUDY].

The College and the District have taken numerous additional steps in recent years to reduce financial risk to the District. These include numerous professional development presentations on how to identify and reduce risk [3.238], the development and implementation of contract templates [EVIDENCE ON DISTRICT SHAREPOINT SITE] and contract signing processes [EVIDENCE CONTRACT COVER SHEET], and the hiring of a new district risk manager.

ANALYSIS AND EVALUATION

The college maintains healthy ending balances and the district's unrestricted fiscal reserves have not dipped below 7.5% in accordance with district policy.

10. The institution practices effective oversight of finances, including management of financial aid, grants, externally funded programs, contractual relationships, auxiliary organizations or foundations, and institutional investments and assets.

EVIDENCE OF MEETING THE STANDARD

The College uses accounting software program, Workday, to establish budgets and expend resources. Budgets use an account code structure which allows the accounting system to direct transactions to those fiducially responsible for the accounts related to those specific transactions. Purchase orders are created online and go through an automated approval process, and those approval requirements are built into the system based on account code

structure. Control mechanisms are in place to ensure that requisitions cannot be submitted unless sufficient resources are available. Approvals are in place for all requisitions, depending upon the classification of the expenditure. All departments have access to the Workday online system, and any College employee can access the system by requesting or requiring access. Users have access to all College accounts in the Workday system and can develop real-time reports if needed. If departments or employees request or require reports that are more complex than the reports that Escape provides, the College's Fiscal Office is available to assist.

The Student Financial Assistance Office determines eligibility and enters the awards into the PowerFAIDS system. The District Business Services Office draws down the funds (4.25) three days prior to the disbursement date, following the Federal guidelines that require the funds must be spent within three days of receipt. An independent certified public accounting firm audits the Student Financial Assistance Office and the District Business Services Office as part of the annual audit. In the District's financial statements, financial aid is accounted for in a separate fund [EVIDENCE DISTRICT'S FINANCIAL STATEMENTS].

Every Saddleback College group or outside donor raising funds for College programs and scholarships is required to sign an account agreement with the Saddleback College Foundation Office. This agreement states that the group will follow established guidelines and procedures of the foundation and the SOCCCD. A group representative signs the document as the account administrator, the donor or sponsor cosigns, and the foundation director cosigns. This document then authorizes deposits and expenses from the account [3.225]. The account is assigned a name and given a code designation so it can be tracked in the Escape accounting system.

New account administrators are given a copy of the Saddleback College Foundation policy guidelines, procedures, and accepted nonprofit standards for fund expenditures [3.226]. Money raised from fundraising activity is recorded on a deposit advice form [3.227]. The money and the deposit advice form are given to a campus safety officer, who signs a receipt for the funds and hand-delivers them to the District Business office. The District Business Office matches the amount of the deposit indicated on the form, prepares a bank deposit, and inputs the deposit into the accounting system. A second copy of the deposit advice form is sent to the foundation office, which checks to ensure that funds are coded correctly so they are deposited into the correct account. The donation information is then recorded as a permanent record into a donor database, and tax ID letters are generated and sent. The computerized accounting record for each project can be accessed at any time for review by the foundation, the District, and the account administrators.

All funds expended from foundation accounts must be requisitioned by account administrators. The expense request goes through an approval process in the following order: cost center manager, dean, vice president, and then the foundation director. After approval by all, requisitions are sent to the District Business Office to be processed and

checks cut. If the item or service is ordered, a purchase order and an invoice are required for payment. Before any expenses over \$10,000 can be approved by the foundation director, the requisitions are ratified the foundation's Board of Governors Finance Committee at its regular meeting.

As discussed in III.D.5 above, the District and the College also have various controls in place that assure effective oversight of all financial matters for grants, externally-funded programs, and contracts.

ANALYSIS AND EVALUATION

The College and the District exercise effective oversight and control over all financial and business activities of the College and the District. Systems are in place to provide checks and balances. Internal control is assessed by the District Business Office, and internal audits routinely take place to ensure compliance with generally accepted accounting principles, auditing guidelines, and The Blue Book (Accounting, Recordkeeping, and Reporting by Postsecondary Educational Institutions for Federally Funded Student Financial Aid Programs). After each check disbursement the Student Financial Assistance Office and the District Office compare revenues and expenditures.

For each of the past six years the independent auditor reports have been unqualified for the District's financial statements. The District received unqualified reports from the auditors on compliance for the past six years and has no findings related to Federal Title IV Regulation compliance. The recommendations on all findings have been implemented.

Liabilities

11. The level of financial resources provides a reasonable expectation of both short-term and long-term financial solvency. When making short-range financial plans, the institution considers its long-range financial priorities to assure financial stability. The institution clearly identifies, plans, and allocates resources for payment of liabilities and future obligations.

EVIDENCE OF MEETING THE STANDARD

Saddleback College has efficiently and prudently managed its financial resources. During College budget planning, the relationship between ongoing revenue and ongoing expenditure has always been considered, and the College has been careful not to obligate short-term revenue to long-term expenditures. As a result, the College has had sufficient resources to support existing instructional programs and support services and has been able to allocate resources to address institutional plans.

This planning strategy has served the College well and, during periods of reduced budgets, has enabled the College to continue to support instructional services and student services

without the need for sudden and dramatic budget cuts. Additionally, the College has been in a fiscal position to move forward and continue to apply funds to institutional plans. The College has consistently ended the fiscal year with a healthy ending balance [3.204]

The College's restricted and unrestricted general fund budget for the 2015-2016 fiscal year totaled \$131,616,423. The District budget for all funds totaled \$711,000,000 [3.206].

The District has established an unrestricted general fund contingency of 7.5 percent, and the College maintains an additional contingency within its operating budget, which was \$2.75 million in 2015-16. The SOCCCD has prepared well for most long-term financial obligations such as retiree health benefits, and the College and the District have fully paid off all prior-year debt obligations. All other post-employment benefits are fully funded, and the district conducts an actuarial study on at least a biannual basis to ensure it remains fully funded [EVIDENCE AUDIT REPORT].

ANALYSIS AND EVALUATION

The SOCCCD operates within a resource allocation formula, which College operations are protected from the volatility of property tax revenue, thereby eliminating the possibility of devastating cuts to programs and services in case the District's basic aid status ever changes. Further, property tax revenue collected over and above the S 361 calculation is allocated and expended as received, and the District has not obligated future anticipated property tax revenue by incurring debt.

Both the District and the College allocate resources in a fiscally prudent and responsible manner. One of the College's strengths is the manner in which it approaches financial planning. College finances are managed conservatively to ensure students' needs are met on both a short- and a long-term basis. College financial planning, over recent years, anticipated declines in operational revenue combined with inflationary increases in expenditures. This short-range and long-range planning has enabled the College to maintain fiscal integrity, as evidenced by the College's actions during the nationwide economic recession and state budget crisis. No general fund layoffs took place, and the general fund offset a portion of the State reduction to categorical programs [3.207]. Due to the College's conservative long-range fiscal planning, the college is able to develop a balanced budget with a sufficient contingency each year, and district reserves remain healthy. Benchmarks for fiscal stability are always met and are often exceeded.

12. The institution plans for and allocates appropriate resources for the payment of liabilities and future obligations, including Other Post-Employment Benefits (OPEB), compensated absences, and other employee related obligations. The actuarial plan to determine Other Post-Employment Benefits (OPEB) is current and prepared as required by appropriate accounting standards.

EVIDENCE OF MEETING THE STANDARD

The SOCCCD has prepared well for most long-term financial obligations such as retiree health benefits, and the College and the District have fully paid off all prior-year debt obligations.

Government and Accounting Standard Board (GASB) Statements 43 and 45 require annual reporting of post-employment benefit liability [2.239]. These statements establish standards for the measurement, recognition, and display of OPEB expenses, expenditures, and related liabilities in the financial reports of state and local governmental employers. When these GASB provisions were enacted, the District hired a consultant to assist the District in the navigation of this process and a Retirement Board of Authority [3.240] was established to guide and oversee the implementation of the GASB standards. The futuris program, administered by Keenan and Associates, is a comprehensive GASB compliant retiree health and welfare benefit program. The District implemented an irrevocable trust for its OPEB obligation in spring 2008, it is fully funded, and the district conducts an actuarial study on at least a biannual basis to ensure it remains fully funded.

The District has also been impacted by the state pension liabilities that resulted in increases to the California Public Employees' Retirement System (CalPERS) and California State Teachers' Retirement System (STRS) employer rates. The district has covered these increases for all unrestricted general fund employees through the 2020-2021 fiscal year by placing adequate funds in a trust account. [EVIDENCE IS 2016 ACTUARIAL STUDY AND THE BOARD AGENDA ITEM WITH THE FUNDING PLAN].

ANALYSIS AND EVALUATION

The SOCCCD'S annual OPEB obligation is fully funded, as are all compensated absences and other employee related obligations. The District has also pre-funded the CalPERS and CalSTRS employer contributions through 2020-2021 and placed the funds in a trust account.

13. On an annual basis, the institution assesses and allocates resources for the repayment of any locally incurred debt instruments that can affect the financial condition of the institution.

EVIDENCE OF MEETING THE STANDARD

The District has not issued any certificates of participation, or COPS, since 1999 and all COPS were paid in full by June 2008. The District has not issued any bonds. All long-term debt has been paid off, and the District has not entered into any additional debt agreements [EVIDENCE AUDIT REPORT].

ANALYSIS AND EVALUATION

The College does not have difficulty meeting current obligations and does not have any long-term debt.

14. All financial resources, including short- and long-term debt instruments (such as bonds and Certificates of Participation), auxiliary activities, fund-raising efforts, and grants, are used with integrity in a manner consistent with the intended purpose of the funding source.

EVIDENCE OF MEETING THE STANDARD

The District and College carry no long-term debt, such as certificates of participation (COPS) and have fully funded all retiree other post-employment liabilities. The College is not engaged in any lease purchase agreements, and all technology and equipment needs are purchased outright on an annual basis as funding permits. The DRAC model ensures that the SB361 calculation funds all ongoing operations and that the remaining funds are utilized for one-time needs and projects such as capital outlay.

As discussed above in III.D.5 and II.D.10, the college and district use grant and foundation funds with integrity. College procedures ensure that grant funding receives appropriate authorization from the board of trustees, that grant budgets and expenditures are aligned with grant funding, and that grant expenses are approved by appropriate persons to ensure that expenses charged to grants are reasonable, necessary, allowable, and allocable. Fiscal reporting for grants is certified by district accounting staff to ensure proper oversight.

The Saddleback College Foundation employs foundation fundraising guidelines to ensure that funds are raised and expended appropriately and with oversight by account administrators, constituent managers, and the Foundation's Board of Governors Finance Committee.

The Saddleback College Foundation Finance Committee annually prepares and adopts a budget of operation, income and expenses [3.243]. At each of its monthly meetings, the Finance Committee reviews actual versus budgeted expenditures and income and makes adjustments when necessary. An annual report is presented to the SOCCCD Board of Trustees.

ANALYSIS AND EVALUATION

The financial resources of the District and College are used with integrity and in a manner consistent with its goals. Funding from external sources such as the Saddleback College Foundation, grants, and state categorical monies are all used according to their intended purpose. Grant and foundation fundraising efforts are aligned with the strategic plan of the college and serve the needs of college programs.

The District and the College excel in the area of planning for future liabilities and reducing or eliminating long-term debt commitments. Moreover, they are careful not to obligate future budget years with automatic debt payment, and when it has been fiscally prudent to do so, future debts have been retired ahead of schedule.

15. The institution monitors and manages student loan default rates, revenue streams, and assets to ensure compliance with federal requirements, including Title IV of the Higher Education Act, and comes into compliance when the federal government identifies deficiencies.

EVIDENCE OF MEETING THE STANDARD

The District is subject to an annual OMB A-133 audit [3.244], which allows the auditor to express opinion on compliance for the District's major federal programs including Title IV programs. For the year ending June 30, 2014, Saddleback College did not receive findings [I believe there were no findings for the year ending June 30, 2013 as well].

Federal Student Aid released the 2012 three-year cohort default rate for all schools in September 2015. The rate for Saddleback College is 11.1% (34/306), with 34 defaulters out of 306 borrowers in repayment. The official 2015 four-year cohort default rate will be released at the end of September 2016. This rate is critical as the Department of Education uses this as a measure to sanction schools; institutions with CDRs of 25% or greater for three years are subject to sanctions [3.247] [3.248].

The Saddleback College Financial Aid Office monitors the cohort rate annually, and is actively finding ways to educate students of the responsibilities and consequences of borrowing [3.249]. For example, the College provides financial literacy counseling to all students wanting to borrow. Students are also required to log into the National Student Loan Database System (NSLDS) [3.245] [3.246] and provide a copy of their loan debt summary; if student has student loan debt incurred, must also provide copy of calculator page showing estimated repayment amount based on career objective [3.254].

ANALYSIS AND EVALUATION

The College's financial aid default rate for the last three years is less than half the sanctionable rate according to federal government regulations. Student loan default rates, revenues, and related matters are monitored and assessed to ensure compliance with Federal Regulations [3.245].

Contractual Agreements

16. Contractual agreements with external entities are consistent with the mission and goals of the institution, governed by institutional policies, and contain appropriate

provisions to maintain the integrity of the institution and the quality of its programs, services, and operations.

EVIDENCE OF MEETING THE STANDARD

Contractual agreements with outside entities are governed by board policies and regulations, which are established to ensure that they are consistent with the mission and strategic goals of the College. This include BP/AR 3101.5, Fiscal Management, which states that the District must maintain sound fiscal management that ensures all activities comport with the educational objectives of the District (EVI). The vice chancellor, business services, manages all contracts and has the authority to approve all contracts that do not exceed \$100,000. Contracts over that amount must be approved by the board. Ultimately, it is responsibility of the board of trustees to oversee all contracts and ensure that they maintain the integrity of the programs, services, and operations of the District and College.

The District provides numerous resources, available on the District's SharePoint site [3.255], to assist individuals at the College to successfully implement contract processes. [3.256] These resources include competitive bidding and public contracting guidelines [3.259] [3.259a], contract process guidelines [3.257] [3.258], and a contract cover and routing sheet [3.260] that is utilized to document the purpose of the contract and ensure that appropriate college managers and administrators are aware of and approve of the contract. The District's SharePoint site also provides contract templates for numerous contract types including educational services agreements, field trips and educational tours, and independent contractor agreements.

The District has recently purchased a contract management tool, Total Contract Manager, and will soon be implementing the product to ensure that contracts are appropriately executed, serve as a document repository, and notify the appropriate individuals when contracts need to be renewed or renewed.

ANALYSIS AND EVALUATION

Contractual agreements established with external entities are consistent with the mission and goals of the College. Through their oversight, the board of trustees has ultimate responsibility to ensure that these contracts maintain the integrity of the College's programs, services, and operations. Managers who develop college contracts for approval by the Vice Chancellor of Business Services confirm adherence to board policies and are responsible for ensuring the contracts are consistent with the College's mission and goals [3.261][3.262]. District administrators ensure that contracts are administered in adherence with all state and federal guidelines [3.263] [3.264].

OBSOLETE

Standard IV Leadership and Governance

The institution recognizes and uses the contributions of leadership throughout the organization for promoting student success, sustaining academic quality, integrity, fiscal stability, and continuous improvement of the institution. Governance roles are defined in policy and are designed to facilitate decisions that support student learning programs and services and improve institutional effectiveness, while acknowledging the designated responsibilities of the governing board and the chief executive officer. Through established governance structures, processes, and practices, the governing board, administrators, faculty, staff, and students work together for the good of the institution. In multi-college districts or systems, the roles within the district/system are clearly delineated. The multi-college district or system has policies for allocation of resources to adequately support and sustain the colleges.

IV.A Decision-Making Role and Processes

IV.A.1 The institution recognizes and uses the contributions of leadership throughout the organization for promoting student success, sustaining academic quality, integrity, fiscal stability, and continuous improvement of the institution. Governance roles are defined in policy and are designed to facilitate decisions that support student learning programs and services and improve institutional effectiveness, while acknowledging the designated responsibilities of the governing board and the chief executive officer. Through established governance structures, processes, and practices, the governing board, administrators, faculty, staff, and students work together for the good of the institution. In multi-college districts or systems, the roles within the district/system are clearly delineated. The multi-college district or system has policies for allocation of resources to adequately support and sustain the colleges.

Evidence of Meeting the Standard

Both Saddleback College and the South Orange County Community College District support a participatory governance model that encourages leadership at all levels of the organization in order to enhance institutional effectiveness in relation to student performance and student outcomes, academic quality, academic and institutional integrity, fiscal stability, and federal and state compliance.

Board policies (the BP 2000 and 3000 series), administrative regulations (the AR 2000 and 3000 series), committee compositions and bylaws (evidence), and the appropriate negotiated collective bargaining agreements outline the rights and responsibilities granted to faculty, students, staff, managers, and administrators to engage in college governance processes.

The delineation of roles within the District is defined in the following board policies:

- BP 2001, Administration Organization
- BP 2100, Delegation of Authority to the Chancellor
- BP 2100.1, Delegation of Authority to the Academic Senate
- BP 2100.2, Role and Scope of Authority of the Academic Senates
- BP 2101, Delegation of Authority to the College President
- BP 2120, Institutional Planning (along with its related AR)

These board policies are designed to ensure that the roles of the board of trustees of the District, and the colleges are clearly defined and understood in relation to organizational structure, operations, planning, and decision-making. They also outline the primary role of the faculty in academic and professional matters through the Academic Senates, as required by Title 5, California Code of Regulations, Sections 53200-53205 and 53203.

To ensure adequate financial support for its colleges, the board of trustees had adopted a variety of board policies and administrative regulations that outline the fiscal practices of the District. These are included in the 3000 series of the board policies and administrative regulations and include:

- BP and AR 3001, Delegation of Authority
- BP and AR 3100, Budget Preparation
- BP and AR 3101, Budget Management
- BP and AR 3101.5, Fiscal Management

These board policies establish procedures to ensure that the District maintains sound fiscal management to support the educational mission of the district and its colleges. In addition, the District has created Budget Development Guidelines that are used by the District and both colleges to create aligned annual budgets. The District Resources Allocation Council (DRAC) is the main body to oversee the allocation of funds to ensure that the colleges within the multi-college district are supported and sustained. According to its stated purpose, DRAC is:

“A district-wide participatory governance council, charged with recommendations for the income allocation model on which the budget is based. It is charged with development and oversight of the allocation process for Unrestricted General Funds and it makes recommendations to the Chancellor. The DRAC Model is an allocation model for the district. It distributes available general fund unrestricted resources (according to the state funding formula) and other funding such as enrollment fees, non-resident fees, local income, miscellaneous

income, and ending balances. It is distributed to five areas: 1) Saddleback College, 2) Irvine Valley College, 3) Contingency Reserve, 4) General Expenditures, and 5) District Services. The intention of the model is to guarantee the colleges a predictable, fair, and equitable distribution of revenues.” [EVI – Committee Charge and Composition Sheet].

The participatory governance structure and process for Saddleback College are outlined in the South Orange County Community College District’s Function Map, The Saddleback College Governance Manual, the Saddleback College Faculty Handbook, and the Saddleback College Employee Handbook. In each of these publications, the roles and responsibilities to carry out this participatory governance is clearly delineated. The governance structure endorses individual involvement and responsibility for promoting best practices that enhance programs and services regardless of an individual’s title, constituent group, or level in the organization. Constituents are encouraged to voice concerns, to share ideas, and to communicate freely about the College’s and the District’s programs and services. This occurs both through the formal committee structure and through organized meetings such as the Board of Trustees Listening Sessions and the President’s Chats. Open sessions are also held on various issues during Professional Development (PD) Week and throughout the semester. In addition, department chairs, managers, and administrators hold regular program or unit meetings to provide opportunities to exchange ideas for program change and improvements, and this is included in the job responsibilities for each of these positions. The philosophy of open communication and of active participation is also included in the faculty, staff, manager, and administrator evaluation processes (evidence).

At the program and administrative unit levels, program reviews (PRs) and administrative unit reviews (AURs), which engage employees at every level, are conducted biennially for the purpose of continual improvement. During these reviews, academic, administrative, and student services departments and units, including the Saddleback College President’s Office, review and update objectives and action steps, identify strengths and weaknesses, review outcomes assessment data, and propose new objectives that are aligned with Saddleback College’s Strategic Plan as well as the South Orange County Community College District’s Strategic Plan. (evidence)

Institutional-level discussions for improvements occur within the following committees, all of which include representation from all constituent groups: Consultation Council (CC), Education Planning and Assessment Committee (EPA), Planning & Budget Steering Committee (PBSC), and the Student Success Coordinating Council (SSCC) Committee. In addition, all constituent groups have their own representative body that provides an avenue for their concerns to be voiced and debated. These groups include the Academic Senate (AS) for faculty, the Associate Student Government (ASG) for students, Classified Senate (CS) for classified staff, Management Team for all management including administrators, and xxx for classified managers, as well their associated standing committees. The governance and committee structure is summarized in the Saddleback College Governance Manual. (Jennifer for any updates?)

The Consultation Council (CC) is the primary recommending body to the College president for planning, resources and policy matters. The president chairs CC, which meets biweekly and is composed of representatives from each constituent group: faculty, staff, managers,

administrators, and students (evidence). CC recommendations originate from council members and from committees and representative bodies on campus. Broad participation is evident based on the scope and nature of the committee structure and required membership composition.

The Education Planning & Assessment Committee (EPA) works collegially with the faculty, staff, and administration on program reviews, administrative unit reviews, student learning outcomes, institutional outcomes, and the resource allocation process.

The Planning and Budget Steering Committee (PBSC) assists with institutional effectiveness, the resources allocation process, the strategic plan, the governance manual, integrity, and student success initiatives.

The Academic Senate (AS) is a partner for decisions involving curriculum, academic quality, online education, integrity, faculty hiring, faculty professional development, student success initiatives, the strategic plan, the resource allocation process, and fiscal stability.

The Classified Senate (CS) works collaboratively with the administration on classified staff professional development, integrity, student success initiatives, resource allocation, fiscal stability, and the strategic plan.

The Associated Student Government (ASG) participates in decision involving student clubs, student life, student welfare, scholarships, student success initiatives, and some resource allocation.

Analysis and Evaluation

Both Saddleback College and South Orange County Community College District leadership attempt to encourage broad participation in planning and decision-making processes that include all stakeholders: faculty, staff, managers, administrators, and students. The formal and informal participatory governance and review structures provide the framework for faculty, staff, managers, and administrators, and students to share ideas openly through their committee and representatives.

There are times, however, when faculty, staff, managers, administrators, and students report communication hurdles and point both to the effectiveness of some committees and to the ineffectiveness of the participatory governance model.

As part of these dynamic processes, the governance and review structures of the various committees and task forces are appraised annually (what about Committee on Committees?) and modifications are made to committee charters, by-laws, and compositions. Through this review process, committees and task forces are formed, reorganized, or disbanded in efforts to improve institutional efficiency, to enhance effective communication, or to resolve pressing issues. There is a concern, however, that this same dynamic review process is not the case with the participatory governance model. In addition, there have been some leadership changes in terms of regularly reviewing committees and structures. In an effort to realign various committees to the currency of the college in terms of various initiatives, the college conducted research and

compiled inventory of all committees in 2016. The college also created an electronic committee request system that was designed to improve the process of data collection about committee interest. These efforts were intended respond to committee interest, and to then synthesize various committees into a more robust structure that corresponded with the strategic mission and goals of the college. The goal of the inventory and research was also to get a clear picture on which committees were currently active, assess potential areas of committee redundancy, and to formally establish committees as inactive if meeting minutes or agendas were absent for a substantial period of time. This research also revealed the presence of several informal committees. The college repositioned its approach to restructure informal committees as Workgroups that would report back to a larger formal committee. When the Academic Senate and the College agreed upon the final inventory of current committees, the next step included creating a formal process for adding committees. As such, the governance manual was updated to include a process for submitting a request for a new committee through the college or through academic senate using the committee One Sheet. In addition, discussion of efficiency in committee structure and requests for new committees was brought into the function of the Planning and Budget Steering Committee to ensure that committees align with the institutional mission. Additionally, the Academic Senate regularly review committee proposals in partnership to support the goals for academic committees.

Evidence

- IV.A.1-1 BP 2101 Delegated Authority to the President
- IV.A.1-2 Saddleback College 2014 – 2020 Strategic Plan
- IV.A.1-3 EWD Plan
- IV.A.1-4 Economic Report
- IV.A.1-5 Annual State of the College
- IV.A.1-6 SOCCC Function Map
- IV.A.1-7 Governance Manual
- IV.A.1-8 Faculty Handbook
- IV.A.1-9 Employee Handbook

IV.A.2 The institution establishes and implements policy and procedures authorizing administrator, faculty, and staff participation in decision-making processes. The policy makes provisions for student participation and consideration of student views in those matters in which students have a direct and reasonable interest. Policy specifies the manner in which individuals bring forward ideas and work together on appropriate policy, planning, and special-purpose committees.

Evidence of Meeting the Standard

Saddleback College relies on board policies, administrative regulations, and college governance procedures to establish broad participation from constituent groups in the decision-making process. Faculty, students, staff, managers, and administrators have clearly defined voices and avenues for participation in the governance and resource allocation processes.

BP 107, Board Policies and Administrative Regulations, outlines the process whereby districtwide policies and regulations are developed and approved. This policy states that recommendations for new or revised policies and administrative regulations may be made by the Academic Senate, Classified Senate, Associated Student Government, bargaining units, and administration.

The participation of faculty in the decision-making process is authorized by BP 2100.1, Delegation of the Authority to the Academic Senate, and BP 2100.2, Role and Scope of Authority of the Academic Senates. These policies acknowledge the right of faculty to participate in district and college governance and recognize the Saddleback College Academic Senate as the official governing body for faculty participation in developing policies related to academic and professional matters as mandated by Title 5, Section 53200-53205, and as the official faculty voice in such matters.

In accordance with the Higher Education Employment Relations Act (HEERA), the South Orange County Community College District (SOCCCD) recognizes the Faculty Association as the exclusive representative of full-time and part-time faculty of the SOCCCD for the purposes of collective bargaining on issues related to wages, evaluations, working conditions, and other matters determined to be in the scope of negotiations. In doing so, the District complies with Chapter 10 of the Meyers-Flannery-Brown Act, which promotes full communication between public employers and their employees by providing a reasonable method of resolving disputes regarding wages, hours, and other terms and conditions of employment between public employers and public employee organizations.

Assembly Bill (AB) 1725 directs that the South Orange County Community College Board of Trustees provide an opportunity for classified staff input on all matters that affect staff. There are four organizations within the South Orange County Community College District that assume this role:

- Saddleback College Classified Senate (SCCS)
- California School Employees Association (CSEA)
- Police Officers Association (POA)

The CSEA and the POA are the exclusive collective bargaining representatives on issues related to wages, evaluations, and working conditions for the classified groups that they represent. All non-exempt classified employees other than the police officers are represented by the CSEA. CSEA has the right to appoint the first representative to any committee and the Saddleback College Classified Senate has the right to appoint the second representative. As a practical matter, most governance committees offer seats to each exclusive representative and a representative from each Classified Senate.

Title 5, Section 51023.7 and BP 5627, Student Participation in Governance, authorize student participation in the decision-making process that significantly affect them and recognizes the Associated Student Government at each college in the SOU CCD. In addition, BP 104, Student Member of the Board of Trustees, authorizes the election of one advisory student member of the board to be rotated between Saddleback College and Irvine Valley College. The student trustee is recognized as a full member of the board at public meetings, and is required to confer with the leaders of the ASG from both colleges prior to each meeting of the board in order to effectively represent student interests.

The Saddleback College Governance Manual and the SOU CCD District-wide Decision Making Manual 2015-2020 [pages 11-14] outline the roles and responsibilities of the major stakeholder groups. Representatives from each group sit on planning bodies including Chancellor's Council and Districtwide Planning Council (DWPC) at the District and Planning and Budget Steering Committee (PBSC) and Consultation Council (CC) at the College [EVI – Committee Compositions]. In each case, it is the responsibility of these representatives to carry input from the groups they represent to the decision-making bodies where the mission, vision, and values of Saddleback College are determined so that all voices are heard.

While decision making is organized through the formalized committee representation structure, individuals are welcome to attend all open governance meetings, including meetings of the board of trustees, and add agenda items to the agenda at these meetings. BP 128, Board Agendas, describes how individuals may request items be placed on the board of trustee meeting agenda through a written summary to the chancellor. For other committees, individuals may contact the committee chair or president to add items to the agenda. [BP 128, OTHER EVIDENCE-Senate processes?]. Meeting times, agendas, and minutes of meetings are posted to the websites of all committees and representative bodies so that individuals can effectively participate. The agendas of open meetings of the board and the Academic Senates provide for public comments on both agendized and non-agendized items as well.

The District and College also have informal mechanisms that provide for input from members of all constituent groups. These include open forums held by the College president each year and by members of the board of trustees [EVI needed].

Analysis and Evaluation

The District and College have established board policies, administrative regulations, and other governance procedures to ensure the broad participation of all constituent groups in the decision-making and planning processes. All decision-making bodies require membership from each of the representative groups, and other committees and task forces allow for the appointment of members as the representative groups deem appropriate.

College leadership has worked with the South Orange County Community College (SOCCCD) Board of Trustees to increase the ability of faculty to serve in key leadership roles by increasing the amount of reassigned time and/or stipends available to faculty. The Saddleback College President, the SOCCCD Chancellor, and the SOCCCD Board of Trustees work closely with the Saddleback College Academic Senate when making decisions on academic and professional matters. Similarly, the Classified Senate and the SOCCCD are discussing ways in which classified staff may have secure release time from their respective positions in order to help alleviate what the classified staff often perceive as a struggle with their limited ability to participate in governance processes while also meeting the demands and timelines specific to their positions on the staff of Saddleback College.

OBSOLETE

IV.A.3 Administrators and faculty, through policy and procedures, have a substantive and clearly defined role in institutional governance and exercise a substantial voice in institutional policies, planning, and budget that relate to their areas of responsibility and expertise.

Evidence of Meeting the Standard

Saddleback College and SOCCCD derive their roles and responsibilities through Federal Government Code, the California Education Code (EC), and Title 5 of the California Code of Regulations (CCR). As such, both administration and faculty have substantive and clearly defined roles in the institutional governance of the District and College and both exercise an important voice in the institutional policies, planning, and budget decision-making that relate to their areas of responsibility and expertise. These roles and responsibilities are clearly delineated in board policies and administrative regulations.

Administration

The authority of the chancellor, as chief executive officer of the District, and the college president, as chief executive officer of the college, is codified by California Education Code §70902 and SOCCCD board policies. BP 2100, Delegation of Authority to the Chancellor, gives the chancellor of the SOCCCD ultimate responsibility for the establishment and implementation of policies, planning efforts, and educational leadership in the District.

BP 2101, Delegation of Authority to the College President, gives the college president ultimate responsibility for the implementation of district policies at the college and the establishment and implementation of policies, planning efforts, and educational leadership at the college level.

As the CEO, the president effectively oversees and actively leads the President's Executive Team (PET) composed of the president and vice presidents at the college, Management Team, a committee composed of all administrators and managers, and Consultation Council, a participatory governance committee and primary planning and decision-making body at the College. Additionally, the vice president of instruction leads Vice President for Instruction Council. The committee is comprised of all instructional deans, department chairs, the chair of the curriculum committee, and certain staff from Office of Instruction. Although this group functions more as an avenue by which the top administration can funnel information to these administrators (versus a forum for planning and decision-making), it remains an important forum for deans and department chairs across campus to exchange ideas and to talk, problem-solve, develop professionally, etc.

Faculty

BP 2100.1, Delegation of Authority to the Academic Senate, in accordance with California Code of Regulations §53200-53205, gives the college academic senates ultimate responsibility for and authority over academic and professional matters at the District and College.

Through this policy, the SOCCCD board of trustees recognizes the academic senates as the representative of the faculties at both colleges and relies primarily upon the advice and judgment of the academic senates in accordance with processes of collegial consultation as defined in BP 2100.1. In addition, BP 2100.2, Role and Scope of Authority of the Academic Senates, acknowledges the right of faculty to participate in district and college governance, to express their opinions at the college and district-level and to ensure that these opinions are given reasonable consideration, to assume primary responsibility for making recommendations in the areas of curriculum and academic standards, and to jointly develop and approve high criteria, policies, and procedures in conjunction with district administration. Academic Senate representatives are included in the membership of all councils, committees, and task forces that deal with academic and professional matters.

Moreover, the SOCCCD Faculty Association is recognized by the district as the exclusive representative of faculty on issues related to wages, evaluation, and working conditions, and are thus included in the membership of all councils, committees, and task forces dealing with these issues.

Analysis and Evaluation

Administrators and faculty have clearly defined and substantive roles in district and college governance and actively participate in the development of policies, planning, and budget development. These roles are defined in board policies and implemented through the participatory governance committee structure of the District and College.

OBSOLETE

IV.A.4 Faculty and academic administrators, through policy and procedures, and through well-defined structures, have responsibility for recommendations about curriculum and student learning programs and services.

Evidence of Meeting the Standard

Through the creation, adoption, and implementation of board policies and administrative regulations, the South Orange County Community College District ensures that faculty and administrators have responsibility for recommendations about curriculum and student learning programs and student learning services. Board policy BP-2100.1, Delegation of Authority to the Academic Senate, delineates the scope of the Saddleback College Academic Senate in response to Title 5, Sections 53200-53205. Consistent with accreditation standards, the board of trustees rely primarily upon the advice, counsel, and recommendations of the Saddleback College Academic Senate on all and any academic and professional matters including:

1. Curriculum, including establishing prerequisites and placing courses within disciplines.
2. Degree and certificate requirements.
3. Grading policies.
4. Educational program development.
5. Standards or policies regarding student preparation and success.
6. District and college governance structures relating to faculty roles.
7. Faculty roles and involvement in accreditation processes, including self-study and annual reports.
8. Policies on faculty professional development activities.
9. Processes for Program Review.
10. Processes for institutional planning and budget development.
11. Other matters as mutually agreed upon between the SOCCCD Board of Trustees and the Academic Senate, or as otherwise provided by statute or regulation.

BP 2100.1 also specifies that policy and procedures addressing academic and professional matters are subject to creation or modification only through the processes of collegial consultation. The Saddleback College Academic Senate honors requests from the SOCCCD Board of Trustees and/or its agents to review relevant policies, regulations, procedures, and

guidelines at least every five years, or more frequently should the SOCCCD board of trustees and/or its agents believe that modifications are necessary or appropriate.

Multiple Board policies have been developed to articulate how responsibility for recommendations about curricula and student learning programs and services is executed. The Academic Senate created a college Curriculum Committee pursuant to BP 6100, Curriculum, which harmonizes with the scope of board policy BP-2100. All established courses of instruction and educational programs at Saddleback College are prepared in compliance with guidelines from the California Community Colleges Chancellor's Office's (CCCCO) Program and Course Approval Handbook (PCAH).

Saddleback uses Governet software called CurricUNET for preparing and maintaining course outlines of record. Each new and revised course, both credit and non-credit, is scrutinized by faculty, including members of the curriculum leadership team, deans, and curriculum specialists before it is submitted for approval to the Curriculum Committee, a standing committee of the Saddleback College Academic Senate. Courses are then submitted for approval by the Academic Senate and the board of trustees before submission to the CCCC for approval. The Academic Senate requires that all CTE courses be reviewed/revised every two years and all other courses at least every five years.

The Academic Senate has a Policy and Process for New Program Approval that faculty use in the creation of new programs. Again, following guidelines in the PCAH for programs, programs are proposed using developed courses to meet requirements for certificates and degrees. CTE programs require labor market data to demonstrate need for a proposed program, and are additionally reviewed and endorsed by a regional CTE consortium as required by the CCCC. New and revised programs are reviewed and approved by the Curriculum Committee, the Academic Senate, and the board of trustees on recommendation of the college president before being submitted to the CCCC for final approval (new and substantively changed programs). In addition, CTE programs are submitted for review by the board of trustees for documented labor market demand and evidence that they do not represent unnecessary duplication of other manpower training programs in the area in compliance with California Education Code Section 78016.

The Saddleback College President is the designated college administrator charged with forwarding curriculum to the South Orange County Community College District Chancellor and Board of Trustees. On this matter, BP 6100 sets forth the following clear and concise roles and responsibilities:

- All programs and courses approved by a college's Academic Senate are forwarded to the college president for his or her review. Once approved by the college president, the college president forwards the approved programs, courses and recommendations for program deletions to the Chancellor for his or her review and to the Board of Trustees for its review and final approval.

- No South Orange County Community College District colleges may offer programs or courses that fail to meet the curriculum standards in the Program and Course Approval Handbook, relevant state laws and regulations, and accreditation standards. If such a failure occurs, the college president shall direct the appropriate faculty to immediately conduct and complete curriculum review and bring the programs and courses into compliance.

Saddleback College also relies on its faculty and administration for recommendations about student learning programs and services. As such, Saddleback College, through policies and procedures, have well-defined structures to ensure that this reliance is both protected and maintained. New student learning program and service ideas may originate at any level of the institution. Grant proposals may be submitted to secure funds to pilot a program or service if there is faculty interest in championing a new initiative. Requests can be made through the resource allocation process for resources needed to pilot a new initiative. Programs and services are evaluated for effectiveness and recommendations made by the faculty and administrators involved to institutionalize successful new programs and services to a governance committee, such as the Planning and Budget Steering Committee or Consultation Council. Approval by the Consultation Council results in a recommendation to the president regarding new programs and services.

As an example, a grant opportunity was provided by the Dell Foundation to implement an Advancement Via Individual Determination (AVID) for Higher Education program in fall of 2013 with a cohort of financially needy students. Faculty involved in establishing the Student Success Coordinating Council championed the proposal, which was funded for three years. Resource requests to support the program were submitted and approved, and the program is currently undergoing analysis to determine if the project should continue as it exists and become a national demonstration program for AVID for Higher Education.

Analysis and Evaluation

The South Orange County Community College District and Saddleback College meet the Standard.

OBSCURED

IV.A.5 Through its system of board and institutional governance, the institution ensures the appropriate consideration of relevant perspectives; decision-making aligned with expertise and responsibility; and timely action on institutional plans, policies, curricular change, and other key considerations.

Evidence of Meeting the Standard

The District and College maintain a governance structure that recognizes the need for all constituents to have a voice in all decision-making processes. Therefore, all decision-making councils and committees include membership from all constituent groups to ensure the participation of individuals with the background, expertise, and responsibility necessary for sound decision-making. These bodies include the Districtwide Planning Council (DWPC), Board Policy and Administrative Regulation Advisory Council (BPARC), Chancellor's Cabinet, among others, on the district level, and Planning and Budget Steering Committee (PBSC) and Consultation Council (CC), among others, on the college level. All of these bodies meet regularly at set times in established locations and the respective meeting agendas are prepared and disseminated in advance to committee members and made available to other interested parties. The meeting minutes of each of these governance bodies are prepared in a timely manner and distributed to members. They are also posted on the website and/or SharePoint site of the respective council, committee, or task force.

The board of trustees includes seven elected officers and one student trustee, elected each year on an alternate basis from the student bodies of Irvine Valley College or Saddleback College. BOT meetings are held regularly each month at roughly the same time and in the same location. The specific start times are posted, along with the agenda, on the district website and in front of the board room at least 72 hours prior to the start of the meeting. Meeting dates for the following year are determined each December and posted to the district website. Special meetings are convened as needed and follow the appropriate notification required by the Brown Act. Representatives from administration and each constituent group, including students, are given a seat at the table directly facing the board at each meeting and are provided a microphone so that they can be recognized by the board president to speak on agenda items during the meeting. Administration and each constituent group also provide brief reports at each meeting to keep the board apprised of their activities and concerns.

At the college level, each constituent group has a representative body through which their concerns and perspectives are discussed and formulated. These include the Membership Team for managers and administrators, Academic Senate for the faculty, Classified Senate and CSEA for the classified staff, and ASG for the students. In addition, various committees and task forces with broad membership exist to ensure careful consideration of all relevant perspectives. Each constituent group approves its own representatives to serve on committees and task forces. These bodies provide input and recommendations to the decision-making bodies on campus, especially relating to areas in which specialized knowledge is required. A complete list of committees, along with some task forces can be found in the Saddleback College Governance

Manual and on the college website. Below is a flow-chart showing how feedback from these bodies are incorporated into the decision-making processes of the college.

Recommendation also occur through the bi-annual program and administrative review process, outlined in I.x.xx above, through which resource allocations requests are made and curricular changes are developed. Annually, resource allocations requests go through the college resource allocation process during which all requests are prioritized according to specific criteria at four levels of analysis and discussion, as discussed more fully in I.x.xx. Curricular changes go through an annual technical review process overseen by the Curriculum Committee, a sub-committee of the Academic Senate. This process is discussed in detail in II.x.xx.

Additionally, both the College and the District leadership understand the importance of the decision-making process based on reliance of accurate and timely data and metrics. To this end, the District and the colleges leaderships embraced an ongoing conversation that prevented the addressing of barriers that were getting in the way of effectively make decisions utilizing data and metrics. A districtwide barriers committee was established to provide recommendations to improve the process.

These recommendations included:

- Improve the usability of the data used in decision making
- Evaluate products that allow for self-service data mining and analysis
- District wide commitment to data based decision making
- Improve transparency in the decision making process
- Provide instructions and training related to where to go to access data

Analysis and Evaluation

District and college governance processes ensure the consideration of all relevant perspectives. All constituent groups are represented on every decision-making body. Councils, committees, and task forces meet on a regular basis at set times and locations in order to ensure maximum opportunity for participation.

Data supported decision making has been supported at the College and District level. Financial decisions are based on information provided by college or district data warehouses that are made available through data management systems such as inForm and research provided by district and college research departments.

Evidence

IV.A.5-1 *Saddleback College Governance Manual*

IV.A.5-2 Barrier #2 Final Recommendation Summary, July 2014

OBSOLETE

IV.A.6 The processes for decision-making and the resulting decisions are documented and widely communicated across the institution.

Evidence of Meeting the Standard

All board policies and administrative regulations that describe decision-making processes are posted on the district web site, where they are available to all employees and the general public. Changes to board policies and administrative regulations go through a participatory governance process and are distributed through each of the representative group bodies. Board policy changes must be approved by the board of trustees, and are distributed via the BOT meeting agendas, which are posted on the district's website.

The governance and decision-making processes of the College are documented in the Saddleback College Governance Manual. The processes and procedures outlined in the manual are developed by the Planning and Budget Steering Committee (BSC) and approved by the Consultation Council, both of which have representation from all representative groups on campus. The director of planning, research, and accreditation is responsible for maintaining, updating, and posting the manual, which is available for employees and the public on the web page of the Office of Planning, Research, and Accreditation (OPRA). It is also available internally on SharePoint.

The governance and decision-making processes of districtwide planning and committees are documented in the SOCCCD Districtwide Decision Making Manual 2015-2020. The processes and procedures outlined in the manual are developed by the Districtwide Planning Council (DWPC), a shared governance body. To ensure continuous quality improvement, the DWPC undertakes a comprehensive revision of the manual every five years and makes minor updates annually. This evaluation process is overseen by the district director of research and planning, who is responsible for maintaining, updating, and posting the manual, which is available for employees and the public on the district's planning web page. It is also available internally on SharePoint.

The board of trustees and the Saddleback College Academic Senate adhere to the open meeting laws for public agencies as mandated by Section 54952 of the California Government Code (or Brown Act). Therefore, agendas and minutes are posted openly and all meetings include the opportunity for public comments. Decisions made by the BOT are posted as minutes on the district website. The district director of public affairs also publishes meeting highlights the day after each board meeting and emails these to all employees of the district. The meeting highlights are also posted on the district website. Decisions made by the Academic Senate are posted as minutes on the Senate website.

At both the district and college levels, decisions made by the all other councils and committees not covered by the Brown Act are included in the minutes of meetings and posted on the SharePoint sites for each committee. In addition, representative group members of these

councils and committees are tasked with bring information back to their constituency. This information is delivered via reports given to representative group meetings and/or email.

Analysis and Evaluation

The District and College decision-making processes are well-documented in board policies, administrative regulation, and governance manuals. These processes are made available to employees through the district and college websites and SharePoint sites.

The District and College comply with Brown act requirements regarding the posting of agendas and minutes for the board of trustees and the Academic Senate. Information regarding decisions made in districtwide and college councils and committees not covered by the Brown Acts also distributed though posted minutes and through reports made by representative group members of decision-making bodies. All constituent groups have representation on every decision-making body at the institution.

Evidence

IV.A.6-1 Saddleback College Planning and Governance Manual

IV.A.7 Leadership roles and the institution's governance and decision-making policies, procedures, and processes are regularly evaluated to assure their integrity and effectiveness. The institution widely communicates the results of these evaluations and uses them as the basis for improvement.

Evidence of Meeting the Standard

Saddleback College regularly reviews and re-evaluates its leadership roles and its governance and decision-making policies, procedures, and processes in order to assure their integrity as well as their effectiveness. Additionally, Saddleback College widely communicates the results of these reviews and evaluations and uses these results as a basis for continuous quality improvement both in its governance and decision-making processes as well as in re-evaluating roles and responsibilities of its leadership.

Through the Board Policy and Administrative Regulations Advisory Council (BPARAC), board policies and administrative regulations are regularly reviewed and revised as needed. All councils and committees annually review their purpose and membership, including the designated chair, and revise as needed. Moreover, all committees perform annual surveys of their membership to ensure that they are functioning properly and make changes when needed.

Institutional Effectiveness

In 2016, Saddleback College created the Office of Institutional Effectiveness. The purpose and focus of the Office of Institutional Effectiveness is to coordinate the leadership and decision-making policies, procedures and processes in areas that play a significant role in student success. The college established the position of Assistant Vice President (AVP) of Institutional Effectiveness to lead the Office of Institutional Effectiveness.

The Office of Institutional Effectiveness oversees the following critical areas:

- Program and Administrative Reviews
- Federal and State Compliance
- Student Outcomes
- Student Success
- Research
- Accreditation
- Curriculum
- Online Education

Within these focal areas, the Assistant Vice President of Institutional Effectiveness' overall role is—

1. to assure institutional effectiveness, quality instruction, student learning and instructional services at Saddleback College.
2. to ensure that all constituent groups have an opportunity in the governance in these leadership and decision-making areas and that all constituent groups are properly represented.
3. to provide leadership, coordination and support for Online education and for professional development college-wide.
4. to perform assigned duties in compliance with applicable State and Federal regulations and guidelines, South Orange County Community College District policies and procedures, and Saddleback College's educational goals and objectives.

And additionally, the Assistant Vice President of Institutional Effectiveness charge is with the responsibility of—

1. fostering a culture of collaboration, mutual respect, innovation, and continuous improvement throughout the South Orange County Community College District (SOCCCD).
2. actively participating in and supporting District-wide participatory governance components and activities and other collaborative processes
3. encouraging professional excellence among staff. And
4. promoting an organizational culture of customer service, innovation, and quality service.

Analysis and Evaluation

Saddleback College meets the Standard.

IV.B Chief Executive Officer

IV.B.1 The institutional chief executive officer (CEO) has primary responsibility for the quality of the institution. The CEO provides effective leadership in planning, organizing, budgeting, selecting and developing personnel, and assessing institutional effectiveness.

Evidence of Meeting the Standard

The President is the chief executive officer of the college, with leadership and management responsibility for the effective operation of the college, including the educational programs, student support services, personnel, annual budgets, facilities, community and external relations, planning, evaluation, and special projects related to the mission of the college (EVI-Governance Manual). The President's role and authority at the College is granted by the board of trustees as designated by Board Policy (BP) 2101, Delegation of Authority to the College President. The president reports to, assists, and supports the SOCCCD chancellor in the performance of the duties delegated by BP 2100, Delegation of Authority to the Chancellor. Under this arrangement, the College president is granted broad authority in developing and implementing the College's integrated planning efforts and resource allocation processes and for implementing board policies. As such, the College president provides effective leadership in planning, organizing, budgeting, selecting and developing personnel, and assessing institutional effectiveness through the shared governance process and with the delegated authority that comes with his or her appointment by the chancellor with the approval of the SOCCCD board of trustees. The president's administrative organization is the established authority on campus and the college President is the final authority at the college level.

As the CEO, the president enhances administrative teamwork through principles of leadership, decision-making, and empowerment. The president effectively oversees and actively leads the President's Executive Team (PET) composed of the president and vice presidents at the college, Management Team, a committee composed of all administrators and managers, and Consultation Council, a participatory governance committee and primary planning and decision-making body at the College.

The duties and responsibilities of the President as stipulated by board policy include the following:

- Provide leadership for the educational programs of the college, ensuring the effective operation of curriculum development, program review and academic planning processes, and instructional support services.
- Provide leadership for student support services necessary to ensure student access to college programs.
- Direct all aspects of college personnel management, including the selection of a qualified and diverse faculty and staff, effective evaluation processes, teaching and work

assignments, professional development activities, contract administration, and disciplinary actions when necessary.

- Direct the development and management of annual college budgets, in accordance with accepted governance and accountability standards.
- Oversee and provide leadership for the development of the college's long-range and short-range planning efforts, including the Educational and Facilities Master Plan, Strategic Plan, and all integrated plans.
- Ensure that all plans consider accreditation standards and student success issues and that they drive the budget and resource allocation decision-making;
- Maintain an effective administrative organization and delegates appropriate responsibilities to the college administrative staff.
- Implements a college governance program which is participative, accountable, and effective.
- Promote effective communication within the College, with the District, and with the board of trustees.
- Represent the college to the community, schools, four-year colleges and universities, state and national agencies, local businesses, professional organizations, and other public entities.

Analysis and Evaluation

As the Chief Executive Officer, the Saddleback College president effectively fulfills his primary responsibility of ensuring the overall quality of the institution and provides effective leadership in planning, in organizing, in budgeting, in leading and developing personnel, and in assessing institutional effectiveness.

OBSOLETE

IV.B.2 The CEO plans, oversees, and evaluates an administrative structure organized and staffed to reflect the institution's purposes, size, and complexity. The CEO delegates authority to administrators and others consistent with their responsibilities, as appropriate.

Evidence of Meeting the Standard.

The president is responsible for devising, overseeing, and evaluating the administrative structure of the College. The current administrative configuration was established in 2011 when the president proposed the current administrative structure of the College that now includes administrative services, instruction, and student services. Prior to this, the college was only divided into instruction and student services. The addition of this third area also necessitated the creation and hiring of a third vice president to oversee college administrative services. Thus, the upper administration of the college includes:

The current president also instituted two additional bodies to extend participatory governance and empower leadership at the College. These are Management Team (MT) and Consultation Council (CC). MT, which is composed of all college managers and administrators, meets bi-weekly and is chaired by the President. The purpose of MT is to provide an opportunity for leadership to discuss issues pertinent to College decision-makers and supervisors, including accreditation, strategic planning, budget, and governance. (EVI-governance manual). CC is composed of representatives from all college constituent groups. It meets bi-weekly and is chaired by the President, who serves as a non-voting member of the committee. CC serves as the College's main strategic planning and recommending body, and all other committee decisions are discussed and considered by CC before the recommendations are presented to the President. (EVI-governance manual).

The president regularly evaluates the administrative structure at the College and makes recommendations for changes when necessary. These recommendations are vetted through the College participatory governance bodies, including CC, before a final recommendation is reached by the President, in consultation with PET. (NEED EVIDENCE). Since the College's last accreditation study, the president has created and promoted the following leadership positions:

- Director of Student Life
- Director of Tutoring
- Vice President of College Administrative Services
- Assistant Vice President of Institutional Effectiveness
- Director of Grants
- Dean of Online Education and Learning Resources
- Dean of Community Educations, Emeritus Institute, and K-12 Partnerships
- Director of Economic and Workforce Development

The President delegates responsibility and authority to all managers and administrators consistent with their responsibilities as listed in their job descriptions in order to achieve the mission of the College and improve institutional effectiveness.

Analysis and Evaluation

As the CEO, the college president effectively plans, oversees, and evaluates administrative structure, and consistently organizes and staffs this administrative structure in such a way as to reflect the institution's purposes, size, and complexity. Additionally, the college's Chief Executive Officer delegates authority to administrators and others consistent with their responsibilities, as appropriate.

IV.B.1-15	Saddleback College Organization Structure	
IV.B.1-16	Saddleback College Function Map	

IV.B.3 Through established policies and procedures, the CEO guides institutional improvement of the teaching and learning environment by:

- establishing a collegial process that sets values, goals, and priorities;
- ensuring the college sets institutional performance standards for student achievement;
- ensuring that evaluation and planning rely on high quality research and analysis of external and internal conditions;
- ensuring that educational planning is integrated with resource planning and allocation to support student achievement and learning;
- ensuring that the allocation of resources supports and improves learning and achievement; and
- establishing procedures to evaluate overall institutional planning and implementation efforts to achieve the mission of the institution.

Evidence of Meeting the Standard

Through established policies and procedures, the Saddleback College President guides institutional improvement of the teaching and learning environment by maintaining collegial processes that set values, goals, and institutional priorities by engaging in the Saddleback College shared governance processes, and by providing leadership and guidance to support major campus planning initiatives. Through his direction and oversight, the College President has created and maintained a well-developed, detailed, and collaborative integrative strategic process that is used to set the values, goals, and priorities of the College in order to support present and future student learning and student achievement. This process includes:

1. The strategic planning process as discussed in Standard I and in the handbook. Focus on it being a collaborative process that begins with the setting of the mission and values then goal setting.
2. How the college is currently using institution-set standards to document student learning and achievement.
3. The use of research in planning and evaluation
4. The ways in which PRs and AURs are integrated into planning
5. The resource allocation process and how it stems initially from PRs and AURs
6. Annual evaluation of the plan and process to ensure continuous quality improvement.

The Saddleback College President has made institutional effectiveness, educational planning, outcomes assessment, and continuous improvement priorities for setting and maintaining institutional performance standards for student achievement. The President has also instilled an environment in which constant improvement and institutional effectiveness has promoted student achievement and student success.

Through several mechanisms the Saddleback College President ensures that educational planning and distribution of resources is directly linked to student success and to Student Learning Outcomes (SLOs). The college President fosters the development and adoption of the revised strategic planning processes by directly incorporating Program Reviews, Administrative Unit Reviews (AURs), SLOs, and Administrative Unit Outcomes (AUOs) into the ongoing evaluating and planning.

The Saddleback College President also relies on the processes implemented by the Vice President for Instruction (VPI). The VPI, in collaboration with the college deans, gathers data from the inFORM Data Warehouse for the purpose of ensuring that the college's evaluating and planning rely on high quality research and analysis. The data gathered are used to monitor enrollment trends and to manage course offerings to ensure students meet their academic plans in a timely manner.

The Saddleback College President works to ensure that planning and evaluating rely on high-quality research and data through several processes. As part of this ongoing process, the college President approves recommended procedures to evaluate overall institutional planning and implementation efforts by fostering the reconstitution of the (PBSC) to ensure that research and data are being used in resource allocation. The recommendations of the PBSC feed into the Consultation Committee for deliberation and for recommendations to the college President for action.

Using the consultative process, the Saddleback College President accepted the recommendation of the governance group leadership and the Consultation Committee (CC) to expand the Saddleback College research office by hiring a Director of Research, Planning, and Accreditation (ORPA). This position reports directly to the college President through the Office of the Vice President of Instruction. The ORPA provides institutional data collecting and analysis on internal and external conditions that are used to support college planning and enhance institutional effectiveness and decision-making. The Director of Research, Planning, and Accreditation also co-chairs the PBSC [what is this? ... formal name...] and serves on the Consultation Council. The input provided by the Director of ORPA serves to reinforce the requirement that decisions are guided by institutional research, to adhere to the Saddleback College Strategic Plan, and to ensure that they are consistent with the college's vision, mission, and values.

Again, as part of the consultation process, the Saddleback College President, after analyzing the roles and responsibilities of the Office of Instruction, determined the need for creating an Assistant Vice President position focusing on institutional effectiveness. This new upper management position reports to the college President through the Office of the Vice President of Instruction and oversees college wide research, curriculum, ... [need to get Chris' job description]

Collaborating with the Academic Senate, the Saddleback College President supports and advocates for the appointment of a full-time faculty member to establish and to lead the Educational Planning and Assessment Committee (EPA), , and Program Review processes. These two positions work together to assist faculty, staff, and management in the assessment of

SLOs and AUOs, thus creating data based reports for use in Program Review and Administrative Unit Reviews.

Analysis and Evaluation

Saddleback College meets the Standard.

Evidence

- IV.B.3-1 Saddleback College Governance & Organization Manual
- IV.B.3-2 Saddleback College Function Map
- IV.B.3-3 Saddleback College Strategic Plan
- IV.B.3-4 Saddleback College Educational and Facilities Plan
- IV.B.3-5 Saddleback College Master Technology Plan
- IV.B.3-6 Saddleback College Student Equity Plan
- IV.B.3-7 College Organization Charts
- IV.B.3-8 Office of Planning Research and Accreditation
- IV.B.3-9 Saddleback College Climate Survey
- IV.B.3-10 Job description of VP/IE

IV.B.4 The CEO has the primary leadership role for accreditation, ensuring that the institution meets or exceeds Eligibility Requirements, Accreditation Standards, and Commission policies at all times. Faculty, staff, and administrative leaders of the institution also have responsibility for assuring compliance with accreditation requirements.

Evidence of Meeting the Standard

Per BP 2101, the president has the primary leadership role for accreditation and for ensuring that the College meets or exceeds all Eligibility Requirements, Accreditation Standards, and Commission policies at all times and on all levels. As such, all faculty, staff, managers, and administrators who work to make certain that the College's compliance with the accreditation process and meets the standards and criteria established by the Commission work under the guidance and leadership of the president.

The accreditation process and self-evaluation has always been a top priority of the president. As evidence of this, the president reconfigured the role of the director of planning, research, and accreditation so that compliance with accreditation standards was continuously considered and analyzed through the year and accreditation cycle. Accreditation is no longer seen as something that is done only for the purposes of completing the self-evaluation report, but is embedded in the institutional structure. Moreover, in order to ensure board participation in the accreditation process, the president created an Accreditation Steering Committee and appointed representatives from all three areas -- faculty, staff, and administration-- to serve as tri-chairs of the committee. The administration tri-chair is the vice president for student services, who also serves as the college Accreditation Liaison Officer (ALO). Under the direction of the president, the Accreditation Steering Committee works to lead the accreditation self-evaluation process, a process that requires a thorough examination of college policies and practices with regard to the accreditation standards.

The Accreditation Steering Committee meets bi-weekly throughout the self-evaluation process. At these meetings, the chairs of each of the standards reports on the work being done. The president regularly attends these meetings and provides input on the standards as needed.

Both the board and chancellor openly support the president's role with accreditation, and provide support to the president and College as needed. For example, administrators from district services sit on the Accreditation Steering Committee and assist with the addressing the standards, particularly as related to the role of the board, the chancellor, and district services support of College processes.

Analysis and Evaluation

The president actively supports and leads the College's efforts in meeting and in exceeding the ACCJC accreditation standards, eligibility requirements, and commission policies at all times. The president has adjusted the administrative structure at the College to ensure that the standards are continuously addressed and has created a committee structure that encourages broad participation in the process and includes faculty, staff, administration, and students. Moreover, the President attends Accreditation Steering Committees regularly and participates in the development of self-evaluation reports. Do we add a sentence or two on Substance, Sustainability, and/or Impact?

| IV.B.4-4 | Chancellor email of June 14, 2016 | |

IV.B.5 The CEO assures the implementation of statutes, regulations, and governing board policies and assures that institutional practices are consistent with institutional mission and policies, including effective control of budget and expenditures.

Evidence of Meeting the Standard

The president of is responsible for the implementation of all statutes, regulations, and board policies at the College and works closely with the board and the chancellor to ensure that institutional practices are consistent both with the College mission and policies and with the effective control of the College budget and expenditures.

Per BP, Delegation of Authority to the College President, it is the responsibility of the president to administer the policies adopted by the board, to execute all decisions of the board requiring administrative action, and to ensure compliance with all relevant laws and regulations. The president attends all board of trustee meetings and presents a monthly report on the activities of the college. The president also sits on Chancellor's Council, which sets the agenda for upcoming board meetings, discusses issues of importance to both college, such as regulatory changes, and reviews all proposed changes to board policies (BPs) and administrative regulations (ARs). The president also meets regularly with the chancellor and works closely with the district director, public affairs and governmental relations to discuss change to laws and regulations at the local, state, and federal levels.

When new, revised, and deleted BPs and ARs are proposed by BPARAC, the president provides input coordinates their review at the College through PET, MT, and CC and ensures that input is collected from all constituent groups on campus through representation at CC and on BPARAC. Copies of these proposals are distributed to all constituent groups and input received through their representatives on these committees.

Similarly, the San Dieback College President effectively controls the College budget and college expenditures by utilizing data and information provided by the vice president for college administrative services (VPCAS) and committees responsible for the allocation of resources. The VPCAS reports directly to the president and presents monthly expenditure simulations during PET meetings. The VPCAS ensures that the allocation of funds is made through the proper college processes and that each resource allocation decisions are linked to the strategic plan and to to program review (PR) and administrative unit review (AUR). Moreover, the College had established sound fiscal practices and processes that have consistently produced balanced budgets. These practices have resulted healthy ending balances that have exceeded eight (8) percent of the total budget for the past xx years and have allowed for college contingency and enrollment growth.

Although the president assumes primary responsibility for these matters, he also delegates authority to College managers and administrators for compliance appropriate to their areas of supervision, as discussed in IV.B.2 above.

Analysis and Evaluation

The president has responsibility for ensuring the implementation of statutes, regulations, and board policies and for ensuring that institutional practices are consistent with the College's mission and policies. The president and the president's Executive Team and leadership committees are consistently involved with monitoring compliance with all statutes, regulations, and board policies. In addition, the president has established procedures to ensure the effective management of district and college resources. The president has delegated the primary responsibility of fiscally managing these resources to the VPCAS and addressed through the Planning and Budget Steering Committee (PBSC). In turn, the Saddleback College budget is monitored through internal controls, including the Budget Committee review, quarterly reports, and external audits.

IV.B.6 The CEO works and communicates effectively with the communities served by the institution.

Evidence of Meeting the Standard

The president works and communicates effectively with the communities served by the institution on a number of levels and in a variety of ways including student-focused outreach, community-focused outreach, the college foundation and community outreach, economic and workforce development, and public information and marketing.

Student-Focused Outreach

To help raise the profile of the College in the neighboring community, the Saddleback College President annually invites all senior administration and trustees from the surrounding school districts to meet with Saddleback College personnel, who then showcase the college's programs, certificates, and degrees.

The president also regularly hosts events for high school counselors, graduating seniors, and incoming students. For the 2015-2016 academic year alone, the College sent a letter to over seven thousand (7,000) graduating high school seniors welcoming them to Saddleback College and inviting them to attend the College's annual Senior Day and to participate in Early Bird registration and the Transfer Agreement Guarantee (TAG) program. As a welcoming gesture, the president also sends new incoming seniors an official Saddleback College letter of acceptance.

While the Saddleback College Senior Day is the largest planned gathering and planned student focus outreach effort by the college, the Saddleback College President is also actively involved in the following student focused outreach programs by the college:

- Welcome Week
- Family Night
- High School Counselor Day
- Tech-Prep Day

Community-Focused Outreach

In partnership with the surrounding business community, the president continues to be one of the primary advocates for community economic development. Similarly, Saddleback College has been a leading advocate of the findings in the 2016 South Orange County Economic Report, a report which provides detailed and accurate information regarding the current and future economic trends of cities that partner with Saddleback College. The South Orange County cities and their prominent business members have overwhelmingly accepted the findings and the proposals.

The Saddleback College Foundation and Community Outreach

Another method by which the president effectively engages the communities served by the College is through the Saddleback College Foundation Office. The Foundation solicits and

coordinates donations to the College, and it is organized exclusively for charitable and educational purposes as a 501(c)(3) of the Internal Revenue Service. The College Foundation is recognized as an auxiliary organization and operates under the guidelines established by board policy BP 3610, Auxiliary Organizations.

The College Foundation accepts contributions from the public, initiates and coordinates college fundraising, ensures the appropriate distribution of funds and gifts, and provides judiciary oversight of contributions. The Foundation also serves as an important vehicle for engaging the College community through service on the Board of Governors and through its support of special events that have lasting public relations value.

The president is seeking to elevate the college presence within the surrounding community through the ever-increasing visibility of the Saddleback College Foundation. This goal has led the Saddleback College President to oversee the alignment of the Saddleback College Foundation with the College's strategic directions with emphasis on increasing student scholarships, developing capital campaigns, and increasing the alumnae/i organization. Similarly, and under the aegis of the Saddleback College Foundation, the president has established the President's Club. The President's Club comprises individual and corporate members who join with Saddleback College in fulfilling its commitment to improving the South Orange County communities and to providing expanded educational opportunities to all stakeholders within these same communities.

Economic and Workforce Development

In order to meet the needs of the Saddleback College surrounding communities, the college President created the Office of Economic and Workforce Development (OEWD), headed by the director of economic and workforce development. Under the guise of the Saddleback College, the primary task of the director of economic and workforce development is to establish relationships with the community in order to organize and to provide contract training and continuing education for business employees so that community business employees may more readily meet the needs and requirements of local business employers.

Public Information and Marketing

The president works closely with the director of public information and marketing to disseminate information through the President's Gaucho Gazette, the Annual State of the College Report, and an ongoing series of press releases to local, regional, and national media.

For the 2015-2016 academic year, the Saddleback College web site was revised to focus on students in a way that marketed the college and made it easier for the community to access information. The college also reaches out to students and community through active social media pages on platforms, such as Facebook and Twitter.

(I want to run this by Jennie McCue as I believe there are other modes of communicating here as well, such as eBlasts, emails, news releases, etc.)

Analysis and Evaluation

The president effectively works and communicates with the communities served by the College in a variety of ways including student outreach, the College Foundation, economic and workforce development, and public information and marketing.

Evidence

IV.B.6-1 BP 3601

IV.B.6-2 501 c (3)

OBSOLETE

IV.C.1 The institution has a governing board that has authority over and responsibility for policies to assure the academic quality, integrity, and effectiveness of the student learning programs and services and the financial stability of the institution.

Evidence of Meeting the Standard

Saddleback College exists under the auspices of the South Orange County Community College District (SOCCCD). As the governing board for the College, the SOCCCD board of trustees, with the assistance of the District chancellor, has both the responsible and the authority to establish policies to assure the quality, integrity, and effectiveness of the student learning programs and services as well as the financial stability of the District and its colleges. BP 112, Duties and Responsibilities of the Board of Trustees, outlines these responsibilities in accordance with the authority granted the board by California Education Code. These responsibilities include establishing the District mission, establishing policies that implement the District mission, assuring the development and implementation of short-term and long-term educational and facilities plans, assuring the fiscal health and stability of the District, delegating power to the chancellor, working respectfully with all employees of the District, hiring and evaluating the chancellor, advocating for and protecting the district, and representing the public interest (PB 112).

The Board Policy Administrative Regulation Committee (BPARC), which includes representatives from all constituent groups in the District, is responsible for regularly evaluating board policies and drafting recommended changes to the policies and their associated administrative regulations. BP recommendations are then forwarded to the chancellor and the board for review and approval. All BP are approved at the chancellor level.

The district director of public affairs and government relations maintains the District's website, which includes all approved BPs, ARs, and other pertinent information. Thus, BPs and ARs are accessible to all employees and the public. The BPs, and their aligned ARs, are organized in numbered series by the following categories:

- 00 Series -- Bylaws
- 1000 Series -- Community Relations
- 2000 Series -- Administration
- 3000 Series -- Business
- 4000 Series -- Human Resources
- 5000 Series -- Students
- 6000 Series -- Instruction
- 8000 Series -- Speech and Advocacy

Analysis and Evaluation

The SOCCCD board has authority over and responsibility for all aspects of the District and its colleges, as established in policy and law, especially as it pertains to financial stability and the academic quality, integrity, and effectiveness of student learning programs and. BPs are regularly evaluated and revised by a districtwide participatory governance committee and reviewed by the chancellor and board prior to approval. Revised policies are provided in meeting agendas, presented at the meetings by the vice chancellor of business services, and openly discussed by the board members before approval.

Evidence

IV.C.1-1 https://www.socccd.edu/about/about_boardpolicynew.html

OBSOLETE

IV.C.2 The governing board acts as a collective entity. Once the board reaches a decision, all board members act in support of the decision.

Evidence of Meeting the Standard

The South Orange County Community College District (SOCCCD) board of trustees is committed to high standards of ethical conduct for its members, as delineated in BP 110, Code of Ethics – Standards of Practices. One of the basic principles contained within this policy is the recognition that the board acts as a whole and the authority rests only with the board in a legally-constituted meeting, not with individual members (BP 110). Thus, while members of the board at times certainly have differing opinions on items that come before them, once the board has reached a decision—either via consent or by vote—on an item, the board acts as a collective entity and all board members act in unison in support of the collective decision.

Additionally, all board members perform their duties and interact within the SOCCCD community with the intent of fostering a districtwide culture of mutual respect, courteous interaction, open cooperation, and common civility with all stakeholders in the SOCCCD community as defined in board policy BP 180, Respectful Interaction and Collaboration. Thus, SOCCCD board members are respectful and inclusive of all input and viewpoints when discussing topics in board meetings and prior to any voting. As evidence of their professional decorum, all board meetings are videotaped and subsequently posted on the SOCCCD website for public view.

Analysis and Evaluation

SOCCCD has developed and approved board policies that outline the ethical conduct for all elected board members, including the requirement that the board act in unison once a decision is reached by the body as well as the requirement that when disagreements arise, they are discussed openly and respectfully prior to reaching a collective decision. Videotapes of board meetings and minutes detailing board action from recent years, both available on the district's website, substantiate behavior in accordance with these policies.

http://www.socccd.edu/about/about_boardpolicy1.html

IV.C.2-3 South Orange County Community College Board of Trustees Meetings

http://www.socccd.edu/about/about_board_minutes_video.html

IV.C.3 *The governing board adheres to a clearly defined policy for selecting and evaluating the CEO of the college and/or the district/system.*

Evidence of Meeting the Standard

The board adheres to clearly defined policies for selecting and evaluating the chancellor of the SOCCCD. Three policies include BP 146, Chancellor Succession, BP 148, Evaluation of the Chancellor, and BP 4011.6, Employment Procedures for Chancellor. When taken in toto, these three board policies clearly delineate the rules and requirements for hiring and evaluating the SOCCCD chief executive officer. BP 146 delegates authority to the current chancellor to appoint an acting chancellor to serve in his or her absence for short periods of time, not to exceed 60 calendar days at a time. The board appoints an acting chancellor for periods exceeding 60 calendar days. When a new chancellor is to be hired, the board adheres to the procedures outlined in BP 4011.6, which ensure that input from administration, faculty, and staff is obtained in order to select the most highly qualified individual to fill the vacancy. Once hired, the board conducts an annual evaluation of the chancellor as required by BP 148. The criteria for evaluation is based on board policy related to the duties and responsibilities of the chancellor (BP 2100, Delegation of Authority to the Chancellor), the chancellor job description, and established performance goals and objectives.

Per BP 2100, Delegation of Authority to the Chancellor, the chancellor is responsible for—

“...hiring and evaluating the college presidents. The Chancellor delegates full responsibility and authority to the president to administer the colleges without interference and holds the president accountable for the operation of the colleges.” Thus, in accordance with BP-2100, the board delegates full authority to the chancellor in the hiring, supervising, and evaluating of the Saddleback College president.

Analysis and Evaluation

As established by policy, the board is responsible for selecting and evaluating the chancellor of the District. In compliance with the provisions of California Education Code, the Board delegates full responsibility and authority to the Chancellor to implement and administer board policies and conduct the business of the district and educational programs without interference, and holds the chancellor accountable for the operation of the District. In turn, the chancellor is responsible for selecting and evaluating the college presidents. The chancellor delegates full responsibility and authority to the presidents to administer the colleges without interference and holds the presidents accountable for the operation of the colleges.

OBSOLETE

IV.C.4 The governing board is an independent, policy-making body that reflects the public interest in the institution's educational quality. It advocates for and defends the institution and protects it from undue influence or political pressure.

Evidence of Meeting the Standard

The SOCCCD board of trustees is an autonomous, independent policy-making body that attempts to reflect the public interest in the educational quality of the District. In so doing, the board advocates for and defends its colleges and protects the colleges from undue influence as well as from political pressure.

The SOCCCD board of trustees is comprised of seven members, each of whom resides in the geographical area he or she represents. Board members are elected at large to four-year terms by the voters in south Orange County. For the dual purposes of continuity and self-preservation, the terms of the seven board members are staggered, with elections being held every two years in connection with the state of California general election (BP 109). A student trustee is elected to a one-year term by the students of Saddleback and Irvine Valley colleges and has an advisory vote on all actions taken in open session (BP 109).

In accordance with law and BP 110, Code of Ethics and Standards of Practices, board members are agents of the public entrusted with public funds and must protect, advance, and promote the interest of all citizens while also maintaining independent judgment unbiased by private interests or special interest groups. They must also hold the educational welfare and equality of opportunity of the students of the District as their primary concern. BP 112, Duties and Responsibilities of the Board of Trustees, also lists advocating for and protecting the District and representing the public interest as two of the board's primary responsibilities. Board members consistently advocate interests both of the public and District through interaction with the community, legislators, local organizations, and students. Furthermore, the board encourages public participation at their meetings, as discussed in BP 130, Public Participation at Board Meetings. There is time allotted to public comments at each meeting or written comments may be submitted. Members of the public may also place items on the prepared agenda in accordance with BP 128, Board Agendas. To validate and support its transparency in all of its decision-making, the board conducts all District business in open public meetings with the exception of legally-permitted closed session issues related to legal concerns, personnel, and collective bargaining. The board also consistently provides all of its business and other information to the public on the District's website. This includes board policies, board self-evaluations, meeting agendas and minutes, and other relevant information.

Analysis and Evaluation

Saddleback College meets the Standard.

Evidence

IV.C.4-1 Board of Trustees

https://www.socccd.edu/about/about_board.html

OBSOLETE

IV.C.5

OBSOLETE

IV.C.6 The institution or the governing board publishes the board bylaws and policies specifying the board's size, duties, responsibilities, structure, and operating procedures.

Evidence of Meeting the Standard

As alluded to in numerous standards throughout this self-evaluation, the SOCCCD and its board of trustees, in their efforts to validate and to support transparency in all decision-making and business, publishes the District's by-laws and policies specifying the Board of Trustees' size, duties, responsibilities, structure, and operating procedures. —These policies are published on the District's website, with links to the District's board policies both from its home page as well as from the SOCCCD Board of Trustees' respective pages.

The board policies which delineate the structural and operational matters pertaining to the board are contained within the 100 series of board policies – Bylaws. These include:

- BP 103, Board Membership, which specifies board membership and size
- BP 104, Student Member of the Board of Trustees, which specifies qualifications, requirements for office, term of office, and election
- BP 105, Organization of the Governing Board, which specifies election of officers and the establishment of a set time and place of regular meetings
- BP 106, Board Elections, which specifies the term of office for board members and the trustee geographical areas
- BP 108, Vacancies on the Board, which specifies how and when vacancies outside of the normal election cycle can be filled
- BP 109, Board Education, which demonstrates the board's commitment to ongoing development as a board and outlines the guidelines for conference participation
- BP 110, Code of Ethics – Standards of Practice, which outlines the basic ethical principles of the board
- BP 112, Duties and Responsibilities of the Board of Trustees, which lists the basic responsibilities of all board members
- BP 118, Committees of the Board, which indicates the ability of the board to establish committees
- BP 120, Regular Meetings of the Board, which specifies the location of regular board meetings
- BP 122, Closed Sessions, which specifies the items that can be considered in closed session
- BP 124, Special and Emergency Meetings, which describes the ability of the board to call special and emergency meetings
- BP 126, Quorum and Voting, which specifies the parliamentary rules to be used during board meetings
- BP 128, Board Agendas, which outlines the mandatory practices related to board meeting agenda development and publicizing

- BP 136, Minutes of the Board of Trustee Meetings, which specifies the how minutes will be taken and made available
- BP 154, Conflict of Interest, which specifies board members' obligations in relation to conflicts of interest
- BP 158, Political Activity, which outlines rules related to the political activities of board members
- BP 172, Board Self Evaluation, which states the board's commitment to regular self-evaluation and self-improvement
- BP 180, Respectful Interactions and Collaboration, which states the board's commitment to fostering a climate of mutual respect, cooperation, and civility

Analysis and Evaluation

The board policies on bylaws related to structure and operating procedures are comprehensive and publicly available on the District website. These policies are regularly reviewed and revised by the board with assistance from the chancellor.

Evidence

IV.C.6-1 Board of Trustees

https://www.soccc.edu/about/about_board.html

IV.C.6-2 100 Series - Bylaws

https://www.soccc.edu/about/about_boardpolicy1.html

IV.C.7 The governing board acts in a manner consistent with its policies and bylaws. The board regularly assesses its policies and bylaws for their effectiveness in fulfilling the college/district/system mission and revises them as necessary.

Evidence of Meeting the Standard

The board of trustees performs its duties and fulfills its responsibilities in a manner consistent with its board policies and its bylaws, and abides by BP 112, Duties and Responsibilities of the Board of Trustees, as discussed in IV.C.6 above. Additionally, through procedures established by BP 107, Board Policy and Administrative Regulation, and its associated AR, the board regularly assesses and revises its board policies and bylaws to ensure their effectiveness in fulfilling the missions and visions of the District and its colleges.

New policies and revisions to existing policies may originate from board members, the chancellor, employees of the district, or members of the public (BP 107). The primary body for reviewing board policies is the Board Policy and Administrative Regulation Advisory Council (BPARAC), as directed by AR107. BPARAC is a district-wide participatory governance committee tasked with systematically reviewing and updating board policies and administrative regulations. BPARAC considers recommendations by the Community College League of California (CCLC) and changes to state and federal law when reviewing board policies. Whenever BPARAC members deem and approve revisions, updates, or deletions from a board policy or administrative regulation, they are then submitted to Chancellor's Council for review and input. Chancellor's Council also has authority to approve ARs, as they simply outline the means by which policy is implemented. Once assessed by Chancellor's Council, all BPs are presented as a monthly agenda item for board review and discussion. Per BP 107, the new and revised policies receive at least two readings by the board and are agendaized the first time as "acceptance for review and study" and the final time as "approval." (Minutes) Once approved, revised and updated policies and/or administrative regulations are posted on the District website for public view. The agendas and minutes of board meetings documenting these revisions are also posted on the District website. Additionally, agendas, minutes, and evidential documents from BPARAC and Chancellor's Council meetings are made available to all employees through the District's SharePoint site under District-wide Committees.

Analysis and Conclusion

The SOCCCD board of trustees acts in accordance with established policies and bylaws, as clearly evident in the posted agendas, minutes, and videotapes of all board meetings. Board policies are also reviewed regularly and revised as needed by all participatory governance groups through BPARAC and Chancellor's Council and by the board of trustees.

Evidence

IV.C.7-1 BP-107 Board Policy and Administrative Regulation

IV.C.7-2 AR-107 Development of Board Policy and Administrative Regulation

OBSOLETE

IV.C.8 To ensure the institution is accomplishing its goals for student success, the governing board regularly reviews key indicators of student learning and achievement and institutional plans for improving academic quality.

Evidence of Meeting the Standard

The board is updated annually with research and reports on institutional effectiveness, student success and completion. Presentations are made annually in public board meetings to review and discuss the Student Success Scorecard and other metrics. The scorecard provides performance indicators on how well the colleges are doing in remedial instruction, job training programs, retention of students, and graduation and completion rates.

Analysis and Evaluation

SOCCCD and Saddleback College meet the standard.

Evidence

IV.C.8-1 [http://www.socccd.edu/board%20highlights/documents/Scorecard2015

IV.C.9 The governing board has an ongoing training program for board development, including new member orientation. It has a mechanism for providing for continuity of board membership and staggered terms of office.

Evidence of Meeting the Standard

The board has access to an ongoing training program for board of trustees' development. This training program includes new board of trustees' new member orientation. Additionally, the SOCCCD has a mechanism in place for providing for continuity of board of trustees' membership that, among other points, includes staggered terms of office.

As discussed in BP 109, Board Education, the board is committed to its ongoing development as a board and to an individual trustee education program related to educational governance, policies, legislation, best practices, employee relations, leadership, and accreditation standards and expectations. The board has a comprehensive new board member orientation program that includes attendance at the CCLC's "Effective Trusteeship Workshop." Locally, new trustees are given an orientation by the chancellor and the manager, office of the chancellor and trustee services. They also meet with the vice chancellor, business services, the vice chancellor, human resources and employer/employee relations, and the vice chancellor, technology and learning services, as well as several other department managers.

The board prides itself on its professional demeanor and on its dynamic evolution both as an autonomous body as well as a body of professional individuals. As such, each member is encouraged to attend one conference per year that provides professional development of trustee-related knowledge and skills. This includes the CCLC's "Effective Trusteeship Workshop," which is held annually in January, as well as various conferences hosted by the CCLC, the American Association of Community College (AACC), and the Association of Community College Trustees (ACCT). This commitment is evidenced by budget allocations allowing each trustee to participate in regional meetings and workshops and up to two out of district conferences each year. Following attendance at conferences, workshops, and meetings, trustees regularly share a written and oral report to the other trustees and the public at open board meetings (EVI-minutes).

As outlined in BPs 103, 104, and 106 and discussed in detail in IV.C.4, the board is comprised of seven members each of which resides in the geographical area he or she represents, and an advisory student member. Each board member is elected at-large to an individual four-year term by the voters in south Orange County. For the dual purposes of continuity and self-preservation, the terms of the seven board members are staggered with elections being held every two years in connection with the state of California general election. The student trustee is elected annually by the students of Saddleback and Irvine Valley Colleges, and must alternate each year between the two colleges.

In the event of an unexpected vacancy, the board has adopted procedures to fill the vacancy either by election or provisional appointment (BP 108) in accordance with education code 5090

and government code 1770. The decision to order an election or appoint must be made within 60 days and the election, if ordered, must be held at the next regular election date or within 130 days of the vacancy, whichever comes first. Provisional appointments are made only until the next regularly scheduled election.

Analysis and Evaluation

The board is committed to the continued education of its members. New board members are given a comprehensive and robust orientation, and all board members are encouraged to continue their professional development through attendance at trustee-related meetings, workshops, and conferences. The board has enacted election practices ensuring the continuity of board membership through the staggering of seat terms, and has adopted procedures in the event of a vacancy.

IV.C.9-5 BP 109

IV.CI9-6 Minutes of board meetings

IV.C.10

OBSOLETE

IV.C.11 The governing board upholds a code of ethics and conflict of interest policy, and individual board members adhere to the code. The board has a clearly defined policy for dealing with behavior that violates its code and implements it when necessary. A majority of the board members have no employment, family, ownership, or other personal financial interest in the institution. Board member interests are disclosed and do not interfere with the impartiality of governing body members or outweigh the greater duty to secure and ensure the academic and fiscal integrity of the institution.

Evidence of Meeting the Standard

The SOCCCD Board of Trustees holds themselves –and all employees– to a high code of ethics and to a clear conflict of interest policy. The behavior of board members is governed by BP 110, Code of Ethics – Standards of Practice, which includes both detailed standards of practice all board members must adhere to and clear and thorough guidelines for enforcing these standards of practice. The policy mandates standards of practice related to conflict of interest in financial dealings and nepotism, board decision-making, confidentiality, the protection of public funds, non-discrimination, the primacy of the educational welfare and quality of opportunity for students, meeting participation and preparation, professional development, the promotion and maintenance of good relations with fellow board members, and the promotion of an effective working relationship with the chancellor and district staff. Violations of this policy can result in censure by the board.

Per California AB-1234, Chapter 700, Statutes of 2005 (through the California Fair Political Practices Commission) and in its effort to support the board policy governing ethical behavior, every board member is required to complete Chapter 700 ethics training. This training is free of charge and provided online. Upon completion of the training, a certification of completion is given and these certifications are kept on file in the Office of the Chancellor and Trustee Services.

Every board member is also required to be both discerning and meticulous in disclosing any connections to persons or financial interests that may conflict with his or her responsibilities as a public steward, and in some instances he or she must abstain from any debate or decision-making related to such interests and have the disclosure noted in the official minutes of the meeting as outlined in BP and AR 154, Conflict of Interest. A board member must also not engage in any employment or activity that is inconsistent with, incompatible with, in conflict with, or inimical to his or her duties as an officer of the district.

Within 30 days of assuming office and annually thereafter, each board member must file a Statement of Economic Interest Form (Form 700) with the filing officer in the Office of the Vice Chancellor, Business Services. This form is then forwarded to the Orange County Board of Supervisors. Failure to timely comply can result in criminal and civil penalties including, but not limited to, late fines. Finally, as a way of bearing witness to these processes, all SOCCCD board of trustees meetings are taped to provide further public transparency. These tapings are made available to the public on the District's website the day after a board meeting.

Evaluation and Analysis

The board has clear code of ethics and conflict of interest policies. These policies establish the expected standards of practice for all members of the board, as well as processes for sanctioning behavior that violates the policies. Board members are fully aware of these standards and, to date, there have been no reported instances of violation by any board member or any sanctions discussed or imposed. Board members are required file an annual Statement of Economic Interest Form with the Orange County Board of Supervisors.

Evidence

- IV.C.11-1 BP 110 – Code of Ethics – Standards of Practice
- IV.C.11-2 AB 1234, Chapter 700, Stats. of 2005

- IV.C.11-4 AR 154 – Conflict of Interest

OBSOLETE

IV.D.1 In multi-college districts or systems, the district/system CEO provides leadership in setting and communicating expectations of educational excellence and integrity throughout the district/system and assures support for the effective operation of the colleges. Working with the colleges, the district/system CEO establishes clearly defined roles, authority and responsibility between the colleges and the district/system.

Evidence of Meeting the Standard

The South Orange County Community College District (SOCCCD) is a multi-college district and the chancellor is the CEO of the District. As such, the chancellor is charged with providing leadership in setting and communicating expectations of educational excellence and integrity throughout the system for effective operation of the district colleges, namely Irvine Valley College and Saddleback College. The SOCCCD board of trustees has approved board policies in order to ensure that the chancellor is able to establish clearly defined roles, authorities, and responsibilities among the colleges and the District. The two most policies are BP-2100, Delegation of Authority to the Chancellor, and BP-2101, Delegated Authority to the College President. Additionally, the chancellor has overseen the development of additional documents to clarify roles and responsibilities in the District including the District-Wide Planning and Decision-Making Manual and the Districtwide Function Map both developed through the Districtwide Planning Council (DWPC) a participatory governance council with membership from all constituent groups within the District, and Roles and Responsibilities of Technology.

Moreover, the chancellor meets weekly with the Chancellor's Executive Team, which includes all of the vice chancellors and the two college presidents. The chancellor also meets monthly with all district leadership at a Chancellor's Council. This is a participatory governance council charged with facilitating information exchange and dialogue on districtwide issues and decisions, including governance.

Expectations of educational excellence and integrity are communicated through various means such as Chancellor's Opening Session during Professional Development each year. The chancellor also meets with new fulltime faculty hires during their orientation session.

The chancellor also communicates regularly through the Chancellor's Perspective newsletter, which is mailed out each semester to all employees, and at times it is used to help clarify district functioning. For example, The Chancellor's Perspective from June 18, 2015 (<https://www.socccd.edu/RolesandResponsibilities.htm>), is entitled "Roles and Responsibilities," and in it the chancellor reviewed the roles of the board, chancellor, and college presidents. In it, he delineated the roles and responsibilities as follows:

The Board of Trustees

As elected officials, the board represents the interests of the public. They establish the mission of the district and set policies and standards to support the district's mission and goals. They bear primary responsibility for the district's fiscal health and stability. They monitor institutional

effectiveness and quality and implementation of short and long term educational and facilities plans. The board manages one employee - the chancellor. They delegate full responsibility and authority to the chancellor to lead the district without interference. The board relies on the chancellor to act as the liaison between the colleges and the governing board, including evaluation of executive leadership.

The Chancellor

The chancellor is the CEO of the district and supervises the college presidents, vice chancellors and staff and operations of district services. The chancellor is responsible for implementation of the district's strategic plan, master plans, board policies and regulations and expectations for educational excellence and integrity. The chancellor provides for a fair distribution of resources, control of expenditures, accreditation and long term financial stability to ensure effective operation of the colleges. The chancellor is responsible for hiring and evaluating the college presidents and vice chancellors. The chancellor delegates authority to the presidents for instruction and college operations. More information can be found in Board Policy 2100 – Delegation of Authority to the Chancellor.

The College Presidents

The president is the CEO of the college and is the established authority on campus. The president is responsible for providing a participatory governance process and supporting learning, teaching and student success. The president provides leadership for developing and implementing strategic partnerships and career technical education offerings that meet the needs of the community. The president has the decision making responsibility and authority for all college hiring, discipline and termination, fiscal budgeting and prioritization, planning, and maintenance or improvement of facilities. More information can be found in Board Policy 2101 – Delegation of Authority to College President.

Analysis and Evaluation

For the most part, the South Orange County Community College District Chancellor meets the Standard. There have been instances, however, when the district chancellor has appeared to fail to explain certain points of demarcation to the district presidents and their respective administrations. One such instance is the lack of clearly defined roles of authority with regard to the district's college service areas. This ineffective delimiting and an unsatisfactory defining of each college's outlining allocation has been cause for what some perceive as less than honest efforts on one college or the other to go beyond the bounds of the district's college's service areas, thus creating a less than amiable relationship of trust of collaboration.

Action Plan

In response to this somewhat ineffective operation of the colleges, in April of 2016 the Saddleback College Academic Senate reviewed the salient points of the history of the services

area and the service area boundaries, as well as how and why this area and these boundaries no longer serve the better good either for Irvine Valley College or for Saddleback College. The Saddleback College Academic Senate then unanimously passed a resolution entreating the South Orange County Community College District to revisit the service area and service area boundaries.

Evidence

- IV.D.1-1 BP 2100, Delegation of Authority to the Chancellor
https://www.socccd.edu/about/about_boardpolicy3.html
- IV.D.1-2 BP 2012, Delegation of Authority to the College President
https://www.socccd.edu/about/about_boardpolicy3.html
- IV.D.1-3 District-Wide Planning and Decision-Making Manual
- IV.D.1-4 Roles and Responsibilities of Technology
- IV.D.1-5 Saddleback College Academic Senate Minutes. April 27, 2016

IV.D.2 *The district/system CEO clearly delineates, documents, and communicates the operational responsibilities and functions of the district/system from those of the colleges and consistently adheres to this delineation in practice. The district/system CEO ensures that the colleges receive effective and adequate district/system provided services to support the colleges in achieving their missions. Where a district/system has responsibility for resources, allocation of resources, and planning, it is evaluated against the Standards, and its performance is reflected in the accredited status of the institution*

Evidence of Meeting the Standard

As established in board policy, there is a clear delineation of functions and responsibilities of district services from those of the colleges. These policies include:

- BP-112, Duties and Responsibilities of the Board of Trustees
- BP-2100, Delegation of Authority to the Chancellor
- BP-2100.1, Delegation of Authority to the Academic Senate
- BP-2100.2, Role and Scope of Authority of the Academic Senates
- BP-2101, Delegation of Authority to the College President
- BP-3001, Delegation of Authority
- BP-4309, Duties and Responsibilities of the Faculty
- BP-4056, Classified Employees Participation in Decision Making
- BP-5627, Student Participation in Governance

They are communicated by the chancellor in a variety of ways, including through the posting of board policies to the district website.

In the June 18, 2015, Chancellor's Perspective, the chancellor outlined the distinction between the colleges and district services, a distinction that is often misunderstood by district personnel. He wrote:

We are all part of the same organization – South Orange County Community College District. There are clear lines of authority established between the board and chancellor and the chancellor and presidents. Organizationally, neither the colleges nor district services reign over each other. Any assumptions that one entity is superior over another set unreasonable expectations and fuels tensions. We are all part of the same family with differing roles and functions. Like musicians in an orchestra, each of us plays a part to bring this district to life.

The colleges serve our students by providing instruction and many, many operations and services needed to support students – curriculum, campus safety, facilities, and student services to name just a few. The chancellor delegates authority to the presidents to make decisions for the colleges. Decisions related to hiring, evaluation, discipline, promotion, termination, maintenance and budget priorities, and governance are all managed by the college presidents.

District Services provides centralized functions, enabling the district to operate more economically and efficiently. Accounting, payroll, purchasing, contracts, job recruitment, and IT systems security are examples of services performed for all departments, divisions and employees district-wide. Some people may not realize that District Services is also responsible for areas related to legal, compliance, policy, legislative, reporting, development, systems, employee complaints, research and planning. Sometimes District Services has to provide parameters, oversight or guidance to college or district services departments in these areas. Sometimes changes or limitations are needed and this can cause disappointment or conflict.

We are considered to be one of the most decentralized community college districts in the state.

Additionally, governance, fiscal, and operational responsibilities are often clarified and refined in the district-wide participatory governance committees and councils, including the

- Basic Aid Allocation Recommendation Committee
- Board Policy and Administrative Regulation Advisory Council
- Business Continuity Planning Committee
- Capital Improvement Committee
- Chancellor's Council
- District Online Education Committee
- District Resource Allocation Committee
- District-wide Planning Council
- District-wide Technology Committee
- Learning Services Coordinating Committee

There are several functions that are centralized in district services. These include human resources, technology and learning services, business services, and trustee services.

The Office of the Vice Chancellor for Human Resources and Employee/Employer Relations (HR) is responsible for facilitating the recruitment, selection, and orientation of new employees; mandated training and professional development; collective bargaining; compliance with State and Federal laws and regulations; management of the performance evaluation process; and human resources information systems.

The Office of the Vice Chancellor of Technology and Learning Services coordinates educational programs, technology services, and districtwide research. The vice chancellor also provides leadership in enrollment management; distance education; workforce development programs; online services, products, and programs; security, reliability, and continuity of all district-wide network infrastructure, computer operations, and telecommunications; the maintenance of MIS

data and reporting tools; and the maintenance of the Student Information System (SIS), My Academic Plan (MAP), MySite, the Learning Management Systems (Blackboard and Canvas), and Workday.

The Office of the Vice Chancellor for Business Services provides oversight of all business departments, including Fiscal Services, Facilities Planning and Purchasing, Accounting, Payroll, and Risk Management. The vice chancellor collaborates with the two colleges to prepare the tentative and final district budgets, and provide support and expertise to the District Resources Allocation Council (DRAC). The vice chancellor's office also provides oversight of the annual audit; new construction and facilities renovation; master plan development; and warehouse/mailroom services.

The Office of the Chancellor and Trustee Services is responsible for the coordination of all regular and special Board meetings, including notification, preparation and distribution of agendas and minutes. Office responsibilities also include dissemination of information district-wide, coordination of District-wide events such as the Chancellor's Opening Session during Professional Development (PD) Week each semester, and coordination of districtwide committee meetings including the Chancellor's Executive Team and the Chancellor's Council. Public Affairs, a division within the Office of the Chancellor, is responsible for coordinating marketing; government, community and public relations; and media relations.

The services provided to the colleges by district services are evaluated through discussions in, and surveys for, the participatory governance committee. For example, the District's resource allocation process is evaluated by several committees including CIC, BARC, and DRAC. Evaluation of services is also done with a bi-annual districtwide climate survey. The survey is used to provide opportunities for employee feedback and identify future goals. Lastly, evaluation of services is also done by each district services department through the use of AURs with goals, action steps, and documented outcomes (link to AUR).

IV.D.3 The district/system has a policy for allocation and reallocation of resources that are adequate to support the effective operations and sustainability of the colleges and district/system. The district/system CEO ensures effective control of expenditure.

Evidence of Meeting the Standard

The District has established resource allocation policies and procedures that support the effective operations and sustainability of the colleges and district services. Under the leadership of the chancellor, college and district services personnel work together to ensure effective control of expenditures and financial stability of the District.

The allocation of District general fund resources to the colleges occurs in accordance with BP 3100, Budget Preparation, BP 3101, Budget Management, BP 3101.5, Fiscal Management, and the Budget Development Guidelines, contained within each proposed annual budget. The Budget Development Guidelines were developed by the District Resources Allocation Council (DRAC), a participatory governance committee. They were developed in alignment with the board philosophy of ensuring wide and prudent use of public resources, promoting financial strength and stability, and maximizing educational opportunities for students in accordance with the district's mission statement (EVI-Budget Guidelines). The guidelines related to college allocations include:

- A general fund reserve for economic uncertainties of no less than 7.5 percent of the projected unrestricted revenue shall be maintained.
- The expenditure budget for ongoing purposes shall be the resources that would have been available from state apportionment.
- Excess revenue above apportionment shall be allocated at the College or District for one-time purposes such as to cover some of the unfunded obligations for the retiree benefit plans.
- Excess revenue above apportionment shall not be used for ongoing expenditures, such as salaries.
- Excess revenue above apportionment shall not be used for any other purposes that will jeopardize the District's future financial stability.

The District has also established effective mechanisms to control expenditures. College and District financial statuses are regularly reported to and reviewed by the board (EVI-minutes), such as through the presentation of monthly financial status reports (EVI), monthly basic aid reports (EVI) and adopted annual budgets (EVI). The district also commissions an annual audit report designed to provide reasonable assurance that the financial statements are free of material misstatement. The annual audit considers the district's internal controls over financial reporting in order to plan the audit but does not give an opinion on those controls. In addition, the District's participatory governance committees and collective bargaining groups also provide comprehensive budget and financial oversight, including reviews of the District's CCFS-320 filings and full-time Faculty Obligation Number (FON).

Evaluation and Analysis

The district has a long history of financial conservatism. The district services and the colleges adhere to standards of good practice that include the maintenance of adequate reserves, the development of annual budgets, and the reporting of financial status. Through the effective control of expenditures, district services and the colleges have consistently had positive ending balances each year with a healthy reserve.

The District's Fiscal Services Office processes and facilitates the distribution of resources to the colleges in accordance with the DRAC model, state and federal categorical fund allocation guidelines, and board policies. Resources allocated to the colleges are based on both state-mandated guidelines and board-approved budget guidelines

OBSOLETE

IV.D.4 The CEO of the district or system delegates full responsibility and authority to the CEOs of the colleges to implement and administer delegated district/system policies without interference and holds college CEO's accountable for the operation of the colleges.

Evidence of Meeting the Standard

As discussed in IV.D.2 above, the board has adopted policies that ensure that the chancellor designates full responsibility and authority to the College president. As detailed and defined in its board policy BP 2100, Delegated Authority to the Chancellor, the board gives the power for hiring and evaluating the college presidents to the chancellor and maintains that the chancellor must delegate full responsibility and authority to the presidents to administer the colleges without interference (BP 2100). The policy states:

The Chancellor is responsible for hiring and evaluating the college presidents. The Chancellor delegates full responsibility and authority to the presidents to administer the colleges without interference and holds the presidents accountable for the operation of the colleges.

Additionally, BP 2101, Delegation of Authority to the College President, clearly outlines the roles and responsibilities of the college president. This policy establishes the College president as the final authority on the college level. In this role, the College president is expected to:

- Provide leadership in the development and implementation of a sustainable master plan and integrated strategic plan.
- Promote and support learning, teaching, and student success, including the maintenance and improvement of quality instructional and support services.
- Provide leadership in the development and implementation of career technical education to meet the needs of the community.
- Provide leadership in the development and implementation of a comprehensive enrollment management plan.
- Develop and monitor the college budget and assume fiscal responsibility.
- Propose strategies for selecting and retaining diverse high quality full-time faculty, staff and administrators.
- Provide leadership and empower the administrative team.
- Provide leadership focusing on accountability and professional conduct.
- Assume a highly visible leadership role in the community and build strategic partnerships with corporate, educational and community-based organizations.

This authority is recognized the District, as evidenced in the adopted Districtwide Function Map, which delineates the distinction between the authority of the chancellor and of the president. Through the evaluation process the college presidents are held accountable for the colleges' performance by the chancellor, but have the ability to run the colleges and implement board policy without interference.

Analysis and Evaluation

The chancellor delegates full responsibility and authority to the College presidents to implement board policies and administrative regulations without interference. The presidents serve as the CEO of their respective college. As such, they are responsible for the quality and integrity of programs and services, accreditation, and fiscal stability of their college.

Evidence

IV.D.4-1 BP 2100, Delegation of Authority to the Chancellor

https://www.socccd.edu/about/about_boardpolicy3.html

IV.D.4-2 BP 2101, Delegation of Authority to the College President

OBSOLETE

- IV.D.5 District/system planning and evaluation are integrated with college planning and evaluation to improve student learning and achievement and institutional effectiveness.

Things to address:

1. Integrated strategic planning process. Begins with the establishment of the district plan through DWPC then the colleges use the same goals but can add. See the District Planning and Decision-Making Manual and the Districtwide Strategic Plan.
 - a. <http://www.socccd.edu/about/DWPlanning.htm>
2. DWPC includes representatives from District services and the colleges. The chancellor and both presidents serve. Participatory governance Committee.
3. Currently working on shared key performance indicators. Jennifer can give you information on this.
4. BP 2120 and AP 2120 on Institutional Planning
5. Intergrated Budget Planning Resource Guide
6. Other integrated plans such as the District Technology Plan, and then the college's integration of their tech plan with the district.
7. Evaluation of planning efforts yearly through DWPC
8. Also AURs and PRs, including at District services. Annual AUR Report from DS.

IV.D.6 Communication between colleges and districts/systems ensures effective operations of the colleges and should be timely, accurate, and complete in order for the colleges to make decisions effectively.

Things to address:

1. Weekly meetings of college presidents and chancellor in Chancellor's Executive Team
2. Chancellor's Council
3. Chancellor's office communications, including newsletter
4. District Committee comp, charge, agendas and minutes all posted on shared point
5. Board agendas and minutes; board highlights newsletter through district director of public affairs and governmental relations; press releases and other emails sent to all employees
6. DS offices newsletter
7. DW offices road show
8. Weekly emails and other press releases from college director of public affairs and marketing.
9. District HUGS and other work done on communication and better relations between the two colleges.

Item 4.1 SOCCCD: Accreditation Report Draft

Dr. Tod A. Burnett, President, Saddleback College, and Dr. Glenn R. Roquemore, President, Irvine Valley College, will present information on the draft accreditation report.

An updated version of Item 4.1, Exhibit C was submitted to the Board of Trustees at the November 14, 2016 meeting.

The former version originally posted with the agenda on November 10, 2016 is now obsolete.

Introduction

About Irvine Valley College

Opened in 1979 as Saddleback College North Campus, Irvine Valley College (IVC) received its current name and independent status in July 1985. In July 1988, the college received its first accreditation as a separate institution by the Western Association of Schools and Colleges (WASC). In 2015, the college celebrated its 30th anniversary as an accredited California community college.

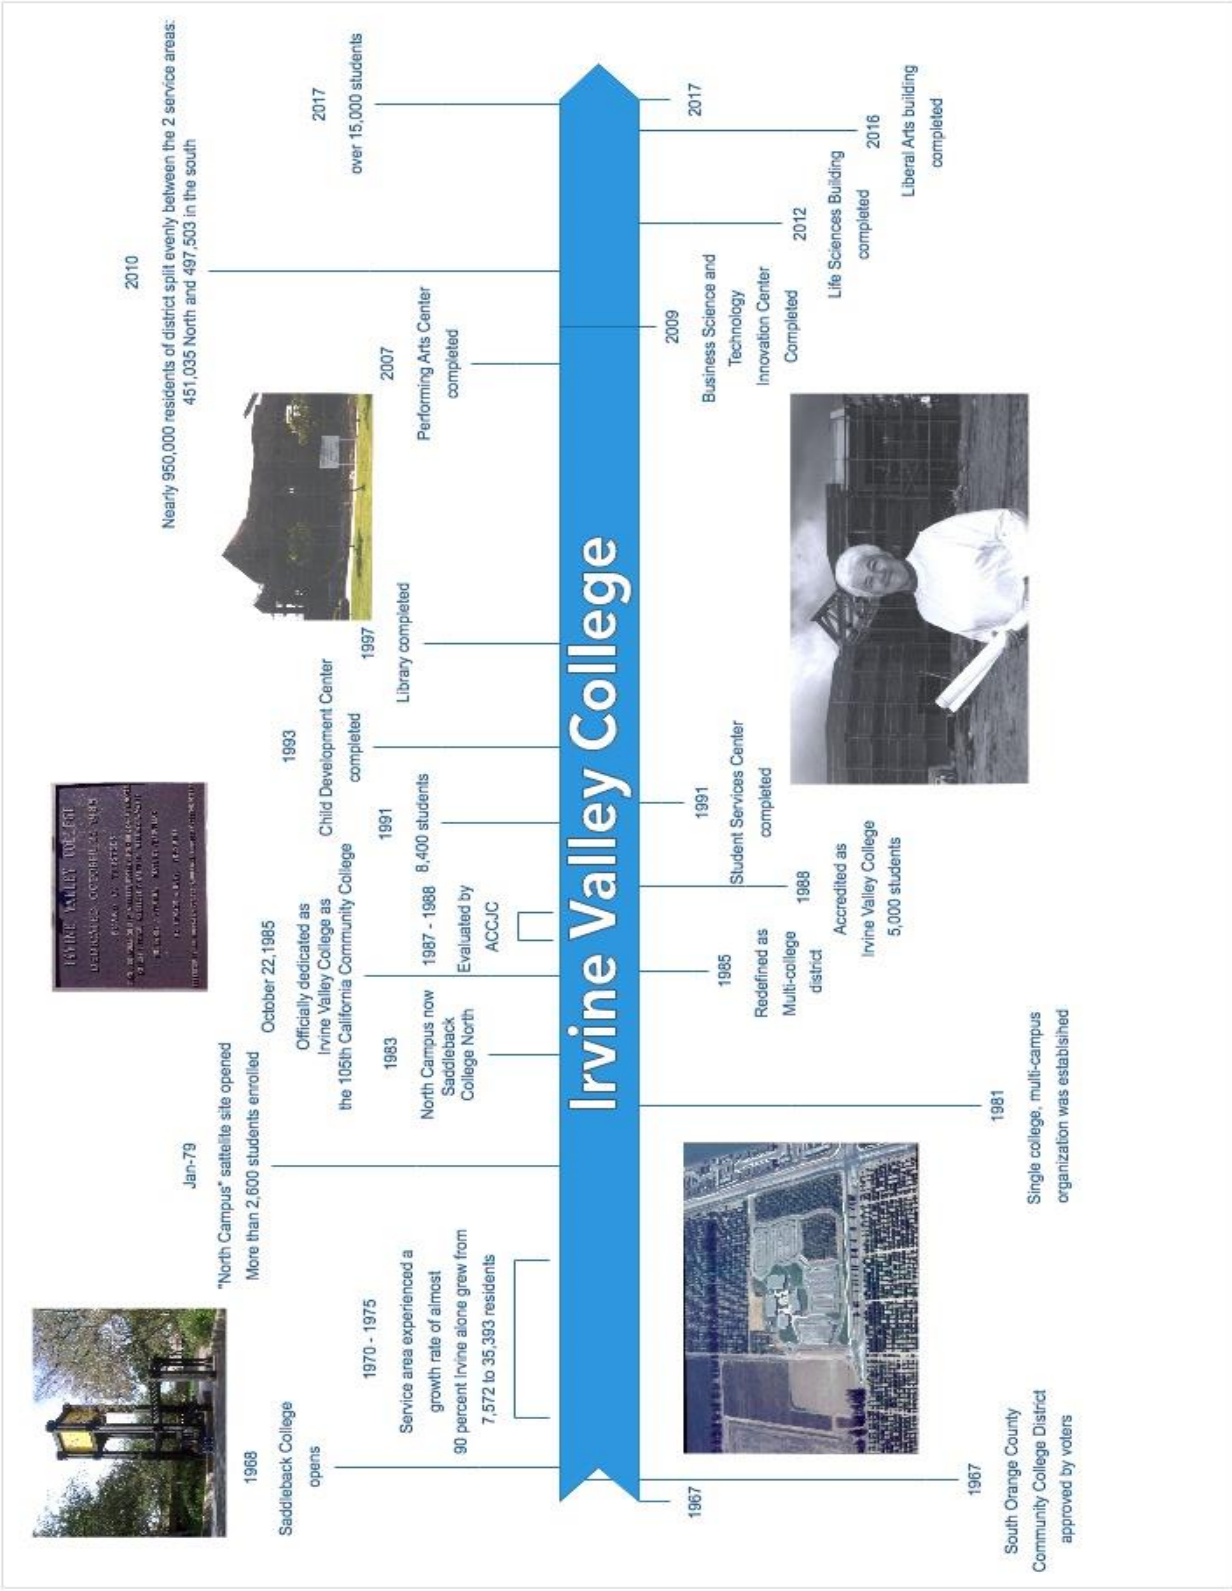

IVC currently ranks number two among California community colleges for its four-year institution transfer rate and number one in Orange County. The college offers a full complement of programs, from most traditional liberal arts and sciences to advanced technologies. It has established a reputation for excellence within the community and among the student population. The success of the college's many programs has been reflected in its continued enrollment growth. At present, over 14,000 students participate in the college's day, evening, weekend and online programs. All instructional programs at the college are housed within 10 academic schools. Full-time instructional deans work with the Vice President for Instruction and the President in overseeing the instructional activities of the college.

IVC is a public community college funded by a combination of state and local tax dollars. Through its foundation, the college also actively solicits private donations from individuals and corporations to support its capital outlay projects, program needs, and students through scholarships. The seven-member Board of Trustees of the South Orange County Community College District (SOCCCD), through the office of the Chancellor, governs IVC, Saddleback College in Mission Viejo, and the Advanced Technology & Education Park (ATEP) in Tustin. Board members are elected at large from representative areas of the district. IVC is under the direction and guidance of its president who, with the faculty and staff, administers the college and oversees the implementation of Board policies.

The driving force behind the success at the college is the campus wide dedication to uphold the mission of the institution.

Irvine Valley College offers clear and guided pathways to transfer, certificates, associate degrees, employment and further education to a diverse and dynamic local and global community. We support student access, success, and equity. IVC fosters economic and workforce development through strategic partnerships with business, government, and educational networks.

Figure 1: Irvine Valley College Historical Timeline

Community and Student Demographics and Data

Data on Irvine Valley College's student and faculty populations indicates significant changes since the period of the last Accreditation Self-Study in 2010.

Service Area Characteristics

Service Area Profile

Located in the northern half of the South Orange County Community College District, Irvine Valley College serves the residents of Irvine, Tustin, Laguna Beach, Newport Beach, Lake Forest, and surrounding communities. The College additionally serves international students as well as online students. According to the 2015 American Community Survey, the population of the IVC service area was 530,232 in 2015, which was an increase of 12% from its population of 473,088 in 2010. This increase is more than twice the rate for the state of California as a whole, which was 5 % during this same time period.

Figure 2: Irvine Valley College Service Area Population 2010 versus 2015

Source: 2015 American Community Survey

Service Area Demographics

Tables 1 and 2 display key demographic information from communities in Irvine Valley College's service area. There is great ethnic and socioeconomic diversity within the IVC service area. Irvine residents are generally well-educated (66% of adults have earned at least bachelor's degree) and financially secure (\$110,000 median family income). Irvine has a substantial Asian community (39%); the cities of Lake Forest and Tustin contain sizeable Latino communities (24% and 41% respectively). Residents from these communities have relatively lower levels of educational attainment and median family incomes. However, these figures are still higher than the statewide figures, where on average 29% of adults in California earned at least a bachelor's degree and have a median family income of \$70,000. Residents from Laguna Beach and Newport Beach tend to be older, have higher median family incomes, achieved high levels of education, and are less likely to be ethnically diverse than other residents in the College's service area.

Table 1: Service Area Population by Ethnicity/Race

City	White	Asian	Hispanic	African-American	Mixed Ethnicity
Irvine	44.4%	38.7%	9.9%	1.9%	4.5%
Newport Beach	81.2%	7.4%	8.2%	0.4%	2.3%
Lake Forest	55.5%	14.9%	24.0%	1.8%	2.9%
Tustin	32.4%	20.2%	41.4%	2.4%	2.3%
Laguna Beach	85.3%	4.0%	6.9%	0.7%	2.6%

Top Occupations

Table 3 outlines the top ten occupations in Orange County that require some college, a postsecondary non-degree award, or an associate degree. Over the next five years, there is an expected 5% increase in the top ten occupations. Although expected to experience a 2% decline over the five-year period, bookkeeping, accounting, and auditing clerks is expected to remain as the top occupation by 2021. Of the top ten occupations in Orange County, nursing assistants is projected to have the greatest five-year change of 17%, placing it as the third top occupation.

Table 3. Top Ten Occupations in Orange County Requiring Some College, Postsecondary Non-Degree Award or Associate Degree by Number of Jobs

Occupation	2016 Jobs	2021 Jobs	2016 - 21 Change	2016 – 21 % Change
Bookkeeping, Accounting, and Auditing Clerks	20,259	19,804	(455)	(2%)
Teacher Assistants	12,678	13,001	323	3%

Enrollment Patterns

Headcount (unduplicated enrollment) has decreased by 5% from Fall 2011 to Fall 2015. At the same time, however, there has been an increase of 7% in full-time equivalent students (FTES) due to an increase in the proportion of full-time students and the average unit load per student.

Figure 3: Unduplicated Student Headcount and Full-Time Equivalent Students, Fall 2011-Fall 2015

Source: SOCCCD inFORM Data Warehouse

Full-Time/Part-Time Status

The unit status distribution of IVC students has changed substantially since Fall 2011. The percent of full-time students increased by 6 percentage points, from 37% to 43%. The percent of part-time students has remained steady over the years, whereas students enrolled in all non-credit courses has decreased from 9% to 4%.

Figure 4: Unduplicated Student Headcount by Unit Status, Fall 2011-Fall 2015

Source: SOCCCD inFORM Data Warehouse

Credit and Non-Credit Course Enrollment

As depicted in Figure 5, total enrollments have remained steady over the last six years, with an average of 40,858. The difference in course enrollments by credit and non-credit status also remains level, with most enrollments in credit sections (average 92%). Credit courses include degree-applicable and not degree-applicable courses.

Figure 5. Credit and Non-Credit Course Enrollment, Fall 2011 to Fall 2015

Source: SOCCCD inFORM Data Warehouse

Credit and Non-Credit FTES

Since Fall 2011, FTES overall has gradually increased over the years, reaching a six-year high of 4,669.34. FTES for both credit and non-credit sections have increased over the years, leaving the ratio of credit and non-credit FTES level throughout the last six years.

Figure 6. Credit and Non-Credit FTES, Fall 2010 to Fall 2015

Source: SOCCCD inFORM Data Warehouse

Career Technical Education (CTE) Enrollments and FTES

CTE enrollment decreased 12% from 5,723 in Fall 2011 to 5,023 in Fall 2015. The number of full-time equivalent students (FTES) decreased 14% over the five-year period.

Figure 7: Career Technical Education Enrollment Counts and FTES, Fall 2011-Fall 2015

Source: SOCCCD inFORM Data Warehouse

Basic Skills Enrollments and FTES

From Fall 2011 to Fall 2015, basic skills enrollments increased by 5% in math, 15% in English, and 30% in English as a Second Language (ESL). Overall basic skills enrollment increased by 15% from 3,029 in Fall 2011 to 3,493 in Fall 2015.

Figure 8: Math, English, and ESL Basic Skills Enrollment Counts Fall 2011-Fall 2015

Source: SOCCCD inFORM Data Warehouse

Compared to Fall 2011, Math basic skills FTES decreased 4% from 165.90 to 158.81 in Fall 2015. During this same five-year time period, English basic skills FTES increased 68% while ESL FTES increased by 19%. Overall basic skills FTES increased 14% from 356.60 in Fall 2011 to 407.31 in Fall 2015. Basic skills FTES accounted for 9% of all FTES in Fall 2015.

Figure 9: Math, English, and ESL FTES, Fall 2009-Fall 2015

Student Demographic Data

Age

The age distribution of IVC students has changed since Fall 2011, with an increased representation among students between 18 to 24 years old, who comprise nearly three-fourths of the student population. In contrast, the population of students ages 30 and older has decreased by eight percentage points from Fall 2011 (29%) to Fall 2015 (21%). The oldest age group (over 59) experienced the greatest change over the five-year period, decreasing by 57%.

Table 5: Student Age Distribution, Fall 2009-Fall 2015

	Fall 2011 (N=14,566)	Fall 2012 (N=14,161)	Fall 2013 (N=14,152)	Fall 2014 (N=13,472)	Fall 2015 (N=13,828)
Below 18	5.9%	6.6%	5.8%	5.5%	6.1%
18-21	41.5%	44.3%	46.1%	49.0%	48.3%
22-29	23.7%	23.6%	24.1%	24.7%	24.7%
30-39	9.6%	9.4%	9.1%	9.4%	8.9%
40-49	6.2%	5.8%	5.6%	5.6%	5.4%
50-59	4.2%	3.8%	3.6%	3.2%	2.8%
Over 59	9.0%	6.5%	5.8%	2.6%	3.8%

Source: SOCCCD inFORM Data Warehouse

Gender

In Fall 2015, 51% of IVC students identified as female, 47% identified as male, and 3% declined to state their gender. Between Fall 2009 and Fall 2015, the percentage of students identifying as female decline by 7%, while the percentage of students identifying as male increased by 6%. During this time, the College has seen an increase in students declining to state their gender, from 1% in Fall 2011 to 3% in Fall 2015.

Figure 10: Student Gender Distribution between Fall 2011 and Fall 2015

Source: SOCCCD inFORM Data Warehouse

Ethnicity

Irvine Valley College serves an ethnically diverse student population, as outlined in Table 6. In Fall 2015, 37% of students identified as Non-Hispanic White, 28% identified as Asian, 17% as Mixed Ethnicity, 13% as Hispanic/Latino, and 2% as African-American. Pacific Islanders, Native American/Alaskan Native, Middle Eastern, and other Non-White Students combined accounted for under one percent of the IVC student body. In addition, 2% of students declined to state their ethnicity.

Between Fall 2011 and Fall 2015, there have been large shifts in the ethnic composition of IVC. The percentage of White students has declined from by four percentage points, while Mixed Ethnicity and Hispanic/Latino experienced an increase of seven percentage points. Less students decline to state their ethnicity at only 2% compared to 6% in Fall 2011. This suggests that IVC is more accurately assessing the complex ethnicities of an increasing proportion of students.

Given that mixed ethnicity students are now a substantial proportion of the IVC student body, additional analyses revealed that 39% of mixed ethnicity students were white and Hispanic, 20% were white and Asian, 10% were Hispanic from multiple countries, and 7% were Asian from multiple countries. Other ethnicity combinations were less than 4% of the total mixed ethnicity student population.

Table 6: Student Ethnicity Distribution between Fall 2011 and Fall 2015

	Fall 2011 (N=14,566)	Fall 2012 (N=14,161)	Fall 2013 (N=14,152)	Fall 2014 (N=13,472)	Fall 2015 (N=13,828)
White	40.8%	40.1%	38.2%	36.5%	36.9%
Asian	27.3%	26.8%	27.7%	27.9%	28.1%

Declined to State	6.3%	4.3%	3.5%	3.1%	2.3%

Source: SOCCCD inFORM Data Warehouse

Socioeconomic Status

Figure 11 below depicts the distribution of IVC students by their socioeconomic status. Economically disadvantaged includes students who received a Board of Governor's (BOG) fee waiver or are participants of the CalWORKs or EOPS program. The significant increase in economically disadvantaged students is largely attributed to the increase in students receiving the BOG fee waiver. Over the five-year period, BOG fee recipients increased by 367%. This increase is a result of the College's increased efforts to inform and encourage students to take advantage of financial aid opportunities.

Figure 11. Low-Income Status Distribution

Source: SOCCCD inFORM Data Warehouse

Enrollment Status

In Fall 2015, the majority of IVC students were enrolled during the previous term and were continuing their education at the College (64%), which is similar to the trend seen in Fall 2011. Over the five-year period, however, there was a decrease in returning students (Fall 2011 at 20%, Fall 2015 at 16%) and a proportionate increase in first-time college students (Fall 2011 at 14%, Fall 2015 at 18%). Concurrently enrolled high school students continue to remain the smallest group at approximately 3% throughout the five-year period.

Figure 12: Unduplicated Student Headcount by Enrollment Status, Fall 2009-Fall 2015

Source: SOCCCD inFORM Data Warehouse

Educational Goals

Between Fall 2011 and Fall 2015, there were significant changes in the educational goals of students. Students seeking to transfer or obtain a degree or certificate increased by 15 percentage points, while those attending IVC for personal development, to advance their career, or are undecided decreased by 13 points. This trend aligns with the increased representation among younger students under the age of 24.

Figure 13: Student Educational Goal Distribution Fall 2009 versus Fall 2015

Degree or Certificate	4.3%	4.7%	4.9%	6.2%	6.5%
GED/Basic Skills	4.0%	4.1%	3.6%	3.1%	2.9%
Vocational Certificate	2.9%	2.8%	n/a	n/a	n/a

Employee Characteristics

Permanent Employee Headcount

Between Fall 2011 and Fall 2015, IVC has increased its number of permanent employees 9% from 322 to 350, with all three employee groups increasing in headcount. The number of classified staff increased 2%, full-time faculty increased 21%, and administrators and managers increased 7%.

Figure 14: Permanent Employee Headcount, Fall 2011-Fall 2015

Full-time Faculty – Ethnicity

In Fall 2015, the majority of full-time faculty at IVC was non-Hispanic white (63%). The next most represented ethnicities were Hispanic (13%) and Asian/Pacific Islander (13%), followed by multi-ethnicity (9%). African-American and American Indian/Alaskan Native comprise approximately 2% of all full-time faculty.

Figure 15: Ethnicity of Full-Time Faculty, Fall 2015 (N=135)

Source: SOCCCD inFORM Data Warehouse

Classified Staff – Ethnicity

Figure 16 depicts the ethnic composition of classified staff at Irvine Valley College. In Fall 2015, half of IVC classified staff were non-Hispanic white. Similar to full-time faculty, the followed most represented ethnicities were Hispanic (26%) and Asian/Pacific Islander (15%). Three percent each identified as African-American, American Indian/Alaskan Native, or declined to state.

Figure 16: Ethnicity of Full-Time Classified Staff, Fall 2015 (N=184)

Source: SOCCCD inFORM Data Warehouse

Administrator and Manager – Ethnicity

Similar to full-time faculty and classified staff, the majority of administrators and managers at Irvine Valley College are non-Hispanic White (52%). Different from the other two employee groups, however, multi-ethnicity is the second largest ethnicity represented where one out of five administrators and managers identified as being more than one ethnicity. Hispanic (16%) and Asian/Pacific Islander (10%) were the third and fourth most represented groups. African American was least represented at 3%.

Figure 17: Ethnicity of Administrators and Managers, Fall 2015 (N=31)

Off-campus Sites and Distance Education

Off-campus Sites

Advanced Technology and Education Park (ATEP)

Off-Campus Sites: The Advanced Technology and Education Park (ATEP) in Tustin is an off-campus site of the South Orange County Community College District, offering courses through Irvine Valley College in subjects such as optics, photonics, design model making and rapid prototyping, languages, information security, entrepreneurship and business. These offerings are in addition to math, sciences, and general education and transfer courses.

The College began offering classes at ATEP in Fall 2007. At the present time, the ATEP campus receives academic planning and oversight as well as guidance and counseling through a coordination of efforts between the ATEP on-site Dean of Instruction for Economic & Workforce Development, the ATEP Work Group, and the IVC Office of Instruction.

Early College Program

In 2007, the College began a pilot early college program at Beckman High School within the Irvine Valley College service area. In 2009, the Early College Program expanded to include El Toro High School in Lake Forest. The purpose of the Early College Program is provide high school students the opportunity to complete the first two years of college during their four years of high school study. High school students are enrolled in a systematically planned academic program taught by IVC instructors, which allows a cohort of high school students to earn an associate degree that coincides with the timing of their high school graduation.

Distance Education

Online Instruction

Irvine Valley College offers five Certificates of Achievement (COAs) and 35 Certificates of Proficiency (COPs) that can be earned entirely online. Coursework for other associate degrees and general education certifications, such as CSU/IGETC requirements, can be completed substantially through online courses offered by the College.

Table 8 outlines the number of sections offered at IVC over the last five years, disaggregated by instruction method type. In Fall 2015, online course offerings accounted for 12% of all sections offered at IVC, yielding a 45% increase in online sections offered compared to Fall 2011.

Table 8. Count of Sections Offered by Instruction Method

	Fall 2011	Fall 2012	Fall 2013	Fall 2014	Fall 2015
Classroom	1,097	1,179	1,213	1,273	1,271
Online	120	122	121	144	174
Other	15	12	12	13	19
Total	1,232	1,313	1,346	1,430	1,464

Source: SOCCCD inFORM Data Warehouse

Note: Classroom includes lecture, lab, lecture/lab combination, learning lab. Internet includes distance education offered 100% via internet and hybrid sections. Other includes directed study, discussion/seminar, field trip, other independent study, and work experience.

Between Fall 2011 and Fall 2015, online enrollments increased by 26%, from 4,722 to 5,948. In Fall 2015, online enrollments accounted for 14% of total course enrollments, with is a two percentage point increase compared to Fall 2011.

Table 9. Enrollment Counts by Instruction Method

	Fall 2011	Fall 2012	Fall 2013	Fall 2014	Fall 2015
Classroom	34,869	35,634	36,978	35,710	35,533
Online	4,722	4,855	4,536	4,969	5,948

Total	39,764	40,588	41,606	40,761	41,572

Student Achievement Data

Course Completion Rates

Overall course completion rates have dropped slightly over the last three years (see Table 10). Course completion rates for African Americans have increased 4 percentage points. Course completion rates for Latinos have dropped 4 percentage points. Course completion rates for other ethnic groups have remained relatively stable. Over the last years, course completion rates for African Americans, American Indian/Alaskan Natives, Latinos, and Pacific Islanders have been substantially lower than the overall course completion rate at IVC. Course completion rates for males have been 3-4 percentage points lower than for females over the last three years. Course completion rates for current or former foster youth have been much lower than the overall course completion rate over the last three years. Course completion rates for Veterans have also been somewhat lower than the overall course completion rate. Lastly, course completion rates for online courses have been about 10 percentage points lower than for in person courses over the last three years.

Table 10. Course Completion by Student Subgroups

**Veterans do not include currently active duty students.

Overall, Basic Skills and CTE Course Success Rates

The overall course success rate (the percentage of students earning a “C” or better, excluding withdrawals) at Irvine Valley College declined slightly from 77% in Fall 2011 to 74% in Fall 2015. The course success rate for students in basic skills courses declined by five percentage points and in CTE courses by three percentage points.

Figure 19: Overall, Basic Skills, and CTE Course Success Rates, Fall 2009-Fall 2015 (N=)

Source: SOCCCD inFORM Data Warehouse

Course Success Rates by Enrollment Status

The course success rate for continuing students declined from 84% to 71% between Fall 2009 and Fall 2015. The rate for returning students declined from 70% to 66% between Fall 2009 and Fall 2015. The rate for first time college students declined from 72% to 70% between Fall 2009 and Fall 2015. The rate for concurrent high school students remained steady at 84% between Fall 2009 and Fall 2015.

Figure 20: Success Rates by Enrollment Status, Fall 2011 to Fall 2015 (N=)

Source: SOCCCD inFORM Data Warehouse

Scorecard Completion Rate – Prepared versus Unprepared

While students who begin their English and math coursework at transfer-level achieve an 80% completion rate at IVC, students who are assigned to one or more remedial classes have completion rates that are nearly 30 percentage points lower. The realization that students who begin in transfer-level coursework are much more likely to transfer or to complete a degree or certificate than are students who are assigned to basic skills coursework has become a driving force in our strategic planning. The strategic objective of increasing completion and reducing the achievement gap has informed efforts at redesigning remedial sequences via models provided by the California Acceleration Project, guided pathways, and the Basic Skills Outcomes Transformation grant.

Figure 21. Scorecard Completion Rates by Prepared/Unprepared Status

Source: California Community Colleges Chancellor's Office, Student Success Scorecard

Persistence Rate

Outlined in Table 11 are percentages of first-time students who attempted any level of Math or English in the first three years of their college career at IVC and persisted by enrolling in the first three consecutive terms anywhere in the California Community College system. Persistence rates for all ethnicity groups increased over the five-year period, yielding an overall rate of 75% in 2009-10.

Table 11. Persistence by Ethnicity

	2005-06 (N=1,091)	2006-07 (N=1,192)	2007-08 (N=1,417)	2008-09 (N=1,632)	2009-10 (N=1,798)
African American	51.9%	61.5%	90.9%	76.0%	69.7%
American Indian/Alaska Native	66.7%	75.0%	50.0%	76.9%	--
Asian	63.6%	60.5%	66.9%	71.1%	76.3%
Filipino	62.9%	70.0%	69.7%	76.0%	86.3%
Hispanic	73.5%	67.8%	74.5%	71.3%	79.5%
Pacific Islander	60.0%	100.0%	50.0%	100.0%	--
White	73.6%	69.9%	71.8%	71.5%	75.5%

	2005-06 (N=1,091)	2006-07 (N=1,192)	2007-08 (N=1,417)	2008-09 (N=1,632)	2009-10 (N=1,798)
Overall	69.6%	67.9%	71.5%	71.6%	74.9%

Note: Percentages with cohorts with fewer than ten students are suppressed.

Overall Units Attempted and Units Earned

IVC students attempted an average of 8.86 units in Fall 2015, a 21% increase from an average of 7.33 units in Fall 2011. Similarly, the average number of units earned increased by 22% from 6.37 units in Fall 2011 to 8.24 units in Fall 2015.

Figure 21: Overall Units Attempted and Units Earned, Fall 2009-Fall 2015

College Preparedness

Figure 22 outlines the percentage of students who place into basic skills English, math, and English as a Second Language (ESL). Data provided are for new students who are first-time freshmen or new to South Orange County Community College District. Over the five-year period, placements into basic skills have decreased in math and English by 11 percentage

points each. ESL basic skills placements, however, have increased by six percentage points, from 9% in Fall 2011 to 15% in Fall 2015.

Figure 22. Basic Skills Placements among New Students

Source: SOCCCD inFORM Data Warehouse

The following three figures outline placements into English (Figure 23), math (Figure 24), and ESL (Figure 25) by ethnicity, focusing on new students. All ethnicity groups experienced a decline in basic skills placements between Fall 2013 and Fall 2015. Students who identified as African American were placing into remedial English at the highest rate (82%) in Fall 2011. In Fall 2015, however, Hispanic students had the highest percentage at 65%. For Math, African American students continued to have the highest basic skills placement (86% in Fall 2011, 75% in fall 2015). For ESL, however, Asian and Pacific Islander students consistently had the high placement into remedial courses. During the three-year period, ESL basic skills placements increased for this ethnicity subgroup by three percentage points and for white students by four percentage points. This increase in ESL basic skills placements may be attributed to the increased percentage of students taking ESL courses for conversational, life-long learning purposes without the intention of progressing into mainstream English.

Progression to the Next Level

In Figure 26 and Table 12, the percentage of students who were placed into basic skills English and successfully completed transfer-level English is displayed. Data is disaggregated by ethnicity. At three levels below, there are no substantial differences in throughput rate among the ethnicity groups. At two levels below, the throughput rate for African Americans and Latinos was substantially lower than the average throughput rate for all students. For students who placed into one level below, completion of transfer-level English is substantially higher, with a difference of over 50 percentage points for white students when comparing to outcomes for three levels below.

Figure 26. Transfer-Level English Completion by Level of English Basic Skills Placement

Source: Data from California Community Colleges Chancellor's Office, Management Information Systems Data Mart, Basic Skills Progress Tracker

Note: Ethnicities with small sample sizes (<10) are not included in analysis.

Table 12. Transfer-Level English Completion by Level of English Basic Skills Placement

	Three levels below		Two levels below		One level below	
	Cohort count	Success rate	Cohort count	Success rate	Cohort count	Success rate
Black or African American	7	28.6%	15	33.3%	6	83.3%

In Figure 27 and Table 13, the percentage of students who were placed into basic skills math and successfully completed transfer-level math is displayed. At three levels below, the overall throughput rate was very low at 8%. Asian students (24%) had substantially higher throughput rates than other ethnicity groups. At two levels below, the overall throughput rate was higher at 14%, with Asian students (21%) again displaying higher throughput rates than other ethnicity groups. Latino students (10%) had somewhat lower throughput rates than other ethnicity groups. At one level below, similar trends are seen among the various ethnicity groups, but overall completion increases substantially to 39%.

In Figure 28 and Table 14, the percentage of students who were placed into basic skills ESL and successfully completed transfer-level English is displayed. Similar data trends are depicted, with completion rates increasing with each increased level of placement. Compared to an overall 9% completion rate when placed three or more levels below, students complete transfer-level English at a rate of 62% when placed only one level below.

Figure 28. Transfer-Level English Completion by Level of ESL Basic Skills Placement

Note: Ethnicities with small sample sizes (less than 10 per level) were not included in Figure.

Table 14. Transfer-Level English Completion by Level of ESL Basic Skills Placement

Degrees and Certificates Awarded

In the 2015-16 academic year, Irvine Valley College awarded 1,185 Associate degrees, a 78% increase over the 665 degrees awarded in 2011-12. The number of certificates awarded during the five-year period additionally increased by 50% from 2,025 in 2011-12 to 2,683 in 2015-16.

Figure 29: Degrees and Certificates Awarded, 2011-2012 to 2015-2016

Source: SOCCCD inFORM Data Warehouse

When looking at degrees and certificates awarded by type, Certificate of Achievements were awarded most to students in 2015-16, an increase by 49% compared to 2011-12. Associate Degrees for Transfer also experienced substantial increases in degrees awarded during the five-year period, but this is due to the novelty of these specific awards. When examining all

other programs, Associate in Science degrees experienced the greatest increase of 128%, from 50 degrees awarded in 2011-12 to 114 in 2015-16.

Table 15. Count of Degrees and Certificates Awarded by Type

	2011-12	2012-13	2013-14	2014-15	2015-16
Associate in Arts	611	731	675	623	709
Associate in Arts - Transfer	4	34	68	101	156
Associate in Science	50	68	62	65	114
Associate in Science - Transfer		4	67	185	209

Transfers to UC and CSU

A total of 589 students transferred from IVC to the University of California system (UC) during the 2015-16 academic year, an increase of 40% over the 421 who transferred to the UC system during the 2011-12 academic year. Transfers to the California State University (CSU) system increased by 30% over the five-year period to 697 students. Overall, the number of students transferring to an in-state public four-year institution has increased with each passing year. Compared to 2011-12, the total number of transfers to either the UC or CSU systems have increased by 34%.

Figure 30: Number of Transfers to UC and CSU, 2011-12 to 2015-16

Source: SOCCCD inFORM Data Warehouse

Transfers to Other Institutions

Figure 31 outlines the number of students who transferred to a four-year institution other than a UC or CSU institution. Beyond UC and CSU transfers, in-state, private transfers are most common among IVC students. Compared to five years ago, the number of in-state, private transfers has decreased by 4% to 453 transfers in academic year 2015-16. Out-of-state transfers to both public and private institutions, however, have increased by 31% and 30%, respectively. Overall, transfers to in-state, private and out-of-state institutions have increased by 15% to 1,218 in 2015-16.

Figure 31: Number of Transfers to Other Institutions, 2009/2010-2015/2016

Source: SOCCCD inFORM Data Warehouse

Institution-set Standards

To support the College's mission through continuous assessment of student learning and student outcomes, Irvine Valley College has established Institution Set Standards (ISS) for course completion, degree and certificate completion, and transfer to four-year institutions. The College has established a methodology to propose standards at one standard deviation below the average. Proposed standards are reviewed and set after extensive discussion based on their feasibility and rigor, given the College's current efforts to support and increase student learning and achievement. Consequently, set standards are not exact calculations following the established methodology.

Course Completion

Course completion rates between 2005-2006 and 2014-2015 experienced small annual differences, with rates ranging from 73% to 77%. Rates peaked in the middle of this 10-year period at 77% in 2009-10 and 2010-11. This coincides with the increase in IVC enrollments resulting from the economic downturn. With a 10-year average of 75%, the College set its course completion rate standard at 72%.

Degree/Certificate Completion

Degrees and certificates are analyzed based on unduplicated counts, and standards are established based on three-year averages. Because students can earn more than one degree and/or certificate, students are counted only once (unduplicated) for each metric measured. The number of students over the last 10 years have increased substantially by 96% and continues to increase based on the last three years of data. Certificates have remained steadier in comparison, with a three-year average of 109.

Transfer

Using data provided by National Student Clearinghouse, students are tracked following their attendance from IVC. The year of the first semester of attendance at the four-year institution is used to report the transfer year. With a statewide ranking of #2 in transfer rate, IVC focuses its efforts heavily on transferring students to four-year universities. The number of students transferring to in-state public, in-state private, and out-of-state institutions increase

each year, reaching an all-time high of 2,434 the most recent year. IVC continues to develop partnerships with local universities, such as the Accounting program “GAP 4+1” with Cal State University, Fullerton. These ongoing efforts will support a continued increase in transfers from IVC to four-year institutions.

Table 16. Irvine Valley College Institution Set Standards

Data Element	2005-06	2006-07	2007-08	2008-09	2009-10	2010-11	2011-12	2012-13	2013-14	2014-15	Average*	IVC Standard**
Course Completion Rate	73%	74%	75%	76%	77%	77%	76%	76%	76%	75%	75%	72%
Degrees Awarded	412	340	365	429	604	619	653	809	764	808	794	770
Certificates*** Awarded	101	73	70	106	118	121	105	101	98	127	109	100
Degrees / Certificates Awarded - <i>Unduplicated</i>	503	407	426	525	709	725	746	895	851	913	886	850
Transfers	1,408	1,414	1,403	1,598	1,841	1,933	2,022	2,250	2,271	2,434	2,182	2,000
*Calculations for averages vary by data element. Averages for course, degree/certificate, and transfer data are calculated based on the last 10, 3, and 5 years, respectively. **TVC standards are proposed at one standard deviation below the average, which are reviewed for feasibility and rigor given current college-wide efforts. Set standards, consequently, are not exact per the established methodology to set standards. ***Only Chancellor's Office approved Certificates of Achievement are included in counts and the College's ISS.												

Job Placement

Irvine Valley College has used the results of the Career Technical Education Outcomes Survey (CTEOS) to provide data on employment for its certificates and programs. The survey allows the college to assess whether the respondents are employed in the field for which they prepared at college. This information has become an important part of regular Program Review process, as well as the biennial CTE review. While the college also uses EMSI Data Analyst to prepare labor market reports for CTE programs, results from the CTEOS are valuable in that they are directly related to the experiences of the college's program graduates. Moreover, CTEOS data complements the larger scale information by allowing the college to focus on the work histories and post-graduation experiences of CTE alumni.

Table 17. Job Placement Rates for Students Completing Certificate Programs and CTE Degrees

Program	Award Type	CIP Code	Inst. Set Standard	Job Placement Rate	
				2012-13	2013-14
Accounting	AS	52.03	70%	70%	75%
Accounting	COA	52.03	70%	77%	79%
Computerized Accounting	COP	52.03	70%	91%	89%
Child Development	AS	19.07	70%	100%	91%
Financial Accounting	COP	52.03	70%	83%	86%
Payroll	COP	52.03	70%	75%	75%
Income Tax	COP	52.15	70%	88%	90%
Spreadsheets	COP	11.03	40%	50%	52%
Paralegal Studies	COP	22.03	70%	--	100%

Source: 2015 and 2016 ACCJC Annual Reports

Integrated Postsecondary Education Data System (IPEDS) Data Analysis

Irvine Valley College has evaluated achievement data from a variety of resources, including IPEDS data. The Office of Research, Planning and Accreditation works with the Chancellor's Office and District Services to review IPEDS data submissions and to complete IPEDS data surveys regularly. As part of the strategic planning process, the College and the District reviewed a number of completion metrics, including IPEDS 150% and 200% completion metrics [[Completion White Paper v.1.61](#)]. Ultimately, it was decided to use the Chancellor's Office Scorecard completion metric in the Districtwide Strategic Plan. One reason for focusing on the Scorecard's completion metric was that it includes transfer as an outcome whereas the IPEDS graduation rate includes only certificates and degrees, transfer being captured in another number. The IPEDS graduate rate is also calculated only for cohorts of students who are full-time in their first term. Because the majority of IVC students are not full-time students, the Scorecard cohort definition is more inclusive. Finally, the time frame of the Scorecard definition is longer which fits better with the typical trajectory of mostly part-time students where we see many completions in the fourth, fifth and sixth year after initial entry. Moreover, by focusing on this metric, which is required to be shared with the Board of Trustees annually, the District and the College have improved communication and increased clarity regarding institutional goals, objectives, and targets.

Table 18: Integrated Postsecondary Education Data Metric

IPEDS Metric	AY 2013-14	AY 2014-15	AY 2015-16
All completers (unduplicated)	1,087	1,468	1,526
Less than 1-year certificates	91	261	281
At least 1 but less than 4-year certificates	892	1,060	1,059
Associate's degrees	743	798	932
Award, certificate (less than 1 AY)	211	323	328
Award, certificate (at least 1 but less than 2 AY)	976	1,080	1,078
Associate's degree	818	973	1,170
150% completion rate	36.0%	37.7%	39.3%
Transfer-out rate	17%	17%	16%
200% completion rate	43.0%	46.0%	48.0%
100% completion rate	17%	17%	20%

Still IPEDS data provides a useful perspective. For instance one can see that graduation rates have been trending up from the 2013-14 academic year to the 2015-16 academic year, while transfer rates have been slightly down – a trend mirrored in the disaggregated Scorecard data

that is reported to the Board of Trustees. It is also useful to see that efforts to increase financial aid uptake have been succeeding, as the percentage of students with Pell grants has steadily increased over the past three years. All of this data is also available in MIS reporting and on the data warehouse, data sources that are generally preferred as they allow for further disaggregation and statistical analysis.

Table 19: Integrated Postsecondary Education Data Metric

IPEDS Metric	Fall 2013	Fall 2014	Fall 2015
Total fall enrollment	13,362	13,157	13,183
Fall enrollment full-time	4,495	4,659	4,623
Percentage full-time	34%	35%	35%
Fall enrollment part-time	8,867	8,498	8,560
Percentage part-time	66%	65%	65%
First-time full-time degree seeking	1,294	1,386	1,505
First-time degree seeking	2,529	2,391	2,497
Transfer-in degree seeking	1,479	1,477	1,387
Non-degree/certificate seeking	1,637	1,535	1,684
Total entering students	4,736	4,512	4,586
First-time full-time cohort retention	79%	79%	78%
First-time part-time cohort retention	50%	54%	48%
Percent of students with a Pell Grant	12%	14%	16%
Number of students with a Pell Grant	1,651	1,898	2,116
Percent of students with federal student loans	1%	1%	1%
Number of students with federal student loans	195	187	176
3-year federal student loan default rate	14.7%	8.9%	12.7%

IPEDS data is congruent with other college-derived reports and with Scorecard data as it is derived from MIS submissions and survey responses prepared by the Research Office. Where there are differences in rates and numbers it is usually due to different definitions and/or timeframes being used. For example the annual number of certificates completed reported by IPEDS is much higher than the annual number of certificates used in establishing IVC's institutional-set standards. That is because the ISS for number of certificates is only based on CTE or gainful employment certificates and IVC awards a large number of general education certificates, such as the Intersegmental General Education Transfer Curriculum (IGETC) certificate.

Organization of Self Evaluation Process

Background

The self-evaluation process at Irvine Valley College (IVC) is overseen by the Strategic Planning and Accreditation Council (SPAC), created in 2013 as the highest level participatory governance group at the campus. SPAC works in concord with two on-going workgroups: The Strategic Plan Oversight Work Group (SPOWG) and the Accreditation Oversight Work Group (AOWG). These work groups are responsible for integration and reconciliation of the planning recommendations forwarded from the strategic planning committees.

Preparation for the self-evaluation process began in Fall 2014. AOWG proposed a draft work group membership, comprised of leadership broadly representing the campus. The Academic Senate approved and SPAC adopted the proposal. Work group membership has been modified to reflect changes in personnel assignments and interests while remaining broadly representative of the campus community. A member of the faculty was appointed as the accreditation self-evaluation writer, to assist the workgroups with editing, proofreading, consistency, and, if needed, writing the drafts.

Since 2014, the college has had college representatives attending accreditation institutes and workshops to facilitate a deeper understanding of the purpose peer review and self-evaluation in the accreditation process. Several members of the college community have served on accreditation evaluation teams, bringing back to the campus useful insights and advice during the process.

In August 2015 AOWG presented an accreditation timeline ([N.1.1](#)) and held an Accreditation Think Tank during fall professional development week. During the Accreditation Think Tank, members of the campus community were introduced to the four accreditation standards and asked to provide input, including stories and examples of evidence, on institutional compliance with the standards. That material became the starting point for the work of the Accreditation Mini Retreats, held in September 2015 ([N.1.2](#)). During the Accreditation Mini Retreats, members of the standards work groups came together for the first time to delve deeply and systematically into each standard and sub-section over a three-hour period. The Accreditation Mini Retreats served as kick-offs for a series of meetings by each standard subsection workgroup that took place during fall 2015 and spring 2016.

To assist the workgroups, the college's Research and Accreditation Office provided a template that aligns the guiding questions from the *Guide to Evaluation and Improving*

Institutions, July 2015 with a draft narrative and evidence ([N.1.3](#)). These templates became the basis for the standards drafts.

The timeline presented during fall 2015 flex week called for the workgroups to produce outline templates and a first draft of the narrative during fall 2015. Spring 2016 would see the workgroups finalize narratives. Summer 2016 was to be devoted to checking evidence and editing the self-evaluation. A college-wide review and work archiving the evidence would be completed during Fall 2016 ([N.1.4](#)).

The Board of Trustees has supported and assisted the accreditation process. In fall 2015, members of the board attended accreditation update sessions during professional development week and the mini retreats. The accreditation liaison officers of Irvine Valley College and Saddleback College made joint accreditation updates to the Board of Trustees in October 2015 and October 2016. A near final draft of the self-evaluation report was presented to the Board of Trustees for acceptance in November 2016.

The campus community and public engaged in reviews of the self-evaluation draft during October and November 2016. A two-week campus-wide review and comment period on the self-evaluation report commenced on October 5, 2016, followed by five afternoon editing sessions attended by faculty, staff and administrators. An additional review and comment period of the revised draft commenced on October 24, 2016. This review period included a Third Party Comment Forum and external accreditation webpage launch on October 25, 2016.

The organization of the self-evaluation was designed to be as inclusive as possible and to empower members of the faculty to participate and take ownership of the analysis, writing and evidence gathering that are requisite parts of a self-study. All standards workgroups had faculty co-chairs appointed by the Academic Senate, most serving continuously from fall 2015 to fall 2016.

District Function Map

Link to updated Function Map Pending

Certification of Continued Compliance with Eligibility Requirements

1. Authority

Irvine Valley College (IVC) is a public two-year community college operating as a post-secondary educational institution to award degrees and certificates under the authority of the State of California ([N.1.5](#)), Department of Education, the Board of Governors of the California Community Colleges. The College is one of 113 institutions within the California Community College system. IVC is governed locally by an elected Board of Trustees for the South Orange County Community College District. The College was accredited in 1988 by the Accrediting Commission for Community and Junior Colleges (ACCJC) of the Western Association of School and Colleges (WASC) and has continuously maintained accredited status ([N.1.6](#)).

2. Operational Status

In Fall 2015, Irvine Valley College served 13,828 students ([N.1.7](#)), with 91% of course enrollments in credit courses ([N.1.8](#)). Over three-fourths of students declared an educational goal to transfer or obtain an associate degree or certificate ([N.1.9](#)). In Academic Year 2015-16, IVC awarded a total of 1,185 Associate degrees and 2,683 certificates ([N.1.10](#)).

3. Degrees

In Academic Year 2015-2016, Irvine Valley College (IVC) offered 80 Associate of Arts and Associate of Science Degrees, of which include 23 state-approved Associate Degrees for Transfer to the Cal State University (CSU) System ([N.1.11](#)). To obtain an Associate in Arts or Associate of Science Degree, students must complete a minimum of 60 units of credit, pass all applicable program courses with a grade “C” or better, maintain a grade point average of 2.0 or higher, and complete general education requirements ([N.1.12](#)). Associate

Degrees for Transfer have the same requirements, with the exception that students must complete 60 CSU-transferable units.

IVC also offers 63 Certificates of Achievement (state-approved program) and Certificates of Proficiency (locally approved program). To earn a certificate, students must complete all required coursework with a grade “C” or better and complete a minimum of 12 units at IVC. For certificates with a total unit requirement being less than 12, students are required to complete all units at IVC. Degree and certificate requirements are detailed in the College Catalog ([N.1.13](#), [N.1.14](#)).

To ensure education offerings promote students’ opportunity to obtain a degree or certificate, 1,290 credit sections were offered and 91% of IVC students enrolled in at least one of the offered credit sections in Fall 2015 ([N.1.8](#)).

4. Chief Executive Officer

The South Orange County Community College District (SOCCCD) appointed Dr. Glenn R. Roquemore ([N.1.15](#)) as President of Irvine Valley College. Dr. Roquemore took office in July 2002. Pursuant to Board Policy 2101 ([N.1.16](#)), the Chancellor delegates authority to the College President to oversee college operations and administer board policies. The President does not serve as the chair of the governing board ([N.1.17](#)).

Dr. Roquemore served as President during the last comprehensive accreditation site visit in 2010. Irvine Valley College has not been required to inform the Commission of any changes in the institutional chief executive officer.

5. Financial Accountability

An audit is conducted on an annual basis by an independent certified accounting firm in accordance with California Education Code Section 8848, in accordance with generally accepted auditing principles and is designed to obtain reasonable assurance that the financial statements are free of material misstatement. This process includes examination and testing of supporting documentation as well as an examination of internal controls which provide feedback on processes that require improvement or adjustments. The audit assesses the accounting principles used and management’s estimates to provide reasonable assurance that material misstatements which could affect the financial statements as a whole are detected. It

considers the District's internal controls over financial reporting in order to plan the audit but does not give an opinion on those controls. The District's effective financial management is reflected in the limited number of audit findings. Budget and audit documents are posted to the District Business Services website ([N.1.18](#)).

The District audit reports and findings are reported to the Board of Trustees in November of each year ([N.1.19](#)). The report is shared by the audit firm representatives who highlight material weaknesses, if any. The District has audit committees for the District and foundation audits and several board members serve on those committees. The auditors share more detailed information during these meetings.

The College's financial aid program is evaluated on an annual basis as part of the College's independent audit process which includes an assessment of the College's compliance with federal Title IV regulations and requirements. The College submits the results of its annual Federal Single Audit to the USDE each year. During this accreditation cycle, the College has had no findings in the audit of the financial aid program ([N.1.18](#)).

The College has maintained loan default rates at an acceptable level while complying with the responsibilities defined by the U.S. Department of Education. The College's three-year default rate on student loans in Fiscal Year 2013 was 12.7%, which is below the requirement established by California (<15.5%) as well as the federal requirement (<30%) ([N.1.20](#)). The College has not had any actions taken against it due to non-compliance with Title IV regulations.

For the three most recent years for which data are available ([N.1.21](#)), the student loan default rates among IVC alumni were: 2011: 14.7%; 2012: 8.9%.; 2013 12.7%

The District and College have robust and transparent budgeting and financial oversight processes ([N.1.19](#), [N.1.22](#), [N.1.23](#)).

Compliance with Commission Policies

This section responds to the Commission Policies as defined in Appendix A of the Manual for Institutional Self Evaluation. The narrative supplies the information required by the Checklist for Evaluating Compliance with Federal Regulations and Related Commission Policies (Appendix K of the *Manual for Institutional Self Evaluation, October 2015, Revised Edition*). References to other sections of the Self Evaluation Report are included, as appropriate.

Policy on Rights and Responsibilities of the Commission and Member Institutions

Irvine Valley College complies with the ACCJC's *Policy on Rights and Responsibilities of the Commission and Member Institutions*. Accreditation activities are coordinated by the Accreditation Oversight Work Group under the direction of the President, the Accreditation Liaison Officer (ALO), and the Strategic Planning and Accreditation Council (SPAC) ([N.1.24](#)). The President and the ALO are the primary contacts for communication with the ACCJC.

The College has been accredited since July, 1988 and voluntarily complies with the ACCJC standards in order to ensure student learning, institutional effectiveness and continuous quality improvement. The College maintains an archive of current and accreditation reports, letters, and documents on its accreditation website (<http://accreditation.ivc.edu> [N.1.25](#)). The College has a documented history of timely compliance with Commission requests and recommendations ([N.1.26](#)). The College's self-evaluation process was broadly representative and involved a wide array of staff, faculty, students, and administrators ([N.1.27](#)).

Irvine Valley College also complies with Title 34 of the Code of Federal Regulations, 34 CFR 602.23(b), which states:

In providing public notice that an institution or program subject to its jurisdiction is being considered for accreditation or preaccreditation, the agency must provide an opportunity for third-party comment concerning the institution's or program's qualifications for accreditation or preaccreditation. At the agency's discretion, third-party comment may be received either in writing or at a public hearing, or both ([N.1.28](#)).

As part of the current self-evaluation process, the President and the ALO convened a public forum for the purpose of soliciting and receiving public comment ([N.1.29](#)). Additionally, the

College opened a public website with a web form for the general public to be able to submit comments on the College's accreditation process ([N.1.6](#)).

Policy on Institutional Degrees and Credits

Irvine Valley College complies with the minimum 60 semester credit unit requirement set forth in Title 5, Section 55063 of the California Code of Regulations, ([N.1.30](#)). This requirement is stated in the College catalog ([N.1.31](#)). Associate degrees consist of units required for the major or area of emphasis combined with required general education units and degree applicable elective units.

The College follows the Chancellor's Office "Standard Formula for Credit Hour Calculations." The College uses a compressed semester calendar, with a semester of approximately 17 weeks in length. In this formula, every 18 hours of lecture per semester corresponds to one unit of course credit. For classes with laboratory or arranged hours, 54 hours of class time per semester corresponds to one unit of course credit, which equates to just over three hours per week.

To comply with the regulations set by the U.S. Department of Education and the ACCJC in regard to setting institutional standards for student achievement (cf. 34 CFR 602.16(a)(1)(i); 602.17(f); 602.19(a-e)), IVC has established institution-set standards for the following indicators of student achievement and attainment: course completion rates, annual counts of students who transfer to a four-year institution, annual counts certificates awarded, and annual counts of degrees awarded. Additionally, the college reviews data on employment in the field for all gainful employment programs with at least ten graduates ([N.1.32](#)).

The College's Institutional Effectiveness Committee sets the institutional set standards and reviews them annually along with information on strategic key performance indicators and goals. The institutional set standards and other strategic information create the context for the other work that IEC does including its review of academic program reviews, equity planning, strategic planning, and basic skills initiative planning ([N.1.33](#)).

Policy on Transfer Credit

Transfer Credit

Irvine Valley College grants credit for college units earned at regionally accredited institutions of higher education. No more than four units may be awarded for sectarian courses. Students must arrange to have all transcripts to be evaluated for transfer credit sent to the Office of Admissions and Records as early as possible to determine if coursework can be used to satisfy prerequisites or equivalencies. Applications for degrees or transfer certifications cannot be processed without all official transcripts on file from all colleges from which coursework is intended for transfer credit. Questions regarding specific courses for which a student is seeking transfer credit should be addressed to the Counseling Center or Transfer Center at Irvine Valley College ([N.1.34](#)).

Transfer from Foreign Institutions

Students seeking evaluation of foreign coursework must provide a transcript evaluated by an accredited evaluation and translation service. Students must turn in the official evaluation to the Office of Admissions and Records for inclusion in their record and then set up an appointment with the Counseling Center so that their transfer work may be evaluated. Coursework from foreign institutions cannot be used for CSU or IGETC certification except to validate the foreign language requirement. Students may be granted credit toward CSU-Breadth and IGETC by earning specified scores on International Baccalaureate (IB) Higher Level exams ([N.1.34](#)).

Credit by Exam

Irvine Valley College may grant credit by examination to a student for previous experience, training, or instruction equivalent to a specific course offered by the college—provided it is a course for which the student has not received prior high school or college credit, has not attempted credit by examination, and has never enrolled. The course should be one whose content, in the opinion of the department and the instructor assigned, lends itself to testing by examination ([N.1.35](#)).

Credit by examination may be granted only for a course listed in the college catalog and only to a student who is registered in the South Orange County Community College District and is in good standing. A student may not receive credit by examination for any course which is a prerequisite to a course for which the student has already received credit. A minimum 2.0

grade point average in at least 12 units completed at Irvine Valley College is required to attempt credit by examination ([N.1.35](#)).

Units earned through credit by examination will not be counted in determining the 12 semester units required in residence for graduation. The procedures for securing permission to obtain Credit by Examination for a specific course are as follows:

1. The student submits a Credit by Examination petition form to the Office of Admissions and Records, where eligibility will be determined. Petitions are available at the Office of Admissions and Records.
2. The student contacts an instructor who teaches the course for which Credit by Examination is requested. If it is the judgment of the instructor that the course content can be tested by examination and that the student possesses sufficient background, previous training and/or skills to attempt the examination, the instructor signs the form.
3. The student, following policies and procedures developed within the school, obtains the approval of the appropriate instructional dean.
4. Following approval from the dean, the request is forwarded to the Vice President for Instruction for final approval. (The Vice President for Instruction will forward the approved petition to the Office of Admissions and Records.)
5. The initiating instructor prepares, administers, and grades the examination. The instructor must forward the grade to the Office of Admissions and Records.
6. A grade of Pass (“P”) or No Pass (“NP”) will be assigned, and the course will be identified as “Credit by Examination” on the student’s transcript.

Advanced Placement (AP) and College Level Examination Program (CLEP)

Students may earn associate degree and general education credit for Advanced Placement (AP) Tests with scores of 3, 4, or 5. Students must have the College Board send AP exam results to the IVC Admissions Office for use on the associate degree or general education pattern. Credit by Advanced Placement exam is noted on the student’s transcript ([N.1.36](#)). The College recognizes the College Level Examination Program (CLEP). A student, by successfully completing the General Examination (25th percentile or higher), may earn up to 12 ungraded units applicable to the associate degree as follows: 3 units in Humanities and Fine Arts; 3 units in Mathematics; 3 units in Social Science; and 3 units in Natural Science

(non-laboratory). No credit will be given for CLEP in any area in which the student has earned college credit prior to completion of the CLEP examination. Credit for CLEP is awarded upon completion of 12 units in residence at Irvine Valley College ([N.1.37](#)).

Policy on Distance Education and on Correspondence Education

As online course offerings have grown at IVC, more programs have become able to be completed at least 50% online. In response to this growth, IVC submitted a substantive change to ACCJC in 2016 ([N.1.38](#)).

Students who wish to enroll in an online course at IVC must meet the specific requirements of the course and participate responsibly. Students are required to attend an orientation for online classes that provides tutelage in how to access and use the online learning environment. Instructors inform students at the class orientation or by email about how to use the Blackboard account. Students officially enrolled in an online class may access their class account with a user name and password ([N.1.39](#)).

Distance Education (DE) means instruction in which the instructor and the student are separated by distance and interact through the assistance of instructional technology (Title 5, Section 55200). DE courses at IVC are offered only through online modalities. Each proposed or existing course offered by distance education shall be reviewed and approved separately by the College's Curriculum Committee. Courses that are fully online shall be reviewed separately from hybrid courses ([N.1.40](#)).

When approving distance education courses the Curriculum Committee certifies the following ([N.1.41](#), [N.1.42](#)):

Course Quality Standards: The same standards of course quality are applied to the distance education courses as are applied to traditional classroom courses. The class offered at a distance will fulfill all the criteria of the course outline of record (COR), including comparable content delivery, learning objectives, assignments, and methods of evaluation as expected in face-to-face delivery modalities.

Instructor Qualifications: Faculty teaching online courses shall be selected by the same procedures used to determine all instructional assignments, with additional consideration of the faculty member's experience and skill set related to online instruction

Instructor Contact: All approved DE courses, including fully online (100%) and hybrid (1%-99% online) courses, shall include regular effective contact between instructor and students. The colleges' Curriculum Committee's separate approval is to verify that the distance

modality can and will provide this regular effective contact. Instructors will use one or more of the following accepted practices of regular effective contact in their online courses:

- **Regular Announcements:** It is best practice for faculty to make general announcements to students in online classes on a regular basis, such as through the use of the announcement area in the learning management system (LMS) or via emails to the entire class.
- **Orientation:** It is best practice for faculty to send a welcome communication to students which may include course information, expectations, contact information, and how to access online content. Additionally, orientations may take place online or face-to-face.
- **Establishing Expectations:** Faculty should include in their syllabus or course orientation a description of the frequency and timeliness of instructor-initiated contact and feedback, as well as expectations for student participation. It is best practice to include the timeframe for responding to student questions/inquiries (for example, ‘within two business days’), the timeframe for receiving feedback on student work (for example, “within 7-10 business days”), the timeframe for submission of assignments, and the quantity of discussion board postings required of the student.
- **Faculty-Initiated Interaction:** It is best practice for faculty to regularly initiate interaction with students in a variety of ways, including but not limited to: asynchronous discussion board forums with appropriate faculty input, synchronous chats, video conferencing, individualized contact via phone or email, and, in the case of a hybrid course, regular face-to-face meetings.
- **Content Delivery:** Faculty will may provide content material either through online lectures (in written, video, and/or audio forms) and/or through introductions to materials not created by the instructor (such as publisher-provided materials, web sites, streaming video, etc.).
- **Notifying Students of Faculty Unavailability/Offline Time:** Students should be notified if the instructor is unavailable/offline preventing regular effective contact for a prolonged period of time (e.g. four business days) for any reason (such as an illness or family emergency). Students should also be notified when instructor-initiated regular effective contact will resume.
- **Notifying Administration of Faculty Absence Notification:** If a faculty member must be offline for a period of time that results in the faculty member not being able to meet his or her regular effective contact for any given week, this would be considered an absence and the Dean of the division in which the course is taught must be notified. Absences will be handled in accordance with the negotiated faculty contract.
- **Face-to-Face Forms of Contact (for hybrid modalities):** Faculty are encouraged to utilize standard accepted face-to-face forms of contact (i.e., group or individual meetings, lab class meetings, orientation and review sessions, supplemental seminars

- or study sessions, proctored exams, and field trips). Field trip accommodations must be made available for students with documented disabilities.
- Office Hours / Student Consultation: Faculty should be available to their distance education students during regularly scheduled office hours, which may be held either on-site or online, or for student consultation. This can include telephone contact, face-to-face contact, or online contact (through email, discussion board, or chat).

Accessibility Standards

The following general principles should be followed to the extent possible to ensure that distance education courses are accessible to students with documented disabilities, in compliance with Section 508:

- Distance education courses for all students to fully participate and benefit from an equitable college experience.
- Instructional materials and textbooks permit maximum opportunity for access by students with documented disabilities without the need for outside assistance (i.e. sign language interpreters, aides, or other forms of human assistance).
- Distance education resources provide "built-in" accommodations where possible (i.e. closed captioning or descriptive narration) and/or interface design/content layout per universal design best practices, commonly used in support of persons with disabilities. Alternative testing format and extended test-taking time are provided to students with documented accommodations which address the student's documented disability ([N.1.43](#)).

Policy on Representation of Accredited Status

Irvine Valley College has an accreditation link on the footer of every page as well as on its “About” page ([N.1.44](#)). The link connects the user to the College's accreditation webpage which displays the following statement:

Accreditation Status

Irvine Valley College is accredited by the Accrediting Commission for Community and Junior Colleges (ACCJC), Western Association of Schools and Colleges (WASC), 10 Commercial Blvd., Suite 204, Novato, CA 92949, 415-506-0234, an institutional accrediting body recognized by the Council for Higher Education Accreditation and the U.S. Department of Education. Additional information about accreditation, including the filing of complaints against member institutions, can be found at www.accjc.org.

Each college affiliated with ACCJC must undergo periodic evaluation of their programs and services through self study and peer review in a six year cycle. Irvine Valley College received reaffirmation of its accreditation in February 2014 ([N.1.25](#)).

The Accreditation page also contains a link for the submission of comments on the Self Evaluation Report, as well as links to an archive of all of the College’s required accreditation materials including self-evaluations, mid-term reports, evidence, site visit materials, team reports, follow-up reports, Commission letters, and ACCJC substantive change materials ([N.1.45](#)).

Policy on Student and Public Complaints against Institution

Informal Complaint Procedures

The District has established designated officers who are charged with receiving complaints and coordinating their investigation. The designated officer will explain the rights and options available to the individual bringing charges of unlawful discrimination or harassment. If there is a simple misunderstanding or the individual does not wish to file a formal complaint, the individual may elect to pursue an informal resolution process. The informal process is not a prerequisite for filing a formal complaint.

An individual who feels she/he has been subjected to sexual assault may file a complaint with the police department in addition to any other complaint.

Individuals who believe they have been subjected to unlawful discrimination, including harassment, may report complaints to the designated officer for Irvine Valley College:

Vice President for Student Services
Irvine Valley College
5500 Irvine Center Drive
Irvine, California 92618
949-451-5214

The District strongly encourages students and staff who believe they are being harassed to file a complaint in a timely manner. Since failure to report harassment impedes the District's ability to stop the behavior, the District strongly encourages that such complaints be made within 30 days of the alleged incident. Any complaint not involving employment may be made orally or in writing within one year of the date of the alleged discrimination or harassment ([N.1.46](#)).

Formal Complaint Procedures

If an informal process does not resolve the matter and/or the complainant wishes to pursue formal charges, he or she may elect to follow formal complaint procedures. Formal complaints of unlawful discrimination or harassment must be filed in writing on a form prescribed by the State Chancellor ([N.1.47](#)).

Approved complaint forms are available from any one of the following sources:

The Office of the Vice President for Student Services
Irvine Valley College
5500 Irvine Center Drive
Irvine, California 92618
949-451-5214

The Office of the Director of Human Resources
South Orange County Community College District
28000 Marguerite Parkway
Mission Viejo, California 92692
949-582-4348 or 949-582-4850

Irvine Valley College website: www.ivc.edu/policies/pages/harassment.aspx

SOCCCD website: www.socccd.edu/hr/HRforms.asp

State Chancellor of the California Community Colleges website:
<http://californiacommunitycolleges.cccco.edu/ComplaintsForm.aspx>

Upon receiving a formal written complaint, the District will determine whether the complaint has met the necessary requirements, which include but are not limited to whether it was filed in a timely manner, on an appropriate form, and whether it alleges unlawful discrimination as stipulated in Title 5, section 59300. The District will investigate properly filed complaints according to procedures prescribed in Board policy. The District will complete its investigation within 90 days of receiving the complaint and report its administrative determination. The District must provide written notice to both the complainant and the State Chancellor of whether there is probable cause to sustain the charges raised in the complaint; a description of the action taken, if any, to prevent similar problems from occurring in the future; the proposed resolution of the complaint; and the complainant's right to appeal to the District and the State Chancellor ([N.1.48](#), [N.1.49](#)).

For more comprehensive information about discrimination and harassment, students are encouraged to read the Harassment Policy and Complaint Procedure brochure, available in the Office of Student Services, Room A110, at Irvine Valley College. The brochure is also available for downloading from the SOCCCD website: www.socccd.edu/hr/HRforms.asp

Policy on Institutional Advertising, Student Recruitment, and Representation of Accredited Status

Irvine Valley College's accreditation status is found on the first page of the 2016-2017 Catalog, the mission and vision statements are located on page 4, and the institutional learning outcomes are located on page 7 ([N.1.50](#)).

In accordance with Board Policy and Administrative Regulations 5604 (Admissions), the District does not restrict admission to residents of the District, nor does it restrict the privilege of District residents to attend any other community college. Non-California residents are accepted on the same basis as California resident students, except that state regulations require these students be assessed tuition ([N.1.51](#)).

Students who are eligible for regular admission to the colleges must be 18 years of age or older, or possess a high school diploma, GED, certificate of proficiency or equivalent. In addition, any apprentice as defined in the Labor Code, or any other person who is over 18 years of age and who is capable of benefitting from instruction offered at the College may be admitted.

Students who are not enrolled for a sufficient duration to receive a grade or non-evaluative symbol on their transcript at either Irvine Valley College or Saddleback College for one term must file a new admission application in a subsequent term to be eligible to enroll.

The College catalog accurately reports the official college name, address, telephone number and web links on the first page of the 2016-2017 Irvine Valley College Catalog and the campus map can be found on page 336 ([N.1.50](#), [N.1.52](#)). The same information is also available on the college website ([N.1.53](#)).

Policy on Contractual Relationships with Non-Regionally Accredited Organizations

Irvine Valley College does not currently have any contractual relationships with non-regionally accredited organizations.

Policy on Institutional Compliance with Title IV

Irvine Valley College's Office of Financial Aid keeps loan default rates at an acceptably low level and also complies with program responsibilities defined by the U.S. Department of Education ([N.1.21](#)). Programs funded by the federal government include the Pell Grant, SEOG Grant, Federal Work Study, Direct Subsidized Loan and Direct Unsubsidized Loan programs.

Irvine Valley College maintains compliance with Title IV of the Higher Education Act through comprehensive financial aid services to students. All students pursuing a direct loan are required to complete a Direct Loan Master Promissory Note (MPN) and Entrance Counseling upon receiving a direct loan at the College. The goal of Entrance Counseling is to help the student understand what it means to take out a federal student loan. The policies and processes are regularly updated as needed to remain current and compliant with Title IV and State Student Eligibility Requirements and Policies ([N.1.54](#)).

The College's financial aid program is evaluated on an annual basis as part of the College's independent audit process which includes an assessment of the College's compliance with federal Title IV regulations and requirements. The College submits the results of its annual Federal Single Audit to the USDE each year. During this accreditation cycle, the College has had no findings in the audit of the financial aid program ([N.1.18](#)).

The College has maintained loan default rates at an acceptable level while complying with the responsibilities defined by the U.S. Department of Education. The College's three-year default rate on student loans in Fiscal Year 2013 was 12.7%, which is below the requirement established by California (<15.5%) as well as the federal requirement (<30%) ([N.1.20](#)). The College has not had any actions taken against it due to non-compliance with Title IV regulations.

For the three most recent years for which data are available ([N.1.21](#)), the student loan default rates among IVC alumni were: 2011: 14.7%; 2012: 8.9%.; 2013 12.7%

Standard I: Mission, Academic Quality and Institutional Effectiveness, and Integrity

The institution demonstrates strong commitment to a mission that emphasizes student learning and student achievement. Using analysis of quantitative and qualitative data, the institution continuously and systematically evaluates, plans, implements, and improves the quality of its educational programs and services. The institution demonstrates integrity in all policies, actions, and communication. The administration, faculty, staff, and governing board members act honestly, ethically, and fairly in the performance of their duties.

Standard I.A: Mission, Academic Quality and Institutional Effectiveness, and Integrity

I.A.1 Mission

The mission describes the institution's broad educational purposes, its intended student population, the types of degrees and other credentials it offers, and its commitment to student learning and student achievement.

Evidence of Meeting the Standard

The South Orange County Community College District (SOCCCD) and Irvine Valley College (IVC) adopt separate institutional mission and vision statements that are reviewed annually and revised as needed. IVC's mission statement reads as follows:

Irvine Valley College offers clear and guided pathways to transfer, certificates, associate degrees, employment, and further education to a diverse and dynamic local and global community. We support student access, success, and equity. IVC fosters economic and workforce development through strategic partnerships with business, government, and educational networks ([I.A.1](#)).

The mission was recently revised to more fully describe the types of degrees and credentials it offers and to feature values of access, success and equity as well as the College's distinctive emphasis on clear and guided pathways. IVC's student population includes an active international student community who contribute to the diversity and dynamism of the educational environment. The College's mission statement is published and distributed widely via the College Catalog. The mission is also prominently featured on the College's website on the "About" page.

The District's mission statement is published on the District website's "About" page.

We provide a dynamic and innovative learning environment for diverse learners of all ages, backgrounds and abilities. We promote access, success and equity to meet each student's goals of skills development, certificate, associate degree, transfer or personal enrichment. We contribute to the economic vitality of the region.

Since it was established as an independent college in 1985, the mission of IVC has had, at its core, a focus on providing students access to the highest quality education. The College's commitment to student success and equity flows from its mission statement and is further detailed in its Strategic Plan ([I.A.2](#)), Student Equity Plan ([I.A.3](#)), Student Success and Support Program (SSSP) plan ([I.A.4](#)), Basic Skills Initiative (BSI) plan ([I.A.5](#)), Basic Skills Transformation plan ([I.A.6](#)), and Asian American Native American Pacific Islander Serving Institution (AANAPISI) grant activities ([I.A.7](#)).

In accordance with its mission, IVC offers credit and non-credit instructional programs, both online and face-to-face. Online offerings complement the face-to-face offerings by offering an additional, convenient format for students to access coursework. Students have access to an array of student support services and co-curricular activities, such as the student government and student ambassadors program, that support student achievement and learning. IVC's student population includes resident and international students of all backgrounds, ethnicities, ages, and educational needs. IVC's commitment to diversity and equity is clearly represented in its mission and actions, such as becoming federally designated as a minority serving institution in 2015 ([I.A.7](#), [I.A.8](#), [I.A.9](#), [I.A.10](#)).

To meet the needs of its community, the College provides access to challenging transfer-level courses as well as courses that develop basic skills. Our students can attain associate degrees and certificates in career and technical (CTE) programs that lead to employment. Students also have the option to complete transfer-focused programs that lead to associate degree attainment and transfer to four-year institutions ([I.A.11](#)). IVC is proud of its high completion and transfer rates, which reflect the strength of the College's commitment to supporting students and faculty in all aspects of teaching and learning; the institution also serves community skills builders who take courses simply to learn new skills or upgrade existing skills so that they can maintain their competitive edge or advance in their current careers ([I.A.8](#)).

IVC regularly reviews its mission statement at its annual Strategic Planning and Accreditation Council (SPAC) retreat ([I.A.12](#), [I.A.13](#)), the Institutional Effectiveness Committee ([I.A.14](#)), and Academic Senate ([I.A.15](#)). Following the college wide process, the Board of Trustees additionally reviews and adopts changes, per recommendations of the College, annually ([I.A.16](#)).

The college mission is published in the catalog and both the college and district mission statements are prominently published on their respective web sites ([I.A.16](#), [I.A.17](#)).

Analysis and Evaluation

Irvine Valley College demonstrates strong commitment to a mission that emphasizes student learning and student achievement. Its comprehensive review process of the College's mission statement ensure that the mission statement describes the College's broad educational purposes, who it serves, its values, its commitment to improving access and equity, the types of degrees and other credentials offered, and its commitment to student learning and student achievement. The institution's educational mission is clearly defined, adopted, and reviewed regularly by the Board of Trustees. Moreover, the mission is published widely to inform current and prospective students as well as the surrounding community of the College's commitment to those it serves.

The College meets the standard.

I.A.2 Mission

The institution uses data to determine how effectively it is accomplishing its mission, and whether the mission directs institutional priorities in meeting the educational needs of students.

Evidence of Meeting the Standard

Irvine Valley College (IVC) utilizes external and internal data to determine how effectively the College is accomplishing its mission to serve students' needs. Data from all levels—global, national, state, regional, and local—are analyzed to identify trends, emerging needs, opportunities, and potential threats ([I.A.18](#), [I.A.19](#), [I.A.20](#), [I.A.21](#)). Data sources include Scorecard data, labor market information, SLOs, the Chancellor's Office Data Mart, surveys, ad hoc research studies, and the district reporting infrastructure (i.e., inFORM and MySite) ([I.A.8](#), [I.A.3](#), [I.A.22](#)).

These data drive the planning process of the College and were foundational in developing the goals and objectives of the *2014-2020 Strategic Plan* ([I.A.2](#)), as well as the plan's key performance indicators. A representative district wide task force carefully developed the current indicators ([I.A.23](#), [I.A.24](#)). To ensure a widely shared focus on student learning and institutional effectiveness data, strategic KPIs are shared and discussed at the annual planning retreat ([I.A.25](#)). These indicators are reviewed and discussed at both the District wide Planning Council (DWPC) annual retreat and at IVC's annual strategic planning retreat. IVC has also established institution-set standards, reviewed annually by the Institutional Effectiveness Committee (IEC) and shared with SPAC. Additionally, the College has set financial, accreditation, and student achievement targets (or "goals") for the Institutional

Effectiveness Partnership Initiative's metrics, which are published on the college's "About" page on its website. These include completion goals congruent with the completion goals of the College's strategic plan ([I.A.14](#)).

The District also periodically engages in a formal external scan process to aggregate and analyze key demographic, workforce, and community indicators so this information can be used to inform planning efforts and the mission statement review process ([I.A.22](#)). An example of how the College and the District have adapted their mission statements to respond to external forces can be found in the addition of the word "equity" to both the District and College mission statements. The inclusion of this single word powerfully reinforces the importance of the data and activities found in the College's Student Equity Plan ([I.A.3](#)) and the College's commitment to reducing or eliminating the achievement gap (cf. Strategic Plan Objective 2.1) ([I.A.26](#)).

To ensure data is utilized to review and improve programs and services offered to students, all program reviews are required to incorporate data analysis of student access and success trends as well as institutional effectiveness indicators, such as fill rates and student learning outcomes assessments ([I.A.27](#)). The resource allocation process relies heavily on program review objectives and strategic planning objectives as part of its resource request rating and dialogue process to ensure that data and assessment results drive priorities to meet students' needs ([I.A.12](#)).

Additional ways in which IVC uses data to assess progress and success in achieving its mission are manifold and include: program review, committee discussions, committee evaluations, budget and resource allocation processes, enrollment management, hiring processes, employee evaluations, distance education and online planning, grant applications, SSSP planning, student equity planning, strategic planning, and educational and facilities master planning ([I.A.28](#)).

The College meets the standard.

I.A.3 Mission

The institution's programs and services are aligned with its mission. The mission guides institutional decision-making, planning, and resource allocation and informs institutional goals for student learning and achievement.

Evidence of Meeting the Standard

The Irvine Valley College (IVC) mission supports and aligns with the District mission as well as the mission of the California Community College. Also published in the *IVC Planning and Decision-Making Manual* ([I.A.29](#)), the mission guides the College's decision-making, planning, and resource allocation processes. To achieve its mission, the 2014-2020 Strategic Plan (I.A.2) serves as the cornerstone of IVC's planning process. All other college plans align with this plan and with the College's mission, including the 2016-2021 Technology Plan ([I.A.30](#)), the Student Success and Support Program Plan ([I.A.4](#)), the Student Equity Plan ([I.A.3](#)), the Online Education Strategic Plan ([I.A.31](#)), and the Education and Facilities Master Plan ([I.A.32](#)).

Data informs the development, the analysis, and the representative dialogue that drives goal- and objective-setting, while the mission constrains the field of endeavor and provides guidance as to which priorities are most central and critical. College plans align with the strategic plan by either having action steps that directly support and are nested underneath strategic objectives, and/or by directly aligning their objectives with specific strategic objectives.

The mission statement drives the College strategic plan goals. Two of the four goals of the College's strategic plan directly address the College's mission of increasing student success and completion and of creating regional partnerships that support CTE, workforce development, and the local economy ([I.A.33](#), [I.A.34](#)). The other two goals of the strategic plan concern continuously improving institutional effectiveness so the College better serves its community ([I.A.35](#), [I.A.36](#), [I.A.37](#)). These goals drive the strategic objectives and the program review objectives that are required to be referenced in support of the importance of all resource requests through the Comprehensive Resource Request and Allocation Process.

To ensure "IVC fosters economic and workforce development through strategic partnerships with business, government, and educational networks," IVC's "College of the Future" initiative is developing the Advanced Education and Technology Park into a cutting-edge facility to support workforce development for sectors that have been strategically targeted as high demand, high pay, and aligned with the programs and community that characterize IVC.

The College's work with educational partners includes the UCI Engineering pathway grant, an accounting pathway with Cal State Fullerton, and both CTE pathways (OC3 Pathways) ([I.A.38](#)) and Early College pathways with the Orange County Department of Education and local high schools ([I.A.39](#)). IVC has also developed pathways, such as Biotechnology ([I.A.40](#)) and the General Accounting Principles 4+1 program (GAP 4+1) ([I.A.33](#)), to address community needs, both in terms of student and workforce demand. Both programs also are built on partnerships with other educational institutions. These programs, as well as the

institution's active transfer center and continual curriculum articulation efforts, exemplify IVC's commitment to leveraging "educational networks" in support of student success.

Analysis and Evaluation

IVC's mission clearly guides institutional decision-making, planning, and resource allocation and informs institutional goals for student learning and achievement. Because the broad college community participates in writing and revising the mission statement as well as in making recommendations for the use of college resources, the budget process is open as is the process for prioritizing allocations of other resources, there is widespread buy-in by all constituent groups to ensure that planning and prioritization align with the mission. Such a large number of people representing diverse constituents are involved in so many aspects of recommending priorities and allocations in highly visible processes that the College may be assured of achieving a reasonable and consensual balance in these allocations, and that they are aligned and commensurate with its mission and priorities.

The College meets the standard.

I.A.4 Mission

The institution articulates its mission in a widely published statement approved by the governing board. The mission statement is periodically reviewed and updated as necessary.

Evidence of Meeting the Standard

Irvine Valley College's mission statement is prominently displayed on the "About" page of the college website ([I.A.41](#)) and widely disseminated via the college catalog ([I.A.42](#)), the *IVC Planning and Decision-making Manual* ([I.A.29](#)), and via banners on campus.

The College reviews its mission annually during the Strategic Planning and Accreditation Council (SPAC) retreat ([I.A.12](#), [I.A.13](#)). During the review process, the College revisits the mission for California Community Colleges, as given in Title 5 of the California Education code, as well as the District's mission statement and other materials regarding good practices in mission statements, including the ACCJC Accreditation Standards ([I.A.43](#)).

The previous version of the mission statement was approved in June 2014 ([I.A.44](#)), after undergoing review and discussion during the 2013-2014 academic year. The current version of the mission began its review and development process at the 2015 SPAC retreat ([I.A.12](#), [I.A.45](#)). Development, discussion and refinement continued during faculty development week ([I.A.46](#)). In May of 2016, IEC recommended a new draft version of the college mission

which SPAC reviewed and then later approved at the SPAC retreat before forwarding it to the Academic Senate ([I.A.28](#)). Once SPAC and Academic Senate had approved the new mission, it was then forwarded to the Board of Trustees for adoption ([I.A.47](#)) [BOT approval still outstanding].

Analysis and Evaluation

As part of its annual strategic planning process, Irvine Valley College reviews its mission to ensure an accurate reflection of the College's commitment to serving the educational needs of the local community. The College articulates its mission in a widely published statement adopted by the SOCCCD Board of Trustees.

The College meets the standard.

Standard I.B: Assuring Academic Quality and Institutional Effectiveness: Academic Quality

Standard I.B.1 Assuring Academic Quality and Institutional Effectiveness: Academic Quality

The institution demonstrates a sustained, substantive and collegial dialogue about student outcomes, student equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement.

Evidence of Meeting the Standard

Irvine Valley College (IVC) has established processes to facilitate sustained, substantive and collegial dialogue across the College about student learning outcomes, student equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement. In 2014 IVC reorganized its committee structure following a collegial dialogue with administrative, faculty and classified leadership ([I.B.1](#), [I.B.2](#)). The new committee structure encourages the flow of information through the various governance groups and consequently supports continuous dialogue about instructional programs, student services, and administrative services.

Student Outcomes

Under the purview of the Institutional Effectiveness Committee (IEC), the Student Learning Outcome (SLO) Task Force is structured to ensure campus wide communication regarding student learning outcomes (SLOs) ([I.B.3](#)). Facilitated by the SLO faculty coordinator, members discuss best practices on how to assess course learning outcomes and their mapping to program learning outcomes (PSLOs) and institutional learning outcomes (ISLOs) ([I.B.4](#), [I.B.5](#)). Moreover, the committee has ongoing discussions on the College's ISLOs and is currently discussing possible revisions to more accurately reflect the institution's focus on its students ([I.B.6](#), [I.B.7](#)). When committee members identify areas and opportunities for improvement such as through changes in processes, school representatives report back to their respective schools at department meetings for feedback and approval. Once there is consensus, recommendations are presented to the Academic Senate by the SLO Coordinator for approval.

Student Equity

The Student Equity Work Group also reports to the IEC. This work group was formed following the requirement by the California Community College Chancellor's Office to develop a Student Equity Plan ([I.B.8](#)). Irvine Valley College's 2014 Student Equity Plan is a three-year plan that outlines strategies to potentiate the success of all students regardless of gender, age, race/ethnicity, disability status, veteran status, and low socioeconomic status.

The College's efforts to mitigate disproportionate impact focus on five success indicators: access, course completion, basic skills completion, degree and certificate completion, and transfer. The plan was updated in 2015 to include additional student populations not previously addressed, including students of mixed ethnicity and foster youth students ([I.B.9](#)).

After the first year of implementation, the Student Equity Work Group was approved by SPAC to become a task force. Detailed in the College's *Planning and Decision-Making Manual*, the task force has a standing item on the IEC agenda, providing IEC with updates on student equity related research and activities ([I.B.3](#), [I.B.10](#)). To facilitate district wide and campus wide dialogue, the Student Equity Task Force co-chairs provided a general overview of student equity efforts at the Spring 2014 Student Success Summit ([I.B.11](#)), and conducted a number of informational sessions during spring 2015 ([I.B.12](#)) and fall 2015 Professional Development Weeks ([I.B.13](#)).

Academic Quality

Through curriculum policies, procedures, and approval process, the College engages in dialogue on academic quality, details of which are provided in Standard II.B. Assessment of learning outcomes is part of the program review process, which is a collaborative effort within departments. This information is presented to the department chair/manager for incorporation into the department's program review ([I.B.14](#)) and administrative unit review ([I.B.15](#)).

The program review process also provides avenues for dialogue on academic quality. All academic programs and student services participate in a comprehensive program review according to a regular, published schedule ([I.B.16](#)). As part of this review, all programs identify program-level objectives which are linked with the College strategic goals and objectives.

Institutional Effectiveness

As one of the five major strategic planning committees, the Institutional Effectiveness Committee (IEC) oversees the regular review of instructional student learning outcomes (SLOs), student services learning outcomes (SSOs), administrative unit outcomes (AUOs), and program review. Co-chaired by the Academic Senate president and director of Research, Planning and Accreditation, the committee governs the establishment and progress review of institution-set standards ([I.B.17](#)). Conversations regarding institution-set standards (ISS), strategic objectives, key performance indicators and Institutional Effectiveness Partnership Initiative goals occur regularly during committee meetings.

IEC reviews and revises processes, such as the program review and learning outcomes assessment processes, to promote ongoing assessment and dialogue in an effective manner. Discussions include how to deepen the integration of program review with the resource allocation process and the strategic plan ([I.B.18](#)).

To support evidence-based college planning, assessment and dialogue, the Office of Research, Planning and Accreditation (ORPA) is at the service of the entire college. IVC has expanded ORPA from two staff members in 2013 to five and a half staff members as of 2016. ORPA provides the IEC regular updates on research efforts, such as the recent spring 2016 Community College Survey of Student Engagement ([I.B.19](#)). The ORPA and the IEC ensure continuous dialogue regarding assessment and evaluation efforts, student equity research, TracDat updates, learning outcomes assessment, and program review ([I.B.13](#)).

Analysis and Evaluation

The College continuously promotes opportunities for staff, faculty and administrators to engage in dialogue through committee structures and policies and practices and encourages engagement of all college employees in all processes. Through these efforts, the College meets the standard in demonstrating a sustained collegial dialogue regarding student outcomes, equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement. The recent expansion of ORPA to increase data and research output also supports and informs the dialogue.

The College meets the standard.

Standard I.B.2 Assuring Academic Quality and Institutional Effectiveness: Academic Quality

The institution defines and assesses student learning outcomes for all instructional programs and student and learning support services.

Evidence of Meeting the Standard

Student learning outcome (SLO) and student services outcome (SSO) assessments are ongoing throughout the academic year. All courses, credit and non-credit ([I.B.20](#)), and student services departments ([I.B.21](#)) are required to have at least one SLO. All learning outcomes are entered into TracDat, the College's web-based repository for all assessment activities ([I.B.22](#), [I.B.14](#)).

For academic programs, faculty take the lead with course and program learning outcomes, from their development to their evaluation. During the curriculum review process, SLOs are developed and included in each course's Course Outline of Record ([I.B.23](#), [I.B.24](#)) and syllabus ([I.B.25](#)). At least one student learning outcome (SLO) for every course, regardless of credit status or mode of delivery, must be assessed each academic year the course is offered. Programs are evaluated using course SLOs that are mapped to relevant program

student learning outcomes (PSLOs) via TracDat ([I.B.26](#)). These mapped course SLOs are evaluated at the program level during the program review process ([I.B.14](#)). See I.B.5 for a detailed explanation of the program review process.

Student services also has a well-established process and schedule for assessing SSOs each academic year. To develop this process, the College previously had a dedicated SSO coordinator, who met with each student services department to assist in the development and assessment of SSOs. Currently, the vice president for Student Services oversees the process and regularly reviews the assessment of SSOs ([I.B.27](#)). Resources dedicated to supporting this process include hiring consultants to advise on best practices ([I.B.28](#), [I.B.15](#)). Moreover, the recent spring 2016 Student Services Managers retreat also focused on how assessment drives decision making, program improvement, and resource requests ([I.B.27](#)). Standard IIC provides a more detailed explanation of the student services assessment process.

To provide overall support to the learning outcomes assessment process, the SLO coordinator conducts trainings throughout the year (see I.B.8 for additional evidence), regularly holds SLO Task Force meetings ([I.B.29](#)), provides updates to the Instructional Council ([I.B.30](#)), and attends department meetings to discuss SLOs ([I.B.31](#)). These updates ensure assessments are completed by all departments ([I.B.32](#)). In collaboration with the Office of Research, Planning and Accreditation, the SLO coordinator uses TracDat to monitor each department's progress on the assessment of outcomes. Results are presented to the Institutional Effectiveness Committee and SLO Task Force and ultimately reported in the ACCJC Annual Report ([I.B.33](#), [I.B.34](#)).

Analysis and Evaluation

The College is committed to defining and assessing student learning outcomes at the course and program level as well as for student support and learning support services through a well-established SLO assessment process. With a dedicated SLO Coordinator, assessments are ongoing and meaningful and ultimately inform program reviews. Documentation of all assessment activities in TracDat facilitate the alignment of SLOs with PSLOs and program reviews. To ensure accurate documentation and tracking of assessments, the College continues to provide TracDat training for staff, faculty, and administrators.

The College meets the standard.

Standard I.B.3 Assuring Academic Quality and Institutional Effectiveness: Academic Quality

The institution establishes institution-set standards for student achievement, appropriate to its mission, assesses how well it is achieving them in pursuit of continuous improvement, and publishes this information.

Evidence of Meeting the Standard

As required by the ACCJC and U.S. Department of Education, Irvine Valley College (IVC) establishes institution-set standards annually in its ACCJC Annual Report following a formula proposed by the Office of Research, Planning and Accreditation (ORPA) and approved by the Institutional Effectiveness Committee (IEC) ([I.B.35](#)). Although the College follows the formula of taking one standard deviation below the average, IEC examines the proposed standard for achievability and rigor. For example, because the College focuses heavily on transferring students to four-year universities, the College has agreed in the last two ACCJC Annual Reports to set a standard for transfers that is higher than the figure yielded following the established methodology ([I.B.36](#), [I.B.34](#)).

Before setting new institution-set standards for the upcoming year, ORPA presents progress data to IEC to review progress on current standards ([I.B.37](#), [I.B.38](#)). Because the standards are levels which the College must not fall below, IVC has established appropriate steps in the event standards are not met. If not met, IEC will review data to inform discussions on possible reasons and develop action steps to bring the College above standard. A proposed action plan would be communicated through the committee structure for input and eventual approval ([I.B.39](#)). To date, IVC has not fallen below any of its set standards.

As part of the Institutional Effectiveness Partnership Initiative (IEPI) Framework of Indicators, the College engages in ongoing conversations about additional metrics that reflect different aspects of the College's operations. More specifically, IVC has set standards for successful course completion, completion rate for unprepared students, and remedial rate ([I.B.40](#)). Distinct from the baseline institution-set standards, the IEPI goals are aspirational and serve as targets for the College. Of the nine optional metrics for which colleges are to set targets, IVC elected to focus on completion rate for students placed into Basic Skills courses, as this goal reflects an aspect of the College's strategic plan objective of increasing its Scorecard Student Progress and Achievement Rate (SPAR) by at least 2.5% by 2020 ([I.B.41](#)). College initiatives in acceleration, co-requisite remediation, multiple math pathways, and reducing under-placement via strong multiple measures all support the achievement of this goal ([I.B.42](#)).

Similar to the process used to establish the College's Institution-Set Standards, IEPI metrics are discussed and reviewed in IEC and approved, using a collegial consultation process,

annually ([I.B.43](#)). Any changes to the IEPI goals are communicated to the college community through representative governance and the major strategic planning committees. To communicate these established goals to the public, the framework of indicators is published on the College's "Vision, Mission and Goals" page ([I.B.44](#)).

Analysis and Evaluation

IVC continues to excel in student achievement and continues to hold itself accountable through the establishment of institution-set standards, IEPI indicator goals, and strategic plan targets. With the second highest transfer rate in the state, IVC sets challenging yet achievable standards and goals. The College annually reviews and establishes standards and goals and is continuously improving its processes for reviewing progress and engaging in ongoing dialogue with the community regarding the College's performance.

The College meets the standard.

Standard I.B.4 Assuring Academic Quality and Institutional Effectiveness: Academic Quality

The institution uses assessment data and organizes its institutional processes to support student learning and student achievement.

Evidence of Meeting the Standard

Irvine Valley College (IVC) uses assessment data as part of an integrated planning process to support the College's 2014-2020 Strategic Plan, Goal 2, which states "IVC will promote students' success by enhancing the teaching and learning environment" ([I.B.45](#)). To facilitate college wide dialogue and to incorporate assessment data into college planning to support student learning and student achievement, comprehensive program reviews are required of all instructional programs every six years ([I.B.16](#), [I.B.14](#), [I.B.46](#)). Career Technical Education (CTE) programs have an additional two-year cycle ([I.B.14](#)) in which they must examine labor market information relevant to their program using resources from their local advisory boards, the California Economic Development Division, Centers of Excellence, sector navigators, CTE Outcomes Survey reports, and reports from the Economic Modeling Specialist, Incorporated (EMSI) Data Analyst product ([I.B.47](#), [I.B.48](#), [I.B.49](#), [I.B.50](#), [I.B.51](#), [I.B.52](#), [I.B.53](#)).

Academic programs also conduct biennial updates of their program reviews as part of an ongoing process to ensure program and course offerings meet students' needs ([I.B.16](#)). Additionally, annual updates are encouraged to ensure alignment of program objectives and

strategies with resource requests. Comprehensive program review reports are posted on the Institutional Effectiveness Committee Program Review intranet page for review and to facilitate campus wide dialogue ([I.B.54](#)).

To ensure completion of student services comprehensive program reviews, the vice president for Student Services holds mandatory annual retreats for all student services managers to review and provide updates on each departments' program reviews and SSOs. In 2016 the Office of Research, Planning and Accreditation (ORPA) met with all student services managers to provide guidance on the development of program objectives and SSOs, to share best practices to yield meaningful assessment data to foster data-driven conversations and actions, and to discuss how institutional research can support their needs ([I.B.15](#)). The Student Services' process for use of data to improve student learning and achievement is covered more fully in Standard IIC.

To request services and assistance from ORPA, employees can submit a research request via an online form and then check the status of a project through ORPA's website ([I.B.55](#)). As described in IB2, the College has increased ORPA staff since 2013. With the mission to foster continuous quality improvement of student learning, the Research Office strives to provide innovative, timely, relevant, and accurate information to inform college decision-making ([I.B.56](#)).

Analysis and Evaluation

The College demonstrates ongoing efforts to assess and utilize data in the institution's processes to support and enhance student learning and achievement. With an increase in staff members in the research office, the institution is better positioned to engage in more data-informed dialogue and decisions.

The College meets the standard.

Standard I.B.5 Assuring Academic Quality and Institutional Effectiveness: Academic Quality

The institution assesses accomplishment of its mission through program review and evaluation of goals and objectives, student learning outcomes, and student achievement. Quantitative and qualitative data are disaggregated for analysis by program type and mode of delivery.

Evidence of Meeting the Standard

The College assesses its mission through a comprehensive program review and evaluation process. As required by Administrative Regulation (AR) 6100(b) ([I.B.57](#)), all instructional

programs, both credit and noncredit, must undergo program review to ensure progress toward and achievement of established objectives. During this review process, objectives are revised to accurately reflect the focused efforts of departments. The Program Review calendar and template are posted on the Program Review intranet page ([I.B.54](#)). During non-comprehensive years, faculty and staff provide updates to unit objectives and strategies to substantiate resource requests ([I.B.15](#)).

During comprehensive years, departments are required to engage with and use relevant data to analyze programs' strengths and weaknesses ([I.B.14](#)). Relevant data includes evaluation of student learning outcome assessment results, distance education survey results, student climate survey findings, and the Program Review Report. Created by the District Information Technology Department, the Program Review Report includes data on course offerings, enrollment data, course and program outcomes, and student demographics ([I.B.58](#)). The report is available for download via the South Orange County Community College District (SOCCCD) inFORM Program Review Report. Instructions on how to access this report are detailed in the College's Program Review template. Moreover, the Office of Research, Planning and Accreditation (ORPA) regularly conducts trainings during Professional Development Week to inform faculty, staff and administrators how to access readily available data through the District's inFORM data portal and through CCCO sites (e.g., Data Mart) ([I.B.59](#), [I.B.60](#)). Program data by mode of delivery are not incorporated in the inForm Program Review Report but is available in the SOCCCD Institutional Effectiveness Report, Section 2 "Instructional Offerings," which is also available on inForm ([I.B.61](#)).

An example of how disaggregated data has been utilized in the program review process comes from the ESL department, which works with ORPA to conduct an annual survey on students' educational goals. This data, along with data generated to develop the 2014 Student Equity Plan, revealed a large percentage of students without the educational goal to obtain an Associate degree or certificate or to transfer. Instead, many students enrolled in ESL classes to improve their conversational skills ([I.B.62](#)). These findings were then used to help plan for and develop a non-credit Adult ESL (AESL) program. AESL is now serving students who are not necessarily interested in an academic pathway, allowing them to take non-credit courses while still providing the ability to progress into credit coursework, if they choose ([I.B.63](#)).

For CTE program reviews, ORPA prepares labor market data for programs to demonstrate program demand given the current and future markets in Orange County. Using the Data Analyst program through Economic Modeling Specialists Incorporated (EMSI), the research office provides data for program offerings, industry outlook, and potential employers in the region ([I.B.64](#)). Additionally, CTE programs must have an advisory committee to assist with the evaluation of the program. The advisory committee is comprised of Irvine Valley College (IVC) faculty as well as vested members of the community ([I.B.65](#)). To further support the Program Review process, all departments can submit research requests to ORPA for

additional program-specific data ([I.B.55](#)). Both qualitative and quantitative research is available to departments, from classroom surveys to focus groups.

Assessment data are recorded in TracDat, the College's assessment software. To support the program review process, TracDat facilitates the mapping of course student learning outcomes (SLOs) to program student learning outcomes (PSLOs) and to institutional student learning outcomes (ISLOs) ([I.B.26](#)). SLOs are tied to a department's program review via the Department Effectiveness ("B3") section, where assessment of the effectiveness of courses and student services efforts are described ([I.B.66](#), [I.B.67](#)). The process for student services is detailed further in Standard IIC.

To better integrate the tool into the College's planning processes, IVC decided to host TracDat on its local server in 2015. As the first institution in the country to do so, IVC is able to customize the tool based on local needs and to more quickly access data saved through the application, thus ensuring the completion of assessments for all course, program, and institutional learning outcomes. Trainings to facilitate the migration and implementation of TracDat Version 5 (V5) took place in spring 2016 ([I.B.68](#)) and fall 2016 ([I.B.69](#), [I.B.70](#)) as a collaborative effort between ORPA, the IT Department, and the SLO Coordinator. Trainings have also focused on how to develop meaningful learning outcomes and strategies that will yield actionable results. Per the request of the vice presidents for Instruction and Student Services, ORPA held open labs for deans, managers, and faculty and staff members to update their learning outcomes and program reviews while concurrently familiarizing themselves with TracDat v5 ([I.B.71](#), [I.B.72](#), [I.B.73](#), [I.B.74](#)).

Analysis and Evaluation

The College continuously works toward achieving its mission through the comprehensive program review process, which encompasses student learning outcomes assessments. From programs to courses to student services, assessment takes place on an ongoing basis to inform planning processes and resource requests. The integration of qualitative and quantitative data ensures a well-rounded review process that ultimately provides critical information to improve the student experience. These effective practices, which are maintained through continuous dialogue, allow the College to work toward serving the needs of a diverse and dynamic community. Information sessions and hands-on trainings are provided on an ongoing basis as they are critical to ensuring familiarity with, and use of, the application to record all assessment outcomes.

The College meets the standard.

Standard I.B.6 Assuring Academic Quality and Institutional Effectiveness: Academic Quality

The institution disaggregates and analyzes learning outcomes and achievement for subpopulations of students. When the institution identifies performance gaps, it implements strategies, which may include allocation or reallocation of human, fiscal and other resources, to mitigate those gaps and evaluates the efficacy of those strategies.

Evidence of Meeting the Standard

Through various plans, initiatives, and practices, Irvine Valley College (IVC) is committed to continuously identifying performance gaps through the disaggregation of data. Armed with data, IVC develops and implements strategies to mitigate achievement gaps, improve institutional effectiveness, and better serve students ([I.B.9](#), [I.B.75](#)).

Previously used to collect only aggregate data, TracDat is now being used to assess course SLOs at the student level. Since 2012, the English department has worked with the Office of Research, Planning and Accreditation (ORPA) to assess SLOs for all English courses. As depicted in the “Irvine Valley College Process to Disaggregating SLOs” diagram ([I.B.76](#)), the process is driven by the English department chair. ORPA supports the process by providing technical and research needs, including the disaggregation of collected data to identify disproportionately impacted students. In fall 2016, results were shared with the English department to help inform strategies to mitigate performance gaps among these identified students ([I.B.77](#)). The SLO disaggregation process was presented at the 2016 Third Annual SLO Symposium ([I.B.78](#)) and 2016 Strengthening Student Success Conference ([I.B.79](#)). To eventually implement this process across all instructional departments, ORPA is currently working with the Information Technology department to automate the assessment process ([I.B.10](#)).

The practice of examining and acting on equity data is integrated into existing institutional processes, including strategic planning. As outlined under Objective 1 of the College’s 2012-2014 Strategic Plan, completion is disaggregated by prepared versus unprepared ([I.B.45](#)). Moreover, IVC’s Student Equity Plan is a three-year plan that identifies and analyzes significant trends among student subgroups ([I.B.80](#)). Focusing on five success indicators—access, course completion, ESL and basic skills completion, degree and certificate completion, and transfers—ORPA applied the percentage point gap (PPG) methodology to data analyses. These analyses were disaggregated by age, gender, ethnicity, disability status, economically disadvantaged status, foster youth status, and veteran status to identify disproportionately impacted subgroups. The plan outlines a goal, objectives and activities (strategies) to close of achievement gaps. Reviewed and approved through the college wide research allocation process, funded activities undergo evaluations to ensure the efficacy of strategies ([I.B.81](#)). IVC also recognizes that students may be members of multiple

disadvantaged subpopulations. ORPA is currently conducting multiple regression analyses to examine characteristics that predict a lower likelihood of successful completion ([I.B.82](#)).

Analysis and Evaluation

IVC meets this standard based on its extensive work to develop a process in TracDat to assess and disaggregate SLOs by demographic characteristics. Although still in the beginning phase, this assessment process is integrated into the program review process, thusly enabling departments to participate in the resource request process with an equity framework. With the plan to implement an automated process college wide, IVC will be able to incorporate student equity into all learning outcomes assessments and program reviews.

Through its Student Equity Plan, the College additionally engages in ongoing efforts to identify and mitigate performance gaps. With a designated research and planning analyst for student equity related research, ORPA is planning to develop a student equity data dashboard in Tableau that allows the college community to easily identify impacted students to support their learning and achievement. These results will be shared with appropriate department faculty, staff, and administrators to facilitate dialogue on how to mitigate performance gaps. This dashboard will additionally be used for evaluative purposes to assess the effectiveness of funded student equity activities in increasing student success. The College continues to work toward increasing the incorporation of equity in outcomes assessments, planning, and resource allocation.

The College meets the standard.

Standard I.B.7 Assuring Academic Quality and Institutional Effectiveness: Academic Quality

The institution regularly evaluates its policies and practices across all areas of the institution, including instructional programs, student and learning support services, resource management, and governance processes to assure their effectiveness in supporting academic quality and accomplishment of mission.

Evidence of Meeting the Standard

Irvine Valley College (IVC) relies on the collaborative effort of all stakeholders to regularly develop, implement, evaluate, and revise policies and practices that directly impact academic quality and support the mission of the College. The College's *Planning and Decision-Making Manual* outlines the various processes and practices each planning committee along with Academic Senate develops and regularly reviews ([I.B.2](#)). The Institutional Effectiveness

Committee, for example, oversees Gainful Employment reporting practices and the regular evaluation of the program review process ([I.B.17](#)).

The College operates within a framework of board policies and administrative regulations established collegially by the district Board Policy and Administrative Regulation Committee (BPARC) ([I.B.83](#)) and the College's strategic planning committees. In addition, at the district level, there are a number of committees that are involved in setting policies and practices that promote institutional effectiveness. Greater explanation of these planning committees is provided in Standard IV.

Through annual committee self-evaluation surveys ([I.B.84](#)) and the College strategic planning retreat ([I.B.85](#)), IVC regularly assesses the effectiveness of its cycle of evaluation, integrated planning, resource allocation, and re-evaluation. Committee self-evaluation surveys assess the functions and perceived effectiveness of the committee itself, which include the assessment of each committee's purpose as it relates to the college mission and how the committee functions within the larger college wide resource allocation process ([I.B.84](#)). Moreover, the entire college is additionally asked to evaluate the College's resource request and allocation process to gather input from faculty and staff members who are not members of a committee and not part of the resource request rating process ([I.B.86](#)).

Analysis and Evaluation

Through governance and committee structures, the College is able to communicate about, review, and improve policies and practices. These conversations include faculty, staff and administrators to ensure a transparent process where employees from throughout the College are able to provide input given their different roles on campus. Based on findings from committee evaluation surveys, the College strives to increase communication about policies and practices to promote campus wide dialogue to ultimately improve processes to support student achievement.

The College meets the standard.

Standard I.B.8 Assuring Academic Quality and Institutional Effectiveness: Academic Quality

The institution broadly communicates the results of all of its assessment and evaluation activities so that the institution has a shared understanding of its strengths and weaknesses and sets appropriate priorities.

Evidence of Meeting the Standard

Numerous avenues exist at Irvine Valley College (IVC) for participation in and communication about college planning, assessment, and evaluation either directly by members of the campus community or through their representatives.

Governance Structure

By actively encouraging representation from all constituent groups on the various strategic planning committees, the College's governance structure allows for broad dialogue through which strengths and opportunities for improvement are identified ([I.B.87](#)). Moreover, committee calendars, agendas, minutes, and materials are posted on InsideIVC for all members of the college community to access.

An active venue for dialogue about learning outcomes assessment is the SLO Task Force, which includes representatives from a variety of academic disciplines, as well as student, research and student services representatives. Information presented at the task force is posted on the SLO Task Force intranet page ([I.B.4](#)) and also reported at department meetings, which promotes informed discussions about department assessment results and planning activities ([I.B.77](#)). Assessment results and activities are recorded and communicated broadly to the College through the comprehensive six-year program review ([I.B.88](#)).

Professional Development

Each major term commences with Professional Development Week, during which the "President's Address" highlights major accomplishments, strengths, and upcoming activities to support student learning. All employees are provided opportunities throughout the week to further develop their skills related to student learning ([I.B.89](#)). For example, workshops facilitated by the SLO coordinator provide IVC staff, faculty and administrators with the opportunity to engage in dialogue on assessment learning outcomes and best practices ([I.B.90](#) page 5), ([I.B.89](#) page 5), which promote discussion on how to improve current processes.

Additionally, during the spring 2015 Professional Development Week, the Student Equity Task Force co-chairs presented equity data and informed the college community on opportunities to address achievement gaps ([I.B.12](#)). As a follow up, the fall 2015 Professional Development Week offered a session focusing on how to best evaluate equity funded activities to measure effectiveness and identify additional opportunities, using assessment results to improve services offered to students ([I.B.13](#)). To ensure student equity related efforts are assessed as well as prioritized appropriately in the resource allocation process, the Director of Student Life and Equity meets with all potential equity fund recipients to review resource proposals to ensure alignment with the College's Student Equity Plan ([I.B.91](#)).

Research Office

To communicate results of assessment and evaluation activities to the institution, the Office of Research, Planning and Accreditation (ORPA) posts research findings in InsideIVC ([I.B.92](#)) as well as on ORPA's website ([I.B.56](#)). Both sites have survey results, research reports, and planning documents for the College and local community to view and utilize in planning efforts. ORPA additionally communicates with groups across the College regularly, including planning committees, task forces, work groups, and departments. In addition to all five major strategic planning committees, participation in other work groups and task forces include the Student Equity Task Force ([I.B.93](#)), Student Success and Support Program Task Force ([I.B.94](#)), Online Education Task Force ([I.B.95](#)), Technology Advisory Task Force ([I.B.96](#)), and Basic Skills Work Group ([I.B.97](#)).

Analysis and Evaluation

Through the governance structure, professional development, and research office, the College continuously communicates assessment activities and results, fostering a culture where outcomes and data inform dialogue among and between constituent groups. Workshops and information sessions offered during the College's Professional Development Week in particular foster dialogue about assessment and evaluation activities, equipping the entire campus with necessary tools to effectively conduct learning outcomes assessments.

The expansion of ORPA provides increased support to these campus wide efforts. With increased staffing, research is more represented on the various campus groups which ensures broad communication of evaluation results while also identifying areas that need to be assessed, thereby allowing the College to understand its strengths and weaknesses and establish priorities accordingly.

The College meets the standard.

Standard I.B.9 Assuring Academic Quality and Institutional Effectiveness: Academic Quality

The institution engages in continuous, broad based, systematic evaluation and planning. The institution integrates program review, planning, and resource allocation into a comprehensive process that leads to accomplishment of its mission and improvement of institutional effectiveness and academic quality. Institutional planning addresses short- and long-range needs for educational programs and services and for human, physical, technology, and financial resources.

Evidence of Meeting the Standard

Irvine Valley College (IVC) has an evidence-based, collaborative planning process that integrates program review with the resource allocation process. Through biennial program reviews, the College continuously engages in systematic evaluation that informs comprehensive program review and resource allocation ([I.B.14](#)).

As stated in Administrative Regulation 6100(b), the College has the responsibility to conduct program reviews of all instructional credit and non-credit programs. Moreover, IVC requires all student services departments to regularly conduct program reviews ([I.B.16](#)). Results from these reviews inform the College of successful practices as well as areas requiring improvement, which are used to improve the quality of programs, services, and overall institutional effectiveness. Biennial and comprehensive reviews highlight both short- and long-range needs. With TracDat V5, programs can more easily align program objectives with the College's strategic goals and objectives to ensure accomplishment of its mission.

Aside from program review, the Office of Research, Planning and Accreditation (ORPA) conducts biennial student and employee climate surveys to gather evidence about the effectiveness of IVC's programs and services ([I.B.98](#), [I.B.99](#), [I.B.100](#), [I.B.101](#)). Results from these surveys are discussed at the annual strategic planning retreat, where college administrators discuss how to address areas of dissatisfaction to improve both employees' and students' experiences at IVC ([I.B.102](#)). Annual committee self-evaluation survey results are also presented at the strategic planning retreat to discuss how to best facilitate effective committee meetings by engaging committee members ([I.B.103](#)). To address the needs of online students, the annual distance education survey collects students' feedback and evaluation of the College's online student services, such as admissions and records, registration via MySite, and the bursar's office ([I.B.39](#)).

With the various initiatives and grants awarded to the College, IVC is working on an Integrated Planning Matrix to guide efforts to integrate SEP, SSSP, and BSI/BST with other college initiatives ([I.B.105](#)). Coordinators for the College's various initiatives, grants, and categorical programs continue to communicate to identify opportunities for collaboration and reduction in duplicated efforts. This document is being reviewed by the Institutional Effectiveness Committee (IEC) and, as a living document, continues to be revised to reflect current activities of these grant and initiative ([I.B.143](#)).

Program reviews drive the College's resource request and allocation process. All resource requests must be substantiated by and directly linked to program reviews. Without this direct link, requestors must provide evidence to support the requests for human, physical, technology, and financial resources ([I.B.144](#)). At the 2015 Strategic Planning and Accreditation Council (SPAC) strategic planning retreat, an analysis of resource requests revealed that resource requests linked to increasing completion rates (Strategic Objective 2.1)

were consistently among the top-funded resource requests at the College ([I.B.145](#)). With TracDat V5 now hosted locally, IVC is beginning dialogue to customize the application to integrate the program review with the resource request process to more clearly document progress toward achieving the College's strategic goals ([I.B.146](#)).

As the College works on developing this process, evaluation results from the annual resource request process ([I.B.147](#)) provide insight and guidance on how to create a more streamlined, transparent process. Over the past two years, the process has been refined through efforts by the vice president for Administrative Services and Information Technology Department, with input from the strategic planning committees ([I.B.148](#), [I.B.149](#), [I.B.150](#)).

The following list outlines the College's major planning activities, retreats, summits, etc. for the past several years:

- 2016 IVC Strategic Planning Retreat ([I.B.151](#))
- 2016 District wide Planning Council Retreat ([I.B.152](#))
- 2016 High School Principals and Counselors Summit ([I.B.153](#))
- 2016 Student Equity Summit ([I.B.154](#))
- 2016 Powering the Future ([I.B.155](#))
- 2015 High School Principals Summit ([I.B.156](#))
- 2015 SPOWG meetings on Mission and Strategic Plan action items ([I.B.157](#), [I.B.158](#), [I.B.159](#), [I.B.160](#))
- 2015 IVC Strategic Planning Retreat ([I.B.161](#))
- 2015 DWPC Strategic Planning Retreat ([I.B.162](#), [I.B.163](#))
- 2015 Multiple Measures Summit (Cypress) ([I.B.164](#))
- 2014 IVC Strategic Planning Retreat ([I.B.165](#), [I.B.166](#), [I.B.167](#))
- 2014 IVC Strategic Objective Gallery Workshop ([I.B.168](#), [I.B.169](#))
- 2014 High School Principals Summit ([I.B.170](#))
- 2014 Multiple Measures Summit ([I.B.171](#))
- 2014 ATEP Summit ([I.B.172](#))
- 2013-2014 External Scan ([I.B.173](#))

Analysis and Evaluation

Irvine Valley College has made significant efforts to develop an integrated program review, planning and resource allocation process but still recognizes improvements can be made to further integrate and streamline processes. A high level of interest and activity centers on better integrating and coordinating planning and funding efforts in support of student learning and achievement. The Office of Research, Planning and Accreditation will continue to collect feedback on the resource request and allocation process in an annual survey to inform the integration process plan. Additional information on efforts to improve the resource allocation process can be found in the Quality Focus Essay.

Standard I.C: Institutional Integrity

Standard I.C.1 Institutional Integrity

The institution assures the clarity, accuracy, and integrity of information provided to students and prospective students, personnel, and all persons or organizations related to its mission statement, learning outcomes, educational programs, and student support services. The institution gives accurate information to students and the public about its accreditation status with all of its accreditors.

Evidence of meeting the standard

The institution assures the clarity, accuracy and integrity of information provided to students in its annual review of the catalog by the Office of Instruction, division deans, department chairs, research office, and others, prior to publishing ([I.C.1](#), [I.C.2](#), [I.C.3](#), [I.C.4](#), [I.C.5](#), [I.C.6](#)). catalog content is updated annually with addenda added online as needed. The college catalog is available on our website, in the college bookstore, and in the library ([I.C.7](#)).

Institutional Learning Outcomes are published in the college catalog ([I.C.8](#)). Institutional Effectiveness Partnership Initiatives (IEPI) indicators are also posted on the college website ([I.C.9](#)). IVC's mission statement is posted on the college website and in the college catalog ([I.C.10](#), [I.C.11](#)). As part of the course outline of record, learning outcomes for courses appear in the detail for each course within the online class schedule ([I.C.12](#); [I.C.13](#)). Information about educational programs is available in the printed and online college Catalog, department websites, and college marketing materials. Information on student support services is available on each department's website ([I.C.14](#)).

The College maintains an accurate, updated, and comprehensive accreditation web page ([I.C.15](#)). The Accreditation page link can be found in the web site's footer, meaning that it is only one click away from any page on the College's web site. The Accreditation web page provides the campus community and the public access to letters from the Accrediting Commission for Community and Junior Colleges (ACCJC), College self-evaluations, interim reports, follow-up visits, and evidence related to these reports and activities ([I.C.16](#)).

Analysis and Evaluation

The College has several mechanisms for ensuring the clarity, accuracy, and integrity of information provided to students, the campus community, and the public regarding college programs, courses, schedules, learning outcomes, services, and mission statement. The college web site and the college catalog are the most important methods whereby this

information is provided. The College's Accreditation status and relevant documentation is accessible with one click from any College web page. An annual review process ensures that information published in the college catalog is accurate and current.

The College meets the standard.

I.C.2 Institutional Integrity

The institution provides a print or online catalog for students and prospective students with precise, accurate, and current information on all facts, requirements, policies, and procedures listed in the "Catalog Requirements" (see endnote).

Evidence of Meeting the Standard

Irvine Valley College provides a catalog in both print and online formats for students and prospective students with precise, accurate and current information on all facts, requirements, policies and procedures ([I.C.17](#)). The catalog is updated annually in print; an identical digital version of the catalog is available in a PDF format on the college website. The availability of the digital version via a link on the college website homepage ensures the catalog information will be easily available to current students, prospective students, employees, community members, and the general public.

The first page of the printed catalog states "For catalog updates and addenda, please refer to www.ivc.edu/catalog." This statement addresses any issues, curriculum changes or content updates that may have occurred after the final approved catalogs have been printed ([I.C.18](#)).

The annual review process described in I.C.1 ensures the catalog, whether printed or online, provides precise, accurate and current information on all facts, requirements, policies and procedures required by Eligibility Requirement 20 (ER 20). The information in the current college catalog is broken up into the following sections and sub-sections:

Introduction ([I.C.19](#))

- Official Name, Address, Telephone number, and Website Address of the College
- Irvine Valley College's Accreditation Status
- Academic Calendar
- Table of Contents
- South Orange County Community College District's Vision, Missions, Core Values and District wide goals
- Board of Trustees

- District Administration
- President's Message
- Irvine Valley College's Vision, Mission, Strategic Goals and Objectives
- College Background, Governance and Funding
- Statement on Freedom of Expression, Civility and Mutual Respect
- Institutional Educational Goals and General Education/Institutional Learning Outcomes
- College Administration, names and contact information
- Academic Schools/Instructional Offices

Admissions and Registration ([I.C.20](#))

- Admission
- Application
- Resident Classification
- International Students
- Student Success and Support
- Assessment and Placement
- Registration
- Prerequisites
- Adding Classes
- Tuition and Fees
- Refunds

Courses ([I.C.21](#))

- Course Information includes course numbers, C-ID numbers explanation, UC Transfer Statements, coursework standards and expectation as well as repeatable course models.
- Courses: Detailed information on each course including Course ID, Course Title, Unites, weekly class hours, lecture, laboratory and/or learning center, UC/CSU transferability information, recommended preparation and course description.

Degrees, Certificates and Transfer Planning ([I.C.22](#))

- Degree and Certificates
- Degrees with an Area of Emphasis
- Degree and Certificate List by Department
- Individual Listing of Degree or Certificate with following:
- School Name, Dean, Academic Chair and Faculty
- Courses Description

- Major Description
- Program Student Learning Outcomes Description
- Potential Careers Listing
- Available Degree and/or Certificates with a listing of required courses and recommendations
- Earning a Certificate
- Earning an Associated Degree
- Program Length
- Graduation Requirements
- General Education
- IVC Associate Degree
- CSU Certification
- IGETC Certification
- University of California (UC) Course List
- Cross Enrollment
- Transfer Planning
- California State University
- University of California

Policies and Standards ([I.C.23](#))

- Academic Policies and Standards
- Academic Freedom
- Catalog Rights
- Courseload Limits
- Basic Skills Coursework Limit
- Academic Honesty and Dishonesty
- Final Examinations
- Grades
- Pass/No Pass Option
- Graduation Honors
- Dean's List
- Credit by Examination
- AP, CLEP and IB Credit
- Credit from Other Institutions
- Academic Renewal
- Probation and Dismissal
- Student Rights

- Grievance and Complaint Procedures
- Sexual Harassment Policy
- Student Code of Conduct

Student Resources (I.C.24)

- Financial Aid
- Counseling Services
- Veterans Services
- Supportive Services
- Online Services and Distance Education
- Bookstore
- Learning Centers for Students
- Library
- Associated Students
- Honors Program/Honor Societies
- Intercollegiate Athletics
- Additional Programs/Resources

Who's Who (I.C.25)

Administrators and Managers, names and degrees

Full-time Faculty, names and degrees

Professors and Administrators Emeritus

Part-time Faculty, names and degrees

Classified Staff

Index (I.C.26)

Campus Map/Location (I.C.27)

Analysis and Evaluation

The College provides a catalog in both print and online for students and prospective students with precise, accurate and current information on the College mission, degree, programs and courses, as well as admission requirements, policies, and procedures. The Catalog is published annually and reviewed for accuracy according to an established timeline and procedure, ensuring integrity in communication with public and providing all information required by Eligibility Requirement 20.

I.C.3 Institutional Integrity

The institution uses documented assessment of student learning and evaluation of student achievement to communicate matters of academic quality to appropriate constituencies, including current and prospective students and the public.

The California Community College Student Success Scorecard tracks student achievement, including persistence, degree and transfer outcomes, and CTE completion and transfer rates. Irvine Valley College (IVC) publishes a link to its Scorecard results on the college website's home page ([I.C.28](#)). Student Success Scorecard data is also presented to the Board of Trustees annually ([I.C.29](#), [I.C.30](#)). The college catalog also includes information on the Scorecard completion metrics and the *Student Right to Know* completion data ([I.C.31](#)). Accreditation status is available only one click from the College's home page via the footer or via the "About" drop-down menu ([I.C.32](#)). Learning and evaluation results are relayed to college constituents via Instructional Council, Academic Senate, and strategic planning committees ([I.C.33](#), [I.C.34](#), [I.C.35](#), [I.C.36](#), [I.C.37](#)). Student performance data is also a critical component of program review ([I.C.38](#)).

There are many facets, and thus approaches, for evaluating student learning and student success at IVC. Among these, the College evaluates and documents in TracDat student learning outcomes (SLOs) at the course level, and these are mapped to program and institutional learning outcomes ([I.C.39](#)). For library and counseling services SLOs are evaluated and documented in TracDat as well, using appropriate assessments rather than course skill or information mastery ([I.C.40](#)).

Student learning and student achievement is documented regularly for assessment of longitudinal trends. One of the institution's most important key performance indicators is the completion rate of students. Transfer completion has been an area of particular emphasis at IVC, which has one of the highest transfer and completion rates of any community college in California ([I.C.41](#)). This rate, as well as other measures of academic quality, and successful student learning and completion of individual educational and training goals are communicated to the appropriate constituencies, including current and prospective students and the public, on the website ([I.C.42](#)), through social media ([I.C.43](#)), and other marketing and outreach methods and materials ([I.C.44](#)). Within the College, these and other data are made available to students and the public ([I.C.45](#)), strategic planning committees ([I.C.46](#)), committees working on specific projects such as student equity and other aspects of student success in basic skills, enrollment and retention and further disseminated to shared governance groups by their representatives on these working committees ([I.C.47](#)). College employees may also request new research or access published research studies, survey results, and planning documents on the Office of Research, Planning and Accreditation intranet page and web page, as well as access the District data mart (inFORM) to run reports on a wide array topics ([I.C.48](#), [I.C.49](#)).

Analysis and Evaluation

Irvine Valley College relies extensively on data to guide planning, resource allocation and decision-making. As the evidence demonstrates, data analysis underpins virtually all major college plans and functions and is shared widely among college constituencies, including students and the general public.

The College meets the standard.

I.C.4 Institutional Integrity

The institution describes its certificates and degrees in terms of their purpose, content, course requirements, and expected learning outcomes.

Evidence of Meeting the Standard

Irvine Valley College (IVC) publishes certificate and degree information in its printed and online catalog, website, and in promotional materials. The section of the catalog identified as *Degrees, Certificates and Transfer Planning* provides students with comprehensive information on certificate and program offerings and requirements including: degree and certificate requirements; general education requirements for IVC, CSU, and UC/Intersegmental General Education Transfer Curriculum (IGETC); transferability of courses to the CSU and UC; cross enrollment at a CSU or UC campus; transfer planning; a location map for California Community Colleges; and a location map and admissions requirements for CSU and UC schools ([I.C.50](#)).

Certificate and degree program information in the *Programs and Majors* section of the printed and online college catalog is organized by school and discipline. The following information is provided:

- Course – an overview of the content of the program
- Major – a description of what students should expect to learn and the overall purpose of the major
- Program Learning Outcomes – expected learning outcomes to be achieved upon completion of the program
- Potential Career – a description of applicable academic fields, careers and vocations for the degree and/or certificate
- Course requirements – a listing of all courses required to complete the program

In addition to the college catalog, certificate and degree information may be found on other relevant pages on IVC's website ([I.C.51](#)). For instance, each school listed in the *Academic*

Schools section of the website provides links to individual academic program pages which contain information on specific programs and degrees ([I.C.52](#)). The Office of Admissions and Records provides timelines for evaluating certificates and degrees on its *Graduation* site ([I.C.53](#)). The Career Center provides employment-related information by major on its *What Can I Do With This Major?* site ([I.C.54](#)). The College also provides a full listing of programs along with Gainful Employment data including cost, duration and employment statistics on its Gainful Employment site ([I.C.55](#)). Certificate and degree information is also provided in published materials such as the Student Handbook ([I.C.56](#)), in academic program brochures ([I.C.57](#)) and certificate flyers ([I.C.58](#)) provided to students during outreach events or when meeting with counselors and in outreach materials such as *How to Become an IVC Student* ([I.C.59](#)). Students may also view course requirements for degrees and certificates in their MySite portal accounts when using My Academic Plan (MAP) ([I.C.60](#)).

Analysis and Evaluation

The college catalog, supplemented by various pages on the IVC website, provide descriptions of all IVC's certificates and degrees, including their content, expected learning outcomes, course requirements, purpose, and likely associated career paths.

The College meets the standard.

I.C.5 Institutional Integrity

The institution regularly reviews institutional policies, procedures, and publications to assure integrity in all representations of its mission, programs, and services.

Evidence of Meeting the Standard

The College reviews its institutional policies, procedures and publications to assure alignment with its mission, programs and services based on the established flowchart within the *IVC Planning and Decision-Making Manual* ([I.C.61](#)). The College's Strategic Planning and Accreditation Council (SPAC) oversees four strategic planning committees: Budget Development and Resource Planning Committee (BDRPC); Academic Planning and Technology Committee (APTC); Student Success and Access, Matriculation, Marketing and Outreach (SSAMMO); and Institutional Effectiveness Committee (IEC). SPAC is charged with establishing mission-based strategic planning goals and objectives. SPAC also oversees the establishment of college practices and reviews district policies and administrative regulations, providing critical input to the district wide Board Policy and Administrative Regulation Advisory Council (BPARC) ([I.C.62](#)). College representatives also sit on BPARC, which makes recommendations to the chancellor as representatives of the colleges and of

District Services. At IVC a regular part of each strategic planning committee's meeting agenda is a review of board policies being updated or created. Each committee supports the standard by establishing agenda items on the regular review of policies, procedures, and publications among its meeting topics ([I.C.63](#), [I.C.64](#), [I.C.65](#), [I.C.66](#)). Additionally, Academic Senate is actively engaged with review of Board Policies and Administrative Regulations, particularly those concerning teaching and learning ([I.C.67](#)). Once Board Policies and Administrative Regulations have been reviewed and adopted, the date of the review is noted at the bottom of the document along with all prior review dates ([I.C.68](#)). The Office of Marketing, Public Information and Creative Services (OMPICS) offers a wide range of services—including design and editorial, broadcast, public relations, crisis communication, social media and the college website—to support the marketing of IVC to both internal and external audiences. The OMPICS staff designs and produces the print and electronic materials that adhere to the IVC branding standards and works collaboratively with members of the campus community to ensure the content is accurately reflected in all communications, assuring the integrity of IVC's mission, programs and services across platforms ([I.C.69](#)). The OMPICS also maintains the design, layout and architecture of the IVC website. The OMPICS web team works with each department to generate web content in a clear and concise manner that stays true to IVC's identity. Departmental staff are responsible for the accuracy and maintenance of the information displayed on their pages and are encouraged to work with the OMPICS web team to update and/or create web pages ([I.C.70](#)).

Analysis and Evaluation

The College has established procedures and committees to regularly review board policies, procedures, and publications. In addition to the catalog review procedure described and documented in Standard IC.1, the college staff also regularly review the mission statement, as described in Standard IA.1, and conduct regular program review for both academic and student support services programs, as described in Standard IB.5. The quality, accuracy and consistency of digital and print publications is ensured by practices and guidelines put in place by the Office of Marketing, Public Information, and Creative Services.

The College meets the standard.

I.C.6 Institutional Integrity

The institution accurately informs current and prospective students regarding the total cost of education, including tuition, fees, and other required expenses, including textbooks, and other instructional materials.

Evidence of Meeting the Standard

The Irvine Valley College (IVC) website “Student” tab includes a section of links called “Paying for College” ([I.C.71](#)) that directs students to relevant links including the Bursar’s Office ([I.C.72](#)) with links explaining costs and payment options, the Financial Aid Office ([I.C.73](#)), and a separate link for information about scholarships ([I.C.74](#)). In the on-line schedule, textbook information is posted, including links to the Bookstore ([I.C.75](#)). College staff also provide a “How to Pay for College” workshop and the PowerPoint slides for this workshop are available on the college website ([I.C.76](#)) and the College’s Net Price Calculator is available online to help students estimate the cost of their attendance at IVC ([I.C.77](#)).

Information about tuition, fees and payment options are available on the Bursar’s Office website ([I.C.78](#)), the Student Handbook I.C.79, and in the college catalog. Information on financial aid options, including cost of attendance ([I.C.80](#)) and net price calculator ([I.C.81](#)), are available on the Financial Aid website. The College accurately informs current and prospective students about the total cost of education, including fees, tuition, textbooks and other potential required fees, and students are informed of specifics in the class syllabus covered during the first class meeting ([I.C.82](#)).

Information about required textbooks are available in the online class schedule by clicking on “Book Info.” This information is provided by the IVC Bookstore (Follet) and details the ISBN, author, copyright year, publisher, rent or buy options, in-stock availability and the Bookstore’s retail price. Disclosure statements, including estimated cost of fees and books for Career Technical Programs, are available on the college’s Gainful Employment website ([I.C.83](#)).

Analysis and Evaluation

Irvine Valley College uses multiple modalities to accurately inform and educate both current and prospective students about their total cost of education, including tuition, fees, textbooks, and other relevant costs.

The College meets the standard.

I.C.7 Institutional Integrity

In order to assure institutional and academic integrity, the institution uses and publishes governing board policies on academic freedom and responsibility. These policies make clear the institution's commitment to the free pursuit and dissemination of knowledge, and its support for an atmosphere in which intellectual freedom exists for all constituencies, including faculty and students.

Evidence of Meeting the Standard

The College abides by an Academic Freedom Statement, published in the online and printed catalog ([I.C.84](#)), which is aligned with District Board Policy 6120, Academic Freedom ([I.C.85](#)). The College also provides a Statement of Freedom of Expression, Civility, and Mutual Respect on the website and in the Policy and Standards section of the catalog ([I.C.86](#)).

Board Policy 8000 (Speech and Advocacy [I.C.88](#)) ensures an environment conducive to student learning without disruption while guaranteeing freedom of speech and first amendment rights as well as areas where demonstrations are permitted.

Analysis and Evaluation

The College is committed to academic freedom, freedom of expression, and civil discourse as is clearly stated in the relevant policies, statements, and guidelines.

The College meets the standard.

I.C.8 Institutional Integrity

The institution establishes and publishes clear policies and procedures that promote honesty, responsibility and academic integrity. These policies apply to all constituencies and include specifics relative to each, including student behavior, academic honesty and the consequences for dishonesty.

Evidence of Meeting the Standard

In accordance with Board Policy 5401 (Student Conduct) and Administrative Regulation 5401 (Standards of Student Conduct), the College publishes a statement on Academic Honesty and Dishonesty in the catalog ([I.C.89](#), [I.C.90](#), [I.C.91](#)). AR 5401, and the statements

on academic honesty include definitions of such terms as falsification, plagiarism, and cheating. They also make clear students' responsibilities for ethical conduct ([I.C.92](#)). The Student Code of Conduct is also available on the Office of Student Services website ([I.C.93](#)) and the Campus Policies website ([I.C.94](#)). The Student Handbook also provides guidance on the student code of conduct, the College's smoke-free campus policy, sexual harassment, gender equity, grievance procedures (including – Title IX Notice, Section 504/Americans with Disabilities Act Compliant/Grievance Procedure), Facebook posting guidelines, and possible disciplinary actions ([I.C.95](#)).

Students are informed they may be disciplined for any of the following behaviors:

Disruptive behavior, willful disobedience, habitual use of profanity, assault, battery or threat of violence, unsafe behavior, unlawful use, sale or possession of controlled substances, lewd or indecent conduct, sexual assault, possession of firearms, explosives, dangerous chemicals or weapons, unauthorized recording or dissemination of academic presentations, misrepresentation of oneself, academic dishonesty including but not limited to falsification, plagiarism or cheating which compromises academic integrity.

Sanctions may be a verbal reprimand, a written reprimand, a requirement to receive a mental health clearance, placement on disciplinary probation, and suspension or expulsion, depending the severity and frequency of the offense ([I.C.96](#)).

Analysis and Evaluation

The College has adopted policies and procedures to promote academic honesty and provide for potential sanctions for violations. The policies and procedures are widely available in print and online and are communicated to students through several channels, including the catalog, the Student Handbook, and the college website.

The College meets the standard.

I.C.9 Institutional Integrity

Faculty distinguish between personal conviction and professionally accepted views in a discipline. They present data and information fairly and objectively.

Evidence of Meeting the Standard

The District has policies in place to ensure faculty and other employees act in a fair, objective, and ethical manner.

Board Policy 8000 states, in part:

The District desires to provide the best available curriculum and facilities in order to encourage its students to matriculate, study, graduate, obtain a place of employment, or go on to obtain a further degree...Maintenance of an atmosphere conducive to learning on campus in order to further the educational process is essential to the District, its students, faculty, and staff. This policy is intended to further the District's substantial interests in 1) protecting student health and safety; 2) preventing substantial disruption of the learning environment and the orderly operation of District campuses; and 3) preserving District facilities for their intended use... ([I.C.97](#)).

Additionally, Board Policy 6120 states:

The SOCCCD is committed to the free pursuit and dissemination of knowledge, and it seeks to foster the integrity of the teaching-learning process. The SOCCCD Board of Trustees, administration, faculty, staff, and students all bear an obligation to protect, preserve, and promote academic freedom within the institution ([I.C.98](#)).

The College's statement on Freedom of Expression, Civility and Mutual Respect, published in the catalog, describes the importance of mutual respect and recognizes the rights of others even in an environment consummately dedicated to freedom of speech:

The Irvine Valley College community recognizes the important role of freedom of expression, civility and mutual respect in fostering a healthy and productive college environment. Therefore, the College encourages an atmosphere of professionalism and cooperation, in which each member's roles and responsibilities are understood and appreciated, and in which the free expression of all opinions, beliefs and ideas is encouraged and respected ([I.C.99](#)).

Moreover, the IVC Faculty Manual (p. 16) clarifies the responsibility of faculty to deliver instruction that meets the established learning objectives and outcomes for a class:

All faculty members are expected to teach the content identified in the Course Outline of Record (COR). The learning objectives, methods of evaluation, and course content components of the COR are published on the details page of the on-line schedule of classes, and are, thus, available to view by anyone with internet access ([I.C.100](#)).

Additionally, as stated in the catalog, students have the right to be protected from harassment, insults and abusive or unlawful behavior. Any college personnel or students found to be in violation of these standards will face disciplinary action that is "prompt, effective, and commensurate with the severity of the offense" ([I.C.101](#)).

Analysis and Evaluation

The District has policies, standards, and procedures in place to ensure faculty and other employees are fair, civil, and objective in their speech and behavior.

The College meets the standard.

I.C.10 Institutional Integrity

Institutions that require conformity to specific codes of conduct of staff, faculty, administrators, or students, or that seek to instill specific beliefs or world views, give clear prior notice of such policies, including statements in the catalog and/or appropriate faculty and student handbooks.

Evidence of meeting the standard

Irvine Valley College is a public institution open to all students regardless of race, religion or creed. The College does not seek to instill specific beliefs or world views. Moreover, aside from promoting conduct conducive to learning, the College and the District do not promote any particular codes of conduct. The commitment to an open, pluralistic environment is evident in the College's Statement on Freedom of Expression, Civility and Mutual Respect:

To achieve these goals, the College invests its resources in expressing its commitment to free expression, civility, and mutual respect in college publications, including college handbooks and manuals; in proactive education for all employees; by sponsoring projects and activities that bring people together in a spirit of hospitality, service, appreciation, and camaraderie; through regular open forums intended to foster the exchange of ideas; through maintaining open, inclusive and transparent decision-making processes, with regularly published results; and through a peer-driven process—in which all of the governance groups participate and contribute—for dispute resolution, one steeped in finding mutually agreeable solutions ([I.C.103](#)).

Additionally, a primary goal of the District wide strategic plan is to “foster an environment characterized by creativity, innovation, respectful interactions and collaboration” ([I.C.104](#)).

Analysis and Evaluation

The mission and vision of Irvine Valley College and the mission, vision, and values of the South Orange County Community College District clearly show that the College and the District do not seek to instill specific beliefs or worldviews.

The College meets the standard.

IC.11 Institutional Integrity

Institutions operating in foreign locations operate in conformity with the Standards and applicable Commission policies for all students. Institutions must have authorization from the Commission to operate in a foreign location.

This standard does not apply to Irvine Valley College.

I.C.12 Institutional Integrity

The institution agrees to comply with Eligibility Requirements, Accreditation Standards, Commission policies, guidelines, and requirements for public disclosure, institutional reporting, team visits, and prior approval of substantive changes. When directed to act by the Commission, the institution responds to meet requirements within a time period set by the Commission. It discloses information required by the Commission to carry out its accrediting responsibilities.

Evidence of Meeting the Standard

Irvine Valley College (IVC) has striven to comply with all Commission requirements since it was first accredited. Where recommendations have been made in the past, the College and District have taken expeditious action to address them. The president, accreditation liaison officer (ALO), and the Accreditation Oversight Work Group keep the Board of Trustees and the college community informed about changes in accreditation standards and the College's self-evaluation efforts and plans ([I.C.105](#), [I.C.106](#)).

During the last Accreditation cycle in 2010, the College submitted a self-evaluation report. The site visit occurred shortly thereafter. In 2013 the College provided further updates in its Accreditation Midterm Report in response to the visiting team's recommendations. Both reports provide evidence of the College's commitment to comply with eligibility requirements ([I.C.107](#)). The College also submitted a substantive change proposal for online education, adult English as a second language, global studies and biotechnology in fall 2016 ([I.C.108](#)).

In preparation for the current comprehensive self-evaluation and site visit, the college community engaged in a broad-based effort over an extended period of time. The self-evaluation process included the following efforts, activities, and presentations ([I.C.109](#)):

- August 10, 2015 Accreditation Update – Flex Week
- August 13, 2015 Accreditation Think Tank – Flex Week
- September 11, 2015 Mini Retreat – Standards II & IV

- September 18, 2015 Mini Retreat – Standards I & III
- October 26, 2015 Board Presentation – Accreditation Overview
- January 12, 2016 Budget and Accreditation Luncheon – Flex Week
- August 15, 2016 Budget and Accreditation Presentation – Flex Week
- August 31, 2016 Accreditation review at SPAC Annual Retreat
- October 5, 2016 Two Week Campus Review and Comment Period
- October 18-28, 2016 Afternoon Edit Sessions
- October 24, 2016 Review and Comment Period
- October 24, 2016 Board Presentation – Accreditation Process
- October 25, 2016 Third Party Comment – Forum and Webpage Launch

For purposes of communicating with the public and the campus community regarding the College's Accreditation status, the College maintains an Accreditation webpage. This webpage can be accessed from a link in the college website footer; it is therefore only one click away from any page on the IVC website. The Accreditation web page is publicly accessible and contains all documents necessary for complete disclosure including communications from the ACCJC, reports, substantive changes, and other supporting documents ([I.C.110](#)).

Analysis and Evaluation

Irvine Valley College complies with all ACCJC standards, guidelines, and requirements. All required reports and other documents are submitted to the Commission in a timely manner. The college website maintains an archive of past self-evaluation reports and other accreditation documents. Accreditation at IVC is an ongoing process, and the College continuously engages in the process of staying current with accreditation requirements in order to meet and, where possible, exceed them.

The College meets the standard.

I.C.13 Institutional Integrity

The institution advocates and demonstrates honesty and integrity in its relationships with external agencies, including compliance with regulations and statutes. It describes itself in consistent terms to all of its accrediting agencies and communicates any changes in its accredited status to the Commission, students, and the public.

Evidence of Meeting the Standard

Irvine Valley College (IVC) is accredited by the Accrediting Commission for Community and Junior Colleges of the Western Association of Schools and Colleges. The College has been continuously accredited since 1986. The latest Accreditation self-evaluation and associated evidence is available to the public on IVC's Accreditation web page. The College also submitted a substantive change proposal for online education and new programs in September 2016 ([I.C.111](#)). Through full disclosure on its Accreditation page, the College demonstrates its commitment to honest and open relationships with external agencies and compliance with regulations, statutes, and rules set forth by governmental agencies. Consistent public access to such information provides evidence of the College's commitment to honesty and integrity in its relationships with external agencies and the general public, including compliance with eligibility requirements and other regulations ([I.C.112](#)).

IVC has one program that requires external Accreditation: the paralegal program. As paralegal is a new program at IVC, the College has recently begun the accreditation process and will be having its initial site visit on December 5th and 6th, 2016. Other college programs, such as Athletics and Financial Aid, comply with additional state and federal regulations. The Athletics program complies with the rules and regulations of the California Community College Athletic Association (CCCCAA). To remain in good standing with the CCCCCAA IVC completes an external program review report and files it with the Orange Empire Conference ([I.C.114](#)). Athletics also complies with federal Title IX equity regulations ([I.C.115](#)) and submits an Equity in Athletics Disclosure Act report to the federal Office of Postsecondary Education ([I.C.116](#)). The College also complies with regulations to post Institutional Effectiveness Partnership Initiatives (IEPI) goals ([I.C.117](#)), links to the Student Success Scorecard ([I.C.118](#)), Gainful Employment disclosures ([I.C.119](#)), and federal attendance cost information disclosure requirements ([I.C.120](#)).

IVC's Financial Aid Office communicates with the U. S. Department of Education, providing documentation on a regular basis in order to comply with federal Title IV regulations regarding the administration of federal financial aid programs. In recognition of the College's compliance and good standing, the College is certified with the U.S. Department of Education to provide federal financial aid to students ([I.C.121](#)). The College is also in good standing with the California Student Aid Commission, allowing students to apply for and obtain CalGrants ([I.C.122](#)).

Analysis and Evaluation

As the documentation on the College's Accreditation web page indicates, IVC adheres to the Eligibility Requirements, Accreditation Standards and Commission policies of the ACCJC. Moreover, IVC describes itself in identical terms to each of its accrediting agencies. The College's website is used to communicate any changes in its accredited status and provide

disclosure for any information required by the Commission. The College complies with Commission requests, directives, decisions and policies, and makes complete, accurate, and honest disclosure. Moreover, the College complies with state and federal reporting and requirements.

The College meets the standard.

I.C.14 Institutional Integrity

The institution ensures that its commitments to high quality education, student achievement and student learning are paramount to other objectives such as generating financial returns for investors, contributing to a related or parent organization, or supporting external interests.

Evidence of Meeting the Standard

In compliance with Title 5, Irvine Valley College (IVC) operates as a non-profit organization supported by local real estate taxes ([I.C.123](#)). As a non-profit institution, the College has no responsibility or mechanism for generating financial returns for investors, nor does it support any external interests beyond serving its students, its community, and its mission. IVC's commitment to high-quality education, student achievement, and student learning is evident in its mission statement which guides its integrated planning with a focus on student learning, completion, and closing the achievement gap ([I.C.124](#), [I.C.125](#)). IVC also provides innovative, high quality student support services ([I.C.126](#), [I.C.127](#)) and extensive staff and faculty professional development ([I.C.128](#), [I.C.129](#), [I.C.130](#)) in part through participating in major initiatives such as guided pathways and basic skills transformation ([I.C.131](#)).

Analysis and Evaluation

Irvine Valley College is a non-profit college whose primary function is to enable its students to learn and achieve their educational goals. All institutional resources are dedicated to supporting this mission, not to generating financial returns or to supporting external interests

The College meets the standard.

Standard II: Student Learning Programs and Support Services

The institution offers instructional programs, library and learning support services, and student support services aligned with its mission. The institution's programs are conducted at levels of quality and rigor appropriate for higher education. The institution assesses its educational quality through methods accepted in higher education, makes the results of its assessments available to the public, and uses the results to improve educational quality and institutional effectiveness. The institution defines and incorporates into all of its degree programs a substantial component of general education designed to ensure breadth of knowledge and to promote intellectual inquiry. The provisions of this standard are broadly applicable to all instructional programs and student and learning support services offered in the name of the institution.

Introduction

Irvine Valley College (IVC) offers programs and services that are aligned with the College's mission and established standards for higher education institutions. In response to IVC's 2010 Accreditation Report, two of the twelve ACCJC recommendations required for reaffirmation of Accreditation centered on Student Learning Outcomes (SLO) development, assessment, and use of results.

- College Recommendation 2: *In order to ensure that the college will meet the Commission's expectations regarding Student Learning Outcomes by 2012, the team recommends that the college expand the identification of assessment strategies for SLOs, implement those strategies, and use the results for continuous quality improvement.*
- College Recommendation 3: *In order to improve, the team recommends that the effectiveness in producing student learning outcomes—the development and assessment of learning outcomes—be a required component, routinely incorporated in the evaluation of faculty and others directly responsible for student progress toward achieving stated student learning outcomes*

As outlined in the 2013 Irvine Valley College Midterm Report ([II.A.1](#)), and the discussion that follows in Standard II.A.3 (where evidence of meeting the standard is presented), IVC has and continues to make improvements in the area of outcomes assessment.

The College has expanded strategies for improved outcomes assessment by:

- Developing comprehensive timelines for robust student learning and administrative unit outcomes and reporting as part of the Program Review Process ([II.A.2](#), [II.A.3](#)).
- Allocating resources to support a SLO Coordinator and SLO Liaisons to assist faculty in their efforts to maintain sustained SLO assessment cycles and dialogue ([II.A.4](#)).

- Allocating institutional resources to purchase TracDat to input outcomes, assessment results, and use results; and to generate reports ([II.A.5](#), [II.A.6](#), [II.A.7](#), [II.A.8](#), [II.A.9](#)).
- Mapping course-level SLOs to program and institutional SLOs ([II.A.10](#))
- Offering professional development week presentations and training sessions for faculty, staff, and administrators ([II.A.11](#), [II.A.12](#))
- Including SLO development and assessment as a component of faculty performance evaluations ([II.A.13](#))
- Including SLOs on course syllabi ([II.A.14](#), [II.A.15](#))
- Creating a SLO Task Force, which meets twice per month and reports to the Institutional Effectiveness Committee and the Academic Senate ([II.A.16](#), [II.A.4](#), [II.A.17](#), [II.A.18](#))

Standard II.A: Instructional Programs

Standard II.A.1. Instructional Programs

All instructional programs, regardless of location or means of delivery, including distance education and correspondence education, are offered in fields of study consistent with the institution's mission, are appropriate to higher education, and culminate in student attainment of identified student learning outcomes, and achievement of degrees, certificates, employment, or transfer to other higher education programs.

Evidence of Meeting the Standard

Irvine Valley College offers instructional programs that are consistent with the College's mission and offered in fields of study appropriate for higher education. A comprehensive list ([II.A.19](#)) of the programs that are offered at IVC is available to students and the public on the catalog page of IVC's website: www.ivc.edu/catalog.

IVC offers 91 Associate Degrees and 67 Certificates ([II.A.19](#)). Regardless of location or means of delivery, IVC ensures all instructional programs culminate in student attainment of identified student learning outcomes. IVC maintains current articulation agreements with other colleges and universities that can be found on the ASSIST website ([II.A.20](#), [II.A.21](#)). Students who are planning to transfer to the University of California (UC) or California State University (CSU) may follow the Intersegmental General Education Transfer Curriculum (IGETC) or the CSU General Education Plan in lieu of the local general education plans outlined in the AA, AS, AA-T, and AS-T offerings ([II.A.22](#)).

For CTE courses and programs, standards for quality are also maintained by the regional approval process for program development through the *Los Angeles, Orange County, and*

Riverside County Regional Consortia (LAOCRC) ([II.A.23](#), [II.A.24](#), [II.A.25](#), [II.A.26](#)), biennial program review, and annual advisory committee meetings. Additional information about CTE programs may be found in Standard II.A.14.

Analysis and Evaluation

The instructional programs at IVC are offered in fields of study appropriate to higher education and culminate in students transferring to higher education programs and/or attaining degrees, certificates, and vocational skills that are needed for employment. The review and approval processes for courses and programs ensure alignment with the College mission ([II.A.2](#)). To assist students with their educational and career goals, the District and College are implementing technology solutions including developing a Student Success Dashboard and Degree Audit software scheduled for release in 2017.

The College meets the standard.

Standard II.A.2. Instructional Programs

Faculty, including full time, part time, and adjunct faculty, ensure that the content and methods of instruction meet generally accepted academic and professional standards and expectations. Faculty and others responsible act to continuously improve instructional courses, programs and directly related services through systematic evaluation to assure currency, improve teaching and learning strategies, and promote student success.

Evidence of Meeting the Standard

Board Policy 2100.1 (Delegation of Authority to the Academic Senate) ([II.A.27](#)), establishes that the faculty are primarily relied upon for matters involving curriculum. In practice, all faculty teaching a given course, regardless of assigned mode of instructional delivery, use the same course outline of record (COR) ([II.A.28](#), [II.A.29](#)) that has been vetted through the curriculum process. The COR establishes course objectives; methods of instruction and assessment; learning outcomes; and offers suggestions for reading and writing assignments, and textbooks.

Continuous improvement for courses and programs is formalized through outcome assessment and the Program Review Process ([II.A.30](#)). Outcomes assessment are done at the course, program, and institution level ([II.A.31](#), [II.A.32](#)). All SLOs and assessment methods are the same regardless of mode of instruction and the results are analyzed and discussed to assess effectiveness and make changes to established teaching methodologies. Program Reviews ([II.A.30](#)) include multi-layered approaches to determine the relevance, appropriateness, and currency of each program, regardless of program type ([II.A.33](#), [II.A.34](#)).

The use of statistics and assessment data from SLOs provide the basis to review each program accurately and determine whether pedagogical or programmatic changes may be necessary. Additional information about courses and programs is provided in Section II.A.3.

Analysis and Evaluation

IVC ensures the curriculum meets academic and professional standards through the curriculum review and approval process. The faculty regularly assess learning outcomes for courses and programs as a means of promoting student success.

The College meets the standard.

Standard II.A.3. Instructional Programs

The institution identifies and regularly assesses learning outcomes for courses, programs, certificates and degrees using established institutional procedures. The institution has officially approved current course outlines that include student learning outcomes. In every class section students receive a course syllabus that includes learning outcomes from the institution's officially approved course outline.

Evidence of Meeting the Standard

The College has identified course and program level outcomes for all courses and programs ([II.A.35](#), [II.A.32](#), [II.A.10](#), [II.A.36](#), [II.A.37](#)). The development and implementation of learning outcomes is supported through the efforts of participatory governance committees/councils (IEC, Academic Senate, Curriculum Committee) and the SLO Coordinator.

A component of the faculty evaluation process includes participation in SLO development and assessment, and inclusion of SLOs in class syllabi ([II.A.13](#), [II.A.38](#)). The Academic Employee Master Agreement ([II.A.39](#)) indicates that:

- Department chairs are responsible for “program and curriculum development and review, [and] SLO development and evaluation.” (page 36)
- Recommendations for continued employment for all faculty are based on items including “information regarding participation in curriculum development and review, and development and assessment of student learning outcomes.” (pages 45, 48, and 50)

IVC uses TracDat ([II.A.5](#), [II.A.40](#)) as the repository for Student Learning Outcomes for all courses and programs offered at the College ([II.A.31](#), [II.A.6](#), [II.A.7](#), [II.A.41](#), [II.A.42](#)). The College promotes best practices ([II.A.43](#)) and has in place a procedure for conducting SLO assessments that allows each department to write, schedule, implement and discuss the results from the SLO assessment while following the IVC guidelines for SLOs that are

outlined on page 25 of the Faculty Manual ([II.A.44](#)) and page 18 of the Online Education Faculty Handbook ([II.A.45](#)).

Analysis and Evaluation

IVC has SLOs identified for all courses and programs, and the assessment results are discussed by department faculty and entered into TracDat for future data retrieval and discussion when the course is reviewed or when data is needed for program reviews and resource requests. In addition, training for faculty, staff, and administrators has been conducted to promote buy-in and increase the effectiveness of the outcomes assessment process ([II.A.11](#), [II.A.46](#), [II.A.47](#), [II.A.48](#)).

The program review process ([II.A.30](#)) at IVC includes a discussion of SLOs for the program in terms of evaluating the program for effectiveness of student learning ([II.A.33](#)). The current SLO process at IVC maps course SLOs to program SLOs (PSLOs) and then identifies the effectiveness of the PSLOs through the results of the course SLOs that are tied to each PSLO. ([II.A.49](#))

The college procedures for developing and assessing SLOs promotes ownership of the SLO process by each department. While TracDat is used as the main repository for SLOs, assessments, results and use of results, all new and revised courses are required to attach SLOs to the COR with the understanding that they will be updated in TracDat. Attaching the SLOs to the COR during the curriculum development and review process ensures that all courses have SLOs identified prior to the course being taught. Please see Standards I.B.1, I.B.2, and 1.B.6 for additional discussion and examples of SLO implementation at IVC.

The College meets the standard.

Standard II.A.4. Instructional Programs

If the institution offers pre-collegiate level curriculum, it distinguishes that curriculum from college level curriculum and directly supports students in learning the knowledge and skills necessary to advance to and succeed in college level curriculum.

Evidence of Meeting the Standard

The College distinguishes its pre-collegiate level curriculum in the course outline of record and in the catalog using the established nomenclature ([II.A.50](#)):

- 1–99 Courses in this range generally transfer to both CSU and UC.
- 100–199 Courses in this range generally transfer to CSU but not to UC.
- 200–299 Courses that may occasionally carry transfer credit to four-year institutions. Courses in this range include those intended for skill development and for continuing education (whether related to employment or personal development).

- 300–399 Basic skills courses. Courses in this range are not applicable to associate degrees or certificates, nor do they carry transfer credit to four-year institutions.

These courses do not count toward the 60-unit requirement for graduation and are not used in calculating students' grade point averages for associate degrees or certificates. Pre-collegiate level curricula in reading, English, English as a Second Language (ESL), and mathematics prepare students for college level curriculum. Course schematics ([II.A.32](#)) in English, ESL, and Math identify the pathway that students need to take to college-level courses.

The College provides support services to students enrolled in pre-collegiate courses including counseling ([II.A.51](#)), tutoring ([II.A.52](#)), advising ([II.A.53](#)), and financial aid ([II.A.54](#)). These services are discussed in detail in Standard II.C.

To assist students, the College provides placement test guides, remediation modules, and basic skills accelerations pathways ([II.A.55](#)). Prospective students are offered assessment information including short tutorials on Math and English ([II.A.56](#)). The English and ESL faculty have created accelerated courses for students who have tested into the pre-collegiate level. These accelerated classes combine two lower courses into a single one that results in these students learning the knowledge and skills necessary to advance to college-level English courses upon successful completion while reducing the number of courses students need to complete. The Math department determined there was a need for developmental math modules ([II.A.57](#)) to assist students in developing essential skills to be successful in pre-collegiate math courses.

Analysis and Evaluation

IVC is committed to meeting educational needs of students in pre-collegiate courses. Pre-collegiate courses in English, reading, ESL and mathematics are offered to help students improve their skills and abilities. Support services and accelerated pathways are offered to help students succeed and progress to college-level courses. The math department has provided students and prospective students' access to tutorials and sample tests to help students review concepts with the goal of placing students into a higher math course, thus reducing or eliminating exit points for students.

The College meets the standard.

**Standard II.A.5. Instructional Programs**

The institution's degrees and programs follow practices common to American higher education, including appropriate length, breadth, depth, rigor, course sequencing, time to completion, and synthesis of learning. The institution ensures that minimum degree requirements are 60 semester credits or equivalent at the associate level, and 120 credits or equivalent at the baccalaureate level.

Evidence of Meeting the Standard

In accordance with Title 5, Section 55063 of the California Code of Regulations and Board Policy 5600 (Associate Degree Requirements [II.A.58](#)), IVC requires a minimum of 18 units in a major or area of emphasis with a minimum total of 60 semester units to earn an associate's degree ([II.A.19](#)).

The breadth, depth, quality, rigor, time to completion, and course sequencing for the college's programs are determined through the aforementioned curriculum and program development and review processes ([II.A.30](#), [II.A.59](#)); and in accordance with the Chancellor's Office *Program and Course Approval Handbook* ([II.A.60](#)) and the Academic Senate for California Community Colleges' *The Course Outline of Record: A Curriculum Reference Guide* ([II.A.61](#)). For CTE programs labor market analysis and input from advisory committees and regional consortia are also used to develop programs and make modifications, if necessary ([II.A.25](#)).

Analysis and Evaluation

IVC follows practices common to institutions of higher education in designing degree and certificate programs. The Academic Senate oversees the college's curriculum committee, so faculty expertise ensures academic quality and rigor, and to ensure that curriculum proposals are in accordance with established best practices outlined in the Curriculum Guide and policies outlined in the PCAH ([II.A.62](#)).

As part of the curriculum process, all programs that are submitted to the state must include a program narrative that details the students' path through the program to ensure completion within two years. All degrees are compliant with federal and state mandates. CTE programs receive at a minimum biennial program review ([II.A.63](#)) including feedback from advisory committees to ensure that the coursework and sequencing are in line with workforce development needs.

The College meets the standard.

Standard II.A.6. Instructional Programs

The institution schedules courses in a manner that allows students to complete certificate and degree programs within a period of time consistent with established expectations in higher education.

Evidence of Meeting the Standard

The Office for Instruction oversees the scheduling component of enrollment management using principles guided by access, bottleneck reduction, and increased throughput to increase student success and institutional effectiveness. To provide a variety of opportunities for students to pursue their educational goals, classes are scheduled in the day, afternoon, and evening hours, on Saturday, and online.

Department chairs, in consultation with the academic deans, prepare course schedules that enable students to meet course prerequisites and complete their programs of study in two years ([II.A.64](#), [II.A.59](#)). In addition, the chairs and deans use historical enrollment data, the waitlist system, and faculty input to help determine students' need for courses in order to reduce bottlenecks and facilitate students completing programs within a reasonable period of time, particularly in impacted areas. Additionally, IVC uses block scheduling ([II.A.65](#)), Saturday scheduling and a newly established weekend college program ([II.A.66](#)) to help students who are unable to attend a traditional college schedule find convenient times to enroll in courses.

Analysis and Evaluation

IVC is currently experiencing scheduling challenges as writing and mathematics courses have large waitlists. The institution is therefore working on solutions to meet student need but, due to lack of room availability and instructor availability, this process is a slow and complicated one. In the meantime, the College has improved the waitlist system to give students more information about available courses as well as to provide the College with more accurate data about demand through the use of unduplicated waitlist counts.

Academic planning is a key component that enables students to complete programs in a timely manner. IVC has a strong counseling program that provides student with tools to plan an effective academic schedule: Two Year Plans, My Academic Plan (MAP) and 0.5 unit counseling courses for how to achieve degrees using the IVC GE, IGETC, and CSU GE patterns depending upon the students' goals ([II.A.53](#), [II.A.67](#), [II.A.22](#)). Students are encouraged to complete a comprehensive MAP in order to register for classes. Please see Standard II.C for more information about support services.

The College meets the standard.

Standard II.A. 7. Instructional Programs

The institution effectively uses delivery modes, teaching methodologies and learning support services that reflect the diverse and changing needs of its students, in support of equity in success for all students.

Evidence of Meeting the Standard

The College offers day, evening, weekend, on-campus, off-campus, credit, noncredit, distance learning, and hybrid courses. Pedagogical methods and instructional delivery modes are approved through the curriculum approval process ([II.A.68](#)). Established instructional methods include: universal design ([II.A.69](#)), small-group discussions, project-based learning, performance-based learning, learning communities, and work experience/service learning.

To support student success, the College offers professional development opportunities at the beginning of every semester that include discussions about student learning and pedagogy ([II.A.12](#)) in an effort to promote the successful delivery of instruction formats to engage different learning styles. School, department, committee, and task force meetings discuss scheduling and best pedagogical practices for their programs on an annual basis ([II.A.70](#), [II.A.71](#)). Additionally, they discuss outcomes of SLO assessments in order to inform changes and fuel continuing improvement of courses and programs, including a discussion regarding the appropriateness of delivery modes.

In support of equity and success for all students, the College employs a full-time alternate media specialist, and offers online library resources and online tutoring to ensure that students have access to the tools they need for success. Support services are discussed in detail in Standard II.C.

Analysis and Evaluation

IVC provides opportunities for all students, regardless of learning styles, abilities, or location, by offering courses and support services in several modalities. The College offers courses in varying delivery modes, and tracks enrollment, retention, and success in each mode of delivery. The faculty engage in professional development activities to enhance their ability to meet the student's needs, and learning support services are available on campus and online.

The Online Education Task Force supports and encourages faculty to use universal design and best practices for online teaching in order to address different learning styles and improve student contact. Faculty are encouraged to use multiple modes of instruction involving a combination of audio, visual, written, and kinetic activities. Faculty members are also encouraged to improve their skills through the use of the *Online Education Faculty Handbook* ([II.A.45](#)) and through training offered through @One ([II.A.72](#)), which covers different learning styles for online instruction.

Standard II.A. 8. Instructional Programs

The institution validates the effectiveness of department-wide course and/or program examinations, where used, including direct assessment of prior learning. The institution ensures that processes are in place to reduce test bias and enhance reliability.

Evidence of Meeting the Standard

IVC currently has home-grown math, English, and ESL assessment exams that are locally validated and approved by the CCC Chancellor's Office ([II.A.73](#)). The validation process includes assessment of content validity, reliability, bias, and disproportionate impact ([II.A.74](#), [II.A.75](#)). The validation process requires testing a minimum of 150 students and correlating their placement with their performance. In addition to these assessment exams, IVC has implemented the use of multiple measures, so students are also placed into classes using AP exam scores, grades/transcripts from other accredited colleges and universities, and high school GPA and transcripts.

Analysis and Evaluation

IVC and Saddleback College were scheduled to use the assessment instrument developed through the Common Assessment Initiative (CAI) in spring 2017 for placement in fall 2017, but in late August 2016 the CCC Chancellor's Office announced a delay because of incomplete assessment validation. In the near future, the colleges will use the CAI assessment instrument (validated by the Research & Planning Group for California Community Colleges) and multiple measures to place students into courses. Please see Standard II.C.7 for additional discussion and examples regarding assessment instruments.

The College meets the standard.

Standard II.A.9. Instructional Programs

The institution awards course credit, degrees and certificates based on student attainment of learning outcomes. Units of credit awarded are consistent with institutional policies that reflect generally accepted norms or equivalencies in higher education. If the institution offers courses based on clock hours, it follows Federal standards for clock-to-credit-hour conversions.

Evidence of Meeting the Standard

IVC awards degrees and credits based on commonly accepted standards for higher education and student attainment of learning outcomes. Board Policy 5600 (Associate Degree Requirements [II.A.58](#)) maintains that degrees shall be conferred upon students who have

“demonstrated competence in reading, written expression, and mathematics, and who have satisfactorily completed at least 60 semester units of college work.” In addition, the IVC Catalog ([II.A.19](#)) and Board Policy 6105 (Graduation Requirements for Degrees and Certificates of Achievement) ([II.A.76](#)) establish that for degree awards, student must maintain a minimum grade point average (GPA) of at least 2.0 for all units counted towards the degree, and all courses in the major must be completed with a grade of “C” or better (Title 5 § 55063). All certificate awards have the same student academic standards as degree awards, meaning, a grade of “A,” “B,” “C,” or “P” must be earned for all courses in the certificate program ([II.A.19](#)).

IVC uses the State Attendance Accounting Methods that are based on Title 5, California Code of Regulations sections 55002(a)(2)(B), 55002(b)(2)(B) and 55002.5 outlined in the PCAH ([II.A.77](#)). Accordingly, IVC grants “one unit of credit as a minimum of 48 hours and maximum of 54 total hours of student work, inclusive of all contact hours plus outside-of-class, or homework hours.”

Table II.A.1: Student Learning Hours

Instructional Category	In-Class Hours	Outside-of-Class Hours
Lecture (Lecture, Discussion, Seminar and Related Work)	1	2
Activity (Activity, Lab w/ Homework, Studio, and Similar)	2	1
Laboratory (Traditional Lab, Natural Science Lab, Clinical, and Similar)	3	0

To ensure accuracy and consistency in calculations across instructional categories and modalities using the established relationship of hours to units, automated formulas are in place in the college’s curriculum management software, CurricUNET ([II.A.68](#)).

Analysis and Evaluation

IVC awards units of credit consistent with institutional policies that follow generally accepted norms or equivalencies in higher education. IVC students are awarded course credit in a given course when they achieve the learning outcomes stated in the COR ([II.A.28](#), [II.A.78](#)) and successfully complete the course by earning a passing grade. Achievement of course outcomes is gauged by student performance on tests, projects, presentations,

papers, and/or other assessments an instructor may use to determine sufficient mastery. Each class must conform to the approved COR which specifies objectives/outcomes for student learning and methods of evaluation. These policies and practices delineate consistent parameters for awarding units of credit and are in compliance with state and federal regulations. Information and resource materials are published in the college catalog.

The College meets the standard.

Standard II.A.10. Instructional Programs

The institution makes available to its students clearly stated transfer-of-credit policies in order to facilitate the mobility of students without penalty. In accepting transfer credits to fulfill degree requirements, the institution certifies that the expected learning outcomes for transferred courses are comparable to the learning outcomes of its own courses. Where patterns of student enrollment between institutions are identified, the institution develops articulation agreements as appropriate to its mission.

Evidence of Meeting the Standard

IVC grants credit for college units earned at regionally accredited institutions of higher education ([II.A.79](#)). The College makes information about the transfer of credits available to its students through the college catalog ([II.A.79](#)), counseling services ([II.A.51](#)), the transfer center ([II.A.80](#)), and the college website. IVC maintains articulation agreements with both in-state and out-of-state colleges, which are available to students at ASSIST.org ([II.A.20](#)).

In an effort to certify that the learning outcomes for transfer credits are comparable to the outcomes for IVC courses, faculty, counselors, and evaluators in the Admissions and Records Office (A&R) review the student's transcripts and periodically request that the student submit a copy of a syllabi or COR from the other institution. The Articulation Officer is responsible for verifying the alignment of learning outcomes prior to entering into articulation agreements and submitting ASSIST updates.

Analysis and Evaluation

Students attending IVC may use lower-division units earned at regionally accredited institutions. Evaluators in A&R review courses to establish equivalency and consult with the Articulation Officer and academic departments as necessary. IVC has agreements with 13 other regional community colleges. These agreements are designed as a counseling guide to facilitate the lateral use of courses among the Region 8 colleges for the associate degree general education and major requirements.

Standard II.A.11. Instructional Programs

The institution includes in all of its programs, student learning outcomes, appropriate to the program level, in communication competency, information competency, quantitative competency, analytic inquiry skills, ethical reasoning, the ability to engage diverse perspectives, and other program-specific learning outcomes.

Evidence of Meeting the Standard

IVC has established institutional education goals (IEGs) and associated institutional student learning outcomes (ISLOs) for the following competencies: communication; critical thinking, problem solving, and information access and analysis; global awareness; aesthetic awareness; and personal, professional and civic responsibilities ([II.A.81](#)). All program and course student learning outcomes map to one or more ISLO ([II.A.10](#), [II.A.82](#), [II.A.83](#), [II.A.84](#), [II.A.85](#), [II.A.86](#)). Because individual IVC courses contribute to one or more areas of the five institutional outcomes (ISLOs), students completing an associate degree at IVC will develop skills in quantitative analysis, analytic inquiry and critical thinking. In addition, the students will expand their information and communication competency, and their ability to engage in diverse perspectives and understand ethical reasoning. Certificates in the CTE area include these outcomes, as appropriate to the program, and include program-specific skills needed to enter the workforce.

Table II.A.2: Desired Competency and Corresponding Institutional Student Learning Outcome

Competency	Institution Student Learning Outcomes
Communication	Communicate effectively when speaking, writing, and presenting to a variety of audiences and with a variety of purposes.
Information	Use a variety of media, including computer resources, to access, organize, evaluate, synthesize, cite, and communicate that information.
Quantitative	Apply mathematical approaches and computational techniques to solve problems; to manipulate and interpret data; and to disseminate the data, methodology, analysis, and results.
Analytic Inquiry	Apply the fundamentals of scientific inquiry to real-life and hypothetical situations.
Ethical Reasoning	Demonstrate intercultural competence by engaging effectively—e.g., listening, speaking, writing, signing—with others whose language, ethnicity, religion, culture, country of origin, or economic or social background is different than their own.
Engage in Diverse Perspective	Demonstrate and observe sensitive and respectful treatment of diverse groups and perspectives in a variety of settings.

Analysis and Evaluation

All degrees of the College include outcomes in communication competency, information competency, quantitative competency, analytical inquiry skills, ethical reasoning, and the ability to engage diverse perspectives directly through major requirements or through meeting general education requirements. To illustrate, the College promotes the understanding and appreciation of diverse perspectives by making it part of the student learning goals established by the ISLO under the heading of Global Awareness. Students should therefore be able to:

- Demonstrate and observe sensitive and respectful treatment of diverse groups and perspectives in a variety of settings.
- Demonstrate an awareness of historical and contemporary global issues and events.
- Demonstrate intercultural competence by engaging effectively—e.g., listening, speaking, writing, signing—with others whose language, ethnicity, religion, culture, country of origin, or economic or social background is different than their own.

The general education required to obtain an AA or AS at IVC includes courses in various areas that promote student understanding and appreciation of diverse perspectives: social sciences; cultural diversity; humanities; and fine arts and languages. Combined, these requirements indicate that a student obtaining a degree from IVC will have taken at least four courses with an emphasis on diverse and global perspectives.

The College meets the standard.

Standard II.A.12. Instructional Programs

The institution requires of all of its degree programs a component of general education based on a carefully considered philosophy for both associate and baccalaureate degrees that is clearly stated in its catalog. The institution, relying on faculty expertise, determines the appropriateness of each course for inclusion in the general education curriculum, based upon student learning outcomes and competencies appropriate to the degree level. The learning outcomes include a student's preparation for and acceptance of responsible participation in civil society, skills for lifelong learning and application of learning, and a broad comprehension of the development of knowledge, practice, and interpretive approaches in the arts and humanities, the sciences, mathematics, and social sciences.

Evidence of Meeting the Standard

Board Policy 5600 (Associate Degree Requirements [II.A.58](#)) requires a component of general education for associate degree awards ([II.A.22](#)). Relying on faculty expertise through the Curriculum Committee, SLO Task Force, and Academic Senate, IVC developed a general education philosophy statement that is published in the catalog ([II.A.87](#)) and supports

the notion that “one’s understanding of a specific subject area is greatly enhanced and enriched by knowledge in and experience with other disciplines.”

There are three general education plans that a student may follow to receive an associate degree, specifically, the CSU Certification, IGETC, and the native IVC General Education pattern ([II.A.22](#)). All three general education patterns prepare students for responsible civic participation, lifelong learning, and introspective approaches to the arts, humanities, and sciences.

Analysis and Evaluation

At IVC, “The philosophy underlying a ‘general education’ is that no discipline is an isolated endeavor; instead, each relies upon and informs a common body of knowledge, ideas, intellectual processes, cultural traditions, and modes of perception.” ([II.A.87](#)). Therefore, a substantial component of general education is required of all IVC degree programs. Faculty, including the expertise of the articulation officer, determine the appropriateness of each course for inclusion in the general education curriculum. Since students must successfully complete at least one course, and in some cases more than one course, from each general education area, the SLO Task Force examines course outlines and affirms each course contains appropriate content for the knowledge area in which it is placed to ensure that students have a good opportunity to develop the intended intellectual skills and knowledge irrespective of the courses they choose.

The College meets the standard.

Standard II.A.13. Instructional Programs

All degree programs include focused study in at least one area of inquiry or in an established interdisciplinary core. The identification of specialized courses in an area of inquiry or interdisciplinary core is based upon student learning outcomes and competencies, and include mastery, at the appropriate degree level, of key theories and practices within the field of study.

Evidence of Meeting the Standard

In accordance with Board Policy 5600 (Associate Degree Requirements [II.A.58](#)) all degree programs include a major (i.e. a focused area of study) ([II.A.88](#)). Students must therefore complete a minimum of 18 units in a major or area of emphasis to receive an associate degree. All degree programs have student learning outcomes ([II.A.19](#)) that are reflective of the established competencies for a degree in higher education.

Analysis and Evaluation

The Curriculum Committee and Academic Senate rely on the expertise of discipline faculty to ensure that all degrees include an appropriate focus of study in a major or area of emphasis; the development and revision of all degree programs requires the identification of a major or area of emphasis ([II.A.89](#)). Prior to submission to the Board of Trustees for approval, programs are thoroughly vetted. This review process assures that programs focus on student learning outcomes and competencies that are appropriate for the given field of study.

IVC offers six degrees with areas of emphasis ([II.A.19](#)). During the 2015-2016 academic year, the curriculum committee initiated the review process of these degrees ([II.A.90](#)) and faculty—discipline experts—have been tasked with identifying core courses, where needed, and reviewing interdisciplinary elective courses in consultation with their departments. The review process should be completed by spring 2017.

The College meets the standard.

Standard II.A.14. Instructional Programs

Graduates completing career-technical certificates and degrees demonstrate technical and professional competencies that meet employment standards and other applicable standards and preparation for external licensure and certification.

Evidence of Meeting the Standard

To ensure that graduates completing CTE degrees and certificates demonstrate employer-expected competencies: CTE programs are reviewed biennially using labor market and employment forecasting information ([II.A.63](#), [II.A.91](#), [II.A.92](#), [II.A.93](#), [II.A.94](#)); each program has annual advisory committee meetings ([II.A.95](#), [II.A.96](#), [II.A.97](#)); prior to local approval, curriculum is approved thorough local consortia, LAOCRC ([II.A.24](#)); and the IVC CTE Task Force meets monthly to discuss curriculum, pedagogy, industry needs, and provide training ([II.A.26](#)).

Analysis and Evaluation

With the goal of meeting the employment needs of the occupational segment of the College's student population, the programs/schools with Career Technical Education stay current on the labor environment in Orange County by using a variety of data resources to assist with program planning and approvals as well as course/program revisions ([II.A.98](#)). The faculty and deans of CTE programs respond to labor market data trends through discussion, program

review, and possible course and/or program revision as well as through new program development when feasible. The Career Technical Education faculty and administrators participate actively by hosting annual local and regional discipline-specific advisory board meetings that provide specific labor market information to assist with program planning. IVC also participates in the Career & Technical Education (CTE) Employment Outcomes Survey ([II.A.99](#)) yearly and provide the feedback and data to faculty for inclusion in their program reviews.

The College meets the standard.

Standard II.A.15. Instructional Programs

When programs are eliminated or program requirements are significantly changed, the institution makes appropriate arrangements so that enrolled students may complete their education in a timely manner with a minimum of disruption.

Evidence of Meeting the Standard

IVC has a program discontinuance/elimination policy that was revised in 2005 and again in 2012 ([II.A.100](#), [II.A.101](#)) that takes into account issues that may affect students. In the event of a recommendation to modify or phase out a program, the vice president for Instruction will charge the respective school dean to prepare a plan to modify or phase out the program per the Program Discontinuance Task Force's recommendations. Since students have catalog rights ([II.A.102](#)), the primary mechanism for addressing the needs of students who miss opportunities to take courses during the phase out period would be course substitution.

Analysis and Evaluation

Program discontinuance discussions are rare at the College. Since the 2010 Accreditation Self Study, only one program discontinuance discussion took place. From 2011-2012 the Electronic Technology Program Discontinuance Task Force utilized the policy to evaluate the Electronic Technology Program. The result was a five page summary report and recommendations submitted to the Office of Instruction on April 25, 2012 ([II.A.103](#)). The Electronic Technology Program underwent three discontinuance phases. Phase one occurred during spring 2006 and resulted in a recommendation to continue the program subject to ten qualifications, with a follow-up assessment to take place in one year. Phase two occurred in spring 2007 and resulted in a recommendation to continue the program for three years, subject to nine additional recommendations. Phase three took place November 2011 through April 2012 and culminated in a finding that the nine phase 2 recommendations had been

satisfactorily addressed. The task force recommended that the Electronic Technology program be continued without qualification.

The College meets the standard.

Standard II.A.16. Instructional Programs

The institution regularly evaluates and improves the quality and currency of all instructional programs offered in the name of the institution, including collegiate, pre-collegiate, career-technical, and continuing and community education courses and programs, regardless of delivery mode or location. The institution systematically strives to improve programs and courses to enhance learning outcomes and achievement for students.

Evidence of Meeting the Standard

The College regularly evaluates and improves the quality and currency of all instructional programs irrespective of the mode of delivery ([II.A.30](#), [II.A.2](#)). The Program Review Process is supervised by the college's Institutional Effectiveness Committee ([II.A.104](#)). Every six years, all programs and administrative units undertake a comprehensive self-evaluation addressing the program's consistency with the college mission, the program's scheduling pattern, its relationship to student activities, clubs and co-curricular, program-related professional development activities, program effectiveness, service to students, SWOT analysis, student learning outcomes, and program objectives, strategies and action steps ([II.A.30](#), [II.A.105](#), [II.A.42](#), [II.A.9](#)). Every two years, departments re-evaluate program objectives, strategies and action steps in a program review update.

Analysis and Evaluation

SOCCCD's InFORM Data Warehouse provides comprehensive program statistics for use in program review ([II.A.106](#), [II.A.107](#)). The Program Review Report provides six years of data on section counts, enrollment counts, weekly student contact hours, full-time equivalent students, full-time equivalent faculty, productivity, fill rates, retention rates, success rates, passing grades, degrees awarded, and student counts by total, gender, ethnicity, and educational goal ([II.A.107](#)). Thus, the College provides sufficient data and a robust program review process that allows all programs to evaluate their effectiveness on a regular cycle.

CTE program are evaluated every two years ([II.A.63](#)). Please see Standard II.A.14 for addition information about the CTE program and course development and evaluation processes.

The College meets the standard.

Standard II.B: Library and Learning Support Services

Standard II.B.1. Library and Learning Support Services

The institution supports student learning and achievement by providing library, and other learning support services to students and to personnel responsible for student learning and support. These services are sufficient in quantity, currency, depth, and variety to support educational programs, regardless of location or means of delivery, including distance education and correspondence education. Learning support services include, but are not limited to, library collections, tutoring, learning centers, computer laboratories, learning technology, and ongoing instruction for users of library and other learning support services.

Evidence of Meeting the Standard

Irvine Valley College offers a large and well-staffed library, six learning centers, and 257 computers to support student learning. The College has invested in technology to allow online access to tutoring and library resources. The College utilizes program review, surveys and other data collection modalities to assure learning resources are of sufficient quantity, currency, depth, and variety to meet student learning needs ([II.B.1](#), [II.B.2](#), [II.B.3](#)).

Table II.B.1 Library Data 2015 – 2016

Library	
Number of Librarians	3
Number of Staff	8
Number of Visits	383,256
Number of Classes Taught (library orientations and learning workshops)	164
Size of Collection	40,000
Number of public access computers	122
Hours of Operation	7:45 a.m. – 9:00 p.m. (M-Th) 7:45 a.m. – 4:00 p.m. (F) 10:00 a.m. – 2:30 p.m. (S)

Library collections development is collaborative and utilizes both faculty expertise and library association recommendations as guides. More information on this development can be found in Standard II.B.2. Sufficiency of learning resources and services is determined through the College's program review process and student surveys, described in more detail in Standard II.B.3.

IVC houses six learning resource centers (LRCs) on campus which provide instruction and/or tutoring. The learning support services consider attendance data from SARS along with

student surveys, success in corresponding courses, and data collected from the campus wide survey through the Office of Research, Planning and Accreditation when considering and planning for the effectiveness of services ([II.B.4](#), [II.B.2](#), [II.B.5](#), [II.B.6](#)).

Table II.B.2 Learning Center Data 2015–2016

Learning Centers	Students Served	Computers	Hours of Operation
Math Center	1300	20	8:00 a.m. – 6:50 p.m. (M-Th) 8:00 a.m. – 1:50 p.m. (F, S)
Writing Center	1,927	26	8:00 a.m. – 8:00 p.m. (M-Th) 9:00 a.m. – 3:00 p.m. (F)
Adult ESL Center	1000 (est)	25	11:30 a.m. – 6:00 p.m. (M) 9:00 a.m. – 1:00 p.m. (Th) 2:00 p.m. – 6:00 p.m. (Th) 9:00 a.m. – 11:00 a.m. (F) 2:00 p.m. – 5:00 p.m. (F)
Language Acquisition Center	1000	30	8:00 a.m. – 8:00 p.m. (M) 9:30 a.m. – 8:00 p.m. (T) 8:00 a.m. – 6:30 p.m. (W) 9:30 a.m. – 6:30 p.m. (Th) 8:00 a.m. – 2:00 p.m. (F)
Student Success Center	3000	60	9:00 a.m. – 7:00 p.m. (M-Th) 9:00 a.m. – 2:00 p.m. (F) 10:00 a.m. – 3:00 p.m. (S)
Center for Asian American Native American Pacific Islanders (CAANAPI)	200	16	9:00 a.m. – 5:00 p.m. (M-Th) 9:00 a.m. – 2:00 p.m. (F)

Equity and access are important considerations for student learning and support at IVC, so the College ensures that students in all locations, irrespective of the mode of instructional delivery or program, receive equitable support by library services and learning centers ([II.B.7](#)).

Analysis and Evaluation

Campus processes assure that the quantity, currency, depth and variety of learning resources are sufficient to meet student needs. The College uses collaborative discussion, program review, survey data, and other data points to assess the sufficiency of student learning resources ([II.B.8](#)). When it is determined that additional resources are needed, the library and LRCs use the resource request process to request materials, staffing, technology and/or facilities.

Librarians routinely conduct collection analysis to determine the appropriateness of the material to the library and the campus, based on collection development statements posted through the library's website ([II.B.9](#)). Furthermore, discipline faculty from the library and the student learning resource centers attend conferences to learn about current innovations and best practices in the discipline and, in turn, invite vendors to make presentations for new products and technology at IVC. Faculty share these presentations with their colleagues and dialogue about how these best practices and/or products may be brought to IVC.

The College meets the standard.

Standard II.B.2. Library and Learning Support Services

Relying on appropriate expertise of faculty, including librarians, and other learning support services professionals, the institution selects and maintains educational equipment and materials to support student learning and enhance the achievement of the mission.

Evidence of Meeting the Standard

The library mission statement reads as follows: "The mission of the IVC Library is to cultivate student success, information competency and lifelong learning by providing quality services and programs to ensure equitable access to information resources for Irvine Valley College's diverse community." Relying on the expertise of faculty, including librarians, and other learning support services professionals, IVC selects and maintains educational equipment and materials to support student learning and enhance the achievement of both the library and college missions.

The equipment and materials to support student learning for all students, including those taking online courses, include: library videos, media players, reference and circulation materials, periodicals, calculators, human anatomy models, Office 365, discount software packages, and MySite. Additional software items are listed in Table II.B.3.

Table II.B.3 Available Software and Description

Software	Description
Mediasite	Video platform to provide faculty storage for digital content including video and audio, files
Blackboard and Canvas	Course learning management systems
Library Databases	Libguides, LibAnswers, and WorldCat
Pharos	Online printing
Blackboard Collaborate	Video conferencing and online collaboration learning tool
Libcal	Online room reservation system

Software	Description
Smarthinking	Online tutoring

Analysis and Evaluation

Librarians are informed through CurricUNET when a new course is launched. At that point, an assigned librarian verifies that the library collection is sufficient in depth and breadth to support the new course or program. Each school and department at IVC has a librarian assigned to liaison with faculty; this liaison attends faculty meetings, solicits faculty feedback through emails, and provides an online form for faculty, staff and students to make recommendations on materials. For more extensive resources, such as databases and eBook collections, the library uses recommendations from faculty, CCCL recommendations, and its internal collection development statements to determine the sufficiency of database collections. Once a given resource is identified as needed, the library enters resource requests for the items.

Some of the learning centers at IVC are tied directly with course curriculum, such as the Math, Writing, Adult ESL, and Language Acquisition Centers. The direct connections with courses guide the centers' use of software and materials in order to assist students most effectively. The Language Acquisition Center uses a variety of measures to assess the depth and variety of materials to meet student needs. An SLO is assessed, via a student survey, to measure students' perceived benefit of the lab's overall support in improving the students' writing, reading, listening, and speaking skills for all language lab sections. In addition, the ESL BSI project funds an ESL student and ESL faculty survey which specifically measures use and effectiveness of ESL lab software.

The needs of distance education (DE) students are solicited from faculty and students in order to inform the selection of library resources. All faculty, including faculty teaching DE, are contacted via email every semester for library material recommendations for their courses and programs. These resources also serve as supplemental and accessible information for all students. Additionally, the IVC website offers tutorials, orientations and other resources to assist all IVC students who are unable to come to campus. The IVC library houses computers available for all students, providing access to specialized software, Blackboard, Canvas, printing, email and scanning. Additionally, the library provides access to headsets, portable DVD drives, USB drives and reserve textbooks.

The library and learning resource centers select and maintain their instructional equipment and materials through a collaborative process that avails itself of both faculty expertise and institutional data.

The College meets the standard.

Standard II.B.3. Library and Learning Support Services

The institution evaluates library and other learning support services to assure their adequacy in meeting identified student needs. Evaluation of these services includes evidence that they contribute to the attainment of student learning outcomes. The institution uses the results of these evaluations as the basis for improvement.

Evidence of Meeting the Standard

The College uses a variety of methods to assess the adequacy of its library and learning centers in meeting student needs. These include the institution's program review process and analysis of survey and SLO data ([II.B.10](#), [II.B.3](#), [II.B.8](#), [II.B.5](#), [II.B.6](#)). Through the program review process, SLO assessments, and survey data, the College engages in regular and robust assessment of the adequacy of the library and student learning centers. The results are discussed collaboratively and become the basis for the improvement of the library and learning centers. Further, the library generates statistics using gate counts, circulation and reference desk transactions, workshops, and orientation attendance counts that are used for program improvement.

Analysis and Evaluation

All Learning Resource Centers collect SLO data each semester through surveys. In the fall, the Writing Center conducts an annual survey of all currently enrolled students. The results consistently demonstrate the Writing Center does meet students' needs. LAC activities, such as writing conferences with faculty, are graded components of ESL 301 and 201 courses; thus, both the use and effectiveness of the lab services are measured throughout the semester in these courses.

The Student Success Center (SSC) also engages in research studies with the IVC Office of Research, Planning and Accreditation ([II.B.6](#)). Quantitative studies have considered traditional outcome measures, such as course retention and GPA, with a matched control group to determine whether or not students who receive tutoring have more success. The SSC also surveys students every semester via a self-report measure where they indicate the effectiveness of tutoring and respond to an open-ended question about the SSC's strengths as well as areas where it could improve. Qualitative studies have involved researchers observing and rating tutor and tutee interactions, then grouping those behavioral findings into traits or trend categories which are compared to objective measures, such as course completion or course grades ([II.B.6](#)).

It is important to IVC that equitable services are provided for DE students. While the library is unable to distinguish DE students who use the library from other students who are simply

using online resources, DE students have the same access to material and the ability to provide feedback and request materials as do in-person students.

The College meets the standard.

Standard II.B.4. Library and Learning Support Services

When the institution relies on or collaborates with other institutions or other sources for library and other learning support services for its instructional programs, it documents that formal agreements exist and that such resources and services are adequate for the institution's intended purposes, are easily accessible and utilized. The institution takes responsibility for and assures the security, maintenance, and reliability of services provided either directly or through contractual arrangement. The institution regularly evaluates these services to ensure their effectiveness.

Evidence of Meeting the Standard

The College contracts with outside vendors to provide up-to-date technology for the library and learning centers. The library and learning centers work closely with IVC technology services to manage contracts, and assess and ensure the quality of contracted services. Table II.B.4 contains some important examples of services provided by outside vendors to enhance the accessibility and functionality of IVC's library and learning resources.

Table II.B.4 Examples of Contracted Library Support Services

LLR Programs	Vendor	Purpose
Library	OCLC WorldShare Management System	Accessible library resources and resource management
Library	YBP, GOBI	Collection development and tracking; databases; periodicals
Library	SpringShare LibApps	statistics, for LibGuides, for LibCal (study rooms)
Library	Desktracker	Statistics
Library	3M	Gate counts
Student Success Center	Smarthinking	Online tutoring
All centers	Pharos	Common print system
All centers	Lynda.com	Technology training
All centers	SARS Software	Student use tracking

The College and District collaborate to ensure security, and maintenance and reliability of services provided by outside vendors. The library and learning centers utilize data to analyze and review service usage to ensure accessibility of services for students. Examples include the transition to the Canvas learning management system (LMS), the utilization of Smarthinking by the Student Success Center, the adoption of a common print system, and the use of SARS software to track learning center use.

Analysis and Evaluation

The library and learning centers use a common print system. Following consecutive assessments with substandard results, it was determined that the vendor that was used for over ten years was not meeting the needs of the students. A collaborative effort between IVC and Saddleback reviewed several options and determined that Pharos would serve as the vendor for printing services beginning summer 2016. The new print system was fully implemented fall 2016 and has been evaluated as serving the campus' needs effectively to date.

The College meets the standard.

Standard II.C: Student Support Services

II.C.1 Student Support Services

The institution regularly evaluates the quality of student support services and demonstrates that these services, regardless of location or means of delivery, including distance education and correspondence education, support student learning and enhance accomplishment of the mission of the institution.

Evidence of Meeting the Standard

The institution provides support programs and services to students that include: Admissions and Records, the IVC bookstore, the Bursars Office, CalWORKs, the Career Center, the Child Development Center (CDC), Counseling, Disabled Students Program and Services (DSPS), Extended Opportunity Program and Services (EOPS/CARE), Financial Aid, Guardian Scholars (foster youth support), the Health and Wellness Center (HWC), International Students Program (ISP), Outreach and Community Relations, Student Ambassadors program, Student Life, Student Equity, Student Success and Support Program (SSSP/Matriculation), the Transfer Center, and the Veterans Services Center (VSC). The services provided by these programs support student learning and enhance the accomplishment of the mission which states: "... *We support student access, success, and equity....*" ([II.C.1](#)). Innovative ideas to accomplish this mission are encouraged and supported college wide as evidenced by the Implementation of Student Success Task Force Recommendations form, created to log campus efforts supporting the Student Success Act of 2012 ([II.C.2](#)). One such initiative to increase student engagement and promote campus connectedness is the Student Ambassadors program. Started in 2014, this leadership program has successfully graduated two cohorts of students that include the 2015 IVC student commencement speaker and a student recognized by the Chancellor of the California Community College system in his 2015 *State of the System* address ([II.C.3](#)). To celebrate the institutions diverse student population and support the mission of the institution, the 2016 Laser Week student orientation partnered with ELEVATE and Student Equity to integrate cultural diversity and learning into the orientation.

The institution ensures quality by conducting a comprehensive program review that includes measurable student learning outcomes (SSLOs), every 3 years ([II.C.4](#), [II.C.5](#), [II.C.6](#), [II.C.7](#), [II.C.8](#), [II.C.9](#), [II.C.10](#), [II.C.11](#), [II.C.12](#)). Surveys are used as a tool to ensure students are meeting the individual learning outcomes established by each department ([II.C.13](#), [II.C.14](#), [II.C.15](#), [II.C.16](#), [II.C.17](#), [II.C.18](#)). Student service programs assess student satisfaction with services and initiatives through participant evaluations, student comment cards and surveys.

This is evidenced by the changes made to Fast Friday events, which allow students to complete assessment, advisement and orientation in one day. Due to feedback from participants, the format was changed to decrease the required time needed ([II.C.19](#)). Laser Week, an IVC student success initiative that was created to promote student engagement and address the number of students who did not complete the matriculation steps for the upcoming semester has conducted satisfaction surveys, the results have not yet been analyzed ([II.C.20](#)). The freshman advantage was internally analyzed and showed that overall, FAP students were more likely to be enrolled full-time (22.8 points higher), complete all courses at a higher rate (7.7 points higher) as well as the core GE courses (7.5 points higher) and the Basic Skill courses (7.5 points higher) ([II.C.21](#)).

In line with the established mission, programs solicit feedback from advisory boards, which is used for program and service improvements. These meetings are also a way to update and provide information to local partners and vested community members ([II.C.22](#), [II.C.23](#)). The State Chancellor's office conducts annual program audits on categorical programs offered at Irvine Valley College to ensure program compliance and effectiveness ([II.C.24](#)). Most recently, categorical funding to support the core services of assessment, orientation, advisement and follow up, through the Student Success and Support Program (SSSP); and funding to mitigate disproportionate impact found in student groups based on gender, ethnicity, disability status, socio-economic status (SES) and foster youth or veteran status through the Student Equity program; have given the institution an opportunity to establish and enhance the support services offered ([II.C.25](#), [II.C.26](#), [II.C.27](#)). In direct alignment with the college mission to "*offer continued accessibility in a diverse community*", a Guardian Scholars program was developed as a Student Equity initiative to address the disproportionate impact found for Foster Youth students with regards to accessibility. In spring 2016, the students were asked to complete a needs assessment which was analyzed and discussed at program planning meetings ([II.C.28](#)). Also approved for Student Equity funding was an initiative to develop a re-entry center on campus to support a population of non-traditional students with specialized needs and challenges and can be found on pages 58-59 of the plan ([II.C.28](#)). Currently in the planning phase, the re-entry center will be initiated in spring of 2017.

Student support services have experienced their greatest transformation with regards to services for distance education students. In response to the growing enrollments in distance education, many student support services are available online. An overview of services available via different modalities is outlined in a chart as Appendix A.

Analysis and Evaluation

To further address the needs of our diverse student population, IVC ensures in-person assistance is available in the evenings and on weekends; additionally, online services continue to increase in availability. The student services that experience the highest volume of student contacts, Admissions and Records, Counseling, and Financial Aid have all increased their available hours to address the need for services for students enrolled in evening courses. For example, the Counseling Center is open until 7 pm Monday-Thursday and makes appointments available on Saturdays.

In an effort to meet the needs of the rapidly growing distance education population, members of the Student Services management team will collaborate with the Online Education Task Force to create a Student Services for Distance Education plan as an outline to guide future practices, increasing accessibility for distance education learners. Currently, Irvine Valley College administers the Distance Education Survey each major term. Since fall 2014, the survey has incorporated two questions pertaining to students' access and perceived usefulness of student service areas online. These results will be incorporated into the VPSS AUR and shared with all student services managers ([II.C.29](#)). The institution also plans to enhance professional development in the area of distance education services through participation in webinars, conferences and local workshops. The Associated Student Government of IVC has been discussing the needs of DE students and how to best support the activities, wants, and concerns of their peers. Results of their discussions will be shared with the Online Education Task Force.

Student Service	In Person	Evening*/Saturday	Info/docs On-Line	Interactive services available online

* Evening hours constitute in-person services available after 5pm.

The College has met the standard.

II.C.2 Student Support Services

The institution identifies and assesses learning support outcomes for its student population and provides appropriate student support services and programs to achieve those outcomes. The institution uses assessment data to continuously improve student support programs and services.

Evidence of Meeting the Standard

The institution uses TracDat to input and store program and department assessment data. Assessments are conducted to measure many aspects of the student experience while enrolled at the institution. Ensuring student satisfaction with services, determining opportunity for program improvement or expansion, supporting state and district funding requirements, and aligning services with the goals and objectives of the college and the district are some of the ways in which this information is utilized.

Evaluations are assessed by the Office of Research, Planning and Accreditation and reviewed by the Vice President for Student Services ([II.C.36](#), [II.C.37](#)). Results are presented at the following Student Services meeting and changes are implemented where appropriate. This process is detailed as part of the Office of Student Services Administrative Unit Review (AUR) ([II.C.38](#)).

Programs perform annual updates to the comprehensive 3-year review ([II.C.4](#)). Meetings with the Office of Research, Planning and Accreditation, area managers, and, when appropriate the Vice President for Student Services, are conducted to ensure that the AUR, SLO and SSO progress and assessments are effectively measuring student support outcomes as evidenced by the various trainings conducted ([II.C.39](#)). Program reviews are evaluated utilizing assessment methods to ensure the AUR's and SLOs/SSOs are functioning at a sustainable level. All outcomes are assessed and changes to programs are implemented based on the assessment process results. For instance, over 50% of the students polled in the 2011 Student Satisfaction Survey expressed concern that either their current financial status would interfere with their studies or that they would be unable to attend IVC without financial assistance. Financial Aid Office addressed this by sending both follow-up missing document emails and removing unnecessary document requirements, most notably a driver's license for each student. The initial actions of communicating more regularly with students and removing unnecessary barriers to access resulted in more student files being completed and a greater number of students receiving financial aid (37%). With additional time, access will continue to be less and less of an issue.

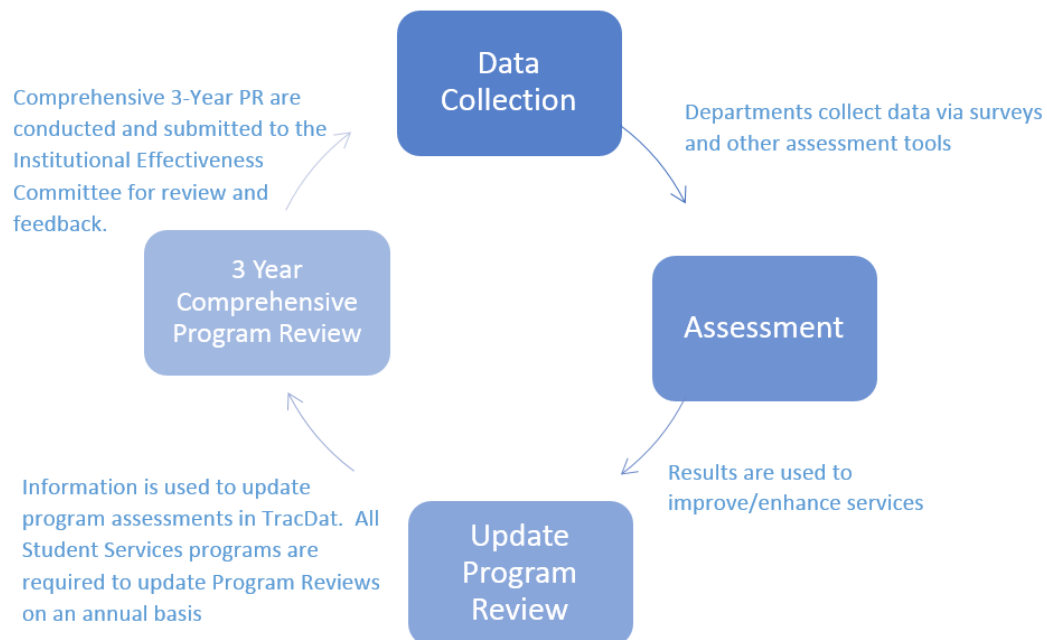

When surveyed in spring 2012, 83% of students knew how to apply for financial aid and 71% knew how to complete their file in order to receive financial aid. However, as late as 2013-2014, only 34% of students attending IVC were receiving financial aid.

The Health and Wellness Center receives continuous assessment data via student surveys to improve its health care programs annually. Students complete satisfaction surveys after each visit and this data is used to assess needs and see what changes need to be made each year.

This drives the services provided to students. Additionally, students are now being provided increased mental health programs, including suicide intervention classes for staff and faculty to promote education on what to do in a crisis and sexual assault/consent classes done across campus to inform and educate on prevention and conduct that may lead to inappropriate behavior, including alcohol and drug abuse. This is a comprehensive program provided directly to student thru classes and group meetings, and has grown annually by 10% per year.

The Veterans Student Center also conducted an assessment in spring 2014 to implement needed changes for fall 2014 and implements a follow up survey in spring yearly as part of its continuous quality improvement process. The annual survey assesses the needs and demographics of IVC's student veteran population and formulates its services to provide resources and information to assure the veteran population are having their needs met ([II.C.17](#)).

The institution recognizes that student services learning outcomes are most effective when created as a collaborative effort in the department. To ensure that faculty and staff understand the purpose and benefit of relevant departmental SSOs, various training workshops have been held for staff members in student services ([II.C.40](#)). Training topics have included basic overview, integrating SSOs with mission statements ([II.C.41](#)), and SSO assessment. Recent training workshops have focused on ensuring that student services met the proficiency standard for SLO/SSO assessment as required by ACCJC ([II.C.42](#)).

Analysis and Evaluation

As shown by regular training, meetings and evaluation of Student Services staff and administration, student and staff surveys, open forums, listening sessions and SSO's, Irvine Valley College regularly identifies and assesses student learning support outcomes, provides appropriate support and engages in continuous improvement in the delivery of its programs and services to students.

Based on an analysis of the evidence, Irvine Valley College is meeting this standard and will continue to monitor its progress.

The College meets the standard.

II.C.3 Student Support Services

The institution assures equitable access to all of its students by providing appropriate, comprehensive, and reliable services to students regardless of service location or delivery method.

Evidence of Meeting the Standard

The College offers comprehensive and equitable access to services for eligible students. Comprehensive services are provided by the Student Services Division from Admissions and Records, Childcare, Counseling, Disabled Student Services and Programs (DSPS), EOPS, & CARE & Program (CalWORKs), Financial Aid, Health and Wellness Center, International Student Center, Office of the Vice President for Student Services, Student Life and Veterans Center.

Analysis and Evaluation

Irvine Valley College (IVC) student support services provide essential services to student learning from outreach, assessment, orientation, advising, counseling, registration, financial aid, health, veterans services, EOPS, CalWORKs, disabled students, student life, childcare and a complete range of programs and services in which support for academic success and personal growth are one of the primary focus. Student services assists students in advancing in institutional learning outcomes and improves cultural competence, diversity and development in life as they expand their educational goals.

Access to the broad range of student services is available in the Student Success Building located in the center of the college with easy access and visibility. All student service departments provide remote access to complete and comprehensive program information with descriptive services, location, hours, contact information and online forms on our IVC website under Student Services. Examples of on line access includes Admissions and Records, Counseling, Financial Aid, EOPS and distance learning which students can access. We also have face-to face and web access, email, phone and fax. Our on line services component has allowed student greater accessibility while adapting to the needs and use of our population that utilize on line, digital and remote devices in their educational needs.

Program/Location	Implementations
Child Development Center	The enrollment process is used to acquire information about the primary languages spoken by enrolled families, this is utilized to ensure cultural sensitivity is provided to all who are enrolled at the center.
DSPS	DSPS students are surveyed throughout the year, through both on-campus surveys and via e-mail through the Office of Research, Planning and Accreditation. Results indicated that a significant number of students with disabilities are enrolled in evening classes, yet support services were not offered during this time. The DSPS office has extended operating hours to 7pm to accommodate the needs of these affected students and ensure equal access to services.
Veteran Services Center	An in-person survey was made available to all students who use the VSC indicated that 85% of the respondents did not utilize services offered by DSPS. As a result, a strong collaborative effort between DSPS and VSC was implemented, including monthly outreach presentations and training of the Veterans Counselor to authorize and approve DSPS accommodations.
Student Life	

Analysis and Evaluation

The student support programs at IVC assess and provide for students' needs, regardless of service location or delivery method. This is evidenced by the implementation of many changes as a result of student surveys and student comment cards. Student surveys are distributed both in person as well as emailed surveys through the Office of Research, Planning and Accreditation.

At a programmatic level, programs make changes based on feedback to improve the services offered to students. The Child Development Center revised the Student Guidelines, which is required to be read by each student prior to entering the

classrooms, to inform students of practices, policies and procedures that outline the expectations in the center. The changes were based on the student feedback received, recommending an emphasis on discipline and guidance.

Admissions and Records partnered with the Bursar's office and administered a student survey in 2011. One of the questions asked students if they knew when their upcoming registration appointment information was released. The results indicated only 68% were aware of when the appointment information was made available. As a result, a Dates and Deadlines webpage was created. Additionally, Admissions and Records worked with the Marketing department to send emails to all continuing students, post announcements through the college's Facebook and Twitter profiles, and run announcements on the marquee in an effort to alert students when registration times for the next enrollment term are available. In 2014, correspondence was sent to the student three days before, and the day of, their registration time as a reminder of their appointment. To determine the effectiveness of these efforts, the office of Research, Planning and Accreditation worked with Admissions and Records to determine if any changes occurred in registration appointment time usage.

Based on the results of the student survey completed for the Counseling department in spring 2011, it was found that 85 % (214/253) of respondents expected to transfer. The following services were expanded and/or created as a result of the survey responses:

- The Transfer Center Coordinator/Counselor was increased from a 50% assignment to a 100%.
- The Articulation Officer/Counselor was increased from a 75% assignment to a 100%.
- Established monthly counselor training to ensure counselors were aware of changes to the transfer process/requirements, discuss best practices, invite university transfer representatives to give an overview of admissions process/requirements, review case studies, and provide updates on other counseling related items.
- Expanded the variety and frequency of transfer-related workshops and transfer institution tours. (Flyers from Campus tours, include 3-day Northern Ca)
- Academic planning lab (MAP Lab) was created where students are able to come in and work on academic plans independently or with the assistance of a counselor when desired.
- Expanded hours in the Counseling Center on Friday's to 8am-5pm (from 8am-12pm) and added Saturday hours from 9am-1pm. Transfer Center expanded its evening hours from 5pm to 7pm Monday through Friday.

In the VSC, an annual anonymous survey is completed via the office of Research, Planning and Accreditation, distributed to all students identified as a former/current military service member ([II.C.42](#)). Results from the 2015 survey showed the following changes from 2014:

- a) 6% increase in enrollment
- b) 11% increase in persistence rate.

The increases were identified as resulting from additional support services provided in the VSC. The survey also revealed that 85% of veterans do not utilize DSPS services. A plan of action has been implemented that will have a DSPS Specialist or Counselor attend VSC meetings, workshops, and events, for access and to educate on the support services provided through the DSPS office. Also included in the plan of action is to install accommodated software programs in the VSC computer lab, for student use. From 2014 to 2015, survey results indicated a larger percentage of respondents utilized and were satisfied with the increase of psychologist appointments to 4 days per week to assist veterans with acclimation and daily life situations. The financial aid applications submitted and completed increased from 2014 to 2015.

The HWC survey found that the facilities where the health center is located were not adequate, time of wait was long, services were not efficient or sufficient and that the center itself was dirty. Post survey, a restructure plan was developed and new staff were hired, the health center flooring replaced, new equipment and furniture was ordered and installed, and staff were trained on efficient ways of assisting students with more efficient equipment, a new medical record system and within one year the satisfaction surveys were improved significantly by students with an overall satisfaction rate of over 94%.

Plan

Objective/Action	Resources Needed	Responsible Party	Expected Completion Date
CCC Assess implementation	Contract with testing service	Admissions/Records	Spring 2017
ATEP increase student services at site	Involvement in construction site build to accommodate Student Services such as health services, financial aid, counseling and	VPSS	Spring 2019

Objective/Action	Resources Needed	Responsible Party	Expected Completion Date
	others at site once completed.		
Degree Audit Beta Testing	Admissions personnel will complete degree audit beta testing, student self-service will be online testing, students will run own degree progress audits to note progress toward degrees.	Admissions/Articulation/SSSP	Spring 2017

The College meets the standard.

II.C.4 Student Support Services

Co-curricular programs and athletics programs are suited to the institution's mission and contribute to the social and cultural dimensions of the educational experience of its students. If the institution offers co-curricular or athletic programs, they are conducted with sound educational policy and standards of integrity. The institution has responsibility for the control of these programs, including their finances.

Evidence of Meeting the Standard

Irvine Valley College offers co-curricular programs, including 15 athletic teams. With operational support from the Office of Student Life, students are able to participate in eight co-curricular programs including Athletics as well as over 40 individual student clubs and organizations.

The co-curricular Programs at IVC are: Administration of Justice, Athletics, Dance, Forensics, Model United Nations, Phi Theta Kappa, Psi Beta and Wind Symphony. Our

diverse student clubs and organizations represent academic, career, community and service learning, honor societies, leadership, multi-cultural, and special interests.

Oversight of co-curricular and extra-curricular programs is facilitated by the Office of Student Life, directly supervised by the individual program's instructional deans. Each has a faculty advisor and funding provided by ASIVC. Co-Curricular programs are expected to submit a calendar of events and activities, strategic goals, and objectives on an annual basis as part of the ASIVC budget allocation process. Each curricular program submits mid-year budget reports, participates in a site visits and budget presentations with members of the student government Budget and Finance Committee and submits accomplishments to their instructional deans.

Co-curricular programs are identified as requiring three components: tie to instruction, competitive in nature in their area of instruction, and student course enrollment.

Section 11.02 Designation of Clubs and Programs states: 11.020 Co-Curricular Programs are those that the College recognizes as official programs; such as Administration of Justice, Athletics, Forensics, Journalism, Music, Psychology, and any other new program which the Senate deems to be an official program by a two-thirds (2/3) majority vote and the College recognizes the program as official. Co-curricular programs must be of a competitive nature in their area of instruction. Competitions, which do not include inter-murals, must be of officially recognized competitions that compete with other officially recognized schools on IVC's behalf. Enrollment in a course related to the program is required ([II.C.43](#)).

In addition to offering training workshops, a co-curricular handbook was developed to provide guidelines and procedural information for the expectations of Co-Curricular Programs. It is based on the rules and regulations outlined in the ASG of IVC Constitution and Bylaws and addresses issues of budget, finance, activities, rules and membership criteria. Currently the ASIVC is in the process of updating their constitution and bylaws; a revised co-curricular handbook will be finalized by December 2016.

The ASIVC ratified four goals in the 2015-2016 to better focus their efforts, address student concerns and align with the mission of the institution. They chose services and activities, student leadership development, facilities and technology and fiscal management. In doing so, they updated their organizational structure to add committees of Community Outreach, Diversity and Student Equity, Facilities and Technology, Leadership Development to existing committees of Budget and Finance, Public Relations and Student Activities. To ensure student participation in campus governance, student leaders of clubs, organizations, co-curricular and extra-curricular program on a wide variety of campus committees, work groups, and tasks forces ([II.C.44](#)), these students who serve on these ASIVC committees also

serve as the liaisons to the related campus committees, workgroups and taskforces to enhance the shared governance process.

Budgetary decisions are made as they relate to the college-wide process and follow strict guidelines per the college protocols. In order to evaluate the quality and effectiveness of co-curricular and extra-curricular programs, the Associated Student of IVC (ASIVC) implemented an annual allocation budget process that included mid-year program and goal updates. They are in process of working with the Office of Research, Planning and Accreditation to develop an assessment template that each department would be required to complete at the end of each academic year. In addition, each department who receives ASG funding will be expected to provide updates on strategic goals and data results of assessments implemented throughout the year as a part of the budget development process.

Irvine Valley College athletic programs provide students with a wide spectrum of intercollegiate activities. Athletics is part of the School of Kinesiology, Health and Athletics. IVC draws student athletes from throughout Southern California and beyond, and from all socio-economic, racial, ethnic and cultural demographics including significantly higher percentages of Latino and black students when compared to the college population as a whole ([II.C.45](#)).

IVC data indicates that the athletic learning community is among the most academically successful in the entire college, and achieves at the highest levels in enrollments, course success rates, persistence rates, GPAs and transfer rates ([II.C.45](#)).

Irvine Valley College Athletic teams have collected 19 team state championships and 41 conference titles from 1990 through the spring of 2015. IVC currently competes in 13 intercollegiate sports: baseball, women's badminton, women's sand volleyball and men's and women's basketball, golf, soccer, tennis and volleyball ([II.C.46](#)).

Intercollegiate athletics utilize print and electronic media announcements to inform the public regarding athletics and has a responsibility to students in athletic programs and the college to insure the highest program standards and personal integrity as part of its operational philosophy. It is important to note that IVC is among the very few colleges statewide (both 2-year and 4-year) in compliance with the strict proportionality test of Federal Title IX laws. (8)* Maria to link Nancy's evidence here. Athletics has the support of a designated counselor. Student-athletes are counseled on the responsibility of representing the college, its students, the faculty and staff, and current and future alumni as part of athletic competition.

Student Athletes are provided access to a Student-Athlete handbook that includes all pertinent information on their activities and obligations, copies of documents they are required to sign, slides from the orientation and resources available to them from the College. The student-athlete handbook is maintained by the dean, reviewed annually, updated as circumstances require, and is available to student-athletes through the Irvine Valley College Athletics website as a printable .pdf file ([II.C.45](#)).

Analysis and Evaluation

Irvine Valley College co-curricular programs and athletic programs are aligned with the institution's mission. With eight co-curricular programs and over 40 student clubs, the College does promote and support the social and cultural dimensions for its students. The College has strict budget guidelines that requires campus-wide participation and mid-year updates on program goals and allocations.

Based on an analysis of the evidence, Irvine Valley College is meeting this standard and will continue to monitor its progress.

The College meets the standard.

II.C.5 Student Support Services

The institution provides counseling and/or academic advising programs to support student development and success and prepares faculty and other personnel responsible for the advising function. Counseling and advising programs orient students to ensure they understand the requirements related to their programs of study and receive timely, useful, and accurate information about relevant academic requirements, including graduation and transfer policies.

Evidence of Meeting the Standard

The mission of the Irvine Valley College (IVC) Counseling Services is to support our students in achieving their academic, career and personal goals at the College through academic and career planning as well as strategies to deal effectively with their personal obstacles.

Counseling Services is the umbrella under which many student service programs reside. Counseling activities and services are funded through General, and Categorical funding including Extended Opportunity Program and Services (EOPS), Student Success and Support

Program (SSSP), Disabled Student Programs and Services (DSPS) and Student Equity. Academic, personal, and career counseling services are available to all IVC students and any potential/interested non-IVC students at any time the Counseling Center is open. The Counseling Center is open and available to students Monday through Thursday from 8:00 am – 7:00 pm, Friday from 8:00 am – 5:00 pm and Saturday from 9:00 am – 1:00 pm. Saturday counseling hours were added in spring 2015 to better serve the weekend and the full-time weekday employee population. Through online counseling, students can submit questions to a counselor 24 hours a day, 7 days a week. Counselors are available in the Counseling Center during all days the College is open. Counseling services are communicated to students via email, Sherpa nudges, text messages, SARS appointment reminders via text and phone, social media, letters and flyers, college catalog, handbook, planners, campus monitors, outreach events, and direct referrals.

Counseling and Academic Advising Programs Support Student Development and Success

The College's mission is committed to student success and is reflected in many of the innovative services that are provided to students in the Counseling Department. They are as follows:

1. Stress Busters Workshops such as on Mindfulness and Meditation
2. Freshman Success Program – guaranteed schedule for incoming freshmen. Program consists of four CSU general education courses which also include a counseling course on study skills.
3. Fast Fridays – Available to incoming freshman that want to complete English and math assessments, campus tour, group advisement and first semester education in one day to get an early registration time for fall semester.
4. Laser Week – For new students to participate in student success workshops, learn about academic programs, connect with faculty before the beginning of fall semester.

Preparation of faculty and other personnel responsible for the advising function

Discipline Faculty Mentoring (DFM) Pilot Program: Through the support of SSSP funding, a new program was launched in the fall 2015, faculty discipline mentors will expand student support. Counseling faculty have partnered with discipline faculty to provide additional academic support. Discipline faculty will inform students what careers may be available to

students who major in a specific discipline, recommend course sequences and offer tips to students to be successful in the discipline ([II.C.47](#)).

In April 2016, IVC hosted a Cultural Competence Summit where faculty, staff and the community participated in a day-long dialogue on closing the achievement gaps and valuing students from various demographics. This event served as a professional development opportunity for all IVC counselors that attended. The content of the workshops gave IVC counselors opportunities to develop skills and strategies to effectively engage with our diverse student population.

In spring 2016 counselors participated in a book review of “Redesigning America’s Community Colleges” by Bailey, Smith, Jaggars, and Jenkins. The focus was on how to better engage students and explore more effective ways in which to orient and retain students until they achieve their intended academic goal ([II.C.48](#)).

Irvine Valley College recognizes the importance of academic counseling to ensure student success and completion. In order to remain current and consistent, once a month training sessions are held for all counselors to review changes, provide updates and to refine skills related to counseling ([II.C.49](#), [II.C.50](#)). In addition, the Counseling Department also has a Counseling site on Blackboard where important information and updates are posted for all full-time and part-time counselors to ensure they have timely access to information.

Orientation of Students on Academic Requirements

Counseling services are provided in the following manner:

On-Campus

- In-Person Appointments: 30-minute, 45 minute and 60-minute appointments are available to students. Appointments open for student sign-up every other Wednesday for the following 2-week period.

Drop-in Counseling:

- Drop-in counseling services are available to students requiring immediate assistance. Drop-in counseling is limited to 10-15 minutes per student. Drop-in counseling is available on a first come, first served basis during all Counseling Department hours. Drop-in counseling is provided at Drop-in Counseling stations located in the lobby of the Counseling Department.

Distance Education Counseling

- **Online Counseling:** Through the Counseling website online counseling is also accessible 24 hours a day/7 days a week. Students submit questions online to counselors and counselors respond as appropriate. Average response time is 1-2 business days excluding weekends and campus holidays.
- **Virtual Counseling:** As desired or needed, appointments are conducted using Skype or FaceTime.
- **Counseling FAQ's (Knowledgebase):** Provides answers to frequently asked questions.
- **Telephone Appointments:** As desired or needed, appointments are conducted via telephone.

As technology advances, the Counseling Department plans to enhance online counseling service through effective use of technology.

My Academic Plan (MAP)

Students are able to create their education plan online via their student portal, MySite, since 2007. MAP provides students with all of the information they need such as requirements for certificates, associate degrees and transferring to University of California (UC) and California State University (CSU). MAP is integrated with Project ASSIST, a statewide inter-segmental articulation database sponsored by the CSU and UC university system.

MAP Lab

Opened in spring 2016 is an open entry, open exit counseling computer lab where students can get counseling assistance with completing their comprehensive academic plan.

Academic counseling courses

Specific counseling courses were created in spring 2014 to assist students with planning their courses and completing their educational goal in a timely manner. COUN 2, University of California Student Education Plan, Counseling 100A, AA/AS/Certificate Student Education Plan, and Counseling 100B, California State University Student Education Plan. All courses are .5 units and at the end of the course students would be able to understand the

course requirements for their degree objective and have a completed comprehensive academic plan on MySite.

Transfer Center provides UC, CSU and independent colleges and universities admissions and application workshops, campus tours, and individual appointments with university representatives. In addition transfer fairs and transfer week are also coordinated through the Transfer Center.

Analysis and Evaluation

The Counseling Department offers professional counseling services for current and prospective students to assist with a variety of academic, career, and personal concerns. The counseling faculty support students in clarifying their values, making decisions, choosing a major, coping with personal issues and the completion of the educational plan. Counseling services are available during the day and evenings, including Saturdays, by appointment or drop-in basis.

In addition to the counseling courses for special population students, counselors are assigned to work with these populations and provide counseling services that efficiently meet their educational needs. Populations who receive assigned counselors and services include the following: CARE, CalWORKs, CTE, DSPS, EOPS, Guardian Scholars (foster youth), Honors, international, reentry, veterans, probationary/dismissed students and student athletes. The Counseling Department also offers continual in-house training sessions, bi-annual faculty retreats, weekly counseling meetings and dedicated funding for professional development. In addition, the Academic Employee Master Agreement faculty performance evaluation includes a separate section on counseling activities. This section in the evaluation instrument specifically evaluates accurate and complete knowledge in the advisement process.

The campus has an active Distance Education Task Force which seeks to ensure that the needs of distance education students are met. Members of student services and the counseling center specifically are involved in this committee to ensure that their advising and counseling needs are met ([II.C.51](#)).

The college has an outlined process for faculty evaluation and the granting of tenure as stipulated in the Academic Employee Master Agreement. This four-year process includes evaluation from an appointed Tenure Review Committee as well as student evaluations of the

faculty member. Tenured faculty are then evaluated every three years with a process that includes student input. Part-time faculty are evaluated during their first semester of assignment and then every sixth semester.

Counselors also teach courses designed to facilitate personal and career exploration and development as well as academic survival skills. The counseling curriculum incorporates academic advising, student development and career exploration in their courses.

Based upon the analysis of the evidence, Irvine Valley College has met Standard IIC5: Student Support Services: Advisement. We will continuously monitor our progress through self-evaluations, SSO and employee evaluations. In meeting student needs, we will strive to stay current and update processes in the areas of technology. This includes expanding delivery of counseling services, marketing of services to students and providing online accessibility to student success resources.

Plan

Objective/Action	Resources Needed	Responsible Party	Expected Completion Date
Implement an integrated online/video counseling process.	Integrated online counseling format website or program such as ConexED.	Counseling Faculty, IT, Fiscal Services, Technology Taskforce	Fall 2017
Student Success Webpage with information, videos and resources that promote student success (i.e. time management, study skills, recognizing and relieving stress)	Videos and content to be included on website. This includes, but is not limited to: student testimonials, videos on student success, how to videos, workshop videos.	Counseling Faculty, IT, Fiscal Services, Technology Taskforce	Spring 2018
Review of marketing and promotion of counseling services.	Task force or retreat to review current practices and how current/new technologies can be leveraged for further exposure.	Counseling Faculty, IT, Technology Taskforce	Fall 2017

II.C.6 Student Support Services

The institution has adopted and adheres to admission policies consistent with its mission that specify the qualifications of students appropriate for its programs. The institution defines and advises students on clear pathways to complete degrees, certificate and transfer goals.

Evidence of Meeting the Standard

Irvine Valley College is committed to student success. The College is devoted to student learning and success through exemplary and integrated teaching and support services, effective stewardship, and continued accessibility in a diverse community ([II.C.1](#), [II.C.52](#)).

The college admits domestic and international students in accordance with federal and state laws. IVC provides open admission to all California Residents, nonresidents and eligible K-12 concurrently enrolled students. IVC uses the CCC Apply Admission Application and will be piloting the CCC Apply International Student Admission Application in spring 2017.

The college requires non-exempt students to complete orientation, assessment, and advisement including developing a first semester educational plan before they are permitted to enroll. Students are also required to develop a comprehensive educational plan once they complete 15 associate degree units or before they register for their 4th semester.

Prior to enrollment, all college level students who seek to transfer or earn degree or certificate are required to complete an orientation, assessment for math and English or English as a Second Language (ESL), and counseling including the development of an initial academic plan. The college encourages students to complete these pre-enrollment steps early through the Freshman Advantage program. The Freshman Advantage Program provides an early registration opportunity in an effort to promote enrollment in math and English or ESL courses in the students' first semester of full time enrollment. Fast Fridays are a collaborative student services effort offering students an opportunity to complete assessment, obtain a campus tour, connect with student government, receive academic counseling services and develop an initial educational plan on a single Friday ([II.C.53](#), [II.C.54](#), [II.C.55](#), [II.C.56](#), [II.C.57](#), [II.C.58](#), [II.C.59](#), [II.C.60](#), [II.C.61](#), [II.C.62](#), [II.C.63](#), [II.C.64](#)).

Once discipline faculty have updated or developed curriculum and have it go through the approval process the certificates and degrees will be available to students via print or online catalog. Certificates, associate degrees, associate degree for transfer, and transfer pathways to UC or CSU campuses are available to students on MySite under My Academic Plan (MAP). Pre-requisite courses are included based on student's placement in math and English or English as a Second Language. Students can start building their academic plans and then have a counselor review the pathways in a counseling appointment or in the MAP Lab.

In 2015-16, the Discipline Faculty Mentors (DFM) project was launched. This project is a collaboration between the faculty in the School of Guidance and Counseling and other

discipline faculty in an effort to add discipline focused mentoring services that will increase the expertise available to students for their academic and career planning. The project includes 11 faculty from a variety of disciplines such as history, political science, geography, business, biology, languages and engineering ([II.C.65](#), [II.C.47](#)).

Clear pathways on certificates, associate degrees, associate degrees for transfer and transfer requirements to CSU and UC campuses are available to students online and in-person. Students also have access to see a counselor or a discipline faculty mentor to assist with their career pathways.

IVC is starting a pilot weekend Business Administration Degree in fall 2016 where students would be able to finish their degree in two years. Classes are offered on Friday evenings and weekends and they are offered in combination of hybrid, traditional and online format. The college has been selected as one of 30 colleges to participate in the American Association of Community Colleges (AACC) Pathways Project, funded by the Bill and Melinda Gates Foundation. Thus, more guided pathways will be made available through this funding.

Analysis and Evaluation

The District has adopted admissions policies and procedures consistent with the Education Code and Title 5 of the California Code of Regulations.

The College has established processes to require orientation, assessment and advisement which includes developing a first semester academic plan. The college has also adopted processes to require students to complete comprehensive academic plans.

Clear pathways on certificates, associate degrees, associate degrees for transfer and transfer requirements to CSU and UC campuses are available to students online and in-person. Students also have access to see a counselor or a discipline faculty mentor to assist with their career pathways.

Based on an analysis of the evidence, Irvine Valley College is meeting this standard and will continue to monitor its progress. Also as a result of the colleges' participation in the American Association of Community Colleges (AACC) Pathways, work with academic units to develop guided pathways for students.

The College meets the standard.

II.C.7 Student Support Services

The institution regularly evaluates admissions and placement instruments and practices to validate their effectiveness while minimizing biases.

Evidence of Meeting the Standard

As a California Community College, there are no admission instruments for domestic students. All California residents who have a high school diploma or who are 18 years of age or older and who can benefit from instruction are automatically admitted to the college ([II.C.66](#)). In addition, the college admits all non-residents who meet the same academic standards. The only requirement is the individual seeking admission must apply for admission. Students who are currently enrolled in grades K-12, may also concurrently enroll at Irvine Valley College with permission from their respective school principal or designee and their parent. ([II.C.67](#), [II.C.52](#), [II.C.56](#), [II.C.55](#), [II.C.59](#)).

International students are admitted in accordance with federal immigration laws and district policies. Again, no admission instruments are used to determine eligibility for admission. Students are required to demonstrate proficiency in the English language by achieving a minimum TOEFL, IELTS, iTEP or EIKEN score or completion of an approved intensive English Language School for which we Irvine Valley College has a TOEFL waiver agreement ([II.C.68](#), [II.C.52](#) pg13).

The college may use an approved assessment instrument, but must still validate cut scores. IVC uses the CTEP for English Placement. However, the college elects to an assessment not on this list for math and ESL, thus, the college must independently validate the instrument to ensure there is not bias, disproportionate impact, and to ensure appropriate placement. The SSSP Workgroup is charged with ensuring the assessments administered are validated ([II.C.69](#)). The primary English placement assessment instrument for native English speakers is the CTEP, version A, both paper-and-pencil and computer-based versions. CTEP has three components: reading comprehension (RC), sentence structure & grammar (SG) and sentence & syntax skills (SS). As a general rule, the CTEP is offered based on student demand, and staff and facility availability. The paper-and-pencil version of the CTEP is offered at local high schools and on the IVC campus to students with identified special needs. Students who have completed the CTEP may challenge the initial course placement by completing a locally developed and managed writing sample (paper-and-pencil) administered in IVC's Assessment Center.

Two instruments are used to assess the skills and placement of ESL students. The Secondary Language Proficiency Test (SLEP) Form 3 measures a student's reading comprehension, vocabulary, grammar and listening skills while the ESL Writing Sample is used to measure a student's writing skills. The evaluation of a student's linguistic competence and critical thinking skills demonstrated in the writing sample complements the skills assessed by the SLEP. The ESL Writing Sample serves as a multiple measure.

Math placements are determined using the number of correct answers on the test in combination with the answers the students give to questions 15 and 16 of the Irvine Valley College Student Services Survey that students complete before taking the test.

The Mathematics department has created a Math Test and Multiple Measures Placement Matrix that is used to determine course placement for students. Students are encouraged to prepare and refresh their skills before taking the math and English assessments. The Mathematics Department makes review questions available with answers for Arithmetic and Pre-algebra, Elementary Algebra, Intermediate Algebra, Trigonometry and Pre-calculus ([II.C.70](#)). These questions are PDF files that can be accessed free on the Math department's and on the Assessment Overview web pages.

Analysis and Evaluation

The admissions and assessment functions are governed by the shared governance SSAMMO (Student Success, Access, Matriculation, Marketing and Outreach) Committee. Furthermore, the primary charge of the SSSP Taskforce which reports to SSAMMO is the review and delivery of the assessment process. This group is comprised of faculty, classified staff, managers and administrators ([II.C.71](#), [II.C.72](#)).

Irvine Valley College has been very active on the statewide Multiple Measures Assessment Project (MMAP). Understanding that assessment instruments are not the best predictor of success, the MMAP set a goal to review the data to determine if other information can be used as a multiple measure to enhance student placement and, ultimately, improve student success. This research has shown that a student's unweighted cumulative high school grade point average is a significant predictor in a student's college success.

Consequently, in summer 2016, IVC piloted multiple measures using unweighted cumulative high school grade point average to place students in English. 480 eligible students were in the pilot and 46% changed their enrollment to a higher writing course.

Irvine Valley College is a pilot college for the statewide Multiple Measures project, and Saddleback College is a pilot college for the Common Assessment. Since both colleges are in the same district, both colleges are expecting to be piloting both simultaneously.

Plan

Objective/Action	Resources Needed	Responsible Party	Expected Completion Date
Implement MMAP in placement decisions	Programming, research	Counseling, Math, English, and ESL Faculty, SSSP Staff, Admissions and Records, District IT,	Fall 2017
Expand math pre-assessment preparation	Videos and content developed in Comevo	Math faculty, SSSP staff	Spring 2017
Implement CCC Assess (Common Assessment)	Programming, marketing	Counseling, Math, English, and ESL Faculty, SSSP Staff, Admissions and Records, District IT,	When made available by the Chancellor's Office

II.C.8 Student Support Services

The institution maintains student records permanently, securely, and confidentially, with provision for secure backup of all files, regardless of the form in which those files are maintained. The institution publishes and follows established policies for release of student records.

Evidence of Meeting the Standard

Student records are kept securely and confidentially ([II.C.73](#)). The primary location for student records is the district Student Information System (SIS). Any paper files are destroyed in accordance with BP & AR 3310, the district Records Retention and Destruction Policy ([II.C.73](#), [II.C.74](#), [II.C.75](#)).

The college maintains student records in the district-wide Student Information System (SIS). Users are granted permission by District IT, through the office of Admissions and Records, based on user roles. SIS data is stored in a database server. Full backups are performed nightly to a secure local location. This backup data is then archived by an off-site service, Live Vault. Off-site backups are performed through an encrypted tunnel and stored to a secured data vault, located on the east coast of the United States.

Student academic plans (MAPs) are created, approved and stored online through the district-wide SIS. Students are able to create multiple plans that can be reviewed by faculty and staff. Academic counselors, through District IT, may request to retrieve archived or deleted plans. All MAP edits, either by an employee or the student, are recorded and stored electronically for retrieval at a later date, if needed.

In October 2011, the college migrated from its former imaging system, WebXtender, a Viatron product, to ImageNow from Perceptive Software. This was part of a district-wide decision to consolidate to a single common vendor that would afford inter-district accessibility to student documents in a secured environment. The campus technology office maintains security, licenses and access to users who are authorized by the Office of Admissions and Records. Users are granted permission through the Office of Admissions and Records based on 'User roles'. ImageNow data is stored on local file server. Full backups are performed nightly to a secure local location. This backup data is then archived to our off-site LiveVault archive service. Off-site backups are performed through an encrypted tunnel and the data is stored encrypted in a data vault on the east coast.

Protection of student information is maintained in compliance with the federal Family Education Rights and Privacy Act of 1974 and BP 5615 and AR 5615 ([II.C.76](#), [II.C.77](#)). Students must submit the Authorization to Release Student Information form for each instance. The Authorization to Release Student Information form is also required for each third party authorized by the student to access his or her information ([II.C.78](#), [II.C.76](#)). Documents must be submitted in person and with proper government issued identification to verify identity.

FERPA resources are also provided to the college community. While the Office of Admissions and Records staff receive regular FERPA training and updates. FERPA trainings for all Student Services staff is also provided each semester. Other college staff and faculty are Informed of FERPA requirements through Flex Week presentations at the start of each semester, and in the annual Faculty Manual issued by the Office of Instruction. Students are informed of their FERPA rights in the annually published college catalog and website. HIPPA records and Law Enforcement records are not covered by FERPA. Legal requests for records and subpoenas are processed by the designated Custodian of Records in the Office of Admissions and Records when received from the Office of the Vice Chancellor of Human Resources.

IVC recently implemented a new online discipline system, Advocate. With the new system, a staff member, faculty or student can submit a discipline referral form online. The system will be available to the student, faculty, staff, and public 24 hours a day/ 7 days a week. All discipline reports will be maintained in this database and kept confidential. A link to the referral form can be found on the IVC website. Once submitted, an email to the campus discipline officer is generated. The referral is then processed and forwarded as necessary. If the system fails, individuals can still submit a paper or email referral. Advocate is web-based and the data is stored and backed up on Advocate's server off-site. Advocate was implemented campus-wide in spring 2016. A decision to use Advocate was made due to our relationship with adjacent UCs who also use Advocate.

Analysis and Evaluation

Irvine Valley College maintains records permanently, securely, and confidentially in accordance with federal and state laws, following district board policy. Security and backup procedures for electronic records are maintained by the information technology departments at both the campus and district. Irvine Valley College also follows federal and local policies for informing students of their privacy rights and the release of student records. Training for campus constituents on such policies is also available.

Plan

Based on an analysis of the evidence, Irvine Valley College is meeting this standard and will continue to monitor its progress. IVC plans to:

Objective/Action	Resources Needed	Responsible Party	Expected Completion Date
Offer additional training on FERPA policies including coordination with Human Resources to offer an online module on understanding the requirements of FERPA for new employees.	Identify an available product/module that the Office of Human Resources can purchase or use for new employee orientations and for current employees.	Office of Admissions and Records; Office of Human Resources	Fall 2017
Develop a data handling manual as a resource for college employees who manage student information, in conjunction with Saddleback College and District Services	Participation from constituent groups at Irvine Valley College and district-wide to produce a comprehensive manual.	To be determined	Spring 2018

Standard III: Resources

The institution effectively uses its human, physical, technology, and financial resources to achieve its mission and to improve academic quality and institutional effectiveness.

Accredited colleges in multi-college systems may be organized so that responsibility for resources, allocation of resources, and planning rests with the district/system. In such cases, the district/system is responsible for meeting the Standards, and an evaluation of its performance is reflected in the accredited status of the institution(s).

Standard III.A: Human Resources

Standard III.A.1 Human Resources

The institution assures the integrity and quality of its programs and services by employing administrators, faculty and staff who are qualified by appropriate education, training, and experience to provide and support these programs and services. Criteria, qualifications, and procedures for selection of personnel are clearly and publicly stated and address the needs of the institution in serving its student population. Job descriptions are directly related to institutional mission and goals and accurately reflect position duties, responsibilities, and authority.

Evidence of Meeting the Standard

The recruitment of highly qualified employees is essential to the educational mission of this institution. IVC administration and faculty work together to select highly qualified faculty members who are experts in the subject matter of their curriculum and can teach this subject matter effectively. IVC administration and faculty also work together to hire highly qualified counselors, librarians, and other instructional and student services faculty who can foster community college effectiveness and who are experts in the subject matter of their given specialty ([III.A.1](#)). In addition, the Chancellor and the College President—with input throughout this process from administration, faculty and staff—carry out their responsibility to select highly qualified administrators and managers and classified staff ([III.A.2](#), [III.A.3](#)). The College and its District have three comprehensive and rigorous policies governing the hiring of administrators and managers ([III.A.2](#)), faculty ([III.A.1](#), [III.A.4](#)), and classified staff ([III.A.3](#)).

The hiring criteria and qualifications for academic positions are identified by the California Community College Chancellor's Office (in consultation with the Academic Senate for the California Community Colleges), Minimum Qualifications for Faculty and Administrators (January 2012) ([III.A.5](#)). Departmental faculty, in consultation with the administration and

the Office of Human Resources (OHR), may set desirable qualifications based on specific programmatic needs as determined by the faculty discipline experts and the administration. This process ensures the qualifications for each position are commensurate with specific programmatic needs as determined by the faculty discipline experts, the administration, and the OHR. The minimum and desirable qualifications are clearly stated within the published position descriptions/job announcements. This process assures the maintenance of appropriate qualifications for faculty academic positions including faculty.

The qualifications for academic administrators and classified administrators/managers, classified positions, and police officers, are clearly stated in the governing board approved position descriptions. (SOCCCD Human Resources Classification and Compensation [III.A.6](#)). The hiring criteria, including minimum and desirable qualifications, for all positions are evaluated by the administration, faculty, and classified staff to ensure that the qualifications, education, training, and experience are clearly related to the institutional mission and goals, and accurately reflect the position duties, responsibilities, and authority.

Analysis and Evaluation

The College's hiring process is based on utilizing well-defined hiring criteria, faculty involvement, advertisement and verification processes which assure that administrators, faculty and staff are qualified by appropriate education, training, and experience to provide and support these programs and services.

IVC develops hiring criteria for faculty, administrators, managers and classified staff based on the governing board approved position descriptions through the recruitment processes outlined in the respective board policies. These policies call for special care to be taken to ensure accurate and job-related criteria are used when reviewing applicants. They further require that interview questions and other requirements be job-related and composed with the intent of evaluating the candidate's knowledge and abilities in relation to the minimum and desirable qualifications as published in the formal job announcement. The list of interview questions and other requirements must be approved by the hiring committee and by the Vice Chancellor of HR & Employer-Employee Relations or a designee.

For new classified management and administrator positions the District utilizes the service of a classification consultation, currently Marlys Grodt and Associates, to review the needs of the position and create an appropriate job description in accordance to the needs of the department and then ensure it articulates into the job structure within the District. In addition, a comprehensive district wide salary study and position description review was conducted by the same consultant for all classified managers and administrators in 2012.

For new classified bargaining unit classifications, the District utilizes a classification consultant determined by mutual agreement of the District and CSEA. The OHR works with

the corresponding manager and/or administrator to determine the minimum and desirable qualifications for the new classification (CSEA Contract [III.A.7](#)).

In accordance with AR 4011.1, (Recruitment: Full-time Faculty [III.A.1](#)) the faculty plays a primary role in the selection of faculty as mandated by California Education Code Section 87360. In order to attract the most qualified candidates, after a position has been identified and board approved all positions are advertised through the OHR. The College/District utilizes several publications on a general basis for this purpose, employing technology and effective advertising methods to ensure a large and diverse pool of applicants ([III.A.8](#)).

A number of faculty job descriptions include Distance Education (DE) expertise and experience as a desirable qualification. Schools and departments can decide if they wish to teach DE ([III.A.8.2](#)). IVC has not formulated specific, unique selection criteria in the field of DE. Determinations of appropriate qualifications in the field of DE are conducted through the regular hiring process including the job posting, application review, interviews and reference check processes. As is the case of typical hiring processes, it is the role of a hiring committee to determine whether questions and/or a teaching demonstration related to teaching a DE course should be included in the interview process. The *IVC Distance Education Handbook* provides a powerful resource to assist a hiring committee in formulating questions and/or teaching demonstration related to a DE course (IVC DE Handbook [III.A.9](#)).

The College is in the process of formalizing its part-time faculty hiring process, as documented ([III.A.10](#)). Under this process, applicants for part-time faculty employment are required to complete an online application form. The applications are screened for completeness and for minimum qualifications by the OHR first and then the chair, or designee, of the corresponding department with full-time faculty members of the committee screen and review applications forwarded by the OHR, giving full consideration to the special needs of the department/school or program and the student populations to be served.

The method used to update administrators/managers and classified position descriptions, including required and desirable qualifications, are normally initiated by the respective manager or administrator who works with the respective Executive at the college, the college president and the OHR to submit the requested change to the Board of Trustees for approval. The analysis and discussions leading the institution to agree on specific programmatic needs may vary. For faculty positions, discussion takes place at the school level and proposed revisions go through the Academic Senate. For administrators/managers and classified positions, discussions and analyses occur within the respective department, in conjunction with management, the respective vice president and the college president.

To assure that hiring procedures are consistently applied, the Chancellor and College presidents are made responsible for the application of hiring procedures as established by Board policies ([III.A.11](#)). In order to verify the qualifications of applicants and newly hired personnel, commensurate with Board policies, the District reviews the background of all

candidates prior to the submission of the recommended candidates to the College president for second-level interviews ([III.A.12](#)).

The College meets the standard.

Standard III.A.2 Human Resources

Faculty qualifications include knowledge of the subject matter and requisite skills for the service to be performed. Factors of qualification include appropriate degrees, professional experience, discipline expertise, level of assignment, teaching skills, scholarly activities, and potential to contribute to the mission of the institution. Faculty job descriptions include development and review of curriculum as well as assessment of learning.

Evidence of Meeting the Standard

Faculty job descriptions include development and review of curriculum as well as assessment of learning as specified in the Administrative Regulation 4011.1 (page 4) under the heading, “Job Announcement Development” ([III.A.13](#)).

The college ensures that the faculty selected for hire have adequate and appropriate knowledge of their subject matter by thoroughly engaging discipline experts throughout the hiring process. Administrative regulation 4011.1, Recruitment: Full-time Faculty provides that no fewer than three members of a faculty hiring committee shall be experts in the academic discipline of the recruited position and may be drawn from district faculty or staff, or from external sources ([III.A.14](#)).

In order to evaluate and judge effective teaching in the hiring processes, each applicant receives an independent evaluation of his/her scholarly accomplishments, curriculum vitae, and/or portfolio according to job-related criteria as a part of the screening process pursuant to AR 4011.1 (Recruitment: Full-Time Faculty Hiring [III.A.15](#)).

The college identifies faculty expertise in DE instruction through the regular hiring process including the job posting, application review, interviews and reference check process. The hiring committee determines whether questions and/or a teaching demonstration related to teaching a DE course should be included in the interview process. The *IVC Distance Education Handbook* provides a powerful resource to assist a hiring committee in formulating questions and/or teaching demonstration related to a DE course. In addition, when appropriate, faculty are encouraged to take a Learning Management System (LMS) training course through the college’s technology services department before they can teach online or hybrid using the LMS.

Analysis and Evaluation

The college assures that faculty qualifications include the necessary knowledge and skills through engagement of discipline experts in the hiring faculty process, a comprehensive review of the background and experience of the applicants, and consideration of teaching demonstrations.

Analyses and discussions that have led the institution to determine the qualifications of faculty and staff involved in offering DE have taken place primarily at the Online Education Task Force (OETF) meetings. The Online Education Strategic Plan (approved in May 2016), addresses faculty and staff qualifications needed for online education ([III.A.16](#)). In addition, the *IVC Distance Education Handbook* provides definitions of, and a list of faculty best practices for, online and hybrid teaching for evaluative purposes of those individuals teaching online and hybrid courses (IVC DE Handbook [III.A.17](#)) and, the Faculty Performance Evaluation Criteria are designed to lead to improvement of job performance, institutional effectiveness, and the effectiveness of faculty in performing their classroom assignments and institutional responsibilities. The performance evaluation criteria include, among other things, demonstration of subject matter expertise. Numerous recent changes have been made to the faculty evaluations process, which both the faculty and administration view as positive; the revised process is found in the collective bargaining agreement under Article XVII: Faculty Evaluations. In addition, at this time, the District is working on developing and implementing a new evaluations form which both the Faculty Association and District believe will be forthcoming in the fall of 2016 (Performance Evaluation Review [III.A.18](#)). The faculty performance evaluation process is documented further in the response to Standard III.A.5, below.

The College meets the standard.

Standard III.A.3 Human Resources

Administrators and other employees responsible for educational programs and services possess qualifications necessary to perform duties required to sustain institutional effectiveness and academic quality.

Evidence of Meeting the Standard

Administrators and other employees responsible for educational programs and services possess qualifications necessary to perform duties required to sustain institutional effectiveness and academic quality based on the hiring process described under standard III.A.1 above. Post hiring, in order to ensure that the qualifications of administrators and other employees continue to be appropriate to perform duties required to sustain institutional effectiveness and academic quality, the institution uses rigorous performance evaluation

processes as documented in standard III.A.5. In addition, the College employs a rigorous professional development program as documented in section III.A.14.

Analysis and Evaluation

The well-defined and managed hiring process coupled with highly rated academic administrators and other employees with responsibilities in educational programs and services ensure the possession of qualifications necessary to perform duties required to sustain institutional effectiveness and academic quality.

The College community's perception of IVC administrators' qualifications has been reflected in the 2015 IVC Employee Survey ([III.A.19](#)), where 63 percent of respondents (excluding those who picked don't know/NA) agreed that "IVC administrators and managers usually make decisions that are fair," and 73 percent of respondents agreed that "the administration at IVC provides effective leadership that supports the college's mission."

The College meets the standard.

Standard III.A.4 Human Resources

Required degrees held by faculty, administrators and other employees are from institutions accredited by recognized U.S. accrediting agencies. Degrees from non-U.S. institutions are recognized only if equivalence has been established.

Evidence of Meeting the Standard

Required degrees held by faculty, administrators and other employees at IVC, including those involved in offering DE courses, are from institutions accredited by recognized U.S. accrediting agencies. Degrees from non-U.S. institutions are recognized only if equivalence has been established. Prior to the commencement of employment, physical testing and background checks, as required for the positions, are conducted by the OHR or the College. The selected applicant must provide official transcripts which are verified by the OHR to confirm education, experience, and initial salary placement. The process for obtaining an equivalency for degrees from non-United States institutions is listed on all postings of full-time and part-time faculty positions ([III.A.20](#)).

In addition, the faculty position hiring process requires applicants to confirm that all degrees have been earned from a U.S. accredited college or university and that any non-U.S. transcripts must include a certified evaluation with translation (e.g. NACES agency: www.naces.org) by the recruitment closing date; if not submitted, the application is considered incomplete.

Analysis and Evaluation

To date, the District's hiring policies and processes have yielded highly qualified employees due to the consistent implementation of the following procedures: Clear criteria and minimum and desirable qualifications are provided in job announcements/position descriptions for all personnel (as described under section III.A.1). As changes occur within the College, all positions are re-evaluated to ensure institutional effectiveness. A formal process for re-evaluation of classified staff positions is identified in the collective bargaining agreement with CSEA under Article 8: Pay and Allowances ([III.A.7](#)). This process is conducted once every five years. Classified staff employees as well as managers and administrators may also have their classified staff positions reviewed by request. A reclassification study was completed for all members of the District Administrator and Manager group in 2012. Finally, the College/District utilizes technology and effective advertising methods to ensure a large and diverse pool of applicants.

The College meets the standard.

Standard III.A.5 Human Resources

The institution assures the effectiveness of its human resources by evaluating all personnel systematically and at stated intervals. The institution establishes written criteria for evaluating all personnel, including performance of assigned duties and participation in institutional responsibilities and other activities appropriate to their expertise. Evaluation processes seek to assess effectiveness of personnel and encourage improvement. Actions taken following evaluations are formal, timely, and documented.

Evidence of Meeting the Standard

In order to ensure there are appropriate institutional responsibilities for personnel participation and evaluations lead to institutional improvement, all employee units are evaluated systematically and at stated intervals. The College/District has established written criteria for evaluating all personnel, including the performance of assigned duties and participation in institutional responsibilities and other activities appropriate to their expertise.

Faculty evaluation procedures and the Faculty Performance Evaluation Review are negotiated by the South Orange County Community College Faculty Association and the South Orange County Board of Trustees within the collective bargaining process. Article XVII of the 2015-2018 Academic Employee Master Agreement ([III.A.21](#)) governs faculty performance review and evaluations ([III.A.22](#)).

The purpose of the evaluation process for tenured and part-time faculty is "to improve the teaching/learning process and delivery of student services," and "to provide a basis for

professional growth and development.” (section II. “Tenured Faculty Evaluation” of the Master Agreement). The evaluation consists of student evaluations (arranged through the appropriate vice president’s office) and a scheduled administrative review of the classroom/worksite/electronic visitation. Each evaluation may include information relevant to the instructional duties assigned to the faculty member, including participation in curriculum development and review, and in development and assessment of student learning outcomes. Tenured faculty are evaluated every three years and part-time faculty are evaluated during the first semester of their assignments and subsequent evaluations occur every sixth semester during which an instructional assignment is held, and no fewer than once every four years. In order to ensure that evaluations lead to improvement of job performance, a plan of action is developed for faculty members receiving an overall rating of “unsatisfactory.” All recommended improvement(s) are included in the plan of action, including the details(s) of activity for enhancement(s), date(s) of completion for each activity, and acceptable material(s) which document the completion of the activity ([III.A.21](#)).

In accordance with Board Policy 4090 ([III.A.23](#)), both administrators and classified management are evaluated twice the first year and annually thereafter. Performance evaluations of academic administrators and classified management personnel are completed by the immediate supervisor using established procedures and forms developed under the direction of the Chancellor ([III.A.24](#)).

In accordance with the CSEA contract ([III.A.7](#)), each permanent classified employee receives a written evaluation at least once every two years. New employees are on probation for twelve working months and are evaluated once during the initial six months of employment and again prior to the end of the probationary period ([III.A.25](#)).

Analysis and Evaluation

At Irvine Valley College, personnel evaluations are connected and lead to institutional effectiveness and improvement. Each position is designed to contribute toward reaching the goal of the respective program or administrative unit which in turn contributes toward reaching the goals, objectives and mission of the College. Performance evaluations provide the vehicle for the College to ensure those goals and objectives are reached in an effective manner to achieve institutional improvement. The Faculty Performance Evaluation Criteria are designed to lead to improvement of job performance, institutional effectiveness, and the effectiveness of faculty in performing their classroom assignments and institutional responsibilities ([III.A.26](#)). Examples of evaluative criteria that lead directly or indirectly to increased institutional effectiveness and improvement are: a) for classified staff: job knowledge; judgment; quality of work; planning and organizing; adaptability and flexibility; attempts to improve; b) for administrators and classified managers: managing people and resources; problem solving/decision making; strategic planning and organization; communications; quality; leadership; teamwork and service focus; c) for faculty: participation in professional development; demonstration of subject matter expertise; student

learning activities, student learning outcomes, and methods of evaluation within the course syllabus; demonstration of effective preparation for lectures and/or laboratory sessions; demonstration of effective methods of instruction and effective use of instructional technology.

The evaluation criteria of classified staff, administration and classified leadership, and faculty, including those performing their duties related to DE/CE activities, are designed to measure the effectiveness of personnel in performing their duties. Although a different rating scale is used for each employee group, the evaluation criteria for each group include effectiveness as a part of the process ([III.A.27](#)).

The faculty evaluation process identifies areas for improvement of duties related to DE/CE activities to the extent that the course(s) being taught by the corresponding faculty is online or hybrid. Although the evaluation process does not proactively identify the faculty's future interest in this field or need for development, the faculty professional development process, as documented in section III.A.14, encourages these areas.

According to the 2015 Employee Survey ([III.A.19](#)), 64 percent of respondents (excluding those who selected Don't Know/NA) agreed that job performance evaluations are conducted systematically at regular intervals. In addition, 72 percent of respondents (excluding those who selected Don't Know/NA) agreed that job performance evaluations encourage improvement.

The College meets the standard.

Standard III.A.6 Human Resources

The evaluation of faculty, academic administrators, and other personnel directly responsible for student learning includes, as a component of that evaluation, consideration of how these employees use the results of the assessment of learning outcomes to improve teaching and learning.

Evidence of Meeting the Standard

The faculty evaluation procedures and the Faculty Performance Evaluation Review are negotiated by the South Orange County Community College Faculty Association and the South Orange County Board of Trustees within the collective bargaining process. Article XVII of the 2015-2018 Academic Employee Master Agreement governs faculty performance review and evaluations. Since 2007 the Master Agreement has included the evaluation of probationary, tenured and part-time faculty to include verified and documented information regarding participation in curriculum development and review, and in development and assessment of student learning outcomes ([III.A.21](#)).

Analysis and Evaluation

Faculty work together to assess Student Learning Outcomes (SLOs) in both face to face and DE/CE courses every year. Results of the SLOs are discussed at both the department and school level in conjunction with the academic chair and school dean in order to make adjustments to teaching strategies to improve student learning.

At the school/departmental level meetings, faculty discuss the results of the SLO assessments and plans are made by updating the program review as well as requesting additional resources to improve their programs, including DE.

The College meets the standard.

Standard III.A.7 Human Resources

The institution maintains a sufficient number of qualified faculty, which includes full-time faculty and may include part-time and adjunct faculty, to assure the fulfillment of faculty responsibilities essential to the quality of educational programs and services to achieve institutional mission and purposes.

Evidence of Meeting the Standard

In order to maintain a sufficient number of qualified faculty with full-time responsibility to the institution, the Academic Senate and the administration have developed and implemented the IVC Full-time Faculty Hiring Priority List Development Process ([III.A.28](#)). The full-time faculty priority list is developed annually in the spring by the Academic Senate in collaboration with the college president and vice presidents ([III.A.29](#)).

In order to establish a final priority list which reflects the programmatic needs of the academic schools, positions are rotated from category 1 to category 2 to category 3. In accordance with the process, the final priority list is forwarded to the college president for final disposition and subsequently to the Board of Trustees for approval, pending funding. The ultimate decision regarding how many faculty positions to fill at Irvine Valley College and Saddleback College is determined by the college presidents, the Chancellor, and the Board of Trustees. The minimum number of funded faculty positions is based on the District Full-Time Faculty Obligation Number set by the California Community College Systems Office, and California Education Code §84362(d).

Based upon funding, the District Full-Time Faculty Obligation Number set by the California Community College Systems Office, and California Education Code §84362, with the approval of the college president, the Chancellor, and the Board of Trustees, the College hired 15 faculty positions in 2014-15, 6 faculty positions in 2015-16, and 13 faculty positions

in 2016-17.

The district wide Faculty Obligation Number (FON) calculations for the most recent 3 years are below ([III.A.30](#)).

- Fall 2016 – Actual P-2 and Compliance Final number were equal at 376.8
- Fall 2015 – Actual P-2: 398.8 which was higher than the Compliance Final number: 366.8
- Fall 2014 - Actual P-2 and Compliance Final number were equal at 353.8

The district wide 50% Law calculations for the most recent 3 years were 2015-16 in 53.32 percent, 2014-15 in 51.89 percent, 2013-14 in 51.45 percent.

The institution determines appropriate staffing levels for each program and service, including those involved in the offering of programs and courses in DE/CE mode, utilizing the Faculty Hiring Priority List Development Process. As noted above, this process considers, among other factors, Academic Senate recommendations based on department and program needs (category or tier 2) which contains positions determined necessary by the Academic Senate to maximize the full-time/part-time staffing ratio in each department or program identified in the program review process. In addition, the Office of Instruction recommendations include positions based on programmatic need of an existing program, expansion of an existing program and/or service due to demand, or addition of a new program and/or service.

Classified staffing levels for each program and service, including those involved in the offering of programs and courses in DE/CE mode, are determined utilizing the Classified Hiring Priority List Development Process, as documented in section III.A.9.

College wide analyses and discussions that have led the institution to determine the organization of administrative and support staffing for DE/CE mode have taken place primarily at the Online Education Task Force meetings ([III.A.31](#)).

Analysis and Evaluation

According to the 2015 IVC Employee Survey, 78 percent of full-time faculty members and college administrators who answered the survey were either “very familiar” (41%) or “somewhat familiar” (38%) with the Full-Time Faculty Hiring Priority List Development Process. In addition, of those who were at least “a little familiar” with the Full-Time Faculty Hiring Priority List Development Process, 61 percent considered the process either “very effective” (11%) or “somewhat effective” (51%) (2015 Employee Satisfaction Survey Results: Administrators ([III.A.32](#)), FT Faculty ([III.A.33](#)))

The number and organization of the institution’s personnel work quite effectively to support its DE programs. Over the past five terms an average of 73 percent of students who took an

online class rated the experience as “positive” or “very positive.” In spring 2016 the percentage rating the experience as “positive” or “very positive” reached 80 percent. (spring 2014 ([III.A.34](#)), fall 2014 ([III.A.35](#)), spring 2015 ([III.A.36](#)), fall 2015 ([III.A.37](#)), spring 2016 ([III.A.38](#))). The College Online Education Strategic Plan delineates strategic goals and objectives to further enhance student experience and promote student success through online education ([III.A.39](#)).

The College maintains sufficient number of qualified faculty to assure the fulfillment of faculty responsibilities. The Faculty Hiring Priority List Development Process assures the staffing levels for each program and service are appropriate. The Faculty Obligation Number and 50% Law, among other factors, determine the minimum levels of faculty the College must maintain.

The College meets the standard.

Standard III.A.8 Human Resources

An institution with part time and adjunct faculty has employment policies and practices which provide for their orientation, oversight, evaluation, and professional development. The institution provides opportunities for integration of part time and adjunct faculty into the life of the institution.

Evidence of Meeting the Standard

Full-time faculty hiring criteria, policies, and procedures have been jointly developed and mutually agreed upon between the Board of Trustees and the Academic Senate, and approved by the Board. Policies and procedures for part-time faculty are similar to those for full-time faculty in many ways, however they are not as well documented as those for full-time faculty. Since a majority of the College courses are taught by part-time instructors, this area of instruction is a college priority. Part-time faculty orientations usually occur at school meetings during Faculty Professional Development Week and individually with the OHR and the department chair or office staff when faculty members pick up textbooks and course outlines.

All new faculty, including part-time and full-time faculty, receive a brief orientation to the college by the vice presidents of Instruction and Student Services (fall 2016 Faculty Professional Development [III.A.40](#) page 4). In addition, the *Faculty Toolkit* ([III.A.41](#)) contains a wealth of information for new faculty including part-time faculty who may not be familiar with the College processes and practices. The OHR has developed a special page called “Part-time Faculty's Assistant” ([III.A.42](#)), in order to provide relevant information at the District level. Lastly, part-time faculty are invited to attend full-time faculty department and school meetings.

Oversight and evaluation of part-time faculty is well-defined and is conducted in accordance with the 2015-2018 Academic Employee Master Agreement ([III.A.21](#) section III.A.5). These practices demonstrate that part-time and adjunct faculty meet the criteria of this Standard.

Part-time faculty have opportunities to participate in professional development activities. In addition to these professional development opportunities, the College has a long standing practice of including part-time faculty into the life of the campus by extending these employees invitations to campus-wide events and various functions.

Analysis and Evaluation

IVC has employment policies and practices which provide for part-time faculty orientation, oversight, evaluation, and professional development, as well as opportunities for integration of part time and adjunct faculty into the life of the institution.

As documented in Standard III.A.12, Table III.A-1: 2014 District-wide Climate Survey Results: Job Climate by Bargaining Unit and Length of Employment, 50 percent of part-time faculty agree that they have the opportunity to participate meaningfully in decisions at work which is a drastic improvement since 2010 when only 29 percent of part-time faculty agreed with that statement. In addition, 84 percent of part-time faculty agree that they are treated with respect, 70 percent of the respondents agree their work is appreciated, 67 percent of the part-time faculty agree they are able to participate in professional development and 57 percent of the respondents agree they have a strong sense of community at work.

The College meets the standard.

Standard III.A.9 Human Resources

The institution has a sufficient number of staff with appropriate qualifications to support the effective educational, technological, physical, and administrative operations of the institution.

Evidence of Meeting the Standard

The IVC Classified Hiring Priority List Development Process (CHPLD) ([III.A.43](#)) provides for the development of a classified hiring list within each school or department through collaboration of the administrator or manager and the departmental staff. Requests for new classified positions are submitted using the Resource Request Form. The form contains a comprehensive questionnaire aimed to assess the urgency of the position being requested ([III.A.44](#)). The list is reviewed and ranked by The Classified Priority List Development Task Force which makes recommendations to SPAC, which in turn makes final recommendations to the College president. This process ensures the College hires a sufficient number of the

most critical staff to support the effective operations of the College, in a fiscally limited environment,

The appropriateness of qualifications of support staff is determined through the hiring process, (as documented in section III.A.1), performance evaluation, (as documented in section III.A.5), and professional development processes, (as documented in section III.A.14).

Analysis and Evaluation

The institution has a sufficient number of staff with appropriate qualifications to support the effective educational, technological, physical, and administrative operations of the institution. According to the 2015 Employee Satisfaction Survey, 37 percent of employee respondents were either “very familiar” (17%) or “somewhat familiar” (20%) with the Classified Hiring Priority List Development Process. Of those respondents who were at least “A little familiar” with the Classified Hiring Priority List Development Process, 48 percent considered the process either “very effective” (8%) or “somewhat effective” (40%) ([III.A.19](#)).

The College meets the standard.

Standard III.A.10 Human Resources

The institution maintains a sufficient number of administrators with appropriate preparation and expertise to provide continuity and effective administrative leadership and services that support the institution’s mission and purposes.

Evidence of Meeting the Standard

In September 2015, the Board of Trustees were presented information on administrative levels at Saddleback College, Irvine Valley College and District Services in comparison to similar multi-college districts. The District hires several different categories of employees. The California Community College Chancellor’s Office defines four broad employee categories: Educational Administrators; Academic Tenure/Tenure Track; Academic Temporary; and Classified. The report contained an exhibit obtained from the California Community College Chancellor Office’s comparing the proportion of educational administrators at South Orange County Community College District to the proportion of educational administrators at the other twenty-six (26) multi-campus districts ([III.A.45](#)). Educational administrators at multi-campus districts account for between 1.53% and 5.71% of each district’s total employee count. Statewide, educational administrators make up 2.37% of the total employee count, with a median of 2.24%. At SOCCCD, educational

administrators make up 1.99% of the total employee count, the eighth lowest percentage in California.

Analysis and Evaluation

To ensure that the College maintains sufficient levels of administrator/manager positions in support of its mission, the following positions have been added since 2009: Dean of Social and Behavioral Sciences, two Construction Managers/Assistant Director of Facilities, Capital Projects, Assistant Director of Marketing and Creative Services, Assistant Director of Foundation, Director of Student Success and Support Program, and Outreach Director.

Presently, there are no state requirements and/or formula which assist colleges in determining the appropriate number of administrative staffing ratios. The College evaluates the effectiveness, number and organization of personnel through the analysis of available funding and requested human resources through the resource request process, in coordination with development of the Faculty and Classified Staff Priority List Development processes. This coordination is essential due to the limited resources available for ongoing commitments. The appropriate number, qualifications and organization of administrators are determined through workload assessment based on programmatic needs including those stemming from new/expanded categorical program requirements. The assessments are conducted by the immediate superior, and vice president and, ultimately, the College president. In addition, a consultant assists the District with the process of establishing new positions and the reassessment of existing positions. The consultant works with the OHR department and the appropriate dean/director or vice president to determine the qualifications of the positions and organizational structure. The new positions go through various vetting processes at the College, depending on the nature of the change.

The College meets the standard.

Standard III.A.11 Human Resources

The institution establishes, publishes, and adheres to written personnel policies and procedures that are available for information and review. Such policies and procedures are fair and equitably and consistently administered.

Evidence of Meeting the Standard

The District has established numerous board policies and administrative regulations promoting equal opportunities in employment for all persons and prohibiting discrimination and harassment ([III.A.46](#)). For example, Board Policy 4011 (Section 3.) provides: “The South Orange County Community College District shall recruit, hire, and promote in all job titles without regard to ethnic group identification, race, color, religion, sex, national origin,

ancestry, physical or mental disability, age, medical condition, marital status, military service, sexual orientation, or any other basis protected by law. The District shall comply with the Board of Governors regulations relating to equal employment opportunity” ([III.A.2](#)). A Human Resource Specialist, the committee chair, or an Equal Employment Opportunity representative serves as a non-voting member of all hiring committees to ensure adherence to employee hiring procedures. In addition, the Human Resources Specialist conducts an initial orientation for hiring committee members during which all hiring committee members sign a conflict of interest and confidentiality statement per Board Policy 4011.2 ([III.A.47](#)).

All Board policies, including personnel policies, are publicized on the District website and members of the Board Policy and Administrative Regulation Advisory Council receive updated policies and regulations digitally. In addition, the OHR has conducted district services Road Tours explaining personnel policies ([III.A.48](#)). The vice chancellor of HR routinely attends managers’ meetings at IVC to explain these policies.

Analysis and Evaluation

As documented in Standard III.A.1, numerous board policies and administrative regulations exist to ensure personnel policies are consistently and equitably implemented to result in fair treatment of personnel. In the event of alleged violations, the faculty and classified collective bargaining agreements contain grievance procedures in order to ensure fair treatment of personnel. In addition, the District conducts mandatory workshops regarding harassment and diversity annually.

The District has established numerous written board policies and administrative regulations regarding personnel matters. The Board Policy and Administrative Regulation Advisory Council (BPARAC), as a district wide participatory governance committee, reviews and makes recommendations regarding all board policies and regulations, including personnel policies ([III.A.49](#)). These policies are strictly enforced, assuring a fair and equitable treatment of personnel.

The College meets the standard.

Standard III.A.12 Human Resources

Through its policies and practices, the institution creates and maintains appropriate programs, practices, and services that support its diverse personnel. The institution regularly assesses its record in employment equity and diversity consistent with its mission.

Evidence of Meeting the Standard

Board policy 4010 (Commitment to Diversity) clearly indicates the District's commitment to employing qualified people who are "dedicated to student success" in an "academic environment" of "cultural awareness" and diversity ([III.A.50](#)).

More specifically, Irvine Valley College remains committed to creating an environment which fosters an appreciation of equity and diversity. According to the College Mission Statement, "[T]he College is devoted to student learning and success through exemplary and integrated teaching and support services, effective stewardship, and continued accessibility in a diverse community."

The institution assures the effectiveness of its policies and practices regarding equity and diversity through consistent application of those policies and practices. Administrators and classified managers have diversity as one of their performance evaluation criteria. Recognizing the importance of diversity, the district services retains a position of Director, Human Resources, Employer/Employee Relations, EEO, Diversity Compliance & Training, responsible for developing and coordinating recruitment and retention of faculty and staff, employee diversity programs, and sexual harassment and discrimination prevention programs.

The College and the District remain committed to providing opportunities for all employees to increase their awareness and appreciation of issues of equity and diversity. As documented in Standard III.A.1 and in Standard III.A.5, Board Policies and College and District practices have been established to ensure sensitivity to diversity and equal employment opportunities. All administrative, classified manager, faculty, and classified staff interview questions during hiring contain a "sensitivity to diversity" category which requires all applicants to explain their experience in dealing with people of diverse backgrounds. In addition, all employees are required to attend regular training sessions in recognizing and preventing all forms of harassment, including sexual harassment ([III.A.51](#), [III.A.52](#)).

Moreover, the College adopted a diversity requirement for the Associate of Arts degree and the Associate of Science degree. The College offers a variety of courses to fulfill this requirement including courses in Anthropology, Art, Dance, Geography, History, Humanities, Human Development, Japanese, Literature, Management, Music, Political Science, Sign Language, Sociology, and Communication Studies and Global Studies. (College 2016-17 catalog [III.A.53](#))

The District has written policies and procedures ensuring fairness in all employment procedures, as indicated above. A Human Resource Specialist, or another EEO representative ([III.A.54](#)), serves as a non-voting member of all hiring committees to ensure adherence to employee hiring procedures. In addition, the Human Resources Specialist conducts an initial orientation for hiring committee members. All hiring committee members sign a conflict of interest and confidentiality statement per Board Policy 4011.2 (Confidentiality and Conflicts in Hiring [III.A.2](#)).

The OHR has coordinated the development of a District Wide Equal Employment Opportunity Committee that created the SOCCCD Equal Employment Opportunity Plan ([III.A.55](#)).

Annually, the District reviews all employment records through the submission of the Management Information System Report to the State Chancellor's office as well as the Equal Opportunity 1 Record. These reports provide a detailed breakdown of all employees for many purposes, including supporting diversity of personnel.

As documented in Standard III.A.11, the District has established policies and procedures, including hiring policies, and employee master agreements, regarding the treatment of all personnel in support of diversity ([III.A.56](#)).

Analysis and Evaluation

The institution's policies and practices in promoting understanding of equity and diversity issues are effective. The institution assesses the effectiveness of these policies and practices through surveys. Irvine Valley College employees who responded to the 2015 Employee Survey ([III.A.19](#)) were notably positive when assessing the College's efforts in promoting a diverse employee and student community. Specifically, significantly large majorities of employees agreed that "Irvine Valley College promotes employee diversity" (85%), "Irvine Valley College promotes student diversity" (87%), and "Employees promote the development of a diverse educational and cultural campus environment" (86%). Furthermore, there were no significant differences in opinions based on bargaining units. Based on the survey data, the College's policies and practices are effective in promoting understanding of equity and diversity.

In addition, individual programs, practices, and services are evaluated on a regular basis through participant feedback and surveys and the information received used to improve future presentations. As an example, attendees of the Cultural Competence Summit (CCS) were asked to complete overall evaluations of the summit in general as well as of the individual speakers. A total of 75 attendees (27.3% of all attendees) completed overall evaluations of the summit. Attendees had overwhelmingly positive feedback about the CCS, giving it an average score of 4.0 out of 4. All three speakers received highly positive feedback as well (detailed below). The organization of the conference received high ratings,

with every aspect of the organization of the conference receiving a rating of at least a 3.9 out of 4 ([III.A.57](#)).

In the fall 2014 Professional Development Survey all employees were asked about their interest in working with diverse students. Seventy-two percent of employees were most interested in increasing their awareness about various cultures, and 71 percent were most interested in working with students with disabilities.

The institution determines what kinds of support its personnel need through other various means. The Director of Human Resources, Employer/Employee Relations, EEO, Diversity Compliance & Training coordinates diversity programs and provide advice and support to the College staff as needed. College administrators, including vice presidents and the College president, maintain an open-door policy for all employees of the College. For example, in 2015-16 the vice president of College Administrative Services met with the College custodial staff one-on-one to address their concerns relative to personnel issues within the department. The staff expressed their appreciation for having the opportunity to communicate their concerns to the administration ([III.A.58](#)).

Through its policies and practices, the institution creates and maintains appropriate programs, practices, and services that support its diverse personnel. The Board Policies, administrative regulations, Employee Grievance Procedures, and Student Complaint Procedures provide a sound framework to ensure the fair treatment of personnel and students. Grievances and/or complaints are investigated in a timely manner in order to ensure integrity in the treatment of personnel and students. Within the 2014 District wide Climate Survey respondents were asked several questions that indirectly measure employees' perception of their job climate, including whether or not they believed they have been treated with respect and whether or not they feel their work is appreciated. The table below illustrates that, in general, full-time faculty tended to feel they have more access to professional development, have a greater opportunity to participate meaningfully in decisions at work, and have a stronger sense of community than do part-time faculty or classified staff. Part-time faculty, on the other hand, were more likely to report they were treated with respect than were full-time faculty or classified staff. It is noteworthy that the part-time faculty responses have improved significantly since 2010 relative to their opportunities in participating in decision-making (from 29% to 50%) and whether they are treated with respect (53% to 84%). Full-time and part-time faculty had similar levels of feeling their work is appreciated, and both faculty groups were more likely to feel this way than were classified staff. The table also shows that newer employees (<11 years) were more likely to feel that they are appreciated, that they are treated with respect, that they could participate meaningfully in decisions at work, and that they experienced a stronger sense of community at work than were longer tenured employees (11+ years).

Table III.A-1: 2014 District wide Climate Survey Results: Job Climate by Bargaining Unit and Length of Employment

Item	Full-Time Faculty (n=90)	Part-time Faculty (n=87)	Classified (n=77)	<11 years (n=166)	11+ years (n=88)	Total (n=254)
I have the opportunity to participate meaningfully in decisions at work.	68%	50%	56%	64%	48%	59%
I am treated with respect.	77%	84%	65%	81%	65%	76%
I am able to participate in professional development opportunities I am interested in.	83%	67%	46%	66%	68%	67%
I feel we have a strong sense of community at work.	69%	57%	52%	63%	54%	60%
I feel my work is appreciated.	68%	70%	46%	74%	56%	67%

The College meets the standard.

Standard III.A.13 Human Resources

The institution upholds a written code of professional ethics for all of its personnel, including consequences for violation.

Evidence of Meeting the Standard

In order to foster ethical behavior in employees, numerous board policies and administrative regulations are in place which reference and encourage ethical behavior in all personnel, as well as members of the Board of Trustees, in all areas of professional conduct such as Non-Discrimination-Equal Opportunity, Electronic Communications, Prohibition of Workplace Violence, Employment of Relatives, Prohibition of Harassment and Discrimination as well as Whistleblower Protection.

In addition to the above board policies and administrative regulations, Board Policies governing the hiring of administrators and managers (BP 4011 [III.A.47](#)), faculty (BP 4011.1 [III.A.1](#)), (AR 4011.1 [III.A.4](#)), and classified staff (BP 4011.3 [III.A.3](#)), delineate the inherent

professional responsibility of administrators, managers, faculty, classified staff, and members of the Board of Trustees to ensure the integrity of the hiring processes and compliance with federal and state statutes relating to equal employment opportunities. Board Policy 4011.2 (Confidentiality and Conflicts in Hiring [III.A.2](#)) ensures confidentiality in hiring and prohibits personnel from participating in the hiring process in the event of a conflict of interest.

Analysis and Evaluation

The institution does not have one standardized written code of ethics for all personnel. However, the administration and the Board of Trustees have written codes of ethics, and numerous board policies contain written statements of professional and ethical conduct pertaining to all employees. Further, faculty professional conduct is governed by the Academic Employee Master Agreement ([III.A.21](#)) Section XXIII (disciplinary actions) and the California Education Code. Classified staff professional conduct is governed by the California School Employees Association Contract ([III.A.7](#)), Article 15, (disciplinary actions).

The College meets the standard.

Standard III.A.14 Human Resources

The institution plans for and provides all personnel with appropriate opportunities for continued professional development, consistent with the institutional mission and based on evolving pedagogy, technology, learning needs. The institution systematically evaluates professional development programs and uses the results of these evaluations as the basis for improvement.

Evidence of Meeting the Standard

The College has supported and continues to support professional development activities for College faculty, classified staff, and classified managers and administrators which are consistent with the Mission and designed to meet the needs of personnel.

Pursuant to the 2015-2018 Academic Employee Master Agreement ([III.A.21](#)), faculty are required to meet a 38-hour contractual obligation for professional development. In order to assist faculty in meeting this obligation, workshops are held during the first week of the fall and spring semesters and are designed to enhance teaching and student learning as well as train personnel with regards to instructional technology. Professional Development workshops are also offered throughout the academic year. Classified staff are invited to attend the workshops with the permission of their supervisor ([III.A.59](#), [III.A.40](#)).

Classified staff schedule workshops and half-day retreats designed to provide opportunities for professional development consistent with the institutional mission (IVC Classified Senate Professional Development Summit [III.A.60](#)); classified staff are also invited to attend the workshops designed for academic faculty, with the permission of their supervisor.

Additionally, the College has provided funding for participation in professional conferences for faculty, classified staff, and administrators from the college general fund; indeed, the funding has routinely been available in the absence of state funding. Faculty and administrators are allocated funds to attend professional conferences related to teaching and student learning, curriculum development, discipline specific conferences, student learning outcomes assessment, accreditation, and instructional technology training. Classified staff were awarded professional development funding through two different channels: 1) each area vice president and the College president receive an allocation of funds based on the number of classified employees in their respective areas; 2) the Classified Senate receives a separate allocation managed by the Classified Staff Development Committee.

Article XVI of the 2015-2018 Academic Employee Master Agreement ([III.A.21](#)) provides funding for semester or year-long sabbatical leaves. Sabbatical leave proposals are evaluated and approved by the District Sabbatical Leave Committee ([III.A.61](#)).

In addition to the Annual District New Faculty Orientation ([III.A.62](#)), the College holds monthly New Faculty Orientation Workshops (open to all faculty) designed to provide faculty with the opportunity to discuss teaching and student learning, information regarding contractual obligations, board policies and administrative regulations, and college committee and decision-making processes. Numerous technology training workshops are provided throughout the year for all employees.

The Academic Senate holds a Distinguished Academic Lecture Series (DALs). During the 2015-2016 academic year, the Senate sponsored three presenters: Michelle Evans, Norman Stolzoff, and Nathan DeWall.

Analysis and Evaluation

The institution identifies professional development needs of its faculty and other personnel through surveys and various assessments. The 2014 Professional Development Survey was administered to all employees via an e-mail invitation at the end of the spring 2014 semester. A total of 97 employees responded to the survey, yielding a response rate of 19 percent. The largest group of respondents was classified staff, followed by full-time faculty ([III.A.58](#)). The process utilized to identify professional development needs for faculty has been managed by the Academic Affairs Committee where the activities that occur during Flex Week are discussed and arranged based on the responses to the evaluation forms and the variety of conferences that the individual committee members attend during the year. The need for classified professional development can be identified through employee self-assessment or

through the assessment of their immediate supervisor, and the need is addressed utilizing funds allocated to Classified Senate or the respective vice president's area.

The processes to ensure that professional development opportunities address those needs is based on a meaningful evaluation of professional development activities. The Office of Research conducts a follow-up survey after each Flex Week. Additionally, within the required application for faculty professional development funds, there are questions that pertain to the 9 categories that are approved by the state. There are also brief descriptions that must be filled out as to how the event under consideration will pertain to their job duties and what outcomes they will get from attending.

The impact of faculty professional development activities on the institution is assessed through the Academic Affairs Committee which coordinates faculty professional development activities and provides insight to current trends and developments within our community. The committee members stay involved with their disciplines and return from conferences with up-to-date information. This information is disseminated to the faculty in a timely manner so it may be used immediately.

The College is committed to providing professional development opportunities for faculty, classified staff, and classified managers and administrators. This commitment is demonstrated through the allocation of college general funds in the absence of state funding and the resources provided by the College to meet the needs of its personnel. Faculty professional development resources and workshop planning is administered through the Academic Affairs Committee ([III.A.63](#)).

The College meets the standard.

Standard III.A.15 Human Resources

The institution makes provision for the security and confidentiality of personnel records. Each employee has access to his/her personnel records in accordance with law.

Evidence of Meeting the Standard

Board Policy 4012 (Administrators and Classified Managers' Personnel Files ([III.A.64](#))) provides for the security and confidentiality of administrative and classified manager personnel records and ensures these individuals have access to their personnel records. Article XVIII (Personnel Files) of the 2015-2018 Academic Employee Master Agreement ([III.A.21](#)) contains the provisions for security and confidentiality of faculty personnel files as well as the procedures to provide for faculty access to their records.

Article 6 (Personnel Files) of the California School Employees Association Contract 2015-2018 governs the security, confidentiality and conditions for access to personnel records for classified employees ([III.A.7](#)).

Analysis and Evaluation

The College makes provision for the security and confidentiality of personnel records. Each employee has access to his/her personnel records in accordance with law. The OHR is committed to maintaining secure and confidential personnel files for all employees. The District adheres to the policies, contractual provisions, and State and Federal Statutes governing the management of employee personnel files. Only authorized personnel are given access to personnel records.

The College meets the standard.

Standard III.B: Physical Resources

Standard III.B.1 Physical Resources

The institution assures safe and sufficient physical resources at all locations where it offers courses, programs, and learning support services. They are constructed and maintained to assure access, safety, security, and a healthful learning and working environment.

Evidence of Meeting the Standard

Each of the four educational venues offered by IVC—the main campus, the Advanced Technology and Education Park (ATEP), the Early College Program (Beckman and El Toro high schools), and the Distance Education (DE) program—provide assurances for a safe, accessible, secure and healthful learning environment through planning, oversight and evaluation by the Facilities and Maintenance Operations (FMO) department with the District Facilities Planning department, college wide shared governance committees and task force groups, extensive safety training and illness prevention measures for college employees, and on-line surveys which gather valuable data from students, faculty and staff relating to overall College experience, facilities condition, health and safety, facilities' access, and general satisfaction.

In order to meet its obligations of maintaining a safe and healthful workplace within the College campus communities, the South Orange County Community College District (SOCCCD) has developed and implemented the Injury & Illness Prevention Program (IIPP), for which the Chancellor serves as Coordinator ([III.B.1](#)).

The Chancellor has designated the Vice Chancellor of Business Services and College presidents of Saddleback College and Irvine Valley College as IIPP Coordinators with site-specific responsibility for the IIPP. The Vice Chancellor and presidents are responsible for ensuring that District policies and practices are implemented, employees are provided a safe and healthful workplace, and operations are in compliance with the IIPP and applicable federal, state, and local regulations and standards.

To ensure the prescribed standards of prevention programs are upheld, IVC has formulated a wide network of planning and oversight measures to ensure all students and staff benefit from the highest quality in technology upgrades and physical resource planning, particularly in regard to safety and security. At the campus level the Director of Facilities, along with the Director of Technology and the Chief of Police, work alongside the Campus Safety Task Force to ensure the proper oversight and execution of all planning as it relates to safety and security. Building safety walks are conducted on a monthly basis ([III.B.2](#)), with the committee meeting quarterly ([III.B.3](#)). Deficiencies noted in the safety walks are addressed in one of two ways: 1) immediate concerns are addressed through the Maintenance Direct

Work Order System; 2) long-range and more costly repairs are addressed through the Resource Request process ([III.B.4](#)).

The College employs the services and oversight of various other departments, programs and services to help ensure access, safety, and security and provide a healthful learning and working environment:

- The Maintenance Direct Work Order System ([III.B.5](#))
- The Irvine Valley College Campus Safety Task Force (CSTF) ([III.B.3](#))
- District's Risk Management ([III.B.6](#))
- Campus Safety / Police Department ([III.B.7](#))
- Health, Safety, Security Annual Certifications ([III.B.8](#))
- Division of State Architect
- Custodial Services
- Additional off-site educational programs
- Online Education Strategic Plan ([III.B.9](#) May 16, 2016).
- The Online Education Task Force (OETF) ([III.B.10](#))

Analysis and Evaluation

The College meets local, state and federal guidelines for access, safety, security, construction codes/standards, and presents a healthful learning environment. The facilities are well-maintained and are inspected weekly to ensure compliance with College standards. The College utilizes appropriate oversight and feedback processes for determining deficiencies in any of these areas. If deficiencies are discovered, the College addresses the concern promptly to assure the College learning and working environment is safe, secure, healthful, and accessible. In order to improve access and ensure proper compliance with ADA codes and standards, the college has completed an ADA transition plan to identify all potential barriers to proper access of physical resources. Irvine Valley College and South Orange County Community College District is responsible for assuring that the ATEP, off-campus programs, and DE programs meet local, state and federal guidelines to ensure access, safety, security, and a healthful learning environment for students and staff.

The College meets the standard.

Standard III.B.2 Physical Resources

The institution plans, acquires or builds, maintains, and upgrades or replaces its physical resources, including facilities, equipment, land, and other assets, in a manner that assures effective utilization and the continuing quality necessary to support its programs and services and achieve its mission.

Evidence of Meeting the Standard

Irvine Valley College diligently pursues growth opportunities within its physical plant and is constantly expanding its reach of physical resources in order to meet the demands of a rapidly growing population throughout Southern California. The college currently occupies 85 acres of a 100 acre site and is actively pursuing the planning and development of the remaining 15 acres of the original property.

Student success is always at the forefront of capital improvement planning, and the College has been providing new and improved physical resources. IVC is in the process of planning and ground-breaking on several new projects and is currently seeing the culmination of construction on other significant new facilities ([III.B.11](#)).

Examples include:

- New Building Construction
- District-wide Parking Study
- Parking Lot / Solar Shade Structure

A prime example of an effective upgrade of current college resources that ensures continued support of programs and services is the exterior lighting retrofit:

As an energy-conscious public entity, IVC took steps toward achieving the realization of a long-standing goal to greatly reduce the College's energy consumption by committing to a complete exterior lighting retrofit ([III.B.12](#)). By July 2014 IVC had undertaken the ambitious task of converting the exterior lighting and lighting controls of the campus to energy-efficient LED lighting/controls throughout the parking lots, walkways and common areas. This improvement has now translated into valuable energy savings:

- Total savings in Kilowatt-Hours/Year: 400,000 kwh
- Year 1 Total Electricity Savings in dollars: \$53,000
- Year 1 Maintenance Savings in dollars: \$25,000

The college was able to offset the cost of the entire project by utilizing the state's energy savings incentives generated by Proposition 39. By capitalizing on these generous funds, IVC will realize an estimated total of \$800,000 of taxpayer savings in energy consumption/maintenance and an estimated savings of 4,000,000 Kilowatt-Hours of energy over the next decade. The College has diligently planned each new building with the LEED standards setting the mark for water conservation, healthier air quality and improved energy efficiency. Each new IVC building has achieved LEED Certification or at minimum, LEED 'equivalency' ratings.

In addition to meeting the needs and growth of the College through capital improvement, the campus community is committed to responsibly caring for and sustaining the natural resources surrounding the College. The College has formed an aggressive scheduled

maintenance plan and implemented measures to reduce potable water consumption and conserve energy ([III.B.13](#)).

Analysis and Evaluation

The College utilizes three main resources to ensure program and service needs determine equipment replacement and maintenance:

1) Resource Request Process ([III.B.14](#)) (See III.D.1)

The Resource Request Form submission process is an all-access, transparent process allowing members of College departments, programs and services the ability to evaluate and determine the need for maintenance of existing and/or replacement of outdated physical resources. As discussed elsewhere in this Accreditation report, resource requests follow the strategic planning process which evaluates existing conditions against the requested need.

2) Technology Advisory Task Force (TATF) ([III.B.15](#)) (See III.C.1)

The Technology Advisory Task Force advises the Director of Technology Services about priorities in deployment and assignment of technology. The committee evaluates the effectiveness of strategic planning initiatives, reviews new equipment requests, monitors ongoing requests, evaluates resource requests and reviews current tech-support issues. TATF reviews the latest education technologies with a focus on faculty and the success of College programs and services. TATF monitors and evaluates the progress and effectiveness of the Technology Plan ([III.B.16](#)) and makes appropriate recommendations concerning strategic planning for technology.

3) Maintenance Direct Work Order System ([III.B.5](#))

Maintenance Direct (School Dude) is an all-access work order system that provides an efficient vehicle for addressing any condition needing the attention of Facilities and Maintenance personnel for inspection, maintenance and possible replacement. The work order system ensures that programs and service needs are met in a timely and efficient manner as each work order is tracked and monitored through its completion; the submitter is contacted upon completion.

The College utilizes three main resources when evaluating facilities and equipment effectiveness in terms of meeting the needs to programs and services:

1) Campus-wide Surveys

College-wide surveys are conducted annually and provide the College with valuable data related to facilities and equipment effectiveness as well as the general condition of the campus. These targeted surveys help to ensure the College goals and standards are met. Survey results are examined for any

anomalies or large changes. Substantial declines in satisfaction lead to the development of objectives and/or strategies in the department's Administrative Unit Review. The resulting analysis determines a course of action depending on the magnitude of the repair, such that replacement or maintenance of equipment and facilities may include one or more of the following: 1) Vetting through shared governance groups and the College decision-making process as prescribed in the *Planning and Decision-Making Manual* (PDM); 2) Submission of a resource request to be vetted and rated through shared governance groups. 3) Submission of a Maintenance Direct (School Dude) work order.

2) Administrative Unit Reviews (AURs)

AURs ensure the College's student support, programs and administrative services are effective and responsive to the local college community within the limitations of available resources. Through a review of AUOs, key unit indicators, and unit objectives, the College may assess its effectiveness and continue to offer high quality student support, programs and administrative services. The results of AUR are incorporated into the strategic planning and resource allocation decision processes of the College and provide information for unit planning and improvement.

3) Facilities Planning: Facilities Director

Facilities Planning evaluates the effectiveness of the College's facilities and equipment in meeting the needs of programs and services by reviewing, evaluating and prioritizing all approved facilities-related resource requests. Existing equipment inventory and/or facilities' condition are reviewed and evaluated against information provided on the request form in order to provide accurate feedback to the submitter prior to the shared governance review.

To ensure that program and service needs determine equipment replacement and maintenance for DE for both online and the Early Education program, IVC utilizes the following resources:

Online Education Committee Oversight

The Online Education Task Force (OETF) ([III.B.17](#)) provides advice to the dean, Business Sciences, Online and Extended Education and the Director of Technology Services related to student success in online education, which includes online, hybrid courses, and web-enhanced courses. According to the Irvine Valley College Online Education Strategic Plan ([III.B.9](#)), updated spring 2016, the committee reviews and recommends approval of all policies, procedures and resources affecting online education. Planning, review, evaluation and oversight are performed by the OETF and must align with IVC's goals and objectives.

AUR/Resource Request

The OETF annually reviews its Administrative Unit Outcomes (AUOs), contained within the Administrative Unit Review (AUR), which summarizes the data related to IVC's online course offerings, including, but not limited to, student survey data and student demographics. The stated outcomes for the unit will produce strategies that may require additional resources or maintenance of existing equipment in order to accomplish the goals and outcomes. The OETF has the ability to enter a resource request into the system in order to fulfill an online education need as identified by review of the Administrative Objectives and resulting strategies. According to the OETF's *Administrative Unit Review: B4. Unit Effectiveness: Resources*, ([III.B.18](#) pg. 12) in order to meet a strategy for an AUO, a resource request entry is recommended to "retain video/audio capture of an instructor's classroom lecture with the goal of increasing interaction between the instructor and students when the lectures are later incorporated into distance education courses."

Surveys

Distance education student satisfaction survey replies can be relatively compared to the IVC Student Satisfaction Survey data which the College conducts every two years, as this survey is campus wide and includes students enrolled in all instructional modalities. Student satisfaction data for this portion of the AUR is derived from the Irvine Valley College Distance Education Student Survey, spring 2015 ([III.B.19](#)).

Early College Program

Early College oversight and planning responsibilities fall to the Early College Advisory Task Force ([III.B.20](#)), an advisory group under the Office of Instruction responsible for the planning, coordinating, and operational logistics of the program. Inspections of the off-site facilities and equipment are conducted by the dean and members of the Early College Advisory Task Force.

The College meets or exceeds its equipment needs for DE based on the survey results listed in the 2015 AUR for Distance Education ([III.B.18](#)): "The productivity for distance education courses were higher than classroom productivity for each of the five periods indicated in the survey." Indeed, the academic year 2015-2016 had the greatest classroom and DE combined productivity since the 2011-2012 academic year. DE courses show significantly higher productivity over the five years reviewed; DE productivity calculates to 578.60 of the review time period, whereas classroom productivity calculates to 485.20.

The facilities and technology evaluations in regard to equipment and the upgrades of existing equipment in the distance education programs are conducted by the Director of Facilities along with the Director of Technology in consultation with the OETF and the Technology Advisory Task Force (TATF). All resource requests related to OE equipment and upgrade/maintenance requests are submitted and reviewed within the shared governance process. Once evaluated and prioritized, they are reviewed by facilities and technology and

requests are implemented. To further ensure equipment needs are met, resource goals and objectives are identified in the IVC Online Education Strategic Plan ([III.B.9](#)), (updated spring 2016). Goals include the effective use and oversight of equipment needs and resources:

- Evaluate infrastructure needs for the online site and project the resources necessary to build that infrastructure.
- Involve the online site in provision of comprehensive educational programs that fulfill the District’s mission.
- Include disciplines and College services in the evaluation, planning, and budgeting processes for online education.
- Provide Academic Senate committees, Academic Senate Council, Department Chairs/Departments, the Office of Instruction, the Student Services Council, and the Board of Trustees with regular (e.g. annual) information on the status of online education at IVC.
- Provide supporting communication from the college back to the disciplines and college services.
- Integrate Online Education (e.g. offering courses, support services) at IVC into the College’s planning, decision-making, and budgeting processes.

Overall, the college meets this Standard as regular maintenance schedules have been developed and implemented for the College’s physical resources and equipment. The resource request process allows for a means of reacting to deficiencies noted within the surveys, as does the Maintenance Direct Work Order System. The *2015 Employee and Student Survey* results have provided positive data on the effectiveness of the facilities and equipment maintenance practices at IVC. This data allows the facilities and maintenance and technology services departments with the strategic planning committees to evaluate the effectiveness of the College’s building, upgrading, maintenance and replacement plans and practices. In addition to several other categories evaluated, the employee survey shows that most campus employees in the 2015 Employee Satisfaction Survey ([III.B.21](#)) *strongly agree* (57.43%) that campus grounds are attractive and well-maintained and campus buildings provide a healthy working environment (28.19% *strongly agreed* and 44.30% *somewhat agreed*). In response to the adequacy of outdoor campus lighting, 27.52% *strongly agreed* and 39.93% *somewhat agreed* that the lighting at night is good. Employees responded to the question of classroom cleanliness with 31.21% *strongly agreeing* and 32.55% *somewhat agreeing*. The student survey results show a somewhat higher satisfaction rate across similar categories; the question “are the College grounds attractive and well-maintained?” received an excellent rating of 54.43% *strongly agreeing* and 33.22% *somewhat agreeing*. Students rated the condition of the classrooms with a positive rating of 44.58% *strongly agreeing* and 39.89% *somewhat agreeing*. In regard to the satisfaction with exterior campus lighting, 30.11% *strongly agreed* that lighting at night is good and 37.33% *somewhat agreed*.

The College meets the standard.

Standard III.B.3 Physical Resources

To assure the feasibility and effectiveness of physical resources in supporting institutional programs and services, the institution plans and evaluates its facilities and equipment on a regular basis, taking utilization and other relevant data into account.

Evidence of Meeting the Standard

IVC considers the needs of programs and services throughout the capital improvement and scheduled maintenance planning cycle by utilizing a collaborative process including participatory governance groups at the College level in the development and implementation considerations of the South Orange County Community College District's Education and Facilities Master Plan (EFMP) ([III.B.22](#)). The SOCCCD EFMP (covered in detail under III.B.4) is the driving force behind the planning and construction of new capital improvement projects and the scheduled maintenance/renovation of existing buildings. Each of the three campuses within the District received an EFMP specific to the campus' long-range planning needs. Each plan is essential to achieving the goals and fulfilling the College's unique mission as it relates to the needs of its programs and services. The Irvine Valley College 2011-2031 Education and Facilities Master Plan (EFMP) is the culmination of research and input from community constituent groups and the College's participatory governance groups. In order to keep the plan relevant to current trends and growth opportunities in education, it is reviewed and updated every five years. The next review process is scheduled to begin the winter of 2016.

The long-term planning/assessment process is conducted through the Five-Year, Facilities and Education Master Plan ([III.B.22](#)). Short-term planning/assessment is accomplished through the Budget Development and Resources Planning Committee (BDRPC) ([III.B.23](#)), which assesses and evaluates the feasibility and effectiveness of College facilities and equipment on an annual basis, based on the resource request cycle. Program Reviews and the Administrative Unit Review process provide other avenues for evaluation of facilities and equipment at the program level which includes the AUR of the Distance Education Program. The Technology Master Plan 2010-2015 ([III.B.16](#)) provides a regular mechanism for evaluating and planning technology needs at the College. Both long-term and short-term planning processes rely on data to drive planning, priorities, and budgets. The Director of Facilities and Maintenance works closely with the Academic Planning and Technology Committee (APTC) ([III.B.24](#), [III.B.25](#)) and the Office of Instruction to assess the effective utilization of classrooms and equipment on the campus proper as well as in the DE mode. The Vice-President of Instruction, Vice President of College Administrative Services and the College president meet regularly with the Director of Facilities during the President's Executive Council (PEC) ([III.B.26](#), [III.B.27](#)) to evaluate, determine maximum efficiencies, and review long-term planning strategies for the College's physical resources.

These processes operate under the guidance of the College's participatory governance model that oversees long-term and short-term planning processes including the evaluation/assessment of existing facilities as well as determination of long-range planning goals:

Online Education AUR/Strategic Plan

The planning to ensure effective equipment utilization in the online program is stated in the Strategic Plan 4.3.2015 ([III.B.28](#)) under 2014-2020 Strategic Objectives 4.1, 4.2, and 4.3. Measurable outcomes are stated for each strategic planning objective, and these outcomes are continuously evaluated in order to make institutional improvements to ensure the needs of programs and services are met. The annual AUR process evaluates and provides feedback as to the progress of the stated objectives. Deficiencies are noted and are followed up by a resource request submission in order to fulfill equipment needs or repairs.

Campus wide Surveys

College wide surveys are conducted annually and provide the College with valuable data related to the efficient use of its facilities. Survey results are examined for any anomalies or large changes. Substantial declines in satisfaction lead to the development of objectives and/or strategies in the department's AUR (Administrative Unit Review) in order to assure goals are met.

The College Strategic Planning Process ([III.B.29](#)) as detailed in the College Planning and Decision Making Manual ([III.B.30](#)), oversees and ensures that the evaluations that emerge from the AUR process are used so that College physical resources meet the current educational requirements of the College community, including DE and the Early College Program. Through a shared governance model ([III.B.31](#)), the College community engages in an integrated, data-driven planning and decision-making process to assess the sufficiency, quality, integrity, replacement strategy, and scheduled maintenance requirements of the College's physical resources including the Five-Year Plan, Education and Facilities Master Plan, Technology Master Plan and the resource requests submissions. Plans are available to the College community through SharePoint ([III.B.32](#)). The strategic planning committees compile, analyze, reconcile, and integrate recommendations derived from evaluations from various campus bodies, task forces, and workgroups. The four strategic planning committees consider all relevant programs' and services' needs and develop integrated, coherent, and cohesive recommendations in order to prioritize resource allocation regarding physical resources. Identified needs are submitted through the resource request process for replacement or maintenance and/or through the Maintenance Direct Work Order system for more immediate requests. The annual resource request submission process demonstrates one of the most important methods used by the College community to provide real-time information about the feasibility and effectiveness of the College's physical resources ([III.B.33](#)). The College has adopted a transparent tracking software (Teamwork [III.B.34](#)) that allows the campus community the ability to track the progress of the vast majority of the

College's maintenance and equipment replacement projects and capital improvement projects.

In evaluating how effectively facilities and equipment meet the needs of programs and services, the IVC Health Center and Concessions projects provide an excellent example. In this case, the College's strategic planning process worked effectively within the participatory governance model in meeting the needs of programs and services. The IVC Student Services Center was identified in the Facilities Master plan for future renovation ([III.B.35](#)) to accommodate growth in space-planning. This project is a combination of two projects from the IVC Facilities Master Plan (FMP). The Health Center relocation project will provide additional square footage in the existing Student Services Center (SSC). By relocating the Health Services Center's 1,248 assignable square feet, a secondary effect ensures that the vacated space will address existing SSC expansion needs. Functional requirements including an adequately sized psychological counseling room and waiting room, a laboratory area and medication storage will be considered. The Concession/Athletic Complex portion of the project is planned to provide a sports medicine room, concessions/ticket booth and public restrooms which serve the athletics area of the campus. Therefore, by working in collaboration with the SOCCCD Capital Improvement Committee (CIC) and the Basic Aid Allocation and Resource Planning Committee (BAARC), the College's shared governing bodies were able to arrive at an effective solution that not only secured a new, expanded location but also generated productive secondary effects.

Analysis and Evaluation

Thus, Irvine Valley College meets this standard as well. The College's Strategic Planning Process, working in tandem with the resource request Process, provides a regular, annual opportunity for faculty, staff and administrators to evaluate and submit requests for facilities and equipment upgrades as well as maintenance requests based on identified needs. The process is data-driven and leads to specific, measurable outcomes and results that are responsive to programmatic requests. College strategic planning assures that the physical resources of the College feasibly and effectively support institutional programs and services.

The College meets the standard.

Standard III.B.4 Physical Resources

Long-range capital plans support institutional improvement goals and reflect projections of the total cost of ownership of new facilities and equipment.

Evidence of Meeting the Standard

Three distinct processes ensure that institutional improvement goals and objectives are met and projections of total cost of ownership are reflected in planning outcomes:

1) Strategic Planning and Decision-Making Process

Capital projects are vetted and approved through the shared governing bodies to ensure alignment with strategies, planning objectives and goals ([III.B.36](#)). In order to ensure widespread and effective College participation in the strategic planning process, the college committee structure fully integrates strategic planning within the fabric of the decision-making structure and the budget development process. Long-range capital planning is tied directly to the College's participatory governance planning process through the ongoing, annual Strategic Planning and Decision Making Process clearly laid out in the *Planning and Decision-Making Manual* ([III.B.30](#)). This document details the collaborative process used to create the Mission Statement, College Goals, and the strategic planning objectives, the cornerstones of the College wide continuous improvement process. A vital link in ensuring that institutional improvement goals are met in regard to proper planning of physical resources is the review process of the resource requests submissions ([III.B.37](#)). The Strategic Planning and Accreditation Council (SPAC) ([III.B.38](#)) reviews, evaluates and rates requests as part of the strategic planning process ([III.B.39](#)). In addition, the College's progress in achieving the planning objectives is reviewed and monitored by the SPAC on an annual basis (*Irvine Valley College Strategic Plan, 2014-2020* [III.B.29](#)).

The College goals form the basis for Strategic Planning Objectives which are linked to measurable outcomes. The outcomes are continuously evaluated through Administrative and Program Review in order to make institutional improvements. Capital planning and effective resource allocation are listed under College Goal #4. Long-range capital planning is proven to be an effective tool in the advancement of college improvement goals.

2) Education Facilities Master Plan (EMP & FMP)

The 2011 Education and Facilities Master Plan (EFMP) provides a blueprint for the future of IVC through the 2031 planning horizon and is updated every five to six years. The SOCCCD is currently in the planning stages of updating and expanding the 2011-2031 EFMP to the 2016-2036 EFMP ([III.B.22](#)). The EFMP serves as the foundation of subsequent plans for the allocation of campus resources and College goal-setting. This plan helps in determining how new and renovated facilities could improve institutional instruction, support services, and campus operations while enhancing student success. It also provides documentation of how constituent groups currently see the College and how they envision the future.

The Educational Master Plan (EMP) ([III.B.40](#)) and the Facilities Master Plan (FMP) ([III.B.41](#)), components of long-range planning, comprise the Education and Facilities Master Plan and were developed in tandem ([III.B.41](#)). Together, they form an invaluable resource for comprehensive planning combining educational goals with capital improvement goals. Throughout this process, personnel with responsibility for education programs and those with facilities' responsibility participated together in nearly every discussion and meeting. At each organizational level, the process has followed the principles of participatory governance. The EMP serves to establish clear direction for the College by envisioning the future under the changing conditions of internal and external trends and influences and to provide a foundation that serves as a primary resource for the development of College planning activities. The FMP takes into account the history of Irvine Valley College and its surrounding communities; core values of the institution as represented in its mission, vision, and strategic goals; data from within the College and from authoritative external sources; and the best thinking of all constituency groups regarding a vision for the IVC campus.

The EFMP planning process established current space inventory broken down by category i.e. lab, classroom, office space etc. and an enrollment projection by discipline, and then developed a long-term capital plan to meet student needs by discipline. Information and development strategies shown in the 2011 Facilities Master Plan reflects current and future forecasts for student and programmatic growth combined with strategic visions for campus modernization. The result is an integrated approach with facilities outcomes driven by education planning.

3) Five-Year Construction Plan

Each year the District is required to submit a Five-Year Construction Plan to the state chancellor's office ([III.B.42](#)). The plan is developed within the state's web-based FUSION program ([III.B.43](#)). This five-year plan includes both locally funded and state-funded projects and identifies project priorities for no less than the next seven years. The five-year plan works in tandem with the EFMP, requiring that all projects submitted for the five-year plan must be listed on the EFMP ([III.B.41](#)). The five-year plan helps to project the future cost of ownership by weighing the current cost of construction against future escalation estimates. The District and its colleges review the plans and priorities and, if appropriate, modify the plan as part of this annual submission. When submitted to the state chancellor's office in June, the submittal includes the Five-Year Construction Plan and the District's Initial and Final Project Proposals (IPP and FPP) for state funding considerations. The Capital Improvement Committee ([III.B.44](#)) relies on the Five-Year Construction Plan as a basis for recommending capital improvement projects to the Basic Aid Allocation Recommendation Committee (BAARC) ([III.B.45](#)) for funding considerations. The Basic Aid allocation process is driven by the SOCCCD Board Policy #3110 and

Administrative Regulation 3110 which defines the allocation process in detail ([III.B.46](#)).

The plan for the new Liberal Arts building project emerged out of a carefully formulated planning document contained within the EFMP. The plan was crafted through a process that included input from the campus community's participatory governance process. In the 2010-2011 planning cycle, it was agreed upon through the District and College shared governance groups to begin executing the initial planning phases of the relocation of the existing Life Sciences program (housed in an outdated building scheduled for demolition) to a new 30,000 sf state-of-the-art facility which opened in March 2014. This entire process is identified within the 2010-2016 Education and Facilities Master Plan. The master plan included a series of carefully orchestrated secondary effects (EFMP Project Summary describing proposed Liberal Arts project [III.B.40b](#)) This series of capital improvement projects further demonstrate the results of successful collaborative efforts between the College and District's strategic planning processes.

The long-awaited grand opening of the new Liberal Arts building took place in fall 2016. This capital improvement project is an excellent example of how the College's strategic planning process takes into account the long-range planning requirements identified in the EFMP, the college's instructional needs, the current physical resource assessment, and the capital improvement funding process vetted through the District Strategic Planning Process: the Capital Improvement Committee (CIC) and the Basic Aid Allocation Resource Committee (BAARC). The new building supports the College's growing Social and Behavioral Sciences, Humanities and Languages programs, and a series of secondary effects needed to be included in the planning process to ensure that all instructional programs remained active and fully operational during construction.

In addition to the Five-Year Construction Plan described in this section, the elements that comprise the total cost of ownership regarding capital improvements, buildings renovations and equipment replacement and repair are best identified/described in the Resource Request Form. Through this resource request process, the College's Strategic Planning and Decision Making Process addresses the issue of identifying total cost of ownership including initial and on-going costs and how it will impact the department. This college wide planning process includes the ability to identify additional personnel requirements including faculty hires, capital improvement needs, physical resource needs, equipment replacement/maintenance needs, and requests for support of new programs and services. When a Resource Request Form is submitted, the applicant must complete a series of questions regarding but not limited to: current and future department impact and funding source, i.e. one-time cost vs. on-going costs. This procedure allows the Strategic Planning and Accreditation Council (SPAC) and the Budget Development and Resource Planning Committee (BDRPC), along with the budget managers, to prioritize requests, identify appropriate sources of funding, and project future fiscal impact. With a sound and effective strategic planning and budget development process in place, the facilities director, Office of

Instruction and other stakeholders can submit timely and accurate budget projections and determine total cost of ownership over the forecasted lifespan of the requested need.

Analysis and Evaluation

The College's long-range capital plans support its improvement goals and reflect projections of the total cost of ownership of new facilities and equipment. The lighting retrofit project detailed under section III.B.2 above is an excellent example of how the College calculates total cost of ownership for any given project:

- Total estimated cost of design and complete exterior retrofit.
- Calculated loss of parking revenue due to campus parking lot closures over extended period.
- Total estimated Proposition 39 incentives paid to college and deducted from total cost of ownership.
- Total calculation of 1 year energy savings as compared to existing energy usage baseline.
- Total cost of ownership over 10-year period vs existing baseline/ estimated total savings to the tax-payer.

In this case, the College was able to offset the cost of the entire project by utilizing the State's energy savings incentives and realize significant taxpayer savings.

The College's DE program long-term planning, review, evaluation and oversight is guided by the goals and objectives as prescribed in the Online Education Strategic Plan ([III.B.9](#)) (May 16, 2016). The Online Education Task Force (OETF) ([III.B.10](#)) reviews and recommends approval of all policies and procedures affecting OE. The Director of Technology Resources oversees the Technology Advisory Task Force and the Academic Planning and Technology Committee which work in tandem with the OETF to identify, prioritize, and implement technology to meet the long-term needs of the OE mode of instruction. The OETF employs the use of surveys ([III.B.46](#)) to provide analysis of the program as well as the annual review of the AURs, which summarizes the data related to IVC's online course offerings, including, but not limited to, student survey data and student demographics.

At Irvine Valley College long-range capital planning works in collaboration with institutional improvement goals and educational planning (the Office of Instruction) through a system of shared governance. Checks and balances are effectively inserted into the process through the College's Strategic Planning and Decision Making Process, EFMP, Five-Year Capital Outlay Plan, and Resource Request process to ensure proper fiscal planning takes place while considering future total cost of ownership.

The College meets the standard.

Standard III.C: Technology Resources

Standard III.C.1 Technology Resources

Technology services, professional support, facilities, hardware, and software are appropriate and adequate to support the institution's management and operational functions, academic programs, teaching and learning, and support services.

Evidence of Meeting the Standard

Irvine Valley College provides students, faculty, and staff with a robust, secure and stable computing environment to enable the College to provide student learning programs and services. Management and oversight for the College technology services is provided by the director of Technology Services who is responsible for the College technological infrastructure and systems. Students, faculty, and staff participate in technology planning and guidance through the Technology Advisory Task Force (TATF), co-chaired by the Director of Technology Services and a faculty representative. TATF provides an opportunity for the college community to identify technology needs and bring new ideas forward for discussion and evaluation. TATF also reviews current and emerging technologies to ensure the technology used by the College is effective in helping the College meet its instructional and service goals. Another technology focused task force is the Online Education Task Force (OETF), co-chaired by the dean of Online Education, director of Technology Services and faculty representatives.

At the College, the mission and goals drive strategic objectives that identify new technology needs and resource requests. Each fall semester, the College community submits its technology needs through the Resource Request System, described in Standard III.D.1. Through planning committees and councils, the institution provides an opportunity for constituency groups to review the technology requests to support instruction and college operations.

The College identifies the effectiveness and adequacy of its technology, including online and hybrid courses, in meeting College needs through six distinct processes ([III.C.1](#)):

- Through TATF and OETF meetings ([III.C.2](#), [III.C.3](#))
- Administrative Unit Reviews (AURs) and Program Reviews ([III.C.4](#))
- District Technology Committee and District Online Education Committee ([III.C.5](#), [III.C.6](#))
- Surveys ([III.C.7](#))
- IVC Technology Plan ([III.C.8](#))
- Technology Services Department (TSD) ([III.C.4](#), [III.C.9](#))

The Technology Service Department (TSD), with input from the TATF and OETF, and with support from the Office of District Vice Chancellor of Technology and Learning Services, is charged with supporting the technology needs of the College. Regardless of whether instruction is taking place in a classroom or online, the TSD provides the same support. The following services are managed by the director of Technology Services ([III.C.10](#)):

- Alternate Media
- Application Support
- Duplicating
- Instructional Technologist
- Media Services
- Network Technicians
- Programming
- Webmaster

Students, faculty and staff can obtain support using an online ticket system, phone, live chat, or email. Once a request is made, each submitter can review their open requests and make comments that are then logged into the system. To ensure the TSD meets the needs of the College, when each service request is closed in the system, the submitter receives a brief survey ([III.C.11](#)).

The TSD continually improves upon the service offerings by expanding automation of systems and services aimed to reduce workloads and increase efficiencies to existing departments at the College. These efficiencies are necessary to the College as resources are limited and technology continues to become the foundation upon which many departments rely. In addition to helping understand business processes and allowing technology to do more work, the TSD is also focused on several key areas, specifically ([III.C.12](#)):

- Emergency Notifications
- Instructional Technology
- Facilities
- Reliability
- Disaster Recovery
- Privacy and Security
- Hardware and Software
- Evaluating Technology Resources

Outside of the systems and services provided by District IT, all the areas above are core foundational areas within which TSD assists the College in leveraging their resources to bring the best experience into the teaching and learning environment.

Analysis and Evaluation

IVC Technology Support is routinely evaluated via surveys. As each support request is closed, the requestor is automatically sent a survey to rate and comment on the service they were provided. The survey results are reviewed and improvements are made.

In addition, the IVC Office of Research, Planning, and Accreditation administers regular surveys of employees and students to assess levels of satisfaction with the provision of technology services. Survey results indicate an overall positive College treatment of technology needs. In the 2015 IVC Employee Survey, 85.5 percent of respondents were either “Very Satisfied” or “Somewhat Satisfied” with the job the IVC technology staff is doing to provide services, and 74.5 percent of respondents “Strongly” or “Somewhat” agreed that IVC maintains, upgrades, or replaces its technology infrastructure and equipment to meet staff needs, while 74.7 percent of respondents “Strongly” or “Somewhat” agree that IVC maintains, upgrades, or replaces its technology infrastructure and equipment to meet instructional needs ([III.C.7](#)). The 2015 Student Satisfaction Survey shows the strong majority of respondents feel that IVC computer labs, services, websites, online services and support are satisfactory ([III.C.12](#)). Survey data confirm the appropriateness and adequacy of technology to meet the needs of all campus constituencies.

The College meets the standard.

Standard III.C.2 Technology Resources

The institution continuously plans for, updates, and replaces technology to ensure its technological infrastructure, quality and capacity are adequate to support its mission, operations, programs, and services.

Evidence of Meeting the Standard

The director of Technology Services is charged with establishing and maintaining a robust technical infrastructure utilizing established processes and procedures. College technologies are continuously updated and replaced based on various plans, Administrative Unit Reviews, and Program Reviews in support of the College mission and goals. The College’s strategic goals guide the technology planning and decision-making. IVC and district wide goal #2 is “IVC will promote students’ success by enhancing the teaching and learning environment.” District wide technology goal #1 is “SOCCCD will sustain innovative excellence in supporting students, faculty and staff through the development and use of creative technologies.”

The College's current Technology Plan was updated in 2015, with input from faculty, staff and students through various workshops. Input received was compiled into four technology domains that support the college mission:

- 1) Governance: Use the governance structure to guide technology activity and ensure high levels of service. (IVC Strategic Objective 1.5 [III.C.13](#))
- 2) Applications: Develop technology solutions that improve campus wide efficiency and augment classroom instruction and student services. (IVC Strategic Objective 4.2 [III.C.13](#))
- 3) Network Infrastructure and Security: Provide a secure and reliable environment to support students, faculty, and staff (IVC Strategic Objective 4.2 [III.C.13](#))
- 4) Operations and Support: Provide excellent support and service to Irvine Valley College's technology consumers such as faculty, staff, and students (IVC Strategic Objective 1.4, 1.5, 2.2, 3.3, 4.1, 4.2 [III.C.13](#)).

Utilizing the college's Comprehensive Budget Development Process, documented in Standard III.D, college personnel make requests for additional technology resources in support of the college's mission, operations, programs and services. As a part of this process, the Technology Services department developed a new system called the resource request system. The new system allows for anyone to submit a request for personnel, facilities, instructional equipment, technology and other resources. Under this process, the college's strategic planning committees review and rate all the requests and forward them to the Strategic Planning and Accreditation Council (SPAC) for final review and recommendations to the president for funding decisions. Once approved, funding allocations are made for technology requests and the TSD completes the purchases.

The OETF and TATF work in tandem to plan for technology resources related to online education. One recent example is when the OETF and TATF examined two Learning Management Systems (LMS) to identify an LMS that meets the needs of the College. Faculty were encouraged to attend presentations from both Blackboard and Instructure (the provider of Canvas LMS). Faculty participated in a work group and took online training courses from @ONE, Introduction to Online Teaching, in which the faculty used Canvas in the role of students. Faculty learned best practices for online teaching as well as gained concrete experience with the functionality in Canvas to evaluate its end-user experience and its usefulness to facilitate the delivery of effective online courses ([III.C.14](#)).

Analysis and Evaluation

The College utilizes ongoing planning to update and replace technology and to ensure the adequacy of its quality and capacity. The planning process has resulted in the following initiatives ([III.C.15.2](#)):

- 1) Annual desktop, laptop and server refresh
- 2) College networking infrastructure improvements

- 3) Continuous monitoring and system backup
- 4) Expansion of the college's wireless capacity
- 5) Business continuity improvements.

Classroom, online education, and administrative technology refresh plans are presented by the director of Technology Services to strategic planning committees for review. The College has a 10-year replacement plan that is updated annually for the purpose of establishing the standards for effective lifecycle of campus technology as well as a recommended process for replacing devices across the College. In order to improve its network infrastructure, the College began moving toward desktop virtualization in 2012. The TSD has several methods for assessing the use of the current technology and ensuring the computing environment has ample capacity and reliability through the life of the equipment.

The increased use of mobile and other devices has increased the demand on the College's infrastructure and capacity. To accommodate this expansion and address the issue of saturation of the wireless environment, the College has begun implementing the expansion of wireless to accommodate over 6 devices per student.

IVC strives to ensure that many of the critical systems it supports can continue to operate during a large regional event. The College has its main data backup device in an offsite data center where nightly backups occur. The College backs up every evening all changes to servers to an offsite location. If the entire College were affected by a long-term outage all systems would be restored from the backup system.

The College meets the standard.

Standard III.C.3 Technology Resources

The institution assures that technology resources at all locations where it offers courses, programs, and services are implemented and maintained to assure reliable access, safety, and security.

Evidence of Meeting the Standard

IVC provides state-of-the-art, reliable, safe, and secure access to technology resources on the College campus, ATEP and online. Maintenance and refresh of hardware and software at all locations is reviewed by the TSD. Beginning in 2015, the TSD began requiring encryption onto all websites, by adding Hypertext Transfer Protocol Secure (HTTPS) to all systems, thus protecting data against theft.

The primary device to prevent any unauthorized access to the College's networks and services is a firewall. IVC, District services and Saddleback College purchased new Palo

Alto firewalls in 2010. Based on an audit of the firewalls done in 2015 many processes have been improved along with ensuring each device is updated to the latest operating system versions.

IVC's network has been engineered to be as decentralized as possible to ensure that an outage does not affect the entire College. Technology systems provide benefits of multiple data centers with reliability, network monitoring, firewall, centralized virus scanning, and backup procedures to all locations. All critical systems are backed up on a routine basis. IVC's data centers have state-of-the-art equipment such as paired air-cooling systems, clustered servers for redundancy of database systems, and mirrored equipment, should one data center become inoperable. The system sends alert messages to IT personnel for anomalous situations like high temperature or power failure. Both data centers are locked and do not have direct access from any hallway or outside location.

All classroom technology is configured and maintained by the TSD. A centralized service desk structure is in place, which allows faculty and staff to request assistance with resolving issues that arise in the classroom.

IVC utilizes many Microsoft systems and services; thus, many of the systems use the same authentication system, which eases access to systems and services. To assist faculty and staff and further simplify authentication, the entire District is in the process of implementing a single sign-on (SSO) solution to provide single username and password for access to each area for easier access and improved security, which will create new efficiencies and assist with the password reset processes.

The TSD has implemented a monitoring solution that alerts staff when a system has failed or is experiencing issues. Systems and services that are experiencing a possible failure can be identified and replaced before they fail completely. Network outages, bottlenecks and capacity issues are now diagnosed with much greater speed to reduce down time. The network is reliable.

In 2016, to protect valuable College hardware and prevent future thefts, a tracking solution was installed onto all iMac computers campus wide. This modification will enable the computers to be found and provide law enforcement with tools to assist in the recovery of the College's assets.

Lastly, the TSD monitors its desktop computers. When computers are imaged a Dell KACE client is installed to monitor the computer's hardware and proactively alert the IT staff of any failure or capacity issue.

Analysis and Evaluation

Through audits, monitoring, system continuity, and regular feedback that spans all instructional sites and modalities, the TSD is able to assure that technology resources are reliably accessible, safe and secure. The College and District work together to create solutions as needs arise, such as developing a single-sign on system.

The College meets the standard.

Standard III.C.4 Technology Resources

The institution provides appropriate instruction and support for faculty, staff, students, and administrators, in the effective use of technology and technology systems related to its programs, services, and institutional operations.

Evidence of Meeting the Standard

To accomplish the training needs of the College in support of its many complex applications and systems for faculty, staff and students, the College provides the following self-paced or group workshop training opportunities:

- Lynda.com is provided to all employees of the District. Within the training system, employees can learn from thousands of training materials.
- Faculty Professional Development Week activity workshops are offered on a variety of technology topics ([III.C.17](#)).
- Training and support for faculty teaching online courses is offered through formal online training via a one-on-one instruction with the Instructional Technologist. Additionally, there is an IVC Online Education Faculty Handbook available to all instructors ([III.C.18](#)).
- Training materials for both classroom and online instruction are available to the faculty on the Online Education website.

The College also provides training targeted to students and staff with disabilities, faculty teaching online, and college personnel wishing to learn more about the use of media services technologies.

Alternate Media

The Alternate Media Specialist provides technology workshops and one-on-one training specifically designed for students and staff with disabilities. The workshops provide the training necessary for faculty to make their online or electronic components of their courses compliant with Section 508 of the Federal Rehabilitation Act, and with the Americans with

Disabilities Act (ADA). Other services the Alternate Media Specialist provides include completing book conversions to electronic media, facilitating captioning training for faculty, facilitating captioning requests to grants, internal resources and outside agencies and facilitating the use and leveraging of new technologies and curriculum review for compliance.

Online Education

Currently, Blackboard is the primary system that supports faculty's online courses as well as on the ground classrooms. Given the high utilization of Blackboard by the College, and with the adoption of Canvas as the new LMS, the TSD has developed various training modules including regularly scheduled workshops for faculty, one-on-one customized training, video tutorials, and vendor after-hours support.

The Online Education website consolidates much of the information regarding OE, including online orientation instructions now available for all online courses and a link to the IVC Online Education Faculty Handbook ([III.C.18](#)). Students now have a clear focal point for accessing specific orientation instructions for their online courses.

Media Services

The Media Services unit of the College's TSD provides support to faculty and staff for audio-visual equipment and other media equipment related needs. These services include providing end-user, operational documentation for the various technology resources in the classroom, such as the projector, document camera, video switch, and desktop computer, as well as just-in-time, on-demand classroom media equipment training.

Analysis and Evaluation

The TDS directly supports all faculty, staff, and students, regardless of whether the need is related to an online or an on-campus course. The department provides assistance with the effective use the technology systems. IVC students, faculty, and staff who require access to instructional related technology can receive support in five ways:

- Contact the Service Desk for individual immediate needs by online form, phone, email, or live chat.
- Contact the Service Desk and request an appointment for a scheduled one-on-one instructional support
- Group training sessions, such as a request to attend a school meeting
- Faculty Professional Development Week activities where instructional technology support trainings offered
- Access to instructional materials located near supported devices (teacher stations, copiers and student print)
- Formal, ongoing technology training program for all faculty and staff

The College has a formal, ongoing technology training program for all faculty and staff supported by the Application Specialists and Instructional Designer. This program provides robust end-user training for the various applications installed and supported by the College. ([III.C.16](#)).

The College meets the standard.

Standard III.C.5 Technology Resources

The institution has policies and procedures that guide the appropriate use of technology in the teaching and learning process.

Evidence of Meeting the Standard

IVC, as part of the South Orange County Community College District, has established policies, procedures, and practices which guide the appropriate use of technology in the teaching and learning process. Many of these policies have been updated as recently as in 2013, utilizing a consultant. SOCCCD board policies guiding appropriate use of technology include:

- Administrative Regulation 3726: Information Security-Data Classification [III.C.19](#)
- Administrative Regulation 3727: Information Security-Access Control [III.C.20](#)
- Administrative Regulation 3728: Information Security-Physical Security [III.C.21](#)
- Administrative Regulation 3729: Information Security-Logging and Monitoring [III.C.22](#)
- Administrative Regulation 3730: Information Security-Remote Access [III.C.23](#)
- Administrative Regulation 6110: Distance Education [III.C.24](#).

Analysis and Evaluation

In addition to the administrative regulations, the OETF developed the IVC Online Education Faculty Handbook (approved in 2015 and updated in 2016). [III.C.18](#) The annual review process begins in the Online Education Task Force and then goes to the Academic Planning Technology Committee, Academic Senate and Strategic Planning and Accreditation Council for approval. Technology use is addressed in sections on: Accessibility (section 504 and section 508 Compliance), Captioning Guidelines, Student Privacy, and Online Education Resources. There are also several policies and procedures listed in various systems and areas of the College. [III.C.25](#)

IVC is committed to compliance with federal and state regulations including FERPA, HIPPA, section 504, and section 508. The College will utilize its existing committees and/or

create special workgroups to ensure that policies and guidelines related to the appropriate use of technology remain current; to address regulations and create new complete policies and procedures related to technology; and to develop and introduce training to help students, faculty, staff and administrators comply with policies.

The College meets the standard.

Standard III D: Financial Resources

Standard III.D.1 Financial Resources

Financial resources are sufficient to support and sustain student learning programs and services and improve institutional effectiveness. The distribution of resources supports the development, maintenance, allocation and reallocation, and enhancement of programs and services. The institution plans and manages its financial affairs with integrity and in a manner that ensures financial stability.

Evidence of Meeting the Standard

Irvine Valley College's 2016-2017 Adopted Budget is \$81,705,894 which includes \$64,061,883 in Unrestricted General Funds and \$17,644,011 in Restricted Funds. The total 2016-2017 Adopted Budget for South Orange County Community College District is \$755 million. [III.D.1](#)

The College provides sufficient revenues to support educational improvements and consistently allocates funds to support them. The College publishes annual funding allocations for institutional improvements on the intranet under the Budget Development and Resource Planning Committee site [III.D.2](#). The Irvine Valley College Comprehensive Budget Development Process provides a means for setting priorities for funding institutional improvements. The College focuses on program effectiveness and efficiencies in order to allocate its existing resources to fund new program improvements in the future [III.D.3](#).

The College manages its finances in a manner that ensures integrity and financial stability. The College maintains a \$1.0 million reserve annually, as documented in section III.D.2 below. In addition to the College's reserve, the District sets a 7.5% reserve for economic uncertainties set through the District Resources Allocation Committee (DRAC), [III.D.4](#) in accordance with the Board Budget Development Guidelines [III.D.1](#) as well as a 20% Basic Aid reserve pursuant to Section 4.C (Contingency) of Administrative Regulation 3110 (Basic Aid Allocation Process) [III.D.5](#)

The following guiding principles are provided to DRAC and the College budget committees for use when recommendations are made about the budget [III.D.1](#), [III.D.6](#).

1. Reserve for Economic Uncertainties
2. Future Long-Term Debt Issues
3. Retirement Incentives
4. Area/College Allocations
5. Deficit Financing
6. Retiree Medical, Dental, Vision, and Medicare Coordination of Benefits

7. (COB) Plans
8. Basic Aid
9. One-time Cost Savings
10. Full Time Equivalent Student Targets
11. Funding for Growth
12. Budget Planning

The College aims to maintain sufficient reserves to address a possible situation when no growth funding is available to cover the step-and-column and other built-in mandatory cost increases. Institutional resources have been sufficient to ensure financial solvency. The College's unrestricted general fund ending balances in the last three years are as follows:

Fiscal Year	Ending Balance	Reference Endnote
2015-2016	\$3,921,728	2016-2017 Adopted Budget pg 28 III.D.1
2014-2015	\$3,085,848	2015-2016 Adopted Budget pg 29 III.D.7
2013-2014	\$2,577,143	2014-2015 Adopted Budget pg 27 III.D.8
2012-2013	\$20,019	2013-2014 Adopted Budget pg 27 III.D.9 Note the ending balance in 2012-13 was low due to an early retirement payout.
2011-2012	\$1,331,633	2012-2013 Adopted Budget pg 23 III.D.10

The 7.5% contingency reserve set through the DRAC model for the last 5 years were as follows:

Fiscal Year	7.5% Contingency Reserve	Reference Endnote
2016-2017	\$12,705,329	2016-2017 Adopted Budget pg 19 III.D.1
2015-2016	\$13,090,208	2015-2016 Adopted Budget pg 21 III.D.7
2014-2015	\$11,452,534	2014-2015 Adopted Budget pg 18 III.D.8
2013-2014	\$11,296,568	(2013-2014 Adopted Budget pg 27 III.D.9 Note the ending balance in 2012-13 was low due to an early retirement payout.
2012-2013	\$10,345,556	2012-2013 Adopted Budget pg 14 III.D.10

The 20% Basic Aid contingency reserve for the last 5 years are listed in the Table below:

Fiscal Year	20% Basic Aid Reserve	Reference
2016-2017	\$11,702,190	2016-2017 Adopted Budget pg 21 III.D.1

Fiscal Year	20% Basic Aid Reserve	Reference
2015-2016	9,021,647	2015-2016 Adopted Budget pg 23 III.D.7
2014-2015	8,291,463	2014-2015 Adopted Budget pg 21 III.D.8
2013-2014	7,853,846	(2013-2014 Adopted Budget pg 27 III.D.9 Note the ending balance in 2012-13 was low due to an early retirement payout.
2012-2013	17,639,088	2012-2013 Adopted Budget pg 16 III.D.10

The capital outlay/basic aid fund of the District has a substantial amount of cash balance committed to specific future capital projects. As of August 2016, that amount was \$223,596,236. This cash may be temporarily transferred to another fund for the payment of obligations in accordance with the state budget and accounting manual. [III.D.11](#)

Analysis and Evaluation

The financial resources of IVC are sufficient to support and sustain student learning programs and services and improve institutional effectiveness. The distribution of resources supports the development, maintenance, allocation and reallocation, and enhancement of programs and services. The resource allocation process provides a means for setting priorities for funding institution improvements. The IVC Comprehensive Budget Development Process [III.D.3](#) allows the administrative unit heads (deans, directors, vice presidents/president) to review and rate individual resource requests submitted in their areas. The resource requests are then reviewed and rated by committees using a consistent rating rubric. The process concludes with a prioritized list of resource requests and corresponding funding sources recommended to the president of the College by the Strategic Planning Oversight and Accreditation Council (SPAC).

All resource requests must be supported by a program review or administrative unit review strategy or other planning document such as a college or district technology plan, education and facilities master plan, or college or district wide strategic planning objective.

Moreover, IVC's budget provides sufficient resources for the effective planning, maintenance, implementation and enhancement of Online Education (OE) courses, programs and services as well as personnel development. The College provides an instructional technology and 508 compliance specialist position to support the Distance Education programs and courses. Blackboard is the software platform used to support OE, and IVC maintains an instructional technologist position to support faculty. IVC is also currently piloting the Canvas Learning Management System (LMS). Professional Development funds are available to all faculty, including OE Faculty. The College spent \$55,756 in 2015-2016 for faculty professional development activities, including OE. [III.D.12](#) The following is a

sample of professional development activities related to OE from 2015-16:

- Online Teaching Certification Program Training
- Workshop titled "Google for Education"
- Online Teaching and Learning with @ONE
- @ONE: Introduction To Teaching With Canvas

Thus, the College has consistently allocated funds to support educational improvements. The IVC Comprehensive Budget Development Process provides a means for setting priorities for funding institutional improvements. In the current economic environment of limited funding for growth, the institution was able to dedicate funds for institutional improvements annually. The College focuses on program effectiveness and efficiencies in order to redirect its existing resources to fund new program improvements in the future.

The College meets the standard.

Standard III.D.2 Financial Resources

The institution's mission and goals are the foundation for financial planning, and financial planning is integrated with and supports all institutional planning. The institution has policies and procedures to ensure sound financial practices and financial stability. Appropriate financial information is disseminated throughout the institution in a timely manner.

Evidence of Meeting the Standard

As documented in Standard I, the institution regularly reviews and revises, if necessary, the mission statement and College goals. The current mission statement, goals and objectives are posted to the IVC public website [III.D.13](#). The review of the mission statement and College goals is initiated by the Institutional Effectiveness Committee (IEC). As a part of this process, the BDRPC regularly reviews these documents from a fiscal planning perspective to ensure progress is made in completing them and assesses the College fiscal planning to align it with the mission statement and College goals [III.D.14](#).

The mission statement and the College goals thus drive the development of planning objectives as planning objectives are set to attain or implement the goals. Planning objectives are statements which are specific, measurable, achievable, realistic, and time-related. In order to integrate financial planning with institutional planning, the Strategic Planning Committees review resource requests to ensure their alignment with the mission statement and College goals. (A resource request encompasses the proposed action to achieve the objectives and goals.) Planning objectives are included in the resource request form for the author to select and thereby link the resource request to a college wide objective. College planning and

resource allocation processes are reviewed annually at the Strategic Planning and Accreditation Council (SPAC) retreat. [III.D.15](#), [III.D.16](#)

The institution establishes priorities among competing needs so that it can predict future funding needs, in accordance with the Comprehensive Budget Development Process [III.D.3](#) described above. The institution sets priorities among competing needs through the resource request review and rating process as well as mapping all possible funding sources with resource requests in order to maximize the use of available resources. The electronic resource request form requires the author to complete worksheets pertaining to personnel, equipment, facilities, technology and other resources, as necessary. The annual assessment of resources projects future spending in the area and allows the institution to establish priorities among competing needs in such a manner that future funding needs can be predictable and aligned with revenue projections.

The College's plans are clearly linked to both short-term and long-range financial plans. These plans are reflected in the 5-year budget model which allows BDRPC to make funding recommendations to SPAC for both ongoing and one-time expenditures. Final funding allocations to support College plans are made based on the BDRPC funding recommendation. [III.D.17](#)

During this process, requests that did not receive full funding are reviewed and analyzed to establish future funding needs. The unfunded list is shared with the campus (including the IVC Foundation) in order to explore the possibility of resource development raising funds through donor contributions. [III.D.18](#) Institutional plans are reflected in the College's strategic plan [III.D.19](#) and the planning objectives are linked in the resource request form under the planning section, as indicated in the screenshot below:

Save / Next

Furthermore, the College has a 5-year budget model that is being continually updated by BDRPC. The model shows long-term revenue and expenditure projections, both one-time and ongoing, allowing the institution to identify funding amounts for one-time and ongoing resource requests [III.D.20](#). Thus, the College has plans that are clearly linked to both short-term and long-term financial plans. Short-term and long term financial plans are reflected in the 5-year budget model which allows BDRPC to make funding recommendations to SPAC for both ongoing and one-time expenditures. Final funding allocations to support college plans are made based on the BDRPC funding recommendation.

The financial planning process relies primarily on institutional plans for content and timelines. The Comprehensive Budget Development Process [III.D.3](#) drives all institutional and financial planning on an annual timeline. Planning begins well in advance to allow sufficient time for review of the mission statement and College goals as well as the planning objectives and strategies, and making changes as necessary. The review of the mission statement and College goals and objectives occurs annually with major updates taking place on a three-year cycle. The online resource requests process is designed in such a way that the requests are tied into College goals and objectives. In addition to directly linking to strategic planning objective, the Comprehensive Budget Development Process allows linking financial planning to Program Reviews and Administrative Unit Reviews which in turn tie to the College mission, goals and objectives [III.D.21](#).

The College has evidence that past fiscal expenditures have supported the achievement of its plans. The resource request form includes a planning section where the author is required to select an institutional or departmental planning objective thus linking the expenditure authorization request to the achievement of institutional plans.

The governing board and other institutional leadership receive information about fiscal planning that demonstrates its links to institutional planning. Specifically, the following information has been provided in recent years:

Date	Topic	Forum	Reference
August 22, 2016	SOCCCD FY 2016-2017 Basic Aid Allocation Recommendations	Board of Trustees Meeting	SOCCCD FY 2016-2017 Basic Aid Allocation Recommendations III.D.23.2
August 22, 2016	FY 2016-17 Adopted Budget	Board of Trustees Meeting	FY 2016-17 Adopted Budget III.D.1
February 25, 2016	A Workshop on Understanding the Budget	College-wide Presentation	A Workshop on Understanding the Budget III.D.31

In addition, the vice president of Administrative Services provides a college wide presentation on the college budget, its fiscal condition and financial planning in August and January of each year [III.D.22](#), [III.D.23](#). The vice president for College Administrative Services also provides periodic updates on financial matters to the college committees, councils and senates with BDRPC being the primary participatory governance body where fiscal and budget planning matters are discussed [III.D.24](#). Lastly, the college president and vice president of Administrative Services send periodic college wide emails with information pertaining to the state and local budget developments and fiscal analysis [III.D.25](#). Information communicated to the campus is sufficient in content and timing to support institutional and financial planning and financial management.

The main source of financial resources for this institution is property tax revenues allocated through the District Revenue Allocation Model based on the State Apportionment. Excess revenue above apportionment is allocated to the College or District for one-time purposes including capital outlay projects pursuant to BP/AR 3110 [III.D.26](#), [III.D.5](#). Other sources of financial resources, including grants, partnerships, the Irvine Valley College Foundation and other auxiliary funds. The institution has not experienced any cash flow difficulties in the past; the District as a whole is debt-free, and all the liabilities are fully funded. The District

has a healthy General Fund cash balance that is reported to the Board of Trustees on a regular basis [III.D.27](#). The College aims to maintain sufficient reserves to address a possible situation when no growth funding is available to cover the step-and-column and other built-in mandatory cost increases. As documented in section III.D.1, Table IIID-1 (College Ending Balances) location-specific fund balances have been sufficient to maintain the financial health of the institution.

In addition, as documented in section III.D.1, Table IIID-2 (DRAC 7.5% Contingency Reserves) the District maintains an unrestricted general fund reserves of no less than 7.5% which is higher than the 5% recommended by the State Chancellor. Lastly, as documented in the same section, Table IIID-3 (Basic Aid 20% Contingency Reserves), the District maintains a 20% basic aid reserve required by BP/AR 3110. For these reasons, the institution believes it has reasonable and sufficient financial resources to cover its costs in case of an emergency situation.

Other sources of financial resources, including grants, partnerships, the Irvine Valley College Foundation and other auxiliary funds, are linked to institutional planning, and there is realistic understanding of any restrictions on expenditures from those funds, as discussed above. There is also a realistic understanding of the availability of those funds. Specifically, the budget for the Associated Student Government (ASG) of Irvine Valley College is presented to the Board of Trustees in an open session [III.D.28](#). The ASG of IVC Budget presentations are available at the Student Life Office upon request. The Child Development Center and Community Education Fund budgets are posted online [III.D.1](#). The Irvine Valley College Foundation fiscal update is presented to the Foundation Board of Governors in an open session and is available at the Foundation Office upon request [III.D.29](#).

The District has sufficient insurance to cover its needs. Liability insurance costs are covered as an assessment on college Full Time Equivalent Student (FTES) income through the District Revenue Allocation Model. The District is not self-insured but participates in several joint power authorities (JPAs) such as the State-Wide Association of Community Colleges (SWACC) (property and liability), Self-Insured Schools of California (SISC) (medical), and the Protected Insurance Program for Schools (PIPS) (workers compensation) lessening its risk factor and reducing costs. The District reviews its coverage annually in the spring and carries an excess liability policy. The District has implemented and fully funded an irrevocable trust for its Other Post-employment Employee Benefits (OPEB). The OPEB fund balance as of August 2016 was \$95.9 million.

Analysis and Evaluation

The mission and goals of IVC are the foundation for financial planning, and the College's financial planning is integrated with and supports all institutional planning. Institutional planning at the College reflects realistic assessment of financial resource availability, development of financial resources, partnerships, and expenditure requirements. The

College's financial planning is integrated with and supports all institutional planning through the Comprehensive Budget Development Process. The institution has financial plans that are integrated with the institution's plans and prioritized strategies supporting the mission statement and the college goals. The institution has policies and procedures to ensure sound financial practices and financial stability. Appropriate financial information is disseminated throughout the institution in a timely manner.

The College meets the standard.

Standard III.D.3 Financial Resources

The institution clearly defines and follows its guidelines and processes for financial planning and budget development, with all constituencies having appropriate opportunities to participate in the development of institutional plans and budgets.

Evidence of Meeting the Standard

IVC clearly defines and follows its guidelines and processes for financial planning and budget development, with all constituencies having appropriate opportunities to participate in the development of institutional plans and budgets. The processes for financial planning and budget are recorded and made known to college constituents through the Comprehensive Budget Development Process [III.D.3](#) which contains the budget development timeline. The document is circulated through various means of communication; it is also posted on the BDRPC SharePoint website [III.D.2](#). Lastly, the timeline and summary flowchart of the process can be accessed through the resource request form [III.D.30](#).

The Basic Aid Allocation Recommendation Committee (BAARC) process is described in Administrative Regulation 3110 (Basic Aid Allocation Process) [III.D.5](#).

The various financial planning processes are shared with the campus community at the district services Understanding the Budget Workshops, held most recently in February 2016 [III.D.31](#). Lastly, the BDRPC SharePoint site records all the major budget and planning communication [III.D.2](#).

To ensure the inclusiveness of the Comprehensive Budget Development Process, all constituent groups of the College are represented on all strategic planning committees. The IVC and district wide Planning and Decision-Making Manuals define the composition of the Strategic Planning Committees [III.D.32](#). The composition of strategic planning committees, as described in the Planning and Decision Making Manuals, ensures all constituencies are given appropriate opportunities to participate in developing institutional plans and budgets. Strategic planning committee minutes are posted on their individual SharePoint web pages.

The minutes record the attendance of the committee members and demonstrate a high participation rate for all constituent groups [III.D.2](#).

Analysis and Evaluation

The College clearly defines and follows its guidelines and processes for financial planning and budget development. The composition of strategic planning committees ensures all constituencies are given appropriate opportunities to participate in developing institutional plans and budgets. As discussed in Standard IV.B, Strategic Planning Committees, Task Forces, and Administrative Councils operate collegially on the basis of consensus with the focus on the establishment of a safe harbor for healthy dialogue on various issues including financial issues. The constituents involved in these processes are faculty, classified staff, administrators, managers, and students representing a variety of college areas such as instruction, student services, supportive services, research, technology, facilities, and the student body.

As also discussed in Standard I.B, all academic programs and student services participate in a program review, which feeds into the IVC Comprehensive Budget Development Process and further promotes faculty participation in the financial planning and budget development process. All programs identify program objectives, which are associated with the college goals. Thus, the program-level planning process is integrated with the college strategic planning process to ensure that the college mission and college goals are achieved. Similarly, academic and student support programs develop program objectives and planning strategies which are specific, measurable, achievable, realistic, and time related.

The College meets the standard.

Standard III.D.4 Financial Resources

Institutional planning reflects a realistic assessment of financial resource availability, development of financial resources, partnerships, and expenditure requirements.

Evidence of Meeting the Standard

Individuals involved in the Comprehensive Budget Development Process [III.D.3](#) receive accurate information about available funds, including the annual budget showing ongoing and anticipated fiscal commitments. BDRPC regularly reviews the College's Five-Year Fiscal Plan including ongoing projections and anticipated changes. BDRPC develops recommendations for SPAC on funding augmentations for one-time and ongoing resource requests [III.D.18](#).

To ensure communication of accurate information and to facilitate coordination, all chairs of the Strategic Planning Committees and the members of the President’s Executive Council—the president, vice presidents, and executive director of Marketing, Communications and Broadcast Services—are also members of the SPAC. In addition the institution establishes funding priorities in order to reasonably achieve its strategic goals. According to the Comprehensive Budget Development Process, proposed planning strategies are submitted to the appropriate Strategic Planning Committee using a resource request form in order to request funding and/or the necessary resources to implement planning strategies. The resource request form requires the author to specify how the funding request supports the college plans, including goals, objectives, or Program or Administrative Unit Reviews. The manager, vice president, and Strategic Planning Committees review and rate resource requests, and SPAC makes recommendations on funding priorities to the president, who makes final funding decisions. During the review and rating process, the funding priorities are established in a manner that helps the institution archive its mission and goals [III.D.3](#).

The status and outcomes of the approved strategies and corresponding objectives are tracked for accountability and to assist the institution in achieving its underlying goals in a reasonable fashion. For instance, items focused on student learning are given high priority consistent with the mission of the College. At the summer 2015 SPAC retreat, the IVC Research Office presented data showing a high correlation between resource request rating/funding and student learning [III.D.17](#).

Analysis and Evaluation

Institutional planning at IVC reflects realistic assessment of financial resource availability, development of financial resources, partnerships, and expenditure requirements. The resource request form is the main document that ties the resource allocation to the college goals and planning objectives. Other documents describing funding priorities used by institutional planners at IVC include Education Code Section 84362 (the 50 percent law). To comply with this requirement, “classroom instruction” is also given a high funding priority by institutional planners. Documents describing any restrictions on the use of special funds are also used in the planning and budget development process. Other documents used to establish funding priorities include: the Education and Facilities Master Plan, the Technology Master Plan and the Online Education Master Plan, ASIV Goals (for ASG requests), and Environmental Initiatives (in progress).

The College meets the standards.

Standard III.D.5 Financial Resources

To assure the financial integrity of the institution and responsible use of its financial resources, the internal control structure has appropriate control mechanisms and widely disseminates dependable and timely information for sound financial decision making. The institution regularly evaluates its financial management practices and uses the results to improve internal control systems.

Evidence of Meeting the Standard

An audit of the District's financial records, including those of Irvine Valley College, is conducted in the fall of every year [III.D.32](#). This audit is conducted by an independent certified accounting firm in accordance with California Education Code Section 8848, in accordance with generally accepted auditing principles and is designed to obtain reasonable assurance that the financial statements are free of material misstatement. This process includes examination and testing of supporting documentation as well as an examination of internal controls which provide feedback on processes that require improvement or adjustments. The audit assesses the accounting principles used and management's estimates to provide reasonable assurance that material misstatements which could affect the financial statements as a whole are detected. It considers the District's internal controls over financial reporting in order to plan the audit but does not give an opinion on those controls. The District's effective financial management is reflected in the limited number of audit findings. Budget and audit documents are posted to the District Business Services website.

The District audit reports and findings are reported to the Board of Trustees in November of each year [III.D.33](#). The audit firm representatives share the report and highlight material weaknesses, if any. The District has audit committees for the District and foundation audits and several board members serve on those committees. The auditors share more detailed information during these meetings.

The College disseminates information about budget, fiscal conditions, financial planning, and audit results that is sufficient in content and timing to support institutional and financial planning and financial management, thus supporting its credibility with the College's constituents. The District's tentative and final budgets are approved at the Board of Trustees' June and August meetings, respectively, each year [III.D.34](#). The vice president for College Administrative Services also provides periodic updates on financial matters to the college committees, councils and senates with BDRPC being the primary participatory governance body where fiscal and budget planning matters are discussed [III.D.35](#).

The College reviews the effectiveness of its past fiscal planning as part of planning for current and future fiscal needs. The primary method of assessment of the effectiveness of past fiscal planning is a special survey around resource request planning administered annually by the College's Research and Planning Office. BDRPC and SPAC review the survey results and make necessary improvements to the fiscal planning process [III.D.16](#).

Analysis and Evaluation

IVC assures the financial integrity of the College and responsible use of its financial resources. The director or administrator of each department or project is responsible for managing their respective budgets. Expenditure reports are provided by the Fiscal Office on a quarterly basis or as needed to assist these individuals with budget management. Any expenditure above budget is corrected within the department or by the appropriate vice president or the president within the budget. At the end of each year the Fiscal Office conducts a comprehensive review of actual revenues/expenditures to strengthen fiscal management and correct any possible errors. This comprehensive review is shared with the management, and outcomes are incorporated into the next year's budget.

Documents containing the institution's financial information demonstrate that the allocation of resources is done with integrity. The audit statements indicate sound financial management and timely corrections to audit exceptions. The annual external audit includes an examination of internal controls, which is the mechanism to provide feedback on processes that require improvement or adjustments. The internal institutional review of financial management processes described above, existing financial management processes, and the results of the evaluation are used to improve financial management systems.

The College meets the standard.

Standard III.D.6 Financial Resources

Financial documents, including the budget, have a high degree of credibility and accuracy, and reflect appropriate allocation and use of financial resources to support student learning programs and services.

Evidence of Meeting the Standard

As previously discussed, funds are allocated, as shown in the College Budget, in a manner that will realistically achieve the institution's stated goals for student learning. The College realizes the importance of allocating resources responsibly in support of student learning, and research data shows such allocation occurs [III.D.15](#).

In addition, the 50 Percent Law ensures the College, as a part of the District, spends a minimum amount of its unrestricted general fund on classroom instructional salaries. The District is in compliance with the 50 Percent Law, and the calculation for 2015-16 was 53.32 percent [III.D.36](#). Lastly, the District is in compliance with the Full Time Faculty Obligation (FON) which requires that the College employs a minimum number of full-time faculty as required by the state chancellor's office [III.D.37](#).

Analysis and Evaluation

The institution's financial documents, including the budget, have a high degree of credibility and accuracy, and reflect appropriate allocation and use of financial resources to support student learning programs and services. The institutional budget is an accurate reflection of institutional spending and has credibility with constituents. Salaries and benefits comprise 88-90% of the College's budget and the highest level of accuracy is assured since the budget information for personnel comes directly from the Human Capital Management (HCM) section of Workday, the HR/Finance software program the District uses. Operating expenses and equipment budgets are also accurate since they are developed through departmental meetings in the spring of each year. The \$1 million contingency reserve and any other uncommitted funds are discussed and shared with the participatory governance groups during BDRPC meetings [III.D.20](#).

BDRPC receives periodic reports showing monthly expenditures by all object codes compared to the annual budget [III.D.38](#) which ensures the credibility of budget information with constituents. Lastly, funding decisions are posted to the BDRPC page and circulated widely throughout the College to assure a high degree of transparency and understanding of funding decisions [III.D.39](#).

As evidenced above, financial documents are shared with the college community on a regular basis and in a transparent manner to ultimately promote the College's goals for student learning.

The College meets the standard.

Standard III.D.7 Financial Resources

Institutional responses to external audit findings are comprehensive, timely, and communicated appropriately.

Evidence of Meeting the Standard

As discussed previously, the institution has an annual external audit to provide feedback on its processes in accordance with California Education Code Section 8848 [III.D.40](#). Information about the College's budget, fiscal conditions, financial planning, and audit results are provided throughout the College. The District's tentative and adopted budgets are approved at the Board of Trustee's June and August meetings, respectively, each year [III.D.34](#), [III.D.41](#).

The District audit reports and findings are reported to the Board in November of each year [III.D.33](#). Any adjustments in financial management stemming from audit findings will be

formally incorporated starting with November of each year when the audit reports are presented to the Board, however any major findings would be addressed prior to that timeline to ensure the institution's sound financial management is maintained.

Analysis and Evaluation

Institutional responses to external audit findings are comprehensive, timely, and communicated appropriately. The past six audits have resulted in a total of three findings for Irvine Valley College: two in 2011-2012 and one in 2010-2011. Each of the findings was corrected before the next audit. These results are summarized below:

Table III.D-4 – SOCCCD Financial Audits

Fiscal Year	Finding	Reference
2014-2015	None	SOCCCD 2014-2015 Financial Audit Report III.D.42
2013-2014	None	SOCCCD 2013-2014 Financial Audit Report III.D.43
2012-2013	None	SOCCCD 2012-2013 Financial Audit Report III.D.44
2011-2012	Student Financial Assistance Cluster (Corrected) EOPS/CARE advisory committee meetings (Corrected)	SOCCCD 2011-2012 Financial Audit Report III.D.45
2010-2011	Lack of evidence for tracking TBA hour student participation (Corrected)	SOCCCD 2010-2011 Financial Audit Report III.D.46

The College meets the standard.

Standard III.D.8 Financial Resources

The institution's financial and internal control systems are evaluated and assessed for validity and effectiveness, and the results of this assessment are used for improvement.

Evidence of Meeting the Standard

As documented in section III.D.7, external auditors and/or funding agencies audit and review the College's funds, including special funds, regularly. Each year, the District is audited by an independent CPA firm (currently Christy White and Associates). All auxiliary funds (Associated Student Government, Community Education, Child Development Center, Foundation, and financial aid grants) undergo an annual independent financial audit along with the College's general fund. In addition to the annual audit, most programs have rules, guidelines, reporting requirements and separate audits specific to those programs. The audits demonstrate the integrity of the College's financial management practices, as reflected in the limited number of audit findings [III.D.32](#).

Expenditures from special funds are made in a manner consistent with the intent and requirements of the funding source. Restricted funds are allocated for specific purposes as defined by the corresponding granting or donor entities. The director or administrator of each department/project is responsible for managing their budgets and compliance with the rules and regulations of that specific funding source. The District does not have any funding from bonds.

The annual financial audit includes a review of the entire financial operations, including internal controls, compliance with laws and regulations, and the accuracy of the financial systems. As noted in Table III.D.4 (Table III.D-4 – SOCCCD Financial Audits), any findings issued are corrected in a timely manner to maintain the highest level of security and efficiency.

Analysis and Evaluation

The institution's financial and internal control systems are evaluated and assessed for validity and effectiveness, and the results of this assessment are used for improvement. The College and the District conducted several Business Process Analyses (BPAs) for the District's financial processes and the approvals and controls in place. Many of the outcomes of the recommendations were implemented in the new HR/Finance system, thereby improving business practices and internal controls of the District [III.D.47](#).

The College meets the standard.

Standard III.D.9 Financial Resources

The institution has sufficient cash flow and reserves to maintain stability, support strategies for appropriate risk management, and, when necessary, implements contingency plans to meet financial emergencies and unforeseen occurrences.

Evidence of Meeting the Standard

IVC aims to maintain sufficient reserves to address economic uncertainties. As documented in section III.D.1, IVC has consistently realized significant unrestricted general fund balances in the last several years. In addition, the District is in compliance with Board Policy 3100 (Budget Preparation) [III.D.48](#), which states that “unrestricted general fund reserves shall be no less than 7.5%” which is higher than the 5% recommended by the State Chancellor’s Office. Furthermore, a 20% Basic Aid reserve is required pursuant to Section 4.C (Contingency) of Administrative Regulation 3110 (Basic Aid Allocation Process) [III.D.5](#). Lastly, the capital outlay/basic aid fund of the District has a substantial amount of cash balance committed to specific future capital projects which may be temporarily transferred to another fund for the payment of obligations, including for emergencies, in accordance with the state budget and accounting manual [III.D.49](#).

Analysis and Evaluation

Overall, then, the institution has sufficient cash flow and reserves to maintain stability. The College has appropriate strategies for risk management and realistic plans to meet financial emergencies and unforeseen occurrences. The institution believes it has reasonable and sufficient financial resources to cover its costs in case of an emergency situation. Moreover, the institution believes that the cash receipt schedule does not pose any cash flow difficulties for the College.

The College meets the standard.

Standard III.D.10 Financial Resources

The institution practices effective oversight of finances, including management of financial aid, grants, externally funded programs, contractual relationships, auxiliary organizations or foundations, and institutional investments and assets.

Evidence of Meeting the Standard

The College develops its budgets based on funding sources available for operation. The unrestricted general fund is allocated for the main operations of the College based on the District Resource Allocation Model. Restricted funds are allocated for specific purposes as defined by the corresponding granting or donor entities. The director or administrator of each department or project is responsible for managing their budgets. Expenditure reports are generated by the department or provided by the Fiscal Office on a regular basis or as needed to assist with budget management. Any expenditure above budget is corrected within the department or by the appropriate vice president or the president. At the end of each year, the Fiscal Office conducts a comprehensive review of actual revenues/expenditures to strengthen

fiscal management and correct any possible errors. The review is shared with management and outcomes are incorporated into the next year's budget [III.D.50](#).

All auxiliary funds (Associated Student Government, Community Education, Child Development Center, Foundation, and financial aid grants) undergo an annual independent financial audit along with the College's general fund. In addition to the annual audit, most programs have rules, guidelines, reporting requirements and separate audits specific to those programs [III.D.32](#).

Demonstrating compliance with Federal Title IV regulations and requirements, the financial aid grants and operations are audited at least on an annual basis as part of the district, state, federal or veteran's affairs audits. In addition, the Blue Book "is intended to provide guidance to those offices and individuals responsible for managing, keeping records of, accounting for, and reporting on the use of federal funds at institutions that participate in the Title IV, Federal Student Aid programs." There is a self-reporting requirement for the financial aid programs at the year end [III.D.51](#).

Institutional grants are administered by the Office of Grants and Contracts within the Office of Academic Programs and Economic and Workforce Development. The state and federal granting agencies conduct periodic and ad hoc audits to ensure the funds are spent in compliance with the rules and regulations governing the grant [III.D.52](#).

Analysis and Evaluation

The College exercises effective oversight of finances and provides effective fiscal management of its auxiliary programs. The College uses results of these evaluations as the basis for improvement. As noted in Table IIID-4 (Table III.D-4 – SOCCCD Financial Audits), any audit findings issued are corrected in a timely manner to maintain the highest level of security and efficiency.

The College meets the standard.

Standard III.D.11 Financial Resources

The level of financial resources provides a reasonable expectation of both short-term and long-term financial solvency. When making short-range financial plans, the institution considers its long-range financial priorities to assure financial stability. The institution clearly identifies, plans, and allocates resources for payment of liabilities and future obligations.

Evidence of Meeting the Standard

The institution has evidence of long-term fiscal planning and priorities. Specifically, the institution's *Five-Year Budget Model* is reviewed by the BDRPC on a regular basis [III.D.20](#). The *Five-Year Budget Model* was developed by the College's Fiscal Office utilizing various sources of information including the District Revenue Allocation Model, costs-of-living-and-doing-business assumptions, and enrollment growth assumptions. The *Five-Year Fiscal Plan* was utilized as a planning tool to maintain the financial health of the institution while realistically assessing the resources that would be available for institutional improvements. According to the IVC Comprehensive Budget Development Process [III.D.3](#) by the end of May, June, and as necessary, BDRPC develops and updates revenue expenditure projections for the following fiscal year and for a longer planning horizon to identify ongoing and one-time sources of funds that have not been committed and any restrictions on those funds. SPAC reviews any unfunded resource requests and updates funding recommendations to the president.

The College has plans for payments of long-term liabilities and obligations, including debt, health benefits, insurance costs, and building maintenance costs. The College follows the Board of Trustees Budget Development Guidelines [III.D.1](#) published annually as part of the District's final budget. Guideline # (5) disallows deficit financing defined as a budget in which projected expenditure exceeds projected revenue for the year. Furthermore, the institution remains committed to directing ongoing revenues to cover ongoing expenditures only, while committing one-time revenues to one-time expenditures. Unrestricted general fund revenues are identified through the District Revenue Allocation Model and include primarily the property taxes within the state apportionment formula and non-resident tuition fees. The bulk of ongoing expenditures are permanent personnel and utility costs. The College does not have any long-term debt instruments.

Health benefit costs are included in the College's Five-Year Budget Model and are continually monitored by BDRPC as a part of annual budget planning process. The state provided base allocation adjustments in 2015-16 and 2016-17 in order to accommodate the rising health benefit costs along with pension costs for community colleges.

Liability insurance costs are covered as an assessment on college Full Time Equivalent Student (FTES) income through the District Revenue Allocation Model (DRAC) [III.D.53](#).

Building maintenance costs have been covered through a combination of state and local scheduled maintenance funds. The college conducted a comprehensive Facility Condition Assessment in May 2016 [III.D.54](#) as a part of a district wide 20-year projection of facility needs including projected cost and revenue. This information is used in short-term and annual budget and other fiscal planning.

Analysis and Evaluation

The College's financial resources provide a reasonable expectation of both short-term and long-term financial solvency. The Institution allocates resources to address long-term obligations. Currently, there are no long-term debts in the entire District. Resources are directed to actuarially developed plans for Other Post-Employment Benefit (OPEB) obligations, and the OPEB liability has been fully funded through a trust fund. According to the most recent SOCCCD Actuarial Valuation of Retiree Health Program Report the trust is adequately funded to meet future obligations. The actuarial plan to determine OPEB liability is current and prepared as required by appropriate accounting standards [III.D.55](#).

Through integrated and regular planning processes, the institution is able to assure that its short-range and long-range priorities are consistent. The institution meets its liabilities and future obligations while maintaining financial stability.

The College meets the standard.

Standard III.D.12 Financial Resources

The institution plans for and allocates appropriate resources for the payment of liabilities and future obligations, including Other Post-Employment Benefits (OPEB), compensated absences, and other employee related obligations. The actuarial plan to determine Other Post-Employment Benefits (OPEB) is current and prepared as required by appropriate accounting standards.

Evidence of Meeting the Standard

As documented in section III.D.11, currently, there are no long-term debts in the entire District. Resources are directed to actuarially developed plans for OPEB obligations and the OPEB liability has been fully funded through a trust fund [III.D.55](#).

The institution plans for and allocates appropriate resources for the payment of liabilities and future obligations for compensated absences and other employee-related obligations. Liabilities related to employee-compensated absences are handled as part of the college budget. In areas with a higher rate of absences and/or required coverage for services such as Maintenance and Operations and Campus Police, a baseline budget is provided to cover substitute expenditures during such absences. STRS and PERS rates are anticipated to increase significantly over the next five years. STRS rate increases have already been set by the legislature; PERS rates are set each year by the PERS Board. For FY 2016-2017, the increased cost over the prior year is estimated at \$2.8 million. This amount will grow an additional \$9 million by FY 2020-2021. The Board has approved participation in a Pension Stabilization Fund to offset these increased costs. An initial deposit of \$14.5M was made in

FY 2015-2016 with an additional \$12.6M budgeted from basic aid funds for FY 2016-2017 [III.D.1](#).

Analysis and Evaluation

The College plans for and allocates appropriate resources for the payment of liabilities and future obligations, including Other Post-Employment Benefits (OPEB), compensated absences, and other employee related obligations.

The College meets the standard.

Standard III.D.13 Financial Resources

On an annual basis, the institution assesses and allocates resources for the repayment of any locally incurred debt instruments that can affect the financial condition of the institution.

As documented in sections III.D.11 and III.D.12, the College does not have any locally incurred debt instruments.

Standard III.D.14 Financial Resources

All financial resources, including short- and long-term debt instruments (such as bonds and Certificates of Participation), auxiliary activities, fund-raising efforts, and grants, are used with integrity in a manner consistent with the intended purpose of the funding source.

Evidence of Meeting the Standard

The College develops its budget based on funding sources available for operations. The unrestricted general funds are allocated for the main operations of the College based on the District Resource Allocation Model. Restricted funds are allocated for specific purposes as defined by the corresponding granting or donor entities. The director or administrator of each department or project are responsible for managing their budgets. Any expenditure above budget is corrected within the department or by the appropriate vice president or the president. At the end of the each year, a comprehensive review of actual revenues/expenses is conducted by the Fiscal Services Department to strengthen fiscal management, and correct any possible errors. The review is shared with management, and the outcomes are incorporated in the next year's budget [III.D.50](#).

Each expenditure is reviewed online by the corresponding manager, including all auxiliary operations and grants to ensure the expense is used for its intended purpose. The expenditure

is also reviewed by management at the District to ensure it is being used for the intended purpose [III.D.56](#).

Analysis and Evaluation

The College does not have any debt repayment obligations. The subject of short-term and long-term financial liabilities and future obligations is covered in more detail in sections III.D.11 and III.D.12.

The College meets the standard.

Standard III.D.15 Financial Resources

The institution monitors and manages student loan default rates, revenue streams, and assets to ensure compliance with federal requirements, including Title IV of the Higher Education Act, and comes into compliance when the federal government identifies deficiencies.

Evidence of Meeting the Standard

The Department of Education has now gone to a 3-year CDR calculation, with 2012 being the most recent cohort. The Official 3-year Cohort Default Rates for the (3) most recent years at IVC are as follows:

<u>Year</u>	<u>Rate</u>
2012 Official	8.9%
2011 Official	14.7%
2010 Official	14.6%

The default rate at IVC is within the federal guidelines and is considered adequate for a community college based upon the demographics of our student population. Anything less than 10 percent removes additional restrictions placed by the Department of Education on schools when disbursing student loan funds. New business practices are underway to develop a plan to reduce the default rate if it ever should exceed the federal guidelines.

Student loan default rates, revenues, and related matters are monitored and assessed to ensure compliance with federal regulations. The Financial Aid Office continually monitors the default activity, working with the skip trace reports from servicers, and speaking with other schools on best practices, including reaching out to delinquent borrowers by developing a communication plan to keep the default rate below 10 percent. Beginning spring 2016, the Financial Aid Office began participation with the U.S. Department of Education in Experimental Site #6 - Limit Direct Unsubsidized Loan Over-borrowing. As a result, the

College only offers Direct Unsubsidized Loans to students who have completed 24 units of college level coursework and have a “satisfactory” academic progress status as students in these populations have the highest risk of defaulting on student loans. The financial aid grants and operations are audited at least on an annual basis as part of the district, state, federal or veteran’s affairs audits. In addition, the Blue Book “is intended to provide guidance to those offices and individuals responsible for managing, keeping records of, accounting for, and reporting on the use of federal funds at institutions that participate in the Title IV, Federal Student Aid programs.” There is a self-reporting requirement for the financial aid programs at the year-end [III.D.51](#).

Analysis and Evaluation

The institution monitors and manages student loan default rates, revenue streams, and assets to ensure compliance with federal requirements.

The College meets the standard.

Standard III.D.16 Financial Resources

Contractual agreements with external entities are consistent with the mission and goals of the institution, governed by institutional policies, and contain appropriate provisions to maintain the integrity of the institution and the quality of its programs, services, and operations.

Evidence of Meeting the Standard

The institution has several types of contracts with various external entities, such as independent contractor agreements, service maintenance agreements, construction contracts, software agreements, and memorandums of understanding. All contracts support the mission of the College by supporting the activities under the appropriate school or department. All contracts are approved by the college president, or designee, and the vice chancellor of Business Services and ratified by the Board of Trustees. If warranted, the District seeks external legal advice prior to signing a contract to protect the College against liabilities and maintain the integrity of the institution. The Office of Instruction and Academic Senate have an agreement to sunshine academic contracts in the Academic Senate to provide discipline experts an opportunity to vet the contracts and to assure the contracts are conducive to academic freedom. Annual facility rentals are signed by the Director of Facilities who serves on the Budget Development and Resource Planning Committee as well as the Strategic Planning and Accreditation Council. Lastly, the Bookstore Task Force and the Cafeteria Task Force are charged to oversee the contract negotiations with the Bookstore and Cafeteria, respectively [III.D.32](#).

The contracts signed by the District have an early termination clause for situations when work performed does not meet the expectations of the institution. They also have an indemnification clause and liability and other insurance requirements aimed at minimizing the risk for the District [III.D.57](#). To guide the College with the contract process and requirements, the District has a comprehensive website with agreement templates and helpful tips [III.D.58](#).

External contracts that are related to federal funding or programs are managed in a manner to ensure that federal guidelines are met [III.D.59](#), [III.D.60](#).

Analysis and Evaluation

The College's contractual agreements with external entities are consistent with the mission and goals of the institution, governed by institutional policies, and contain appropriate provisions to maintain the integrity of the institution and the quality of its programs, services, and operations. The institution has reliable internal controls in place pertaining to contract negotiations, and there are strong connections between the contract operations and the College's mission.

Standard IV: Leadership and Governance

The institution recognizes and uses the contributions of leadership throughout the organization for promoting student success, sustaining academic quality, integrity, fiscal stability, and continuous improvement of the institution. Governance roles are defined in policy and are designed to facilitate decisions that support student learning programs and services and improve institutional effectiveness, while acknowledging the designated responsibilities of the governing board and the chief executive officer. Through established governance structures, processes, and practices, the governing board, administrators, faculty, staff, and students work together for the good of the institution. In multi-college districts or systems, the roles within the district/system are clearly delineated. The multi-college district or system has policies for allocation of resources to adequately support and sustain the colleges.

Introduction

Irvine Valley College (IVC) is committed to creating an environment in which all members of the college community have the opportunity to effectively participate in institutional planning and decision-making. To create an environment for empowerment, innovation, and institutional excellence, the College leadership encourages faculty, staff, administrators, and students to participate fully in the decision-making process. Stakeholders have a variety of avenues for participating in discussions about strategic planning, budget development, resource allocation, student learning, student support programs, and institutional effectiveness. Through the use of formal and informal structures, the College and District leadership encourages broad participation in the planning and decision-making processes to increase institutional effectiveness.

IVC and the South Orange County Community College District (SOCCCD) have undertaken significant efforts to address the 2010 ACCJC recommendations required for reaffirmation of Accreditation. As outlined in the 2013 Irvine Valley College Midterm Report ([IV.A.1](#)), the College and District are proud of these improvement efforts and continue to meet all Accreditation standards. Ten of the twelve 2010 ACCJC recommendations were related to Standard IV (Leadership and Governance) and are addressed throughout. For example, two recommendations from 2010 that pertain to the ability of administrators, faculty, staff, and students to work together for the good of the institution are:

- College Recommendation 4: *In order to improve, the team recommends that the college enhance communication among constituencies, especially those with supervisorial/subordinate roles, regarding established procedures and decision-making practices in a collegial manner.*

- College Recommendation 6: *Although the college and its constituent groups have achieved a collegial working relationship with the current president to address issues with a new optimism, the college does not have this same type of relationship with the district leadership and the Board of Trustees. While some progress has been made and policies have been developed, the team feels that Recommendations 7 and 8 (Standards IV.A.1, 2, 3, 5) of the 2004 visiting team Accreditation Team have not been fully met.*

As part of the ongoing process for improvement, IVC and SOCCCD as a whole have adopted strategic planning goals that address “respectful interactions and collaboration.” (IV.A.2) (IV.A.3), convened a Task Force on Barriers (IV.A.4) and facilitated Higher Understanding Gatherings Sessions (HUGS) (IV.A.5) (discussed in Standard IV.D.2), and have included questions specific to the above recommendations in the institution’s bi-annual employee surveys as one of several means of evaluating this progress. Consequently, the pertinent facts from the most recent employee surveys are important considerations. For the 2015 Irvine Valley College Employee Survey (IV.A.6), 314 respondents’ responses are summarized below in Table IV.1. For the 2014 District wide Climate Survey (IV.A.7), 781 respondents’ responses are summarized in Table IV.2. Due to the varied wording of Likert-Scale prompts, non-negative responses are presented in Table IV.1 and Table IV.2 for quick analysis. More complete analysis can be completed by reviewing the entire survey results (IV.A.6, IV.A.7).

Table IV.1: Excerpts and Summary of IVC Employee Survey Results 2015

Statement / Question	Non-negative Responses (percentage)
Assessment of the working relationship between IVC and District Services.	89
Assessment of working relationship between IVC and Saddleback.	87
The District provides effective leadership that supports the College's mission.	72
The administration at the District is generally respected by employees.	73
The administration at IVC provides effective leadership that supports the College's mission.	78
District administrators and managers usually make decisions that are fair.	73
I have the opportunity to participate meaningfully in shared governance at IVC.	86
I am informed about budget decisions that affect my work area.	58

Statement / Question	Non-negative Responses (percentage)
I regularly receive the information I need to help me fulfill my job responsibilities.	79
I am content with the amount of information I receive on the major issues being addressed by my participatory governance representatives.	84
I am content with the amount of information I receive on the major issues being addressed by the college president.	78
The college president communicates regularly with all constituencies.	77
Staff and faculty members are kept informed about support services available for students.	82
I am content with the amount of information I receive on the major issues being addressed by the Chancellor.	68
The District Chancellor communicates regularly with all constituencies.	69

Table IV.2: Excerpts and Summary of the SOCCCD District wide Employee Survey Results 2014

Statement / Question	Non-negative Responses (percentage)
Overall, how would you assess the working relationship between Irvine Valley College and District Services?	90 (55 n/a)
Overall, how would you assess the working relationship between Irvine Valley College and Saddleback College?	81 (33 n/a)
Administrators throughout the District provide effective leadership that supports the District's mission.	71
Administrators throughout the district provide effective leadership that supports the District wide Strategic Plan.	76
Administrators throughout the District follow established policies, procedures, and protocols.	71
Administrators throughout the District understand the roles of the colleges and district services.	70
Administrators throughout the District encourage civility and respectful behavior.	73

Statement / Question	Non-negative Responses (percentage)
Administrators throughout the District encourage collaboration.	68
Administrators throughout the District encourage respectful interaction.	72
I have the opportunity to participate meaningfully in decisions at work.	67
I regularly receive information on the major issues being addressed by the college presidents.	68
I regularly receive information on the major issues being addressed by my participatory governance representatives.	78
I regularly receive information on the major issues being addressed by the chancellor.	69
I am aware of the district wide integrated strategic planning process.	69

Students, faculty members, classified staff, managers, and administrators are encouraged to take initiative in improving the practices, programs, and services within the institution. In order to ensure all members of the college community have the opportunity to participate effectively, the College developed and adopted in 2008 the Irvine Valley College Planning and Decision-Making Manual (IVC-PDM) ([IV.A.8](#)). The IVC-PDM clearly delineates the role and scope of authority of all college councils, committees, and task forces, and the roles of each participatory governance constituent group in order to provide sufficient information for members of the College to participate effectively. Processes by which the College participates in district wide decisions are described in the SOCCCD District Wide Planning and Decision-Making Manual (SOCCCD-PDM) ([IV.A.9](#)), which will be discussed in detail in sections addressing Standards IV-C and IV-D. The SOCCCD-PDM also describes the relationship between college constituent groups, the district councils and committees, and the process by which college leadership interacts with the Board of Trustees.

Standard IV.A: Decision-Making Role and Processes

Standard IV.A.1 Decision-Making Role and Processes

Institutional leaders create and encourage innovation leading to institutional excellence. They support administrators, faculty, staff, and students, no matter what their official titles, in taking initiative for improving the practices, programs, and services in which they are involved. When ideas for improvement have policy or significant institution wide implications, systematic participative processes are used to assure effective planning and implementation.

Evidence of Meeting the Standard

Irvine Valley College (IVC) and the South Orange County Community College District (SOCCCD) support the rights of faculty, staff, students, managers, and administrators to participate effectively in District and College governance processes in accordance with Education Code §70902(b)(7). Additionally, IVC has adopted a governance structure and policies that encourage leadership at all levels of the organization and promote the sharing of ideas and suggestions for improving institutional effectiveness: student performance and outcomes, fiscal stability, academic quality, and federal and state compliance. The *Irvine Valley College Planning and Decision-Making Manual* (IVC-PDM) ([IV.A.8](#)), and the *Participatory Governance Decision-Making Flowchart* ([IV.A.10](#)) outline IVC's formal committee structure. This committee structure was developed to create an environment for empowerment, innovation, and institutional excellence.

The College adopted the IVC-PDM in 2008 in order to provide opportunities for effective participation by all members of the college community in institutional planning and to ensure individuals would be able to contribute ideas for institutional improvement. The College also adopted a consensus decision-making philosophy (described in the IVC- PDM) and discussed during its regular review. According to this philosophy, it is the responsibility of institutional leaders to establish a safe harbor wherein members of the College community can engage in honest and open dialogue. Additionally, IVC overhauled its committee structure to include task forces and work groups to permit members of all constituent groups, including students, to participate either in smaller groups with more focused charges or in a larger committee that intentionally represented the breadth of the campus community.

The commitment to promote student, faculty, staff, and administrator input in planning and decision-making can be illustrated with the following example. In 2013 the Director of Fiscal Services predicted the possibility of a budget shortfall by 2015. In response, the budget committee recommended that the Budget Solutions Recommendations (BSR) Work Group be established to investigate the budget in detail and make suggestions to address the impending deficit. BSR examined several department budgets and the budget continuity process in detail to gain a better understanding of the extent to which department budgets were "rolled over" and the extent to which they were annually re-evaluated. IVC also placed a link on Inside IVC ([IV.A.11](#)), available to all employees, for suggestions and comments

regarding the budget and college priorities. While the participatory governance committees and councils continued to look at budgetary issues in their formal meetings within their purview, the BSR site gleaned a large number of suggestions. Moreover, the BSR has now been incorporated into the Budget Development and Resource Planning Committee (BDRPC) as a work group that can be convened as needed, and its Inside IVC page ([IV.A.11](#)) persists with a link—“Add a Suggestion”—perpetually available to the campus community to participate directly, as well as through their governance committee representatives. Thus, the entire college staff was aware of the global budgetary concerns, broad discussion ensued, and suggestions were fielded and used from all interested members of the campus to solve the problem.

A noteworthy consideration concerns the College’s efforts to promote innovation at all levels of the organization through professional development. In the IVC Strategic Plan ([IV.A.12](#)), two of the college goals involve professional development; the same is true in the SOCCCD Strategic Plan ([IV.A.13](#)). One of these goals focuses on professional development to improve student learning and student success; the other involves encouraging employees of all titles and positions to undertake professional development to improve their work productivity or to move to another position to which they aspire perhaps because of increased responsibility or perhaps because it better fits their strengths or personal preferences. The benefit to the institution of professional development activities directed to improving student learning and student success are readily apparent. Promoting employee satisfaction with their work by making them more successful at what they are currently doing, as well as by encouraging employees to move into more congenial work situations in which they are likely to be more successful and satisfied, contribute to improving the work product and the climate of the institution.

Similarly, several categorical grant programs, such as Student Equity, SSSP, BSI, Perkins, and AANAPISI, support directed relevant professional development for faculty members, administrators, and staff. In each of these cases, members of the faculty, administration, and staff who participate in these activities, conferences, workshops, and events are better able and expected to participate actively and assume leadership roles in the focus area of the supported activity.

Analysis and Evaluation

The governance structure and culture in the District and at IVC endorse individual involvement and responsibility for promoting best practices that enhance programs and services regardless of the individual’s title, constituent group, or level in the organization. Constituent members are encouraged to voice concerns, share ideas, and communicate freely about College and District programs and services.

The College committee structure is one facet of the effort to encourage and support involvement of all employees and students to develop and explore their ideas for improving the College as a whole, or specific aspects of the institution. The extensive systematic participatory committee structure described in the IVC-PDM institutionalizes this approach. Interested members of the staff, administration, faculty, and the student body can choose to become involved in task forces or work groups with highly focused charges, or in strategic planning committees or councils that make recommendations for policy or decisions with significant institution wide implications which include prioritizing allocations of resources for personnel, equipment, facilities, technology, student success initiatives, and academic and enrollment planning. In this environment, students, faculty, staff, managers, and administrators openly share ideas through their committee and task force representatives, and the formal and informal participatory governance and review structures provide a framework for innovation.

The College meets the standard.

Standard IV.A.2 Decision-Making Role and Processes

The institution establishes and implements policy and procedures authorizing administrator, faculty, and staff participation in decision-making processes. The policy makes provisions for student participation and consideration of student views in those matters in which students have a direct and reasonable interest. Policy specifies the manner in which individuals bring forward ideas and work together on appropriate policy, planning, and special-purpose committees.

Evidence of Meeting the Standard

The College relies on Board Policies, Administrative Regulations, and college governance procedures to establish the rights of faculty, staff, administrators, and students to participate effectively in the governance and resource allocation processes. Board Policy 2001 (Administrative Organization) ([IV.A.14](#)) outlines the college presidents' responsibilities for the development of college governance committees.

In accordance with Title 5, §53200(c), Board Policy 2100.1 (Delegation of Authority to the Academic Senate) ([IV.A.15](#)) asserts that the "district and college governance structures, as related to faculty roles" are academic and professional matters requiring collegial consultation between the college president and the Academic Senate. Board Policy 2100.2 (Role and Scope of Authority of the Academic Senates) ([IV.A.16](#)) espouses that faculty have not only the right to participate and express opinions at the college and district level but the guarantee that their opinions will be given every reasonable consideration. Additionally, Board Policy 6100 (Curriculum) ([IV.A.17](#)) establishes that the Academic Senate assumes

primary responsibility for making recommendations in the areas of curriculum and academic standards.

In accordance with the Higher Education Employment Relations Act (HEERA), the District recognizes the Faculty Association as the exclusive representative of full-time and part-time faculty of the District for the purposes of meeting and negotiating. In doing so the District complies with Chapter 10 of the Meyers-Milius-Brown Act, which promotes full communication between public employers and their employees by providing a reasonable method of resolving disputes regarding wages, hours, and other terms and conditions of employment between public employers and public employee organizations.

Assembly Bill (AB) 1725 directs the Board of Trustees to provide an opportunity for classified staff input on all matters that affect staff. There are four organizations within the South Orange County Community College District that assume this role: the Saddleback College Classified Senate, the Irvine Valley College Classified Senate, the California School Employees Association (CSEA), and the Police Officers Association (POA). The CSEA and the POA are the exclusive collective bargaining representatives for the groups they represent. All nonexempt classified employees, other than police officers, are represented by the CSEA. The CSEA has the right to appoint the first representative to any committee and the College Classified Senate has the right to appoint the second. As a practical matter, most governance committees offer seats to each exclusive representative and a representative from each Classified Senate.

Board Policy 4056 (Classified Employees Participation in Decision Making) ([IV.A.18](#)) and Title 5, §51023.5, define the right of classified staff to participate effectively in college governance through the Classified Senate. Accordingly, the Classified Senate is included in the joint formulation and development of District and College policies and procedures that significantly affect the classified staff and the opinions and recommendations of the Classified Senates of the District are given every reasonable consideration.

Title 5, Section 51023.7, Calif. Ed. Code, Section 70902[b][7]), and Board Policy 5627 (Student Participation in Governance) ([IV.A.19](#)) authorize student participation in the decision-making processes that significantly affect them and recognize the Associated Student Government at each college in the District. Board Policy 5240 (Associated Students' Organization) ([IV.A.20](#)) established the Associated Students as the official voice for the students in the college consultation process. Consequently, the Associated Students of Irvine Valley College (ASIVC) play an integral role in student clubs and activities as well as college governance.

To ensure administrators have a substantive and clearly defined role in institutional governance and exercise a substantial role in institutional policies, planning, and budget, the IVC Planning and Decision-Making Manual (IVC-PDM) ([IV.A.8](#)) clearly delineates the role and scope of authority of the Administrative Councils. The administrative structure consists of the Strategic Planning and Accreditation Council, the President's Executive Council, the Vice President for Instruction's Council, the Instructional Council, and the Student Services Council. The charge of each council, membership, and reporting responsibilities are defined in the manual and outlined in Standard IV.A.3.

The processes for college and district strategic planning and decision-making are described fully in the IVC-PDM ([IV.A.8](#)), the SOCCCD District-Wide Planning and Decision-Making Manual (SOCCCD-PDM) ([IV.A.9](#)), and on the SOCCCD SharePoint site where the district wide committees' membership and charge are published. District wide planning and decision-making will be discussed in detail in the narrative for Standard IV.C. The interface between district wide and college committees and representation on these committees has two main components: District wide committees have representatives from the two Colleges and District Services, and college representatives report back to relevant college groups where matters of concern are discussed. College representatives, thus, are clear about the consensus perspective of the groups they represent when they meet in district wide committees. District committees' membership usually balances representation from the two Colleges and District Services and among the constituent governance groups—faculty, classified staff, administrators and managers, senates and bargaining units, and students—so that all voices may be heard with clearly defined roles.

Analysis and Evaluation

Student learning is the focus of the governance and decision-making processes. Individuals are encouraged to bring ideas for improvement through their representatives on the committees, task forces, work groups, and administrative councils through the agreed upon decision-making processes. College leadership has worked with the Board of Trustees to increase the ability of faculty to serve in key leadership roles by increasing the amount of reassigned time and/or stipends available to faculty. Managers and administrators are encouraged to make accommodations so classified staff may attend meetings and represent their constituents, and ASIVC draws upon their membership to find student representatives to attend regularly scheduled governance meetings.

Within IVC, the nature of participatory governance in planning and decision-making is substantiated by the revisions of the IVC-PDM that established faculty co-chairs for each of the strategic planning committees (SPCs) and the Strategic Planning and Accreditation Council (SPAC) ([IV.A.8](#)). This intentional inclusion of faculty co-chairs for participatory

governance committees reflects the college wide appreciation for the role and responsibilities of the faculty in planning and decision-making. Most of the task forces and work groups also sport faculty and administration co-chairs, in the same spirit. Furthermore, the number of faculty members as well as their proportion on college task forces, committees, and SPAC have increased gradually for several years, following the specific intention in the last major IVC-PDM revision.

IVC committees have student members, either voting or non-voting, as deemed appropriate in each instance. For example, students are invited to attend and speak at Academic Senate meetings but do not have a voting role in this organization that specifically represents the professional interests of the IVC faculty. On the other hand, student members of college committees have the same voting privileges as any other member, but it should be emphasized that virtually all decisions in these committees are accomplished through consensus, rather than voting. College committees have seen a remarkable and welcome increase in attendance and participation by student representatives during the past two to three years.

The College meets the standard.

Standard IV.A.3 Decision-Making Role and Processes

Administrators and faculty, through policy and procedures, have a substantive and clearly defined role in institutional governance and exercise a substantial voice in institutional policies, planning, and budget that relate to their areas of responsibility and expertise.

Evidence of Meeting the Standard

In accordance with Title 5, California Code of Regulations §53023, SOCCCD enacted board policies BP-2100.1 (Delegation of Authority to the Academic Senate [IV.A.14](#)), BP-2100.2 (Role and Scope of Authority of the Academic Senates [IV.A.16](#)), BP-6100 (Curriculum [IV.A.17](#)), BP-4056 (Classified Employees Participation in Decision Making [IV.A.18](#)), and BP-5627 (Student Participation in Governance [IV.A.19](#)) which provide clear delineation of roles so committee compositions, bylaws, and negotiated collective bargaining agreements all reflect the rights and responsibilities of faculty, staff, students, managers, and administrators to engage in college and district governance processes. Included in their responsibilities, department chairs, managers, and administrators have regular unit meetings to provide opportunities to exchange ideas for program change and improvements.

IVC reorganized its committee structure in 2008 under the auspices of a group convened by the president that included the president of the Board of Trustees, the SOCCCD Deputy Chancellor, and many IVC employees, including the vice presidents, the president of the Academic Senate, and a wide diversity of members of the faculty, classified staff, administration, and classified managers. The inclusion of the Deputy Chancellor and Board president ensured that all of the work was familiar and acceptable at the district level and that they witnessed the inclusive nature of the process. This process constituted a change in the relationships among groups on campus and with the Chancellor's Office and the Board. Since that time, the trust and ability to engage in fruitful and open dialog has grown to attain, for the past several years, a sustainable relationship among constituent groups at the College and throughout the District.

Since 2008 The Irvine Valley College Planning and Decision-Making Manual (IVC-PDM) ([IV.A.8](#)) has been the primary document that specifies the systematic processes by which individuals, representatives of constituent groups, and members of the administration work together to make decisions that support student learning programs and services, and institutional effectiveness. The charge, membership, role and scope of authority of Strategic Planning Councils, committees, task forces, Academic Senate, Classified Senate, employee bargaining units, and students are clearly delineated in the manual to ensure all members of the college community have the opportunity for effective participation in planning and decision-making processes.

In an effort to clarify and reduce redundancy in the committee structure, IVC uses the terms "council" or "committee" when referring to strategic planning committees, and "task force" and "work group" for other participatory groups. Membership in all of these, with the exception of work groups, is delineated in the IVC-PDM and can be changed only by agreement of the Academic Senate and Strategic Planning and Accreditation Council

(SPAC), with final approval by the president. Membership on college committees and task forces includes representatives of the student body appointed by the ASIVC; faculty representatives appointed by the Academic Senate and in some instances the bargaining unit, the Faculty Association (FA); classified staff appointed by the bargaining unit, the California School Employees Association (CSEA), and the Classified Senate; classified managers and administrators appointed by the appropriate vice president. Work groups can be called together for a specific function and have more variable membership; no college wide approbation is required for these units, which are usually temporary although a few persistent work groups are exceptions and are described in the IVC-PDM. They remain designated as work groups in order to permit more flexibility in their membership and schedule.

In 2008 IVC overhauled its committees as much as seemed feasible at that time, and established a revamped College Council that funneled recommendations from five strategic planning committees (SPCs) to the president and his President's Executive Council for final decisions. Most of the other committees and task forces reported to one or more of the SPCs. The intention behind this organization was that this structure would permit members of all constituent groups, including students, to participate either in smaller groups with more focused charge, which were not necessarily completely representative, or in larger SPCs that intentionally represented the breadth of the campus community for a more integrated discussion of the issues in the context of the strategic plan. During the 2011-2012 academic year, the SPC for Institutional Effectiveness undertook a significant revision of the IVC-PDM ([IV.A.8](#)) including combining two of the SPCs and moving strategic planning from the budget committee (hitherto Strategic Planning Oversight and Budget Development Committee) to what had been called College Council, thus forming the Strategic Planning and Accreditation Council (SPAC). Membership in the SPCs and SPAC of non-administrators, especially faculty members, was increased.

The organization's discussions and decision-making philosophy, which are part of annual committee reviews, keep the campus community aware of the intentionality of our committee structure and consensus-oriented, decision-making process. All interested members of the college community are encouraged to participate in the conversation. The "safe harbor" and consensus model is discussed often, keeping both in the public view.

The four SPCs are the:

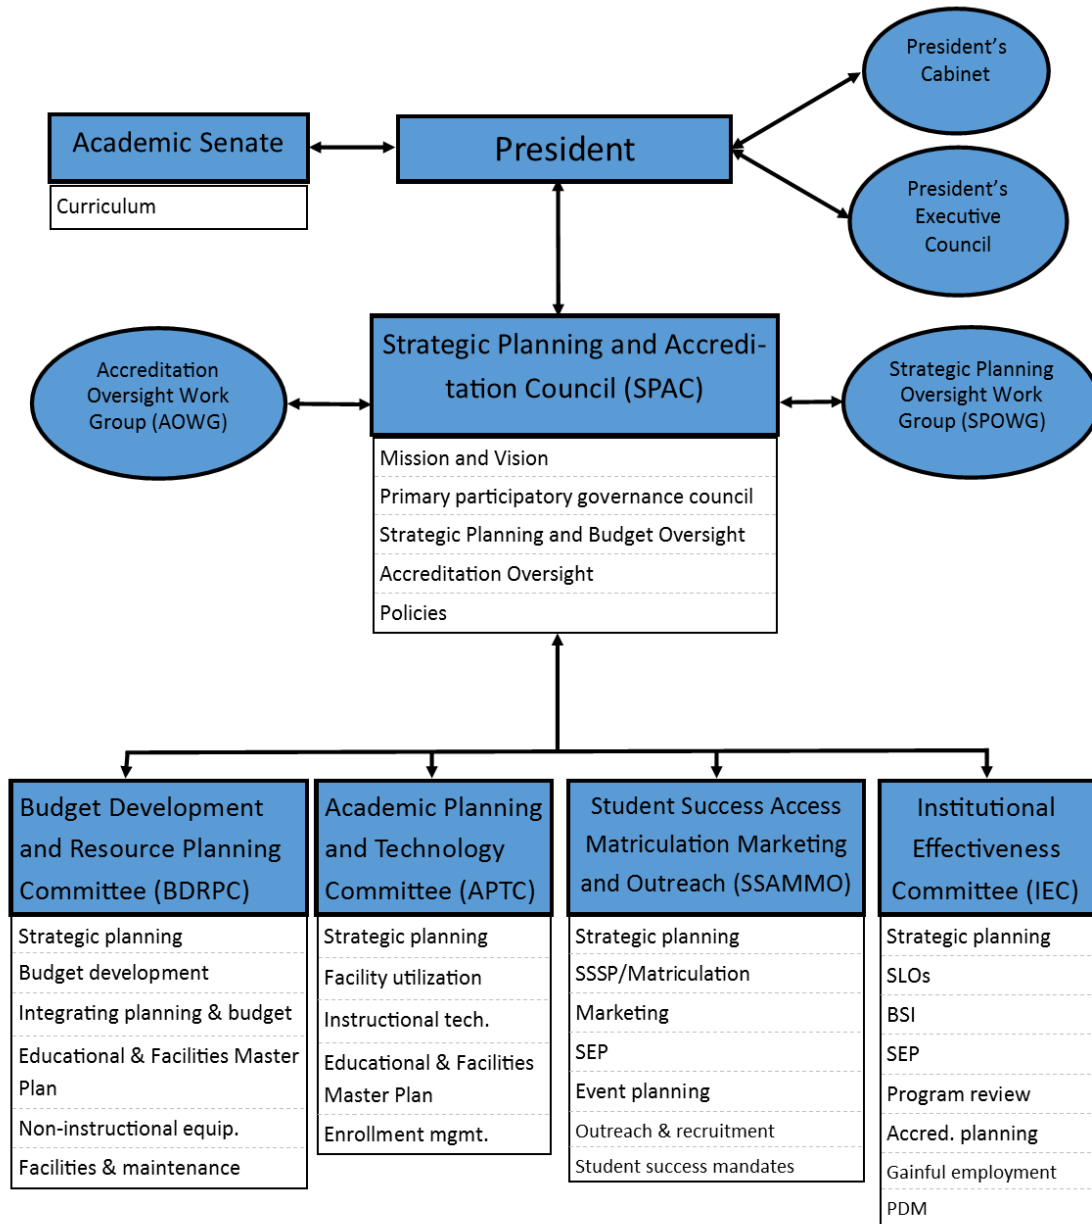

- Academic Planning and Technology Committee (APTC)
- Institutional Effectiveness Committee (IEC)
- Budget Development and Resource Planning Committee (BDRPC)
- Student Success, Access, Matriculation, Marketing, and Outreach Committee (SSAMMO)

Each Strategic Planning Committee meets regularly throughout the academic year and operates with specific charges, membership, and reporting responsibilities, as described in

the IVC-PDM. All meetings are open, and interested parties are encouraged to attend and participate. Committee agendas and minutes are posted on the college SharePoint site, “Inside IVC”. Discussions in all of the committees, task forces, and councils range from the effects of the committee’s charge on student learning and success, definitions of student success from various perspectives, programs and services offered by the College and District as they pertain to student success, employee satisfaction and efficiency, institutional planning, and the evaluation/assessment of college policies, procedures, and practices. The organizational structure of the College is thus designed to provide the opportunity for effective participation, inclusivity, and communication. Further, it is designed to have a certain amount of overlap among SPCs and between each task force and the SPC to which it reports, in order to ensure many people are able to discuss vital issues in a variety of combinations and contexts. While this organizational format inevitably leads to a certain amount of redundancy, IVC’s experience to date has been that this system works best when knowledgeable people span committees to ensure good integration and depth of understanding.

Implementation of policies and procedures regarding institutional improvement is the responsibility of the Administrative Councils ([IV.A.21](#)). The college administrative councils include the President’s Executive Council, the President’s Cabinet, the Vice President for Instruction’s Council, the Instructional Council, the Administrative Services Council, and the Student Services Council. Each Administrative Council has specific charges, defined membership, and a clearly delineated system of reporting responsibilities. The roles and responsibilities of the administrative councils are outlined below ([IV.A.21](#)):

Participatory Governance Decision-Making Process Flowchart

Analysis and Evaluation

Students, faculty, staff, managers, and administrators have clearly defined roles in the governance process. They are called upon to participate actively on committees, task forces, and work groups in accordance with established policies and procedures. IVC's participatory governance committees have membership from each of the primary constituency groups and decisions are made in an inclusive manner. Each SPC and SPAC annually evaluates its role in leadership of the governance and decision-making processes to ensure integrity and effectiveness. The results of the evaluation are widely communicated and form the basis for improvement and, as needed, revisions to the committee structure and charge. As a result, faculty, staff, students, and administrators are generally aware of their roles and responsibilities in the governance and decision-making processes.

Using an inclusive system for planning and decision-making is often lengthy as every effort is made to vet issues and concerns in multiple venues. As the institution's processes become more familiar and are used for more purposes, the institution is able to discover the major avoidable bottlenecks and adjust the procedures to minimize them. Unavoidable delays, for example those imposed by meeting schedules, are identified to avoid or minimize frustration. When a more expeditious decision is required, the institution is comfortable with adjustments that do not significantly reduce popular input. The resource request process is an excellent example of all of these components: a laborious, but inclusive and open deliberative process, with well-defined cut-outs and notifications for matters that require faster decisions. This process has been discussed in more detail in Standard III.

Clear definition of roles and responsibilities for constituent members extend beyond governance and policy decisions. Faculty, staff, and students also have defined roles in unit operations, hiring processes, instructional activities, and student success initiatives as the following examples illustrate.

Within instructional units, the deans are assisted by department chairs. The roles and compensation for department chairs have been clarified in several steps since the last self-evaluation. Through the department chairs, faculty expertise in departments and schools is communicated to the deans regarding issues including scheduling and faculty teaching assignments, hiring and evaluations of part-time faculty members, department budget recommendations, and other matters that might arise. On the rare occasion a major disagreement occurs between a chair and a dean, the matter is brought to the relevant vice president for consideration. Of course, it may happen that larger philosophical disagreements may occur, and these are brought to the Academic Senate or to the relevant college committee, but such instances have been extremely rare in recent years.

The Academic Senate also has clearly defined roles in the faculty hiring prioritization process. The Academic Senate plays a key role in determining evaluation criteria and prioritization methodology and ranking recommendations to the president. The Senate must

also approve the search committee composition for faculty hiring ([IV.A.22](#)). The Senate appoints faculty representatives for manager and administrator hires ([IV.A.23](#)). In addition, the Academic Senate has defined roles in determining whether newly hired administrators from outside the District will be granted retreat rights—the ability to secure a teaching position upon resigning from an administrative position—in the District.

The College meets the standard.

Standard IV.A.4 Decision-Making Role and Processes

Faculty and academic administrators, through policy and procedures, and through well-defined structures, have responsibility for recommendations about curriculum and student learning programs and services.

Evidence of Meeting the Standard

The roles and responsibilities of faculty, staff, and administrators in developing curriculum and enhancing student learning programs and services are defined in Board Policy 6100 (Curriculum [IV.A.17](#)), Board Policy 2100.2 (Role and Scope of Authority of the Academic Senate [IV.A.16](#)), and Board Policy 5050 (Student Success and Support Programs [IV.A.24](#)) as well as in the charters of the Curriculum Committee, Academic Senate, Academic Planning and Technology Committee (APTC) Institutional Effectiveness Committee (IEC), Student Services Council, and Student Success, Access, Matriculation, Marketing, and Outreach Committee (SSAMMO).

The faculty, staff, and administrators have clearly defined roles in the curriculum process. The Curriculum Committee (CC) is a committee of the Academic Senate and makes recommendations to the Senate regarding curriculum, certificates, and the other curricular aspects of academic programs. The Senate makes recommendations regarding these items to the president, who makes recommendations to the Board of Trustees.

The Curriculum Specialist, a member of the classified staff who works in the Office of Instruction, serves as an *ex officio* non-voting member of the Curriculum Committee. The vice president for Instruction is a member of CC, and has currently delegated this work to the dean of Academic Affairs. The articulation officer serves as an *ex-officio* voting member. CC membership includes one voting faculty member from each school; assigning “alternates” who attend regularly, and can therefore serve in place of the member, is encouraged. As our faculty has grown, the Senate has encouraged schools, especially the larger ones, to send new faculty members to CC, Academic Affairs, or the Representative Council of the Academic Senate to become familiar with college practices and these core faculty roles. CC

membership is usually a healthy mix of experienced and new faculty members, so the more experienced members provide continuity and help train newer ones.

Curriculum is written or revised in CurricUNET, so that any interested faculty member is able to view it easily. Discipline experts in the relevant department vet new and revised curriculum, and the department chair passes the curriculum forward to CC. The dean is notified that new or revised curriculum is moving forward so she/he can review it. If necessary, the dean may engage the author, department chair, entire department, or school, in discussion if there is any concern about available resources (facilities, instructors, budgeted hours to offer the course, supplies, etc.) for the proposed course.

The Technical Review (TR) work group reviews new and revised curriculum and requests further revision as needed until the curriculum is acceptable to the faculty. This review includes checking: that the California Community College Chancellor's Office requirements are met; that student learning objectives are well described and integrated with content, methods of assessment, assignments, and all other components of the Course Outline of Record (COR); that the course proposal is integrated in certificates and/or programs; and that prerequisites are reasonable and other technical requirements are met ([IV.A.25](#)). CC reviews the COR upon recommendation from TR, reviewing matters of integration and confirming that in areas where disciplines may intersect or about the College does not introduce deleterious competition between departments or schools. As the Office of Instruction is represented at CC, and in the 2015-16 academic year, the dean of Academic Programs had also attended most TR meetings, the administration is kept abreast of any potential areas of concern during curriculum development. By the time CC recommends approval of new or revised curriculum to the Academic Senate, there is every expectation it is acceptable to faculty and administration and the college administration is willing and able to offer the course.

Proposed changes or revisions in programs and certificates follow the same process as described above, though the role of administration is greater in determining that resources are available to support the program and offer its components frequently enough for students to be able to complete it in a timely manner.

Board Policy 5050 and Administrative Regulation 5050 (Student Success and Support Programs [IV.A.24](#), [IV.A.26](#)) establish the framework for expectations that faculty, staff, and administrators work collaboratively to ensure the College "provide[s] students opportunity for (1) access, (2) equitable, quality education, and (3) successful attainment of their educational objectives, with a full range of support services through matriculation, all of which acknowledge the requirements and intent of the Seymour Campbell Act of 1986 and Student Success Task Force Requirements, September 2012."

Student learning services are diverse and numerous. Standard II describes these in great detail. Faculty, staff, managers, and administrators in student services areas—defined for these purposes as all departments under the management of the vice president for Student Services (VPSS)—participate broadly in all college committees for planning and decision-making. Similarly, instructional faculty members participate in many committees that are traditionally part of student services. Thus, there is collaboration between the two “sides” of the campus community, reducing friction and increasing productive use of time and resources. These elements are apparent in the membership of the planning and oversight committees for student services and student success grants and initiatives as well as the strategic planning committees.

The Student Success, Access, Matriculation, Marketing, and Outreach Committee (SSAMMO) and the Student Services Council are the primary bodies that make recommendations regarding student services and programs to the Strategic Planning and Accreditation Council (SPAC) and the president. SSAMMO is charged with the development, review, and oversight of programs, grants, and processes, including matriculation, K-12 partnerships, student success mandates, tutoring, the Basic Skills Initiative, and Student Equity, to name a few.

Analysis and Evaluation

The faculty, staff, and administration have well defined roles in the processes and decisions related to curriculum and student learning programs and services. Curriculum is a faculty driven process, but administrators and classified staff provide input and participate in decision making as administration input is critical for assessing resource availability. The Curriculum Committee is the main body that reviews and makes recommendations for courses, programs, degrees, and certificates to the Academic Senate; CC and APTC make recommendations to the Academic Senate and SPAC, respectively, regarding programs and resource (including personnel, facilities, and technology) requirements. Other committees such as the Institutional Effectiveness Committee (IEC) and SSAMMO involve faculty, staff, and administrators in recommendations related to student learning and support services including oversight, review, and evaluation of Student Learning Outcomes, Administrative Unit Outcomes, and Student Services Outcomes.

Working collaboratively, the faculty and administrators share the responsibility for shaping the courses, programs, and services that support student learning and achievement. To illustrate, policies and procedures requiring broad participation are in place and are reviewed and revised as needed to propose new programs or to discontinue a program. At IVC, program discontinuance occurred rarely; instead every effort is made by all constituent groups to revise faltering programs so they become viable. In the one instance since IVC established a process for program discontinuance, the program was discontinued with the full accord and support of the discipline faculty involved. A similar program has recently been started and a new full-time faculty member hired to support it. This example of the decade-

long history of Optics and Photonics at IVC demonstrates the utility of the institution's processes to reflect the changing academic, career technical education, and the workforce development needs of the community; the ability of IVC to respond to these community needs rather than be limited by its history; and the collaborative nature of the decision-making process.

The College meets the standard.

Standard IV.A.5 Decision-Making Role and Processes

Through its system of board and institutional governance, the institution ensures the appropriate consideration of relevant perspectives; decision-making aligned with expertise and responsibility; and timely action on institutional plans, policies, curricular change, and other key considerations.

Evidence of Meeting the Standard

The policies and procedures outlined in Standard IV.A.2 establish the rights of faculty, staff, students, and administrators to participate effectively in the governance process, so employee groups and students have regular, direct and collegial consultations with the administration. Every effort is made to include individuals and groups with the appropriate expertise and area of involvement in the decision-making process. Administrators, faculty, and staff are assigned to committees befitting their area of expertise, training, knowledge of best practices, and functions relative to their job duties. Decision making occurs in an open and collegial manner during regularly scheduled participatory governance meetings which ensure that individual stakeholders and the resident experts for particular items have a voice in the process. In addition, work groups are formed or additional meetings are convened when necessary, in accordance with Section 54952 of the California Governance Code (the Brown Act). Individual committees, task forces, and work groups establish timelines to attain closure in a timely manner. These groups generally err on the side of collegial and inclusive decisions versus rushing the process as the following example illustrates.

The 2014–2015 revision of the IVC Planning and Decision-Making Manual (IVC-PDM) (IV.A.8) took additional time for widespread conversation and consensus. In academic year 2014-15 the proposed revisions included descriptions of the institution's decision-making process and consensus and a new decision-making flow diagram. These topics engendered a great deal of discussion and many iterations before consensus could be reached, delaying the adoption of the final version until fall 2015. In spring 2015 the updated and revised committee charge components were approved by the Academic Senate and the Strategic Planning and Accreditation Council (SPAC), so their implementation was not delayed. While disagreements certainly occurred, members of the college community ultimately found

compromises with which all parties could feel comfortable, thus providing strong evidence of “appropriate consideration of relevant perspectives” in the decision-making process.

Analysis and Evaluation

The aforementioned policies and governance procedures specify the roles of students, faculty, staff, managers, and administrators. Constituent input is taken into account for decisions that directly affect them, or for which they have expertise or a vested interest. Administrative units and governance groups monitor operational timelines and the published calendar. They meet throughout the primary terms so there is ample time for notice; as a result, input may be gathered from the appropriate stakeholders and whenever possible, decisions are delayed until consensus has been reached. Periodically, students, faculty, staff, and administrators dialogue about being over-scheduled and pressured to prioritize conflicting responsibilities. Attending regularly scheduled committee meetings and the associated task forces or workgroups is sometimes problematic. The classified staff appear to have the most difficulty with limited availability to participate in governance processes while also meeting the demands and time lines specific to their jobs. In many instances, financial concerns prohibit the use of overtime for staff members to complete their work if non-standard work group meetings are required for issues requiring their expertise. The College is aware of the predicament many face with the conflicting need to finish their work and their desire to participate in the governance process.

The College meets the standard.

Standard IV.A.6 Decision-Making Role and Processes

The processes for decision-making and the resulting decisions are documented and widely communicated across the institution.

Evidence of Meeting the Standard

The decision-making processes, delegation of authority, and delineation of roles and responsibilities are accessible to the public and employees through the publication of board policies, administrative regulations, various committee charters and bylaws, and the IVC Planning and Decision Making Manual. There are several ways in which documentation of the decision-making process and the associated decisions are communicated throughout the District and College. Communication to the public or the relevant stakeholders is achieved through committee reports, newsletters, district or college wide announcements, ad-hoc gatherings, and the college and district websites [IV.A.27](#), [IV.A.28](#). Board meetings and college governance meetings are open meetings with agendas and minutes posted on the college or district SharePoint sites or websites in accordance with Section 54952 of the

California Code (the Brown Act), and at these meeting opportunities are provided for individuals to make public comments. Additionally, Board meetings and many college wide meetings are videotaped and posted to the district or college website [IV.A.27](#), [IV.A.28](#).

Operational units and committees that do not fall under the provisions of the Brown Act conduct open meetings and maintain publicly accessible websites and/or SharePoint sites available to employees ([IV.A.29](#)). In all cases committee members are charged with reporting information back to their respective constituent group(s) through oral or written reports. To illustrate, curriculum updates are a standing agenda item at Academic Senate, Instructional Council, and Academic School meetings; the Senate president regularly reports decisions made in college or district wide committees back to the Senate; and collective bargaining units communicate negotiation progress and contract updates at regularly scheduled meetings, ad-hoc meetings, or via email.

Analysis and Evaluation

College and District policies, procedures, and communication protocols are compliant with the provisions of the Brown Act. Recommendations and final decisions are communicated to the public and employees through newsletters, announcements, committee reports, scheduled meetings, and ad-hoc gatherings.

The College meets the standard.

Standard IV.A.7 Decision-Making Role and Processes

Leadership roles and the institution's governance and decision-making policies, procedures, and processes are regularly evaluated to assure their integrity and effectiveness. The institution widely communicates the results of these evaluations and uses them as the basis for improvement.

Evidence of Meeting the Standard

Evaluation of the decision-making process and committee effectiveness occurs as a result of the planning protocols that are incorporated in each committee's charter. The College has institutionalized regular evaluation of the role of leadership and the decision-making structures and processes in order to ensure integrity and effectiveness. Additionally, stakeholders periodically call policies and processes into question, which prompts additional evaluations to enhance the integrity and effectiveness of the decision-making process. The self-evaluation process may take the form of surveys, formal written reports, or discussions [IV.A.30](#).

SPAC and all the SPCs review their work annually using a common survey ([IV.A.30](#)). It has been suggested, that members of all SPCs and SPAC evaluate their own committee but also evaluate the other SPCs and SPAC with which they are supposed to interact. Committee practices are modified in response to complaints or concerns discovered through these surveys. Furthermore, campus wide biannual surveys include queries about the committee structure and participatory governance and the roles and practices of campus leadership. All of these data contribute to the modification of the charge, meeting schedule, and/or membership of the committees. Additionally, these annual committee and council reviews include: a review of the Strategic Planning and Budget Development Process; the distribution of evaluation results and recommended improvements; the integration of data into the planning process using internal and external data scans; and a review the college mission statement and college goals [IV.A.31](#), [IV.A.32](#).

The College also conducts biennial Employee and Student Satisfaction Surveys to assess the efficacy of the planning process and to evaluate the role of leadership in the decision-making processes [IV.A.6](#), [IV.A.33](#). The results of the surveys are posted on the college website, posted on committee SharePoint sites, reviewed during Strategic Planning Committee meetings, and discussed at college wide meetings during professional development week. The relevant results are presented at Academic Senate, Associated Students of Irvine Valley College, and Classified Senate meetings.

Analysis and Evaluation

The College and District have developed mechanisms to evaluate and update governance processes and procedures. Participatory governance committees and operational units undergo the self-evaluation process annually or when processes and procedures are questioned. Recommendations from the self-evaluation process are discussed and action is taken by the appropriate body.

To illustrate, constituent group members periodically identify the effectiveness of some committees and task forces but also report communication hurdles. A recurring concern is the communication gaps that occur when committee members don't report back to their constituent groups in a timely manner, along with periodic difficulties with filling committee vacancies. Consequently, the governance structure is reviewed annually and modifications are made to committee charters, bylaws, and compositions. Through this review process, committees and task forces are disbanded or formed in efforts to improve institutional efficiency, communication, or resolve pressing issues.

The College meets the standard.

Standard IV.B: Chief Executive Officer

Standard IV.B.1 Chief Executive Officer

The institutional chief executive officer (CEO) has primary responsibility for the quality of the institution. The CEO provides effective leadership in planning, organizing, budgeting, selecting and developing personnel, and assessing institutional effectiveness.

Evidence of Meeting the Standard

Board Policy 2101 (Delegation of Authority to the College President) ([IV.B.1](#)) states that “the President is the Chief Executive Officer of the College [and] is responsible for implementing the College’s strategic plan and District policies,” additionally “the President’s administrative organization shall be the established authority on campus and the College President is the final authority at the college level.” The College president therefore makes final decisions, based as much as feasible, on the advice of the President’s Executive Council (PEC) representing the administration’s perspective, the Strategic Planning and Accreditation Council (SPAC) representing more broadly the perspective of the entire college community, and the Academic Senate.

As discussed elsewhere in this Accreditation report, such as in Standard IVA, IVC adopted a consensus-based decision-making philosophy in 2008 and has made in all iterations of the IVC Planning and Decision-Making Manual (IVC-PDM) ([IV.B.2](#)) then and since a strong statement that the College is committed to a “safe harbor” philosophy of open and honest discussion without fear of deleterious repercussion. As members of the College have worked with the notion of “consensus,” the IVC-PDM definition and description have evolved into the mature vision that, on the one hand adopts a traditional idea that while consensus can be reached without all parties favoring the proposition, if anyone objects, consensus is not reached and discussion, hopefully toward and acceptable compromise, continues. On the other hand, such a decision-making process cannot obstruct the organization such that either no decision is reached at all or an authority figure simply takes the matter away from group consideration. Therefore, when a stalemate seems to be occurring, the group discusses the situation and either comes to a common decision or sends a recommendation forward with both (or all) final arguments presented fairly, so the next level “up” in the organization can make a decision with the complete input from the “lower” group. To date, this last resort has seldom been necessary, but when it has been invoked, all parties involved have been satisfied that their voices have been heard and considered. Because, ultimately, the president makes all decisions, and all of the committees are recommending bodies only, this arrangement has been effective at IVC.

The president's leadership is evident in several initiatives and grants he has promoted or encouraged which have enhanced the programs and services offered by the institution. In collaboration with faculty, classified staff, and administration, the College president has worked diligently to provide effective leadership in planning, organizing, budgeting, selecting and developing personnel, and assessing institutional effectiveness. The evidence may be summarized and has been documented in this report as follows:

The development and implementation of the college mission statement and college goals, including the development of the Mission Statement and Goal Review Process. [IV.B.3](#)

The development and implementation of a transparent, data-driven Strategic Planning and Budget Development Process wherein resource allocation is directly related to planning, the college mission statement, and college goals. [IV.B.3](#)

Continued resource allocation to the Office of Research, Planning, and Accreditation to support the acquisition of data that form the basis of the annual college strategic planning efforts and institutional effectiveness. [IV.B.4](#)

The integration of the College Strategic Planning and Budget Development Process with the District planning and goal-setting process. [IV.B.5](#)

The reorganization of the college committee structure resulting in the integration of strategic planning and decision making. [IV.B.6](#)

The development, implementation, and updating of the IVC Planning and Decision-Making Manual which sets forth the roles and scope of authority of all constituent groups providing the means for widespread and effective participation by members of the college community. [IV.B.2](#)

Continued support for the collegial decision-making processes for hiring new and replacement faculty, administrators, and classified staff positions. [IV.B.7](#)

The initiation and updating of the Educational and Facilities Master Planning Process. [IV.B.8](#)

Oversight of the construction of the Performing Arts Center, the Business Science Education and Technology Center, the Life Science Building, the Liberal Arts Building. [IV.B.9](#)

Oversight of the plans for the Fine Arts Building and the maintenance and renovation of pre-existing facilities. [IV.B.9](#), [IV.B.10](#)

Effective and long-standing leadership in the development of the Advanced Technology and Education Park (ATEP). [IV.B.11](#)

Support for the acquisition and oversight of grants and projects including: SSSP, SEP, Perkins, BSI, AANAPISI, AACC Pathways, and the OC Pathways [IV.B.12](#).

Analysis and Evaluation

The governance structure is such that councils, committees, and task forces make recommendations to the president for final approval. The president is therefore ultimately responsible for decisions involving planning, resources, student success endeavors, personnel decisions, community engagement, and institutional effectiveness. Through effective and continuous communication, the president demonstrates leadership and takes responsibility for the quality of the institution's programs and service to the community. The president communicates institutional values, goals, and directions in a variety of ways. He directs the vice president for Instruction to attend each Academic Senate meeting on his behalf. When invited by the Academic and Classified Senates, the president attends their meetings as a guest. He regularly meets with presidents of all the constituency groups, as well as the management team. These meetings allow for a free exchange of ideas regarding the values, goals, and priorities for the College. The president confers with PEC and the vice presidents but ultimately makes all decisions.

The College meets the standard.

Standard IV.B.2 Chief Executive Officer

The CEO plans, oversees, and evaluates an administrative structure organized and staffed to reflect the institution's purposes, size, and complexity. The CEO delegates authority to administrators and others consistent with their responsibilities, as appropriate.

Evidence of Meeting the Standard

The president is actively involved in the planning and oversight of the three primary units in the College – Administrative Services, Student Services, and Instruction. The president delegates the operations of these units to the corresponding vice president. Administrators and managers are delegated authority to act in line with the mission and strategic goals of the

College, but the president is ultimately responsible for evaluating the individual and collective accomplishments from this delegated authority.

The president ensures the organization operates with sufficient staffing to support outstanding student performance and institutional outcomes. Throughout his tenure the president has supported hiring additional instructional faculty, librarians, counselors, administrators, and support staff. In order to assure the integrity and quality of programs and services, the college president is committed to employing highly qualified personnel with the appropriate education, training and experience within all academic programs, student support services, and classified staff positions. The Board approved position descriptions clearly state the qualifications for administrators and classified managers. Minimum and desirable qualifications for all positions are evaluated by the administration, faculty, and classified staff to ensure that the qualifications, education, training, and experience are clearly related to the college mission and the college goals and accurately reflect the position duties, responsibilities, and authority.

Board Policies BP-2100.1 (Delegation of Authority to the Academic Senate [IV.B.13](#)), BP-4056 (Classified Employees Participation in Decision Making [IV.B.14](#)), and BP-5627 (Student Participation in Governance [IV.B.15](#)) outline how faculty, staff, and students may participate effectively. As such, the president is responsible for the integrity of the process and making sure constituent members are delegated the appropriate authority needed for effective participation. To illustrate, the president co-chairs SPAC—the highest level participatory governance college committee (a “Council”)—as well as his advisory PEC and the President’s Cabinet. Before the most recent committee reorganization, College Council served the role of the top of the committee pyramid, with the president as sole chair. When the institution reorganized, the president agreed that it would be a healthy revision for the College for the SPCs and SPAC to all have faculty and administration co-chairs; the president now sits on, but neither chairs nor dominates, the budget committee (BDRPC). Although naturally members look to him for leadership during discussions, he encourages free discussion so that all voices and opinions are heard before the body makes recommendations to SPAC; through SPAC, where more voices can be heard, the recommendations come to him. This process serves as a good example of his proper and effective delegation of responsibility to recommending bodies.

The revision of the SPCs and SPAC is an excellent indication that the president supports participatory governance and encourages the voices of all governance groups to be heard and considered. Comparing the initial SPCs and College Council memberships and charges to the committee structure and recommendation organization chart they replaced, the 2008 IVC-PDM ([IV.B.2](#)) constituted major shifts in participatory governance and decision-making policy and philosophy at IVC. These changes have promoted major improvements in faculty and staff outlook and confidence in the system. The recent revision (2013) in structure,

membership, and charge of the SPCs, and the reconfiguration of College Council into SPAC, while not a radical change in philosophy, reflected maturation of the system.

Analysis and Evaluation

The president delegates authority to constituent members and administrators in accordance with the individual's formal role, job description, and the committee or council charge/bylaw. For example, institutional effectiveness falls under the purview of the SPC called the Institutional Effectiveness Committee (IEC). The Director of Research, Planning, and Accreditation and the Academic Senate President co-chair this committee that reviews data to formulate reports and recommendations regarding institutional effectiveness. These are sent, ordinarily, to the Academic Senate and to SPAC, and as appropriate, to other SPCs for their use in adjusting college activities to maintain or improve programs and the various parameters of student success. Thus a broad panoply of committees, departments, and individuals participate in not only monitoring the college's institutional effectiveness but in devising ways to improve as well. The large number and diversity of people, including students, staff, faculty, and administrators participating in one or more of the college's initiatives is evidence this approach is part of the IVC community constitution.

It is the president's responsibility to make sure authority is delegated appropriately and improves service to students and the community. When improvements can be made, the duties of administrators and managers are reorganized; for example, the Chief of Police and the director of Facilities reported directly to the president until the position of vice president of Administrative Service was established and took these reporting responsibilities. The president ensures that administrators are assigned responsibilities within their purview and that they are held accountable for their performance. For all departments that report to one or another vice president, the president delegates well. Each vice president has his/her own vice president's Council [IVC-PDM ([IV.B.2](#))] to help coordinate the given vice president's area of responsibility, and the president ordinarily follows recommendations of the vice presidents, taken together in the PEC. Similarly, the College's task forces report to SPCs which interact with each other as needed and send recommendations to SPAC. Recommendations from SPAC to the president are usually followed, and if not, or to the extent the president does not follow SPAC recommendations, he ordinarily explains his decision carefully and openly.

The president has identified challenges in the current administrative staffing levels. Other California Community Colleges of similar and smaller size have more extensive management and staff infrastructure to support the instructional needs of their students and faculty and the operational needs of the Colleges than IVC. Faculty, staff, and administration hiring is discussed from a financial perspective as part of budget development (BDRPC making recommendations to SPAC) and resource allocations as discussed above. The priorities are set by separate processes.

The College meets the standard.

Standard IV.B.3 Chief Executive Officer

Through established policies and procedures, the CEO guides institutional improvement of the teaching and learning environment by:

- *establishing a collegial process that sets values, goals, and priorities;*
- *ensuring the College sets institutional performance standards for student achievement;*
- *ensuring that evaluation and planning rely on high quality research and analysis of external and internal conditions;*
- *ensuring that educational planning is integrated with resource planning and allocation to support student achievement and learning;*
- *ensuring that the allocation of resources supports and improves learning and achievement;*
and
- *establishing procedures to evaluate overall institutional planning and implementation efforts to achieve the mission of the institution.*

Evidence of Meeting the Standard

Working in conjunction with students, faculty, staff and administrators, the president has, through the participatory governance structure, established a variety of collegial processes that improved institutional effectiveness and the overall campus climate. Much of this improvement is outlined in the IVC Planning and Decision-Making Manual (PDM) ([IV.B.2](#)). Additionally, “mutual respect and collegial behavior” has been stated as a formal goal in the strategic plan. At IVC, institutional assessment and improvement is an ongoing process led and encouraged by the president but one that requires the participation and buy-in of the entire college community. The IVC-PDM ([IV.B.2](#)) describes the organizational structure that supports these processes and procedures, which are further described and documented by posted agendas, minutes, other meeting handouts, and shared documents on Inside IVC (the SharePoint site) which allows all interested employees to access the information they need or just assuages their curiosity about ongoing college efforts.

Under the guidance of the college presidents and chancellor an extensive process to set the 2014-2020 IVC, Saddleback, and SOCCCD Strategic Plan was undertaken in 2013. All members of the College were invited to participate in numerous ways including all-college meetings, workshops, flex week activities, and invitations to submit suggestions in addition to these forums. First the institution gathered any ideas people thought were important for the College to undertake or improve or continue. Then, it organized these into clusters at workshop-style open meetings. A work group then organized emerging patterns into a relatively concise yet comprehensive set of goals and objectives. Saddleback College undertook their own tactics to develop their list. Subsequently, a District task force comprised of representatives from all three units (IVC, SC, and DS) managed to collegially bring all the ideas together into a proposed District wide Strategic Plan (DWSP) comprised of four goals and a total of thirteen objectives. These were discussed widely in all three units and ultimately were adopted by the District wide Planning Council (DWPC) [IV.B.16](#).

IVC then considered the extent to which the DWSP encompassed everything that IVC wanted in its college's strategic plan. One of the required parameters for the DWSP was that all three units could and should have a role in each goal and in each objective. Since IVC (as did SC) determined there were college-specific SP components that do not in any way conflict with the DWSP, IVC adopted as its IVC-SP a set of goals and objectives closely similar to the DWSP's but modified slightly and enriched to be IVC-specific. The inclusive process involved in generating and accepting these SPs and the number and diversity of employees who participated was remarkable for its extensive engagement and participation in the College and District.

The president ensures the College sets institutional performance standards for student achievement and institutional outcomes. To maintain compliance, the Office of Research Planning and Accreditation works through the participatory governance structure and the Institutional Effectiveness Committee (IEC) to define and adopt institution-set standards, targets, and performance goals ([IV.B.17](#)). IEC annually collects and examines data on various measures of student success, compares students' achievements to the college's stated goals, and re-evaluates these goals. Discussions in IEC also include trying to define and summarize the underlying causes when success rates lower than those to which the College aspires are noted. These discussions lead to recommendations, often to other SPCs that have more operational charges in instruction, student services, and other components of the College.

The president has directed resources to promote a culture where planning incorporates quality analysis of internal and external conditions. To illustrate, the College has hired a Scheduling and Enrollment Management Analyst and additional research analysts for the Office of Research Planning and Accreditation to increase the use of quality analysis in the decision-making process. Under the leadership of the current director, the growth in the research department means much more institutional research is feasible, so it has become more common to base decisions on better data (internal and external, including environmental scans) that is analyzed more completely than in the past. The availability of these data and research staff to help with analysis has become a conventional part of evaluating plans and outcomes.

The president has promoted a resource allocation process that is tied to program evaluation and student performance outcomes. Resource requests must be mapped to strategic planning goals and outcomes assessment in TracDat ([IV.B.18](#)) before they can be forwarded for consideration. To illustrate, departments and academic programs submit resource requests that are prioritized with student outcomes at the forefront of the discussion. Next, the schools rank items on the list prior to the list being sent to the appropriate vice president's council for evaluation. The vice president's ranked list is then reviewed by SPAC which makes a recommendation to the president. As a consequence of this process, resource requests directly relate to the goals and objectives cited in the primary planning documents: EFMP, IVC-PDM, and the Strategic Plan. Further, student learning and administrative unit outcomes

and the resulting assessment data are integrated in the decision-making involved in resource planning activities.

The president ensures that resource allocation supports student and institutional learning and achievement through broad constituent participation and specific committee charge(s) for the resource allocation process (described above) and the budget development process. Budget development is initiated by the office of the VPAS, but discussion of the proposed budget is an open and often prolonged process in BDRPC, which is charged with the effective allocation of resources as it relates to improved institutional outcomes. The BDRPC membership composition ensures that budget planning at the college level is data-based and has significant input from administrators, faculty, and staff who are well-informed and who champion instructional and support components of the College's efforts to further student success. Enrollment planning, hiring of faculty, administrators, and staff, and resource allocations are all filtered through these SPCs and SPAC to allocate college resources wisely and efficaciously, keeping the college's mission as well as effectiveness, i.e. student achievement parameters, as the central underpinning in discussions and budgetary recommendations.

The president oversees all plans and ensures that the overall planning process is evaluated annually and that progress is being made toward attainment of the college mission. At the end of each cycle, a meta-evaluation of the planning process is completed by SPAC and recommended changes are incorporated into the next cycle.

The college mission statement and the college goals are received annually and drive the development and review of the planning objectives. The planning objectives are designed to implement the college goals through the development of planning assumptions based on data and information related to: demographics, the economy and employment, educational trends, social trends, public policy, student learning and achievement, student outreach, technology, and facilities support. Data provided by the Institutional Effectiveness Annual Report also inform the planning assumptions ([IV.B.19](#)). Thus, planning, decision-making, and resource allocation are predicated on annual analysis of quantitative and qualitative data to ensure institutional effectiveness. For example, within the category of student learning and achievement, aggregated assessment data for the College is provided in overall annual successful course completion rates, successful completion rates in English and math basic skills courses; successful course completion rates in weekend, eight-week, and distance education courses; progression rates from basic skills to college-level courses in English and math; matriculation and persistence rates for first-time college students; the number of degrees and certificates awarded; percent growth in full-time equivalent students compared to percent growth in permanent employees; and transfer rates. Student learning outcomes assessment data is provided for the course level, program level, and degrees or certificates. Progress reports are prepared and distributed annually. The faculty, representing the academic disciplines, produce aggregated reports which are reviewed with discipline experts during the annual program review updates.

In addition to the *Institutional Effectiveness Annual Report*, which provides aggregated assessment data for the College, the Office of Research, Planning, and Accreditation provides key performance indicators for each program undergoing a comprehensive program review pursuant to the six-year review cycle previously discussed [IV.B.20](#). The assessment data included for each program includes disaggregated data down to the course level in each program over a five-year period for planning purposes, such as enrollment data, number of sections, productivity rates, fill rates, student retention rates, student grades, student success rates, student demographic information, education goals, and awards data.

Analysis and Evaluation

With the direction of the college president, the College utilizes a variety of assessment data in institutional as well as program-level planning to ensure institutional quality. Through formal and informal dialog about institutional goals, values, and priorities, the governance structure, and a data-driven resource allocation process, the president guides a collaborative process for institutional improvement. The president supports the integration of institution-set standards and targets into the strategic planning process and ensures that institutional performance standards are included in the resource allocation process and the annual planning process maps learning outcomes to department goals, college goals, and resource requests. Through program and unit reviews, educational planning is integrated with resource allocations to support student learning and achievement. Additionally, the president has continuously approved the necessary resources to implement student learning outcomes, and the faculty leadership has received administrative support in providing the necessary resources for the implementation of student learning outcomes and assessment plans.

Based on the foregoing, the president, in collaboration with the college community, guides a collegial annual evaluation of the overall institutional planning and improvement process. Each committee and council is charged with annual reviews of the role of leadership and governance, and decision-making processes to ensure integrity and effectiveness.

The College meets the standard.

Standard IV.B.4 Chief Executive Officer

The CEO has the primary leadership role for accreditation, ensuring that the institution meets or exceeds Eligibility Requirements, Accreditation Standards, and Commission policies at all times. Faculty, staff, and administrative leaders of the institution also have responsibility for assuring compliance with accreditation requirements.

Evidence of Meeting the Standard

The president ensures that faculty, staff, and administrators actively participate in the accreditation process, and he embraces the primary leadership role in ensuring the College exceeds the minimum Standards set by the ACCJC. Through appropriate delegation of responsibilities and accreditation standard appointments, the president ensures that representatives from each constituent group are well-informed and able to provide meaningful input in the development and analysis for the self-study. For the purposes of the self-study, SPAC, AOWG, and the Academic Senate made recommendations for accreditation standard membership, but Standard assignments can be fluid and individuals have participated in discussions for additional standards based on their interest and expertise. The faculty, staff, and administration of the College have been encouraged to share responsibility for assuring compliance with accreditation requirements.

IVC's President Roquemore has participated in ten site visits for the ACCJC over the past twenty-one years and has been the team lead for seven of them. He has also chaired a Partnership Resource Team (PRT). As IVC President since 2002, and as a full-time faculty member prior to that since 1990, he has participated in various ways in the IVC Accreditation process for a quarter of a century. As such, he is very well versed in the Accreditation Standards and their evolution, interpretation, and both the flexibility and inflexibility of the Accreditation process as experienced at colleges and districts in California.

The president has delegated the ALO responsibility to the VPI and has supported and approved the current committee structure in which the Strategic Planning and Accreditation Council (SPAC) charge also includes the work of what had been, hitherto, a separate accreditation oversight committee convened specifically for this purpose. The benefits to the College of this new arrangement are several. First and foremost, operationally it reduces the separate committee load for the college leadership who must, perforce, be the core of both the leading college council and the accreditation oversight group. Secondly, and more important philosophically, the leading college council knows, from its name, charge, and default agenda that it must always be mindful of the consequences of all of its actions and recommendations, and indeed the way in which it handles business, for Accreditation. In essence, SPAC is continually involved in institutional self-evaluation, as it should be, regardless of the accreditation report and visit schedule.

All of the college committees, regardless of designation as work group, task force, committee, or council, ultimately feed into the strategic planning committees (SPCs) and SPAC, with the exception of the mostly curricular concerns reposed in the Academic Senate. Some committee work does not require the consideration and imprimatur of SPAC, yet the efforts are reported nonetheless. Through all of the committees, then, all members of the College participate, at no more than one remove through the representation of the governance groups, in the health of the College, and thus the attainment of the Accreditation Standards.

Analysis and Evaluation

The president assumes the primary leadership and communication role in the accreditation process. Practically, the accreditation process is organized and maintained by a smaller group, a standing work group of SPAC, the Accreditation Oversight Work Group (AOWG) which has a standing report at SPAC meetings. AOWG maintains the accreditation work group membership lists, the accreditation Inside IVC and outward-facing web sites, and generally monitors the progress of composing accreditation reports including this self-evaluation. It is the major editor of the self-study document. However, all iterations are posted on Inside IVC, major revisions are announced to the college community, and all members of the faculty, staff, and administration are invited to participate in as many ways as they are willing.

Recommendations from participatory governance groups including AOWG and SPAC are sent to the president for final approval, and individuals from across the College are encouraged to participate and provide input based on their formally assigned role, area of expertise, and interest. As such, the faculty, staff, and administrative leaders have been charged with assuring compliance and have been empowered to work through the participatory governance structure to guide the process of writing the standard reports and preparing for a comprehensive evaluation and site visit.

The College meets the standard.

Standard IV.B.5 Chief Executive Officer

The CEO assures the implementation of statutes, regulations, and governing board policies and assures that institutional practices are consistent with institutional mission and policies, including effective control of budget and expenditures.

Evidence of Meeting the Standard

To fulfill his responsibilities the president stays current with statutes, regulations, and governing board policies through active involvement with professional associations, conferences, and College and District governance meetings. Adding to the president's effectiveness are his relationships with colleagues throughout the State and within the national network of college presidents, relationships that help to make him aware of current and emerging trends and their impact upon IVC. However, it is through collaboration with each constituent group and delegation of responsibilities to administrators that the President assures the implementation of statutes, regulations, and governing board policies and, therefore, assures institutional practices are consistent with institutional mission and policies. For example, the vice president of instruction is responsible for ACCJC compliance while the vice president of student services is responsible for Federal Title IX compliance.

Board Policy 2101 delegates to the college president the responsibility of managing the College, including the college budget. The college president makes final decisions for the College based as much as is feasible on the advice of the President's Executive Council (PEC) representing the administration perspective and the Strategic Planning and Accreditation Council (SPAC) representing more broadly the perspective of the entire college community. Funding for the College comes from many sources; some are specific to IVC, such as certain grants. Most funds are allocated by the District as IVC's share of District funding. These allocations are managed in large measure by the District Resource Allocation Council (DRAC) (described in depth in the response to Standard III). Other District allocations emanate via the Basic Aid Allocation recommendation Committee (BAARC) as described in BP & AR 3110 ([IV.B.21](#), [IV.B.22](#)).

Once the college income is ascertained, college processes are used to develop and update, as necessary, the college budget; these processes are described in detail in the response to Standard III. The budget committee, BDRPC, is a representative committee with members from all governance groups including students. It is co-chaired by the Academic Senate vice president and the College VPAS. During the last few years, the amount of information brought to BDRPC has grown from a rudimentary description of the budget to a fairly complete description of income sources, and broadly, spending patterns. Thus, BDRPC now has enough information to make educated, data-based recommendations after extensive discussion when anything potentially controversial arises. For example, when the finance office projects a deficit or an upcoming deficit, the discussion of how to address the budgetary problems is addressed first in BDRPC, then, if severe, opened to the college community for suggestions. This was the process used, for example, in 2012-13 when the president, through College Council, established in December 2012 the Budget Solutions Recommendation (BSR) Work Group. [IV.B.23](#)

After the main budget is recommended to, and approved by, the president, as yet unallocated funds may be requested for special projects through the resource request process, also described in depth in the response to Standard III. In recent years, (2012-present), IVC has modified the process by having IVC-IT develop a web-based site for resource requests and their analysis by relevant committees, SPCs, and SPAC that make the final college recommendations to the president as well as by progressively including more funding sources and types of allocations in this open and public assessment process. As so many faculty, staff, and administrators are involved in the process, and any employee has access to all of the information including SPC and SPAC ratings and minutes of discussions, resources are allocated in accordance with the college mission and the funded projects are acknowledged by the campus community to be high-priority ones.

While the president makes all final decisions, he does serve on BDRPC and co-chairs SPAC. Thus, he is party to and part of all of the discussions about process and the final SPAC recommendation conversations. It is expected that, should he disagree with anyone in these meetings that he, as any member, will speak up as part of IVC's "safe harbor" consensus-driven decision-making process. In most cases this participation by the president does, in fact, occur. Hence, committee members report confidence in the system. [IV.B.24](#).

Analysis and Evaluation

The President is well-versed and conversant in statutes, board policies, and regulations. He embraces overall responsibility for compliance issues, but delegates to others based on their area of competence and assigned roles. The president has established an effective organization and governance structure to comply with regulations, Board policies, and Accreditation mandates. The infrastructure and established participatory governance processes promote broad discussion and compliance through shared responsibilities and a collaborative approach.

The College and District have a long history of being fiscally stable and using conservative approaches to maintain positive ending balances. The president promotes this conservative fiscal approach and maintains effective control of budgets and expenditures. Information about the budget is shared widely and budget updates are a regular agenda item for participatory governance committee meetings; despite occasional differences of opinions, fiscal control and the conservative approach usually prevail with items that impact students taking the highest priority. In practice the president effectively controls budget and expenditures through numerous mechanisms. First, as a member of BDRPC the president is actively involved with strategic planning, budget development, and the allocation of college resources. Second, the president meets twice monthly with the President's Executive Council (PEC), so he receives regular updates on the college budget and expenditures, and reviews recommendations from SPCs. Third, an audit is conducted annually in the fall, designed to provide reasonable assurance that the financial statements are free of material misstatement. The fiscal Audit Reports ([IV.B.25](#)) are presented to the Board of Trustees annually in November. Based on the foregoing, the president manages the College's financial affairs with integrity and in a manner that ensures financial stability.

The College meets the standard.

Standard IV.B.6 Chief Executive Officer

The CEO works and communicates effectively with the communities served by the institution.

Evidence of Meeting the Standard

The president works and communicates effectively with the communities served by the institution in a variety of ways through student outreach, marketing, the College Foundation, and external relationships developed through academic programs. Naturally, the president is not expected to be the College's only, or even its main, means of communication, but it is within his role to be aware of these elements, support them, provide introductions and links when appropriate, delegate responsibilities, and ensure integration of these prongs into an integrated and effective component of the College's efforts to fulfill its mission.

The president hosts an annual breakfast for the principals and vice principals and counselors of the College's feeder high schools. In previous years, this event has been an opportunity for IVC to convey information about the demographics of the region, workforce development data, IVC's great diversity of programs and the success of its students in transfer and CTE programs, and the success of IVC transfer students. Moreover, each principal is presented with his or her school-specific data. Much of the purpose is, clearly, to motivate the principals to encourage their students to consider IVC not only as a back-up plan but as a viable alternative route for success in a bachelor's degree educational plan and to help the high school teachers focus some effort on crucial components for college success in their high school coursework. For many years, Student Services, and in particular the School of Guidance and Counseling, has invited the counselors from IVC's feeder schools to a program lasting most of a day to discuss similar topics. In 2016, these hitherto separate programs were successfully combined, gathering the principals, vice principals, and counselors together for a joint presentation followed by separate, focused sessions. The president's role is not limited to host but more importantly extends to articulating his and IVC's vision of its role in educating high school students and graduates, a crucial element of building successful relationships with IVC's feeder high schools.

Under the leadership of the new executive director of the IVC Foundation, and with the support and input of the president, the Foundation Board of Governors (BOG) has expanded tremendously, now including more than 25 members, including administrators, members of the classified staff and faculty, emeritus faculty, and community members. Long-standing members have returned to the BOG, and new members have been encouraged to join. The enthusiasm of the BOG members is evident in the success of recent events and the level of attendance and participation at approximately bimonthly meetings and the annual retreat. The Foundation is an arm of the president's outreach activities, and the willingness of community

members to join and participate stands as evidence of his ability to communicate with them convincingly about the value IVC brings to the community.

Another crucial element of the president's communication with the community is his involvement with a variety of business and civic organization that have allowed him to increase networking endeavors with local businesses which in turn support the Foundation and are potential employers and providers of internships for IVC students, and participants on advisory councils for IVC CTE programs. The president has been a member of a number of community organizations including:

- Irvine Chamber of Commerce
- Irvine Sister Cities Foundation
- Tustin Chamber of Commerce
- U.S. Army Community Advisory Board
- Founding member, U.S. Army Community Advisory Board
- Orange County Business Council, Board Member
- OCBC Community College Working Group, Chair
- Irvine Exchange Club

The President has also been involved in state-wide organizations including:

- Southern California Community College Chief Executive Officers Association, President
- Community College League of California: Advisory Committee on Education Services
- Association of California Community College Administrators: Commission on Finance and Legislative Advocacy
- AACC Commission on Workforce Development (nominee for the Executive Board)
- AACC Presidents Academy Executive Council

Based on the memberships and community involvement documented above, the president has strengthened relationships within the community served by the College.

Analysis and Evaluation

Given that “our community” extends beyond the service area, and President Roquemore has been active in regional, state- and national- level activities, a strength of the college president is the expanded communication from the Office of the President. He has elevated the role of public information, marketing, and the College Foundation. The president also works to communicate with the external college community through various means. The president writes and disseminates newsletters campus wide, and generally holds two information sessions each semester (one mid-day, one early evening), in an effort to keep everyone

informed. In addition, he hosts the President's Breakfast each semester during Faculty Professional Development Week, followed by a morning of college updates and, usually, a special topic program.

The benefits to the College of the president's efforts in the community range from connections that benefit its growing Foundation and fund-raising efforts, internship possibilities for students and potentially externships for faculty members, and improved relations with neighboring universities which increase transfer pathways for IVC graduates. Three intertwined components of the communication with the communities IVC serves include: drawing in more students and improving their likelihood of success; establishing and strengthening the College's ability to place students after, and during, their experience at IVC as they move into the workforce and/or further education; and strengthening IVC's role, and IVC's perceived role, in the local community. The College and its president expect these components should be synergistic; for example, from work with feeder schools to improve the preparation of incoming students, not only does IVC expect its success and completion rates to be improved, it also anticipates these students will be more likely to aspire to education and careers of higher potential, thus better supporting the economy ["workforce development"] and being more successful should they transfer for continued education.

Standard IV.C: Governing Board

Standard IV.C.1 Governing Board

The institution has a governing board that has authority over and responsibility for policies to assure the academic quality, integrity, and effectiveness of the student learning programs and services and the financial stability of the institution.

Evidence of Meeting the Standard

The South Orange County Community College District's (SOCCCD) Governing Board (Board) consists of seven members elected by voters in south Orange County. Responsibilities of the Board are defined by California Education Code §70902, Title 5 California Code of Regulations, and by Board Policy 112 (Duties and Responsibilities of the Board [IV.C.1](#)). The California Education Code §70902 (b) (1-14) further specifies the responsibilities of the Board, which include ensuring the educational quality and the financial integrity of the District. The Board has the ultimate responsibility for:

- Establishing policies for academic and facilities plans
- Establishing policies for approving curriculum and educational programs
- Establishing academic standards; probation, dismissal and readmission policies; and graduation requirements
- Employing and assigning all personnel, and establishing employment practices, salaries, and benefits for all employees
- The determination and control of the District's operational and capital outlay budgets
- The management and control of district property
- Establishing procedures to ensure faculty, staff, and students have the opportunity to express their opinions, to ensure that these opinions are given every reasonable consideration, to ensure the right to participate effectively in district and college governance, and to ensure the right of the Academic Senates to assume primary responsibility for making recommendations in the areas of curriculum and academic standards
- Establishing rules and regulations governing student conduct
- Establishing student fees
- Receiving and administering gifts, grants, and scholarships

The Board exercises its authority and responsibility for policies designed to ensure academic quality, integrity, and institutional effectiveness through established policies consistent with the District wide mission statement, the District wide vision statement, and the District wide goals ([IV.C.2](#)). To illustrate, the following Policies have been adopted to ensure academic quality, integrity, and student learning and safety:

- BP-5300 (Grading Policy [IV.C.3](#))

- BP-5300.5 (Grade Changes [IV.C.4](#))
- BP-5301 (Course Repetition [IV.C.5](#))
- BP-5320 (Academic Renewal [IV.C.6](#))
- BP-5401 (Rules And Regulations for Student Conduct [IV.C.7](#))
- BP-5404 (Sexual Assaults [IV.C.8](#))
- AR-5505 (Grade Grievance Policy [IV.C.9](#))
- BP-5600 (Associate Degree Requirements [IV.C.10](#))

The Board has adopted several board policies and administrative regulations to ensure the financial integrity of the District including board policies BP-3100 (Budget Preparation [IV.C.11](#)), BP-3101 (Budget Management [IV.C.12](#)), BP-3101.5 (Fiscal Management [IV.C.13](#)), and BP-3102 (Investment Policy [IV.C.14](#)). According to Board Policy 3100: Each year the Chancellor shall direct the staff in the methods of budget development and present to the Board a budget, prepared in accordance with Title 5 and the *California Community Colleges Budget and Accounting Manual*. The schedule for presentation and review of budget proposals shall comply with state laws and regulations, and provide adequate time for board study. Budget development shall meet the following criteria:

- The annual budget shall support the District's educational master plans
- Assumptions upon which the budget is based are presented to the Board for review
- Changes in the assumptions upon which the budget was based shall be reported to the Board in a timely manner
- A schedule is provide to the Board by the annual December board organization meeting that includes dates for presentation of the tentative budget and required public hearings that interested persons may attend and address the Board regarding the proposed budget or any item in the proposed budget
- Unrestricted general reserves shall be no less that 7.5 percent
- Budget projections address long term goals and commitments

The Board of Trustees is the ultimate arbiter regarding legal matters which are deliberated in closed session pursuant to Government Code 54950 et seq. (California Open Meeting Act) and, if appropriate and required by statute, in open session. The Board routinely seeks advice from legal counsel to ensure the integrity of its decisions.

Analysis and Evaluation

The SOCCCD Board establishes policies and regulations to ensure academic quality and integrity, fiscal integrity and stability, student learning, safety, equity, and accountability and accreditation. The Board of Trustees has authority over, and responsibility for, all aspects of the institution as established in policy and documented in practice. The policies and administrative regulations related to budget and investments affirm the Board's expectations for fiscal planning, reserves, contingencies, expenditure changes, accountability, regular reporting, investments, and the overall safeguarding of assets to ensure adequate resources.

While the Board has ultimate responsibility and its actions are final, the Board recognizes that those closest to the problem or issue are often those with the best information. Consequently, the Board encourages input and generally bases its decisions on policy. Primarily, the Board relies upon recommendations from the Chancellor, who, in turn, receives and considers input from the Chancellor's Executive Team (CET), which consists of the college presidents, vice chancellors, and the District director of Public Affairs. The Board prefers written reports but will provide time (approximately two minutes) for the information and updates of constituent groups such as the Academic and Classified Senates, the Faculty Association, Associated Students, California School Employee Association (CSEA), and Police Officer Association (POA) at all monthly Trustee meetings.

The College meets the standard.

Standard IV.C.2 Governing Board

The governing board acts as a collective entity. Once the board reaches a decision, all board members act in support of the decision.

Evidence of Meeting the Standard

Board members adhere to the guidelines in BP-112 (Duties and Responsibilities of the Board of Trustees [IV.C.1](#)), BP-110 (Code of Ethics – Standards of Practice [IV.C.15](#)), and BP-180 (Respectful Interactions and Collaboration [IV.C.16](#)). BP-180 describes the expectations for fostering a district wide culture of mutually respectful interactions, cooperation, and a climate of civility for all employees.

The Board is composed of members from diverse backgrounds with differing perspectives. During meetings the Trustees engage in energetic discussion of agenda items and share their individual viewpoints. However, once a decision is reached, they move forward in a unified fashion. The Board members are respectful and inclusive of all input and viewpoints when discussing topics in board meetings and prior to any voting. The Board meetings are taped and posted on the district website ([IV.C.17](#)).

Analysis and Evaluation

The Board adheres to the policies and procedures that provide the framework for the members' collective action and individual behavior. Board members are able to engage in debate and present multiple perspectives during open discussion but still come to collective decisions and support those decisions once reached. Minutes and videotape of board meetings from recent years substantiate this behavior.

The College meets the standard.

Standard IV.C.3 Governing Board

The governing board adheres to a clearly defined policy for selecting and evaluating the CEO of the college and/or the district/system.

Evidence of Meeting the Standard

The Board follows California Education Code and Board policies in the selection and evaluation of the chancellor and the college presidents. Board policies, BP-146 (Chancellor Succession [IV.C.18](#)), BP-148 (Evaluation of the Chancellor [IV.C.19](#)), and BP-4011.6 (Employment Procedures for Chancellor [IV.C.20](#)), govern the hiring and evaluation of the chancellor who serves as the Chief Executive Officer for the District. The chancellor is responsible for recommending the selection of the college presidents in accordance with BP-4011 (Employment Procedures for Administrators and Classified Managers [IV.C.21](#)). The chancellor is also responsible for the supervision and evaluation of the college presidents.

Oversight for hiring a new chancellor is delegated to the current chancellor or a Board designee. The Board is consulted if there is a concern for the integrity of the process, but the final determination is made by the chancellor or the Board designee whether the process should be suspended pending resolution of a matter of interpretation or substantial violation of the hiring process. Direct involvement by the Board is reserved for second-level interviews. In order to select a successful candidate, the Board is provided with an unranked list of finalists by the search committee chair. The policy provides the Board with the option to invite the chancellor or the Board designee to participate in the interview. An additional provision allows for the Board to interview additional candidates from the first-level interview pool in the order of the next highest search committee rankings. Each participatory governance group has at least one representative on the first-level interview committee, so the interests of a wide cross section of the District is represented in the search for the District's CEO.

Normally, the chancellor will provide oversight of the hiring process for District academic administrators, managers and the college presidents. Similarly, the college president normally will provide oversight of the hiring process for respective college administrators and managers. However in any hiring process, the chancellor or college president may appoint an alternate designee, as appropriate, to ensure avoidance of any conflict of interest. The chancellor or college president, with the assistance of the Office of Human Resources, oversees the implementation of the hiring process and the activities of the hiring committee as it exercises its duties, specifically to ensure that actions of hiring committees are consistent with both the written stipulations and the intentions of the established policy.

In August 2007 the Board adopted Board Policy 148 (Evaluation of the Chancellor [IV.C.19](#)) which stipulates that:

- The Board shall conduct an evaluation of the chancellor at least annually. Such evaluation shall comply with any requirements set forth in the contract of employment with the chancellor as well as this policy.
- The Board shall evaluate the chancellor using an evaluation process developed and jointly agreed upon by the Board and the chancellor.
- The criteria for evaluation shall be based on board policy, the chancellor job description, and performance goals and objectives developed in accordance with Board Policy 2100 (Delegation of Authority to the Chancellor [IV.C.22](#)).

The Board has a clearly defined policy for selecting the presidents of the Colleges. The hiring procedures are delineated in Board Policy 4011 (Employment Procedures for Administrators and Classified Managers [IV.C.21](#)). Board Policy 4011 mirrors the hiring procedures for the chancellor outlined above and clearly specifies rigorous hiring procedures to ensure the college president is sufficiently qualified to guarantee the integrity of programs and services. Presently, there is no board policy outlining the evaluation criteria for the college president. The chancellor sets the goals for the college presidents and evaluates them based on their assigned goals.

Analysis and Evaluation

The Board is responsible for hiring and evaluating the chancellor. In turn, the chancellor is responsible for selecting and evaluating his/her direct reports including the college presidents. On July 1, 2016, Chancellor Gary Poertner announced his retirement after serving as chancellor since December 2010. For continuity, the Board appointed Vice Chancellor Debra Fitzsimons as the Acting Chancellor of the District. Following a brief search, Dr. Fitzsimons was appointed Interim Chancellor at the August 22, 2016 Board meeting ([IV.C.23](#)).

The District is currently engaged in the process for hiring a new chancellor. In accordance with the aforementioned policies, Interim Chancellor Fitzsimons has been assigned oversight of the recruitment process. At various venues during the fall 2016 professional development week, Interim Chancellor Fitzsimons reached out to the shared governance groups and asked that the District as a whole begin thinking about the characteristics that are important in a chancellor so that individuals will be prepared to provide input in open forums and through their participatory governance leaders. Dr. Fitzsimons also explained that:

- The Board will hire an executive search firm for assistance with the selection process.
- The executive search firm will convene focus group/town hall meetings at both colleges. During these meetings, employee and student input will help develop a chancellor's profile.
- The executive search firm will use the desired qualities and characteristics for a new chancellor to develop a job description and timeline for selecting and hiring of the new chancellor.

Standard IV.C.4 Governing Board

The governing board is an independent, policy-making body that reflects the public interest in the institution's educational quality. It advocates for and defends the institution and protects it from undue influence or political pressure.

Evidence of Meeting the Standard

The Board of Trustees is comprised of seven members elected at-large to four-year terms by the voters in south Orange County. Each governing Board member qualifies for candidacy by having legal residence within one of seven different trustee areas ([IV.C.24](#)). Terms are staggered with elections being held every two years in connection with the general election. In accordance with California Education Code §72023.5 and Board Policy 104 (Student Membership of the Board of Trustees) ([IV.C.25](#)), the Board also has a student trustee elected by students for a one-year term. The student trustee has an advisory vote on actions other than personnel-related matters and collective bargaining items.

Board policy dictates that the Board act as an independent policy-making body that represents the public interest. Each trustee files an annual Conflict of Interest form (California Form 700, Statement of Economic Interests). A Conflict of Interest Policy (BP-154 [IV.C.26](#)) was adopted by the Board on August 27, 2007, and a corresponding conflict-of-interest administrative regulation (AR 154) has been implemented ([IV.C.27](#)). Additionally, Board Policy, BP-110 (Code of Ethics – Standards of Practice) asserts that each member of the Board will:

- Avoid any situation that may constitute a conflict of interest and disqualify him/her from participating in decisions in which he or she has a financial interest. Conflicts of interest may relate not only to the individual trustee but also to his or her family and business associates, or transactions between the District and trustees, including hiring relatives, friends, and business associates as college employees.
- As an agent of the public entrusted with public funds protect, advance and promote the interest of all citizens maintaining independent judgment unbiased by private interests or special interest groups.
- In all decisions, hold the educational welfare and equality of opportunity of the students of the District as his or her primary concern.
- Conduct all District business in open public meetings unless in the judgment of the Board, and only for those purposes permitted by law, it is appropriate to hold a closed session.

BP-110 also maintains that a “Board member may be subject to a resolution of censure by the Board of Trustees should it be determined the Trustee misconduct has occurred.”

The Board's role in protecting and promoting the interests of the District is also observed when the Board engages in advocacy efforts on behalf of the SOCCCD in particular, and community colleges in general, through its legislative advocates in Sacramento and in Washington, D.C. The Board sets its policy and legislative priorities in consultation with the chancellor, a state legislative consultant, and a federal lobbyist firm as illustrated in the September 2015 Legislative and Advocacy Efforts, Board presentation ([IV.C.28](#)).

Analysis and Evaluation

Board members work collaboratively to advocate for the interests of the District through interactions with the community, legislators, business organizations, and other public entities. The Board maintains its independence as a policy-making body by: (1) being well-informed and reviewing all materials in advance of meetings; (2) asking questions and requesting additional information or Board Reports as needed; (3) facilitating public input through open session comments at Board meetings; and (4) maintaining a comprehensive website that provides information to the public to support transparency in decision making ([IV.C.17](#)).

The College meets the standard.

Standard IV.C.5 Governing Board

The governing board establishes policies consistent with the college/district/system mission to ensure the quality, integrity, and improvement of student learning programs and services and the resources necessary to support them. The governing board has ultimate responsibility for educational quality, legal matters, and financial integrity and stability.

Evidence of Meeting the Standard

The Board establishes and updates policies consistent with the District's mission and monitors their implementation to ensure the quality, integrity, and improvement of student learning programs and services. The District wide mission and goals are reviewed annually by the Colleges and District Services. The overarching themes of the current mission and goals are: student success and access, community engagement, respectful interactions and collaboration, the economic vitality of the region, and fiscal responsibility ([IV.C.2](#)). The first four pages of the District's adopted budget provides an overview of budget and planning efforts, major capital projects, technology initiatives, budget resources, priorities and the Board's governing values regarding resource allocation ([IV.C.29](#)).

To assure fiscal integrity and the allocation of resources to support student learning programs, the Board has adopted guidelines for annual collaborative planning and periodic progress reports and updates. Board Policy, BP-2120 (Institutional Planning [IV.C.30](#)) sets

forth that the “Chancellor chairs a district wide planning council which provide opportunities for administrators, faculty, and staff to participate in revising, establishing, and implementing the district wide strategic plan to be submitted to the Board of Trustees for review, discussion, and revisions as needed, [and] the colleges and district services will use campus meetings, shared governance procedures, and contact with advisory council members and other college and district liaisons to obtain broad-based input on the District-Wide Strategic Plan.” The most recent Board presentation on strategic planning occurred in December 2015 ([IV.C.31](#)).

The Board ensures educational quality through Board policies governing students and instruction ([IV.C.32](#)). The Board’s commitment to providing resources for enhancing student performance outcomes is illustrated through the District’s investment in and support for the development of highly innovative technology tools ([IV.C.33](#)) that support educational quality and student success. Investments in technology tools like MAP (My Academic Plan), SHERPA, and the Student Success Dashboard have had positive impacts on the District’s student success agenda.

Long-term fiscal stability is key to assuring sufficient resources for student success endeavors and general operations. The Board has adopted policies to convey the expectations for fiscal planning, reserves, contingencies, accountability, regular reporting, investments, and the overall safeguarding of assets to ensure ongoing effective operations. Those specific policies are BP-3100 (Budget Preparation [IV.C.11](#)), BP-3101 (Budget Management [IV.C.12](#)), BP-3101.5 (Fiscal Management [IV.C.13](#)), and BP-3102 (Investment Policy [IV.C.14](#)). The District Resources Allocation Committee (DRAC), the Basic Aid Allocation Recommendation Committee (BAARC), and BP-3110 (Basic Aid Funds Allocation Process) govern the responsible allocation of all operating and capital outlay expenses to ensure educational quality and financial stability. Both committees are participatory governance committees representing all constituencies. The Board receives regular updates through reports and budget presentations ([IV.C.35](#)) including Basic Aid presentations ([IV.C.36](#)).

The Board maintains authority over all legal matters associated with the operation of the District, closely monitoring legal issues that arise, reviewing them in closed session, and approving decisions during open session, as required by legislative statutes.

Analysis and Evaluation

As documented above, the standing policies and practice of the Board of Trustees demonstrates the Board assumes responsibility for policies and decisions affecting educational quality, legal matters, and financial integrity and stability. The District’s mission is reviewed annually with input from constituencies district wide to ensure it continues to

support the quality, integrity, and improvement of student learning programs. The Board adheres to strict budget planning guidelines and fiscally conservative values and ensures that the colleges have the necessary resources to deliver quality student learning programs and services.

The College meets the standard.

Standard IV.C.6 Governing Board

The institution or the governing board publishes the board bylaws and policies specifying the board's size, duties, responsibilities, structure, and operating procedures.

Evidence of Meeting the Standard

The District publishes all Board policies, bylaws, administrative procedures ([IV.C.37](#)), and specifications related to the Board's size and areas ([IV.C.24](#)) on the District's website. Board members adhere to the guidelines in BP-112 (Duties and Responsibilities of the Board of Trustees) and other Board responsibilities outlined in the 100 Board Policy Series ([IV.C.38](#)).

Analysis and Evaluation

The published Board policies in the 100 Board Policy Series all pertain to the Board of Trustees and are comprehensive in scope in specifying the Board's size, responsibilities, structure, and operating procedures. The vast majority of policies refer to the corresponding Education Code, Government Code, Title 5, Penal Code, or WASC/ACCJC Standards. The Board publishes bylaws and policies that are made publicly available, both electronically and on paper. These policies are regularly reviewed and updated when necessary.

The College meets the standard.

Standard IV.C.7 Governing Board

The governing board acts in a manner consistent with its policies and bylaws. The board regularly assesses its policies and bylaws for their effectiveness in fulfilling the college/district/system mission and revises them as necessary.

Evidence of Meeting the Standard

The Board of Trustees is aware of, and operates in a manner consistent with, its policies and bylaws outlined the 100 Board Policy Series ([IV.C.38](#)) of the established Board Policies. The Board acts professionally and works collegially to resolve issues as documented in videotaped meetings and meeting minutes ([IV.C.17](#)).

The Board is actively engaged in regularly assessing and revising its policies and bylaws for their effectiveness in fulfilling the colleges' and District's mission and commitment to educational quality, institutional effectiveness, and student success. Board Policy, BP-107 (Board Policy and Administrative Regulation [IV.C.39](#)) notes that the "Board of Trustees will periodically review board policies [and] the Chancellor shall assist the Board of Trustees in the formation and revision of all board policies. In addition, recommendations for new or revised board policies may originate at any time from members of the Board of Trustees, the Chancellor, members of the district or college administration, faculty, staff, students, or members of the public."

The Board Policy and Administrative Regulation Advisory Council (BPARC) is a district wide participatory governance committee tasked with systematically reviewing and updating board policies. Revisions to board policies, once approved by committee, are presented to Chancellor's Council for review and input. The policies are then presented as a monthly agenda item for Board review and discussion. The following month, they are presented for board approval; once approved, the revised policies are posted to the District's website. Agendas, minutes and documents for BPARC and Chancellor's Council meetings are posted on the District's SharePoint intranet site home page under District wide Committees ([IV.C.40](#)). To illustrate, the following policies and administrative regulations were under review at the May 6, 2016 BPARC meeting:

- BP-7340 Employee Leaves – *FA Update from March 4, 2016*
- AR-7340 Employee Leaves- *March 4, 2016*
- AR-5302 Campus Safety- *Aug 23, 2013*
- AR-4225 Recruitment of Part-time Faculty – *March 4, 2016*
- BP-4011 Recruitment – Administrators and Managers
- AR-4011 Recruitment – Administrators and Managers
- BP-4720 Abusive Conduct in the Workplace- *Feb 5, 2016*
- BP-5626 Independent Study – *Sept 11, 2015*
- AR-5626 Independent Study – *Revised IVC 10-15, 2015*

Analysis and Evaluation

The Trustees act in accordance with established policies. Board meeting minutes, agendas, and videotaped sessions provide clear evidence of the Board acting in a manner consistent

with policies, bylaws, and responsibilities. Board policies and administrative regulations are subject to regular review and revision by BPARC. Additionally, the District recently hired a retired administrator to work part-time as facilitator for Board policy revisions.

The College meets the standard.

Standard IV.C.8 Governing Board

To ensure the institution is accomplishing its goals for student success, the governing board regularly reviews key indicators of student learning and achievement and institutional plans for improving academic quality.

Evidence of Meeting the Standard

At set intervals throughout the year, the Board reviews, discusses, and accepts reports that address indicators for student learning and achievement. The Board is updated annually with research and reports on institutional effectiveness, and student success and completion. Presentations are made at the public Board meetings so the trustees have opportunities to review and openly discuss performance indicators outlined by the Student Success Scorecard ([IV.C.41](#)). The Scorecard provides performance indicators on how well the colleges are doing in remedial instruction, job training programs, retention of students, and graduation and completion rates.

The Board has a second opportunity to review key performance indicators during the review of the ACCJC Annual Report ([IV.C.42](#)) which includes institution-set standards, goal/targets, and student achievement measures for students in basic skills courses, CTE programs, and degree and certificate programs. The Annual Report also includes data for SLO assessment, degree and certificate awards, and university transfer rates. The Board has also invited presentations on student success initiatives including ESL & Basic Skills, Financial Aid, Learning Resource Center Tutorial Programs, Enrollment Management plans, and Career Technical Education Certificate programs. During the ensuing discussions the Board has expressed an interest in factors that may contribute to low basic skills completion rates and benchmarking SOCCCD performance data with similar districts.

Analysis and Evaluation

The Board is regularly apprised of data for key indicators for student learning and achievement. Board agendas and minutes provide evidence of regular review, discussion, and Board input regarding student performance outcomes and the Colleges' plans for improving academic quality. The Board's level of engagement, along with its knowledge about student

learning and achievement, has grown over the years. Board members ask insightful questions and expect honest and thorough responses from the Colleges.
The College meets the standard.

Standard IV.C.9 Governing Board

The governing board has an ongoing training program for board development, including new member orientation. It has a mechanism for providing for continuity of board membership and staggered terms of office.

Evidence of Meeting the Standard

The District has an ongoing training program and an orientation program for new Board members that includes a review of ethical rules and responsibilities, compliance with the Brown and Fair Political Practices acts, and an overview of the District's operation. All new Board members—including the student trustee—are oriented prior to them taking office. The chancellor and District Services staff, in consultation with the president of the Board, facilitate an annual Board retreat, promote trustee attendance at relevant conferences, and arrange for periodic Board education presentations throughout the year. Additionally, Board members provide oral reports and summaries of the conferences and Board educational activities in which they have participated at each board meeting ([IV.C.17](#)).

Board Policy, BP-109 (Board Education [IV.C.43](#)) asserts that “the Board of Trustees is committed to its ongoing development as a board and to a trustee education program that includes new trustee orientation. To that end, the Board will engage in study sessions, provide access to reading materials, and support conference attendance and other activities that foster trustee education.” BP-109 adds that:

- It is the responsibility of each individual trustee to pursue professional development opportunities to maintain knowledge of evolving educational governance, policies, legislation, best practices, employee relations, leadership, and accreditation standards and expectations.
- Individual trustees are encouraged to participate in at least one conference per year that provides professional development of trustee-related knowledge and skills.
- On an annual basis, the chancellor will circulate a list of national, state and regional conferences for trustees to select which they will attend, in order to take advantage of discounts on early registration and travel.
- At the board meetings following conferences, workshops and meetings, trustees are encouraged to share their written report from attendance of such conferences, meetings or workshops. The Board president may allow additional time for oral

reports beyond the allotted two minutes, provided in the board report section of the agenda.

In practice, the Board training program and new member orientation includes:

- Board attendance at the CCLC Effective Trusteeship Workshop each January
- Board attendance at conferences with CCLC, AACC or ACCT.
- Completion of the online ACCJC's Accreditation Basics online training program.
- New board members receiving an orientation from the chancellor and the manager of the Office of the Chancellor and Trustee Services.
- Incoming board members meeting with each vice chancellor from each district services area, the college presidents, and several other department managers.
- Ethics training through the California Fair Political Practices Commission.

Board continuity is addressed through the combination of Board Policy BP-108 (Vacancies on the Board [IV.C.44](#)), which outlines the mechanisms for filling vacancies and with staggered elections. Specifically, Trustees are elected to four-year terms and Board member terms are staggered with elections held every two years in connection with the general election to provide continuity of Board membership.

Analysis and Evaluation

The Board has a consistent program for orientation and ongoing development including self-evaluation. The Board has followed policy in ensuring continuity of membership when vacancies have occurred. Staggered Board elections have provided consistency, and incumbents are frequently re-elected, adding continuity of governance.

The College meets the standard.

Standard IV.C.10 Governing Board

Board policies and/or bylaws clearly establish a process for board evaluation. The evaluation assesses the board's effectiveness in promoting and sustaining academic quality and institutional effectiveness. The governing board regularly evaluates its practices and performance, including full participation in board training, and makes public the results. The results are used to improve board performance, academic quality, and institutional effectiveness.

Evidence of Meeting the Standard

Each year the SOCCCD Board of Trustees conducts an evaluation of its performance in order to continually assess its effectiveness. Board Policy, BP-172 (Board Self Evaluation [IV.C.45](#))

states that “the Board is committed to assessing its own performance as a board in order to identify its strengths and areas in which it may improve its functioning.” The Board’s self-evaluation process includes surveys of Board members and employees, discussion of the surveys, and a workshop to review outcomes and set goals. All employees are invited to participate in providing feedback through a survey. A special meeting of the Board is publicized and conducted by a third-party facilitator. Information is posted on the District website for public transparency ([IV.C.46](#)). The Board fully reviews the surveys and Board goals in an effort toward continual improvement and effectiveness.

The Board of Trustees also holds periodic trustee listening sessions for classified staff and faculty to hear issues; these are publicized district wide. The Board may subsequently ask the chancellor to follow up on any concerns and provide a public presentation or Board report on a specific issue. The listening sessions help the Board clarify and underscore its role at the policy level. The trustee listening sessions improve Board performance by connecting the Board members to the Colleges and District. The chancellor, managers and administrators are asked not to attend these sessions in order to facilitate a more open dialog with Board members.

Analysis and Evaluation

The Board has clear policies and procedures for self-evaluation. The self-evaluation process has heightened the Board’s focus on communication and on appropriate roles and responsibilities for policy making in the District. The Board regularly participates in training, orientation, goal-setting, and self-evaluation activities, which have increased their knowledge of appropriate engagement in policy making, the accreditation process, college operations, and institutional effectiveness.

The College meets the standard.

Standard IV.C.11 Governing Board

The governing board upholds a code of ethics and conflict of interest policy, and individual board members adhere to the code. The board has a clearly defined policy for dealing with behavior that violates its code and implements it when necessary. A majority of the board members have no employment, family, ownership, or other personal financial interest in the institution. Board member interests are disclosed and do not interfere with the impartiality of governing body members or outweigh the greater duty to secure and ensure the academic and fiscal integrity of the institution.

Evidence of Meeting the Standard

SOCCCD has clear policies and procedures that govern ethical behavior and conflict of interest expectations for Board members as well as employees. The District also has defined procedures for dealing with behavior that violates the code of ethics. Board Policy 154 (Conflict of Interest) ([IV.C.26](#)) prohibits Board members from voting, debating, or attempting to influence the vote regarding a contract wherein the Trustee is financially interested as defined by Government Code §1091 and stipulates that a Board member shall not engage in any employment or activity that is inconsistent with, incompatible with, in conflict with or inimical to his or her duties as an officer of the District. Additionally, each trustee files an annual Conflict of Interest form (California Form 700, Statement of Economic Interests).

Board Policy, BP-110 (Code of Ethics – Standard of Practice) ([IV.C.15](#)) requires that:

- The Board maintains high standards of ethical conduct for its members.
- Members of the Board are responsible to establish and uphold, implement and enforce all laws and codes applying to the District.
- All Board members are expected to maintain the highest standards of conduct and ethical behavior and to adhere to the Board's Code of Ethics.
- The Board reserves the right to censure any Board member who does not adhere to this policy or engages in other unethical conduct.

The Board completes ethics training required by law for cities, counties, and special districts in California (AB 1234, Chapter 700, Stats. of 2005) through the California Fair Political Practices Commission (<http://localethics.fppc.ca.gov/login.aspx>). This training is free of charge and provided online. Upon completion of training Board members are provided with a Certification of Completion which kept on file in the Office of the Chancellor and Trustee Services.

Analysis and Evaluation

The Board of Trustees has a policy governing ethical behavior which includes detailed standards of practice and guidelines for enforcement. Board members are careful to disclose any connections to personal or financial interests that may conflict with their responsibilities as public stewards and abstain from any decision making related to such interests. Board meetings are taped to provide further public transparency. These are available on the District's website the day after each Board meeting.

The College meets the standard.

Standard IV.C.12 Governing Board

The governing board delegates full responsibility and authority to the CEO to implement and administer board policies without board interference and holds the CEO accountable for the operation of the district/system or college, respectively.

Evidence of Meeting the Standard

The Board delegates authority to the chancellor who, in turn, has responsibility for oversight of District operations and the autonomy to make administrative decisions. Board Policy, BP-2100 (Delegation of Authority to the Chancellor) ([IV.C.22](#)) asserts that in compliance with the provisions of the Education Code, the Board delegates full responsibility and authority to the chancellor to implement and administer board policies and conduct the business of the District and educational programs without interference and holds the chancellor accountable for the operation of the District. In addition, Board Policy, BP 2101 (Delegation of Authority to the College President [IV.C.47](#)) states that “the President is the Chief Executive Officer of the college [and] the President reports to, assists, and supports the Chancellor in the performance of the duties delegated by the Board of Trustees in Board Policy 2100.”

Analysis and Evaluation

As trustees have improved their understanding of their policy role and the importance of following official channels of communication through the chancellor, the Board has improved its ability to allow the chancellor and presidents the ability to handle operational and administrative details at the District and Colleges, respectively. These practices have effectively empowered the interim chancellor to manage the operations of the District while it nonetheless remains evident the Board holds her accountable.

The College meets the standard.

Standard IV.C.13 Governing Board

The governing board is informed about the Eligibility Requirements, the Accreditation Standards, Commission policies, accreditation processes, and the college’s accredited status, and supports through policy the college’s efforts to improve and excel. The board participates in evaluation of governing board roles and functions in the accreditation process.

Evidence of Meeting the Standard

The Board has a strong and ongoing focus on accreditation. All Board members are made aware of the ACCJC Eligibility Requirements and Accreditation Standards and processes

though ongoing training and Board presentations. The Board's annual training on accreditation includes a review of the ACCJC publication: *Guide to Accreditation for Governing Boards*, and all Board members complete the ACCJC's online *Accreditation Basics* training. [IV.C.48](#)

The Board of Trustees is kept apprised of the process and progress of the Colleges in preparing the self-study report through presentations and reports by college and district administration in public meetings ([IV.C.49](#)). District services administrators participate on the college accreditation steering committees and keep the chancellor updated on progress, and both colleges publish comprehensive accreditation resources on the college websites.

Analysis and Evaluation

The Board of Trustees is engaged in the accreditation process. Through training and presentations, Board members remain informed about Eligibility Requirements, Accreditation Standards, and Commission policies. In addition, the Board of Trustees supports the efforts of both colleges to improve and excel through the approval of institutional policies, processes, and practices that ensure the Colleges meet the Eligibility Requirements and in particular those requirements involving recommendations from previous self-study reports.

The College meets the standard.

Standard IV.D: Multi-College Districts or Systems

Standard IV.D.1 Multi-College Districts or Systems

In multi-college districts or systems, the district/system CEO provides leadership in setting and communicating expectations of educational excellence and integrity throughout the district/system and assures support for the effective operation of the colleges. Working with the colleges, the district/system CEO establishes clearly defined roles, authority and responsibility between the colleges and the district/system.

Evidence of Meeting the Standard

In accordance with Board Policy BP-2100 (Delineation of Authority of the Chancellor [IV.D.1](#)) Chancellor Poertner and now Interim Chancellor Fitzsimons have provided leadership and have encouraged employees from the Colleges and District Services to work together towards educational excellence and integrity. Through their leadership and communication, the chancellor and interim chancellor have clarified roles, responsibility, and authority between the Colleges and District Services as outlined in the Chancellor's Perspective ([IV.D.2](#)) and the District wide Function Map ([IV.D.3](#)) to support the effective operation of the Colleges. The interim chancellor meets regularly with the college presidents, and faculty and staff leaders to facilitate collaboration, team building, and mutual support for the Colleges. The interim chancellor also uses formal forums including district wide participatory governance meetings, facility ground-breaking and grand-opening ceremonies, district wide emails, and the Chancellor's Opening Session to communicate her expectations for educational excellence and integrity with college, district, and community stakeholders.

The interim chancellor holds the college presidents to clearly articulated standards for educational excellence, student success, and fiscal stability. She emphasizes and supports consultation with faculty and staff leadership in policies and activities related to student preparation and success, and district and college governance activities through the implementation of the District wide Planning and Decision-Making Manual (SOCCCD PDM) which has the expressed purpose of uniting the collective around the shared vision that "student success is the most important endeavor" of the District. ([IV.D.4](#)) The SOCCCD PDM, also clarifies roles and responsibilities and promotes "governance structures that enable our Colleges to fulfill their missions and respond effectively to the needs of students."

Chancellor Poertner sought opportunities to communicate about operational roles and delineation of responsibilities to clarify expectations. In the Chancellor's Perspective from June 18, 2015 ([IV.D.2](#)), Chancellor Poertner stresses that:

- There are clear lines of authority established between the board and chancellor and the chancellor and presidents.

- Organizationally, neither the Colleges nor District Services reign over each other. Any assumptions that one entity is superior over another sets unreasonable expectations and fuels tensions.
- District Services provides centralized functions, enabling the District to operate more economically and efficiently. Accounting, payroll, purchasing, contracts, job recruitment, and IT systems security are examples of services performed for all departments, divisions, and employees district wide.
- Some people may not realize that District Services is also responsible for areas related to legal, compliance, policy, legislative, reporting, development, systems, employee complaints, research and planning.

The *Chancellor's Perspective* also used statements from the employee surveys to provide context through examples. To illustrate, an employee noted that “the District does not give my department sufficient supply and equipment budgets.” Chancellor Poertner responded by noting that:

Funds are annually distributed through the District Resource Allocation Committee (DRAC), a participatory governance group, to each College and District Services. All college departments are funded out of college funds, and all of those decisions and allocations are made at the college level without interference from the Chancellor or District Services. Similarly, all District Services funds are allocated through the Chancellor's office.

Analysis and Evaluation

Interim Chancellor Fitzsimons communicates her expectations for institutional excellence and integrity through district wide participatory governance meetings, civic engagements, electronic communications, and college and district activities and events. In her role as vice chancellor for Business Services and her current role as interim chancellor, Dr. Fitzsimons has demonstrated leadership in updating the District wide Function Map and the District wide Planning and Decision-Making Manual, which clarify the roles and responsibilities of the Colleges and District Services.

Recent discussions during the 2016 update of the *District wide Function Map* have identified gaps in understanding of roles and authority between District Services and the Colleges. The ensuing dialog proved helpful in identifying and addressing service gaps and providing clarification of responsibilities and authority for employees and stakeholders across the District. To illustrate, as technology advances and the needs of students and the colleges change, the roles and responsibilities of College IT and District IT will need to be evaluated and updated more frequently.

The College meets the standard.

Standard IV.D.2 Multi-College Districts or Systems

The district/system CEO clearly delineates, documents, and communicates the operational responsibilities and functions of the district/system from those of the colleges and consistently adheres to this delineation in practice. The district/system CEO ensures that the colleges receive effective and adequate district/system provided services to support the colleges in achieving their missions. Where a district/system has responsibility for resources, allocation of resources, and planning, it is evaluated against the Standards, and its performance is reflected in the accredited status of the institution.

Evidence of Meeting the Standard

Interim Chancellor Fitzsimons has clearly communicated the delineation of functions and responsibilities of District Services from those of the Colleges in accordance with Board Policies:

- BP-112, Duties and Responsibilities of the Board of Trustees ([IV.D.5](#))
- BP-2100, Delegation of Authority to the Chancellor ([IV.D.1](#))
- BP-2100.1, Delegation of Authority to the Academic Senate ([IV.D.6](#))
- BP-2100.2, Role and Scope of Authority of the Academic Senates ([IV.D.7](#))
- BP-2101, Delegation of Authority to the College President ([IV.D.8](#))
- BP-3001, Delegation of Authority ([IV.D.9](#))
- BP-4309, Duties and Responsibilities of the Faculty ([IV.D.10](#))
- BP-4056, Classified Employees Participation in Decision Making ([IV.D.11](#))
- BP-5627, Student Participation in Governance ([IV.D.12](#))

In sum, there are over 20 Board Policies and associated Administrative Regulations that address the delineation of roles, responsibilities, and authority. As mentioned in Standard IV.D.1, the two primary documents that address the delineation of duties are the *District wide Function Map* ([IV.D.3](#)) and the *District wide Planning and Decision-Making Manual* ([IV.D.13](#)). Additionally, governance, fiscal, and operational responsibilities are often clarified and refined in the district wide participatory governance committees and councils, including the:

- Basic Aid Allocation Recommendation Committee ([IV.D.14](#))
- Board Policy and Administrative Regulation Advisory Council ([IV.D.15](#))
- Business Continuity Planning Committee ([IV.D.16](#))
- Capital Improvement Committee ([IV.D.17](#))
- Chancellor's Council ([IV.D.18](#))
- District Online Education Committee ([IV.D.19](#))
- District Resource Allocation Committee ([IV.D.20](#))
- District wide Planning Council ([IV.D.21](#))
- District wide Technology Committee ([IV.D.22](#))
- Learning Services Coordinating Committee ([IV.D.23](#))

The interim chancellor ensures that the colleges receive effective and adequate District Services support through dialogue, the governance structure, and the scope of authority of the units in District Services. Services at the district level are organized through the offices of the Vice Chancellor for Human Resources, the Vice Chancellor for Business Services, the Vice Chancellor for Technology and Learning Services, and the Chancellor and Trustee Services.

The Office of the Vice Chancellor for Human Resources (HR) is responsible for facilitating the recruitment, selection, and orientation of new employees; training and professional development; collective bargaining; compliance with State and Federal laws and regulations; management of the performance evaluation process; and human resources information systems.

The Office of the Vice Chancellor of Technology & Learning Services coordinates educational programs, technology services, and district wide research. The vice chancellor also provides leadership in: enrollment management; distance education; workforce development programs; online services, products, and programs; security, reliability, and continuity of all district wide network infrastructure, computer operations, and telecommunications; the maintenance of MIS data and reporting tools; and the maintenance of the Student Information System (SIS), My Academic Plan (MAP), MySite, the Learning Management Systems (Blackboard and Canvas), and Workday.

The Office of the Vice Chancellor for Business Services provides oversight of all business departments, including Fiscal Services, Facilities Planning and Purchasing, Accounting, Payroll, and Risk Management. The vice chancellor collaborates with the two colleges to prepare the tentative and final District budgets, and provide support and expertise to the District Resources Allocation Council (DRAC). The vice chancellor's office also provides oversight of the annual audit, new construction and facilities renovation, master plan development, and warehouse/mailroom services.

The Office of the Chancellor and Trustee Services is responsible for the coordination of all regular and special Board meetings, including notification, preparation, and distribution of agendas and minutes. Office responsibilities also include dissemination of information district wide, coordination of district wide events such as the Chancellor's Opening Session during Professional Development (Flex) Week each semester, and coordination of district wide committee meetings including the Chancellor's Executive Team, the Chancellor's Cabinet, and the Docket and District Leadership Team. Public Affairs, a division within the Office of the Chancellor, coordinates marketing; government, community and public relations; and media relations.

The services provided to the colleges by District Services are evaluated through discussions in, and surveys for, the participatory governance committees. For example, the District's resource allocation process is evaluated by several committees including CIC, BARC, and DRAC. Evaluation of services is also done with a bi-annual district wide climate survey

([IV.D.24](#)). The survey is used to provide opportunities for employee feedback and identify future goals. Lastly, evaluation of services is also done by each District Services department through the use of Administrative Unit Reviews (AUR) with goals, action steps, and documented outcomes ([IV.D.24.B](#)).

Following the aforementioned 2010 Commission recommendations pertaining to communication and the delineation of roles, Chancellor Poertner initiated discussions in 2011 that identified five district wide barriers to successful communication ([IV.D.25](#)):

- Unhealthy competition within and between IVC, Saddleback, and District Services.
- Lack of utilizing data and metrics for decision making.
- Circumvention and lack of established policies, procedures, and protocols.
- Lack of district wide perspective and mutual understanding and acceptance of the roles of each college and district services.
- Lack of district policy encouraging civility, respect, and collegial behavior.

A task force was formed for each barrier to identify assumptions and make recommendations for improved communication ([IV.D.26](#)). For example, the Barrier 4 Task Force (Lack of district wide perspective and mutual understanding and acceptance of the roles of each college and district services) identified the following assumptions and recommendations:

Assumptions

- We act as separate entities rather than as a unified district with one shared vision, focus, and purpose.
- There seems to be a general lack of respect for authority of the chancellor and/or district executive team by the presidents and/or other college managers and administrators.
- There seems to be a general lack of respect for the authority and responsibilities of the presidents and/or other college managers and administrators by the district executive team and/or other District Services personnel.
- District Services is often unresponsive and/or untimely.
- The knowledge base and expertise of District Services personnel is inconsistent, and individuals within the same department provide different information and advice.
- District Services is not customer (college) service centered, and often insular and/or process-driven.

Recommendations:

- Develop more in-depth new employee orientations.
- Conduct District Services department open houses and/or tours of the colleges.
- Increase in-person conversations and attendance at other departments' meetings.
- Develop a district wide calendar.
- Create job shadowing opportunities for faculty and staff.

- Increase the acceptance of roles and positions at the Colleges and District Services.
- Develop activities and/or compile personnel skills maps.
- Create student ambassador programs.

The Colleges and District Services have been charged to implement the recommendations from the barriers task force; this work is ongoing. To illustrate, IVC has a student ambassador program, both Colleges use a district wide calendar ([IV.D.27](#)), each district services department has conducted tours ([IV.D.28](#)), and facilitated conversations (Higher Understanding Gathering Sessions) ([IV.D.29](#)) have been held with the human resources, fiscal, facilities, and information technology teams to resolve issues.

Analysis and Evaluation

The interim chancellor strives to continuously delineate and outline the functions of District Services and its operational responsibilities to support the Colleges in achieving their missions. The adequacy and effectiveness of District Services are evaluated through Administrative Unit Reviews and employee satisfaction surveys. The District and Colleges almost continually discuss and evaluate the resource allocation process and the DRAC model. Yet, financial accountability policies are in place to ensure the Colleges receive adequate support and are able to meet Accreditation Standards related to financial resources and stability.

Given that college employees periodically expressed concerns that District Services occasionally overreached in their involvement in college operations, Chancellor Poertner arranged *District Services Road Shows* ([IV.D.28](#)) at the Colleges to provide an overview of each department, highlight topic areas where employees might need assistance, gather input from employees, and identify areas for improvement. These Road Shows are widely marketed to all employees, and the Road Show materials and resources are kept on the District's SharePoint site for future reference. Also, in response to feedback from the Colleges that District Services did not always appear to act in service of the Colleges, a professional development event was held March 22, 2016 that focused on improving the customer service skills of District Services employees.

The College meets the standard.

Standard IV.D.3 Multi-College Districts or Systems

The district/system has a policy for allocation and reallocation of resources that are adequate to support the effective operations and sustainability of the colleges and district/system. The district/system CEO ensures effective control of expenditures.

Evidence of Meeting the Standard

The District has established resource allocation policies and procedures that support the effective operations and sustainability of the Colleges and District Services. Under the leadership of the interim chancellor, college and district personnel work together to ensure effective control of expenditures and financial sustainability for the Colleges and the District Services.

DRAC and BAARC are the primary committees that provide leadership on district level budget policies and recommendations to the interim chancellor. The allocation of district general fund resources to the Colleges occurs in accordance with Board Policies, BP-3100 (Budget Preparation [IV.D.30](#)), BP-3101 (Budget Management [IV.D.31](#)), BP-3101.5 (Fiscal Management [IV.D.32](#)), and the Budget Development Guidelines ([IV.D.33](#)). The *Budget Development Guidelines* were developed to “ensure wise and prudent use of public resources, promote financial strength and stability, and maximize educational opportunities for students.” In addition, the *Budget Development Guidelines* specify that despite the District’s current basic-aid status:

- The expenditure budgets for ongoing purposes shall be the resources that would have been available from state apportionment.
- Excess revenue above apportionment shall be allocated at the College or District for one-time purposes such as to cover some of the unfunded obligations for the retiree benefit plans.
- Excess revenue above apportionment shall not be used for ongoing expenditures, such as salaries.
- Excess revenue above apportionment shall not be used for any other purposes that will jeopardize the District’s future financial stability.
- A general fund reserve for economic uncertainties of no less than 7.5 percent of the projected unrestricted revenue shall be maintained.

The District has established effective policies and mechanisms to control expenditures. College and district financial statuses are regularly reported to and reviewed by the Board, and the District commissions annual fiscal audit reports ([IV.D.34](#)). These audits are designed to provide reasonable assurance that the financial statements are free of material misstatement. The annual audit considers the District’s internal controls over financial reporting in order to plan the audit but does not give an opinion on those controls. The District’s participatory governance committees also provide comprehensive budget and financial oversight, including reviews of the District’s CCFS-320 filings, full-time Faculty Obligation Number (FON), enrollment projections, and year-to-year comparisons with enrollment targets.

Analysis and Evaluation

SOCCCD has a long history of financial conservatism. The Colleges and District Services adhere to standards of good practice that include the maintenance of adequate reserves and the obligation to maintain balanced budgets. Through the effective control of expenditures, District Services and the Colleges have consistently closed out the fiscal year with positive ending-balances. Each college president is responsible for his college budget and has the authority to collaboratively develop and implement appropriate processes for budget development and the effective utilization of financial resources in support of his/her college mission.

The District's Fiscal Services Office processes and facilitates the distribution of resources to the Colleges in accordance with the DRAC Model, State and Federal categorical fund allocation guidelines, and Board policies. The majority of resources allocated to the Colleges are data-driven and reflect the needs of the institutions through application of state-mandated guidelines and the local Board-approved budget guidelines.

The College meets the standard.

Standard IV.D.4 Multi-College Districts or Systems

The CEO of the district or system delegates full responsibility and authority to the CEOs of the colleges to implement and administer delegated district/system policies without interference and holds college CEO's accountable for the operation of the colleges.

Evidence of Meeting the Standard

As outlined in Standards IV.B.1 and IV.D.2, the Board of Trustees has adopted multiple policies and procedures to ensure that the chancellor gives full responsibility and authority to the college president. In January 2009 the SOCCCD Board of Trustees adopted Board Policy BP-2101 (Delegation of Authority to the College President [IV.D.8](#)). This policy establishes the college president as the final authority on the college level. At each college, the president is therefore expected to:

- Provide leadership in the development and implementation of a sustainable master plan and integrated strategic plan.
- Promote and support learning, teaching, and student success, including the maintenance and improvement of quality instructional and support services.
- Provide leadership in the development and implementation of career technical education to meet the needs in the community.
- Provide leadership in the development and implementation of a comprehensive enrollment management plan.
- Develop and monitor the college budget and assume fiscal responsibility.

- Propose strategies for selecting and retaining diverse high quality full-time faculty, staff and administrators.
- Provide leadership and empower the administrative team.
- Provide leadership focusing on accountability and professional conduct.
- Assume a highly visible leadership role in the community and build strategic partnerships with corporate, educational and community-based organizations.

In practice and accordance with Board Policy, BP 2101 (Delegation of Authority to the College President) and the adopted *District wide Function Map* ([IV.D.8](#)), the interim chancellor delegates full authority and responsibility for college operations to the college presidents and supports them in implementing district policies at their respective colleges. The college presidents are held accountable for their colleges' performance by the Board and interim chancellor but have the ability to conduct their work without interference from the interim chancellor and Board.

Analysis and Evaluation

The college presidents serve as the chief executives for their respective colleges and ensure the quality and integrity of programs and services, fiscal sustainability, and accreditation status of their colleges. The interim chancellor delegates fully the authority and responsibility to the college presidents for implementing college and district policies without interference. The Board, the interim chancellor, and the communities they serve hold the college presidents accountable for their performance.

The College meets the standard.

Standard IV.D.5 Multi-College Districts or Systems

District/system planning and evaluation are integrated with college planning and evaluation to improve student learning and achievement and institutional effectiveness.

Evidence of Meeting the Standard

SOCCCD has adopted district wide integrated processes for fiscal, facilities, strategic, and technology planning. These processes provide the framework for planning integration across the District with the goal of promoting student learning and institutional effectiveness. Administrative Regulation, AR-2120 (Institutional Planning) ([IV.D.35](#)) espouses that "District-wide goals will be integrated with the Colleges and District Services and reflected in their respective written planning documents." The District wide Integrated Budget Planning Resource Guide ([IV.D.36](#)) provides information about the planning and budget process in the District. From a fiscal standpoint, the Budget Development Guidelines ([IV.D.33](#)) and the application of the District Resource Allocation Model align the college

planning process with the District planning process. Also, the College's Education and Facilities Plans ([IV.D.37](#)) are integrated with and inform the overall District's Education and Facilities Master Plan ([IV.D.38](#)).

The Colleges' strategic plans are integrated with the District wide Strategic Plan ([IV.D.39](#)), through alignment of goals between the two. To illustrate, Goal 1 from the District wide Strategic Plan indicates that "SOCCCD will foster an environment characterized by creativity, innovation, respectful interactions and collaboration," and Goal 1 from the IVC Strategic Plan ([IV.D.40](#)) indicates that "IVC will foster an environment characterized by creativity, innovation, respectful interactions and collaboration." The Colleges have, in effect, adopted the strategic goals of the District, but the Colleges have sufficient autonomy and responsibility to implement unique objectives for the shared goals, based on local conditions and institutional priorities.

The District Technology Plan ([IV.D.41](#)) aligns with the District wide Strategic Plan ([IV.D.39](#)), and establishes the framework of goals and objectives that guide district wide technology planning. The IVC Technology Plan ([IV.D.42](#)) is integrated with the District Technology Plan and both establish standards and prioritize the deployment of technological solutions based on available resources.

There are several mechanisms used to evaluate the effectiveness of integrated planning throughout the District. District wide and college wide participatory governance planning committees assess their effectiveness through the annual committee self-evaluation process ([IV.D.43](#)). Administrative Unit Reviews (AUR) ([IV.D.44](#)) include an analysis of planning outcomes and a review of planning processes.

Analysis and Evaluation

SOCCCD has established mechanisms for integrated district wide strategic planning. This integration involves collaboration and cooperation between the Colleges, District Services, and participatory governance committees. Assessment mechanisms include discussion and subsequent updates of governance and decision-making processes, district wide surveys, college wide surveys, governance committee self-evaluation, and AURs.

The College meets the standard.

Standard IV.D.6 Multi-College Districts or Systems

Communication between colleges and districts/systems ensures effective operations of the colleges and should be timely, accurate, and complete in order for the colleges to make decisions effectively.

Evidence of Meeting the Standard

Board Policy, BP-2001 (Administrative Organization) ([IV.D.6](#)) maintains that for “the District and the Colleges to be governed and administered in an effective manner, it is necessary that lines of communication be established within the organization so they allow for the orderly transaction of business.” To promote effective and timely communication, the interim chancellor meets weekly with the college presidents to discuss executive issues and ensure seamless operations of the Colleges. SOCCCD also has a robust participatory governance process in which numerous councils and committees with diverse representation meet regularly to enhance communication and ensure the effective and timely flow of information between and among the Colleges and District Services. In accordance with the Brown Act, agendas are posted in advanced of meetings, and minutes and meeting handouts are posted electronically on the respective committee’s SharePoint site. For example, the Chancellor’s Council meets monthly to discuss district wide topics, and all constituency groups are represented. Council members provide updates and are responsible for communicating information back to their constituencies in a timely manner.

The Executive Director of Public Affairs and Government Relations in the Chancellor’s Office reports outcomes from board meetings in Board Highlights ([IV.D.45](#)), a newsletter sent out via email district wide following each regular Board meeting. These are also posted on the District website. The Public Affairs Office also sends out announcements from District Services departments via district wide emails on various subjects to ensure a high level of effective operations and constant communication with employees. The District Services administrative units have conducted Road Shows ([IV.D.46](#)) and produced and distributed newsletters ([IV.D.47](#)) to enhance communication and ensure the effective operation of the Colleges. ([IV.D.29](#))

Analysis and Evaluation

Due to sheer size, complexity, and volume of activity, the Colleges and District Services periodically struggled with communication. Maintaining consistent engagement and effective communication has been a priority for Chancellor Poertner and Interim Chancellor Fitzsimons. To address communication deficits, the District, Colleges, and primary planning bodies have all adopted strategic planning goals that emphasize the need for ongoing efforts to promote “respectful interactions and collaboration.” Table IV.1 and Table IV.2 outline the results of the most recent College and District employee survey results that are related to communication and collaboration ([IV.D.48](#), [IV.D.24](#)).

At the same time, the Colleges and District Services have improved in many respects, as stakeholders enjoy improved access to information. College and District Services SharePoint sites host information and resources for the primary units and governance committees, as

well as newsfeeds, announcements, meeting agendas, handouts and outcomes, directories for assistance, and archived communications for reference. Committees and councils have increased their membership to ensure broad constituent representation, to add new perspectives to the conversation and to improve transparency about processes. The advent of Road Shows, HUGS, newsletters and other endeavors to improve communications highlight the District's commitment to promoting timely, accurate, and complete communication in order for the Colleges to make decisions effectively.

The College meets the standard.

Standard IV.D.7 Multi-College Districts or Systems

The district/system CEO regularly evaluates district/system and college role delineations, governance and decision-making processes to assure their integrity and effectiveness in assisting the colleges in meeting educational goals for student achievement and learning. The district/system widely communicates the results of these evaluations and uses them as the basis for improvement.

Evidence of Meeting the Standard

Under the guidance of Chancellor Poertner and Interim Chancellor Fitzsimons, the District regularly evaluates and communicates the effectiveness of role delineations between District Services and the Colleges for governance and decision-making processes. Role delineations are evaluated during the bi-annual review of *District wide Function Map* (IV.D.7) and the *District wide Planning and Decision-Making Manual* ([IV.D.13](#)) with revisions made based on input from participatory governance committees, administrative units, the Chancellor's Cabinet, and college stakeholders. The Function Map is currently being reviewed and updated and will be finalized prior to the Colleges' 2017 site visit.

The District has implemented and upheld an annual process for governance committee evaluations and analysis and reporting of results. These committee self-assessments usually document the committee's accomplishments and challenges in addition to highlighting areas for improvement in the college and/or district governance processes. District Services and the Colleges have designed and administered bi-annual district wide and college wide surveys, the results of which are discussed widely and posted on the College or District website for review. The District institutionalized these cycles and continues to review and revise processes to assure integrity and institutional effectiveness.

Analysis and Evaluation

SOCCCD has processes and regularly evaluated district and college role delineations, governance, and decision-making and has developed mechanisms for wide communication of the results of these evaluations. The District and Colleges have conducted surveys ([IV.D.48](#),

IV.D.24), analyzed recurring themes, disseminated and discussed results, and used the results to plan improvements. To illustrate, the following are excerpts from the 2014 District Climate Survey:

I am aware of the District wide integrated strategic planning process.		
Strongly Agree	63	9%
Agree	315	47%
Disagree	170	25%
Strongly Disagree	37	5%
Don't Know/Not Applicable	88	13%
Total	673	100%

I feel planning in our District is effective.		
Strongly Agree	38	6%
Agree	254	38%
Disagree	150	22%
Strongly Disagree	55	8%
Don't Know/Not Applicable	176	26%
Total	673	100%

I am aware of the District wide Planning and Decision Making Manual.		
Strongly Agree	49	7%
Agree	203	30%
Disagree	191	28%
Strongly Disagree	90	13%
Don't Know/Not Applicable	140	21%
Total	673	100%

The College meets the standard.

Quality Focus Essay: Institutional Effectiveness

Introduction and Action Project Selection

IVC chose three projects that are institutional in scope and have an impact on student learning and achievement for quality focus essay (QFE) topics. The topics that require further study and institutional effort to improve student learning and achievement became evident during the self evaluation process and are: the use of disaggregated student learning outcomes, online education, and the resource allocation process.

Action Project One: Disaggregated Student Learning Outcomes

Overview

The College has used disaggregated achievement data in program reviews, and planning and decision making for some time. What is new is the notion of using disaggregated student learning outcome data. As such, the College will expand the model and processes that have been developed by the English department ([I.B.76](#)).

Action Project	Outcomes	Alignment with Standards
Disaggregated Outcome Assessment Implementation	Strategic	I.A, I.B, II.A, II.B, and II.C

Description, Purpose and Goals

The desired goals for this project encompass the need to measure the effectiveness of new, emerging, and expanding initiatives and programs that are designed to increase student achievement. For example, the English department has disaggregated learning outcomes data for accelerated courses versus full term traditional courses and sequences. Acceleration has been a useful tool in efforts to minimize the time that students spend in basic skill sequences. As the College expands acceleration to other disciplines, it has become evident through the self evaluation process that disaggregating achievement data alone is not sufficient for assessing program effectiveness. Consequently, disaggregated learning outcomes data should be an additional measurement in the course and program evaluation process.

In addition to acceleration, the College has recently increased online education course and program offerings. The emerging practice of disaggregating learning outcome data should naturally be expended to these areas. For online education, the achievement gap has been moved to the forefront of the conversation about student success, so disaggregated learning outcomes data for fully online versus face-to-face courses will serve as a second but equally critical metric.

While the College is currently prepared and has established practices to disaggregate SLO data at the course and program level, additional discussions must be had to acquire the staff and technology to disaggregate outcomes data at the student level (ex. by gender or socioeconomic status). IVC is committed to moving in this direction and will develop a comprehensive plan that identifies resources and a timeline by spring 2018. In the interim, the College will expand outcome disaggregation to the areas outline in Table QFE.1

Table QFE.1: Learning Outcomes Disaggregation Plan

Disaggregated SLO Data	Action Plan	Responsible Party	Timeline to initiate
Accelerated versus traditional courses and sequences	In addition to English, expand disaggregation to mathematics, reading, and language acquisition acceleration	Academic departments, OOI, and ORPA	Fall 2016 – Spring 2018
Fully online versus face-to-face courses	Disaggregate in all cases where online and face-to-face courses are offered	OETF, academic departments, OOI, and ORPA	Fall 2016 – Spring 2018

Action Project Two: Online Education

Overview

IVC offers online learning that consists of programs and courses offered fully online and partially online (hybrid) with the guiding principle of increasing student access and success. To support students, the Online Education Task Force (OETF) seeks to address the challenges related to minimizing the achievement gap between students taking fully online courses and face-to-face or hybrid courses ([Achievement Gap Data](#)). The OETF is also tasked with making recommendations to address the need for additional infrastructure, ongoing professional development, innovative course designs, and enrollment growth.

Action Project	Outcomes	Alignment with Standards
Online Education Strategic Planning and Implementation	Strategic	I.A, I.B, II.A, II.B, II.C, III.A, III.B, III.C, IV.C, IV.D, and Substantive Change for OE

Description, Purpose and Goals

Following a period of steady growth in online offerings the College made a commitment to systematically re-enforce a framework for online learning, using planning and resource allocations to prioritize actions for improvement in faculty professional development and student learning ([Q.1.1](#), [Q.1.2](#)). Each year, the OETF addresses and assesses significant goals with achievable outcomes, (i.e., what has been accomplished in the prior year is assessed, discussed, changes are made, with documents updated and new priorities established for the upcoming year). In an effort to close the online education achievement gap, the OETF highlights the need for continued progress in the following areas:

- Regular and effective contact and student engagement in learning through a review of the DE Faculty Handbook and quick sharing at each School meeting in the fall semester
- Faculty professional development
- Online course approval process
- OE strategic plan and resource request process and actions
- Collaborative decision-making and resource allocation processes
- Work with the Technology Advisory Task Force to align technology, helpdesk, and faculty training (e.g., 508 and 504 compliance).

When the Online Education (OE) Strategic Plan was developed, the college intentionally integrated the Districtwide Strategic Plan, IVC Strategic Plan and IVC Technology Plan to support the strategic directions outlined in the IVC OE Strategic Plan. The Administrative Unit Review (AUR), with outcomes (AUOs) are directly linked to the strategic plan. The AUR, which includes an assessment plan, is reviewed annually by the OETF. The OETF also consults with and communicates planning, annual priorities and technology and innovation needs to the Technology Advisory Task Force (TAFT). IVC continues to make changes to its Online Education program and courses in order to continually improve learning and instruction. (Online Education Strategic Plan ([Q.1.3](#)), District wide Strategic Plan ([Q.1.4](#)), IVC Technology Plan ([Q.1.5](#)), OE AUR ([Q.1.6](#)).

The achievement gap reported in the OE AUR ([Q.1.6](#)) used data from the Chancellor's Office that combined the results for fully online and hybrid courses. When viewed in this light, IVC's achievement gap is smaller than the gap for the state as a whole. In Table QFE.2, the data is presented for course that are fully online and those that are face-to-face since the achievement gap is largest when these measures are compared. Although IVC's achievement gap is narrower than the statewide average and has improved over time, the College intends to continue this improvement with the goal of significant narrowing or eliminating the gap.

Table QFE.2: Achievement Gap for Fully Online versus Face-to-Face Courses

Achievement Gap: Online vs. Face-to-Face		
Term	Percent Success	Percent Retention
Fall 2013	9.46%	4.85%
Spring 2014	8.15%	2.43%
Fall 2014	11.95%	7.45%
Spring 2015	8.90%	5.65%
Fall 2015	9.54%	4.22%
Spring 2016	7.12%	3.26%

Online Education Strategic Planning

The focus of the plan is to continually improve student access and faculty development to enhance completion, success, and instructional excellence. As a part of the action plan and process improvement, the Irvine Valley College Online Education Strategic Plan was created in 2015 and is reviewed annually by the OETF. This plan was a response to the high impact of online education on Irvine Valley College. In fall 2009, the Online Education course offerings accounted for approximately 8% of college's total enrollment; as of fall 2015, the percentage has steadily increased to 14%. There are 5 Certificates of Achievement (COAs) offered 100 percent online. There are 35 Certificates of Proficiency (COPS) offered 100 percent online. Other AA degrees and GE Certifications can be earned in an online environment, including CSU/IGETC requirements.

In response to this growth, and in alignment with IVC's Online Strategic Plan, departments at IVC can determine the suitability of their courses for online offerings. The OETF assesses student satisfaction and information every semester and uses this information to address any issues and confirm priorities and goals.

The process to develop the Online Education strategic plan involved faculty input, from academic school meetings, program reviews, the OETF, forums and college-wide presentations (e.g., Faculty professional development week). The OETF annually reviews the plan.

The purpose of the IVC Online Strategic Plan is to increase access and success for online students through:

- 1) Determining which components are essential to providing appropriate and effective online course offerings and services to students, enabling them to complete requirements and participate in a quality educational experience without physically visiting the campus sites;
- 2) Assessing the background and current state of those components, and making recommendations regarding ways to improve;
- 3) Developing a vision for the expansion of the online site to serve the needs of students and prospective students and helping them reach their educational goals through online learning;
- 4) Ensuring the subsequent development and support of a robust online education offering at Irvine Valley College;
- 5) Establishing a key place for online learning and the online site in *the IVC Planning and Decision-Making Manual* (PDM);
- 6) Evaluating infrastructure needs for the online site and projecting the resources necessary to build that infrastructure;
- 7) Involving the online site in provision of comprehensive educational programs that fulfill the South Orange Community College District's mission.

The IVC Online Education Mission Statement created in this process is: "The IVC Office of Online Education will promote student success and faculty development by providing resources, policies, procedures, and services to students and faculty to support high quality online instruction and learning."

The IVC 2014-2017 Online Strategic Goals include:

- 1) **Goal 1:** IVC will foster an environment characterized by creativity, innovation, respectful interactions and collaborations;
- 2) **Goal 2:** IVC will promote students' success by enhancing the teaching and learning environment;
- 3) **Goal 3:** IVC will advance economic and workforce development through regional partnerships with educational institutions and industry, and by strengthening career technical education;
- 4) **Goal 4:** IVC will strengthen long-term financial health and institutional effectiveness through integrated planning and resource allocation.

Table QFE.3: Online education objectives

Objective	Description
Objective 1.1	Recognize and support innovative ideas that improve collaboration and respectful interactions district-wide on the topic of Online Education.
Objective 1.2	Improve district climate in the areas of optimism, commitment, and respectful collaborations on the topic of Online Education.
Objective 1.3	Improve the representation process through active engagement and communication on the topic of Online Education.
Objective 1.4	Increase professional development opportunities that potentiate employees' talents and interests on the topic of online education.
Objective 2.1	Increase student completion rates (degrees, certificates, and transfer) while preserving access, enhancing quality, and closing achievement gaps for courses and programs via online/hybrid modalities.
Objective 2.2	Increase employee professional development opportunities that focus on student success outcomes for Online Education.
Objective 2.3	Increase opportunities for student engagement inside and outside the classroom, evidenced by co-curricular participation, student services, and instructional support for courses and programs offered as Online Education.
Objective 3.3	Provide relevant, innovative, and appropriate workforce training, including courses and programs offered as Online Education.

The areas of online education at IVC that have the most room for improvement are: the distance education curriculum process, faculty professional development, the learning management system, and the online education course review process.

Distance Education Curriculum Process

The curriculum proposal process requires teamwork and effort from many different faculty members and administrators. The Curriculum Committee must approve each course taught in an online or hybrid format. The process to develop a new online or hybrid course may take up to a year. The actual development and design of the course is approximately 100–300 hours.

Each mode of instruction for an existing course intended for delivery by Online Education (OE) is separately reviewed and approved by the Curriculum Committee prior to being offered.

For online courses, including both fully online courses and hybrid courses, the curriculum process is as follows: faculty complete and submit an OE/DE proposal for the course as per

the DE faculty handbook (linked below); the OE/DE proposal (form linked below) moves through the curriculum approval process beginning with a review by other faculty in the same School, then is reviewed and approved by the department or school chair; upon approval, the proposal is reviewed by the Alternate Media Specialist, who works with faculty to insure the course is accessible (meets Section 508 compliance) for all students; after further review by Technical (Tech) Review, which is a subcommittee of the Curriculum Committee, suggested changes are addressed by faculty; this is followed by the OE/DE proposal being sent to the Curriculum Committee for approval; before finally going on to the IVC Academic Senate.

The OE/DE proposal process focuses on establishing how faculty will engage students throughout the course. Methods used for substantive, regular, effective academic engagement must be described in terms of the tools used and how frequent the contact is.

IVC has been working hard to increase its online course offerings and this process begins with curriculum approval. Currently, IVC has approved 281 courses for 100 percent online instruction and/or hybrid instruction and another 54 courses are currently in the process of being approved. IVC's goal is to approve and reassess its online course offerings every semester.

Professional Development

Providing faculty Professional Development opportunities is a foundational activity for the OETF and the Faculty Co-Chairs. The College is in the process of transitioning to a new LMS and professional development is essential in assuring a smooth transition; therefore, the OETF offers multiple @ONE Introduction to Teaching with Canvas trainings which focus on effective practices in online instruction; this workshop builds on a solid understanding of California Community College distance education policies and procedures, giving faculty the opportunity to actively create an effectively designed online learning unit, maximize student success, develop online policies, identify the functions of a course management system, explore dynamic online content options, evaluate online assessments, and successfully apply copyright and fair use practices to digital content. In addition to these trainings, the OETF has supported the following professional development opportunities since 2014:

Online Education Professional Development Opportunities:

- Introduction to Online Teaching with Canvas (IOTC)
- @ONE Online Training: Introduction to Online Teaching and Learning
- @ONE Online Training: Introduction to Teaching with Canvas
- Online Teaching Conference
- 4C/SD Professional Development Conference

- Academic Senate for California Community Colleges Plenary

Learning Management System Migration

The California Community Colleges have implemented the Online Education Initiative (OEI). One of the primary offerings of the OEI is a subsidized migration to a LMS that has been selected and recommended by the OEI – Canvas. Irvine Valley College began the process of exploring this opportunity in August 2015. Over the last academic year, the OETF has worked to develop a LMS decision-making process, an endeavor that has involved multiple presentations from two LMS vendors (Canvas and Blackboard), faculty participation in the Canvas “sandbox”, college-wide forums to discuss both the process and assessment of vendor demonstrations, and feedback from the Canvas Pilot Workgroup. Based on the results of these explorations, the OETF made a recommendation to the Academic Senate and the Academic Planning and Technology Committee (APTC) to migrate from Blackboard to Canvas. In addition to providing this input to the reporting groups for OETF, the recommendation was vetted with the Technical Advisory Task Force, Budget Development and Resource Planning Committee (BDRPC), Strategic Planning and Accreditation Committee (SPAC), and District Online Education Committee (DOEC). During spring 2016, summer 2016, and fall 2016, the OETF provided professional development for faculty to learn Canvas (see below for the Professional Development Table); the OETF will continue to support professional development opportunities through the final migration phase-in. For fall 2016, the institution implemented a Canvas Pilot consisting of 51 sections, 36 faculty, and 1271 students and plans to continue to assess, expand, and support the implementation of Canvas during spring, summer, and fall 2017, with the process ending in December 2017.

Online Course Review

In order to continue to insure the rigor and quality of the College’s online and hybrid course offerings, the OETF is developing a system and rubric for evaluating online courses. The development of the process will take place primarily through discussion in the Online Education Task Force meetings. The goal is to develop a process based on the input by faculty and online education policies. Topics of discussion will include areas of the course that should be assessed including course design, accessibility, interaction and collaboration in the course, methods of assessment, and support for learners. This discussion will lead to the development of a rubric and a systematic process of course evaluation for OE/DE courses.

Table QFE.4: Online Education Action Plan

Action Plan	Measures of Progress	Responsible Party	Timeline
Faculty Professional Development for Online Education	Accessibility: Number of Accessibility Prof. Development Opportunities offered throughout the year.	Technology Services	fall 2015 through spring 2019
	Canvas: Number of completers in the @ONE Introduction to Teaching with Canvas (ITC) or Introduction to Online Teaching Using Canvas (IOTC) or similar workshops	Online Education Task Force (OETF) and Technology Services	summer 2016 through fall 2017
	Online Pedagogy – Regular, Effective and Substantive Contact: Number of completers in the @ONE Introduction to Online Teaching and Learning (IOTL) or Introduction to Online Teaching Using Canvas (IOTC) or similar workshops	Online Education Task Force (OETF) and Technology Services	spring 2016 through spring 2019
Online Course Review	Approval of Course Design Rubric	OETF, Academic Senate, APTC	spring 2016 through spring 2017

Action Plan	Measures of Progress	Responsible Party	Timeline
	Development and approval of the Online Course Review Process (OE Faculty Handbook)	OETF, TATF, Academic Senate, APTC, SPAC	spring 2016 through spring 2017
	Number of completers of training for Peer Faculty Course Reviewers	OETF	fall 2017 through spring 2019
	Number of Courses Reviewed by Faculty employing a Course Design Rubric	OETF	spring 2018 through spring 2019
	Accessibility: Number of DE Proposals and active courses validated for Section 508 compliance	Technology Services	spring 2018 through spring 2019
LMS Migration from Blackboard to Canvas	Timeline: Approval	OETF, TATF, Academic Senate, APTC, SPAC	spring 2016 through fall 2016
	Phased-In Implementation	OETF and Technology Services	fall 2016 through fall 2017
	Full Implementation of Canvas	OOI, OETF, and Technology Services	spring 2018
Distance Education Curriculum Process	DE Proposal Form Approval	OETF, Curriculum Committee, Academic Senate, APTC	fall 2014 through spring 2016

Action Plan	Measures of Progress	Responsible Party	Timeline
	Number of DE Course Proposals Approved	Technology Services (508 Compliance), Technical Review, Curriculum Committee, Academic Senate	ongoing

To meet the needs of student attending IVC online, the college community will continue to:

- Recognize and support innovative ideas through respectful collaboration and active engagement on the topic of OE district wide.
- Increase professional development opportunities for faculty and technology services staff who provide faculty online education training that focuses on student success outcomes for OE.
- Increase student completion rates (degrees, certificates and transfer) while preserving access, enhancing quality, and closing achievement gaps for courses and programs offered via online/hybrid modalities.

Throughout the next academic year, the IVC campus community will continue to increase opportunities for student engagement inside and outside the classroom for courses and programs offered in Online Education by systematically expanding OE offerings with appropriate support, resources, and attention to quality in order to meet Strategic Planning Objective 3.3. It will also provide relevant, innovative, and appropriate workforce training, including courses and programs offered as online education.

Action Project Three: Resource Allocation Process

Overview

IVC has an open and transparent resource allocation process that has evolved incrementally following each annual review. The current process has many positive attributes, but it is time consuming and could potentially have negative impacts on student learning and achievement because of the time need to review requests prior to acquiring support staff, supplies, and equipment especially for off-cycle resource requests.

Action Project	Outcomes	Alignment with Standards
Resource Request Process Component of Budget Development and Management	Strategic	I.A, I.B, I.C, II.A, II.B, II.C, III.A, III.B, III.C, III.D, IV.A, and IV.B

Description, Purpose and Goals

Since 2007, IVC faculty, classified staff, managers, and administrators have been working together to develop and improve the College's methods for allocating resources in a fair, equitable, and open fashion that reflects its strategic intentions and operational needs. Funds not already allocated for general costs of doing business—including salaries and benefits, utilities, ongoing maintenance and upkeep, and office and instructional supplies—are scarce and thus highly sought after. All college processes, including those for allocation of resources, have been evolving steadily; the component engendering the most discussion about the need for improvement is the Resource Request Process.

The College receives funds from diverse sources, many of which have specific restrictions. Until recently, the allocation of funds from most of these sources have been managed by one or two administrators or managers who have been designated as the functionary most closely involved with the designated uses of these funds. Following the 2010 ACCJC recommendations, in 2011 the Resource Request Process, which employs Strategic Planning Committees (SPCs) to prioritize allocations, was revised to permit any employee to make a resource request that includes funding sources other than general fund.

To increase the efficiency and open access for requestors, appraisers, and observers in the process, a software program was developed in-house to meet the specifications of the process. This development has been fortuitous because each iteration has resulted in modifications to the process, and therefore the program, in response to feedback from all involved parties. The system stands as a vast improvement over the paper-based process used

in the past, and most of the people involved agree that we are seeing incremental improvement with each cycle of use, review, and revision in each subsequent year.

Three remarkable aspects of the process IVC now employs are:

- All employees are invited to submit requests into the system; the requests remain in the system available to view and track, throughout the entire process. All employees have access to the IVC SharePoint site, Inside.IVC.edu, where the progress of any proposal through its consideration and minutes of committee meetings can be monitored by any interested employee.
- Review includes the budget manager of the area or department from which the request originates, the directors of College Technology Services and Facilities (if relevant), and the appropriate vice president to get a sense of need and relevance from the people most involved technically and operationally with the proposal. Then, one or more SPCs rate the proposal, to prioritize each proposal from a college-wide perspective as well as with a view to its strategic import. Final open collegial review occurs in the Strategic Planning and Accreditation Council (SPAC). Membership in all the SPCs and SPAC thus represents all governance groups, and decisions are made by consensus. SPAC makes its recommendations to the president, who makes funding decisions.
- All sources of funding are listed and considered (to the extent that their restrictions allow) when SPAC deliberates on its final recommendations. This procedure makes all sources of funds visible to the college community.

Each of these three components affords major benefits to the college, but each also results in challenges that the institution continues to work to address, while at the same time being mindful of preserving the strengths of the system. The goal of this project is to develop a Resource Request allocation process that better balances the virtues of the current system with advancing solutions to its major problems to minimize the possibility of negative impacts on student achievement and outcomes.

The primary challenges that we have encountered are that our process is cumbersome, laborious, and takes much too long to complete. Many of these weaknesses are a direct consequence of allowing anyone to make a request and keeping all requests in the system throughout the process, which greatly increases the number of requests being considered. Having many eyes review and rate or comment on each request is laborious and seems, to many, to be redundant or superfluous. Especially in cases where several requests are submitted, it takes a long time for individuals to complete their review work.

In the past, when only unrestricted general funds were considered in the open Resource Request process, it was clear that many fewer requests could be accommodated, which greatly reduced the need for extended conversation, because only the highest value requests

could be considered. A possible solution to the time commitment issue with everyone reviewing all resource request would be to separate the categorical and restricted funding sources from general fund requests. In theory, an equally transparent and more nimble process could be developed around two broad funding source categories. This new process could be implemented as the College moves to integrate several major planning initiatives: Basic Skills, Student Equity, Student Success Support Programs, Perkins, and the Strong Workforce Initiative.

One idea currently being considered by committee members who have been involved in this process involves reviewing requests two or three times per year, instead of the current practice of rating requests in the spring. This change would address two main problems: the number of requests and thus, the workload entailed, and the fact that some funding sources have a fiscal year that differs from that of the college general fund. Reviewing a smaller number of requests in a shorter season could be more feasible than taking them all at once, could furthermore permit a more thorough discussion, and could result in a shorter response time for requesters. Even if the number of requests increases slightly with a “rolling” system as envisioned, IVC believes the smaller number being considered at each period will reduce the human toll.

Table QFE.5: Action Plan for Addressing the Speed of the Resource Allocation Process

Goal	Action Plan	Responsible Party	Timeline
Expedite the resource request process while maintaining transparency and access	Pilot biannual review cycles.	BDRPC/SPAC	fall 2016 – spring 2017
	Discuss separating categorical fund requests from general fund requests.	BDRPC/SPAC	spring 2017
Align resource request process with the fiscal years of all funding sources	Pilot biannual review cycles.	BDRPC/SPAC	fall 2016-spring 2017
	Pilot triannual review cycles.	BDRPC/SPAC	fall 2017-spring 2018
Revise online resource request program	Allow two entry points/consideration cycles	IVC Technology Services	fall 2016-spring 2017
	Allow three entry points/consideration cycles	IVC Technology Services	fall 2017-spring 2018

Changes and Plans Arising out of the Self Evaluation Process

Change, Improvement and Innovation	Standard	College Leads	Timeline	Anticipated Outcome
Customize TracDat so that program review and the resource request process are seamlessly linked.	I.B.9	SPAC , Technology Services	Fall 2016- Fall 2017	A transparent method of documenting the links between program review, resource requests and college goals that would replace the current manual method.
Add two or three entry points to the resource request process; align resource request process with fiscal years of all funding sources; revise online resource request program.	I.B.9; III.D.2; QFE	BDRPC, Technology Services, SPAC	Fall 2016- Spring 2018	An expedited resource allocation process that maintains transparency. Better coordination between the resource request process, funding deadlines, grant parameters, and institutional needs.
Create a Student Services for Distance Education Plan in coordination with revision of the Online Education Strategic Plan.	II.C.1; QFE	OSS, OETF	Spring 2017- Spring 2018	Enhanced student services for a rapidly growing distance education population.
Enhance professional development for distance education.	II.C.1	OETF	Fall 2016- ongoing	Improved student performance and outcomes in distance education courses.
Offer additional training on FERPA policies, including online modules, for new employees.	II.C.8	Admissions & Records, District HR	Fall 2016- Fall 2017	Improved knowledge of FERPA and its implementation among new employees.
Develop a Data Handling Manual.	II.C.8	OSS	Spring 2017- Spring 2018	Ensures consistency and compliance among all college employees who handle student data and manage student information.
Align AURs and College-wide surveys to reflect ACCJC standards.	III.B.2	Facilities, ORPA	Spring 2017	Increase alignment between ACCJC evaluative standards and the College's routine self-evaluative mechanisms will create efficiencies and assist in meeting or exceeding ACCJC standards and policies.
Initiate joint OOI and Facilities planning mechanism in preparation for revising the EMP and the FMP.	III.B.3; III.B.4	Facilities, OOI	Spring 2017	Improve efficiency, integration, and coordination between the planning documents.

Change, Improvement and Innovation	Standard	College Leads	Timeline	Anticipated Outcome
Continue to narrow the achievement gap between online and traditional modes of instruction by exploring a variety of integrated tactics that span instruction and student services.	QFE	ORPA, OOI, OSS, OETF	Fall 2016-ongoing	Reduction or elimination of the achievement gap.
Update online course review and approval rubric for all courses taught online or in hybrid format.	QFE	OETF, Curriculum Committee, Academic Senate, APTC	Spring 2016-Spring 2017	Updated approval process that thoroughly addresses areas including quality and regular effective contact.
LMS Migration from Blackboard to Canvas: Continue phased in implementation	QFE	OOI, OETF, Technology Services	Fall 2016-Spring 2018	A phased-in college-wide migration from Blackboard to Canvas, completed by Spring 2018.
Work on solutions to challenges in the current administrative staffing levels.	IV.B.2	President	Spring 2017 and ongoing	Finding ways and means to increase administrative and support staffing to meet instructional needs.
College mission statement revised	I.A.I	IEC, SPAC	Fall 2015-Fall 2016	Fuller and more accurate description of the types of degrees and credentials offered; Heightened emphasis on values of access, success and equity; Highlighting college's involvement in guided pathways
Creation of an integrated planning matrix for college initiatives, such as SEP, SSSP, and BSI/BST	I.B.9	IEC	Spring 2016-Ongoing	Better integration and coordination of initiatives and grants. More collaboration. Less duplication of efforts. Increased opportunity to coordinate larger scale projects.
Creation of catalog planning work group	I.C.1	OOI	Fall 2016-ongoing	Enhance integration of the curriculum, scheduling and catalog production timelines for an earlier catalog publication date to better serve students.
Established a fall and spring catalog addendum	1.C.2	OOI	Fall 2016-ongoing	Improve the accuracy of catalog information provided to students. To create a vehicle to convey significant corrections, policy changes, or new program information to the community that comes in after the catalog production deadline.

Change, Improvement and Innovation	Standard	College Leads	Timeline	Anticipated Outcome
Create a Student Success Dashboard	II.A.1	District Technology	2015-2017 release	
Implement Degree Audit software	II.A.1	District Technology	2015-2017 release	A quick, efficient, electronic means of identifying student progress towards degrees and certificates that will lead to more precise and timely communication with students and a higher completion rate.
Inclusion of Student Learning Outcomes (SLOs) in the Course Outline of Record (COR)	II.A.3	OOI, SLO Task Force, Curriculum Committee	Fall 2015-Spring 2017	SLOs will be available in three venues: TracDat, syllabi, and the COR.
Review six area of emphasis degrees to identify core courses and interdisciplinary electives, where needed	II.A.13	Curriculum Committee	Fall 2015-Spring 2017	Area of emphasis degrees will be update and in compliance with current standards as outlined in the Program and Course Approval Handbook (PCAH)
Develop new faculty evaluation form	III.A.2	District, Faculty Association	Fall 2017	An evaluation form that is in alignment with new provisions of the faculty contract and accreditation requirements.
Review policies related to student complaints procedures. Improve where needed.		SSO	Fall 2016	Possible revision of BP/AR 5530 and possible adoption or clarification of local procedures, including the use of comment cards and an ombudsperson.
Revise BP-109 to enhance BOT training and organizational involvement	IV.C.10	District BP/AR Committee	Fall 2016-Spring 2017	Improved BOT training and enhanced involvement with outside organizations.
Identify and close gaps in understanding roles and authority between District Services and the Colleges	IV.D.1; IV.D.7	Chancellor, College Presidents	Spring 2016-ongoing	Improved understanding of responsibilities and authority of District Services and the Colleges. Update and enhancement of Districtwide Function Map.
Continue implementation of recommendations from the district barriers task forces	IV.D.2; IV.D.6	Chancellor, College Presidents	2011-Ongoing	Sustained improvement in coordination and communication, mutual understanding and acceptance of roles and authority between the District and the Colleges.

Introduction

About Irvine Valley College

Opened in 1979 as Saddleback College North Campus, Irvine Valley College (IVC) received its current name and independent status in July 1985. In July 1988, the college received its first accreditation as a separate institution by the Western Association of Schools and Colleges (WASC). In 2015, the college celebrated its 30th anniversary as an accredited California community college.

IVC currently ranks number two among California community colleges for its four-year institution transfer rate and number one in Orange County. The college offers a full complement of programs, from most traditional liberal arts and sciences to advanced technologies. It has established a reputation for excellence within the community and among the student population. The success of the college's many programs has been reflected in its continued enrollment growth. At present, over 14,000 students participate in the college's day, evening, weekend and online programs. All instructional programs at the college are housed within 10 academic schools. Full-time instructional deans work with the Vice President for Instruction and the President in overseeing the instructional activities of the college.

IVC is a public community college funded by a combination of state and local tax dollars. Through its foundation, the college also actively solicits private donations from individuals and corporations to support its capital outlay projects, program needs, and students through scholarships. The seven-member Board of Trustees of the South Orange County Community College District (SOCCCD) through the office of the Chancellor, governs IVC, Saddleback College in Mission Viejo, and the Advanced Technology & Education Park (ATEP) in Tustin. Board members are elected at large from representative areas of the district. IVC is under the direction and guidance of its president who, with the faculty and staff, administers the college and oversees the implementation of Board policies.

The driving force behind the success at the college is the campus wide dedication to uphold the mission of the institution.

Irvine Valley College offers clear and guided pathways to transfer, certificates, associate degrees, employment and further education to a diverse and dynamic local and global community. We support student access, success, and equity. IVC fosters economic and workforce development through strategic partnerships with business, government, and educational networks.

Figure 1: Irvine Valley College Historical Timeline

Community and Student Demographics and Data

Data on Irvine Valley College's student and faculty populations indicates significant changes since the period of the last Accreditation Self-Study in 2010.

Service Area Characteristics

Service Area Profile

Located in the northern half of the South Orange County Community College District, Irvine Valley College serves the residents of Irvine, Tustin, Laguna Beach, Newport Beach, Lake Forest, and surrounding communities. The College additionally serves international students as well as online students. According to the 2015 American Community Survey, the population of the IVC service area was 530,232 in 2015, which was an increase of 12% from its population of 473,088 in 2010. This increase is more than twice the rate for the state of California as a whole, which was 5% during this same time period.

Figure 2: Irvine Valley College Service Area Population 2010 versus 2015

Source: 2015 American Community Survey

Service Area Demographics

Tables 1 and 2 display key demographic information from communities in Irvine Valley College's service area. There is great ethnic and socioeconomic diversity within the IVC service area. Irvine residents are generally well-educated (66% of adults have earned at least bachelor's degree) and financially secure (\$110,000 median family income). Irvine has a substantial Asian community (39%); the cities of Lake Forest and Tustin contain sizeable Latino communities (24% and 41% respectively). Residents from these communities have relatively lower levels of educational attainment and median family incomes. However, these figures are still higher than the statewide figures, where on average 49% of adults in California earned at least a bachelor's degree and have a median family income of \$70,000. Residents from Laguna Beach and Newport Beach tend to be older, have higher median family incomes, achieved high levels of education, and are less likely to be ethnically diverse than other residents in the College's service area.

Table 1: Service Area Population by Ethnicity/Race

City	White	Asian	Hispanic	African-American	Mixed Ethnicity
Irvine	44.4%	38.7%	9.9%	1.9%	4.5%
Newport Beach	81.2%	7.4%	8.8%	0.4%	2.3%
Lake Forest	55.5%	4.9%	24.6%	1.8%	2.9%
Tustin	32.4%	0.2%	41.4%	2.4%	2.3%
Laguna Beach	85.3%	4.8%	6.9%	0.7%	2.6%

Top Occupations

Table 3 outlines the top ten occupations in Orange County that require some college, a postsecondary non-degree award, or an associate degree. Over the next five years, there is an expected 5% increase in the top ten occupations. Although expected to experience a 2% decline over the five-year period, booking, accounting, and auditing clerks is expected to remain as the top occupation by 2021. Of the top ten occupations in Orange County, nursing assistants is projected to have the greatest five-year change of 17%, placing it as the third top occupation.

Table 3. Top Ten Occupations in Orange County Requiring Some College, Postsecondary Non-Degree Award or Associate Degree by Number of Jobs

Occupation	2016 Jobs	2021 Jobs	2016 – 21 Change	2016 – 21 % Change

Enrollment Patterns

Headcount (unduplicated enrollment) has decreased by 5% from Fall 2011 to Fall 2015. At the same time, however, there has been an increase of 7% in full-time equivalent students (FTES) due to an increase in the proportion of full-time students and the average unit load per student.

Figure 3: Unduplicated Student Headcount and Full-Time Equivalent Students, Fall 2011-Fall 2015

Source: SOCCCD inFOCUS Data Warehouse

Full-Time/Part-Time Status

The unit status distribution of IVC students has changed substantially since Fall 2011. The percent of full-time students increased by 6 percentage points, from 37% to 43%. The percent of part-time students has remained steady over the years, whereas students enrolled in all non-credit courses has decreased from 9% to 4%.

Figure 4: Unduplicated Student Headcount by Unit Status, Fall 2011-Fall 2015

Source: SOCCCD inFORM Data Warehouse

Credit and Non-Credit Course Enrollment

As depicted in Figure 5, total enrollments have remained steady over the last six years, with an average of 40,858. The difference in course enrollments by credit and non-credit status also remains level, with most enrollments in credit sections (average 92%). Credit courses include degree-applicable and not degree-applicable courses.

Figure 5. Credit and Non-Credit Course Enrollment, Fall 2011 to Fall 2015

Source: SOCCCD inFORM Data Warehouse

Credit and Non-Credit FTES

Since Fall 2011, FTES overall has gradually increased over the years, reaching a six-year high of 4,669.34. FTES for both credit and non-credit sections have increased over the years, leaving the ratio of credit and non-credit FTES level throughout the last six years.

Figure 6. Credit and Non-Credit FTES, Fall 2010 to Fall 2015

Source: SOCCCD inFORM Data Warehouse

Career Technical Education (CTE) Enrollments and FTES

CTE enrollment decreased 12% from 5,723 in Fall 2011 to 5,023 in Fall 2015. The number of full-time equivalent students (FTES) decreased 14% over the five-year period.

Figure 7: Career Technical Education Enrollment Counts and FTES, Fall 2011-Fall 2015

Source: SOCCCD inFORM Data Warehouse

Basic Skills Enrollments and FTES

From Fall 2011 to Fall 2015, basic skills enrollments increased by 5% in math, 15% in English, and 30% in English as a Second Language (ESL). Overall basic skills enrollment increased by 15% from 3,029 in Fall 2011 to 3,493 in Fall 2015.

Figure 8: Math, English, and ESL Basic Skills Enrollment Counts Fall 2011 to Fall 2015

Source: SOCCCD inFORM Data Warehouse

Compared to Fall 2011, Math basic skills FTES decreased 4% from 165.90 to 158.81 in Fall 2015. During this same five-year time period, English basic skills FTES increased 68% while ESL FTES increased by 19%. Overall basic skills FTES increased 14% from 356.60 in Fall 2011 to 407.27 in Fall 2015. Basic skills FTES accounted for 9% of all FTES in Fall 2015.

Figure 9: Math, English, and ESL FTES, Fall 2009-Fall 2015

Source: SOCCCD inFORM Data Warehouse

Student Demographic Data

Age

The age distribution of IVC students has changed since Fall 2011, with an increased representation among students between 18 to 24 years old, who comprise nearly three-fourths of the student population. In contrast, the population of students ages 30 and older has decreased by eight percentage points from Fall 2011 (29%) to Fall 2015 (21%). The oldest age group (over 59) experienced the greatest change over the five-year period, decreasing by 57%.

Table 1: Student Age Distribution, Fall 2009-Fall 2015

	Fall 2011 (N=14,566)	Fall 2012 (N=14,161)	Fall 2013 (N=14,152)	Fall 2014 (N=13,472)	Fall 2015 (N=13,828)
Below 18	5.9%	6.6%	5.8%	5.5%	6.1%

Source: SOCCCD inFORM Data Warehouse

Gender

In Fall 2015, 51% of IVC students identified as female, 47% identified as male, and 3% declined to state their gender. Between Fall 2009 and Fall 2015, the percentage of students identifying as female decline by 7%, while the percentage of students identifying as male increased by 6%. During this time, the College has seen an increase in students declining to state their gender, from 1% in Fall 2011 to 3% in Fall 2015.

Figure 10: Student Gender Distribution between Fall 2011 and Fall 2015

Source: SOCCCD inFOCUS Data Warehouse

Ethnicity

Irvine Valley College serves an ethnically diverse student population, as outlined in Table 6. In Fall 2015, 37% of students identified as Non-Hispanic White, 28% identified as Asian, 17% as Mixed Ethnicity, 13% as Hispanic/Latino, and 2% as African-American. Pacific Islanders, Native American/Alaskan Native, Middle Eastern, and other Non-White Students combined accounted for under one percent of the IVC student body. In addition, 2% of students declined to state their ethnicity.

Between Fall 2011 and Fall 2015, there have been large shifts in the ethnic composition of IVC. The percentage of White students has declined from by four percentage points, while Mixed Ethnicity and Hispanic/Latino experienced an increase of seven percentage points. Less students decline to state their ethnicity at only 2% compared to 6% in Fall 2011. This suggests that IVC is more accurately assessing the complete ethnicities of an increasing proportion of students.

Given that mixed ethnicity students are now a substantial proportion of the IVC student body, additional analyses revealed that 39% of mixed ethnicity students were white and Hispanic, 20% were white and Asian, 10% were Hispanic from multiple countries, and 7% were Asian from multiple countries. Other ethnicity combinations were less than 4% of the total mixed ethnicity student population.

Table 6: Student Ethnicity Distribution between Fall 2011 and Fall 2015

	Fall 2011 (N=14,133)	Fall 2012 (N=14,161)	Fall 2013 (N=14,152)	Fall 2014 (N=13,472)	Fall 2015 (N=13,828)
White	44.8%	40.1%	38.2%	36.5%	36.9%
Asian	26.8%	26.8%	27.7%	27.9%	28.1%
Mixed Ethnicity	12.7%	14.7%	15.5%	16.7%	16.8%
Hispanic / Latino	10.0%	11.3%	12.3%	13.2%	13.4%

Socioeconomic Status

Figure 11 below depicts the distribution of IVC students by their socioeconomic status. Economically disadvantaged includes students who received a Board of Governor's (BOG) fee waiver or are participants of the CalWORKs or EOPS program. The significant increase

in economically disadvantaged students is largely attributed to the increase in students receiving the BOG fee waiver. Over the five-year period, BOG fee recipients increased by 367%. This increase is a result of the College's increased efforts to inform and encourage students to take advantage of financial aid opportunities.

Figure 11. Low-Income Status Distribution

Source: SOCCCD inFORM Data Warehouse

Enrollment Status

In Fall 2015, the majority of students were enrolled during the previous term and were continuing their education at the College (64%), which is similar to the trend seen in Fall 2011. Over the five-year period, however, there was a decrease in returning students (Fall 2011 at 20%, Fall 2015 at 16%) and a proportionate increase in first-time college students (Fall 2011 at 14%, Fall 2015 at 18%). Concurrently enrolled high school students continue to remain the smallest group at approximately 3% throughout the five-year period.

Figure 12: Unduplicated Student Headcount by Enrollment Status, Fall 2009-Fall 2015

Source: SOCCCD inFORM Data Warehouse

Educational Goals

Between Fall 2011 and Fall 2015, there were significant changes in the educational goals of students. Students seeking to transfer or obtain a degree or certificate increased by 15 percentage points, while those attending IVC for personal development, to advance their career, or are undecided decreased by 15 points. This trend aligns with the increased representation among younger students under the age of 24.

Figure 13: Student Educational Goal Distribution Fall 2009 versus Fall 2015

Source: SOCCCD inFORM Data Warehouse

Table 7: Student Educational Goal Distribution, Fall 2009-Fall 2015

Educational Goal	Fall 2011 (N=14,566)	Fall 2012 (N=14,161)	Fall 2013 (N=14,152)	Fall 2014 (N=13,472)	Fall 2015 (N=13,828)
Transfer	57.9%	62.6%	66.9%	71.2%	72.3%
Personal Development	12.1%	9.0%	8.0%	4.8%	5.7%
Career	9.5%	8.5%	9.0%	8.5%	6.8%
Undecided	9.2%	8.3%	7.6%	6.3%	5.8%
Degree / Certificate	4.3%	4.7%	4.9%	6.2%	6.5%
GED/Basic Skills	4.0%	4.1%	3.6%	3.1%	2.9%
Vocational Certificate	2.9%	2.8%	n/a	n/a	n/a

Employee Characteristics

Permanent Employee Headcount

Between Fall 2011 and Fall 2015, IVC has increased its number of permanent employees 9% from 322 to 350, with all three employee groups increasing in headcount. The number of classified staff increased 2%, full-time faculty increased 21%, and administrators and managers increased 7%.

Figure 14: Permanent Employee Headcount, Fall 2011-Fall 2015

Full-time Faculty – Ethnicity

In Fall 2015, the majority of full-time faculty at IVC was non-Hispanic white (63%). The next most represented ethnicities were Hispanic (13%) and Asian/Pacific Islander (13%), followed by multi-ethnicity (9%). African-American and American Indian/Alaskan Native comprise approximately 2% of all full-time faculty.

Figure 15: Ethnicity of Full-Time Faculty, Fall 2015 (N=135)

Source: SOCCCD Inform Data Warehouse

Classified Staff – Ethnicity

Figure 16 depicts the ethnic composition of classified staff at Irvine Valley College. In Fall 2015, half of IVC classified staff were non-Hispanic white. Similar to full-time faculty, the followed most represented ethnicities were Hispanic (26%) and Asian/Pacific Islander (15%). Three percent each identified as African-American, American Indian/Alaskan Native, or declined to state.

Figure 16: Ethnicity of Full-Time Classified Staff, Fall 2015 (N=184)

Source: SOCCCD inFORM Data Warehouse

Administrator and Manager – Ethnicity

Similar to full-time faculty and classified staff, the majority of administrators and managers at Irvine Valley College are non-Hispanic White (52%). Different from the other two employee groups, however, multi-ethnicity is the second largest ethnicity represented where one out of five administrators and managers identified as being more than one ethnicity. Hispanic (16%) and Asian/Pacific Islander (10%) were the third and fourth most represented groups. African American was least represented at 3%.

Figure 17: Ethnicity of Administrators and Managers, Fall 2015 (N=31)

Off-campus Sites and Distance Education

Off-campus Sites

Advanced Technology and Education Park (ATEP)

Off-Campus Sites: The Advanced Technology and Education Park (ATEP) in Tustin is an off-campus site of the South Orange County Community College District, offering courses through Irvine Valley College in subjects such as optics, photonics, design model making and rapid prototyping, languages, information security, entrepreneurship and business. These offerings are in addition to math, sciences, and general education and transfer courses.

The College began offering classes at ATEP in Fall 2007. At the present time, the ATEP campus receives academic planning and oversight as well as guidance and counseling through a coordination of efforts between the ATEP on-site Dean of Instruction for Economic & Workforce Development, the ATEP Work Group and the IVC Office of Instruction.

Early College Program

In 2007, the College began a pilot early college program at Beckman High School within the Irvine Valley College service area. In 2009, the Early College Program expanded to include El Toro High School in Lake Forest. The purpose of the Early College Program is provide high school students the opportunity to complete the first two years of college during their four years of high school study. High school students are enrolled in a systematically planned academic program taught by IVC instructors, which allows a cohort of high school students to earn an associate degree that coincides with the timing of their high school graduation.

Distance Education

Online Instruction

Irvine Valley College offers five Certificates of Achievement (COAs) and 35 Certificates of Proficiency (COPs) that can be earned entirely online. Coursework for other associate degrees and general education certifications, such as CSU/IGETC requirements, can be completed substantially through online courses offered by the College.

Table 8 outlines the number of sections offered at IVC over the last five years, disaggregated by instruction method type. In Fall 2015, online course offerings accounted for 12% of all sections offered at IVC, yielding a 45% increase in online sections offered compared to Fall 2011.

Table 8. Count of Sections Offered by Instruction Method

	Fall 2011	Fall 2012	Fall 2013	Fall 2014	Fall 2015
Classroom	1,097	1,179	1,213	1,253	1,271
Online	120	122	121	144	154
Other	15	12	12	13	19
Total	1,232	1,313	1,346	1,410	1,464

Source: SOCCCD inFORM Data Warehouse

Note: Classroom includes lecture, lab, lecture/lab combination, learning lab. Internet includes distance education offered 100% via internet and hybrid sections. Other includes directed study, discussion/seminar, field trip, other independent study, and work experience.

Between Fall 2011 and Fall 2015, online enrollments increased by 26%, from 4,722 to 5,948. In Fall 2015, online enrollments accounted for 14% of total course enrollments, with is a two percentage point increase compared to Fall 2011.

Table 9. Enrollment Counts by Instruction Method

	Fall 2011	Fall 2012	Fall 2013	Fall 2014	Fall 2015
Classroom	35,639	35,634	36,978	35,710	35,533
Online	4,722	4,855	4,536	4,969	5,948

Total	36,534	40,588	41,606	40,761	41,572

Student Achievement Data

Course Completion Rates

Overall course completion rates have dropped slightly over the last three years (see Table 10). Course completion rates for African Americans have increased 4 percentage points. Course completion rates for Latinos have dropped 4 percentage points. Course completion rates for other ethnic groups have remained relatively stable. Over the last three years, course completion rates for African Americans, American Indian/Alaskan Native, Latinos, and Pacific Islanders have been substantially lower than the overall course completion rate at IVC. Course completion rates for males have been 3-4 percentage points lower than for females over the last three years. Course completion rates for current or former foster youth have been much lower than the overall course completion rate over the last three years. Course completion rates for Veterans have also been somewhat lower than the overall course completion rate. Lastly, course completion rates for online courses have been about 10 percentage points lower than for in person courses over the last three years.

Table 10. Course Completion by Student Subgroups

	Fall 2013		Fall 2014		Fall 2015	
	Cohort count	Success rate	Cohort count	Success rate	Cohort count	Success rate

*Students who received services from CalWORKs, CARE or EOPS are considered as low-income.

**Veterans do not include currently active duty students.

Overall, Basic Skills and CTE Course Success Rates

The overall course success rate (the percentage of students earning a “C” or better, excluding withdrawals) at Irvine Valley College declined slightly from 77% in Fall 2011 to 74% in Fall 2015. The course success rate for students in basic skills courses declined by five percentage points and in CTE courses by three percentage points.

Figure 19: Overall, Basic Skills, and CTE Course Success Rates, Fall 2011-Fall 2015 (N=)

Source: SOCCCD inFORM Data Warehouse

Course Success Rates by Enrollment Status

The course success rate for continuing students declined from 84% to 71% between Fall 2009 and Fall 2015. The rate for returning students declined from 70% to 66% between Fall 2009 and Fall 2015. The rate for first time college students declined from 72% to 70% between Fall 2009 and Fall 2015. The rate for concurrent high school students remained steady at 84% between Fall 2009 and Fall 2015.

Figure 20: Success Rates by Enrollment Status, Fall 2011 to Fall 2015 (N=)

Source: SOCCCD inFORM Data Warehouse

Scorecard Completion Rate – Prepared versus unprepared

While students who begin their English and math coursework at transfer-level achieve an 80% completion rate at IVC, students who are assigned to one or more remedial classes have completion rates that are nearly 30 percentage points lower. The realization that students who begin in transfer-level coursework are more likely to transfer or to complete a degree or certificate than are students who are assigned to basic skills coursework has become a driving force in our strategic planning. The strategic objective of increasing completion and reducing the achievement gap has informed efforts at redesigning remedial sequences via models provided by the California Acceleration Project, guided pathways, and the Basic Skills Outcomes Transformation grant.

Figure 21. Scorecard Completion Rates by Prepared/Unprepared Status

Source: California Community Colleges Chancellor's Office, Student Success Scorecard

Persistence Rate

Outlined in Table 11 are percentages of first-time students who attempted any level of Math or English in the first three terms of their college career at IVC and persisted by enrolling in the first three consecutive terms anywhere in the California Community College system. Persistence rates for all ethnicity groups increased over the five-year period, yielding an overall rate of 75% in 2009-10.

Table 11. Persistence by ethnicity

	2005-06 (N=1,091)	2006-07 (N=1,192)	2007-08 (N=1,417)	2008-09 (N=1,632)	2009-10 (N=1,798)
African American	51.9%	61.5%	90.9%	76.0%	69.7%
American Indian/Alaska Native	66.7%	75.0%	50.0%	76.9%	--
Asian	63.6%	60.5%	66.9%	71.1%	76.3%

Overall	69.6%	67.9%	71.5%	71.6%	74.9%

Source: California Community Colleges Chancellor's Office, Student Success Scorecard

Note: Percentages with cohorts with fewer than ten students are suppressed.

Overall Units Attempted and Units Earned

IVC students attempted an average of 8.86 units in Fall 2015, a 21% increase from an average of 7.33 units in Fall 2011. Similarly, the average number of units earned increased by 22% from 6.37 units in Fall 2011 to 8.24 units in Fall 2015.

Figure 21: Overall Units Attempted and Units Earned Fall 2011-Fall 2015

Source: SOCCCD Inform Data Warehouse

College Preparedness

Figure 22 outlines the percentage of students who place into basic skills English, math, and English as a Second Language (ESL). Data provided are for new students who are first-time freshmen or new to South Orange County Community College District. Over the five-year period, placements into basic skills have decreased in math and English by 11 percentage points each. ESL basic skills placements, however, have increased by six percentage points, from 9% in Fall 2011 to 15% in Fall 2015.

Figure 22. Basic Skills Placements among New Students

Source: SOCCCD inFORM Data Warehouse

The following three figures outline placements into English (Figure 23), math (Figure 24), and ESL (Figure 25) by ethnicity, for incoming new students. All ethnicity groups experienced a decline in basic skills placements between Fall 2013 and Fall 2015. Students who identified as African American were placing into remedial English at the highest rate (82%) in Fall 2011. In Fall 2015, however, Hispanic students had the highest percentage at 65%. For Math, African American students continued to have the highest basic skills placement (86% in Fall 2011, 75% in fall 2015). For ESL, however, Asian and Pacific Islander students consistently had the high placement into remedial courses. During the three-year period, ESL basic skills placements increased for this ethnicity subgroup by three percentage points and for white students by four percentage points. This increase in ESL basic skills placements may be attributed to the increased percentage of students taking ESL courses for conversational, life-long learning purposes without the intention of progressing into mainstream English.

Figure 23. English Basic Skills Placements among New Students by Ethnicity

Progression to the Next Level

In Figure 26 and Table 12, the percentage of students who were placed into basic skills English and successfully completed transfer-level English is displayed. Data is disaggregated by ethnicity. At three levels below, there are no substantial differences in throughput rate among the ethnicity groups. At two levels below, the throughput rate for African Americans and Latinos was substantially lower than the average throughput rate for all students. For students who placed in one level below, completion of transfer-level English is substantially higher with a difference of over 50 percentage points for white students when comparing to outcomes for three levels below.

Figure 26. Transfer-Level English Completion by Level of English Basic Skills Placement

Source: Data from California Community Colleges Chancellor's Office, Management Information Systems Data Mart, Basic Skills Progress Tracker

Note: Ethnicities with small sample sizes (< 10) are not included in analysis.

Table 12. Transfer-Level English Completion by Level of English Basic Skills Placement

	Three levels below		Two levels below		One level below

In Figure 27 and Table 13, the percentage of students who were placed into basic skills math and successfully completed transfer-level math is displayed. At three levels below, the overall throughput rate was very low at 8%. Asian students (24%) had substantially higher throughput rates than other ethnicity groups. At two levels below, the overall throughput rate was higher at 14%, with Asian students (21%) again displaying higher throughput rates than other ethnicity groups. Latino students (10%) had somewhat lower throughput rates than other ethnicity groups. At one level below, similar trends are seen among the various ethnicity groups, but overall completion increases substantially to 39%.

Figure 27. Transfer-Level Math Completion by Placement Level and Ethnicity

In Figure 28 and Table 14, the percentage of students who were placed into basic skills ESL and successfully completed transfer-level English is displayed. Similar data trends are depicted, with completion rates increasing with each increased level of placement. Compared to an overall 9% completion rate when placed three or more levels below, students complete transfer-level English at a rate of 62% when placed only one level below.

Figure 28. Transfer-Level English Completion by Level of ESL Basic Skills Placement

Note: Ethnicities with small sample sizes (less than 10 per level) were not included in Figure.

Degrees and Certificates Awarded

In the 2015-16 academic year, Irvine Valley College awarded 1,185 Associate degrees, a 78% increase over the 665 degrees awarded in 2011-12. The number of certificates awarded during the five-year period additionally increased by 90% from 2,025 in 2011-12 to 2,683 in 2015-16.

Figure 29: Degrees and Certificates Awarded, 2011-2012 to 2015-2016

Source: SCCC inFORM Data Warehouse

When looking at degrees and certificates awarded by type, Certificate of Achievements were awarded most to students in 2015-16, an increase by 49% compared to 2011-12. Associate Degrees for Transfer also experienced substantial increases in degrees awarded during the five-year period, but this is due to the novelty of these specific awards. When examining all other programs, Associate in Science degrees experienced the greatest increase of 128%, from 50 degrees awarded in 2011-12 to 114 in 2015-16.

Table 15. Count of Degrees and Certificates Awarded by Type

	2011-12	2012-13	2013-14	2014-15	2015-16
Associate in Arts	611	731	675	623	709
Associate in Arts - Transfer	4	34	68	101	156
Associate in Science	50	68	62	65	114
Associate in Science - Transfer		4	67	18	209
Certificate of Achievement	817	1,080	1,031	1,206	1,214
Certificate of Proficiency	197	213	196	296	298
Full Transfer Certification	705	686	900	1,111	1,065
Partial Transfer Certification	73	46	5	70	107
Total	2,457	2,862	3,049	3,712	3,872

Transfers to UC and CSU

A total of 589 students transferred from IVC to the University of California system (UC) during the 2015-16 academic year, an increase of 48% over the 421 who transferred to the UC system during the 2011-12 academic year. Transfers to the California State University (CSU) system increased by 30% over the five-year period to 697 students. Overall, the number of students transferring to an in-state public four-year institution has increased with each passing year. Compared to 2011-12, the total number of transfers to either the UC or CSU systems have increased by 34%.

Figure 30: Number of Transfers to UC and CSU, 2011-12 to 2015-16

Source: SOCCCD inFORM Data Warehouse

Transfers to Other Institutions

Figure 31 outlines the number of students who transferred to a four-year institution other than a UC or CSU institution. Beyond UC and CSU transfers, in-state, private transfers are most common among IVC students. Compared to five years ago, the number of in-state, private transfers has decreased by 45% to 453 transfers in academic year 2015-16. Out-of-state transfers to both public and private institutions, however, have increased by 31% and 30%, respectively. Overall, transfers to in-state, private and out-of-state institutions have increased by 15% to 1,221 in 2015-16.

Institution-set Standards

To support the College's mission through continuous assessment of student learning and student outcomes, Irvine Valley College has established Institution Set Standards (ISS) for course completion, degree and certificate completion, and transfer to four-year institutions. The College has established a methodology to propose standards at one standard deviation below the average. Proposed standards are reviewed and set after extensive discussion based on their feasibility and rigor, given the College's current efforts to support and increase student learning and achievement. Consequently, set standards are not exact calculations following the established methodology.

Course Completion

Course completion rates between 2005-2006 and 2014-2015 experienced small annual differences, with rates ranging from 73% to 77%. Rates peaked in the middle of this 10-year period at 77% in 2009-10 and 2010-11. This coincides with an increase in IVC enrollments resulting from the economic downturn. With a 10-year average of 75%, the College set its course completion rate standard at 72%.

Degree/Certificate Completion

Degrees and certificates are analyzed based on unduplicated counts, and standards are established based on three-year averages. Because students can earn more than one degree and/or certificate, students are counted only once (unduplicated) for each metric measured. The number of students over the last 10 years have increased substantially by 96% and continue to increase based on the last three years of data. Certificates have remained steadier in comparison, with a three-year average of 109.

Transfer

Using data provided by National Student Clearinghouse, students are tracked following their attendance from IVC. The year of the first semester of attendance at the four-year institution is used to report the transfer year. With a statewide ranking of #2 in transfer rate, IVC focuses its efforts heavily on transferring students to four-year universities. The number of students transferring to in-state public, in-state private, and out-of-state institutions increase each year, reaching an all-time high of 2,434 the most recent year. IVC continues to develop

partnerships with local universities, such as the Accounting program “GAP 4+1” with Cal State University, Fullerton. These ongoing efforts will support a continued increase in transfers from IVC to four-year institutions.

Table 16. Irvine Valley College Institution Set Standards

Data Element	2005-06	2006-07	2007-08	2008-09	2009-10	2010-11	2011-12	2012-13	2013-14	2014-15	Average*	IVC Standard**
Course Completion Rate	73%	74%	76%	77%	77%	77%	76%	76%	76%	75%	75%	72%
Degrees Awarded	412	340	365	329	304	363	653	809	764	808	794	770
Certificates*** Awarded	101	73	70	106	111	121	115	101	98	127	109	100
Degrees / Certificates Awarded - <i>Unduplicated</i>	503	407	426	525	709	725	725	895	851	913	886	850
Transfers	1,408	1,414	1,403	1,598	1,841	1,933	1,922	2,271	2,271	2,434	2,182	2,000

*Calculations for averages vary by data element. Averages for course, degree/certificate, and transfer data are calculated based on the last 10, 3, and 5 years, respectively.

**IVC standards are proposed at one standard deviation below the average, which are reviewed for feasibility and rigor given current college-wide efforts. Set standards, consequently, are not exact per the established methodology to set standards.

***Only Chancellor's Office approved Certificates of Achievement are included in counts and the College's ISS.

Job Placement

Irvine Valley College has used the results of the Career Technical Education Outcomes Survey (CTEOS) to provide data on employment for its certificates and programs. The survey allows the college to assess whether the respondents are employed in the field for which they prepared at college. This information has become an important part of regular Program Review process, as well as the biennial CTE review. While the college also uses EMSI Data Analyst to prepare labor market reports for CTE programs, results from the CTEOS are valuable in that they are directly related to the experiences of the college's program graduates. Moreover, CTEOS data complements the larger scale information by allowing the college to focus on the work histories and post-graduation experiences of CTE alumni.

Table 17. Job Placement Rates for Students Completing Certificate Programs and CTE Degrees

Program	Award Type	CIP Code	Est. Standard	Job Placement Rate	
				2012-13	2013-14
Accounting	AS	52.03	70%	70%	75%
Accounting	COP	52.03	70%	77%	79%
Computerized Accounting	COP	52.03	70%	91%	89%
Child Development	AS	19.07	70%	100%	91%
Financial Accounting	COP	52.03	70%	83%	86%
Payroll	COP	52.03	70%	75%	75%

Organization of Self Evaluation Process

Background

The self-evaluation process at Irvine Valley College (IVC) is overseen by the Strategic Planning and Accreditation Council (SPAC), created in 2013 as the highest level participatory governance group at the campus. SPAC works in concord with two on-going workgroups: The Strategic Plan Oversight Work Group (SPOWG) and the Accreditation Oversight Work Group (AOWG). These work groups are responsible for integration and reconciliation of the planning recommendations forwarded from the strategic planning committees.

Preparation for the self-evaluation process began in Fall 2014. AOWG proposed a draft work group membership, comprised of leadership broadly representing the campus. The Academic Senate approved and SPAC adopted the proposal. Work group membership has been modified to reflect changes in personnel assignments and interests while remaining broadly representative of the campus community. A member of the faculty was appointed as the accreditation self-evaluation writer, to assist the workgroups with editing, proofreading, consistency, and, if needed, writing the draft.

Since 2014, the college has had college representatives attending accreditation institutes and workshops to facilitate a deeper understanding of the purpose peer review and self-evaluation in the accreditation process. Several members of the college community have served on accreditation evaluation teams bringing back to the campus useful insights and advice during the process.

In August 2015, AOWG presented an accreditation timeline ([N.1.1](#)) and held an Accreditation Think Tank during fall professional development week. During the Accreditation Think Tank, members of the campus community were introduced to the four accreditation standards and asked to provide input, including stories and examples of evidence, on institutional compliance with the standards. That material became the starting point for the work of the Accreditation Mini Retreats, held in September 2015 ([N.1.2](#)). During the Accreditation Mini Retreats, members of the standards work groups came together for the first time to delve deeply and systematically into each standard and sub-section over a three-hour period. The Accreditation Mini Retreats served as kick-offs for a series of meetings by each standard subsection workgroup that took place during fall 2015 and spring 2016.

To assist the workgroups, the college's Research and Accreditation Office provided a template that aligns the guiding questions from the *Guide to Evaluation and Improving*

Institutions, July 2015 with a draft narrative and evidence ([N.1.3](#)). These templates became the basis for the standards drafts.

The timeline presented during fall 2015 flex week called for the workgroups to produce outline templates and a first draft of the narrative during fall 2015. Spring 2016 would see the workgroups finalize narratives. Summer 2016 was to be devoted to checking evidence and editing the self-evaluation. A college-wide review and work archiving the evidence would be completed during Fall 2016 ([N.1.4](#)).

The Board of Trustees has supported and assisted the accreditation process. In fall 2015, members of the board attended accreditation update sessions during professional development week and the mini retreats. The accreditation liaison officers of Irvine Valley College and Saddleback College made joint accreditation updates to the Board of Trustees in October 2015 and October 2016. A near final draft of the self-evaluation report was presented to the Board of Trustees for acceptance in November 2016.

The campus community and public engaged in reviews of the self-evaluation draft during October and November 2016. A two-week campus-wide review and comment period on the self-evaluation report commenced on October 5, 2016, followed by five afternoon editing sessions attended by faculty, staff and administrators. An additional review and comment period of the revised draft commenced on October 24, 2016. This review period included a Third Party Comment Forum and external accreditation webpage launch on October 25, 2016.

The organization of the self-evaluation was designed to be as inclusive as possible and to empower members of the faculty to participate and take ownership of the analysis, writing and evidence gathering that are requisite parts of a self-study. All standards workgroups had faculty co-chairs appointed by the Academic Senate, most serving continuously from fall 2015 to fall 2016.

District Function Map

Link to updated Function Map Pending

Certification of Continued Compliance with Eligibility Requirements

1. Authority

Irvine Valley College (IVC) is a public two-year community college operating as a post-secondary educational institution to award degrees and certificates under the authority of the State of California ([N.1.5](#)), Department of Education, the Board of Governors of the California Community Colleges. The College is one of 12 institutions within the California Community College system. IVC is governed locally by a selected Board of Trustees for the South Orange County Community College District. The College was accredited in 1988 by the Accrediting Commission for Community and Junior Colleges (ACCJC) of the Western Association of School and Colleges (WASC), and has continuously maintained accredited status ([N.1.6](#)).

2. Operational Status

In Fall 2015, Irvine Valley College served 13,828 students ([N.1.7](#)), with 91% of course enrollments in credit courses ([N.1.8](#)). Over three-fourths of students declared an educational goal to transfer to obtain an associate degree or certificate ([N.1.9](#)). In Academic Year 2015-16, IVC awarded a total of 1,185 Associate degrees and 2,683 certificates ([N.1.10](#)).

3. Degrees

In Academic Year 2015-2016, Irvine Valley College (IVC) offered 80 Associate of Arts and Associate of Science Degrees, of which include 23 state-approved Associate Degrees for Transfer to the Cal State University (CSU) System ([N.1.11](#)). To obtain an Associate in Arts or Associate of Science Degree, students must complete a minimum of 60 units of credit, pass all applicable program courses with a grade "C" or better, maintain a grade point average of 2.0 or higher, and complete general education requirements ([N.1.12](#)). Associate

Degrees for Transfer have the same requirements, with the exception that students must complete 60 CSU-transferable units.

IVC also offers 63 Certificates of Achievement (state-approved program) and Certificates of Proficiency (locally approved program). To earn a certificate, students must complete all required coursework with a grade “C” or better and complete a minimum of 12 units at IVC. For certificates with a total unit requirement being less than 12, students are required to complete all units at IVC. Degree and certificate requirements are detailed in the College Catalog ([N.1.13](#), [N.1.14](#)).

To ensure education offerings promote students’ opportunity to obtain a degree or certificate, 1,290 credit sections were offered and 91% of IVC students enrolled in at least one of the offered credit sections in Fall 2015 ([N.1.15](#)).

4. Chief Executive Officer

The South Orange County Community College District (SOCCCD) appointed Dr. Glenn R. Roquemore ([N.1.16](#)) as President of Irvine Valley College. Dr. Roquemore took office in July 2002. Pursuant to Board Policy 2101 ([N.1.17](#)), the Chancellor delegates authority to the College President to oversee college operations and administer board policies. The President does not serve as the chair of the governing board ([N.1.18](#)).

Dr. Roquemore served as President during the last comprehensive accreditation site visit in 2010. Irvine Valley College has not been required to inform the Commission of any changes in the institutional chief executive officer.

5. Financial Accountability

An audit is conducted on an annual basis by an independent certified accounting firm in accordance with California Education Code Section 8848, in accordance with generally accepted auditing principles and is designed to obtain reasonable assurance that the financial statements are free of material misstatement. This process includes examination and testing of supporting documentation as well as an examination of internal controls which provide feedback on processes that require improvement or adjustments. The audit assesses the accounting principles used and management’s estimates to provide reasonable assurance that material misstatements which could affect the financial statements as a whole are detected. It considers the District’s internal controls over financial reporting in order to plan the audit but

does not give an opinion on those controls. The District's effective financial management is reflected in the limited number of audit findings. Budget and audit documents are posted to the District Business Services website ([N.1.19](#)).

The District audit reports and findings are reported to the Board of Trustees in November of each year ([N.1.20](#)). The report is shared by the audit firm representatives who highlight material weaknesses, if any. The District has audit committees for the District and foundation audits and several board members serve on those committees. The auditors share more detailed information during these meetings.

The College's financial aid program is evaluated on an annual basis as part of the College's independent audit process which includes an assessment of the College's compliance with federal Title IV regulations and requirements. The College submits the results of its annual Federal Single Audit to the USDE each year. During the accreditation cycle, the College has had no findings in the audit of the financial aid program ([N.1.21](#)).

The College has maintained loan default rates at an acceptable level while complying with the responsibilities defined by the U.S. Department of Education. The College's three-year default rate on student loans in Fiscal Year 2013 was 12.7%, which is below the requirement established by California (<15.5%) as well as the federal requirement (<30%) ([N.1.22](#)). The College has not had any actions taken against it due to non-compliance with Title IV regulations.

For the three most recent years for which data are available ([N.1.23](#)), the student loan default rates among IVC alumni were: 2011: 4.7%; 2012: 8.9%; 2013: 12.7%.

The District and College have robust and transparent budgeting and financial oversight processes ([N.1.24](#), [N.1.25](#), [N.1.26](#)).

Compliance with Commission Policies

This section responds to the Commission Policies as defined in Appendix A of the Manual for Institutional Self Evaluation. The narrative supplies the information required by the Checklist for Evaluating Compliance with Federal Regulations and Related Commission Policies (Appendix K of the *Manual for Institutional Self Evaluation, October 2015, Revised Edition*). References to other sections of the Self Evaluation Report are included, as appropriate.

Policy on Rights and Responsibilities of the Commission and Member Institutions

Irvine Valley College complies with the ACCJC's *Policy on Rights and Responsibilities of the Commission and Member Institutions*. Accreditation activities are coordinated by the Accreditation Oversight Work Group under the direction of the President, the Accreditation Liaison Officer (ALO), and the Strategic Planning and Accreditation Council (SPAC) (N.1.27). The President and the ALO are the primary contacts for communication with the ACCJC.

The College has been accredited since July, 1987 and voluntarily complies with the ACCJC standards in order to ensure student learning, institutional effectiveness and continuous quality improvement. The College maintains an archive of current and accreditation reports, letters, and documents on its accreditation website (<http://accreditation.ivc.edu> N.1.28). The College has a documented history of timely compliance with Commission requests and recommendations (N.1.29). The College's self-evaluation process was broadly representative and involved a wide array of staff, faculty, students, and administrators (N.1.30).

Irvine Valley College also complies with Title 34 of the Code of Federal Regulations, 34 CFR 602.23(b), which states:

In providing public notice that an institution or program subject to its jurisdiction is being considered for accreditation or preaccreditation, the agency must provide an opportunity for third-party comment concerning the institution's or program's qualifications for accreditation or preaccreditation. At the agency's discretion, third-party comment may be received either in writing or at a public hearing, or both (N.1.31).

As part of the current self-evaluation process, the President and the ALO convened a public forum for the purpose of soliciting and receiving public comment (N.1.32). Additionally, the

College opened a public website with a web form for the general public to be able to submit comments on the College's accreditation process ([N.1.33](#)).

Policy on Institutional Degrees and Credits

Irvine Valley College complies with the minimum 60 semester credit unit requirement set forth in Title 5, Section 55063 of the California Code of Regulations, ([N.1.34](#)). This requirement is stated in the College catalog ([N.1.35](#)). Associate degrees consist of units required for the major or area of emphasis combined with required general education units and degree applicable elective units.

The College follows the Chancellor's Office "Standard Formula for Credit Hour Calculations." The College uses a compressed semester calendar, with a semester of approximately 17 weeks in length. In this formula, every 18 hours of lecture per semester corresponds to one unit of course credit. For classes with laboratory or arranged hours, 54 hours of class time per semester corresponds to one unit of course credit, which equates to just over three hours per week.

To comply with the regulations set by the U.S. Department of Education and the ACCJC in regard to setting institutional standards for student achievement (cf. 34 CFR 602.16(a)(1)(i); 602.17(f); 602.19(a-e)), IVC has established institution-set standards for the following indicators of student achievement and attainment: course completion rates, annual counts of students who transfer to a four-year institution, annual counts certificates awarded, and annual counts of degrees awarded. Additionally, the college reviews data on employment in the field for all gainful employment programs with at least ten graduates ([N.1.36](#)).

The College's Institutional Effectiveness Committee sets the institutional set standards and reviews them annually along with information on strategic key performance indicators and goals. The institutional set standards and other strategic information create the context for the other work that IVC does including its review of academic program reviews, equity planning, strategic planning, and basic skills initiative planning ([N.1.37](#)).

Policy on Transfer Credit

Transfer Credit

Irvine Valley College grants credit for college units earned at regionally accredited institutions of higher education. No more than four units may be awarded for sectarian courses. Students must arrange to have all transcripts to be evaluated for transfer credit sent to the Office of Admissions and Records as early as possible to determine if coursework can be used to satisfy prerequisites or equivalencies. Applications for degree or transfer certifications cannot be processed without all official transcripts on file from all colleges from which coursework is intended for transfer credit. Questions regarding specific courses for which a student is seeking transfer credit should be addressed to the Counseling Center or Transfer Center at Irvine Valley College ([N.1.38](#)).

Transfer from Foreign Institutions

Students seeking evaluation of foreign coursework must provide a transcript evaluated by an accredited evaluation and translation service. Students must turn in the official evaluation to the Office of Admissions and Records for inclusion in their record and then set up an appointment with the Counseling Center so that their transfer work may be evaluated. Coursework from foreign institutions cannot be used for CSU or IGETC certification except to validate the foreign language requirement. Students may be granted credit toward CSU-Breadth and IGETC by earning specified scores on International Baccalaureate (IB) Higher Level exams ([N.1.39](#)).

Credit by Examination

Irvine Valley College may grant credit by examination to a student for previous experience, training, or instruction equivalent to a specific course offered by the college—provided it is a course for which the student has not received prior high school or college credit, has not attempted credit by examination, and has never enrolled. The course should be one whose content, in the opinion of the department and the instructor assigned, lends itself to testing by examination ([N.1.40](#)).

Credit by examination may be granted only for a course listed in the college catalog and only to a student who is registered in the South Orange County Community College District and is in good standing. A student may not receive credit by examination for any course which is a prerequisite to a course for which the student has already received credit. A minimum 2.0

grade point average in at least 12 units completed at Irvine Valley College is required to attempt credit by examination ([N.1.41](#)).

Units earned through credit by examination will not be counted in determining the 12 semester units required in residence for graduation. The procedures for securing permission to obtain Credit by Examination for a specific course are as follows:

1. The student submits a Credit by Examination petition form to the Office of Admissions and Records, where eligibility will be determined. Petitions are available at the Office of Admissions and Records.
2. The student contacts an instructor who teaches the course for which Credit by Examination is requested. If it is the judgment of the instructor that the course content can be tested by examination and that the student possesses sufficient background, previous training and/or skills to attempt the examination, the instructor signs the form.
3. The student, following policies and procedures developed within the school, obtains the approval of the appropriate instructional dean.
4. Following approval from the dean, the request is forwarded to the Vice President for Instruction for final approval. (The Vice President for Instruction will forward the approved petition to the Office of Admissions and Records.)
5. The initiating instructor prepares, administers, and grades the examination. The instructor must forward the grade to the Office of Admissions and Records.
6. A grade of Pass ("P") or No Pass ("NP") will be assigned, and the course will be identified as "Credit by Examination" on the student's transcript.

Advanced Placement (AP) and College Level Examination Program (CLEP)

Students may earn associate degree and general education credit for Advanced Placement (AP) Tests with scores of 3, 4, or 5. Students must have the College Board send AP exam results to the IVC Admissions Office for use on the associate degree or general education pattern. Credit by Advanced Placement exam is noted on the student's transcript ([N.1.42](#)). The College recognizes the College Level Examination Program (CLEP). A student, by successfully completing the General Examination (25th percentile or higher), may earn up to 12 ungraded units applicable to the associate degree as follows: 3 units in Humanities and Fine Arts; 3 units in Mathematics; 3 units in Social Science; and 3 units in Natural Science

(non-laboratory). No credit will be given for CLEP in any area in which the student has earned college credit prior to completion of the CLEP examination. Credit for CLEP is awarded upon completion of 12 units in residence at Irvine Valley College ([N.1.43](#)).

Policy on Distance Education and on Correspondence Education

As online course offerings have grown at IVC, more programs have become able to be completed at least 50% online. In response to this growth, IVC submitted a substantive change to ACCJC in 2016 ([N.1.44](#)).

Students who wish to enroll in an online course at IVC must meet the specific requirements of the course and participate responsibly. Students are required to attend an orientation for online classes that provides tutelage in how to access and use the online learning environment. Instructors inform students at the class orientation or by email about how to use the Blackboard account. Students officially enrolled in an online class may access their class account with a user name and password ([N.1.45](#)).

Distance Education (DE) means instruction in which the instructor and the student are separated by distance and interact through the assistance of instructional technology (Title 5, Section 55200). DE courses at IVC are offered only through online modalities.

Each proposed or existing course offered by distance education shall be reviewed and approved separately by the college's Curriculum Committee. Courses that are fully online shall be reviewed separately from hybrid courses ([N.1.46](#)).

When approving distance education courses the Curriculum Committee certifies the following ([N.1.47](#), [N.1.48](#)):

Course Quality Standards: The same standards of course quality are applied to the distance education courses as are applied to traditional classroom courses. The class offered at a distance will fulfill all the criteria of the course outline of record (COR), including comparable content delivery, learning objectives, assignments, and methods of evaluation as expected in face-to-face delivery modalities.

Instructor Qualifications: Faculty teaching online courses shall be selected by the same procedures used to determine all instructional assignments, with additional consideration of the faculty member's experience and skill set related to online instruction

Instructor Contact: All approved DE courses, including fully online (100%) and hybrid (1%-99% online) courses, shall include regular effective contact between instructor and students. The colleges' Curriculum Committee's separate approval is to verify that the distance

modality can and will provide this regular effective contact. Instructors will use one or more of the following accepted practices of regular effective contact in their online courses:

- **Regular Announcements:** It is best practice for faculty to make general announcements to students in online classes on a regular basis, such as through the use of the announcement area in the learning management system (LMS) or via emails to the entire class.
- **Orientation:** It is best practice for faculty to send a welcome communication to students which may include course information, expectations, contact information, and how to access online content. Additionally, orientations may take place online or face-to-face.
- **Establishing Expectations:** Faculty should include in the syllabus or course orientation a description of the frequency and timeliness of instructor-initiated contact and feedback, as well as expectations for student participation. It is best practice to include the timeframe for responding to student questions/inquiries (for example, “within two business days”), the timeframe for receiving feedback on student work (for example, “within 7-10 business days”), the timeframe for submission of assignments, and the quantity of discussion board postings required of the student.
- **Faculty-Initiated Interaction:** It is best practice for faculty to regularly initiate interaction with students in a variety of ways, including but not limited to: asynchronous discussion board forums with appropriate faculty input, synchronous chats, video conferencing, individualized contact via phone or email, and, in the case of a hybrid course, regular face-to-face meetings.
- **Content Delivery:** Faculty will not provide content material either through online lectures (in written, video, and/or audio forms) and/or through introductions to materials not created by the instructor (such as publisher-provided materials, web sites, streaming video, etc.).
- **Notifying Students of Faculty Unavailability/Offline Time:** Students should be notified if the instructor is unavailable/offline preventing regular effective contact for a longer period of time (e.g. four business days) for any reason (such as an illness or family emergency). Students should also be notified when instructor-initiated regular effective contact will resume.
- **Notifying Administration of Faculty Absence Notification:** If a faculty member must be absent for a period of time that results in the faculty member not being able to meet his or her regular effective contact for any given week, this would be considered an absence and the Dean of the division in which the course is taught must be notified. Absences will be handled in accordance with the negotiated faculty contract.
- **Face-to-Face Forms of Contact (for hybrid modalities):** Faculty are encouraged to utilize standard accepted face-to-face forms of contact (i.e., group or individual meetings, lab class meetings, orientation and review sessions, supplemental seminars

- or study sessions, proctored exams, and field trips). Field trip accommodations must be made available for students with documented disabilities.
- Office Hours / Student Consultation: Faculty should be available to their distance education students during regularly scheduled office hours, which may be held either on-site or online, or for student consultation. This can include telephone contact, face-to-face contact, or online contact (through email, discussion board, or chat).

Accessibility Standards

The following general principles should be followed to the extent possible to ensure that distance education courses are accessible to students with documented disabilities in compliance with Section 508:

- Distance education courses for all students to fully participate and benefit from an equitable college experience.
- Instructional materials and textbooks permit maximum opportunity for access by students with documented disabilities without the need for outside assistance (i.e. sign language interpreters, aides, or other forms of human assistance).
- Distance education resources provide "built-in" accommodations where possible (i.e. closed captioning or descriptive narration, and/or interface design/content layout per universal design best practices, commonly used in support of persons with disabilities. Alternative testing format and extended test-taking time are provided to students with documented accommodations which address the student's documented disability ([N.1.49](#))).

Policy on Representation of Accredited Status

Irvine Valley College has an accreditation link on the footer of every page as well as on its “About” page ([N.1.50](#)). The link connects the user to the College's accreditation webpage which displays the following statement:

Accreditation Status

Irvine Valley College is accredited by the Accrediting Commission for Community and Junior Colleges (ACCJC), Western Association of Schools and Colleges (WASC), 100 Commercial Blvd., Suite 204, Novato, CA 92949, 415-506-0204, an institutional accrediting body recognized by the Council for Higher Education Accreditation and the U.S. Department of Education. Additional information about accreditation, including the filing of complaints against member institutions, can be found at www.accjc.org.

Each college affiliated with ACCJC must undergo periodic evaluation of their programs and services through self study and peer review in a six year cycle. Irvine Valley College received reaffirmation of its accreditation in February 2014 ([N.1.51](#)).

The Accreditation page also contains a link for the submission of comments on the Self Evaluation Report, as well as links to an archive of all of the College's required accreditation materials including self-evaluation, mid-term reports, evidence, site visit materials, team reports, follow-up reports, Commission letters, and ACCJC substantive change materials ([N.1.52](#)).

Policy on Student and Public Complaints against Institution

Informal Complaint Procedures

The District has established designated officers who are charged with receiving complaints and coordinating their investigation. The designated officer will explain the rights and options available to the individual bringing charges of unlawful discrimination or harassment. If there is a simple misunderstanding or the individual does not wish to file a formal complaint, the individual may elect to pursue an informal resolution process. The informal process is not a prerequisite for filing a formal complaint.

An individual who feels she/he has been subjected to sexual assault may file a complaint with the police department in addition to any other complaint.

Individuals who believe they have been subjected to unlawful discrimination, including harassment, may report complaints to the designated officer for Irvine Valley College:

Vice President for Student Services
Irvine Valley College
5500 Irvine Center Drive
Irvine, California 92618
949-451-5214

The District strongly encourages students and staff who believe they are being harassed to file a complaint in a timely manner. Since failure to report harassment impedes the District's ability to stop the behavior, the District strongly encourages that such complaints be made within 30 days of the alleged incident. Any complaint not involving employment may be made orally or in writing within one year of the date of the alleged discrimination or harassment ([N.1.53](#)).

Formal Complaint Procedures

If an informal process does not resolve the matter and/or the complainant wishes to pursue formal charges, he or she may elect to follow formal complaint procedures. Formal complaints of unlawful discrimination or harassment must be filed in writing on a form prescribed by the State Chancellor ([N.1.54](#)).

Approved complaint forms are available from any one of the following sources:

The Office of the Vice President for Student Services
Irvine Valley College
5500 Irvine Center Drive
Irvine, California 92618
949-451-5214

The Office of the Director of Human Resources
South Orange County Community College District
28000 Marguerite Parkway
Mission Viejo, California 92692
949-582-3348 or 949-582-4850

Irvine Valley College website: www.ivc.edu/policies/pages/harassment.aspx

SOCCCD website: www.socccd.edu/hr/HRforms.asp

State Chancellor of the California Community Colleges website:
<http://californiacommunitycolleges.cccco.edu/ComplaintsForm.aspx>

Upon receiving a formal written complaint, the District will determine whether the complaint has met the necessary requirements, which include but are not limited to whether it was filed

in a timely manner, on an appropriate form, and whether it alleges unlawful discrimination as stipulated in Title 5, section 59300. The District will investigate properly filed complaints according to procedures prescribed in Board policy. The District will complete its investigation within 90 days of receiving the complaint and report its administrative determination. The District must provide written notice to both the complainant and the State Chancellor of whether there is probable cause to sustain the charges raised in the complaint; a description of the action taken, if any, to prevent similar problems from occurring in the future; the proposed resolution of the complaint; and the complainant's right to appeal to the District and the State Chancellor ([N.1.55](#), [N.1.56](#)).

For more comprehensive information about discrimination and harassment, students are encouraged to read the Harassment Policy and Complaint Procedure brochure, available in the Office of Student Services, Room A110, at Irvine Valley College. The brochure is also available for downloading from the SOCCCD website: www.socccd.edu/12/HRforms.asp

Policy on Institutional Advertising, Student Recruitment, and Representation of Accredited Status

Irvine Valley College's accreditation status is found on the first page of the 2016-2017 Catalog, the mission and vision statements are located on page 4, and the institutional learning outcomes are located on page 7 ([N.1.57](#)).

In accordance with Board Policy and Administrative Regulations 5604 (Admissions), the District does not restrict admission to residents of the District, nor does it restrict the privilege of District residents to attend any other community college. Non-California residents are accepted on the same basis as California resident students, except that state regulations require these students be assessed tuition ([N.1.58](#)).

Students who are eligible for regular admission to the colleges must be 18 years of age or older, or possess a high school diploma, GED, certificate of proficiency or equivalent. In addition, any apprentice as defined in the Labor Code, or any other person who is over 18 years of age and who is capable of benefitting from instruction offered at the College may be admitted.

Students who are not enrolled for a sufficient duration to receive a grade or non-evaluative symbol on their transcript at either Irvine Valley College or Saddleback College for one term must file a new admission application in a subsequent term to be eligible to enroll. The College catalog accurately reports the official college name, address, telephone number and web links on the first page of the 2016-2017 Irvine Valley College Catalog and the

campus map can be found on page 336 ([N.1.59](#), [N.1.60](#)). The same information is also available on the college website ([N.1.61](#)).

Policy on Contractual Relationships with Non-Regionally Accredited Organizations

Irvine Valley College does not currently have any contractual relationships with non-regionally accredited organizations.

Policy on Institutional Compliance with Title IV

Irvine Valley College's Office of Financial Aid keeps loan default rates at an acceptably low level and also complies with program responsibilities defined by the U.S. Department of Education ([N.1.62](#)). Programs funded by the federal government include the Pell Grant, SEOG Grant, Federal Work Study, Direct Subsidized Loan and Direct Unsubsidized Loan programs.

Irvine Valley College maintains compliance with Title IV of the Higher Education Act through comprehensive financial aid services to students. All students pursuing a direct loan are required to complete a Direct Loan Master Promissory Note (MPN) and Entrance Counseling upon receiving a direct loan at the College. The goal of Entrance Counseling is to help the student understand what it means to take out a federal student loan. The policies and processes are regularly updated as needed to remain current and compliant with Title IV and State Student Eligibility Requirements and Policies ([N.1.63](#)).

The College's financial aid program is evaluated on an annual basis as part of the College's independent audit process which includes an assessment of the College's compliance with federal Title IV regulations and requirements. The College submits the results of its annual Federal Single Audit to the USDE each year. During this accreditation cycle, the College has had no findings in the audit of the financial aid program ([N.1.64](#)).

The College has maintained loan default rates at an acceptable level while complying with the responsibilities defined by the U.S. Department of Education. The College's three-year default rate on student loans in Fiscal Year 2013 was 12.7%, which is below the requirement established by California (<15.5%) as well as the federal requirement (<30%) ([N.1.65](#)). The College has not had any actions taken against it due to non-compliance with Title IV regulations.

For the three most recent years for which data are available ([N.1.66](#)), the student loan default rates among IVC alumni were: 2011: 14.7%; 2012: 8.9%.; 2013 12.7%

Standard I: Mission, Academic Quality and Institutional Effectiveness, and Integrity

The institution demonstrates strong commitment to a mission that emphasizes student learning and student achievement. Using analysis of quantitative and qualitative data, the institution continuously and systematically evaluates, plans, implements, and improves the quality of its educational programs and services. The institution demonstrates integrity in all policies, actions, and communication. The administration, faculty, staff, and governing board members act honestly, ethically, and fairly in the performance of their duties.

Standard I.A: Mission, Academic Quality and Institutional Effectiveness, and Integrity

I.A.1 Mission

The mission describes the institution's broad educational purposes, its intended student population, the types of degrees and other credentials it offers, and its commitment to student learning and student achievement.

Evidence of Meeting the Standard

The South Orange County Community College District (SOCCCD) and Irvine Valley College (IVC) adopt separate institutional mission and vision statements that are reviewed annually and revised as needed. IVC's mission statement reads as follows:

Irvine Valley College offers clear and guided pathways to transfer, certificates, associate degrees, employment, and further education to a diverse and dynamic local and global community. IVC supports student access, success, and equity. IVC fosters economic and workforce development through strategic partnerships with business, government, and educational networks ([I.A.1](#)).

The mission was recently revised to more fully describe the types of degrees and credentials it offers and to feature values of access, success and equity as well as the College's distinctive emphasis on clear and guided pathways. IVC's student population includes an active international student community who contribute to the diversity and dynamism of the educational environment. The College's mission statement is published and distributed widely via the College Catalog. The mission is also prominently featured on the College's website on the "About" page.

The District's mission statement is published on the District website's "About" page.

We provide a dynamic and innovative learning environment for diverse learners of all ages, backgrounds and abilities. We promote access, success and equity to meet each student's goals of skills development, certificate, associate degree, transfer or personal enrichment. We contribute to the economic vitality of the region.

Since it was established as an independent college in 1985, the mission of IVC has had, at its core, a focus on providing students access to the highest quality education. The College's commitment to student success and equity flows from its mission statement and is further detailed in its Strategic Plan ([I.A.2](#)), Student Equity Plan ([I.A.3](#)), Student Success and Support Program (SSSP) plan ([I.A.4](#)), Basic Skills Initiative (BSI) plan ([I.A.5](#)), Basic Skills Transformation plan ([I.A.6](#)), and Asian American Native American Pacific Islander Serving Institution (AANAPISI) grant activities ([I.A.7](#)).

In accordance with its mission, IVC offers credit and non-credit instructional programs, both online and face-to-face. Online offerings complement the face-to-face offerings by offering an additional, convenient format for students to access course work. Students have access to an array of student support services and co-curricular activities, such as the student government and student ambassadors program, that support student achievement and learning. IVC's student population includes resident and international students of all backgrounds, ethnicities, ages, and educational needs. IVC's commitment to diversity and equity is clearly represented in its mission and actions, such as becoming federally designated as a minority serving institution in 2015 ([I.A.8](#), [I.A.9](#), [I.A.10](#), [I.A.11](#)).

To meet the needs of its community, the College provides access to challenging transfer-level courses as well as courses that develop basic skills. Our students can attain associate degrees and certificates in career and technical (CTE) programs that lead to employment. Students also have the option to complete transfer-focused programs that lead to associate degree attainment and transfer to four-year institutions ([I.A.12](#)). IVC is proud of its high completion and transfer rates, which reflect the strength of the College's commitment to supporting students and faculty in all aspects of teaching and learning; the institution also serves community skill-builders who take courses simply to learn new skills or upgrade existing skills so that they can maintain their competitive edge or advance in their current careers ([I.A.13](#)).

IVC regularly reviews its mission statement at its annual Strategic Planning and Accreditation Council (SPAC) retreat ([I.A.14](#), [I.A.15](#)), the Institutional Effectiveness Committee ([I.A.16](#)), and Academic Senate ([I.A.17](#)). Following the college wide process, the Board of Trustees additionally reviews and adopts changes, per recommendations of the College, annually ([I.A.18](#)).

The college mission is published in the catalog and both the college and district mission statements are prominently published on their respective web sites ([I.A.19](#), [I.A.20](#)).

Analysis and Evaluation

Irvine Valley College demonstrates strong commitment to a mission that emphasizes student learning and student achievement. Its comprehensive review process of the College's mission statement ensure that the mission statement describes the College's broad educational purposes, who it serves, its values, its commitment to improving access and equity, the types of degrees and other credentials offered, and its commitment to student learning and student achievement. The institution's educational mission is clearly defined, adopted, and reviewed regularly by the Board of Trustees. Moreover, the mission is published widely to inform current and prospective students as well as the surrounding community of the College's commitment to those it serves.

The College meets the standard.

I.A.2 Mission

The institution uses data to determine how effectively it is accomplishing its mission, and whether the mission directs institutional priorities in meeting the educational needs of students.

Evidence of Meeting the Standard

Irvine Valley College (IVC) utilizes external and internal data to determine how effectively the College is accomplishing its mission to serve students' needs. Data from all levels—global, national, state, regional, and local—are analyzed to identify trends, emerging needs, opportunities, and potential threats ([I.A.21](#), [I.A.22](#), [I.A.23](#), [I.A.24](#)). Data sources include Scorecard data, labor market information, SLOs, the Chancellor's Office Data Mart, surveys, ad hoc research studies, and the district reporting infrastructure (i.e., inFORM and MySite) ([I.A.25](#), [I.A.26](#), [I.A.27](#)).

These data drive the planning process of the College and were foundational in developing the goals and objectives of the *2014-2020 Strategic Plan* ([I.A.28](#)), as well as the plan's key performance indicators. A representative district wide task force carefully developed the current indicators ([I.A.29](#), [I.A.30](#)). To ensure a widely shared focus on student learning and institutional effectiveness data, strategic KPIs are shared and discussed at the annual planning retreat ([I.A.31](#)). These indicators are reviewed and discussed at both the District wide Planning Council (DWPC) annual retreat and at IVC's annual strategic planning retreat. IVC has also established institution-set standards, reviewed annually by the Institutional Effectiveness Committee (IEC) and shared with SPAC. Additionally, the College has set financial, accreditation, and student achievement targets (or "goals") for the Institutional Effectiveness Partnership Initiative's metrics, which are published on the college's "About"

page on its website. These include completion goals congruent with the completion goals of the College's strategic plan ([I.A.32](#)).

The District also periodically engages in a formal external scan process to aggregate and analyze key demographic, workforce, and community indicators so this information can be used to inform planning efforts and the mission statement review process ([I.A.33](#)). An example of how the College and the District have adapted their mission statements to respond to external forces can be found in the addition of the word "equity" to both the District and College mission statements. The inclusion of this single word powerfully reinforces the importance of the data and activities found in the College's Student Equity Plan ([I.A.34](#)) and the College's commitment to reducing or eliminating the achievement gap (cf. Strategic Plan Objective 2.1) ([I.A.35](#)).

To ensure data is utilized to review and improve programs and services offered to students, all program reviews are required to incorporate data analysis of student access and success trends as well as institutional effectiveness indicators such as fill rates and student learning outcomes assessments ([I.A.36](#)). The resource allocation process relies heavily on program review objectives and strategic planning objectives as part of its resource request rating and dialogue process to ensure that data and assessment results drive priorities to meet students' needs ([I.A.37](#)).

Additional ways in which IVC uses data to assess progress and success in achieving its mission are manifold and include: program review, committee discussions, committee evaluations, budget and resource allocation processes, enrollment management, hiring processes, employee evaluations, distance education and online planning, grant applications, SSSP planning, student equity planning, strategic planning, and educational and facilities master planning ([I.A.38](#)).

The College meets the standard.

I.A.3 Mission

The institution's programs and services are aligned with its mission. The mission guides institutional decision-making, planning, and resource allocation and informs institutional goals for student learning and achievement.

Evidence of Meeting the Standard

The Irvine Valley College (IVC) mission supports and aligns with the District mission as well as the mission of the California Community College. Also published in the *IVC Planning and Decision-Making Manual* ([I.A.39](#)), the mission guides the College's decision-making, planning, and resource allocation processes. To achieve its mission, the 2014-2020

Strategic Plan ([I.A.40](#)) serves as the cornerstone of IVC's planning process. All other college plans align with this plan and with the College's mission, including the 2016-2021 Technology Plan ([I.A.41](#)), the Student Success and Support Program Plan ([I.A.42](#)), the Student Equity Plan ([I.A.43](#)), the Online Education Strategic Plan ([I.A.44](#)), and the Education and Facilities Master Plan ([I.A.45](#)).

Data informs the development, the analysis, and the representative dialogue that drives goal- and objective-setting, while the mission constrains the field of endeavor and provides guidance as to which priorities are most central and critical. College plans align with the strategic plan by either having action steps that directly support and are nested underneath strategic objectives, and/or by directly aligning their objectives with specific strategic objectives.

The mission statement drives the College strategic plan goals. Two of the four goals of the College's strategic plan directly address the College's mission of increasing student success and completion and of creating regional partnerships that support CTE, workforce development, and the local economy ([I.A.46](#), [I.A.47](#)). The other two goals of the strategic plan concern continuously improving institutional effectiveness so the College better serves its community ([I.A.48](#), [I.A.49](#), [I.A.50](#)). These goals drive the strategic objectives and the program review objectives that are required to be referenced in support of the importance of all resource requests through the Comprehensive Resource Request and Allocation Process.

To ensure "IVC fosters economic and workforce development through strategic partnerships with business, government, and educational networks," IVC's "College of the Future" initiative is developing the Advanced Education and Technology Park into a cutting-edge facility to support workforce development for sectors that have been strategically targeted as high demand, high pay, and aligned with the programs and community that characterize IVC.

The College's work with educational partners includes the UCI Engineering pathway grant, an accounting pathway with Cal State Fullerton, and both CTE pathways (OC3 Pathways) ([I.A.51](#)) and Early College pathways with the Orange County Department of Education and local high schools ([I.A.52](#)). IVC has also developed pathways, such as Biotechnology ([I.A.53](#)) and the General Accounting Principles 4+1 program (GAP 4+1) ([I.A.54](#)), to address community needs both in terms of student and workforce demand. Both programs also are built on partnerships with other educational institutions. These programs, as well as the institution's active transfer center and continual curriculum articulation efforts, exemplify IVC's commitment to leveraging "educational networks" in support of student success.

Analysis and Evaluation

IVC's mission clearly guides institutional decision-making, planning, and resource allocation and informs institutional goals for student learning and achievement. Because the broad college community participates in writing and revising the mission statement as well as in making recommendations for the use of college resources, the budget process is open as is the process for prioritizing allocations of other resources, there is widespread buy-in by all constituent groups to ensure that planning and prioritization align with the mission. Such a large number of people representing diverse constituents are involved in so many aspects of recommending priorities and allocations in highly visible processes that the College may be assured of achieving a reasonable and consensual balance in these allocations and that they are aligned and commensurate with its mission and priorities.

The College meets the standard.

I.A.4 Mission

The institution articulates its mission in a widely published statement approved by the governing board. The mission statement is periodically reviewed and updated as necessary.

Evidence of Meeting the Standard

Irvine Valley College's mission statement is prominently displayed on the "About" page of the college website ([I.A.54](#)) and widely disseminated via the college catalog ([I.A.56](#)), the *IVC Planning and Decision-making Manual* ([I.A.57](#)), and via banners on campus.

The College reviews its mission annually during the Strategic Planning and Accreditation Council (SPAC) retreat ([I.A.58](#), [I.A.59](#)). During the review process, the College revisits the mission for California Community Colleges, as given in Title 5 of the California Education code, as well as the District's mission statement and other materials regarding good practices in mission statements, including the ACCJC Accreditation Standards ([I.A.60](#)).

The previous version of the mission statement was approved in June 2014 ([I.A.61](#)), after undergoing review and discussion during the 2013-2014 academic year. The current version of the mission statement began its review and development process at the 2015 SPAC retreat ([I.A.62](#), [I.A.63](#)). Development, discussion and refinement continued during faculty development week ([I.A.64](#)). In May of 2016, IEC recommended a new draft version of the college mission which SPAC reviewed and then later approved at the SPAC retreat before forwarding it to the Academic Senate ([I.A.65](#)). Once SPAC and Academic Senate had approved the new mission, it was then forwarded to the Board of Trustees for adoption ([I.A.66](#)) [BOT approval still outstanding].

Analysis and Evaluation

As part of its annual strategic planning process, Irvine Valley College reviews its mission to ensure an accurate reflection of the College's commitment to serving the educational needs of the local community. The College articulates its mission in a widely published statement adopted by the SOCCCD Board of Trustees.

The College meets the standard.

Standard I.B: Assuring Academic Quality and Institutional Effectiveness: Academic Quality

Standard I.B.1 Assuring Academic Quality and Institutional Effectiveness: Academic Quality

The institution demonstrates a sustained, substantive and collegial dialogue about student outcomes, student equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement.

Evidence of Meeting the Standard

Irvine Valley College (IVC) has established processes to facilitate sustained, substantive and collegial dialogue across the College about student learning outcomes, student equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement. In 2014 IVC reorganized its committee structure following a collegial dialogue with administrative, faculty and classified leadership ([I.B.1](#), [I.B.2](#)). The new committee structure encourages the flow of information through the various governance groups and consequently supports continuous dialogue about instructional programs, student services, and administrative services.

Student Outcomes

Under the purview of the Institutional Effectiveness Committee (IEC), the Student Learning Outcome (SLO) Task Force is structured to ensure campus wide communication regarding student learning outcomes (SLOs) ([I.B.3](#)). Facilitated by the SLO faculty coordinator, members discuss best practices on how to assess course learning outcomes and their mapping to program learning outcomes (PSLOs) and institutional learning outcomes (ISLOs) ([I.B.4](#), [I.B.5](#)). Moreover, the committee has ongoing discussions on the College's ISLOs and is currently discussing possible revisions to more accurately reflect the institution's focus on its students ([I.B.6](#), [I.B.7](#)). When committee members identify areas and opportunities for improvement such as through changes in processes, school representatives report back to their respective schools at department meetings for feedback and approval. Once there is consensus, recommendations are presented to the Academic Senate by the SLO Coordinator for approval.

Student Equity

The Student Equity Work Group also reports to the IEC. This work group was formed following the requirement by the California Community College Chancellor's Office to develop a Student Equity Plan ([I.B.8](#)). Irvine Valley College's 2014 Student Equity Plan is a three-year plan that outlines strategies to potentiate the success of all students regardless of gender, age, race/ethnicity, disability status, veteran status, and low socioeconomic status.

The College's efforts to mitigate disproportionate impact focus on five success indicators: access, course completion, basic skills completion, degree and certificate completion, and transfer. The plan was updated in 2015 to include additional student populations not previously addressed, including students of mixed ethnicity and foster youth students ([I.B.9](#)).

After the first year of implementation, the Student Equity Work Group was approved by SPAC to become a task force. Detailed in the College's *Planning and Decision-Making Manual*, the task force has a standing item on the IEC agenda, providing IEC with updates on student equity related research and activities ([I.B.10](#), [I.B.11](#)). To facilitate district-wide and campus wide dialogue, the Student Equity Task Force co-chairs provided a general overview of student equity efforts at the Spring 2014 Student Success Summit ([I.B.12](#)) and conducted a number of informational sessions during spring 2015 ([I.B.13](#)) and fall 2015 Professional Development Weeks ([I.B.14](#)).

Academic Quality

Through curriculum policies, procedures, and approval processes, the College engages in dialogue on academic quality, details of which are provided in Standard II.B. Assessment of learning outcomes is part of the program review process, which is a collaborative effort within departments. This information is presented to the department chair/manager for incorporation into the department's program review ([I.B.15](#)) and administrative unit review ([I.B.16](#)).

The program review process also provides avenues for dialogue on academic quality. All academic programs and student services participate in a comprehensive program review according to a regular, published schedule ([I.B.17](#)). As part of this review, all programs identify program-level objectives which are linked with the College strategic goals and objectives.

Institutional Effectiveness

As one of the five major strategic planning committees, the Institutional Effectiveness Committee (IEC) oversees the regular review of instructional student learning outcomes (SLOs), student services learning outcomes (SSOs), administrative unit outcomes (AUOs), and program review. Co-chaired by the Academic Senate president and director of Research, Planning and Accreditation, the committee governs the establishment and progress review of institution-set standards ([I.B.18](#)). Conversations regarding institution-set standards (ISS), strategic initiatives, key performance indicators and Institutional Effectiveness Partnership Initiative goals occur regularly during committee meetings.

IEC reviews and revises processes, such as the program review and learning outcomes assessment processes, to promote ongoing assessment and dialogue in an effective manner. Discussions include how to deepen the integration of program review with the resource allocation process and the strategic plan ([I.B.19](#)).

To support evidence-based college planning, assessment and dialogue, the Office of Research, Planning and Accreditation (ORPA) is at the service of the entire college. IVC has expanded ORPA from two staff members in 2013 to five and a half staff members as of 2016. ORPA provides the IEC regular updates on research efforts, such as the recent spring 2016 Community College Survey of Student Engagement ([I.B.20](#)). The ORPA and the IEC ensure continuous dialogue regarding assessment and evaluation efforts, student equity research, TracDat updates, learning outcomes assessment, and program review ([I.B.21](#)).

Analysis and Evaluation

The College continuously promotes opportunities for staff, faculty and administrators to engage in dialogue through committee structures and policies and practices and encourages engagement of all college employees in all processes. Through these efforts, the College meets the standard in demonstrating a sustained collegial dialogue regarding student outcomes, equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement. The recent expansion of ORPA to increase data and research output also supports and informs the dialogue.

The College meets the standard.

Standard I.B.2 Assuring Academic Quality and Institutional Effectiveness: Academic Quality

The institution defines and assesses student learning outcomes for all instructional programs and student and learning support services.

Evidence of Meeting the Standard

Student learning outcome (SLO) and student services outcome (SSO) assessments are ongoing throughout the academic year. All courses, credit and non-credit, ([I.B.22](#)) and student services departments ([I.B.23](#)) are required to have at least one SLO. All learning outcomes are entered into TracDat, the College's web-based repository for all assessment activities ([I.B.24](#), [I.B.25](#)).

For academic programs, faculty take the lead with course and program learning outcomes, from their development to their evaluation. During the curriculum review process, SLOs are developed and included in each course's Course Outline of Record ([I.B.26](#), [I.B.27](#)) and syllabus ([I.B.28](#)). At least one student learning outcome (SLO) for every course, regardless of credit status or mode of delivery, must be assessed each academic year the course is offered. Programs are evaluated using course SLOs that are mapped to relevant program student learning outcomes (PSLOs) via TracDat ([I.B.29](#)). These mapped course SLOs are

evaluated at the program level during the program review process ([I.B.30](#)). See I.B.5 for a detailed explanation of the program review process.

Student services also has a well-established process and schedule for assessing SSOs each academic year. To develop this process, the College previously had a dedicated SSO coordinator, who met with each student services department to assist in the development and assessment of SSOs. Currently, the vice president for Student Services oversees the process and regularly reviews the assessment of SSOs ([I.B.31](#)). Resources dedicated to supporting this process include hiring consultants to advise on best practices ([I.B.32](#), [I.B.33](#)). Moreover, the recent spring 2016 Student Services Managers retreat also focused on how assessment drives decision making, program improvement, and resource requests ([I.B.34](#)). Standard IIC provides a more detailed explanation of the student services assessment process.

To provide overall support to the learning outcomes assessment process, the SLO coordinator conducts trainings throughout the year (see I.B.8 for additional evidence), regularly holds SLO Task Force meetings ([I.B.35](#)), provides updates to the Instructional Council ([I.B.36](#)), and attends department meetings to discuss SLOs ([I.B.37](#)). These updates ensure assessments are completed by all departments ([I.B.38](#)). In collaboration with the Office of Research, Planning and Accreditation, the SLO coordinator uses TracDat to monitor each department's progress on the assessment of outcomes. Results are presented to the Institutional Effectiveness Committee and SLO Task Force and ultimately reported in the ACCJC Annual Report ([I.B.39](#), [I.B.40](#)).

Analysis and Evaluation

The College is committed to defining and assessing student learning outcomes at the course and program level as well as for student support and learning support services through a well-established SLO assessment process. With a dedicated SLO Coordinator, assessments are ongoing and meaningful and ultimately inform program reviews. Documentation of all assessment activities in TracDat facilitate the alignment of SLOs with PSLOs and program reviews. To ensure accurate documentation and tracking of assessments, the College continues to provide TracDat training for staff, faculty, and administrators.

The College meets the standard.

Standard I.B.3 Assuring Academic Quality and Institutional Effectiveness: Academic Quality

The institution establishes institution-set standards for student achievement, appropriate to its mission, assesses how well it is achieving them in pursuit of continuous improvement, and publishes this information.

Evidence of Meeting the Standard

As required by the ACCJC and U.S. Department of Education, Irvine Valley College (IVC) establishes institution-set standards annually in its ACCJC Annual Report following a formula proposed by the Office of Research, Planning and Accreditation (ORPA) and approved by the Institutional Effectiveness Committee (IEC) ([I.B.41](#)). Although the College follows the formula of taking one standard deviation below the average, IEC examines the proposed standard for achievability and rigor. For example, because the College focuses heavily on transferring students to four-year universities, the College has agreed in the last two ACCJC Annual Reports to set a standard for transfers that is higher than the figure yielded following the established methodology ([I.B.42](#), [I.B.43](#), [I.B.44](#)).

Before setting new institution-set standards for the upcoming year, ORPA presents progress data to IEC to review progress on current standards ([I.B.45](#), [I.B.46](#)). Because the standards are levels which the College must not fall below, IVC has established appropriate steps in the event standards are not met. If not met, IEC will review data to inform discussions on possible reasons and develop action steps to bring the College above standard. A proposed action plan would be communicated through the committee structure for input and eventual approval ([I.B.47](#)). To date, IVC has not fallen below any of its set standards.

As part of the Institutional Effectiveness Partnership Initiative (IEPI) Framework of Indicators, the College engages in ongoing conversations about additional metrics that reflect different aspects of the College's operations. More specifically, IVC has set standards for successful course completion, completion rate for unprepared students, and remedial rate ([I.B.48](#), [I.B.49](#)). Distinct from the baseline institution-set standards, the IEPI goals are aspirational and serve as targets for the College. Of the nine optional metrics for which colleges are to set targets, IVC elected to focus on completion rate for students placed into Basic Skills courses, as this goal reflects an aspect of the College's strategic plan objective of increasing the Scorecard Student Progress and Achievement Rate (SPAR) by at least 2.5% by 2020 ([I.B.50](#)). College initiatives in acceleration, co-requisite remediation, multiple math pathways, and reducing under-placement via strong multiple measures all support the achievement of this goal ([I.B.51](#)).

Similar to the process used to establish the College's Institution-Set Standards, IEPI metrics are discussed and reviewed in IEC and approved, using a collegial consultation process, annually. [I.B.52](#) Any changes to the IEPI goals are communicated to the college community

through representative governance and the major strategic planning committees. To communicate these established goals to the public, the framework of indicators is published on the College's "Vision, Mission and Goals" page ([I.B.53](#)).

Analysis and Evaluation

IVC continues to excel in student achievement and continues to hold itself accountable through the establishment of institution-set standards, IEPI indicator goals, and strategic plan targets. With the second highest transfer rate in the state, IVC sets challenging yet achievable standards and goals. The College annually reviews and establishes standards and goals and is continuously improving its processes for reviewing progress and engaging in ongoing dialogue with the community regarding the College's performance.

The College meets the standard.

Standard I.B.4 Assuring Academic Quality and Institutional Effectiveness: Academic Quality

The institution uses assessment data and organizes its institutional processes to support student learning and student achievement.

Evidence of Meeting the Standard

Irvine Valley College (IVC) uses assessment data as part of an integrated planning process to support the College's 2014-2026 Strategic Plan, Goal 2, which states "IVC will promote students' success by enhancing the teaching and learning environment" ([I.B.54](#)). To facilitate college wide dialogue and to incorporate assessment data into college planning to support student learning and student achievement, comprehensive program reviews are required of all instructional programs every six years ([I.B.55](#), [I.B.56](#), [I.B.57](#)). Career Technical Education (CTE) programs have an additional two-year cycle ([I.B.58](#)) in which they must examine labor market information relevant to their program using resources from their local advisory boards, the California Economic Development Division, Centers of Excellence, sector navigators, CTE Outcomes Survey reports, and reports from the Economic Modeling Specialists Incorporated (EMSI) Data Analyst product. ([I.B.59](#), [I.B.60](#), [I.B.61](#), [I.B.62](#), [I.B.63](#), [I.B.64](#), [I.B.65](#))

Academic programs also conduct biennial updates of their program reviews as part of an ongoing process to ensure program and course offerings meet students' needs ([I.B.66](#)). Additionally, annual updates are encouraged to ensure alignment of program objectives and strategies with resource requests. Comprehensive program review reports are posted on the

Institutional Effectiveness Committee Program Review intranet page for review and to facilitate campus wide dialogue ([I.B.67](#)).

To ensure completion of student services comprehensive program reviews, the vice president for Student Services holds mandatory annual retreats for all student services managers to review and provide updates on each departments' program reviews and SSOs. In 2016 the Office of Research, Planning and Accreditation (ORPA) met with all student services managers to provide guidance on the development of program objectives and SSOs, to share best practices to yield meaningful assessment data to foster data-driven conversations and actions, and to discuss how institutional research can support their needs ([I.B.68](#)). The Student Services' process for use of data to improve student learning and achievement is covered more fully in Standard IIC.

To request services and assistance from ORPA, employees can submit a research request via an online form and then check the status of a project through ORPA's website ([I.B.69](#)). As described in IB2, the College has increased ORPA staff since 2013. With the mission to foster continuous quality improvement of student learning, the Research Office strives to provide innovative, timely, relevant, and accurate information to inform college decision-making ([I.B.70](#)).

Analysis and Evaluation

The College demonstrates ongoing efforts to assess and utilize data in the institution's processes to support and enhance student learning and achievement. With an increase in staff members in the research office, the institution is better positioned to engage in more data-informed dialogue and decisions.

The College meets this standard.

Standard I.B. Assessing Academic Quality and Institutional Effectiveness: Academic Quality

The institution assesses accomplishment of its mission through program review and evaluation of goals and objectives, student learning outcomes, and student achievement. Quantitative and qualitative data are disaggregated for analysis by program type and mode of delivery.

Evidence of Meeting the Standard

The College assesses its mission through a comprehensive program review and evaluation process. As required by Administrative Regulation (AR) 6100(b) ([I.B.71](#)), all instructional programs, both credit and noncredit, must undergo program review to ensure progress toward and achievement of established objectives. During this review process, objectives are revised

to accurately reflect the focused efforts of departments. The Program Review calendar and template are posted on the Program Review intranet page ([I.B.72](#)). During non-comprehensive years, faculty and staff provide updates to unit objectives and strategies to substantiate resource requests ([I.B.73](#)).

During comprehensive years, departments are required to engage with and use relevant data to analyze programs' strengths and weaknesses ([I.B.74](#)). Relevant data includes evaluation of student learning outcome assessment results, distance education survey results, student climate survey findings, and the Program Review Report. Created by the District Information Technology Department, the Program Review Report includes data on course offerings, enrollment data, course and program outcomes, and student demographics ([I.B.75](#)). The report is available for download via the South Orange County Community College District (SOCCCD) inFORM Program Review Report. Instructions on how to access this report are detailed in the College's Program Review template. Moreover, the Office of Research, Planning and Accreditation (ORPA) regularly conducts trainings during Professional Development Week to inform faculty, staff and administrators how to access readily available data through the District's inFORM data portal and through CCCO sites (e.g., Data Mart) ([I.B.76](#), [I.B.77](#)). Program data by mode of delivery are not incorporated in the inForm Program Review Report but is available in the SOCCCD Institutional Effectiveness Report, Section 2 "Instructional Offerings," which is also available on inForm ([I.B.78](#)).

An example of how disaggregated data has been utilized in the program review process comes from the ESL department, which works with ORPA to conduct an annual survey on students' educational goals. This data, along with data generated to develop the 2014 Student Equity Plan, revealed a large percentage of students without the educational goal to obtain an Associate degree or certificate of transfer. Instead, many students enrolled in ESL classes to improve their conversational skills ([I.B.79](#)). These findings were then used to help plan for and develop a non-credit Adult ESL (AESL) program. AESL is now serving students who are not necessarily interested in an academic pathway, allowing them to take non-credit courses while still providing the ability to progress into credit coursework, if they choose ([I.B.80](#)).

For CTE program reviews, ORPA prepares labor market data for programs to demonstrate program demand given the current and future markets in Orange County. Using the Data Analyst program through Economic Modeling Specialists Incorporated (EMSI), the research office provides data for program offerings, industry outlook, and potential employers in the region ([I.B.81](#)). Additionally, CTE programs must have an advisory committee to assist with the evaluation of the program. The advisory committee is comprised of Irvine Valley College (IVC) faculty as well as vested members of the community ([I.B.82](#)). To further support the Program Review process, all departments can submit research requests to ORPA for additional program-specific data ([I.B.83](#)). Both qualitative and quantitative research is available to departments, from classroom surveys to focus groups.

Assessment data are recorded in TracDat, the College's assessment software. To support the program review process, TracDat facilitates the mapping of course student learning outcomes (SLOs) to program student learning outcomes (PSLOs) and to institutional student learning outcomes (ISLOs) ([I.B.84](#)). SLOs are tied to a department's program review via the Department Effectiveness ("B3") section, where assessment of the effectiveness of courses and student services efforts are described ([I.B.85](#), [I.B.86](#)). The process for student services is detailed further in Standard IIC.

To better integrate the tool into the College's planning processes, IVC decided to host TracDat on its local server in 2015. As the first institution in the country to do so, IVC is able to customize the tool based on local needs and to more quickly access data saved through the application, thus ensuring the completion of assessments for all course, program, and institutional learning outcomes. Trainings to facilitate the migration and implementation of TracDat Version 5 (V5) took place in spring 2016 ([I.B.87](#)) and fall 2016 ([I.B.88](#), [I.B.89](#)) as a collaborative effort between ORPA, the IT Department, and the SLO Coordinator. Trainings have also focused on how to develop meaningful learning outcomes and strategies that will yield actionable results. Per the request of the vice presidents for Instruction and Student Services, ORPA held open labs for deans, managers, and faculty and staff members to update their learning outcomes and program review while concurrently familiarizing themselves with TracDat v5 ([I.B.90](#), [I.B.91](#), [I.B.92](#), [I.B.93](#)).

Analysis and Evaluation

The College continuously works toward achieving its mission through the comprehensive program review process, which encompasses student learning outcomes assessments. From programs to courses to student services, assessment takes place on an ongoing basis to inform planning processes and resource requests. The integration of qualitative and quantitative data creates a well-rounded review process that ultimately provides critical information to improve the student experience. These effective practices, which are maintained through continuous dialogue, allow the College to work toward serving the needs of a diverse and dynamic community. Information sessions and hands-on trainings are provided on an ongoing basis as they are critical to ensuring familiarity with, and use of, the application to record and assessment outcomes.

The college meets the standard.

Standard I.B.6 Assuring Academic Quality and Institutional Effectiveness: Academic Quality

The institution disaggregates and analyzes learning outcomes and achievement for subpopulations of students. When the institution identifies performance gaps, it implements

strategies, which may include allocation or reallocation of human, fiscal and other resources, to mitigate those gaps and evaluates the efficacy of those strategies.

Evidence of Meeting the Standard

Through various plans, initiatives, and practices, Irvine Valley College (IVC) is committed to continuously identifying performance gaps through the disaggregation of data. Armed with data, IVC develops and implements strategies to mitigate achievement gaps, improve institutional effectiveness, and better serve students ([I.B.94](#), [I.B.95](#)).

Previously used to collect only aggregate data, TracDat is now being used to assess course SLOs at the student level. Since 2012, the English department has worked with the Office of Research, Planning and Accreditation (ORPA) to assess SLOs for all English courses. As depicted in the “Irvine Valley College Process to Disaggregating SLOs” diagram ([I.B.96](#)), the process is driven by the English department chair. ORPA supports the process by providing technical and research needs, including the disaggregation of collected data to identify disproportionately impacted students. In fall 2016, results were shared with the English department to help inform strategies to mitigate performance gaps among these identified students ([I.B.97](#)). The SLO disaggregation process was presented at the 2016 Third Annual SLO Symposium ([I.B.98](#)) and 2016 Strengthening Student Success Conference ([I.B.99](#)). To eventually implement this process across all instructional departments, ORPA is currently working with the Information Technology department to automate the assessment process ([I.B.100](#)).

The practice of examining and acting on equity data is integrated into existing institutional processes, including strategic planning. As outlined under Objective 1 of the College’s 2012-2014 Strategic Plan, completion is disaggregated by prepared versus unprepared ([I.B.101](#)). Moreover, IVC’s Student Equity Plan is a three-year plan that identifies and analyzes significant trends among student subgroups ([I.B.102](#)). Focusing on five success indicators—access, course completion, ESL and basic skills completion, degree and certificate completion, and transfers—ORPA applied the percentage point gap (PPG) methodology to data analyses. These analyses were disaggregated by age, gender, ethnicity, disability status, economically disadvantaged status, foster youth status, and veteran status to identify disproportionately impacted subgroups. The plan outlines a goal, objectives and activities (strategies) to close of achievement gaps. Reviewed and approved through the college wide research and action process, funded activities undergo evaluations to ensure the efficacy of strategies ([I.B.103](#)). IVC also recognizes that students may be members of multiple disadvantaged subpopulations. ORPA is currently conducting multiple regression analyses to examine characteristics that predict a lower likelihood of successful completion ([I.B.104](#)).

Analysis and Evaluation

IVC meets this standard based on its extensive work to develop a process in TracDat to assess and disaggregate SLOs by demographic characteristics. Although still in the beginning phase, this assessment process is integrated into the program review process, thusly enabling departments to participate in the resource request process with an equity framework. With the plan to implement an automated process college wide, IVC will be able to incorporate student equity into all learning outcomes assessments and program reviews.

Through its Student Equity Plan, the College additionally engages in ongoing efforts to identify and mitigate performance gaps. With a designated research and planning analyst for student equity related research, ORPA is planning to develop a student equity data dashboard in Tableau that allows the college community to easily identify impacted students to support their learning and achievement. These results will be shared with appropriate department faculty, staff, and administrators to facilitate dialogue on how to mitigate performance gaps. This dashboard will additionally be used for evaluative purposes to assess the effectiveness of funded student equity activities in increasing student success. The College continues to work toward increasing the incorporation of equity in outcomes assessments, planning, and resource allocation.

The College meets the standard.

Standard I.B.7 Assuring Academic Quality and Institutional Effectiveness: Academic Quality

The institution regularly evaluates its policies and practices across all areas of the institution, including instructional programs, student and learning support services, resource management, and governance, processes to assure their effectiveness in supporting academic quality and accomplishment of mission.

Evidence of Meeting the Standard

Irvine Valley College (IVC) relies on the collaborative effort of all stakeholders to regularly develop, implement, evaluate, and revise policies and practices that directly impact academic quality and support the mission of the College. The College's *Planning and Decision-Making Manual* outlines the various processes and practices each planning committee along with Academic Senate develops and regularly reviews ([I.B.105](#)). The Institutional Effectiveness Committee, for example, oversees Gainful Employment reporting practices and the regular evaluation of the program review process ([I.B.106](#)).

The College operates within a framework of board policies and administrative regulations established collegially by the district Board Policy and Administrative Regulation Committee

(BPARC) ([I.B.107](#)) and the College's strategic planning committees. In addition, at the district level, there are a number of committees that are involved in setting policies and practices that promote institutional effectiveness. Greater explanation of these planning committees is provided in Standard IV.

Through annual committee self-evaluation surveys ([I.B.108](#)) and the College strategic planning retreat ([I.B.109](#)), IVC regularly assesses the effectiveness of its cycle of evaluation, integrated planning, resource allocation, and re-evaluation. Committee self-evaluation surveys assess the functions and perceived effectiveness of the committee itself, which include the assessment of each committee's purpose as it relates to the college mission and how the committee functions within the larger college wide resource allocation process ([I.B.110](#)). Moreover, the entire college is additionally asked to evaluate the College's resource request and allocation process to gather input from faculty and staff members who are not members of a committee and not part of the resource request rating process ([I.B.111](#)).

Analysis and Evaluation

Through governance and committee structures, the College is able to communicate about, review, and improve policies and practices. These conversations include faculty, staff and administrators to ensure a transparent process where employees from throughout the College are able to provide input given their different roles on campus. Based on findings from committee evaluation surveys, the College strives to increase communication about policies and practices to promote campus wide dialogue to ultimately improve processes to support student achievement.

The College meets the standard

Standard I.B.1: Assuring Academic Quality and Institutional Effectiveness: Academic Quality

The institution broadly communicates the results of all of its assessment and evaluation activities so that the institution has a shared understanding of its strengths and weaknesses and sets appropriate priorities.

Evidence of Meeting the Standard

Numerous avenues exist at Irvine Valley College (IVC) for participation in and communication about college planning, assessment, and evaluation either directly by members of the campus community or through their representatives.

Governance Structure

By actively encouraging representation from all constituent groups on the various strategic planning committees, the College's governance structure allows for broad dialogue through which strengths and opportunities for improvement are identified ([I.B.112](#)). Moreover, committee calendars, agendas, minutes, and materials are posted on InsideIVC for all members of the college community to access.

An active venue for dialogue about learning outcomes assessment is the SLO Task Force, which includes representatives from a variety of academic disciplines, as well as student, research and student services representatives. Information presented at the task force is posted on the SLO Task Force intranet page ([I.B.113](#)) and also reported at department meetings, which promotes informed discussions about department assessment results and planning activities ([I.B.114](#)). Assessment results and activities are recorded and communicated broadly to the College through the comprehensive six-year program review ([I.B.115](#)).

Professional Development

Each major term commences with Professional Development Week, during which the "President's Address" highlights major accomplishments, strengths, and upcoming activities to support student learning. All employees are provided opportunities throughout the week to further develop their skills related to student learning ([I.B.116](#)). For example, workshops facilitated by the SLO coordinator provide IVC staff, faculty and administrators with the opportunity to engage in dialogue on assessment learning outcomes and best practices ([I.B.117](#) pages 5-6), ([I.B.118](#) page 5), ([I.B.119](#) page 6), ([I.B.120](#) page 5), which promote discussion on how to improve current processes.

Additionally, during the fall 2015 Professional Development Week, the Student Equity Task Force co-chair presented equity data and informed the college community on opportunities to address achievement gaps ([I.B.121](#)). As a follow up, the fall 2015 Professional Development Week offered a session focusing on how to best evaluate equity funded activities to measure effectiveness and identify additional opportunities, using assessment results to improve services offered to students ([I.B.122](#)). To ensure student equity related efforts are assessed as well as prioritized appropriately in the resource allocation process, the Director of Student Life and Equity meets with all potential equity fund recipients to review resource proposals to ensure alignment with the College's Student Equity Plan ([I.B.123](#)).

Research Office

To communicate results of assessment and evaluation activities to the institution, the Office of Research, Planning and Accreditation (ORPA) posts research findings in InsideIVC ([I.B.124](#)) as well as on ORPA's website ([I.B.125](#)). Both sites have survey results, research reports, and planning documents for the College and local community to view and utilize in planning efforts. ORPA additionally communicates with groups across the College regularly,

including planning committees, task forces, work groups, and departments. In addition to all five major strategic planning committees, participation in other work groups and task forces include the Student Equity Task Force ([I.B.126](#)), Student Success and Support Program Task Force ([I.B.127](#)), Online Education Task Force ([I.B.128](#)), Technology Advisory Task Force ([I.B.129](#)), and Basic Skills Work Group ([I.B.130](#)).

Analysis and Evaluation

Through the governance structure, professional development, and research office, the College continuously communicates assessment activities and results, fostering a culture where outcomes and data inform dialogue among and between constituent groups. Workshops and information sessions offered during the College's Professional Development Week in particular foster dialogue about assessment and evaluation activities, equipping the entire campus with necessary tools to effectively conduct learning outcomes assessments.

The expansion of ORPA provides increased support to these campus-wide efforts. With increased staffing, research is more represented on the various campus groups which ensures broad communication of evaluation results while also identifying areas that need to be assessed, thereby allowing the College to understand its strengths and weaknesses and establish priorities accordingly.

The College meets the standard.

Standard I.B.9 Assuring Academic Quality and Institutional Effectiveness: Academic Quality

The institution engages in continuous, broad based, systematic evaluation and planning. The institution integrates program review, planning, and resource allocation into a comprehensive process that leads to accomplishment of its mission and improvement of institutional effectiveness and academic quality. Institutional planning addresses short- and long-range needs for educational programs and services and for human, physical, technology, and financial resources.

Evidence of Meeting the Standard

Irvine Valley College (IVC) has an evidence-based, collaborative planning process that integrates program review with the resource allocation process. Through biennial program reviews, the College continuously engages in systematic evaluation that informs comprehensive program review and resource allocation ([I.B.131](#)).

As stated in Administrative Regulation 6100(b), the College has the responsibility to conduct program reviews of all instructional credit and non-credit programs. Moreover, IVC requires all student services departments to regularly conduct program reviews ([I.B.132](#)). Results from these reviews inform the College of successful practices as well as areas requiring improvement, which are used to improve the quality of programs, services, and overall institutional effectiveness. Biennial and comprehensive reviews highlight both short- and long-range needs. With TracDat V5, programs can more easily align program objectives with the College's strategic goals and objectives to ensure accomplishment of its mission.

Aside from program review, the Office of Research, Planning and Accreditation (ORPA) conducts biennial student and employee climate surveys to gather evidence about the effectiveness of IVC's programs and services ([I.B.133](#), [I.B.134](#), [I.B.135](#), [I.B.136](#), [I.B.137](#)). Results from these surveys are discussed at the annual strategic planning retreat, where college administrators discuss how to address areas of dissatisfaction to improve both employees' and students' experiences at IVC ([I.B.138](#)). Annual committed self-evaluation survey results are also presented at the strategic planning retreat to discuss how to best facilitate effective committee meetings by engaging committee members ([I.B.139](#)). To address the needs of online students, the annual distance education survey collects students' feedback and evaluation of the College's online student services, such as admissions and records, registration via MySite, and the bursar's office ([I.B.140](#), [I.B.141](#)).

With the various initiatives and grants awarded to the College, IVC is working on an Integrated Planning Matrix to guide efforts to integrate SEP, SSSP, and BSI/BST with other college initiatives ([I.B.142](#)). Coordinators for the College's various initiatives, grants, and categorical programs continue to communicate to identify opportunities for collaboration and reduction in duplicated efforts. This document is being reviewed by the Institutional Effectiveness Committee (IEC) and, as a living document, continues to be revised to reflect current activities and these grant and initiative ([I.B.143](#)).

Program reviews drive the College's resource request and allocation process. All resource requests must be substantiated by and directly linked to program reviews. Without this direct link, requests must provide evidence to support the requests for human, physical, technology, and financial resources ([I.B.144](#)). At the 2015 Strategic Planning and Accreditation Council (SPAC) strategic planning retreat, an analysis of resource requests revealed that resource requests linked to increasing completion rates (Strategic Objective 2.1) were consistently among the top-funded resource requests at the College ([I.B.145](#)). With TracDat V5 now hosted locally, IVC is beginning dialogue to customize the application to integrate the program review with the resource request process to more clearly document progress toward achieving the College's strategic goals ([I.B.146](#)).

As the College works on developing this process, evaluation results from the annual resource request process ([I.B.147](#)) provide insight and guidance on how to create a more streamlined, transparent process. Over the past two years, the process has been refined through efforts by

the vice president for Administrative Services and Information Technology Department, with input from the strategic planning committees ([I.B.148](#), [I.B.149](#), [I.B.150](#)).

The following list outlines the College's major planning activities, retreats, summits, etc. for the past several years:

- 2016 IVC Strategic Planning Retreat ([I.B.151](#))
- 2016 District wide Planning Council Retreat ([I.B.152](#))
- 2016 High School Principals and Counselors Summit ([I.B.153](#))
- 2016 Student Equity Summit ([I.B.154](#))
- 2016 Powering the Future ([I.B.155](#))
- 2015 High School Principals Summit ([I.B.156](#))
- 2015 SPOWG meetings on Mission and Strategic Plan action items ([I.B.157](#), [I.B.158](#), [I.B.159](#), [I.B.160](#))
- 2015 IVC Strategic Planning Retreat ([I.B.161](#))
- 2015 DWPC Strategic Planning Retreat ([I.B.162](#), [I.B.163](#))
- 2015 Multiple Measures Summit (Cypress) ([I.B.164](#))
- 2014 IVC Strategic Planning Retreat ([I.B.165](#), [I.B.166](#), [I.B.167](#))
- 2014 IVC Strategic Objective Gallery Workshop ([I.B.168](#), [I.B.169](#))
- 2014 High School Principals Summit ([I.B.170](#))
- 2014 Multiple Measures Summit ([I.B.171](#))
- 2014 ATEP Summit ([I.B.172](#))
- 2013-2014 External Scan ([I.B.173](#))

Analysis and Evaluation

Irvine Valley College has made significant efforts to develop an integrated program review, planning and resource allocation process but still recognizes improvements can be made to further integrate and streamline processes. A high level of interest and activity centers on better integrating and coordinating planning and funding efforts in support of student learning and achievement. The Office of Research, Planning and Accreditation will continue to collect feedback on the resource request and allocation process in an annual survey to inform the integration process plan. Additional information on efforts to improve the resource allocation process can be found in the Quality Focus Essay.

The College meets the standard.

Standard I.C: Institutional Integrity

Standard I.C.1 Institutional Integrity

The institution assures the clarity, accuracy, and integrity of information provided to students and prospective students, personnel, and all persons or organizations related to its mission statement, learning outcomes, educational programs, and student support services. The institution gives accurate information to students and the public about its accreditation status with all of its accreditors.

Evidence of meeting the standard

The institution assures the clarity, accuracy and integrity of information provided to students in its annual review of the catalog by the Office of Instruction, division deans, department chairs, research office, and others, prior to publishing ([I.C.1](#), [I.C.2](#), [I.C.3](#), [I.C.4](#), [I.C.5](#), [I.C.6](#)). catalog content is updated annually with addenda added online as needed. The college catalog is available on our website, in the college bookstore, and in the library ([I.C.7](#)).

Institutional Learning Outcomes are presented in the college catalog ([I.C.8](#)). Institutional Effectiveness Partnership Initiative (IEPI) indicators are also posted on the college website ([I.C.9](#)). IVC's mission statement is posted on the college website and in the college catalog ([I.C.10](#), [I.C.11](#)). As part of the course outline of record, learning outcomes for courses appear in the detail for each course within the online class schedule ([I.C.12](#); [I.C.13](#)). Information about educational programs is available in the printed and online college Catalog, department websites, and college marketing materials. Information on student support services is available on each department's website ([I.C.14](#)).

The College maintains an accurate, updated, and comprehensive accreditation web page ([I.C.15](#)). The Accreditation page link can be found in the web site's footer, meaning that it is only one click away from any page on the College's web site. The Accreditation web page provides the campus community and the public access to letters from the Accrediting Commission for Community and Junior Colleges (ACCJC), College self-evaluations, interim reports, follow-up visits, and evidence related to these reports and activities ([I.C.16](#)).

Analysis and Evaluation

The College has several mechanisms for ensuring the clarity, accuracy, and integrity of information provided to students, the campus community, and the public regarding college programs, courses, schedules, learning outcomes, services, and mission statement. The college web site and the college catalog are the most important methods whereby this information is provided. The College's Accreditation status and relevant documentation is

accessible with one click from any College web page. An annual review process ensures that information published in the college catalog is accurate and current.

The College meets the standard.

I.C.2 Institutional Integrity

The institution provides a print or online catalog for students and prospective students with precise, accurate, and current information on all facts, requirements, policies and procedures listed in the “Catalog Requirements” (see endnote).

Evidence of Meeting the Standard

Irvine Valley College provides a catalog in both print and online formats for students and prospective students with precise, accurate and current information on all facts, requirements, policies and procedures ([I.C.17](#)). The catalog is updated annually in print; an identical digital version of the catalog is available in a PDF format on the college website. The availability of the digital version via a link on the college website homepage ensures the catalog information will be easily available to current students, prospective students, employees, community members, and the general public.

The first page of the printed catalog states “For catalog updates and addenda, please refer to www.ivc.edu/catalog.” This statement addresses any issues, curriculum changes or content updates that may have occurred since the final approved catalogs have been printed ([I.C.18](#)).

The annual review process described in I.C.1 ensures the catalog, whether printed or online, provides precise, accurate and current information on all facts, requirements, policies and procedures required by Eligibility Requirement 20 (ER 20). The information in the current college catalog is broken up into the following sections and sub-sections:

Introduction ([I.C.19](#))

- Official Name, Address, Telephone number, and Website Address of the College
- Irvine Valley College’s Accreditation Status
- Academic Calendar
- Table of Contents
- South Orange County Community College District’s Vision, Missions, Core Values and District wide goals
- Board of Trustees
- District Administration

- President's Message
- Irvine Valley College's Vision, Mission, Strategic Goals and Objectives
- College Background, Governance and Funding
- Statement on Freedom of Expression, Civility and Mutual Respect
- Institutional Educational Goals and General Education/Institutional Learning Outcomes
- College Administration, names and contact information
- Academic Schools/Instructional Offices

Admissions and Registration ([I.C.20](#))

- Admission
- Application
- Resident Classification
- International Students
- Student Success and Support
- Assessment and Placement
- Registration
- Prerequisites
- Adding Classes
- Tuition and Fees
- Refunds

Courses ([I.C.21](#))

- Course Information includes course numbers, C-ID numbers explanation, UC Transfer Statements, coursework standards and expectation as well as repeatable course models
- Course Detailed information on each course including Course ID, Course Title, Units, weekly class hours, lecture, laboratory and/or learning center, UC/CSU transferability information, recommended preparation and course description.

Degrees, Certificates and Transfer Planning ([I.C.22](#))

- Degree and Certificates
- Degrees with an Area of Emphasis
- Degree and Certificate List by Department
- Individual Listing of Degree or Certificate with following:
- School Name, Dean, Academic Chair and Faculty
- Courses Description
- Major Description

- Program Student Learning Outcomes Description
- Potential Careers Listing
- Available Degree and/or Certificates with a listing of required courses and recommendations
- Earning a Certificate
- Earning an Associated Degree
- Program Length
- Graduation Requirements
- General Education
- IVC Associate Degree
- CSU Certification
- IGETC Certification
- University of California (UC) Course List
- Cross Enrollment
- Transfer Planning
- California State University
- University of California

Policies and Standards ([I.C.23](#))

- Academic Policies and Standards
- Academic Freedom
- Catalog Rights
- Courseload Limits
- Basic Skills Coursework Limit
- Academic Honesty and Dishonesty
- Final Examination
- Grades
- Pass/No Pass Option
- Graduation Honors
- Dean's List
- Credit by Examination
- AP, CLEP and IB Credit
- Credit from Other Institutions
- Academic Renewal
- Probation and Dismissal
- Student Rights
- Grievance and Complaint Procedures
- Sexual Harassment Policy

- Student Code of Conduct

Student Resources (I.C.24)

- Financial Aid
- Counseling Services
- Veterans Services
- Supportive Services
- Online Services and Distance Education
- Bookstore
- Learning Centers for Students
- Library
- Associated Students
- Honors Program/Honor Societies
- Intercollegiate Athletics
- Additional Programs/Resources

Who's Who (I.C.25)

Administrators and Managers, names and degrees

Full-time Faculty, names and degrees

Professors and Administrators Emeritus

Part-time Faculty, names and degrees

Index (I.C.26)

Campus Map/Location (I.C.27)

Analysis and Evaluation

The College provides a catalog in both print and online for students and prospective students with precise, accurate and current information on the College mission, degree, programs and courses, as well as admission requirements, policies, and procedures. The Catalog is published annually and reviewed for accuracy according to an established timeline and procedure, ensuring integrity in communication with public and providing all information required by Eligibility Requirement 20.

The College meets the standard.

I.C.3 Institutional Integrity

The institution uses documented assessment of student learning and evaluation of student achievement to communicate matters of academic quality to appropriate constituencies, including current and prospective students and the public.

The California Community College Student Success Scorecard tracks student achievement, including persistence, degree and transfer outcomes, and CTE completion and transfer rates. Irvine Valley College (IVC) publishes a link to its Scorecard results on the college website's home page (I.C.28). Student Success Scorecard data is also presented to the Board of Trustees annually (I.C.29, I.C.30). The college catalog also includes information on the Scorecard completion metrics and the *Student Right to Know* completion data (I.C.31). Accreditation status is available only one click from the College's home page via the footer or via the "About" drop-down menu (I.C.32). Learning and evaluation results are relayed to college constituents via Instructional Council, Academic Senate, and strategic planning committees (I.C.33, I.C.34, I.C.35, I.C.36, I.C.37). Student performance data is also a critical component of program review (I.C.38).

There are many facets, and thus approaches, for evaluating student learning and student success at IVC. Among these, the College evaluates and documents in TracDat student learning outcomes (SLOs) at the course level and these are mapped to program and institutional learning outcomes (I.C.39). For library and counseling services SLOs are evaluated and documented in TracDat as well, using appropriate assessments rather than course skill or information mastery (I.C.40).

Student learning and student achievement is documented regularly for assessment of longitudinal trends. One of the institution's most important key performance indicators is the completion rate of students. Transfer completion has been an area of particular emphasis at IVC, which has one of the highest transfer and completion rates of any community college in California (I.C.41). This rate, as well as other measures of academic quality, and successful student learning and completion of individual educational and training goals are communicated to the appropriate constituencies, including current and prospective students and the public, on the website (I.C.42), through social media (I.C.43), and other marketing and outreach methods and materials (I.C.44). Within the College, these and other data are made available to students and the public (I.C.45), strategic planning committees (I.C.46), committees working on specific projects such as student equity and other aspects of student success in basic skills, enrollment and retention and further disseminated to shared governance groups by their representatives on these working committees (I.C.47). College employees may also request new research or access published research studies, survey results, and planning documents on the Office of Research, Planning and Accreditation intranet page and web page, as well as access the District data mart (inFORM) to run reports on a wide array of topics (I.C.48, I.C.49).

Analysis and Evaluation

Irvine Valley College relies extensively on data to guide planning, resource allocation and decision-making. As the evidence demonstrates, data analysis underpins virtually all major college plans and functions and is shared widely among college constituencies, including students and the general public.

The College meets the standard.

I.C.4 Institutional Integrity

The institution describes its certificates and degrees in terms of their purpose, content, course requirements, and expected learning outcomes.

Evidence of Meeting the Standard

Irvine Valley College (IVC) publishes certificate and degree information in its printed and online catalog, website, and in promotional materials. The section of the catalog identified as *Degrees, Certificates and Transfer Planning* provides students with comprehensive information on certificate and program offerings and requirements including: degree and certificate requirements; general education requirements for IVC, CSU, and UC/Intersegmental General Education Transfer Curriculum (IGETC); transferability of courses to the CSU and UC; cross enrollment at a CSU or UC campus; transfer planning; a location map for California Community Colleges; and a location map and admissions requirements for CSU and UC schools ([I.C.50](#)).

Certificate and degree program information in the *Programs and Majors* section of the printed and online college catalog is organized by school and discipline. The following information is provided:

- Course – an overview of the content of the program
- Major – a description of what students should expect to learn and the overall purpose of the major
- Program Learning Outcomes – expected learning outcomes to be achieved upon completion of the program
- Potential Career – a description of applicable academic fields, careers and vocations for the degree and/or certificate
- Course requirements – a listing of all courses required to complete the program

In addition to the college catalog, certificate and degree information may be found on other relevant pages on IVC's website ([I.C.51](#)). For instance, each school listed in the *Academic Schools* section of the website provides links to individual academic program pages which

contain information on specific programs and degrees ([I.C.52](#)). The Office of Admissions and Records provides timelines for evaluating certificates and degrees on its *Graduation* site ([I.C.53](#)). The Career Center provides employment-related information by major on its *What Can I Do With This Major?* site ([I.C.54](#)). The College also provides a full listing of programs along with Gainful Employment data including cost, duration and employment statistics on its Gainful Employment site ([I.C.55](#)). Certificate and degree information is also provided in published materials such as the Student Handbook ([I.C.56](#)), in academic program brochures ([I.C.57](#)) and certificate flyers ([I.C.58](#)) provided to students during outreach events or when meeting with counselors and in outreach materials such as *How to Become an IVC Student* ([I.C.59](#)). Students may also view course requirements for degrees and certificates in their MySite portal accounts when using My Academic Plan (MAP) ([I.C.60](#)).

Analysis and Evaluation

The college catalog, supplemented by various pages on the IVC website, provide descriptions of all IVC's certificates and degrees, including their content, expected learning outcomes, course requirements, purpose, and likely associated career paths.

The College meets the standard.

I.C.5 Institutional Integrity

The institution regularly reviews institutional policies, procedures, and publications to assure integrity in all representations of its mission, programs, and services.

Evidence of Meeting the Standard

The College reviews its institutional policies, procedures and publications to assure alignment with its mission, programs and services based on the established flowchart within the *IVC Planning and Decision-Making Manual* ([I.C.61](#)). The College's Strategic Planning and Accreditation Council (SPAC) oversees four strategic planning committees: Budget Development and Resource Planning Committee (BDRPC); Academic Planning and Technology Committee (APTC); Student Success and Access, Matriculation, Marketing and Outreach (SSA/MO); and Institutional Effectiveness Committee (IEC). SPAC is charged with establishing mission-based strategic planning goals and objectives. SPAC also oversees the establishment of college practices and reviews district policies and administrative regulations, providing critical input to the district wide Board Policy and Administrative Regulation Advisory Council (BPARC) ([I.C.62](#)). College representatives also sit on BPARC, which makes recommendations to the chancellor as representatives of the colleges and of District Services. At IVC a regular part of each strategic planning committee's meeting agenda is a review of board policies being updated or created. Each committee supports the

standard by establishing agenda items on the regular review of policies, procedures, and publications among its meeting topics ([I.C.63](#), [I.C.64](#), [I.C.65](#), [I.C.66](#)). Additionally, Academic Senate is actively engaged with review of Board Policies and Administrative Regulations, particularly those concerning teaching and learning ([I.C.67](#)). Once Board Policies and Administrative Regulations have been reviewed and adopted, the date of the review is noted at the bottom of the document along with all prior review dates ([I.C.68](#)). The Office of Marketing, Public Information and Creative Services (OMPICS) offers a wide range of services—including design and editorial, broadcast, public relations, crisis communication, social media and the college website—to support the marketing of IVC to both internal and external audiences. The OMPICS staff designs and produces the print and electronic materials that adhere to the IVC branding standards and works collaboratively with members of the campus community to ensure the content is accurately reflected in all communications, assuring the integrity of IVC's mission, programs and services across platforms ([I.C.69](#)). The OMPICS also maintains the design, layout and architecture of the IVC website. The OMPICS web team works with each department to generate web content in a clear and concise manner that stays true to IVC's identity. Department staff are responsible for the accuracy and maintenance of the information displayed on their pages and are encouraged to work with the OMPICS web team to update and/or create web pages ([I.C.70](#)).

Analysis and Evaluation

The College has established procedures and committees to regularly review board policies, procedures, and publications. In addition to the catalog review procedure described and documented in Standard IC.1, the college staff also regularly review the mission statement, as described in Standard A.1, and conduct regular program review for both academic and student support services programs, as described in Standard IB.5. The quality, accuracy and consistency of digital and print publications is ensured by practices and guidelines put in place by the Office of Marketing, Public Information, and Creative Services.

The College meets the standard.

I.C. Institutional Integrity

The institution accurately informs current and prospective students regarding the total cost of education, including tuition, fees, and other required expenses, including textbooks, and other instructional materials.

Evidence of Meeting the Standard

The Irvine Valley College (IVC) website “Student” tab includes a section of links called “Paying for College” ([I.C.71](#)) that directs students to relevant links including the Bursar’s Office ([I.C.72](#)) with links explaining costs and payment options, the Financial Aid Office ([I.C.73](#)), and a separate link for information about scholarships ([I.C.74](#)). In the on-line schedule, textbook information is posted, including links to the Bookstore ([I.C.75](#)). College staff also provide a “How to Pay for College” workshop and the PowerPoint slides for this workshop are available on the college website ([I.C.76](#)) and the College Net Price Calculator is available online to help students estimate the cost of their attendance at IVC ([I.C.77](#)).

Information about tuition, fees and payment options are available on the Bursar’s Office website ([I.C.78](#)), the Student Handbook [I.C.79](#), and in the college catalog. Information on financial aid options, including cost of attendance ([I.C.80](#)) and net price calculator ([I.C.81](#)), are available on the Financial Aid website. The College accurately informs current and prospective students about the total cost of education, including fees, tuition, textbooks and other potential required fees, and students are informed of specifics in the class syllabus covered during the first class meeting ([I.C.82](#)).

Information about required textbooks is available in the online class schedule by clicking on “Book Info.” This information is provided by the IVC Bookstore (Follet) and details the ISBN, author, copyright year, publisher, rent or buy options, in-stock availability and the Bookstore’s retail price. Disclosure statements, including estimated cost of fees and books for Career Technical Programs are available on the college’s Gainful Employment website ([I.C.83](#)).

Analysis and Evaluation

Irvine Valley College uses multiple modalities to accurately inform and educate both current and prospective students about their total cost of education, including tuition, fees, textbooks, and other relevant costs.

The College meets the standard.

I.C.7 Institutional Integrity

In order to assure institutional and academic integrity, the institution uses and publishes governing board policies on academic freedom and responsibility. These policies make clear the institution’s commitment to the free pursuit and dissemination of knowledge, and its

support for an atmosphere in which intellectual freedom exists for all constituencies, including faculty and students.

Evidence of Meeting the Standard

The College abides by an Academic Freedom Statement, published in the online and printed catalog ([I.C.84](#)), that is aligned with District Board Policy 6120, Academic Freedom ([I.C.85](#)). The College also provides a Statement of Freedom of Expression, Civil Discourse, and Mutual Respect on the website and in the Policy and Standards section of the catalog ([I.C.86](#)).

Board Policy 8000 (Speech and Advocacy [I.C.88](#)) ensures an environment conducive to student learning without disruption while guaranteeing freedom of speech and first amendment rights as well as areas where demonstrations are permitted.

Analysis and Evaluation

The College is committed to academic freedom, freedom of expression, and civil discourse as is clearly stated in the relevant policies, statements, and guidelines.

The College meets the standard.

I.C.8 Institutional Integrity

The institution establishes and publishes clear policies and procedures that promote honesty, responsibility and academic integrity. These policies apply to all constituencies and include specifics relative to each, including student behavior, academic honesty and the consequences for dishonesty.

Evidence of Meeting the Standard

In accordance with Board Policy 5401 (Student Conduct) and Administrative Regulation 5401 (Standards of Student Conduct), the College publishes a statement on Academic Honesty and Dishonesty in the catalog ([I.C.89](#), [I.C.90](#), [I.C.91](#)) AR 5401, and the statements on academic honesty include definitions of such terms as falsification, plagiarism, and cheating. They also make clear students' responsibilities for ethical conduct ([I.C.92](#)). The Student Code of Conduct is also available on the Office of Student Services website ([I.C.93](#)) and the Campus Policies website ([I.C.94](#)). The Student Handbook also provides guidance on the student code of conduct, the College's smoke-free campus policy, sexual harassment, gender equity, grievance procedures (including – Title IX Notice, Section 504/Americans

with Disabilities Act Compliant/Grievance Procedure), Facebook posting guidelines, and possible disciplinary actions ([I.C.95](#)).

Students are informed they may be disciplined for any of the following behaviors:

Disruptive behavior, willful disobedience, habitual use of profanity, assault, battery or threat of violence, unsafe behavior, unlawful use, sale or possession of controlled substances, lewd or indecent conduct, sexual assault, possession of firearms, explosives, dangerous chemicals or weapons, unauthorized recording or dissemination of academic presentations, misrepresentation of oneself, academic dishonesty including but not limited to falsification, plagiarism or cheating which compromises academic integrity.

Sanctions may be a verbal reprimand, a written reprimand, a requirement to receive a mental health clearance, placement on disciplinary probation, and suspension or expulsion, depending the severity and frequency of the offense ([I.C.96](#)).

Analysis and Evaluation

The College has adopted policies and procedures to promote academic honesty and provide for potential sanctions for violations. The policies and procedures are widely available in print and online and are communicated to students through several channels, including the catalog, the Student Handbook, and the college website.

The College meets the standard.

I.C.9 Institutional Integrity

Faculty distinguish between personal conviction and professionally accepted views in a discipline. They present data and information fairly and objectively.

Evidence of Meeting the Standard

The District has policies in place to ensure faculty and other employees act in a fair, objective, and ethical manner.

Board Policy 8000 states, in part:

The District desires to provide the best available curriculum and facilities in order to encourage its students to matriculate, study, graduate, obtain a place of employment, or go on to obtain a further degree...Maintenance of an atmosphere conducive to learning on campus in order to further the educational process is essential to the District, its students, faculty, and staff. This policy is intended to further the District's

substantial interests in 1) protecting student health and safety; 2) preventing substantial disruption of the learning environment and the orderly operation of District campuses; and 3) preserving District facilities for their intended use...

([I.C.97](#))

Additionally, Board Policy 6120 states:

The SOCCCD is committed to the free pursuit and dissemination of knowledge, and it seeks to foster the integrity of the teaching-learning process. The SOCCCD Board of Trustees, administration, faculty, staff, and students all bear an obligation to protect, preserve, and promote academic freedom within the institution ([I.C.98](#)).

The College's statement on Freedom of Expression, Civility and Mutual Respect, published in the catalog, describes the importance of mutual respect and recognizes the rights of others even in an environment consummately dedicated to freedom of speech:

The Irvine Valley College community recognizes the important role of freedom of expression, civility and mutual respect in fostering a healthy and productive college environment. Therefore, the College encourages an atmosphere of professionalism and cooperation, in which each member's roles and responsibilities are understood and appreciated, and in which the free expression of all opinions, beliefs and ideas is encouraged and respected ([I.C.99](#)).

Moreover, the IVC Faculty Manual (p. 16) clarifies the responsibility of faculty to deliver instruction that meets the established learning objectives and outcomes for a class:

All faculty members are expected to teach the content identified in the Course Outline of Record (COR). The learning objectives, methods of evaluation, and course content components of the COR are published on the details page of the on-line schedule of classes and are thus, available to view by anyone with internet access ([I.C.100](#)).

Additionally, as stated in the catalog, students have the right to be protected from harassment, insults, and abusive or unlawful behavior. Any college personnel or students found to be in violation of these standards will face disciplinary action that is "prompt, effective, and commensurate with the severity of the offense" ([I.C.101](#)).

Analysis and Evaluation

The District has policies, standards, and procedures in place to ensure faculty and other employees are fair, civil, and objective in their speech and behavior.

The College meets the standard.

I.C.10 Institutional Integrity

Institutions that require conformity to specific codes of conduct of staff, faculty, administrators, or students, or that seek to instill specific beliefs or world views, give clear prior notice of such policies, including statements in the catalog and/or appropriate faculty and student handbooks.

Evidence of meeting the standard

Irvine Valley College is a public institution open to all students regardless of race, religion or creed. The College does not seek to instill specific beliefs or world views. Moreover, aside from promoting conduct conducive to learning, the College and the District do not promote any particular codes of conduct. The commitment to an open, pluralistic environment is evident in the College's Statement on Freedom of Expression, Civility and Mutual Respect:

To achieve these goals, the College invests its resources in expressing its commitment to free expression, civility, and mutual respect in college publications, including college handbooks and manuals; in proactive education for all employees; by sponsoring projects and activities that bring people together in a spirit of hospitality, service, appreciation, and camaraderie; through regular open forums intended to foster the exchange of ideas; through maintaining open, inclusive and transparent decision-making processes, with regularly published results; and through a peer-driven process—in which all of the governance groups participate and contribute—for dispute resolution, one focused in finding mutually agreeable solutions ([I.C.103](#)).

Additionally, a primary goal of the District-wide strategic plan is to “foster an environment characterized by creativity, innovation, respectful interactions and collaboration” ([I.C.104](#)).

Analysis and Evaluation

The mission and vision of Irvine Valley College and the mission, vision, and values of the South Orange County Community College District clearly show that the College and the District do not seek to instill specific beliefs or worldviews.

The College meets the standard.

IC.11 Institutional Integrity

Institutions operating in foreign locations operate in conformity with the Standards and applicable Commission policies for all students. Institutions must have authorization from the Commission to operate in a foreign location.

This standard does not apply to Irvine Valley College.

I.C.12 Institutional Integrity

The institution agrees to comply with Eligibility Requirements, Accreditation Standards, Commission policies, guidelines, and requirements for public disclosure, institutional reporting, team visits, and prior approval of substantive changes. When directed to act by the Commission, the institution responds to meet requirements within a time period set by the Commission. It discloses information required by the Commission to carry out its accrediting responsibilities.

Evidence of Meeting the Standard

Irvine Valley College (IVC) has striven to comply with all Commission requirements since it was first accredited. Where recommendations have been made in the past, the College and District have taken expeditious action to address them. The president, accreditation liaison officer (ALO), and the Accreditation Oversight Work Group keep the Board of Trustees and the college community informed about changes in accreditation standards and the College's self-evaluation efforts and plans ([I.C.105](#), [I.C.106](#)).

During the last Accreditation cycle in 2010, the College submitted a self-evaluation report. The site visit occurred shortly thereafter. In 2011 the College provided further updates in its Accreditation Midterm Report in response to the visiting team's recommendations. Both reports provide evidence of the College's commitment to comply with eligibility requirements ([I.C.107](#)). The College also submitted a substantive change proposal for online education, adult English as a second language, global studies and biotechnology in fall 2016 ([I.C.108](#)).

In preparation for the current comprehensive self-evaluation and site visit, the college community engaged in a broad-based effort over an extended period of time. The self-evaluation process included the following efforts, activities, and presentations ([I.C.109](#)):

- | | |
|----------------------|---|
| August 1, 2015 | Accreditation Update – Flex Week |
| August 1, 2015 | Accreditation Think Tank – Flex Week |

- October 24, 2016 Board Presentation – Accreditation Process
- October 25, 2016 Third Party Comment – Forum and Webpage Launch

For purposes of communicating with the public and the campus community regarding the College's Accreditation status, the College maintains an Accreditation webpage. This webpage can be accessed from a link in the college website footer; it is therefore only one click away from any page on the IVC website. The Accreditation web page is publicly accessible and contains all documents necessary for complete disclosure including communications from the ACCJC, reports, substantive changes, and other supporting documents ([I.C.110](#)).

Analysis and Evaluation

Irvine Valley College complies with all ACCJC standards, guidelines, and requirements. All required reports and other documents are submitted to the Commission in a timely manner. The college website maintains an archive of past self-evaluation reports and other accreditation documents. Accreditation at IVC is an ongoing process, and the College continuously engages in the process of staying current with accreditation requirements in order to meet and, where possible, exceed them.

The College meets the standard.

I.C.13 Institutional Integrity

The institution advocates and demonstrates honesty and integrity in its relationships with external agencies, including compliance with regulations and statutes. It describes itself in consistent terms to all of its accrediting agencies and communicates any changes in its accredited status to the Commission, students, and the public.

Evidence of Meeting the Standard

Irvine Valley College (IVC) is accredited by the Accrediting Commission for Community and Junior Colleges of the Western Association of Schools and Colleges. The College has been continuously accredited since 1986. The latest Accreditation self-evaluation and associated evidence is available to the public on IVC's Accreditation web page. The College also submitted a substantive change proposal for online education and new programs in September 2016 ([I.C.111](#)). Through full disclosure on its Accreditation page, the College demonstrates its commitment to honest and open relationships with external agencies and compliance with regulations, statutes, and rules set forth by governmental agencies.

Consistent public access to such information provides evidence of the College's commitment to honesty and integrity in its relationships with external agencies and the general public, including compliance with eligibility requirements and other regulations ([I.C.112](#)).

IVC has one program that requires external Accreditation: the paralegal program. As paralegal is a new program at IVC, the College has recently begun the accreditation process and will be having its initial site visit on December 5th and 6th, 2016. Other college programs, such as Athletics and Financial Aid, comply with additional state and federal regulations. The Athletics program complies with the rules and regulations of the California Community College Athletic Association (CCCAA). To remain in good standing with the CCCAA IVC completes an external program review report and files it with the Orange Empire Conference ([I.C.114](#)). Athletics also complies with federal Title IX equity regulations ([I.C.115](#)) and submits an Equity in Athletics Disclosure Act report to the federal Office of Postsecondary Education ([I.C.116](#)). The College also complies with regulations to post Institutional Effectiveness Partnership Initiatives (IEPI) goals ([I.C.117](#)), links to the Student Success Scorecard ([I.C.118](#)), Gainful Employment disclosure ([I.C.119](#)), and federal attendance cost information disclosure requirements ([I.C.120](#)).

IVC's Financial Aid Office communicates with the U. S. Department of Education, providing documentation on a regular basis in order to comply with federal Title IV regulations regarding the administration of federal financial aid programs. In recognition of the College's compliance and good standing, the College is certified with the U.S. Department of Education to provide federal financial aid to students ([I.C.121](#)). The College is also in good standing with the California Student Aid Commission, allowing students to apply for and obtain CalGrants ([I.C.122](#)).

Analysis and Evaluation

As the documentation on the College's Accreditation web page indicates, IVC adheres to the Eligibility Requirements, Accreditation Standards and Commission policies of the ACCJC. Moreover, IVC describes itself in identical terms to each of its accrediting agencies. The College's website is used to communicate any changes in its accredited status and provide disclosure for any information required by the Commission. The College complies with Commission requests, directives, decisions and policies, and makes complete, accurate, and honest disclosure. Moreover, the College complies with state and federal reporting and requirements.

The College meets the standard.

I.C.14 Institutional Integrity

The institution ensures that its commitments to high quality education, student achievement and student learning are paramount to other objectives such as generating financial returns for investors, contributing to a related or parent organization, or supporting external interests.

Evidence of Meeting the Standard

In compliance with Title 5, Irvine Valley College (IVC) operates as a non-profit organization supported by local real estate taxes ([I.C.123](#)). As a non-profit institution, the College has no responsibility or mechanism for generating financial returns for investors, nor does it support any external interests beyond serving its students, its community, and its mission. IVC's commitment to high-quality education, student achievement, and student learning is evident in its mission statement which guides its integrated planning with a focus on student learning, completion, and closing the achievement gap ([I.C.124](#), [I.C.125](#)). IVC also provides innovative, high quality student support services ([I.C.126](#), [I.C.127](#)) and extensive staff and faculty professional development ([I.C.128](#), [I.C.129](#), [I.C.130](#)) in part through participating in major initiatives such as guided pathways and basic skills transformation ([I.C.131](#)).

Analysis and Evaluation

Irvine Valley College is a non-profit college whose primary function is to enable its students to learn and achieve their educational goals. All institutional resources are dedicated to supporting this mission, not to generating financial returns or to supporting external interests.

The College meets the standard.

Standard II: Student Learning Programs and Support Services

The institution offers instructional programs, library and learning support services, and student support services aligned with its mission. The institution's programs are conducted at levels of quality and rigor appropriate for higher education. The institution assesses its educational quality through methods accepted in higher education, makes the results of its assessments available to the public, and uses the results to improve educational quality and institutional effectiveness. The institution defines and incorporates into all of its degree programs a substantial component of general education designed to ensure breadth of knowledge and to promote intellectual inquiry. The provisions of this standard are broadly applicable to all instructional programs and student and learning support services offered in the name of the institution.

Introduction

Irvine Valley College (IVC) offers programs and services that are aligned with the College's mission and established standards for higher education institutions. In response to IVC's 2010 Accreditation Report, two of the twelve ACCJC recommendations required for reaffirmation of Accreditation centered on Student Learning Outcomes (SLO) development, assessment, and use of results.

- College Recommendation 1: *In order to ensure that the college will meet the Commission's expectations regarding Student Learning Outcomes by 2012, the team recommends that the college expand the identification of assessment strategies for SLOs, implement those strategies, and use the results for continuous quality improvement.*
- College Recommendation 2: *In order to improve, the team recommends that the effectiveness in producing student learning outcomes—the development and assessment of learning outcomes—be a required component, routinely incorporated in the evaluation of faculty and others directly responsible for student progress toward achieving stated student learning outcomes*

As outlined in the 2013 Irvine Valley College Midterm Report ([II.A.1](#)), and the discussion that follows in Standard II.A.3 (where evidence of meeting the standard is presented), IVC has and continues to make improvements in the area of outcomes assessment.

The College has expanded strategies for improved outcomes assessment by:

- Developing comprehensive timelines for robust student learning and administrative unit outcomes and reporting as part of the Program Review Process ([II.A.2](#), [II.A.3](#)).
- Allocating resources to support a SLO Coordinator and SLO Liaisons to assist faculty in their efforts to maintain sustained SLO assessment cycles and dialogue ([II.A.4](#)).
- Allocating institutional resources to purchase TracDat to input outcomes, assessment results, and use results; and to generate reports ([II.A.5](#), [II.A.6](#), [II.A.7](#), [II.A.8](#), [II.A.9](#)).

- Mapping course-level SLOs to program and institutional SLOs ([II.A.10](#)).
- Offering professional development week presentations and training sessions for faculty, staff, and administrators ([II.A.11](#), [II.A.12](#)).
- Including SLO development and assessment as a component of faculty performance evaluations ([II.A.13](#)).
- Including SLOs on course syllabi ([II.A.14](#), [II.A.15](#))
- Creating a SLO Task Force, which meets twice per month and reports to the Institutional Effectiveness Committee and the Academic Senate ([II.A.16](#), [II.A.4](#), [II.A.17](#), [II.A.18](#))

Standard II.A: Instructional Programs

Standard II.A.1. Instructional Programs

All instructional programs, regardless of location or means of delivery, including distance education and correspondence education, are offered in fields of study consistent with the institution's mission, are appropriate to higher education, and culminate in student attainment of identified student learning outcomes and achievement of degrees, certificates, employment, or transfer to other higher education programs.

Evidence of Meeting the Standard

Irvine Valley College offers instructional programs that are consistent with the College's mission and offered in fields of study appropriate for higher education. A comprehensive list ([II.A.19](#)) of the programs that are offered at IVC is available to students and the public on the catalog page of IVC's website: www.ivc.edu/catalog.

IVC offers 91 Associate Degrees and 67 Certificates ([II.A.19](#)). Regardless of location or means of delivery, IVC ensures all instructional programs culminate in student attainment of identified student learning outcomes. IVC maintains current articulation agreements with other colleges and universities that can be found on the ASSIST website ([II.A.20](#), [II.A.21](#)). Students who are planning to transfer to the University of California (UC) or California State University (CSU) may follow the Intersegmental General Education Transfer Curriculum (IGETC) or the CSU General Education Plan in lieu of the local general education plans outlined in the AA, AS, AA-T, and AS-T offerings ([II.A.22](#)).

For CTE courses and programs, standards for quality are also maintained by the regional approval process for program development through the *Los Angeles, Orange County, and Riverside County Regional Consortia* (LAOCRC) ([II.A.23](#), [II.A.24](#), [II.A.25](#), [II.A.26](#)), biennial program review, and annual advisory committee meetings. Additional information about CTE programs may be found in Standard II.A.14.

Analysis and Evaluation

The instructional programs at IVC are offered in fields of study appropriate to higher education and culminate in students transferring to higher education programs and/or attaining degrees, certificates, and vocational skills that are needed for employment. The review and approval processes for courses and programs ensure alignment with the College mission ([II.A.2](#)). To assist students with their educational and career goals, the District and College are implementing technology solutions including developing a Student Success Dashboard and Degree Audit software scheduled for release in 2017.

The College meets the standard.

Standard II.A.2. Instructional Programs

Faculty, including full time, part time, and adjunct faculty, ensure that the content and methods of instruction meet generally accepted academic and professional standards and expectations. Faculty and others responsible act to continuously improve instructional courses, programs and directly related services through systematic evaluation to assure currency, improve teaching and learning strategies, and promote student success.

Evidence of Meeting the Standard

Board Policy 2100.1 (Delegation of Authority to the Academic Senate) ([II.A.27](#)), establishes that the faculty are primarily relied upon for matters involving curriculum. In practice, all faculty teaching a given course, regardless of assigned mode of instructional delivery, use the same course outline of record (COR) ([II.A.28](#), [II.A.29](#)) that has been vetted through the curriculum process. The COR establishes course objectives; methods of instruction and assessment; learning outcomes, and offers suggestions for reading and writing assignments, and textbooks.

Continuous improvement for courses and programs is formalized through outcome assessment and the Program Review Process ([II.A.30](#)). Outcomes assessment are done at the course, program, and institution level ([II.A.31](#), [II.A.32](#)). All SLOs and assessment methods are the same regardless of mode of instruction and the results are analyzed and discussed to assess effectiveness and make changes to established teaching methodologies. Program Reviews ([II.A.30](#)) include multi-layered approaches to determine the relevance, appropriateness, and currency of each program, regardless of program type ([II.A.33](#)) ([II.A.34](#)). The use of statistics and assessment data from SLOs provide the basis to review each program accurately and determine whether pedagogical or programmatic changes may be necessary. Additional information about courses and programs is provided in Section II.A.3.

Analysis and Evaluation

IVC ensures the curriculum meets academic and professional standards through the curriculum review and approval process. The faculty regularly assess learning outcomes for courses and programs as a means of promoting student success.

The College meets the standard.

Standard II.A.3. Instructional Programs

The institution identifies and regularly assesses learning outcomes for courses, programs, certificates and degrees using established institutional procedures. The institution has officially approved current course outlines that include student learning outcomes. In every class section students receive a course syllabus that includes learning outcomes from the institution's officially approved course outline.

Evidence of Meeting the Standard

The College has identified course and program level outcomes for all courses and programs ([II.A.35](#), [II.A.32](#), [II.A.10](#), [II.A.36](#), [II.A.37](#)). The development and implementation of learning outcomes is supported through the efforts of participatory governance committees/councils (IEC, Academic Senate, Curriculum Committee) and the SLO Coordinator.

A component of the faculty evaluation process includes participation in SLO development and assessment, and inclusion of SLOs in class syllabi ([II.A.13](#), [II.A.38](#)). The Academic Employee Master Agreement ([II.A.3](#)) indicates that:

- Department chairs are responsible for “program and curriculum development and review, [and] SLO development and evaluation.” (page 36)
- Recommendations for continued employment for all faculty are based on items including information regarding participation in curriculum development and review, and development and assessment of student learning outcomes.” (pages 45, 48, and 50)

IVC uses TracDat ([II.A.5](#), [II.A.40](#)) as the repository for Student Learning Outcomes for all courses and programs offered at the College ([II.A.31](#), [II.A.6](#), [II.A.7](#), [II.A.41](#), [II.A.42](#)). The College promotes best practices ([II.A.43](#)) and has in place a procedure for conducting SLO assessments that allows each department to write, schedule, implement and discuss the results from the SLO assessment while following the IVC guidelines for SLOs that are outlined on page 25 of the Faculty Manual ([II.A.44](#)) and page 18 of the Online Education Faculty Handbook ([II.A.45](#)).

Analysis and Evaluation

IVC has SLOs identified for all courses and programs, and the assessment results are discussed by department faculty and entered into TracDat for future data retrieval and discussion when the course is reviewed or when data is needed for program reviews and resource requests. In addition, training for faculty, staff, and administrators has been conducted to promote buy-in and increase the effectiveness of the outcomes assessment process ([II.A.11](#), [II.A.46](#), [II.A.47](#), [II.A.48](#)).

The program review process ([II.A.30](#)) at IVC includes a discussion of SLOs for the program in terms of evaluating the program for effectiveness of student learning ([II.A.33](#)). The current SLO process at IVC maps course SLOs to program SLOs (PSLOs) and then identifies the effectiveness of the PSLOs through the results of the course SLOs that are tied to each PSLO. ([II.A.49](#))

The college procedures for developing and assessing SLOs promotes ownership of the SLO process by each department. While TracDat is used as the main repository for SLOs, assessments, results and use of results, all new and revised courses are required to attach SLOs to the COR with the understanding that they will be updated in TracDat. Attaching the SLOs to the COR during the curriculum development and review process ensures that all courses have SLOs identified prior to the course being taught. Please see Standards I.B.1, I.B.2, and I.B.6 for additional discussion and examples of SLO implementation at IVC.

The College meets the standard.

Standard II.A.4. Instructional Programs

If the institution offers pre-collegiate level curriculum, it distinguishes that curriculum from college level curriculum and directly supports students in learning the knowledge and skills necessary to advance on and succeed in college level curriculum.

Evidence of Meeting the Standard

The College distinguishes its pre-collegiate level curriculum in the course outline of record and in the catalog using the established nomenclature ([II.A.50](#)):

- 1–99 Courses in this range generally transfer to both CSU and UC.
- 100–199 Courses in this range generally transfer to CSU but not to UC.
- 200–299 Courses that may occasionally carry transfer credit to four-year institutions. Courses in this range include those intended for skill development and for continuing education (whether related to employment or personal development).
- 300–399 Basic skills courses. Courses in this range are not applicable to associate degrees or certificates, nor do they carry transfer credit to four-year institutions. These courses do not count toward the 60-unit requirement for graduation and are not used in calculating students' grade point averages for associate degrees or certificates.

Pre-collegiate level curricula in reading, English, English as a Second Language (ESL), and mathematics prepare students for college level curriculum. Course schematics ([II.A.32](#)) in English, ESL, and Math identify the pathway that students need to take to college-level courses.

The College provides support services to students enrolled in pre-collegiate courses including counseling ([II.A.51](#)), tutoring ([II.A.52](#)), advising ([II.A.53](#)), and financial aid ([II.A.54](#)). These services are discussed in detail in Standard II.C.

To assist students, the College provides placement test guides, remediation modules, and basic skills accelerations pathways ([II.A.55](#)). Prospective students are offered assessment information including short tutorials on Math and English ([II.A.56](#)). The English and ESL faculty have created accelerated courses for students who have tested into the pre-collegiate level. These accelerated classes combine two lower courses into a single one that results in these students learning the knowledge and skills necessary to advance to college-level English courses upon successful completion while reducing the number of courses students need to complete. The Math department determined there was a need for developmental math modules ([II.A.57](#)) to assist students in developing essential skills to be successful in pre-collegiate math courses.

Analysis and Evaluation

IVC is committed to meeting educational needs of students in pre-collegiate courses. Pre-collegiate courses in English, reading, ESL and mathematics are offered to help students improve their skills and abilities. Support services and accelerated pathways are offered to help students succeed and progress on college-level courses. The math department has provided students and prospective students' access to tutorials and sample tests to help students review concepts with the goal of placing students into a higher math course, thus reducing or eliminating exit points for students.

The College meets the standard.

Standard II.A.5 Instructional Programs

The institution's degrees and programs follow practices common to American higher education, including appropriate length, breadth, depth, rigor, course sequencing, time to completion, and synthesis of learning. The institution ensures that minimum degree requirements are 60 semester credits or equivalent at the associate level, and 120 credits or equivalent at the baccalaureate level.

Evidence of Meeting the Standard

In accordance with Title 5, Section 55063 of the California Code of Regulations and Board Policy 5600 (Associate Degree Requirements [II.A.58](#)), IVC requires a minimum of 18 units in a major or area of emphasis with a minimum total of 60 semester units to earn an associate's degree ([II.A.19](#)).

The breadth, depth, quality, rigor, time to completion, and course sequencing for the college's programs are determined through the aforementioned curricular and program development and review processes ([II.A.30](#), [II.A.59](#)); and in accordance with the Chancellor's Office *Program and Course Approval Handbook* ([II.A.60](#)) and the Academic Senate for California Community Colleges' *The Course Outline Record: A Curriculum Reference Guide* ([II.A.61](#)). For CTE programs labor market analysis and input from advisory committees and regional consortia are also used to develop programs and make modifications, if necessary ([II.A.25](#)).

Analysis and Evaluation

IVC follows practices common to institutions of higher education in designing degree and certificate programs. The Academic Senate serves as the college's curriculum committee, so faculty expertise ensures academic quality and rigor, and to ensure that curriculum proposals are in accordance with established best practices outlined in the Curriculum Guide and policies outlined in the PCAH ([II.A.42](#)).

As part of the curriculum process, all programs that are submitted to the state must include a program narrative that details the students' path through the program to ensure completion within two years. All degrees are compliant with federal and state mandates. CTE programs receive at a minimum biennial program review ([II.A.63](#)) including feedback from advisory committees to ensure that the coursework and sequencing are in line with workforce development needs.

The College meets the standard.

Standard II.A.6. Instructional Programs

The institution schedules courses in a manner that allows students to complete certificate and degree programs within a period of time consistent with established expectations in higher education.

Evidence of Meeting the Standard

The Office for Instruction oversees the scheduling component of enrollment management using principles guided by access, bottleneck reduction, and increased throughput to increase student success and institutional effectiveness. To provide a variety of opportunities for students to pursue their educational goals, classes are scheduled in the day, afternoon, and evening hours, on Saturday, and online.

Department chairs, in consultation with the academic deans, prepare course schedules that enable students to meet course prerequisites and complete their programs of study in two years ([II.A.64](#), [II.A.59](#)). In addition, the chairs and deans use historical enrollment data, the waitlist system, and faculty input to help determine students' need for courses in order to reduce bottlenecks and facilitate students completing programs within a reasonable period of time, particularly in impacted areas. Additionally, IVC uses block scheduling ([II.A.65](#)), Saturday scheduling and a newly established weekend college program ([II.A.66](#)) to help students who are unable to attend a traditional college schedule find convenient times to enroll in courses.

Analysis and Evaluation

IVC is currently experiencing scheduling challenges as writing and mathematics courses have large waitlists. The institution is therefore working on solutions to meet student need but, due to lack of room availability and instructor availability, this process is a slow and complicated one. In the meantime, the College has improved the waitlist system to give students more information about available courses as well as to provide the College with more accurate data about demand through the use of unduplicated waitlist counts.

Academic planning is a key component that enables students to complete programs in a timely manner. IVC has a strong counseling program that provides student with tools to plan an effective academic schedule: Two Year Plans, My Academic Plan (MAP) and 0.5 unit counseling courses for how to achieve degrees using the IVC GE, IGETC, and CSU GE patterns depending upon the students' goals ([II.A.53](#), [II.A.67](#), [II.A.22](#)). Students are encouraged to complete a comprehensive MAP in order to register for classes. Please see Standard II.C for more information about support services.

The College meets the standard.

Standard II.A. 7. Instructional Programs

The institution effectively uses delivery modes, teaching methodologies and learning support services that reflect the diverse and changing needs of its students, in support of equity in success for all students.

Evidence of Meeting the Standard

The College offers day, evening, weekend, on-campus, off-campus, credit, noncredit, distance learning, and hybrid courses. Pedagogical methods and instructional delivery modes are approved through the curriculum approval process ([II.A.68](#)). Established instructional methods include: universal design ([II.A.69](#)), small-group discussions, project-based learning, performance-based learning, learning communities, and work experience/service learning.

To support student success, the College offers professional development opportunities at the beginning of every semester that include discussions about student learning and pedagogy ([II.A.12](#)) in an effort to promote the successful delivery of instruction formats to engage different learning styles. School, department, committee, and task force meetings discuss scheduling and best pedagogical practices for their programs on an annual basis ([II.A.70](#)) ([II.A.71](#)). Additionally, they discuss outcomes of SLO assessments in order to inform changes and fuel continuing improvement of courses and programs, including a discussion regarding the appropriateness of delivery modes.

In support of equity and success for all students, the College employs a full-time alternate media specialist, and offers online library resources and online tutoring to ensure that students have access to the tools they need for success. Support services are discussed in detail in Standard II.C.

Analysis and Evaluation

IVC provides opportunities for all students, regardless of learning styles, abilities, or location, by offering courses and support services in several modalities. The College offers courses in varying delivery modes, and tracks enrollment, retention, and success in each mode of delivery. Faculty engage in professional development activities to enhance their ability to meet the student's needs, and learning support services are available on campus and online.

The Online Education Task Force supports and encourages faculty to use universal design and best practices for online teaching in order to address different learning styles and improve student contact. Faculty are encouraged to use multiple modes of instruction involving a combination of audio, visual, written, and kinetic activities. Faculty members are also encouraged to improve their skills through the use of the *Online Education Faculty Handbook* ([II.A.45](#)) and through training offered through @One ([II.A.72](#)), which covers different learning styles for online instruction.

The College meets the standard.

Standard II.A. 8. Instructional Programs

The institution validates the effectiveness of department-wide course and/or program examinations, where used, including direct assessment of prior learning. The institution ensures that processes are in place to reduce test bias and enhance reliability.

Evidence of Meeting the Standard

IVC currently has home-grown math, English, and ESL assessment exams that are locally validated and approved by the CCC Chancellor's Office ([II.A.73](#)). The validation process includes assessment of content validity, reliability, bias, and disproportional impact ([II.A.74](#), [II.A.75](#)). The validation process requires testing a minimum of 150 students and correlating their placement with their performance. In addition to these assessment exams, IVC has implemented the use of multiple measures, so students are also placed into classes using AP exam scores, grades/transcripts from other accredited colleges and universities, and high school GPA and transcripts.

Analysis and Evaluation

IVC and Saddleback College were scheduled to use the assessment instrument developed through the Common Assessment Initiative (CAI) in spring 2017 for placement in fall 2017, but in late August 2016 the CCC Chancellor's Office announced a delay because of incomplete assessment validation. In the near future, the colleges will use the CAI assessment instrument (validated by the Research & Planning Group for California Community Colleges) and multiple measures to place students into courses. Please see Standard II.C.7 for additional discussion and examples regarding assessment instruments.

The College meets this standard.

Standard II.A.9. Instructional Programs

The institution awards course credit, degrees and certificates based on student attainment of learning outcomes. Units of credit awarded are consistent with institutional policies that reflect generally accepted norms or equivalencies in higher education. If the institution offers courses on non clock hours, it follows Federal standards for clock-to-credit-hour conversions.

Evidence of Meeting the Standard

IVC awards degrees and credits based on commonly accepted standards for higher education and student attainment of learning outcomes. Board Policy 5600 (Associate Degree Requirements [II.A.58](#)) maintains that degrees shall be conferred upon students who have

“demonstrated competence in reading, written expression, and mathematics, and who have satisfactorily completed at least 60 semester units of college work.” In addition, the IVC Catalog ([II.A.19](#)) and Board Policy 6105 (Graduation Requirements for Degrees and Certificates of Achievement) ([II.A.76](#)) establish that for degree awards, student must maintain a minimum grade point average (GPA) of at least 2.0 for all units counted towards the degree, and all courses in the major must be completed with a grade of “C” or better (Title 5 § 55063). All certificate awards have the same student academic standards as degree awards, meaning, a grade of “A,” “B,” “C,” or “P” must be earned for all courses in the certificate program ([II.A.19](#)).

IVC uses the State Attendance Accounting Methods that are based on Title 5 California Code of Regulations sections 55002(a)(2)(B), 55002(b)(2)(B) and 55002.5 outlined in the PCAH ([II.A.77](#)). Accordingly, IVC grants “one unit of credit as a minimum of 48 hours and maximum of 54 total hours of student work, inclusive of all contact hours plus outside-of-class, or homework hours.”

Table II.A.1: Student Learning Hours

Instructional Category	In-Class Hours	Outside-of-Class Hours
Lecture (Lecture, Discussion, Seminar and Related Work)	1	
Activity (Activity, Lab w/ Homework, Studio, and Similar)	2	1
Laboratory (Traditional Lab, Natural Science Lab, Clinical, and Similar)	2	0

To ensure accuracy and consistency in calculations across instructional categories and modalities using the established relationship of hours to units, automated formulas are in place in the college’s curriculum management software, CurricUNET ([II.A.68](#)).

Analysis and Evaluation

IVC awards units of credit consistent with institutional policies that follow generally accepted norms or equivalencies in higher education. IVC students are awarded course credit in a given course when they achieve the learning outcomes stated in the COR ([II.A.28](#), [II.A.78](#)) and successfully complete the course by earning a passing grade. Achievement of course outcomes is gauged by student performance on tests, projects, presentations, papers, and/or other assessments an instructor may use to determine sufficient mastery. Each

class must conform to the approved COR which specifies objectives/outcomes for student learning and methods of evaluation. These policies and practices delineate consistent parameters for awarding units of credit and are in compliance with state and federal regulations. Information and resource materials are published in the college catalog.

The College meets the standard.

Standard II.A.10. Instructional Programs

The institution makes available to its students clearly stated transfer-of-credit policies in order to facilitate the mobility of students without penalty. In accepting transfer credits to fulfill degree requirements, the institution certifies that the expected learning outcomes for transferred courses are comparable to the learning outcomes of its own courses. Where patterns of student enrollment between institutions are identified, the institution develops articulation agreements as appropriate to its mission.

Evidence of Meeting the Standard

IVC grants credit for college units earned at regionally accredited institutions of higher education ([II.A.79](#)). The College makes information about the transfer of credits available to its students through the college catalog ([II.A.79](#)), counseling services ([II.A.51](#)), the transfer center ([II.A.80](#)), and the college website. IVC maintains articulation agreements with both in-state and out-of-state colleges, which are available to students at ASSIST.org ([II.A.20](#)).

In an effort to certify that the learning outcomes for transfer credits are comparable to the outcomes for IVC courses, faculty, counselors, and evaluators in the Admissions and Records Office (A&R) review the student's transcripts and periodically request that the student submit a copy of the syllabi or COR from the other institution. The Articulation Officer is responsible for verifying the alignment of learning outcomes prior to entering into articulation agreements and submitting ASSIST updates.

Analysis and Evaluation

Students attending IVC may use lower-division units earned at regionally accredited institutions. Evaluators in A&R review courses to establish equivalency and consult with the Articulation Officer and academic departments as necessary. IVC has agreements with 13 other regional community colleges. These agreements are designed as a counseling guide to facilitate the lateral use of courses among the Region 8 colleges for the associate degree general education and major requirements.

The College meets the standard.

Standard II.A.11. Instructional Programs

The institution includes in all of its programs, student learning outcomes, appropriate to the program level, in communication competency, information competency, quantitative competency, analytic inquiry skills, ethical reasoning, the ability to engage diverse perspectives, and other program-specific learning outcomes.

Evidence of Meeting the Standard

IVC has established institutional education goals (IEGs) and associated institutional student learning outcomes (ISLOs) for the following competencies: communication; critical thinking; problem solving, and information access and analysis; global awareness; aesthetic awareness; and personal, professional and civic responsibilities ([II.A.82](#)). All program and course student learning outcomes map to one or more ISLO ([II.A.10](#), [II.A.82](#), [II.A.83](#), [II.A.84](#), [II.A.85](#), [II.A.86](#)). Because individual IVC courses contribute to one or more areas of the five institutional outcomes (ISLOs), students completing an associate degree at IVC will develop skills in quantitative analysis, analytic inquiry and critical thinking. In addition, the students will expand their information and communication competencies and their ability to engage in diverse perspectives and understand ethical reasoning. Certificates in the CTE area include these outcomes, as appropriate to the program, and include program-specific skills needed to enter the workforce.

Table II.A.2: Desired Competency and Corresponding Institutional Student Learning Outcome

Competency	Institution Student Learning Outcomes
Communication	Communicate effectively when speaking, writing, and presenting to a variety of audiences and with a variety of purposes.
Information	Use a variety of media, including computer resources, to access, organize, evaluate, synthesize, cite, and communicate that information.
Quantitative	Apply mathematical approaches and computational techniques to solve problems; to manipulate and interpret data; and to disseminate the data, methodology, analysis, and results.
Analytic Inquiry	Apply the fundamentals of scientific inquiry to real-life and hypothetical situations.
Ethical Reasoning	Demonstrate intercultural competence by engaging effectively—e.g., listening, speaking, writing, signing—with others whose language, ethnicity, religion, culture, country of origin, or economic or social background is different than their own.
Engage in Diverse Perspective	Demonstrate and observe sensitive and respectful treatment of diverse groups and perspectives in a variety of settings.

Analysis and Evaluation

All degrees of the College include outcomes in communication competency, information competency, quantitative competency, analytical inquiry skills, ethical reasoning, and the ability to engage diverse perspectives directly through major requirements or through meeting general education requirements. To illustrate, the College promotes the understanding and appreciation of diverse perspectives by making it part of the student learning goals established by the ISLO under the heading of Global Awareness. Students should therefore be able to:

- Demonstrate and observe sensitive and respectful treatment of diverse groups and perspectives in a variety of settings.
- Demonstrate an awareness of historical and contemporary global issues and events.
- Demonstrate intercultural competence by engaging effectively—e.g., listening, speaking, writing, signing—with others whose language, ethnicity, religion, culture, country of origin, or economic or social background is different than their own.

The general education required to obtain an AA or AS at IVC includes courses in various areas that promote student understanding and appreciation of diverse perspectives: social sciences; cultural diversity; humanities; and fine arts and languages. Combined, these requirements indicate that a student obtaining a degree from IVC will have taken at least four courses with an emphasis on diverse and global perspectives.

The College meets the standard.

Standard II.A.12. Instructional Programs

The institution requires of all of its degree programs a component of general education based on a carefully considered philosophy for both associate and baccalaureate degrees that is clearly stated in its catalog. The institution, relying on faculty expertise, determines the appropriateness of each course for inclusion in the general education curriculum, based upon student learning outcomes and competencies appropriate to the degree level. The learning outcomes include a student's preparation for and acceptance of responsible participation in civil society, skills for lifelong learning and application of learning, and a broad comprehension of the development of knowledge, practice, and interpretive approaches in the arts and humanities, the sciences, mathematics, and social sciences.

Evidence of Meeting the Standard

Board Policy 5600 (Associate Degree Requirements) ([II.A.58](#)) requires a component of general education for associate degree awards ([II.A.22](#)). Relying on faculty expertise through the Curriculum Committee, SLO Task Force, and Academic Senate, IVC developed a general education philosophy statement that is published in the catalog ([II.A.87](#)) and supports

the notion that “one’s understanding of a specific subject area is greatly enhanced and enriched by knowledge in and experience with other disciplines.”

There are three general education plans that a student may follow to receive an associate degree, specifically, the CSU Certification, IGETC, and the native IVC General Education pattern ([II.A.22](#)). All three general education patterns prepare students for responsible civic participation, lifelong learning, and introspective approaches to the arts, humanities, and sciences.

Analysis and Evaluation

At IVC, “The philosophy underlying a ‘general education’ is that no discipline is an isolated endeavor; instead, each relies upon and informs a common body of knowledge, ideas, intellectual processes, cultural traditions, and modes of perception.” ([II.A.87](#)). Therefore, a substantial component of general education is required for all IVC degree programs. Faculty, including the expertise of the articulation officer, determine the appropriateness of each course for inclusion in the general education curriculum. Since students must successfully complete at least one course, and in some cases more than one course, from each general education area, the SLO Task Force examines course outlines and affirms each course contains appropriate content for the knowledge area in which it is placed to ensure that students have a good opportunity to develop the intended intellectual skills and knowledge irrespective of the courses they choose.

The College meets the standard.

Standard II.A.13. Instructional Programs

All degree programs include focused study in at least one area of inquiry or in an established interdisciplinary core. The identification of specialized courses in an area of inquiry or interdisciplinary core is based upon student learning outcomes and competencies, and include mastery at the appropriate degree level, of key theories and practices within the field of study.

Evidence of Meeting the Standard

In accordance with Board Policy 5600 (Associate Degree Requirements [II.A.58](#)) all degree programs include a major (i.e. a focused area of study) ([II.A.88](#)). Students must therefore complete a minimum of 18 units in a major or area of emphasis to receive an associate degree. All degree programs have student learning outcomes ([II.A.19](#)) that are reflective of the established competencies for a degree in higher education.

Analysis and Evaluation

The Curriculum Committee and Academic Senate rely on the expertise of discipline faculty to ensure that all degrees include an appropriate focus of study in a major or area of emphasis; the development and revision of all degree programs requires the identification of a major or area of emphasis ([II.A.89](#)). Prior to submission to the Board of Trustees for approval, programs are thoroughly vetted. This review process assures that programs focus on student learning outcomes and competencies that are appropriate for the given field of study.

IVC offers six degrees with areas of emphasis ([II.A.19](#)). During the 2015-2016 academic year, the curriculum committee initiated the review process of these degrees ([II.A.89](#)) and faculty—discipline experts—have been tasked with identifying core courses, where needed, and reviewing interdisciplinary elective courses in consultation with the departments. The review process should be completed by spring 2017.

The College meets the standard.

Standard II.A.14. Instructional Programs

Graduates completing career-technical certificates and degrees demonstrate technical and professional competencies that meet employment standards and other applicable standards and preparation for external licensure and certification.

Evidence of Meeting the Standard

To ensure that graduates completing CTE degrees and certificates demonstrate employer-expected competencies, CTE programs are reviewed biennially using labor market and employment forecasting information ([II.A.63](#), [II.A.91](#), [II.A.92](#), [II.A.93](#), [II.A.94](#)); each program has annual advisory committee meetings ([II.A.95](#), [II.A.96](#), [II.A.97](#)); prior to local approval, curriculum is approved through local consortia, LAOCRC ([II.A.24](#)); and the IVC CTE Task Force meets monthly to discuss curriculum, pedagogy, industry needs, and provide training ([II.A.26](#)).

Analysis and Evaluation

With the goal of meeting the employment needs of the occupational segment of the College's student population, the programs/schools with Career Technical Education stay current on the labor environment in Orange County by using a variety of data resources to assist with program planning and approvals as well as course/program revisions ([II.A.98](#)). The faculty and deans of CTE programs respond to labor market data trends through discussion, program review, and possible course and/or program revision as well as through new program

development when feasible. The Career Technical Education faculty and administrators participate actively by hosting annual local and regional discipline-specific advisory board meetings that provide specific labor market information to assist with program planning. IVC also participates in the Career & Technical Education (CTE) Employment Outcomes Survey ([II.A.99](#)) yearly and provide the feedback and data to faculty for inclusion in their program reviews.

The College meets the standard.

Standard II.A.15. Instructional Programs

When programs are eliminated or program requirements are significantly changed, the institution makes appropriate arrangements so that enrolled students may complete their education in a timely manner with a minimum of disruption.

Evidence of Meeting the Standard

IVC has a program discontinuance/elimination policy that was revised in 2005 and again in 2012 ([II.A.100](#), [II.A.101](#)) that takes into account issues that may affect students. In the event of a recommendation to modify or phase out a program, the vice president for Instruction will charge the respective school dean to prepare a plan to modify or phase out the program per the Program Discontinuance Task Force recommendations. Since students have catalog rights ([II.A.102](#)), the primary mechanism for addressing the needs of students who miss opportunities to take courses during the phase out period would be course substitution.

Analysis and Evaluation

Program discontinuance discussions are rare at the College. Since the 2010 Accreditation Self-Study, only one program discontinuance discussion took place. From 2011-2012 the Electronic Technology Program Discontinuance Task Force utilized the policy to evaluate the Electronic Technology Program. The result was a five page summary report and recommendations submitted to the Office of Instruction on April 25, 2012 ([II.A.103](#)). The Electronic Technology Program underwent three discontinuance phases. Phase one occurred during spring 2006 and resulted in a recommendation to continue the program subject to ten qualifications, with a follow-up assessment to take place in one year. Phase two occurred in spring 2007 and resulted in a recommendation to continue the program for three years, subject to nine additional recommendations. Phase three took place November 2011 through April 2012 and culminated in a finding that the nine phase 2 recommendations had been

satisfactorily addressed. The task force recommended that the Electronic Technology program be continued without qualification.

The College meets the standard.

Standard II.A.16. Instructional Programs

The institution regularly evaluates and improves the quality and currency of all instructional programs offered in the name of the institution, including collegiate, pre-collegiate, career-technical, and continuing and community education courses and programs, regardless of delivery mode or location. The institution systematically strives to improve programs and courses to enhance learning outcomes and achievement for students.

Evidence of Meeting the Standard

The College regularly evaluates and improves the quality and currency of all instructional programs irrespective of the mode of delivery ([II.A.30](#), [II.A.42](#)). The Program Review Process is supervised by the college's Institutional Effectiveness Committee ([II.A.104](#)). Every six years, all programs and administrative units undertake a comprehensive self-evaluation addressing the program's consistency with the college mission, the program's scheduling pattern, its relationship to student activities, clubs and co-curricular, program-related professional development activities, program effectiveness, service to students, SWOT analysis, student learning outcomes and program objectives, strategies and action steps ([II.A.30](#), [II.A.105](#), [II.A.42](#), [II.A.9](#)). Every two years, departments re-evaluate program objectives, strategies and action steps in the program review update.

Analysis and Evaluation

SOCCCD's INFORM Data Warehouse provides comprehensive program statistics for use in program review ([II.A.106](#), [II.A.107](#)). The Program Review Report provides six years of data on section counts, enrollment counts, weekly student contact hours, full-time equivalent students, full-time equivalent faculty, productivity, fill rates, retention rates, success rates, passing grades, degrees awarded, and student counts by total, gender, ethnicity, and educational goal ([II.A.107](#)). Thus, the College provides sufficient data and a robust program review process that allows all programs to evaluate their effectiveness on a regular cycle.

CTE program are evaluated every two years ([II.A.63](#)). Please see Standard II.A.14 for additional information about the CTE program and course development and evaluation processes.

The College meets the standard.

Standard II.B: Library and Learning Support Services

Standard II.B.1. Library and Learning Support Services

The institution supports student learning and achievement by providing library, and other learning support services to students and to personnel responsible for student learning and support. These services are sufficient in quantity, currency, depth, and variety to support educational programs, regardless of location or means of delivery, including distance education and correspondence education. Learning support services include, but are not limited to, library collections, tutoring, learning centers, computer laboratories, learning technology, and ongoing instruction for users of library and other learning support services.

Evidence of Meeting the Standard

Irvine Valley College offers a large and well-staffed library, six learning centers, and 257 computers to support student learning. The College has invested in technology to allow online access to tutoring and library resources. The College utilizes program review, surveys and other data collection modalities to assure learning resources are of sufficient quantity, currency, depth, and variety to meet student learning needs ([II.B.1](#), [II.B.2](#), [II.B.3](#)).

Table II.B.1 Library Data 2015 – 2016

Library	
Number of Librarians	3
Number of Staff	8
Number of Visits	383,256
Number of Classes Taught (library orientations and learning workshops)	164
Size of Collection	40,000
Number of public access computers	122
Hours of operation	7:45 a.m. – 9:00 p.m. (M-Th) 7:45 a.m. – 4:00 p.m. (F) 10:00 a.m. – 2:30 p.m. (S)

Library collections development is collaborative and utilizes both faculty expertise and library association recommendations as guides. More information on this development can be found in Standard II.B.2. Sufficiency of learning resources and services is determined through the College's program review process and student surveys, described in more detail in Standard II.B.3.

IVC houses six learning resource centers (LRCs) on campus which provide instruction and/or tutoring. The learning support services consider attendance data from SARS along with student surveys, success in corresponding courses, and data collected from the campus wide

survey through the Office of Research, Planning and Accreditation when considering and planning for the effectiveness of services ([II.B.4](#), [II.B.2](#), [II.B.5](#), [II.B.6](#)).

Table II.B.2 Learning Center Data 2015–2016

Learning Centers	Students Served	Computers	Hours of Operation
Math Center	1300	20	8:00 a.m. – 6:50 p.m. (M-Th) 8:00 a.m. – 1:00 p.m. (F, S)
Writing Center	1,927	26	8:00 a.m. – 8:00 p.m. (M-Th) 9:00 a.m. – 3:00 p.m. (F)
Adult ESL Center	1000 (est)	25	11:30 a.m. – 6:00 p.m. (M) 9:00 a.m. – 1:00 p.m. (Th) 2:00 p.m. – 6:00 p.m. (Th) 9:00 a.m. – 11:00 a.m. (F) 2:00 p.m. – 5:00 p.m. (F)
Language Acquisition Center	1000	30	8:00 a.m. – 8:00 p.m. (M) 9:30 a.m. – 8:00 p.m. (T) 8:00 a.m. – 6:30 p.m. (W) 7:30 a.m. – 6:30 p.m. (Th) 8:00 a.m. – 2:00 p.m. (F)
Student Success Center	3000	60	9:00 a.m. – 7:00 p.m. (M-Th) 9:00 a.m. – 2:00 p.m. (F) 10:00 a.m. – 3:00 p.m. (S)
Center for Asian American Native American Pacific Islanders (CAANAPI)	200	16	9:00 a.m. – 5:00 p.m. (M-Th) 9:00 a.m. – 2:00 p.m. (F)

Equity and access are important considerations for student learning and support at IVC, so the College ensures that students in all locations, irrespective of the mode of instructional delivery or program, receive equitable support by library services and learning centers ([II.B.7](#)).

Analysis and Evaluation

Campus processes assure that the quantity, currency, depth and variety of learning resources are sufficient to meet student needs. The College uses collaborative discussion, program review, survey data, and other data points to assess the sufficiency of student learning resources ([II.B.8](#)). When it is determined that additional resources are needed, the library and LRCs use the resource request process to request materials, staffing, technology and/or facilities.

Librarians routinely conduct collection analysis to determine the appropriateness of the material to the library and the campus, based on collection development statements posted through the library's website ([II.B.9](#)). Furthermore, discipline faculty from the library and the student learning resource centers attend conferences to learn about current innovations and best practices in the discipline and, in turn, invite vendors to make presentations for new products and technology at IVC. Faculty share these presentations with their colleagues and dialogue about how these best practices and/or products may be brought to IVC.

The College meets the standard.

Standard II.B.2. Library and Learning Support Services

Relying on appropriate expertise of faculty, including librarians, and other learning support services professionals, the institution selects and maintains educational equipment and materials to support student learning and enhance the achievement of the mission.

Evidence of Meeting the Standard

The library mission statement reads as follows. "The mission of the IVC Library is to cultivate student success, information competency, and lifelong learning by providing quality services and programs to ensure equitable access to information resources for Irvine Valley College's diverse community." Relying on the expertise of faculty, including librarians, and other learning support services professionals, IVC selects and maintains educational equipment and materials to support student learning and enhance the achievement of both the library and college missions.

The equipment and materials to support student learning for all students, including those taking online courses, include: library videos, media players, reference and circulation materials, periodicals, calculators, human anatomy models, Office 365, discount software packages, and MySite. Additional software items are listed in Table II.B.3.

Table II.B.3 Available Software and Description

Software	Description
Mevo site	Video platform to provide faculty storage for digital content including video and audio, files
Blackboard and Canvas	Course learning management systems
Library Databases	Libguides, LibAnswers, and WorldCat
Pharos	Online printing
Blackboard Collaborate	Video conferencing and online collaboration learning tool
Libcal	Online room reservation system

Software	Description
Smarthinking	Online tutoring

Analysis and Evaluation

Librarians are informed through CurricUNET when a new course is launched. At that point, an assigned librarian verifies that the library collection is sufficient in depth and breadth to support the new course or program. Each school and department at IVC has a librarian assigned to liaison with faculty; this liaison attends faculty meetings, solicits faculty feedback through emails, and provides an online form for faculty, staff and students to make recommendations on materials. For more extensive resources, such as databases and e-Book collections, the library uses recommendations from faculty, CCA recommendations, and its internal collection development statements to determine the sufficiency of database collections. Once a given resource is identified as needed, the library enters resource requests for the items.

Some of the learning centers at IVC are tied directly with course curriculum, such as the Math, Writing, Adult ESL, and Language Acquisition Centers. The direct connections with courses guide the centers' use of software and materials in order to assist students most effectively. The Language Acquisition Center uses a variety of measures to assess the depth and variety of materials to meet student needs. An LQ is assessed, via a student survey, to measure students' perceived benefit of the lab's overall support in improving the students' writing, reading, listening, and speaking skills for all language lab sections. In addition, the ESL BSI project funds an ESL student and ESL faculty survey which specifically measures use and effectiveness of ESL lab software.

The needs of distance education (DE) students are solicited from faculty and students in order to inform the selection of library resources. All faculty, including faculty teaching DE, are contacted via email every semester for library material recommendations for their courses and programs. These resources also serve as supplemental and accessible information for all students. Additionally, the IVC website offers tutorials, orientations and other resources to assist in IVC students who are unable to come to campus. The IVC library houses computers available for all students, providing access to specialized software, Blackboard, Canvas, printing, email and scanning. Additionally, the library provides access to headsets, portable DVD drives, USB drives and reserve textbooks.

The library and learning resource centers select and maintain their instructional equipment and materials through a collaborative process that avails itself of both faculty expertise and institutional data.

The College meets the standard.

Standard II.B.3. Library and Learning Support Services

The institution evaluates library and other learning support services to assure their adequacy in meeting identified student needs. Evaluation of these services includes evidence that they contribute to the attainment of student learning outcomes. The institution uses the results of these evaluations as the basis for improvement.

Evidence of Meeting the Standard

The College uses a variety of methods to assess the adequacy of its library and learning centers in meeting student needs. These include the institution's program review process and analysis of survey and SLO data ([II.B.10](#), [II.B.3](#), [II.B.8](#), [II.B.5](#), [II.B.9](#)). Through the program review process, SLO assessments, and survey data, the College engages in regular and robust assessment of the adequacy of the library and student learning centers. The results are discussed collaboratively and become the basis for the improvement of the library and learning centers. Further, the library generates statistics including gate counts, circulation and reference desk transactions, workshops, and orientation attendance counts that are used for program improvement.

Analysis and Evaluation

All Learning Resource Centers collect SLO data each semester through surveys. In the fall, the Writing Center conducts a canned survey of all currently enrolled students. The results consistently demonstrate the Writing Center does meet students' needs. LAC activities, such as writing conferences with faculty, the graded components of ESL 301 and 201 courses; thus, both the use and effectiveness of the lab services are measured throughout the semester in these courses.

The Student Success Center (SSC) also engages in research studies with the IVC Office of Research, Planning and Accreditation ([II.B.6](#)). Quantitative studies have considered traditional outcome measures, such as course retention and GPA, with a matched control group to determine whether or not students who receive tutoring have more success. The SSC also surveys students every semester via a self-report measure where they indicate the effectiveness of tutoring and respond to an open-ended question about the SSC's strengths as well as areas where it could improve. Qualitative studies have involved researchers observing and rating tutor and tutee interactions, then grouping those behavioral findings into traits or trend categories which are compared to objective measures, such as course completion or course grades ([II.B.6](#)).

It is important to IVC that equitable services are provided for DE students. While the library is unable to distinguish DE students who use the library from other students who are simply

using online resources, DE students have the same access to material and the ability to provide feedback and request materials as do in-person students.

The College meets the standard.

Standard II.B.4. Library and Learning Support Services

When the institution relies on or collaborates with other institutions or other sources for library and other learning support services for its instructional programs, it documents that formal agreements exist and that such resources and services are adequate for the institution's intended purposes, are easily accessible and utilized. The institution takes responsibility for and assures the security, maintenance, and reliability of services provided either directly or through contractual arrangement. The institution regularly evaluates these services to ensure their effectiveness.

Evidence of Meeting the Standard

The College contracts with outside vendors to provide up-to-date technology for the library and learning centers. The library and learning centers work closely with IVC technology services to manage contracts, and assess and ensure the quality of contracted services. Table II.B.4 contains some important examples of services provided by outside vendors to enhance the accessibility and functionality of IVC's library and learning resources.

Table II.B.4 Examples of Contracted Library Support Services

LLR Programs	Vendors	Purpose
Library	CLC WorldShare Management System	Accessible library resources and resource management
Library	EBP, COBI	Collection development and tracking; databases; periodicals
Library	WorldShare LibApps	statistics, for LibGuides, for LibCal (study rooms)
Library	Desktracker	Statistics
Library	3M	Gate counts
Student Success Center	Smarthinking	Online tutoring
All centers	Pharos	Common print system
All centers	Lynda.com	Technology training
All centers	SARS Software	Student use tracking

The College and District collaborate to ensure security, and maintenance and reliability of services provided by outside vendors. The library and learning centers utilize data to analyze

and review service usage to ensure accessibility of services for students. Examples include the transition to the Canvas learning management system (LMS), the utilization of Smarthinking by the Student Success Center, the adoption of a common print system, and the use of SARS software to track learning center use.

Analysis and Evaluation

The library and learning centers use a common print system. Following consecutive assessments with substandard results, it was determined that the vendor that was used for over ten years was not meeting the needs of the students. A collaborative effort between IVC and Saddleback reviewed several options and determined that Photos would serve as the vendor for printing services beginning summer 2016. The new print system was fully implemented fall 2016 and has been evaluated as serving the campus' needs effectively to date.

The College meets the standard.

OBSOLETE

Standard II.C: Student Support Services

II.C.1 Student Support Services

The institution regularly evaluates the quality of student support services and demonstrates that these services, regardless of location or means of delivery, including distance education and correspondence education, support student learning and enhance accomplishment of the mission of the institution.

Evidence of Meeting the Standard

The institution provides support programs and services to students that include: Admissions and Records, the IVC bookstore, the Bursars Office, COWORKs, the Career Center, the Child Development Center (CDC), Counseling, Disabled Students Program and Services (DSPS), Extended Opportunity Program and Services (EOPS/CAPs), Financial Aid, Guardian Scholars (foster youth support), the Health and Wellness Center (HWC), International Students Program (ISP), Outreach and Community Relations, Student Ambassadors program, Student Life, Student Equity, Student Success and Support Program (SSSP/Matriculation), the Transfer Center, and the Veterans Services Center (VSC). The services provided by these programs support student learning and enhance the accomplishment of the mission which states: “... We support student access, success, and equity....” [\(IIC1\)](#). Innovative ideas to accomplish this mission are encouraged and supported college wide as evidenced by the implementation of Student Success Task Force Recommendations form, linked to local campus efforts supporting the Student Success Act of 2012 [\(IIC2\)](#). One such initiative to increase student engagement and promote campus connectedness is the Student Ambassadors program. Started in 2014, this leadership program has successfully graduated two cohorts of students that include the 2015 IVC student commencement speaker and a student recognized by the Chancellor of the California Community College System in his 2015 *State of the System* address [\(IIC3\)](#). To celebrate the institutions diverse student population and support the mission of the institution, the 2016 Last Week student orientation partnered with ELEVATE and Student Equity to integrate cultural diversity and learning into the orientation.

The institution ensures quality by conducting a comprehensive program review that includes measurable student learning outcomes (SSLOs), every 3 years. [\(IIC4\)](#) [\(IIC5\)](#) [\(IIC6\)](#) [\(IIC7\)](#) [\(IIC8\)](#) [\(IIC9\)](#) [\(IIC10\)](#) [\(IIC11\)](#) [\(IIC12\)](#) [\(IIC22\)](#) [\(IIC23\)](#) [\(IIC24\)](#) [\(IIC25\)](#) [\(IIC26\)](#). Surveys are used as a tool to ensure students are meeting the individual learning outcomes established by each department. [\(IIC13\)](#) [\(IIC14\)](#) [\(IIC15\)](#) [\(IIC16\)](#) [\(IIC17\)](#) [\(IIC18\)](#) Student service programs assess student satisfaction with services and initiatives through participant evaluations,

student comment cards and surveys. This is evidenced by the changes made to Fast Friday events, which allow students to complete assessment, advisement and orientation in one day. Due to feedback from participants, the format was changed to decrease the required time needed [\(IIC19\)](#). Laser Week, an IVC student success initiative that was created to promote student engagement and address the number of students who did not complete the matriculation steps for the upcoming semester has conducted satisfaction surveys, the results have not yet been analyzed [\(IIC20\)](#). The freshman advantage was internally analyzed and showed that overall, FAP students were more likely to be enrolled full-time (22.8 points higher), complete all courses at a higher rate (7.7 points higher) as well as the core GE courses (7.5 points higher) and the Basic Skill courses (7.5 points higher) [\(IIC21\)](#). In line with the established mission, programs solicit feedback from advisory board, which is used for program and service improvements. These meetings are also a way to update and provide information to local partners and vested community members. [\(IIC27\)](#) [\(IIC28\)](#) The State Chancellor's office conducts annual program audits on categorical programs offered at Irvine Valley College to ensure program compliance and effectiveness [\(IIC29\)](#). Most recently, categorical funding to support the core services of assessment, orientation, advisement and follow up, through the Student Success and Support Program (SSSP); and funding to mitigate disproportionate impact found in student groups based on gender, ethnicity, disability status, socio-economic status (SES) and foster youth or veteran status through the Student Equity program have given the institution an opportunity to establish and enhance the support services offered. [\(IIC30\)](#) [\(IIC31\)](#) [\(IIC32\)](#) In direct alignment with the college mission to "*offer continued accessibility in a diverse community*", a Guardian Scholars program was developed as a student equity initiative to address the disproportionate impact found for Foster Youth students with regards to accessibility. In spring 2016, the students were asked to complete a needs assessment which was analyzed and discussed at program planning meetings. [\(IIC33\)](#) Also approved for Student Equity funding was an initiative to develop a re-entry center on campus to support a population of non-traditional students with specialized needs and challenges and can be found on pages 58-59 of the plan [\(IIC33\)](#). Currently in the planning phase, the re-entry center will be initiated in spring of 2017.

Student support services have experienced their greatest transformation with regards to services for distance education students. In response to the growing enrollments in distance education, many student support services are available online. An overview of services available via different modalities is outlined in a chart as Appendix A.

Analysis and Evaluation

To further address the needs of our diverse student population, IVC ensures in-person assistance is available in the evenings and on weekends; additionally, online services

continue to increase in availability. The student services that experience the highest volume of student contacts, Admissions and Records, Counseling, and Financial Aid have all increased their available hours to address the need for services for students enrolled in evening courses. For example, the Counseling Center is open until 7 pm Monday-Thursday and makes appointments available on Saturdays.

In an effort to meet the needs of the rapidly growing distance education population, members of the Student Services management team will collaborate with the Online Education Task Force to create a Student Services for Distance Education plan as an outline to guide future practices, increasing accessibility for distance education learners. Currently, Irvine Valley College administers the Distance Education Survey each major term. Since fall 2014, the survey has incorporated two questions pertaining to students' access and perceived usefulness of student service areas online. These results will be incorporated into the VPSS AUR and shared with all student services managers. [\(33C34\)](#) The institution also plans to enhance professional development in the area of distance education services through participation in webinars, conferences and local workshops. The associated Student Government of IVC has been discussing the needs of DE students and how to best support the activities, wants, and concerns of their peers. Results of their discussions will be shared with the Online Education Task Force.

The College has met the standard.

II.C.2 Student Support Services

The institution identifies and assesses learning support outcomes for its student population and provides appropriate student support services and programs to achieve those outcomes. The institution uses assessment data to continuously improve student support programs and services.

Evidence of Meeting the Standard

The institution uses Tracdat to input and store program and department assessment data. Assessments are conducted to measure many aspects of the student experience while enrolled at the institution. Ensuring student satisfaction with services, determining opportunity for program improvement or expansion, supporting state and district funding requirements, and aligning services with the goals and objectives of the college and the district are some of the ways in which this information is utilized.

Evaluations are assessed by the Office of Research, Planning and Accreditation and reviewed by the Vice President for Student Services ([IIC35](#)) ([IIC36](#)) ([IIC37](#)). Results are presented at the following Student Services meeting and changes are implemented where appropriate. This process is detailed as part of the Office of Student Services Administrative Unit Review (AUR). ([IIC38](#))

Programs perform annual updates to the comprehensive 3-year review ([IIC39](#)). Meetings with the Office of Research, Planning and Accreditation, area managers and, when appropriate the Vice President for Student Services, are conducted to ensure that the AUR, SLO and SSO progress and assessments are effectively measuring student support outcomes as evidenced by the various trainings conducted. ([IIC40](#)) Program reviews are evaluated utilizing assessment methods to ensure the AUR's and SLOs/SSOs are functioning at a sustainable level. All outcomes are assessed and changes to programs are implemented based on the assessment process results. For instance, over 50% of the students polled in the 2011 Student Satisfaction Survey expressed concern that either their current financial status would interfere with their studies or that they would be unable to attend IVC without financial assistance. Financial Aid Office addressed this by sending both follow-up missing document emails and removing unnecessary document requirements, most notably a driver's license for each student. The initial actions of communicating more regularly with students and removing unnecessary barriers to access resulted in more student files being completed and a greater number of students receiving financial aid (37%). With additional time, access will continue to be less and less of an issue.

When surveyed in spring 2012, 83% of students knew how to apply for financial aid and 71% knew how to complete their file in order to receive financial aid. However, as late as 2013-2014, only 34% of students attending IVC were receiving financial aid.

The Health and Wellness Center receives continuous assessment data via student surveys to improve its health care programs annually. Students complete satisfaction surveys after each visit and this data is used to assess needs and see what changes need to be made each year. This covers the services provided to students. Additionally, students are now being provided increased mental health programs, including suicide intervention classes for staff and faculty to promote education on what to do in a crisis and sexual assault/consent classes done across campus to inform and educate on prevention and conduct that may lead to inappropriate behavior, including alcohol and drug abuse. This is a comprehensive program provided directly to student thru classes and group meetings, and has grown annually by 10% per year.

The Veterans Student Center also conducted an assessment in spring 2014 to implement needed changes for fall 2014 and implements a follow up survey in spring yearly as part of its continuous quality improvement process. The annual survey assesses the needs and demographics of IVC's student veteran population and formulates its services to provide resources and information to assure the veteran population are having their needs met (IIC41).

The institution recognizes that student services learning outcomes are most effective when created as a collaborative effort in the department. To ensure that faculty and staff understand the purpose and benefit of relevant departmental SSOs, various training workshops have been held for staff members in student services. (IIC42) Training topics have included basic overview, integrating SSOs with mission statements (IIC43) (IIC44), and SSO assessment. Recent training workshops have focused on ensuring that student services met the proficiency standard for SLO/SSO assessment as required by ACCJC. (IIC45)

Analysis and Evaluation

As shown by regular training, meetings and evaluation of Student Services staff and administration, student and staff surveys, open forums, listening sessions and SSO's, Irvine Valley College regularly identifies and assesses student learning support outcomes, provides

appropriate support and engages in continuous improvement in the delivery of its programs and services to students.

Based on an analysis of the evidence, Irvine Valley College is meeting this standard and will continue to monitor its progress.

The College meets the standard.

II.C.3 Student Support Services

The institution assures equitable access to all of its students by providing appropriate, comprehensive, and reliable services to students regardless of service location or delivery method.

Evidence of Meeting the Standard

The College offers comprehensive and equitable access to services for eligible students. Comprehensive services are provided by the Student Services Division from Admissions and Records, Childcare, Counseling, Disabled Student Services and Programs (DSPS), EOPS, & CARE & Program (CalWORKs), Financial Aid, Health and Wellness Center, International Student Center, Office of the Vice President for Student Services, Student Life and Veterans Center.

Analysis and Evaluation

Irvine Valley College (IVC) student support services provide essential services to student learning from outreach, assessment, orientation, advising, counseling, registration, financial aid, health, veteran services, EOPS, CalWORKs, disabled students, student life, childcare and a complete range of programs and services in which support for academic success and personal growth are one of the primary focus. Student services assists students in advancing in institutional learning outcomes and improves cultural competence, diversity and development in life as they expand their educational goals.

Access to the broad range of student services is available in the Student Success Building located in the center of the college with easy access and visibility. All student service departments provide remote access to complete and comprehensive program information with descriptive services, location, hours, contact information and online forms on our IVC website under Student Services (36). Examples of on line access includes Admissions and Records, Counseling, Financial Aid, EOPS and distance learning which students can access.

We also have face-to face and web access, email, phone and fax. Our on line services component has allowed student greater accessibility while adapting to the needs and use of our population that utilize on line, digital and remote devices in their educational needs.

Program/Location	Implementations
Child Development Center	The enrollment process is used to acquire information about the primary languages spoken by enrolled families, this is utilized to ensure cultural sensitivity is provided to all who are enrolled at the center.
DSPS	DSPS students are surveyed throughout the year through both on-campus surveys and via e-mail through the Office of Research, Planning and Accreditation. Results indicated that a significant number of students with disabilities are enrolled in evening classes, yet support services were not offered during this time. As of ____ the DSPS office has extended operating hours to 7pm to accommodate the need of these affected students and ensure equal access to services.
Veteran Services Center	An in-person survey from ____ available to all students who use the VSC indicated that 25% of the respondents did not utilize services offered by DSPS. As a result, a strong collaborative effort between DSPS and VSC was implemented, including monthly outreach presentations and training of the Veterans Counselor to authorize and approve DSPS accommodations.
Student Life	

Analysis and Evaluation

The student support programs at TVC assess and provide for students' needs, regardless of service location or delivery method. This is evidenced by the implementation of many changes as a result of student surveys and student comment cards. Student surveys are distributed both in person as well as emailed surveys through the Office of Research, Planning and Accreditation.

At a programmatic level, programs make changes based on feedback to improve the services offered to students. The Child Development Center revised the Student Guidelines, which is required to be read by each student prior to entering the classrooms, to inform students of practices, policies and procedures that outline the expectations in the center. The changes were based on the student feedback received, recommending an emphasis on discipline and guidance.

Admissions and Records partnered with the Bursar's office and administered a student survey in 2011. One of the questions asked students if they knew when their

upcoming registration appointment information was released. The results indicated only 68% were aware of when the appointment information was made available. As a result, a Dates and Deadlines webpage was created. Additionally, Admissions and Records worked with the Marketing department to send emails to all continuing students, post announcements through the college's Facebook and Twitter profiles, and run announcements on the marquees in an effort to alert students when registration times for the next enrollment term are available. In 2014, correspondence was sent to the student three days before, and the day of, their registration time as a reminder of their appointment. To determine the effectiveness of these efforts, the office of Research, Planning and Accreditation worked with Admissions and Records to determine if any changes occurred in registration appointment time lag.

Based on the results of the student survey completed for the Counseling department in spring 2011, it was found that 85 % (214/252) of respondents expected to transfer. The following services were expanded and/or created as a result of the survey responses:

- The Transfer Center Coordinator/Counselor was increased from a 50% assignment to a 100%.
- The Articulation Officer/Counselor was increased from a 75% assignment to a 100%.
- Established monthly counselor training to ensure counselors were aware of changes to the transfer process/requirements, discuss best practices, invite university transfer representatives to give an overview of admissions process/requirements, review case studies, and provide updates on other counseling related items.
- Expanded the variety and frequency of transfer-related workshops and transfer institution tours. (Flyers from Campus tours, include 3-day Northern Ca)
- Academic planning lab (MAP Lab) was created where students are able to continue to work on academic plans independently or with the assistance of a counselor when desired.
- Expanded hours in the Counseling Center on Friday's to 8am-5pm (from 8am-1pm) and added Saturday hours from 9am-1pm. Transfer Center expanded its evening hours from 5pm to 7pm Monday through Friday.

In the VSC, an annual anonymous survey is completed via the office of Research, Planning and Accreditation, distributed to all students identified as a former/current military service member. [\(IIC46\)](#) Results from the 2015 survey showed the following changes from 2014:

- a) 6% increase in enrollment
- b) 11% increase in persistence rate.

The increases were identified as resulting from additional support services provided in the VSC. The survey also revealed that 85% of veterans do not utilize DSPS services. A plan of action has been implemented that will have a DSPS Specialist or Counselor attend VSC meetings, workshops, and events, for access and to educate on the support services provided through the DSPS office. Also included in the plan of action is to install accommodated software programs in the VSC computer lab, for student use. From 2014 to 2015, survey results indicated a larger percentage of respondents utilized and were satisfied with the increase of psychologist appointments to 4 days per week to assist veterans with acclimation and daily life situations. The financial aid applications submitted and completed increased from 2014 to 2015.

The HWC survey found that the facilities where the health center is located were not adequate, time of wait was long, services were not efficient or sufficient and that the center itself was dirty. Post survey, a restructure plan was developed and new staff were hired, the health center flooring replaced, new equipment and furniture was ordered and installed, and staff were trained on efficient ways of assisting students with more efficient equipment, a new medical record system and within one year the satisfaction surveys were improved significantly by students with an overall satisfaction rate of over 94%.

Plan

Objective/Action	Resources Needed	Responsible Party	Expected Completion Date
CCC Assess implementation	Contract with testing service	Admissions/Records	Spring 2017
ATEP increase student services at site	Involve in construction site build to accommodate Student Services such as health services, financial aid, counseling and others at site once completed.	VPSS	Spring 2019

Objective/Action	Resources Needed	Responsible Party	Expected Completion Date
Degree Audit Beta Testing	Admissions personnel will complete degree audit beta testing, student self-service will be online testing, students will run own degree progress audits to note progress toward degrees.	Admissions/Articulation/SSSP	Spring 2017

The College meets the standard.

II.C.4 Student Support Services

Co-curricular programs and athletic programs are suited to the institution's mission and contribute to the social and cultural dimensions of the educational experience of its students. If the institution offers co-curricular or athletic programs, they are conducted with sound educational policies and standards of integrity. The institution has responsibility for the control of these programs, including their finances.

Evidence of Meeting the Standard

Irvine Valley College offers co-curricular programs, including 15 athletic teams. With operational support from the Office of Student Life, students are able to participate in eight co-curricular programs including Athletics as well as over 40 individual student clubs and organizations.

The co-curricular Programs at IVC are: Administration of Justice, Athletics, Dance, Forensics, Model United Nations, Phi Theta Kappa, Psi Beta and Wind Symphony. Our diverse student clubs and organizations represent academic, career, community and service learning, honor societies, leadership, multi-cultural, and special interests.

Oversight of co-curricular and extra-curricular programs is facilitated by the Office of Student Life, directly supervised by the individual program's instructional deans. Each has a faculty advisor and funding provided by ASIVC. Co-Curricular programs are expected to submit a calendar of events and activities, strategic goals, and objectives on an annual basis as part of the ASIVC budget allocation process. Each curricular program submits mid-year budget reports, participates in site visits and budget presentations with members of the student government Budget and Finance Committee and submits accomplishments to their instructional deans.

Co-curricular programs are identified as requiring three components: tie to instruction, competitive in nature in their area of instruction, and student course enrollment.

Section 11.02 Designation of Clubs and Programs states: 11.020 Co-Curricular Programs are those that the College recognizes as official programs; such as Administration of Justice, Athletics, Forensics, Journalism, Music, Psychology, and any other new program which the Senate deems to be an official program by a two-thirds (2/3) majority vote and the College recognizes the program as official. Co-curricular programs must be of a competitive nature in their area of instruction. Competitions, which do not include inter-murals, must be of officially recognized competitions that compete with other officially recognized schools on IVC's behalf. Enrollment in a course related to the program is required.

In addition to offering training workshops, a co-curricular handbook was developed to provide guidelines and procedural information for the expectations of Co-Curricular Programs. It is based on the rules and regulations outlined in the ASG of IVC Constitution and Bylaws and addresses issues of budget, finance, activities, rules and membership criteria. Currently the ASIVC is in the process of updating their constitution and bylaws; a revised co-curricular handbook will be finalized by December 2016.

The ASIVC modified their goals in the 2015-2016 to better focus their efforts, address student concerns and align with the mission of the institution. They chose services and activities, student leadership development, facilities and technology and fiscal management. In doing so, they updated their organizational structure to add committees of Community Outreach, Diversity and Student Equity, Facilities and Technology, Leadership Development to existing committees of Budget and Finance, Public Relations and Student Activities. To ensure student participation in campus governance, student leaders of clubs, organizations, co-curricular and extra-curricular program on a wide variety of campus committees, work groups, and tasks forces, [\(IIC47\)](#) these students who serve on these ASIVC committees also serve as the liaisons to the related campus committees, workgroups and taskforces to enhance the shared governance process.

Budgetary decisions are made as they relate to the college-wide process and follow strict guidelines per the college protocols. In order to evaluate the quality and effectiveness of co-

curricular and extra-curricular programs, the Associated Student of IVC (ASIVC) implemented an annual allocation budget process that included mid-year program and goal updates. They are in process of working with the Office of Research, Planning and Accreditation to develop an assessment template that each department would be required to complete at the end of each academic year. In addition, each department who receives ASG funding will be expected to provide updates on strategic goals and data results of assessments implemented throughout the year as a part of the budget development process.

Irvine Valley College athletic programs provide students with a wide spectrum of intercollegiate activities. Athletics is part of the School of Kinesiology, Health and Athletics. IVC draws student athletes from throughout Southern California and beyond, and from all socio-economic, racial, ethnic and cultural demographics including significantly higher percentages of Latino and black students when compared to the college population as a whole. [\(IIC48\)](#)

IVC data indicates that the athletic learning community is among the most academically successful in the entire college, and achieves at the highest level in enrollments, course success rates, persistence rates, GPAs and transfer rates. [\(IIC49\)](#)

Irvine Valley College Athletic teams have collected 19 team state championships and 41 conference titles from 1990 through the spring of 2019. IVC currently competes in 13 intercollegiate sports: baseball, women's badminton, women's sand volleyball and men's and women's basketball, golf, soccer, tennis and volleyball. [\(IIC50\)](#)

Intercollegiate athletics utilize print and electronic media announcements to inform the public regarding athletics and has a responsibility to students in athletic programs and the college to insure the highest program standards and personal integrity as part of its operational philosophy. It is important to note that IVC is among the very few colleges statewide (both 2-year and 4-year) in compliance with the strict proportionality test of Federal Title IX law. (8) Maria to link Nancy's evidence here. Athletics has the support of a designated counselor. Student-athletes are counseled on the responsibility of representing the college, its students, the faculty and staff, and current and future alumni as part of athletic competition.

Student Athletes are provided access to a Student-Athlete handbook that includes all pertinent information on their activities and obligations, copies of documents they are required to sign, slides from the orientation and resources available to them from the College. The student-athlete handbook is maintained by the dean, reviewed annually, updated as circumstances require, and is available to student-athletes through the Irvine Valley College Athletics website as a printable .pdf file. [\(IIC51\)](#)

Analysis and Evaluation

Irvine Valley College co-curricular programs and athletic programs are aligned with the institution's mission. With eight co-curricular programs and over 40 student clubs, the College does promote and support the social and cultural dimensions for its students. The College has strict budget guidelines that requires campus-wide participation and mid-year updates on program goals and allocations.

Based on an analysis of the evidence, Irvine Valley College is meeting this standard and will continue to monitor its progress.

The College meets the standard.

II.C.5 Student Support Services

The institution provides counseling and/or academic advising programs to support student development and success and prepares faculty and other personnel responsible for the advising function. Counseling and advising programs orient students to ensure they understand the requirements related to their programs of study and receive timely, useful, and accurate information about relevant academic requirements, including graduation and transfer policies.

Evidence of Meeting the Standard

The mission of the Irvine Valley College (IVC) Counseling Services is to support our students in achieving their academic, career and personal goals at the College through academic and career planning as well as strategies to deal effectively with their personal obstacles.

Counseling Services is the umbrella under which many student service programs reside. Counseling activities and services are funded through General, and Categorical funding including Extended Opportunity Program and Services (EOPS), Student Success and Support Program (SSSP), Disabled Student Programs and Services (DSPS) and Student Equity. Academic, personal, and career counseling services are available to all IVC students and any potential/interested non-IVC students at any time the Counseling Center is open. The Counseling Center is open and available to students Monday through Thursday from 8:00 am – 7:00 pm, Friday from 8:00 am – 5:00 pm and Saturday from 9:00 am – 1:00 pm. Saturday counseling hours were added in spring 2015 to better serve the weekend and the full-time weekday employee population. Through online counseling, students can submit questions to

a counselor 24 hours a day, 7 days a week. Counselors are available in the Counseling Center during all days the College is open. Counseling services are communicated to students via email, Sherpa nudges, text messages, SARS appointment reminders via text and phone, social media, letters and flyers, college catalog, handbook, planners, campus monitors, outreach events, and direct referrals.

Counseling and Academic Advising Programs Support Student Development and Success

The College's mission is committed to student success and is reflected in many of the innovative services that are provided to students in the Counseling Department. They are as follows:

1. Stress Busters Workshops such as on Mindfulness and Meditation
2. Freshman Success Program – guaranteed schedule for incoming freshmen. Program consists of four CSU general education courses which also include a counseling course on study skills.
3. Fast Fridays – Available to incoming freshmen that want to complete English and math assessments, campus tour, general advisement and first semester education in one day to get an early registration time for fall semester.
4. Laser Week – For new students to participate in student success workshops, learn about academic programs, connect with faculty before the beginning of fall semester.

Preparation of faculty and other personnel responsible for the advising function

Discipline Faculty Mentoring (DFM) Pilot Program: Through the support of SSSP funding, a new program was launched in the fall 2015, faculty discipline mentors will expand student support. Counseling faculty have partnered with discipline faculty to provide additional academic support. Discipline faculty will inform students what careers may be available to students who major in a specific discipline, recommend course sequences and offer tips to students to be successful in the discipline. ([IIC52](#))

In April 2016, IVC hosted a Cultural Competence Summit where faculty, staff and the community participated in a day-long dialogue on closing the achievement gaps and valuing students from various demographics. This event served as a professional development opportunity for all IVC counselors that attended. The content of the workshops gave IVC

counselors opportunities to develop skills and strategies to effectively engage with our diverse student population.

In spring 2016 counselors participated in a book review of “Redesigning America’s Community Colleges” by Bailey, Smith Jaggars, Jenkins. The focus was on how to better engage students and explore more effective ways in which to orient and retain students until they achieve their intended academic goal. [\(IIC53\)](#)

Irvine Valley College recognizes the importance of academic counseling to ensure student success and completion. In order to remain current and consistent, once a month training sessions are held for all counselors to review changes, provide updates and to review skills related to counseling. [\(IIC54\)](#) [\(IIC55\)](#) In addition, the Counseling Department also has a Counseling site on Blackboard where important information and updates are posted for all full-time and part-time counselors to ensure they have timely access to information.

Orientation of Students on Academic Requirements

Counseling services are provided in the following manner:

On-Campus

- In-Person Appointments: 30-minute, 45 minute and 60-minute appointments are available to students. Appointments open for student sign-up every other Wednesday for the following 2-week period.

Drop-in Counseling:

- Drop-in counseling services are available to students requiring immediate assistance. Drop-in counseling is limited to 10-15 minutes per student. Drop-in counseling is available on a first come, first served basis during all Counseling Department hours. Drop-in counseling is provided at Drop-in Counseling stations located in the lobby of the Counseling Department.

Distance Education Counseling

- Online Counseling: Through the Counseling website online counseling is also accessible 24 hours a day/7 days a week. Students submit questions online to counselors and counselors respond as appropriate. Average response time is 1-2 business days excluding weekends and campus holidays. As
- Virtual Counseling: As desired or needed, appointments are conducted using Skype or FaceTime.
- Counseling FAQ’s (Knowledgebase): Provides answers to frequently asked questions.

Telephone Appointments: As desired or needed, appointments are conducted via telephone.

As technology advances, the Counseling Department plans to enhance online counseling service through effective use of technology.

My Academic Plan (MAP)

Students are able to create their education plan online via the student portal, MySite, since 2007. MAP provides students with all of the information they need such as requirements for certificates, associate degrees and transferring to University of California (UC) and California State University (CSU). MAP is integrated with Project ASSIST, a statewide inter-segmental articulation database sponsored by the CSU and UC university systems.

MAP Lab

Opened in spring 2016 is an open entry, open exit counseling computer lab where students can get counseling assistance with completing their comprehensive academic plan.

Academic counseling courses

Specific counseling courses were created in spring 2014 to assist students with planning their courses and completing their educational goal in a timely manner. COUN 2, University of California Student Education Plan, Counseling 100A, ASSIST/Certificate Student Education Plan, and Counseling 100B, California State University Student Education Plan. All courses are .5 units and at the end of the course students would be able to understand the course requirements for their degree objective and have a completed comprehensive academic plan on MySite.

Transfer Center provides UC, CSU and independent colleges and universities admissions and application workshops, campus tours, and individual appointments with university representatives. In addition transfer fairs and transfer week are also coordinated through the Transfer Center.

Analysis and Evaluation

The Counseling Department offers professional counseling services for current and prospective students to assist with a variety of academic, career, and personal concerns. The counseling faculty support students in clarifying their values, making decisions, choosing a

major, coping with personal issues and the completion of the educational plan. Counseling services are available during the day and evenings, including Saturdays, by appointment or drop-in basis.

In addition to the counseling courses for special population students, counselors are assigned to work with these populations and provide counseling services that efficiently meet their educational needs. Populations who receive assigned counselors and services include the following: CARE, CalWORKs, CTE, DSPS, EOPS, Guardian Scholars (foster youth), Honors, international, reentry, veterans, probationary/dismissed students and student athletes. The Counseling Department also offers continual in-house training sessions, bi-annual faculty retreats, weekly counseling meetings and dedicated funding for professional development. In addition, the Academic Employee Master Agreement faculty performance evaluation includes a separate section on counseling activities. This section in the evaluation instrument specifically evaluates accurate and complete knowledge in the advisement process.

The campus has an active Distance Education Task Force which seeks to ensure that the needs of distance education students are met. Members of student services and the counseling center specifically are involved in this committee to ensure that their advising and counseling needs are met. [\(IIC56\)](#)

The college has an outlined process for faculty evaluation and the granting of tenure as stipulated in the Academic Employee Master Agreement. This four-year process includes evaluation from an appointed Tenure Review Committee as well as student evaluations of the faculty member. Tenured faculty are then evaluated every three years with a process that includes student input. Part-time faculty are evaluated during their first semester of assignment and then every sixth semester.

Counselors also teach courses designed to facilitate personal and career exploration and development as well as academic survival skills. The counseling curriculum incorporates academic advising, student development and career exploration in their courses. Based upon the analysis of the evidence, Irvine Valley College has met Standard IIC5: Student Support Services: Advisement. We will continuously monitor our progress through self-evaluations, SSO and employee evaluations. In meeting student needs, we will strive to stay current and update processes in the areas of technology. This includes expanding delivery of counseling services, marketing of services to students and providing online accessibility to student success resources.

Plan

Objective/Action	Resources Needed	Responsible Party	Expected Completion Date
Implement an integrated online/video counseling process.	Integrated online counseling format website or program such as ConexED.	Counseling Faculty, IT, Fiscal Services, Technology Taskforce	Fall 2017
Student Success Webpage with information, videos and resources that promote student success (i.e. time management, study skills, recognizing and relieving stress)	Videos and content to be included on website. This includes, but is not limited to: student testimonials, videos on student success, how to videos, workshop videos.	Counseling Faculty, IT, Fiscal Services, Technology Taskforce	Spring 2018
Review of marketing and promotion of counseling services.	Task force or retreat to review current practices and how current new technologies can be leveraged for further exposure.	Counseling Faculty, IT, Technology Taskforce	Fall 2017

II.C.6 Student Support Services

The institution has adopted and adheres to admission policies consistent with its mission that specify the qualifications of students appropriate for its programs. The institution defines and advises students on clear pathways to complete degrees, certificate and transfer goals.

Evidence of Meeting the Standard

Irvine Valley College is committed to student success. The College is devoted to student learning and success through exemplary and integrated teaching and support services,

effective stewardship, and continued accessibility in a diverse community. [\(IIC57\)](#) [\(IIC58\)](#) [\(IIC59\)](#) [\(IIC60\)](#) [\(IIC61\)](#)

The college admits domestic and international students in accordance with federal and state laws. IVC provides open admission to all California Residents, nonresidents and eligible K-12 concurrently enrolled students. IVC uses the CCC Apply Admission Application and will be piloting the CCC Apply International Student Admission Application in spring 2017.

The college requires non-exempt students to complete orientation, assessment and advisement including developing a first semester educational plan before they are permitted to enroll. Students are also required to develop a comprehensive educational plan once they complete 15 associate degree units or before they register for their 4th semester.

Prior to enrollment, all college level students who seek to transfer or earn degree or certificate are required to complete an orientation, assessment for math and English or English as a Second Language (ESL), and counseling including the development of an initial academic plan. The college encourages students to complete these pre-enrollment steps early through the Freshman Advantage program. The Freshman Advantage Program provides an early registration opportunity in an effort to promote enrollment in math and English or ESL courses in the students' first semester of full time enrollment. Fast Fridays are a collaborative student services effort offering students an opportunity to complete assessment, obtain a campus tour, connect with student government, receive academic counseling services and develop an initial educational plan on a single Friday. [\(IIC62\)](#) [\(IIC63\)](#) [\(IIC64\)](#) [\(IIC65\)](#) [\(IIC66\)](#) [\(IIC67\)](#) [\(IIC68\)](#) [\(IIC69\)](#) [\(IIC70\)](#) [\(IIC71\)](#) [\(IIC72\)](#) [\(IIC73\)](#) [\(IIC74\)](#) [\(IIC75\)](#) [\(IIC76\)](#) [\(IIC77\)](#) [\(IIC78\)](#) [\(IIC79\)](#)

Once discipline faculty have updated or developed curriculum and have it go through the approval process the certificates and degrees will be available to students via print or online catalog. Certificates, associate degrees, associate degree for transfer, and transfer pathways to UC or CSU campuses are available to students on MySite under My Academic Plan (MAP). Pre-requisite courses are included based on student's placement in math and English or English as a Second Language. Students can start building their academic plans and then have a counselor review the pathways in a counseling appointment or in the MAP Lab.

In 2015-16, the Discipline Faculty Mentors (DFM) project was launched. This project is a collaboration between the faculty in the School of Guidance and Counseling and other discipline faculty in an effort to add discipline focused mentoring services that will increase the expertise available to students for their academic and career planning. The project

includes 11 faculty from a variety of disciplines such as history, political science, geography, business, biology, languages and engineering. [\(IIC80\)](#) [\(IIC81\)](#)

Clear pathways on certificates, associate degrees, associate degrees for transfer and transfer requirements to CSU and UC campuses are available to students online and in-person.

Students also have access to see a counselor or a discipline faculty mentor to assist with their career pathways.

IVC is starting a pilot weekend Business Administration Degree in fall 2016 where students would be able to finish their degree in two years. Classes are offered on Friday evenings and weekends and they are offered in combination of hybrid, traditional and online format. The college has been selected as one of 30 colleges to participate in the American Association of Community Colleges (AACC) Pathways Project, funded by the Bill and Melinda Gates Foundation. Thus, more guided pathways will be made available through this funding.

Analysis and Evaluation

The District has adopted admissions policies and procedures consistent with the Education Code and Title 5 of the California Code of Regulations.

The College has established processes to require orientation, assessment and advisement which includes developing a first semester academic plan. The college has also adopted processes to require students to complete comprehensive academic plans.

Clear pathways on certificates, associate degrees, associate degrees for transfer and transfer requirements to CSU and UC campuses are available to students online and in-person.

Students also have access to see a counselor or a discipline faculty mentor to assist with their career pathways.

Based on an analysis of the evidence, Irvine Valley College is meeting this standard and will continue to monitor its progress. Also as a result of the colleges' participation in the American Association of Community Colleges (AACC) Pathways, work with academic units to develop guided pathways for students.

The College meets the standard.

II.C.7 Student Support Services

The institution regularly evaluates admissions and placement instruments and practices to validate their effectiveness while minimizing biases.

Evidence of Meeting the Standard

As a California Community College, there are no admission instruments for domestic students. All California residents who have a high school diploma or who are 18 years of age or older and who can benefit from instruction are automatically admitted to the college.

[\(IIC82\)](#) In addition, the college admits all non-residents who meet the same academic standards. The only requirement is the individual seeking admission must apply for admission. [\(IIC83\)](#) Students who are currently enrolled in grades K-12, may also concurrently enroll at Irvine Valley College with permission from their respective school principal or designee and their parent. [\(IIC84\)](#) [\(IIC85\)](#) [\(IIC86\)](#) [\(IIC87\)](#) [\(IIC88\)](#)

International students are admitted in accordance with federal immigration laws and district policies. Again, no admission instruments are used to determine eligibility for admission. Students are required to demonstrate proficiency in the English language by achieving a minimum TOEFL, IELTS, iTEP or EIKEN score or completion of an approved intensive English Language School for which we Irvine Valley College has a TOEFL waiver agreement. [\(IIC89\)](#) [\(IIC90\)](#)

The college may use an approved assessment instrument, but must still validate cut scores. IVC uses the CTEP for English Placement. However, the college elects to an assessment not on this list for math and ESL, thus, the college must independently validate the instrument to ensure there is not bias, disproportionate impact, and to ensure appropriate placement.

The SSSP Workgroup is charged with ensuring the assessments administered are validated.

[\(IIC91\)](#) The primary English placement assessment instrument for native English speakers is the CTEP, version A, both paper-and-pencil and computer-based versions. CTEP has three components: reading comprehension (RC), sentence structure & grammar (SG) and sentence & syntax skills (SS). As a general rule, the CTEP is offered based on student demand, and staff and facility availability. The paper-and-pencil version of the CTEP is offered at local high schools and on the IVC campus to students with identified special needs.

Students who have completed the CTEP may challenge the initial course placement by completing a locally developed and managed writing sample (paper-and-pencil) administered in IVC's Assessment Center.

Two instruments are used to assess the skills and placement of ESL students. The Secondary Language Proficiency Test (SLEP) Form 3 measures a student's reading comprehension, vocabulary, grammar and listening skills while the ESL Writing Sample is used to measure a student's writing skills. The evaluation of a student's linguistic competence and critical

thinking skills demonstrated in the writing sample complements the skills assessed by the SLEP. The ESL Writing Sample serves as a multiple measure.

Math placements are determined using the number of correct answers on the test in combination with the answers the students give to questions 15 and 16 of the Irvine Valley College Student Services Survey that students complete before taking the test.

The Mathematics department has created a Math Test and Multiple Measures Placement Matrix that is used to determine course placement for students. Students are encouraged to prepare and refresh their skills before taking the math and English assessments. The Mathematics Department makes review questions available with answers for arithmetic and Pre-algebra ([IIC92](#)), Elementary Algebra ([IIC93](#)), Intermediate Algebra ([IIC94](#)), Trigonometry ([IIC95](#)) and Pre-calculus. These questions are PDF files that can be accessed free on the Math department's and on the Assessment Overview web pages.

Analysis and Evaluation

The admissions and assessment functions are governed by the shared governance SSAMMO (Student Success, Access, Matriculation, Marketing and Outreach) Committee. Furthermore, the primary charge of the SSSP Task Force which reports to SSAMMO is the review and delivery of the assessment process. This group is comprised of faculty, classified staff, managers and administrators. ([IIC96](#)) ([IIC97](#)) ([IIC98](#))

Irvine Valley College has been very active on the statewide Multiple Measures Assessment Project (MMAP). Understanding that assessment instruments are not the best predictor of success, the MMAP set a goal to review the data to determine if other information can be used as a multiple measure to enhance student placement and, ultimately, improve student success. This research has shown that a student's unweighted cumulative high school grade point average is a significant predictor in a student's college success.

Consequently, in summer 2016, IVC piloted multiple measures using unweighted cumulative high school grade point average to place students in English. 480 eligible students were in the pilot and 46% changed their enrollment to a higher writing course.

Irvine Valley College is a pilot college for the statewide Multiple Measures project, and Saddleback College is a pilot college for the Common Assessment. Since both colleges are in the same district, both colleges are expecting to be piloting both simultaneously.

Plan

Objective/Action	Resources Needed	Responsible Party	Expected Completion Date
Implement MMAP in placement decisions	Programming, research	Counseling, Math, English, and ESL Faculty, SSSP Staff, Admissions and Records, District IT,	Fall 2017
Expand math pre-assessment preparation	Videos and content developed in Comevo	Math faculty, SSSP staff	Spring 2017
Implement CCC Assess (Common Assessment)	Programming, marketing	Counseling, Math, English, and ESL Faculty, SSSP Staff, Admissions and Records, District IT,	When made available by the Chancellor's Office

II.C.8 Student Support Services

The institution maintains student records permanently, securely, and confidentially, with provision for secure backup of all files, regardless of the form in which those files are maintained. The institution publishes and follows established policies for release of student records.

Evidence of Meeting the Standard

Student records are kept securely and confidentially. [\(IIC99\)](#) [\(IIC100\)](#) [\(IIC101\)](#) The primary location for student records is the district Student Information System (SIS). Any paper files are destroyed in accordance with BP & AR 3310, the district Records Retention and Destruction Policy. [\(IIC102\)](#) [\(IIC103\)](#) [\(IIC104\)](#)

The college maintains student records in the district-wide Student Information System (SIS). Users are granted permission by District IT, through the office of Admissions and Records, based on user roles. SIS data is stored in a database server. Full backups are performed nightly to a secure local location. This backup data is then archived by an off-site service, Live Vault. Off-site backups are performed through an encrypted tunnel and stored to a secured data vault, located on the east coast of the United States.

Student academic plans (MAPs) are created, approved and stored online through the district-wide SIS. Students are able to create multiple plans that can be reviewed by faculty and staff. Academic counselors, through District IT, may request to retrieve archived or deleted plans. All MAP edits, either by an employee or the student, are recorded and stored electronically for retrieval at a later date, if needed.

In October 2011, the college migrated from its former imaging system, WebXtender, a Viatron product, to ImageNow from Perceptive Software. This was part of a district-wide decision to consolidate to a single common vendor that would afford inter-district accessibility to student documents in a secure environment. The campus technology office maintains security, licenses and access to users who are authorized by the Office of Admissions and Records. Users are granted permission through the Office of Admissions and Records based on 'User roles'. ImageNow data is stored on local file server. Full backups are performed nightly to a secure local location. This backup data is then archived to our off-site LiveVault archive service. Off-site backups are performed through an encrypted tunnel and the data is stored encrypted in a data vault on the east coast.

Protection of student information is maintained in compliance with the federal Family Education Rights and Privacy Act of 1974 and BP 5615 and AR 5615. [\(IIC105\)](#) [\(IIC106\)](#) Students must submit the Authorization to Release Student Information form for each instance. The Authorization to Release Student Information form is also required for each third party authorized by the student to access his or her information. [\(IIC107\)](#) [\(IIC108\)](#) Documents must be submitted in person and with proper government issued identification to verify identity.

FERPA resources are also provided to the college community. While the Office of Admissions and Records staff receive regular FERPA training and updates. FERPA trainings for all Student Services staff is also provided each semester. Other college staff and faculty are Informed of FERPA requirements through Flex Week presentations at the start of each semester, and in the annual Faculty Manual issued by the Office of Instruction. Students are informed of their FERPA rights in the annually published college catalog and website.

HIPPA records and Law Enforcement records are not covered by FERPA. Legal requests for records and subpoenas are processed by the designated Custodian of Records in the Office of Admissions and Records when received from the Office of the Vice Chancellor of Human Resources.

IVC recently implemented a new online discipline system, Advocate. With the new system, a staff member, faculty or student can submit a discipline referral form online. The system will be available to the student, faculty, staff, and public 24 hours a day, 7 days a week. All discipline reports will be maintained in this database and kept confidential. A link to the referral form can be found on the IVC website. Once submitted, an email to the campus discipline officer is generated. The referral is then processed and forwarded as necessary. If the system fails, individuals can still submit a paper or email referral. Advocate is web-based and the data is stored and backed up on Advocate's server off-site. Advocate was implemented campus-wide in spring 2016. A decision to use Advocate was made due to our relationship with adjacent UCs who also use Advocate.

Analysis and Evaluation

Irvine Valley College maintains records permanently, securely, and confidentially in accordance with federal and state laws, following district board policy. Security and backup procedures for electronic records are maintained by the information technology departments at both the campus and district. Irvine Valley College also follows federal and local policies for informing students of their privacy rights and the release of student records. Training for campus constituents on such policies is also available.

Plan

Based on analysis of the evidence, Irvine Valley College is meeting this standard and will continue to monitor its progress. IVC plans to:

Objective/Action	Resources Needed	Responsible Party	Expected Completion Date
Offer additional training on FERPA policies including coordination with Human Resources to offer an online module	Identify an available product/module that the Office of Human Resources can purchase or use for new employee	Office of Admissions and Records; Office of Human Resources	Fall 2017

Objective/Action	Resources Needed	Responsible Party	Expected Completion Date
on understanding the requirements of FERPA for new employees.	orientations and for current employees.		
Develop a data handling manual as a resource for college employees who manage student information, in conjunction with Saddleback College and District Services	Participation from constituent groups at Irvine Valley College and district-wide to produce a comprehensive manual.	To be determined	Spring 2018

Standard III: Resources

The institution effectively uses its human, physical, technology, and financial resources to achieve its mission and to improve academic quality and institutional effectiveness. Accredited colleges in multi-college systems may be organized so that responsibility for resources, allocation of resources, and planning rests with the district/system. In such cases, the district/system is responsible for meeting the Standards, and an evaluation of its performance is reflected in the accredited status of the institution(s).

Standard III.A: Human Resources

Standard III.A.1 Human Resources

The institution assures the integrity and quality of its programs and services by employing administrators, faculty and staff who are qualified by appropriate education, training, and experience to provide and support these programs and services. Criteria, qualifications, and procedures for selection of personnel are clearly and publicly stated and address the needs of the institution in serving its student population. Job descriptions are directly related to institutional mission and goals and accurately reflect position duties, responsibilities, and authority.

Evidence of Meeting the Standard

The recruitment of highly qualified employees is essential to the educational mission of this institution. IVC administration and faculty work together to select highly qualified faculty members who are experts in the subject matter of their curriculum and can teach this subject matter effectively. IVC administration and faculty also work together to hire highly qualified counselors, librarians, and other instructional and student services faculty who can foster community college effectiveness and who are experts in the subject matter of their given specialty [III.A.1](#). In addition, the Chancellor and the College President—with input throughout this process from administration, faculty and staff—carry out their responsibility to select highly qualified administrators and managers and classified staff [III.A.2](#), [III.A.3](#). The College and its District have three comprehensive and rigorous policies governing the hiring of administrators and managers [III.A.2](#), faculty [III.A.1](#), [III.A.4](#), and classified staff [III.A.3](#).

The hiring criteria and qualifications for academic positions are identified by the California Community College Chancellor's Office (in consultation with the Academic Senate for the California Community Colleges), Minimum Qualifications for Faculty and Administrators (January 2012) [III.A.5](#). Departmental faculty, in consultation with the administration and the Office of Human Resources (OHR), may set desirable qualifications based on specific

programmatic needs as determined by the faculty discipline experts and the administration. This process ensures the qualifications for each position are commensurate with specific programmatic needs as determined by the faculty discipline experts, the administration, and the OHR. The minimum and desirable qualifications are clearly stated within the published position descriptions/job announcements. This process assures the maintenance of appropriate qualifications for faculty academic positions including faculty.

The qualifications for academic administrators and classified administrators/managers, classified positions, and police officers, are clearly stated in the governing board approved position descriptions. (SOCCCD Human Resources Classification and Compensation [III.A.6](#). The hiring criteria, including minimum and desirable qualifications, for all positions are evaluated by the administration, faculty, and classified staff to ensure that the qualifications, education, training, and experience are clearly related to the institutional mission and goals, and accurately reflect the position duties, responsibilities, and authority.

Analysis and Evaluation

The College's hiring process is based on utilizing well-defined hiring criteria, faculty involvement, advertisement and verification processes which assure that administrators, faculty and staff are qualified by appropriate education, training, and experience to provide and support these programs and services.

IVC develops hiring criteria for faculty, administrators, managers and classified staff based on the governing board approved position descriptions through the recruitment processes outlined in the respective board policies. These policies call for special care to be taken to ensure accurate and job-related criteria are used when reviewing applicants. They further require that interview questions and other requirements be job-related and composed with the intent of evaluating the candidate's knowledge and abilities in relation to the minimum and desirable qualifications as published in the formal job announcement. The list of interview questions and other requirements must be approved by the hiring committee and by the Vice Chancellor of HR & Employer-Employee Relations or a designee.

For new classified management and administrator positions the District utilizes the service of a classification consultant, currently Marlys Grodt and Associates, to review the needs of the position and create an appropriate job description in accordance to the needs of the department and then ensure it articulates into the job structure within the District. In addition, a comprehensive district wide salary study and position description review was conducted by the same consultant for all classified managers and administrators in 2012.

For new classified bargaining unit classifications, the District utilizes a classification consultant determined by mutual agreement of the District and CSEA. The OHR works with the corresponding manager and/or administrator to determine the minimum and desirable qualifications for the new classification. (CSEA Contract [III.A.7](#))

In accordance with AR 4011.1, (Recruitment: Full-time Faculty [III.A.1](#)) the faculty plays a primary role in the selection of faculty as mandated by California Education Code Section 87360. In order to attract the most qualified candidates, after a position has been identified and board approved all positions are advertised through the OHR. The College/District utilizes several publications on a general basis for this purpose, employing technology and effective advertising methods to ensure a large and diverse pool of applicants [III.A.8](#).

A number of faculty job descriptions include Distance Education (DE) experience and experience as a desirable qualification. Schools and departments can decide if they wish to teach DE [III.A.8.2](#). IVC has not formulated specific, unique selection criteria in the field of DE. Determinations of appropriate qualifications in the field of DE are conducted through the regular hiring process including the job posting, application review, interview, and reference check processes. As is the case of typical hiring processes, it is the role of a hiring committee to determine whether questions and/or a teaching demonstration related to teaching a DE course should be included in the interview process. The *IVC Distance Education Handbook* provides a powerful resource to assist a hiring committee in formulating questions and/or teaching demonstration related to a DE course (IVC DE Handbook [III.A.9](#)).

The College is in the process of formalizing its part-time faculty hiring process, as documented [III.A.10](#). Under this process, applicants for part-time faculty employment are required to complete an online application form. The applications are screened for completeness and for minimum qualifications by the OHR first and then the chair, or designee, of the corresponding department with full-time faculty members of the committee screen and review applications forwarded by the OHR, giving full consideration to the special needs of the department, school, program and the student populations to be served.

The method used to update administrators/managers and classified position descriptions, including required and desirable qualifications, are normally initiated by the respective manager or administrator who works with the respective Executive at the college, the college president and the OHR to submit the requested change to the Board of Trustees for approval. The analysis and discussion leading the institution to agree on specific programmatic needs may vary. For faculty positions, discussion takes place at the school level and proposed revisions go through the Academic Senate. For administrators/managers and classified positions, discussions and analyses occur within the respective department, in conjunction with management, the respective vice president and the college president.

To assure that hiring procedures are consistently applied, the Chancellor and College presidents are made responsible for the application of hiring procedures as established by Board policies [III.A.11](#). In order to verify the qualifications of applicants and newly hired personnel, commensurate with Board policies, the District reviews the background of all candidates prior to the submission of the recommended candidates to the College president for second-level interviews [III.A.12](#).

The College meets the standard.

Standard III.A.2 Human Resources

Faculty qualifications include knowledge of the subject matter and requisite skills for the service to be performed. Factors of qualification include appropriate degree, professional experience, discipline expertise, level of assignment, teaching skills, scholarly activities, and potential to contribute to the mission of the institution. Faculty job descriptions include development and review of curriculum as well as assessment of learning.

Evidence of Meeting the Standard

Faculty job descriptions include development and review of curriculum as well as assessment of learning as specified in the Administrative Regulation 4011.1 (page 4) under the heading, “Job Announcement Development.” [III.A.13](#)

The college ensures that the faculty selected for hire have adequate and appropriate knowledge of their subject matter by thoroughly engaging discipline experts throughout the hiring process. Administrative regulation 4011.1 Recruitment: Full-time Faculty provides that no fewer than three members of a faculty hiring committee shall be experts in the academic discipline of the recruited position and may be drawn from district faculty or staff, or from external sources. [III.A.14](#)

In order to evaluate and judge effective teaching in the hiring processes, each applicant receives an independent evaluation of his/her scholarly accomplishments, curriculum vitae, and/or portfolio according to job-related criteria as a part of the screening process pursuant to AR 4011.1 (Recruitment: Full-Time Faculty Hiring). [III.A.15](#)

The college identifies faculty expertise in DE instruction through the regular hiring process including the job posting, application review, interviews and reference check process. The hiring committee determines whether questions and/or a teaching demonstration related to teaching a DE course should be included in the interview process. The *IVC Distance Education Handbook* provides a powerful resource to assist a hiring committee in formulating questions and/or teaching demonstration related to a DE course. In addition, when appropriate, faculty are encouraged to take a Learning Management System (LMS) training course through the college’s technology services department before they can teach online or hybrid using the LMS.

Analysis and Evaluation

The college assures that faculty qualifications include the necessary knowledge and skills through engagement of discipline experts in the hiring faculty process, a comprehensive review of the background and experience of the applicants, and consideration of teaching demonstrations.

Analyses and discussions that have led the institution to determine the qualifications of faculty and staff involved in offering DE have taken place primarily at the Online Education Task Force (OETF) meetings. The Online Education Strategic Plan (approved in May 2016), addresses faculty and staff qualifications needed for online education. [III.A.16](#) In addition, the *IVC Distance Education Handbook* provides definitions of and a list of faculty best practices for, online and hybrid teaching for evaluative purposes of these individuals teaching online and hybrid courses (IVC DE Handbook [III.A.17](#)) and, the Faculty Performance Evaluation Criteria are designed to lead to improvement of job performance, institutional effectiveness, and the effectiveness of faculty in performing their classroom assignments and institutional responsibilities. The performance evaluation criteria include, among other things, demonstration of subject matter expertise. Numerous recent changes have been made to the faculty evaluations process, which both the faculty and administration view as positive; the revised process is found in the collective bargaining agreement under Article XVII: Faculty Evaluations. In addition, at this time, the District is working on developing and implementing a new evaluation form which both the Faculty Association and District believe will be forthcoming in the fall of 2016 (Performance Evaluation Review [III.A.18](#)). The faculty performance evaluation process is documented further in the response to Standard III.A.5, below.

The College meets the standard.

Standard III.3 Human Resources

Administrators and other employees responsible for educational programs and services possess qualifications necessary to perform duties required to sustain institutional effectiveness and academic quality.

Evidence of Meeting the Standard

Administrators and other employees responsible for educational programs and services possess qualifications necessary to perform duties required to sustain institutional effectiveness and academic quality based on the hiring process described under standard III.A.1 above. Post hiring, in order to ensure that the qualifications of administrators and other employees continue to be appropriate to perform duties required to sustain institutional effectiveness and academic quality, the institution uses rigorous performance evaluation

processes as documented in standard III.A.5. In addition, the College employs a rigorous professional development program as documented in section III.A.14.

Analysis and Evaluation

The well-defined and managed hiring process coupled with highly rated academic administrators and other employees with responsibilities in educational programs and services ensure the possession of qualifications necessary to perform duties required to sustain institutional effectiveness and academic quality.

The College community's perception of IVC administrators' qualifications has been reflected in the 2015 IVC Employee Survey [III.A.19](#), where 63 percent of respondents (including those who picked don't know/NA) agreed that "IVC administrators and managers usually make decisions that are fair," and 73 percent of respondents agreed that "the administration at IVC provides effective leadership that supports the college's mission."

The College meets the standard.

Standard III.A.4 Human Resources

Required degrees held by faculty, administrators and other employees are from institutions accredited by recognized U.S. accrediting agencies. Degrees from non-U.S. institutions are recognized only if equivalence has been established.

Evidence of Meeting the Standard

Required degrees held by faculty, administrators and other employees at IVC, including those involved in offering CEE courses, are from institutions accredited by recognized U.S. accrediting agencies. Degrees from non-U.S. institutions are recognized only if equivalence has been established. Prior to the commencement of employment, physical testing and background checks, as required for the positions, are conducted by the OHR or the College. The selected applicant must provide official transcripts which are verified by the OHR to confirm education, experience, and initial salary placement. The process for obtaining an equivalent for degrees from non-United States institutions is listed on all postings of full-time and part-time faculty positions. [III.A.20](#)

In addition, the faculty position hiring process requires applicants to confirm that all degrees have been earned from a U.S. accredited college or university and that any non-U.S. transcripts must include a certified evaluation with translation (e.g. NACES agency: www.naces.org) by the recruitment closing date; if not submitted, the application is considered incomplete.

Analysis and Evaluation

To date, the District's hiring policies and processes have yielded highly qualified employees due to the consistent implementation of the following procedures: Clear criteria and minimum and desirable qualifications are provided in job announcements/position descriptions for all personnel (as described under section III.A.1). As changes occur within the College, all positions are re-evaluated to ensure institutional effectiveness. A formal process for re-evaluation of classified staff positions is identified in the collective bargaining agreement with CSEA under Article 8: Pay and Allowances [III.A.7](#). This process is conducted once every five years. Classified staff employees as well as managers and administrators may also have their classified staff positions reviewed by request. A reclassification study was completed for all members of the District Administrator and Manager group in 2012. Finally, the College/District utilizes technology and effective advertising methods to ensure a large and diverse pool of applicants.

The College meets the standard.

Standard III.A.5 Human Resources

The institution assures the effectiveness of its human resources by evaluating all personnel systematically and at stated intervals. The institution establishes written criteria for evaluating all personnel, including performance of assigned duties and participation in institutional responsibilities and other activities appropriate to their expertise. Evaluation processes seek to assess effectiveness of personnel and encourage improvement. Actions taken following evaluations are formal, timely, and documented.

Evidence of Meeting the Standard

In order to ensure there are appropriate institutional responsibilities for personnel participation and evaluation lead to institutional improvement, all employee units are evaluated systematically and at stated intervals. The College/District has established written criteria for evaluating all personnel, including the performance of assigned duties and participation in institutional responsibilities and other activities appropriate to their expertise.

Faculty evaluation procedures and the Faculty Performance Evaluation Review are negotiated by the South Orange County Community College Faculty Association and the South Orange County Board of Trustees within the collective bargaining process. Article XVII of the 2015-2018 Academic Employee Master Agreement [III.A.21](#) governs faculty performance review and evaluations. [III.A.22](#)

The purpose of the evaluation process for tenured and part-time faculty is "to improve the teaching/learning process and delivery of student services," and "to provide a basis for

professional growth and development.” (section II. “Tenured Faculty Evaluation” of the Master Agreement). The evaluation consists of student evaluations (arranged through the appropriate vice president’s office) and a scheduled administrative review of the classroom/worksite/electronic visitation. Each evaluation may include information relevant to the instructional duties assigned to the faculty member, including participation in curriculum development and review, and in development and assessment of student learning outcomes. Tenured faculty are evaluated every three years and part-time faculty are evaluated during the first semester of their assignments and subsequent evaluations occur every sixth semester during which an instructional assignment is held, and no fewer than once every four years. In order to ensure that evaluations lead to improvement in job performance, a plan of action is developed for faculty members receiving an overall rating of “unsatisfactory.” All recommended improvement(s) are included in the plan of action, including the details(s) of activity for enhancement(s), date(s) of completion for each activity, and acceptable material(s) which document the completion of the activity. [III.A.21](#)

In accordance with Board Policy 4090 [III.A.23](#), both administrators and classified management are evaluated twice the first year and annually thereafter. Performance evaluations of academic administrators and classified management personnel are completed by the immediate supervisor using established procedures and forms developed under the direction of the Chancellor. [III.A.24](#)

In accordance with the CSEA contract [III.A.7](#), each permanent classified employee receives a written evaluation at least once every two years. New employees are on probation for twelve working months and are evaluated once during the initial six months of employment and again prior to the end of the probationary period. [III.A.25](#)

Analysis and Evaluation

At Irvine Valley College, personnel evaluations are connected and lead to institutional effectiveness and improvement. Each position is designed to contribute toward reaching the goal of the respective program or administrative unit which in turn contributes toward reaching the goals, objectives and mission of the College. Performance evaluations provide the vehicle for the College to ensure those goals and objectives are reached in an effective manner to achieve institutional improvement. The Faculty Performance Evaluation Criteria are designed to lead to improvement of job performance, institutional effectiveness, and the effectiveness of faculty in performing their classroom assignments and institutional responsibilities. [III.A.26](#) Examples of evaluative criteria that lead directly or indirectly to increased institutional effectiveness and improvement are: a) for classified staff: job knowledge; judgment; quality of work; planning and organizing; adaptability and flexibility; attempts to improve; b) for administrators and classified managers: managing people and resources; problem solving/decision making; strategic planning and organization; communications; quality; leadership; teamwork and service focus; c) for faculty: participation in professional development; demonstration of subject matter expertise; student

learning activities, student learning outcomes, and methods of evaluation within the course syllabus; demonstration of effective preparation for lectures and/or laboratory sessions; demonstration of effective methods of instruction and effective use of instructional technology.

The evaluation criteria of classified staff, administration and classified leadership, and faculty, including those performing their duties related to DE/CE activities, are designed to measure the effectiveness of personnel in performing their duties. Although a different rating scale is used for each employee group, the evaluation criteria for each group include effectiveness as a part of the process. [III.A.27](#)

The faculty evaluation process identifies areas for improvement of duties related to DE/CE activities to the extent that the course(s) being taught by the corresponding faculty is online or hybrid. Although the evaluation process does not proactively identify the faculty's future interest in this field or need for development, the faculty professional development process, as documented in section III.A.14, encourages these areas.

According to the 2015 Employee Survey [III.A.19](#), 64 percent of respondents (excluding those who selected Don't Know/NA) agreed that job performance evaluations are conducted systematically at regular intervals. In addition, 72 percent of respondents (excluding those who selected Don't Know/NA) agreed that job performance evaluations encourage improvement.

The College meets the standard.

Standard III.A.6 Human Resource

The evaluation of faculty, academic administrators, and other personnel directly responsible for student learning includes, as a component of that evaluation, consideration of how these employees use the results of the assessment of learning outcomes to improve teaching and learning.

Evidence of Meeting the Standard

The faculty evaluation procedures and the Faculty Performance Evaluation Review are negotiated by the South Orange County Community College Faculty Association and the South Orange County Board of Trustees within the collective bargaining process. Article XVII of the 2015-2018 Academic Employee Master Agreement governs faculty performance review and evaluations. Since 2007 the Master Agreement has included the evaluation of probationary, tenured and part-time faculty to include verified and documented information regarding participation in curriculum development and review, and in development and assessment of student learning outcomes. [III.A.21](#)

Analysis and Evaluation

Faculty work together to assess Student Learning Outcomes (SLOs) in both face to face and DE/CE courses every year. Results of the SLOs are discussed at both the department and school level in conjunction with the academic chair and school dean in order to make adjustments to teaching strategies to improve student learning.

At the school/departmental level meetings, faculty discuss the results of the SLO assessments and plans are made by updating the program review as well as requesting additional resources to improve their programs, including DE.

The College meets the standard.

Standard III.A.7 Human Resources

The institution maintains a sufficient number of qualified faculty, which includes full-time faculty and may include part-time and adjunct faculty, to ensure the fulfillment of faculty responsibilities essential to the quality of educational programs and services to achieve institutional mission and purposes.

Evidence of Meeting the Standard

In order to maintain a sufficient number of qualified faculty with full-time responsibility to the institution, the Academic Senate and the Administration have developed and implemented the IVC Full-time Faculty Hiring Priority List Development Process. [III.A.28](#) The full-time faculty priority list is developed annually in the spring by the Academic Senate in collaboration with the college president and vice presidents. [III.A.29](#)

In order to establish a final priority list which reflects the programmatic needs of the academic school, positions are rotated from category 1 to category 2 to category 3. In accordance with the process, the final priority list is forwarded to the college president for final disposition and subsequently to the Board of Trustees for approval, pending funding. The ultimate decision regarding how many faculty positions to fill at Irvine Valley College and Middleback College is determined by the college presidents, the Chancellor, and the Board of Trustees. The minimum number of funded faculty positions is based on the District Full-Time Faculty Obligation Number set by the California Community College Systems Office, and California Education Code §84362(d).

Based upon funding, the District Full-Time Faculty Obligation Number set by the California Community College Systems Office, and California Education Code §84362, with the approval of the college president, the Chancellor, and the Board of Trustees, the College hired 15 faculty positions in 2014-15, 6 faculty positions in 2015-16, and 13 faculty positions

in 2016-17.

The district wide Faculty Obligation Number (FON) calculations for the most recent 3 years are below [III.A.30](#).

- Fall 2016 – Actual P-2 and Compliance Final number were equal at 376.8
- Fall 2015 – Actual P-2: 398.8 which was higher than the Compliance Final number: 366.8
- Fall 2014 - Actual P-2 and Compliance Final number were equal at 353.8

The district wide 50% Law calculations for the most recent 3 years were 2015-16 in 52.82 percent, 2014-15 in 51.89 percent, 2013-14 in 51.45 percent.

The institution determines appropriate staffing levels for each program and service, including those involved in the offering of programs and courses in DE/CE mode, utilizing the Faculty Hiring Priority List Development Process. As noted above, this process considers, among other factors, Academic Senate recommendations based on department and program needs (category or tier 2) which contains positions determined necessary by the Academic Senate to maximize the full-time/part-time staffing ratio in each department or program identified in the program review process. In addition, the Office of Instruction recommendations include positions based on programmatic need of an existing program, expansion of an existing program and/or service due to demand, or addition of a new program and/or service.

Classified staffing levels for each program and service, including those involved in the offering of programs and courses in DE/CE mode, are determined utilizing the Classified Hiring Priority List Development Process, as documented in section III.A.9.

College wide analyses and discussions that have led the institution to determine the organization of administrative and support staffing for DE/CE mode have taken place primarily at the Online Education Task Force meetings. [III.A.31](#)

Analysis and Evaluation

According to the 2015 IVC Employee Survey, 78 percent of full-time faculty members and college administrators who answered the survey were either “very familiar” (41%) or “somewhat familiar” (38%) with the Full-Time Faculty Hiring Priority List Development Process. In addition, of those who were at least “a little familiar” with the Full-Time Faculty Hiring Priority List Development Process, 61 percent considered the process either “very effective” (11%) or “somewhat effective” (51%) (2015 Employee Satisfaction Survey Results: Administrators [III.A.32](#), FT Faculty [III.A.33](#))

The number and organization of the institution’s personnel work quite effectively to support its DE programs. Over the past five terms an average of 73 percent of students who took an online class rated the experience as “positive” or “very positive.” In spring 2016 the

percentage rating the experience as “positive” or “very positive” reached 80 percent. (spring 2014 [III.A.34](#), fall 2014 [III.A.35](#), spring 2015 [III.A.36](#), fall 2015 [III.A.37](#), spring 2016 [III.A.38](#)). The College Online Education Strategic Plan delineates strategic goals and objectives to further enhance student experience and promote student success through online education. [III.A.39](#)

The College maintains sufficient number of qualified faculty to assure the fulfillment of faculty responsibilities. The Faculty Hiring Priority List Development Process assures the staffing levels for each program and service are appropriate. The Faculty Obligation Number and 50% Law, among other factors, determine the minimum levels of faculty the College must maintain.

The College meets the standard.

Standard III.A.8 Human Resources

An institution with part time and adjunct faculty has employment policies and practices which provide for their orientation, oversight, evaluation, and professional development. The institution provides opportunities for integration of part time and adjunct faculty into the life of the institution.

Evidence of Meeting the Standard

Full-time faculty hiring criteria, policies, and procedures have been jointly developed and mutually agreed upon between the Board of Trustees and the Academic Senate, and approved by the Board. Policies and procedure for part-time faculty are similar to those for full-time faculty in many ways, however they are not as well documented as those for full-time faculty. Since a majority of the college courses are taught by part-time instructors, this area of instruction is a college priority. Part-time faculty orientations usually occur at school meetings during Faculty Professional Development Week and individually with the OHR and the department chair or office staff when faculty members pick up textbooks and course outlines.

All new faculty, including part-time and full-time faculty, receive a brief orientation to the college by the vice presidents of Instruction and Student Services (fall 2016 Faculty Professional Development [III.A.40](#) page 4). In addition, the *Faculty Toolkit* [III.A.41](#) contains a wealth of information for new faculty including part-time faculty who may not be familiar with the College processes and practices. The OHR has developed a special page called “Part-time Faculty’s Assistant” [III.A.42](#), in order to provide relevant information at the District level. Lastly, part-time faculty are invited to attend full-time faculty department and school meetings.

Oversight and evaluation of part-time faculty is well-defined and is conducted in accordance with the 2015-2018 Academic Employee Master Agreement ([III.A.21](#) section III.A.5). These practices demonstrate that part-time and adjunct faculty meet the criteria of this Standard.

Part-time faculty have opportunities to participate in professional development activities. In addition to these professional development opportunities, the College has a long standing practice of including part-time faculty into the life of the campus by extending these employees invitations to campus-wide events and various functions.

Analysis and Evaluation

IVC has employment policies and practices which provide for part-time faculty orientation, oversight, evaluation, and professional development, as well as opportunities for integration of part time and adjunct faculty into the life of the institution.

As documented in Standard III.A.12, Table III.A-1: 2014 District-wide Climate Survey Results: Job Climate by Bargaining Unit and Length of Employment, 50 percent of part-time faculty agree that they have the opportunity to participate meaningfully in decisions at work which is a drastic improvement since 2010 when only 29 percent of part-time faculty agreed with that statement. In addition, 84 percent of part-time faculty agree that they are treated with respect, 70 percent of the respondents agree their work is appreciated, 67 percent of the part-time faculty agree they are able to participate in professional development and 57 percent of the respondents agree they have a strong sense of community at work.

The College meets the standard.

Standard III.A.9 Human Resources

The institution has a sufficient number of staff with appropriate qualifications to support the effective educational, technological, physical, and administrative operations of the institution.

Evidence of Meeting the Standard

The IVC Classified Hiring Priority List Development Process (CHPLD) [III.A.43](#) provides for the development of a classified hiring list within each school or department through collaboration of the administrator or manager and the departmental staff. Requests for new classified positions are submitted using the Resource Request Form. The form contains a comprehensive questionnaire aimed to assess the urgency of the position being requested [III.A.44](#). The list is reviewed and ranked by The Classified Priority List Development Task Force which makes recommendations to SPAC, which in turn makes final recommendations to the College president. This process ensures the College hires a sufficient number of the

most critical staff to support the effective operations of the College, in a fiscally limited environment,

The appropriateness of qualifications of support staff is determined through the hiring process, (as documented in section III.A.1), performance evaluation, (as documented in section III.A.5), and professional development processes, (as documented in section III.A.14).

Analysis and Evaluation

The institution has a sufficient number of staff with appropriate qualifications to support the effective educational, technological, physical, and administrative operations of the institution. According to the 2015 Employee Satisfaction Survey, 37 percent of employee respondents were either “very familiar” (17%) or “somewhat familiar” (20%) with the Classified Hiring Priority List Development Process. Of those respondents who were at least “A little familiar” with the Classified Hiring Priority List Development Process, 48 percent considered the process either “very effective” (8%) or “somewhat effective” (40%). [III.A.19](#)

The College meets the standard.

Standard III.A.10 Human Resources

The institution maintains a sufficient number of administrators with appropriate preparation and expertise to provide continuity and effective administrative leadership and services that support the institution's mission and purposes.

Evidence of Meeting the Standard

In September 2015, the Board of Trustees were presented information on administrative levels at Saddleback College, Irvine Valley College and District Services in comparison to similar multi-college districts. The District hires several different categories of employees. The California Community College Chancellor's Office defines four broad employee categories: Educational Administrators; Academic Tenure/Tenure Track; Academic Temporary; and Classified. The report contained an exhibit obtained from the California Community College Chancellor Office's comparing the proportion of educational administrators at South Orange County Community College District to the proportion of educational administrators at the other twenty-six (26) multi-campus districts [III.A.45](#). Educational administrators at multi-campus districts account for between 1.53% and 5.71% of each district's total employee count. Statewide, educational administrators make up 2.37% of the total employee count, with a median of 2.24%. At SOCCCD, educational administrators make up 1.99% of the total employee count, the eighth lowest percentage in California.

Analysis and Evaluation

To ensure that the College maintains sufficient levels of administrator/manager positions in support of its mission, the following positions have been added since 2009: Dean of Social and Behavioral Sciences, two Construction Managers/Assistant Director of Facilities, Capital Projects, Assistant Director of Marketing and Creative Services, Assistant Director of Foundation, Director of Student Success and Support Program, and Outreach Director.

Presently, there are no state requirements and/or formula which assist colleges in determining the appropriate number of administrative staffing ratios. The College evaluates the effectiveness, number and organization of personnel through the analysis of available funding and requested human resources through the resource request process, in coordination with development of the Faculty and Classified Staff Priority List Development processes. This coordination is essential due to the limited resources available for ongoing commitments. The appropriate number, qualifications and organization of administrators are determined through workload assessment based on programmatic needs including those stemming from new/expanded categorical program requirements. The assessments are conducted by the immediate superior, and vice president and, ultimately, the College president. In addition, a consultant assists the District with the process of establishing new positions and the reassessment of existing positions. The consultant works with the OHR department and the appropriate dean/director or vice president to determine the qualifications of the positions and organizational structure. The new positions go through various vetting processes at the College, depending on the nature of the change.

The College meets the standard.

Standard III.A.1 Human Resources

The institution establishes, publishes, and adheres to written personnel policies and procedures that are available for information and review. Such policies and procedures are fair and equitably and consistently administered.

Evidence of Meeting the Standard

The District has established numerous board policies and administrative regulations promoting equal opportunities in employment for all persons and prohibiting discrimination and harassment [III.A.46](#) For example, Board Policy 4011 (Section 3.) provides: “The South Orange County Community College District shall recruit, hire, and promote in all job titles without regard to ethnic group identification, race, color, religion, sex, national origin, ancestry, physical or mental disability, age, medical condition, marital status, military service, sexual orientation, or any other basis protected by law. The District shall comply with the Board of Governors regulations relating to equal employment opportunity.” [III.A.2](#)

A Human Resource Specialist, the committee chair, or an Equal Employment Opportunity representative serves as a non-voting member of all hiring committees to ensure adherence to employee hiring procedures. In addition, the Human Resources Specialist conducts an initial orientation for hiring committee members during which all hiring committee members sign a conflict of interest and confidentiality statement per Board Policy 4011.2. [III.A.47](#)

All Board policies, including personnel policies, are publicized on the District website and members of the Board Policy and Administrative Regulation Advisory Council receive updated policies and regulations digitally. In addition, the OHR has conducted district services Road Tours explaining personnel policies [III.A.48](#). The vice chancellor of HR routinely attends managers' meetings at IVC to explain these policies.

Analysis and Evaluation

As documented in Standard III.A.1, numerous board policies and administrative regulations exist to ensure personnel policies are consistently and equitably implemented to result in fair treatment of personnel. In the event of alleged violations, the faculty and classified collective bargaining agreements contain grievance procedures in order to ensure fair treatment of personnel. In addition, the District conducts mandatory workshops regarding harassment and diversity annually.

The District has established numerous written board policies and administrative regulations regarding personnel matters. The Board Policy and Administrative Regulation Advisory Council (BPARAC), as a district wide participatory governance committee, reviews and makes recommendations regarding all board policies and regulations, including personnel policies [III.A.49](#). These policies are strictly enforced, assuring a fair and equitable treatment of personnel.

The College meets the standard

Standard III.A.12 Human Resources

Through its policies and practices, the institution creates and maintains appropriate programs, practices, and services that support its diverse personnel. The institution regularly assesses its record in employment equity and diversity consistent with its mission.

Evidence of Meeting the Standard

Board policy 4010 (Commitment to Diversity) clearly indicates the District's commitment to employing qualified people who are "dedicated to student success" in an academic environment" of "cultural awareness" and diversity. [III.A.50](#)

More specifically, Irvine Valley College remains committed to creating an environment which fosters an appreciation of equity and diversity. According to the College Mission Statement, "[T]he College is devoted to student learning and success through exemplary and integrated teaching and support services, effective stewardship, and continued accessibility in a diverse community."

The institution assures the effectiveness of its policies and practices regarding equity and diversity through consistent application of those policies and practices. Administrators and classified managers have diversity as one of their performance evaluation criteria. Recognizing the importance of diversity, the district services retains a position of Director, Human Resources, Employer/Employee Relations, EEO, Diversity Compliance & Training, responsible for developing and coordinating recruitment and retention of faculty and staff, employee diversity programs, and sexual harassment and discrimination prevention programs.

The College and the District remain committed to providing opportunities for all employees to increase their awareness and appreciation of issues of equity and diversity. As documented in Standard III.A.1 and in Standard III.A.5, Board Policies and College and District practices have been established to ensure sensitivity to diversity and equal employment opportunities. All administrative, classified manager, faculty, and classified staff interview questions during hiring contain a "sensitivity to diversity" category which requires all applicants to explain their experience in dealing with people of diverse backgrounds. In addition, all employees are required to attend regular training sessions in recognizing and preventing all forms of harassment including sexual harassment. [III.A.51](#), [III.A.52](#)

Moreover, the College adopted a diversity requirement for the Associate of Arts degree and the Associate of Science degree. The College offers a variety of courses to fulfill this requirement including courses in Anthropology, Art, Dance, Geography, History, Humanities, Human Development, Japanese, Literature, Management, Music, Political Science, Sign Language, Sociology, and Communication Studies and Global Studies. (College 2016-17 catalog [III.A.53](#))

The District has written policies and procedures ensuring fairness in all employment procedures, as indicated above. A Human Resource Specialist, or another EEO representative, [III.A.54](#) serves as a non-voting member of all hiring committees to ensure adherence to employee hiring procedures. In addition, the Human Resources Specialist conducts an initial orientation for hiring committee members. All hiring committee members sign a conflict of interest and confidentiality statement per Board Policy 4011.2 (Confidentiality and Conflicts in Hiring [III.A.2](#)).

The OHR has coordinated the development of a District Wide Equal Employment Opportunity Committee that created the SOCCCD Equal Employment Opportunity Plan ([III.A.55](#)).

Annually, the District reviews all employment records through the submission of the Management Information System Report to the State Chancellor's office as well as the Equal Opportunity 1 Record. These reports provide a detailed breakdown of all employees for many purposes, including supporting diversity of personnel.

As documented in Standard III.A.11, the District has established policies and procedures, including hiring policies, and employee master agreements, regarding the treatment of all personnel in support of diversity. [III.A.56](#)

Analysis and Evaluation

The institution's policies and practices in promoting understanding of equity and diversity issues are effective. The institution assesses the effectiveness of these policies and practices through surveys. Irvine Valley College employees who responded to the 2015 Employee Survey [III.A.19](#) were not only positive when assessing the College's efforts in promoting a diverse employee and student community. Specifically, significantly large majorities of employees agreed that "Irvine Valley College promotes employee diversity" (85%), "Irvine Valley College promotes student diversity" (87%), and "Employees promote the development of a diverse educational and cultural campus environment" (86%). Furthermore, there were no significant differences in opinions based on bargaining units. Based on the survey data, the College's policies and practices are effective in promoting understanding of equity and diversity.

In addition, individual programs, practices, and services are evaluated on a regular basis through participant feedback and surveys and the information received used to improve future presentations. As an example, attendees of the Cultural Competence Summit (CCS) were asked to complete overall evaluations of the summit in general as well as of the individual speakers. A total of 75 attendees (27.3% of all attendees) completed overall evaluations of the summit. Attendees had overwhelmingly positive feedback about the CCS, giving it an average score of 4.0 out of 4. All three speakers received highly positive feedback as well (detailed below). The organization of the conference received high ratings,

with every aspect of the organization of the conference receiving a rating of at least a 3.9 out of 4. [III.A.57](#)

In the fall 2014 Professional Development Survey all employees were asked about their interest in working with diverse students. Seventy-two percent of employees were most interested in increasing their awareness about various cultures, and 71 percent were most interested in working with students with disabilities.

The institution determines what kinds of support its personnel need through other various means. The Director of Human Resources, Employer/Employee Relations (EER), Diversity Compliance & Training coordinates diversity programs and provides advice and support to the College staff as needed. College administrators, including vice presidents and the College president, maintain an open-door policy for all employees of the College. For example, in 2015-16 the vice president of College Administrative Services met with the College custodial staff one-on-one to address their concerns relative to personnel issues within the department. The staff expressed their appreciation for having the opportunity to communicate their concerns to the administration. [III.A.58](#)

Through its policies and practices, the institution creates and maintains appropriate programs, practices, and services that support its diverse personnel. The Board Policies, administrative regulations, Employee Grievance Procedures, and Student Complaint Procedures provide a sound framework to ensure the fair treatment of personnel and students. Grievances and/or complaints are investigated in a timely manner in order to ensure integrity in the treatment of personnel and students. Within the 2014 District wide Climate Survey respondents were asked several questions that indirectly measure employees' perception of their job climate, including whether or not they believed they have been treated with respect and whether or not they feel their work is appreciated. The table below illustrates that, in general, full-time faculty tended to feel they have more access to professional development, have a greater opportunity to participate meaningfully in decisions at work, and have a stronger sense of community than do part-time faculty or classified staff. Part-time faculty, on the other hand, were more likely to report they were treated with respect than were full-time faculty or classified staff. It is noteworthy that the part-time faculty responses have improved significantly since 2010 relative to their opportunities in participating in decision-making (from 29% to 50%) and whether they are treated with respect (53% to 84%). Full-time and part-time faculty had similar levels of feeling their work is appreciated, and both faculty groups were more likely to feel this way than were classified staff. The table also shows that newer employees (<11 years) were more likely to feel that they are appreciated, that they are treated with respect, that they could participate meaningfully in decisions at work, and that they experienced a stronger sense of community at work than were longer tenured employees (11+ years).

Table III.A-1: 2014 District wide Climate Survey Results: Job Climate by Bargaining Unit and Length of Employment

Item	Full-Time Faculty (n=90)	Part-time Faculty (n=87)	Classified (n=77)	<11 years (n=166)	11+ years (n=88)	Total (n=254)
I have the opportunity to participate meaningfully in decisions at work.	68%	50%	56%	64%	48%	59%
I am treated with respect.	77%	84%	65%	81%	65%	76%
I am able to participate in professional development opportunities I am interested in.	83%	67%	46%	66%	68%	71%
I feel we have a strong sense of community at work.	69%	57%	52%	63%	54%	60%
I feel my work is appreciated.	68%	70%	46%	74%	56%	67%

The College meets the standard.

Standard III.A.13 Human Resources

The institution maintains a written code of professional ethics for all of its personnel, including consequences for violations.

Evidence of Meeting the Standard

In order to foster ethical behavior in employees, numerous board policies and administrative regulations are in place which reference and encourage ethical behavior in all personnel, as well as members of the Board of Trustees, in all areas of professional conduct such as Non-Discrimination-Equal Opportunity, Electronic Communications, Prohibition of Workplace Violence, Employment of Relatives, Prohibition of Harassment and Discrimination as well as Whistleblower Protection.

In addition to the above board policies and administrative regulations, Board Policies governing the hiring of administrators and managers (BP 4011 [III.A.47](#)), faculty (BP 4011.1 [III.A.1](#), AR 4011.1 [III.A.4](#)), and classified staff (BP 4011.3 [III.A.3](#)), delineate the inherent professional responsibility of administrators, managers, faculty, classified staff, and members

of the Board of Trustees to ensure the integrity of the hiring processes and compliance with federal and state statutes relating to equal employment opportunities. Board Policy 4011.2 (Confidentiality and Conflicts in Hiring [III.A.2](#)) ensures confidentiality in hiring and prohibits personnel from participating in the hiring process in the event of a conflict of interest.

Analysis and Evaluation

The institution does not have one standardized written code of ethics for all personnel. However, the administration and the Board of Trustees have written codes of ethics, and numerous board policies contain written statements of professional and ethical conduct pertaining to all employees. Further, faculty professional conduct is governed by the Academic Employee Master Agreement [III.A.21](#) Section XIII (disciplinary actions) and the California Education Code. Classified staff professional conduct is governed by the California School Employees Association Contract, [A.7](#) Article 15, (disciplinary actions).

The College meets the standard.

Standard III.A.14 Human Resources

The institution plans for and provides all personnel with appropriate opportunities for continued professional development consistent with the institutional mission and based on evolving pedagogy, technology, learning needs. The institution systematically evaluates professional development programs and uses the results of these evaluations as the basis for improvement.

Evidence of Meeting the Standard

The College has supported and continues to support professional development activities for College faculty, classified staff, and classified managers and administrators which are consistent with the Mission and designed to meet the needs of personnel.

Pursuant to the 2015-2018 Academic Employee Master Agreement [III.A.21](#), faculty are required to meet a 38-hour contractual obligation for professional development. In order to assist faculty in meeting this obligation, workshops are held during the first week of the fall and spring semesters and are designed to enhance teaching and student learning as well as train personnel with regards to instructional technology. Professional Development workshops are also offered throughout the academic year. Classified staff are invited to attend the workshops with the permission of their supervisor. [III.A.59](#), [III.A.40](#)

Classified staff schedule workshops and half-day retreats designed to provide opportunities

for professional development consistent with the institutional mission (IVC Classified Senate Professional Development Summit [III.A.60](#)); classified staff are also invited to attend the workshops designed for academic faculty, with the permission of their supervisor.

Additionally, the College has provided funding for participation in professional conferences for faculty, classified staff, and administrators from the college general fund; indeed, the funding has routinely been available in the absence of state funding. Faculty and administrators are allocated funds to attend professional conferences related to teaching and student learning, curriculum development, discipline specific conferences, student learning outcomes assessment, accreditation, and instructional technology training. Classified staff were awarded professional development funding through two different channels: 1) each area vice president and the College president receive an allocation of funds based on the number of classified employees in their respective areas; 2) the Classified Senate receives a separate allocation managed by the Classified Staff Development Committee.

Article XVI of the 2015-2018 Academic Employee Master Agreement [III.A.21](#) provides funding for semester or year-long sabbatical leaves. Sabbatical leave proposals are evaluated and approved by the District Sabbatical Leave Committee [III.A.61](#).

In addition to the Annual District New Faculty Orientation [III.A.62](#), the College holds monthly New Faculty Orientation Workshops (open to all faculty) designed to provide faculty with the opportunity to discuss teaching and student learning, information regarding contractual obligations, board policies and administrative regulations, and college committee and decision-making processes. Numerous technology training workshops are provided throughout the year for all employees.

The Academic Senate hosts Distinguished Academic Lecture Series (DALs). During the 2015-2016 academic year, the Senate sponsored three presenters: Michelle Evans, Norman Stolzoff, and Nathan LeWall.

Analysis and Evaluation

The institution identifies professional development needs of its faculty and other personnel through surveys and various assessments. The 2014 Professional Development Survey was administered to all employees via an e-mail invitation at the end of the spring 2014 semester. A total of 207 employees responded to the survey, yielding a response rate of 19 percent. The largest group of respondents was classified staff, followed by full-time faculty [III.A.58](#). The process utilized to identify professional development needs for faculty has been managed by the Academic Affairs Committee where the activities that occur during Flex Week are discussed and arranged based on the responses to the evaluation forms and the variety of conferences that the individual committee members attend during the year. The need for classified professional development can be identified through employee self-assessment or through the assessment of their immediate supervisor, and the need is addressed utilizing

funds allocated to Classified Senate or the respective vice president's area.

The processes to ensure that professional development opportunities address those needs is based on a meaningful evaluation of professional development activities. The Office of Research conducts a follow-up survey after each Flex Week. Additionally, within the required application for faculty professional development funds, there are questions that pertain to the 9 categories that are approved by the state. There are also brief descriptions that must be filled out as to how the event under consideration will pertain to their job duties and what outcomes they will get from attending.

The impact of faculty professional development activities on the institution is assessed through the Academic Affairs Committee which coordinates faculty professional development activities and provides insight to current trends and developments within our community. The committee members stay involved with their discipline and return from conferences with up-to-date information. This information is disseminated to the faculty in a timely manner so it may be used immediately.

The College is committed to providing professional development opportunities for faculty, classified staff, and classified managers and administrators. This commitment is demonstrated through the allocation of college general funds in the absence of state funding and the resources provided by the College to meet the needs of its personnel. Faculty professional development resources and workshop planning is administered through the Academic Affairs Committee [III.A.63](#)

The College meets the standard.

Standard III.A.7 Human Resources

The institution make provision for the security and confidentiality of personnel records. Each employee has access to his/her personnel records in accordance with law.

Evidence of Meeting the Standard

Board Policy 4002 (Administrators and Classified Managers' Personnel Files [III.A.64](#) provides for the security and confidentiality of administrative and classified manager personnel records and ensures these individuals have access to their personnel records. Article XVIII (Personnel Files) of the 2015-2018 Academic Employee Master Agreement [III.A.21](#) contains the provisions for security and confidentiality of faculty personnel files as well as the procedures to provide for faculty access to their records.

Article 6 (Personnel Files) of the California School Employees Association Contract 2015-2018 governs the security, confidentiality and conditions for access to personnel records for

classified employees. [III.A.7](#)

Analysis and Evaluation

The College makes provision for the security and confidentiality of personnel records. Each employee has access to his/her personnel records in accordance with law. The OHR is committed to maintaining secure and confidential personnel files for all employees. The District adheres to the policies, contractual provisions, and State and Federal Statutes governing the management of employee personnel files. Only authorized personnel are given access to personnel records.

The College meets the standard.

OBSOLETE

Standard III.B: Physical Resources

Standard III.B.1 Physical Resources

The institution assures safe and sufficient physical resources at all locations where it offers courses, programs, and learning support services. They are constructed and maintained to assure access, safety, security, and a healthful learning and working environment.

Evidence of Meeting the Standard

Each of the four educational venues offered by IVC—the main campus, the Advanced Technology and Education Park (ATEP), the Early College Program (Beckman and El Toro high schools), and the Distance Education (DE) program—provide assurances for a safe, accessible, secure and healthful learning environment through planning, oversight and evaluation by the Facilities and Maintenance Operations (FMO) department with the District Facilities Planning department, college wide shared governance committees and task force groups, extensive safety training and illness prevention measures for college employees, and on-line surveys which gather valuable data from students, faculty and staff relating to overall College experience, facilities condition, health and safety, facilities' access, and general satisfaction.

In order to meet its obligations of maintaining a safe and healthful workplace within the College campus communities, the South Orange County Community College District (SOCCCD) has developed and implemented the Injury & Illness Prevention Program (IIPP), for which the Chancellor serves as coordinator. [III.B.1](#)

The Chancellor has designated the Vice Chancellor of Business Services and College presidents of Saddleback College and Irvine Valley College as IIPP Coordinators with site-specific responsibility for the IIPP. The Vice Chancellor and presidents are responsible for ensuring that District policies and practices are implemented, employees are provided a safe and healthful workplace and operations are in compliance with the IIPP and applicable federal, state, and local regulations and standards.

To ensure the prescribed standards of prevention programs are upheld, IVC has formulated a wide network of planning and oversight measures to ensure all students and staff benefit from the highest quality in technology upgrades and physical resource planning, particularly in regard to safety and security. At the campus level the Director of Facilities, along with the Director of Technology and the Chief of Police, work alongside the Campus Safety Task Force to ensure the proper oversight and execution of all planning as it relates to safety and security. Building safety walks are conducted on a monthly basis [III.B.2](#), with the committee meeting quarterly [III.B.3](#). Deficiencies noted in the safety walks are addressed in one of two ways: 1) immediate concerns are addressed through the Maintenance Direct Work Order

System; 2) long-range and more costly repairs are addressed through the Resource Request process. [III.B.4](#)

The College employs the services and oversight of various other departments, programs and services to help ensure access, safety, and security and provide a healthful learning and working environment:

- The Maintenance Direct Work Order System [III.B.5](#)
- The Irvine Valley College Campus Safety Task Force (CSTF) [III.B.3](#)
- District's Risk Management [III.B.6](#)
- Campus Safety / Police Department [III.B.7](#)
- Health, Safety, Security Annual Certifications [III.B.2](#)
- Division of State Architect
- Custodial Services
- Additional off-site educational programs
- Online Education Strategic Plan [III.B.9](#) (May 16, 2016).
- The Online Education Task Force (OETF) [III.B.10](#)

Analysis and Evaluation

The College meets local, state and federal guidelines for access, safety, security, construction codes/standards, and presents a healthful learning environment. The facilities are well-maintained and are inspected weekly to ensure compliance with College standards. The College utilizes approval, oversight and feedback processes for determining deficiencies in any of these areas. If deficiencies are discovered, the College addresses the concern promptly to assure the College learning and working environment is safe, secure, healthful, and accessible. In order to improve access and ensure proper compliance with ADA codes and standards, the college has completed an ADA transition plan to identify all potential barriers to proper access of physical resources. Irvine Valley College and South Orange County Community College District is responsible for assuring that the ATEP, off-campus programs, and DE programs meet local, state and federal guidelines to ensure access, safety, security and a healthful learning environment for students and staff.

The College meets the standard.

Standard III.B.2 Physical Resources

The institution plans, acquires or builds, maintains, and upgrades or replaces its physical resources, including facilities, equipment, land, and other assets, in a manner that assures effective utilization and the continuing quality necessary to support its programs and services and achieve its mission.

Evidence of Meeting the Standard

Irvine Valley College diligently pursues growth opportunities within its physical plant and is constantly expanding its reach of physical resources in order to meet the demands of a rapidly growing population throughout Southern California. The college currently occupies 85 acres of a 100 acre site and is actively pursuing the planning and development of the remaining 15 acres of the original property.

Student success is always at the forefront of capital improvement planning, and the College has been providing new and improved physical resources. IVC is in the process of planning and ground-breaking on several new projects and is currently seeing the culmination of construction on other significant new facilities. [III.B.11](#)

Examples include:

- New Building Construction
- District-wide Parking Study
- Parking Lot / Solar Shade Structure

A prime example of an effective upgrade of current college resources that ensures continued support of programs and services is the exterior lighting retrofit:

As an energy-conscious public entity, IVC took steps toward achieving the realization of a long-standing goal to greatly reduce the College's energy consumption by committing to a complete exterior lighting retrofit [III.B.12](#). By July 2014 IVC had undertaken the ambitious task of converting the exterior lighting and lighting controls of the campus to energy-efficient LED lighting/controls throughout the parking lots, walkways and common areas. This improvement has now translated into valuable energy savings:

- Total Savings in Kilowatt-Hours/Year: 400,000 kwh
- Year 1 Total Electricity Savings in dollars: \$53,000
- Year 1 Maintenance Savings in dollars: \$25,000

The College was able to offset the cost of the entire project by utilizing the state's energy savings incentive generated by Proposition 39. By capitalizing on these generous funds, IVC will realize an estimated total of \$800,000 of taxpayer savings in energy consumption/maintenance and an estimated savings of 4,000,000 Kilowatt-Hours of energy over the next decade. The College has diligently planned each new building with the LEED standards setting the mark for water conservation, healthier air quality and improved energy efficiency. Each new IVC building has achieved LEED Certification or at minimum, LEED 'equivalency' ratings.

In addition to meeting the needs and growth of the College through capital improvement, the campus community is committed to responsibly caring for and sustaining the natural resources surrounding the College. The College has formed an aggressive scheduled

maintenance plan and implemented measures to reduce potable water consumption and conserve energy. [III.B.13](#)

Analysis and Evaluation

The College utilizes three main resources to ensure program and service needs determine equipment replacement and maintenance:

1) [Resource Request Process III.B.14](#) (See III.D.1)

The Resource Request Form submission process is an all-access, transparent process allowing members of College departments, programs and services the ability to evaluate and determine the need for maintenance of existing and/or replacement of outdated physical resources. As discussed elsewhere in this Accreditation report, resource requests follow the strategic planning process which evaluates existing conditions against the requested need.

2) [Technology Advisory Task Force \(TATF\) III.B.15](#) (See III.C.1)

The Technology Advisory Task Force advises the Director of Technology Services about priorities in deployment and assignment of technology. The committee evaluates the effectiveness of strategic planning initiatives, reviews new equipment requests, monitors ongoing requests, evaluates resource requests and reviews current tech support issues. TATF reviews the latest education technologies with a focus on faculty and the success of College programs and services. TATF monitors and evaluates the progress and effectiveness of the Technology Plan [III.B.16](#) and makes appropriate recommendations concerning strategic planning for technology.

3) [Maintenance Direct Work Order System III.B.5](#)

Maintenance Direct (School Dude) is an all-access work order system that provides an efficient vehicle for addressing any condition needing the attention of Facilities and Maintenance personnel for inspection, maintenance and possible replacement. The work order system ensures that programs and service needs are met in a timely and efficient manner as each work order is tracked and monitored through its completion; the submitter is contacted upon completion.

The College utilizes three main resources when evaluating facilities and equipment effectiveness in terms of meeting the needs to programs and services:

1) [Campus-wide Surveys](#)

College-wide surveys are conducted annually and provide the College with valuable data related to facilities and equipment effectiveness as well as the general condition of the campus. These targeted surveys help to ensure the College goals and standards are met. Survey results are examined for any

anomalies or large changes. Substantial declines in satisfaction lead to the development of objectives and/or strategies in the department's Administrative Unit Review. The resulting analysis determines a course of action depending on the magnitude of the repair, such that replacement or maintenance of equipment and facilities may include one or more of the following: 1) Vetting through shared governance groups and the College decision-making process as prescribed in the *Planning and Decision-Making Manual* (PDM); 2) Submission of a resource request to be vetted and rated through shared governance groups; 3) Submission of a Maintenance Direct (School Dude) work order.

2) Administrative Unit Reviews (AURs)

AURs ensure the College's student support, program and administrative services are effective and responsive to the local college community within the limitations of available resources. Through a review of AURs, key unit indicators, and unit objectives, the College may assess its effectiveness and continue to offer high quality student support, programs and administrative services. The results of AUR are incorporated into the strategic planning and resource allocation decision processes of the College and provide information for unit planning and improvement.

3) Facilities Planning: Facilities Director

Facilities Planning evaluates the effectiveness of the College's facilities and equipment in meeting the needs of programs and services by reviewing, evaluating and prioritizing all approved facilities-related resource requests. Existing equipment inventories and/or facilities' condition are reviewed and evaluated against information provided on the request form in order to provide accurate feedback to the submitter prior to the shared governance review.

To ensure that program and service needs determine equipment replacement and maintenance for DE or both online and the Early Education program, IVC utilizes the following resources:

Online Education Committee Oversight

The Online Education Task Force (OETF) [III.B.17](#) provides advice to the dean, Business Sciences, Online and Extended Education and the Director of Technology on issues related to student success in online education, which includes online, hybrid courses, and web-enhanced courses. According to the Irvine Valley College Online Education Strategic Plan [III.B.9](#), updated spring 2016, the committee reviews and recommends approval of all policies, procedures and resources affecting online education. Planning, review, evaluation and oversight are performed by the OETF and must align with IVC's goals and objectives.

AUR/Resource Request

The OETF annually reviews its Administrative Unit Outcomes (AUOs), contained within the Administrative Unit Review (AUR), which summarizes the data related to IVC's online course offerings, including, but not limited to, student survey data and student demographics. The stated outcomes for the unit will produce strategies that may require additional resources or maintenance of existing equipment in order to accomplish the goals and outcomes. The OETF has the ability to enter a resource request into the system in order to fulfill an online education need as identified by review of the Administrative Objectives and resulting strategies. According to the OETF's *Administrative Unit Review: B4. Unit Effectiveness: Resources* ([III.B.18](#) pg. 12) in order to meet a strategy for an AUO, a resource request entry is recommended to "retain video/audio capture of an instructor's classroom lecture with the goal of increasing interaction between the instructor and students when the lectures are later incorporated into distance education courses."

Surveys

Distance education student satisfaction survey results can be relatively compared to the IVC Student Satisfaction Survey data which the College conducts every two years, as this survey is campus wide and includes students enrolled in all instructional modalities. Student satisfaction data for this portion of the AUR is derived from the Irvine Valley College Distance Education Student Survey, spring 2015 [III.B.19](#).

Early College Program

Early College oversight and planning responsibilities fall to the Early College Advisory Task Force [III.B.20](#), an advisory group under the Office of Instruction responsible for the planning, coordinating, and operational logistics of the program. Inspections of the off-site facilities and equipment are conducted by the dean and members of the Early College Advisory Task Force.

The College meets or exceeds its equipment needs for DE based on the survey results listed in the 2015 AUR for Distance Education [III.B.18](#): "The productivity for distance education courses were higher than classroom productivity for each of the five periods indicated in the survey." Indeed, the academic year 2015-2016 had the greatest classroom and DE combined productivity since the 2011-2012 academic year. DE courses show significantly higher productivity over the five years reviewed; DE productivity calculates to 578.60 of the review time period, whereas classroom productivity calculates to 485.20.

The facilities and technology evaluations in regard to equipment and the upgrades of existing equipment in the distance education programs are conducted by the Director of Facilities along with the Director of Technology in consultation with the OETF and the Technology Advisory Task Force (TATF). All resource requests related to OE equipment and upgrade/maintenance requests are submitted and reviewed within the shared governance process. Once evaluated and prioritized, they are reviewed by facilities and technology and

requests are implemented. To further ensure equipment needs are met, resource goals and objectives are identified in the IVC Online Education Strategic Plan [III.B.9](#), (updated spring 2016). Goals include the effective use and oversight of equipment needs and resources:

- Evaluate infrastructure needs for the online site and project the resources necessary to build that infrastructure.
- Involve the online site in provision of comprehensive educational programs that fulfill the District's mission.
- Include disciplines and College services in the evaluation, planning, and budgeting processes for online education.
- Provide Academic Senate committees, Academic Senate Council, Department Chairs/Departments, the Office of Instruction, the Student Services Council, and the Board of Trustees with regular (e.g. annual) information on the status of online education at IVC.
- Provide supporting communication from the college back to the disciplines and college services.
- Integrate Online Education (e.g. offering courses, support services) at IVC into the College's planning, decision-making, and budgeting processes.

Overall, the college meets this Standard as regular maintenance schedules have been developed and implemented for the College's physical resources and equipment. The resource request process allows for means of addressing deficiencies noted within the surveys, as does the Maintenance Direct Work Order System. The *2015 Employee and Student Survey* results have provided positive data on the effectiveness of the facilities and equipment maintenance practices at IVC. This data allows the facilities and maintenance and technology services departments with the strategic planning committees to evaluate the effectiveness of the College's building, upgrading, maintenance and replacement plans and practices. In addition to several other categories evaluated, the employee survey shows that most campus employees in the 2015 Employee Satisfaction Survey [III.B.21](#) *strongly agree* (57.43%) that campus grounds are attractive and well-maintained and campus buildings provide a healthy working environment (28.19% *strongly agreed* and 44.30% *somewhat agreed*). In response to the adequacy of outdoor campus lighting, 27.52% *strongly agreed* and 70.93% *somewhat agreed* that the lighting at night is good. Employees responded to the question of classroom cleanliness with 31.21% *strongly agreeing* and 32.55% *somewhat agreeing*. The student survey results show a somewhat higher satisfaction rate across similar categories; the question "are the College grounds attractive and well-maintained?" received an excellent rating of 54.43% *strongly agreeing* and 33.22% *somewhat agreeing*. Students rated the condition of the classrooms with a positive rating of 44.58% *strongly agreeing* and 39.89% *somewhat agreeing*. In regard to the satisfaction with exterior campus lighting, 30.11% *strongly agreed* that lighting at night is good and 37.33% *somewhat agreed*.

The College meets the standard.

Standard III.B.3 Physical Resources

To assure the feasibility and effectiveness of physical resources in supporting institutional programs and services, the institution plans and evaluates its facilities and equipment on a regular basis, taking utilization and other relevant data into account.

Evidence of Meeting the Standard

IVC considers the needs of programs and services throughout the capital improvement and scheduled maintenance planning cycle by utilizing a collaborative process including participatory governance groups at the College level in the development and implementation considerations of the South Orange County Community College District's Education and Facilities Master Plan (EFMP) [III.B.22](#). The SOCCCD EFMP (covered in detail under [III.B.4](#)) is the driving force behind the planning and construction of new capital improvement projects and the scheduled maintenance/renovation of existing buildings. Each of the three campuses within the District received an EFMP specific to the campus' long-range planning needs. Each plan is essential to achieving the goals and fulfilling the College's unique mission as it relates to the needs of its programs and services. The Irvine Valley College 2011-2031 Education and Facilities Master Plan (EFMP) is the culmination of research and input from community constituent groups and the College's participatory governance groups. In order to keep the plan relevant to current needs and growth opportunities in education, it is reviewed and updated every five years. The next review process is scheduled to begin the winter of 2016.

The long-term planning/assessment process is conducted through the Five-Year, Facilities and Education Master Plan [III.B.22](#). Short-term planning/assessment is accomplished through the Budget Development and Resources Planning Committee (BDRPC) [III.B.23](#), which assesses and evaluates the feasibility and effectiveness of College facilities and equipment on an annual basis, based on the resource request cycle. Program Reviews and the Administrative Unit Review process provide other avenues for evaluation of facilities and equipment at the program level which includes the AUR of the Distance Education Program. The Technology Master Plan 2010-2015 [III.B.16](#) provides a regular mechanism for evaluating and planning technology needs at the College. Both long-term and short-term planning processes rely on data to drive planning, priorities, and budgets. The Director of Facilities and Maintenance works closely with the Academic Planning and Technology Committee (APT) [III.B.24](#) & [III.B.25](#) and the Office of Instruction to assess the effective utilization of classrooms and equipment on the campus proper as well as in the DE mode. The Vice-President of Instruction, Vice President of College Administrative Services and the College president meet regularly with the Director of Facilities during the President's Executive Council (PEC) [III.B.26](#) & [III.B.27](#) to evaluate, determine maximum efficiencies, and review long-term planning strategies for the College's physical resources.

These processes operate under the guidance of the College's participatory governance model that oversees long-term and short-term planning processes including the evaluation/assessment of existing facilities as well as determination of long-range planning goals:

Online Education AUR/Strategic Plan

The planning to ensure effective equipment utilization in the online program is stated in the Strategic Plan 4.3.2015 [III.B.28](#) under 2014-2020 Strategic Objectives 4.1, 4.2, and 4.3. Measurable outcomes are stated for each strategic planning objective, and these outcomes are continuously evaluated in order to make institutional improvements to ensure the needs of programs and services are met. The annual AUR process evaluates and provides feedback as to the progress of the stated objectives. Deficiencies are noted and are followed up by a resource request submission in order to fulfill equipment needs or repairs.

Campus wide Surveys

College wide surveys are conducted annually and provide the College with valuable data related to the efficient use of its facilities. Survey results are examined for any anomalies or large changes. Substantial declines in satisfaction lead to the development of objectives and/or strategies in the department's AUR (Administrative Unit Review) in order to assure goals are met.

The College Strategic Planning Process [III.B.29](#) is detailed in the College Planning and Decision Making Manual, [III.B.30](#) oversees and ensures that the evaluations that emerge from the AUR process are used so that College physical resources meet the current educational requirements of the College community, including DE and the Early College Program. Through a shared governance model [III.B.31](#), the College community engages in an integrated, data-driven planning and decision-making process to assess the sufficiency, quality, integrity, replacement strategy, and scheduled maintenance requirements of the College's physical resources including the Five-Year Plan, Education and Facilities Master Plan, Technology Master Plan and the resource requests submissions. Plans are available to the College community through SharePoint [III.B.32](#). The strategic planning committees compile, analyze, reconcile, and integrate recommendations derived from evaluations from various campus bodies, task forces, and workgroups. The four strategic planning committees consider all relevant programs' and services' needs and develop integrated, coherent, and cohesive recommendations in order to prioritize resource allocation regarding physical resources. Identified needs are submitted through the resource request process for replacement or maintenance and/or through the Maintenance Direct Work Order system for more immediate requests. The annual resource request submission process demonstrates one of the most important methods used by the College community to provide real-time information about the feasibility and effectiveness of the College's physical resources [III.B.33](#). The College has adopted a transparent tracking software (Teamwork [III.B.34](#)) that allows the campus community the ability to track the progress of the vast majority of the

College's maintenance and equipment replacement projects and capital improvement projects.

In evaluating how effectively facilities and equipment meet the needs of programs and services, the IVC Health Center and Concessions projects provide an excellent example. In this case, the College's strategic planning process worked effectively within the participatory governance model in meeting the needs of programs and services. The IVC Student Services Center was identified in the Facilities Master plan for future renovation [III.35](#) to accommodate growth in space-planning. This project is a combination of two projects from the IVC Facilities Master Plan (FMP). The Health Center relocation project will provide additional square footage in the existing Student Services Center (SSC). By relocating the Health Services Center's 1,248 assignable square feet, a secondary effect ensures that the vacated space will address existing SSC expansion needs. Functional requirements including an adequately sized psychological counseling room and waiting room, a laboratory area and medication storage will be considered. The Concession Athletic Complex portion of the project is planned to provide a sports medicine room, concessions/ticket booth and public restrooms which serve the athletics area of the campus. Therefore, by working in collaboration with the SOCCCD Capital Improvement Committee (CIC) and the Basic Aid Allocation and Resource Planning Committee (BAARC), the College's shared governing bodies were able to arrive at an effective solution that not only secured a new, expanded location but also generated productive secondary effects.

Analysis and Evaluation

Thus, Irvine Valley College meets this standard as well. The College's Strategic Planning Process, working in tandem with the resource request Process, provides a regular, annual opportunity for faculty, staff and administrators to evaluate and submit requests for facilities and equipment upgrades as well as maintenance requests based on identified needs. The process is data-driven and leads to specific, measurable outcomes and results that are responsive to programmatic requests. College strategic planning assures that the physical resources of the College feasibly and effectively support institutional programs and services.

The College meets the standard.

Standard III.4 Physical Resources

Long-range capital plans support institutional improvement goals and reflect projections of the total cost of ownership of new facilities and equipment.

Evidence of Meeting the Standard

Three distinct processes ensure that institutional improvement goals and objectives are met and projections of total cost of ownership are reflected in planning outcomes:

1) Strategic Planning and Decision-Making Process

Capital projects are vetted and approved through the shared governing bodies to ensure alignment with strategies, planning objectives and goals [III.B.36](#). In order to ensure widespread and effective College participation in the strategic planning process, the college committee structure fully integrates strategic planning within the fabric of the decision-making structure and the budget development process. Long-range capital planning is tied directly to the College's participatory governance planning process through the ongoing, annual Strategic Planning and Decision Making Process clearly laid out in the *Planning and Decision-Making Manual* [III.B.30](#). This document details the collaborative process used to create the Mission Statement, College Goals, and the strategic planning objectives, the cornerstones of the College wide continuous improvement process. A vital link in ensuring that institutional improvement goals are met in regard to proper planning of physical resources is the review process of the resource request submissions [III.B.37](#). The Strategic Planning and Accreditation Council (SPAC) [III.B.38](#) reviews, evaluates and rates requests as part of the strategic planning process [III.B.39](#). In addition, the College's progress in achieving the planning objectives is reviewed and monitored by the SPAC on an annual basis. (*Irvine Valley College Strategic Plan, 2014-2020* [III.B.29](#))

The College goals form the basis for Strategic Planning Objectives which are linked to measurable outcomes. The outcomes are continuously evaluated through Administration and Program Review in order to make institutional improvements. Capital planning and effective resource allocation are listed under College Goal #4. Long-range capital planning is proven to be an effective tool in the advancement of college improvement goals.

2) Education Facilities Master Plan (EMP & FMP)

The 2011 Education and Facilities Master Plan (EFMP) provides a blueprint for the future of SVC through the 2031 planning horizon and is updated every five to six years. The SOCCCD is currently in the planning stages of updating and expanding the 2011-2031 EFMP to the 2016-2036 EFMP [III.B.22](#). The EFMP serves as the foundation of subsequent plans for the allocation of campus resources and College goal-setting. This plan helps in determining how new and renovated facilities could improve institutional instruction, support services, and campus operations while enhancing student success. It also provides documentation of how constituent groups currently see the College and how they envision the future.

The Educational Master Plan (EMP) [III.B.40](#) and the Facilities Master Plan (FMP) [III.B.35](#), components of long-range planning, comprise the Education and Facilities Master Plan and were developed in tandem [III.B.41](#). Together, they form an invaluable resource for comprehensive planning combining educational goals with capital improvement goals. Throughout this process, personnel with responsibility for education programs and those with facilities' responsibility participated together in nearly every discussion and meeting. At each organizational level, the process has followed the principles of participatory governance. The EMP serves to establish clear direction for the College by envisioning the future under the changing conditions of internal and external trends and influences and to provide a foundation that serves as a primary resource for the development of College planning activities. The FMP takes into account the history of Irvine Valley College and its surrounding communities; core values of the institution as represented in its mission, vision, and strategic goals; data from within the College and from authoritative external sources; and the best thinking of all constituency groups regarding a vision for the IVC campus.

The EFMP planning process established current space inventory broken down by category i.e. lab, classroom, office space etc. and an enrollment projection by discipline, and then developed a long-term capital plan to meet student needs by discipline. Information and development strategies shown in the 2011 Facilities Master Plan reflects current and future forecasts for student and programmatic growth combined with strategic visions for campus modernization. The result is an integrated approach with facilities outcomes driven by education planning.

3) Five-Year Construction Plan

Each year the District is required to submit a Five-Year Construction Plan to the state chancellor's office [III.B.42](#). The plan is developed within the state's web-based FUSION program [III.B.43](#). This five-year plan includes both locally funded and state-funded projects and identifies project priorities for no less than the next seven years. The five-year plan works in tandem with the EFMP, requiring that all projects submitted for the five-year plan must be listed on the EFMP [III.B.41](#). The five-year plan helps to project the future cost of ownership by weighing the current cost of construction against future escalation estimates. The District and its colleges review the plan and priorities and, if appropriate, modify the plan as part of this annual decision. When submitted to the state chancellor's office in June, the submittal includes the Five-Year Construction Plan and the District's Initial and Final Project Proposals (IPP and FPP) for state funding considerations. The Capital Improvement Committee [III.B.44](#) relies on the Five-Year Construction Plan as a basis for recommending capital improvement projects to the Basic Aid Allocation Recommendation Committee (BAARC) [III.B.45](#) for funding considerations. The Basic Aid allocation process is driven by the SOCCCD Board Policy #3110 and

Administrative Regulation 3110 which defines the allocation process in detail [III.B.46](#).

The plan for the new Liberal Arts building project emerged out of a carefully formulated planning document contained within the EFMP. The plan was crafted through a process that included input from the campus community's participatory governance process. In the 2010-2011 planning cycle, it was agreed upon through the District and College shared governance groups to begin executing the initial planning phases of the relocation of the existing Life Sciences program (housed in an outdated building scheduled for demolition) to a new 30,000 sf state-of-the-art facility which opened in March 2014. This entire process is identified within the 2010-2016 Education and Facilities Master Plan. The master plan included a series of carefully orchestrated secondary effects (EFMP Project Summary describing proposed Liberal Arts project [III.B.1](#)) This series of capital improvement projects further demonstrate the results of successful collaborative efforts between the college and District's strategic planning processes.

The long-awaited grand opening of the new Liberal Arts building took place in fall 2016. This capital improvement project is an excellent example of how the College's strategic planning process takes into account the long range planning requirements identified in the EFMP, the college's instructional needs, the current physical resource assessment, and the capital improvement funding process created through the District Strategic Planning Process: the Capital Improvement Committee (CIC) and the Basic Aid Allocation Resource Committee (BAARC). The new building supports the College's growing Social and Behavioral Sciences, Humanities and Language programs, and a series of secondary effects needed to be included in the planning process to ensure that all instructional programs remained active and fully operational during construction.

In addition to the Five Year Construction Plan described in this section, the elements that comprise the total cost of ownership regarding capital improvements, buildings renovations and equipment replacement and repair are best identified/described in the Resource Request Form. Through the resource request process, the College's Strategic Planning and Decision Making Process addresses the issue of identifying total cost of ownership including initial and on-going costs and how it will impact the department. This college wide planning process includes the ability to identify additional personnel requirements including faculty hires, capital improvement needs, physical resource needs, equipment replacement, maintenance needs, and requests for support of new programs and services. When a Resource Request Form is submitted, the applicant must complete a series of questions regarding but not limited to: current and future department impact and funding source, i.e. one-time cost vs. on-going costs. This procedure allows the Strategic Planning and Accreditation Council (SPAC) and the Budget Development and Resource Planning Committee (BDRPC), along with the budget managers, to prioritize requests, identify appropriate sources of funding, and project future fiscal impact. With a sound and effective strategic planning and budget development process in place, the facilities director, Office of

Instruction and other stakeholders can submit timely and accurate budget projections and determine total cost of ownership over the forecasted lifespan of the requested need.

Analysis and Evaluation

The College's long-range capital plans support its improvement goals and reflect projections of the total cost of ownership of new facilities and equipment. The lighting retrofit project detailed under section III.B.2 above is an excellent example of how the College calculates total cost of ownership for any given project:

- Total estimated cost of design and complete exterior retrofit.
- Calculated loss of parking revenue due to campus parking lot closures over extended period.
- Total estimated Proposition 39 incentives paid to college and deducted from total cost of ownership.
- Total calculation of 1 year energy savings compared to existing energy usage baseline.
- Total cost of ownership over 10-year period less existing baseline/ estimated total savings to the tax-payer.

In this case, the College was able to offset the cost of the entire project by utilizing the State's energy savings incentives and realize significant taxpayer savings.

The College's DE program long-term planning, review, evaluation and oversight is guided by the goals and objectives as prescribed in the Online Education Strategic Plan [III.B.9](#) (May 16, 2016). The Online Education Task Force (OETF) [III.B.10](#) reviews and recommends approval of all policies and procedures affecting OE. The Director of Technology Resources oversees the Technology Advisory Task Force and the Academic Planning and Technology Committee which work in tandem with the OETF to identify, prioritize, and implement technology to meet the long-term needs of the OE mode of instruction. The OETF employs the use of surveys [III.B.46](#) provide analysis of the program as well as the annual review of the AUP, which summarizes the data related to IVC's online course offerings, including, but not limited to, student survey data and student demographics.

At Irvine Valley College long-range capital planning works in collaboration with institutional improvement goals and educational planning (the Office of Instruction) through a system of shared governance. Checks and balances are effectively inserted into the process through the College's Strategic Planning and Decision Making Process, EFMP, Five-Year Capital Outlay Plan, and Resource Request process to ensure proper fiscal planning takes place while considering future total cost of ownership.

The College meets the standard.

Standard III.C: Technology Resources

Standard III.C.1 Technology Resources

Technology services, professional support, facilities, hardware, and software are appropriate and adequate to support the institution's management and operational functions, academic programs, teaching and learning, and support services.

Evidence of Meeting the Standard

Irvine Valley College provides students, faculty, and staff with a robust, secure, and stable computing environment to enable the College to provide student learning programs and services. Management and oversight for the College technology services is provided by the director of Technology Services who is responsible for the College technological infrastructure and systems. Students, faculty, and staff participate in technology planning and guidance through the Technology Advisory Task Force (TATF), co-chaired by the Director of Technology Services and a faculty representative. TATF provides an opportunity for the college community to identify technology needs and bring new ideas forward for discussion and evaluation. TATF also reviews current and emerging technologies to ensure the technology used by the College is effective in helping the College meet its instructional and service goals. Another technology focused task force is the Online Education Task Force (OETF), co-chaired by the dean of Online Education, director of Technology Services and faculty representatives.

At the College, the mission and vision drive strategic objectives that identify new technology needs and resource requests. Each fall semester, the College community submits its technology needs through the Resource Request System, described in Standard III.D.1. Through planning committees and councils, the institution provides an opportunity for constituency groups to review the technology requests to support instruction and college operations.

The College identifies the effectiveness and adequacy of its technology, including online and hybrid courses, in meeting College needs through six distinct processes: [III.C.1](#)

- Through TATF and OETF meetings [III.C.2](#), [III.C.3](#)
- Administrative Unit Reviews (AURs) and Program Reviews [III.C.4](#)
- District Technology Committee and District Online Education Committee [III.C.5](#)
[III.C.6](#)
- Surveys [III.C.7](#)
- IVC Technology Plan [III.C.8](#)
- Technology Services Department (TSD) [III.C.4](#), [III.C.9](#)

The Technology Service Department (TSD), with input from the TATF and OETF, and with support from the Office of District Vice Chancellor of Technology and Learning Services, is charged with supporting the technology needs of the College. Regardless of whether instruction is taking place in a classroom or online, the TSD provides the same support. The following services are managed by the director of Technology Services: [III.C.10](#)

- Alternate Media
- Application Support
- Duplicating
- Instructional Technologist
- Media Services
- Network Technicians
- Programming
- Webmaster

Students, faculty and staff can obtain support using an online ticket system, phone, live chat, or email. Once a request is made, each submitter can review their open requests and make comments that are then logged into the system. To ensure the TSD meets the needs of the College, when each service request is closed in the system, the submitter receives a brief survey. [III.C.11](#)

The TSD continually improves upon the service offerings by expanding automation of systems and services aimed to reduce workload and increase efficiencies to existing departments at the College. These efficiencies are necessary to the College as resources are limited and technology continues to become the foundation upon which many departments rely. In addition to helping understand business processes and allowing technology to do more work, the TSD is also focused on several key areas, specifically: [III.C.12](#)

- Emergency Notifications
- Instructional Technology
- Facilities
- Reliability
- Disaster Recovery
- Privacy and Security
- Hardware and Software
- Evaluating Technology Resources

Outside of the systems and services provided by District IT, all the areas above are core foundational areas within which TSD assists the College in leveraging their resources to bring the best experience into the teaching and learning environment.

Analysis and Evaluation

IVC Technology Support is routinely evaluated via surveys. As each support request is closed, the requestor is automatically sent a survey to rate and comment on the service they were provided. The survey results are reviewed and improvements are made.

In addition, the IVC Office of Research, Planning, and Accreditation administers regular surveys of employees and students to assess levels of satisfaction with the provision of technology services. Survey results indicate an overall positive College treatment of technology needs. In the 2015 IVC Employee Survey, 85.5 percent of respondents were either “Very Satisfied” or “Somewhat Satisfied” with the job the IVC technology staff is doing to provide services, and 74.5 percent of respondents “Strongly” or “Somewhat” agreed that IVC maintains, upgrades, or replaces its technology infrastructure and equipment to meet staff needs, while 74.7 percent of respondents “Strongly” or “Somewhat” agree that IVC maintains, upgrades, or replaces its technology infrastructure and equipment to meet instructional needs. [III.C.7](#) The 2015 Student Satisfaction Survey shows the strong majority of respondents feel that IVC computer labs, services, websites, online services and support are satisfactory. [III.C.12](#) Survey data confirm the appropriateness and adequacy of technology to meet the needs of all campus constituencies.

The College meets the standard.

Standard III.C.2 Technology Resources

The institution continuously plans for, updates, and replaces technology to ensure its technological infrastructure, quality and capacity are adequate to support its mission, operations, programs, and services.

Evidence of Meeting the Standard

The director of Technology Services is charged with establishing and maintaining a robust technical infrastructure utilizing established processes and procedures. College technologies are continuously updated and replaced based on various plans, Administrative Unit Reviews, and Program Reviews in support of the College mission and goals. The College’s strategic goals guide the technology planning and decision-making. IVC and district wide goal #2 is “IVC will promote students’ success by enhancing the teaching and learning environment.” District wide technology goal #1 is “SOCCCD will sustain innovative excellence in supporting students, faculty and staff through the development and use of creative technologies.”

The College's current Technology Plan was updated in 2015, with input from faculty, staff and students through various workshops. Input received was compiled into four technology domains that support the college mission:

- 1) Governance: Use the governance structure to guide technology activity and ensure high levels of service. (IVC Strategic Objective 1.5 [III.C.13](#))
- 2) Applications: Develop technology solutions that improve campus wide efficiency and augment classroom instruction and student services. (IVC Strategic Objective 4.2 [III.C.13](#))
- 3) Network Infrastructure and Security: Provide a secure and reliable environment to support students, faculty, and staff (IVC Strategic Objective 4.2 [III.C.13](#))
- 4) Operations and Support: Provide excellent support and service to In the Valley College's technology consumers such as faculty, staff, and students (IVC Strategic Objective 1.4, 1.5, 2.2, 3.3, 4.1, 4.2 [III.C.13](#)).

Utilizing the college's Comprehensive Budget Development Process, documented in Standard III.D, college personnel make requests for additional technology resources in support of the college's mission, operations, programs and services. As a part of this process, the Technology Services department developed a new system called the resource request system. The new system allows for anyone to submit a request for personnel, facilities, instructional equipment, technology and other resources. Under this process, the college's strategic planning committees review and forward all the requests to the Strategic Planning and Accreditation Council (SPAC) for final review and recommendations to the president for funding decisions. Once approved, funding allocations are made for technology requests and the TSD completes the purchases.

The OETF and TATF work in tandem to plan for technology resources related to online education. One recent example is when the OETF and TATF examined two Learning Management Systems (LMS) to identify an LMS that meets the needs of the College. Faculty were encouraged to attend presentations from both Blackboard and Instructure (the provider of Canvas LMS). Faculty participated in a work group and took online training courses from @ONE, Introduction to Online Teaching, in which the faculty used Canvas in the role of students. Faculty learned best practices for online teaching as well as gained concrete experience with the functionality in Canvas to evaluate its end-user experience and its usefulness to facilitate the delivery of effective online courses [III.C.14](#).

Analysis and Evaluation

The College utilizes ongoing planning to update and replace technology and to ensure the adequacy of its quality and capacity. The planning process has resulted in the following initiatives: [III.C.15.2](#)

- 1) Annual desktop, laptop and server refresh
- 2) College networking infrastructure improvements

- 3) Continuous monitoring and system backup
- 4) Expansion of the college's wireless capacity
- 5) Business continuity improvements.

Classroom, online education, and administrative technology refresh plans are presented by the director of Technology Services to strategic planning committees for review. The College has a 10-year replacement plan that is updated annually for the purpose of establishing the standards for effective lifecycle of campus technology as well as a recommended process for replacing devices across the College. In order to improve its network infrastructure, the College began moving toward desktop virtualization in 2012. The TSD has several methods for assessing the use of the current technology and ensuring the computing environment has ample capacity and reliability through the life of the equipment.

The increased use of mobile and other devices has increased the demand on the College's infrastructure and capacity. To accommodate this expansion and address the issue of saturation of the wireless environment, the College has begun implementing the expansion of wireless to accommodate over 6 devices per student.

IVC strives to ensure that many of the critical systems it supports can continue to operate during a large regional event. The College has a main data backup device in an offsite data center where nightly backups occur. The College backs up every evening all changes to servers to an offsite location. If the entire College were affected by a long-term outage all systems would be restored from the backup system.

The College meets the standard.

Standard III.C.2 Technology Resources

The institution assures that technology resources at all locations where it offers courses, programs, and services are implemented and maintained to assure reliable access, safety, and security.

Evidence of Meeting the Standard

IVC provides state-of-the-art, reliable, safe, and secure access to technology resources on the College campus, ATEP and online. Maintenance and refresh of hardware and software at all locations is reviewed by the TSD. Beginning in 2015, the TSD began requiring encryption onto all websites, by adding Hypertext Transfer Protocol Secure (HTTPS) to all systems, thus protecting data against theft.

The primary device to prevent any unauthorized access to the College's networks and services is a firewall. IVC, District services and Saddleback College purchased new Palo

Alto firewalls in 2010. Based on an audit of the firewalls done in 2015 many processes have been improved along with ensuring each device is updated to the latest operating system versions.

IVC's network has been engineered to be as decentralized as possible to ensure that an outage does not affect the entire College. Technology systems provide benefits of multiple data centers with reliability, network monitoring, firewall, centralized virus scanning, and backup procedures to all locations. All critical systems are backed up on a routine basis. IVC's data centers have state-of-the-art equipment such as paired air-cooling systems, clustered servers for redundancy of database systems, and mirrored equipment should one data center become inoperable. The system sends alert messages to IT personnel for anomalous situations like high temperature or power failure. Both data centers are locked and do not have direct access from any hallway or outside location.

All classroom technology is configured and maintained by the TSD. A centralized service desk structure is in place, which allows faculty and staff to request assistance with resolving issues that arise in the classroom.

IVC utilizes many Microsoft systems and services; thus, many of the systems use the same authentication system, which eases access to systems and services. To assist faculty and staff and further simplify authentication, the College District is in the process of implementing a single sign-on (SSO) solution to provide single username and password for access to each area for easier access and improve security, which will create new efficiencies and assist with the password reset processes.

The TSD has implemented a monitoring solution that alerts staff when a system has failed or is experiencing issues. Systems and services that are experiencing a possible failure can be identified and replaced before they fail completely. Network outages, bottlenecks and capacity issues are now diagnosed with much greater speed to reduce down time. The network is reliable.

In 2015, to protect valuable College hardware and prevent future thefts, a tracking solution was installed on all Mac computers campus wide. This modification will enable the computers to be found and provide law enforcement with tools to assist in the recovery of the College's assets.

Lastly, the TSD monitors its desktop computers. When computers are imaged a Dell KACE client is installed to monitor the computer's hardware and proactively alert the IT staff of any failure or capacity issue.

Analysis and Evaluation

Through audits, monitoring, system continuity, and regular feedback that spans all instructional sites and modalities, the TSD is able to assure that technology resources are reliably accessible, safe and secure. The College and District work together to create solutions as needs arise, such as developing a single-sign on system.

The College meets the standard.

Standard III.C.4 Technology Resources

The institution provides appropriate instruction and support for faculty, staff, students, and administrators, in the effective use of technology and technology systems related to its programs, services, and institutional operations.

Evidence of Meeting the Standard

To accomplish the training needs of the College in support of its many complex applications and systems for faculty, staff and students, the College provides the following self-paced or group workshop training opportunities:

- Lynda.com is provided to all employees of the District. Within the training system, employees can learn from thousands of training materials.
- Faculty Professional Development Week activity workshops are offered on a variety of technology topics. [III.C.17](#)
- Training and support for faculty teaching online courses is offered through formal online training and one-on-one instruction with the Instructional Technologist. Additionally, there is an IVC Online Education Faculty Handbook available to all instructors. [III.C.18](#)
- Training materials for both classroom and online instruction are available to the faculty on the Online Education website.

The College also provides training targeted to students and staff with disabilities, faculty teaching online, and college personnel wishing to learn more about the use of media services technologies.

Alternate Media

The Alternate Media Specialist provides technology workshops and one-on-one training specifically designed for students and staff with disabilities. The workshops provide the training necessary for faculty to make their online or electronic components of their courses compliant with Section 508 of the Federal Rehabilitation Act, and with the Americans with

Disabilities Act (ADA). Other services the Alternate Media Specialist provides include completing book conversions to electronic media, facilitating captioning training for faculty, facilitating captioning requests to grants, internal resources and outside agencies and facilitating the use and leveraging of new technologies and curriculum review for compliance.

Online Education

Currently, Blackboard is the primary system that supports faculty's online courses as well as on the ground classrooms. Given the high utilization of Blackboard by the College, and with the adoption of Canvas as the new LMS, the TSD has developed various training modules including regularly scheduled workshops for faculty, one-on-one customized training, video tutorials, and vendor after-hours support.

The Online Education website consolidates much of the information regarding OE, including online orientation instructions now available for all online courses and a link to the IVC Online Education Faculty Handbook. [III.C.18](#) Students now have a clear focal point for accessing specific orientation instructions for their online courses.

Media Services

The Media Services unit of the College's TSD provides support to faculty and staff for audio-visual equipment and other media equipment related needs. These services include providing end-user, operational documentation for the various technology resources in the classroom, such as the projector, document camera, video switch, and desktop computer, as well as just-in-time, on-demand classroom media equipment training.

Analysis and Evaluation

The TDS directly supports all faculty, staff, and students, regardless of whether the need is related to an online or an on-campus course. The department provides assistance with the effective use of technology systems. IVC students, faculty, and staff who require access to instructional related technology can receive support in five ways:

- Contact the Service Desk for individual immediate needs by online form, phone, email, or live chat.
- Contact the Service Desk and request an appointment for a scheduled one-on-one instructional support
- Group training sessions, such as a request to attend a school meeting
- Faculty Professional Development Week activities where instructional technology support trainings offered
- Access to instructional materials located near supported devices (teacher stations, copiers and student print)
- Formal, ongoing technology training program for all faculty and staff

The College has a formal, ongoing technology training program for all faculty and staff supported by the Application Specialists and Instructional Designer. This program provides robust end-user training for the various applications installed and supported by the College. [III.C.16.](#)

The College meets the standard.

Standard III.C.5 Tehnology Rsources

The institution has policies and procedures that guide the appropriate use of technology in the teaching and learning process.

Evidence of Meeting the Standard

IVC, as part of the South Orange County Community College District, has established policies, procedures, and practices which guide the appropriate use of technology in the teaching and learning process. Many of these policies have been updated as recently as in 2013, utilizing a consultant. SOCCCD board policies guiding appropriate use of technology include:

- Administrative Regulation 3726: Information Security-Data Classification [III.C.19](#)
- Administrative Regulation 3727: Information Security-Access Control [III.C.20](#)
- Administrative Regulation 3728: Information Security-Physical Security [III.C.21](#)
- Administrative Regulation 3729: Information Security-Logging and Monitoring [III.C.22](#)
- Administrative Regulation 3730: Information Security-Remote Access [III.C.23](#)
- Administrative Regulation 3740: Distance Education [III.C.24.](#)

Analysis and Evaluation

In addition to the administrative regulations, the OETF developed the IVC Online Education Faculty Handbook (approved in 2015 and updated in 2016). [III.C.18](#) The annual review process begins in the Online Education Task Force and then goes to the Academic Planning Technology Committee, Academic Senate and Strategic Planning and Accreditation Council for approval. Technology use is addressed in sections on: Accessibility (section 504 and section 508 Compliance), Captioning Guidelines, Student Privacy, and Online Education Resources. There are also several policies and procedures listed in various systems and areas of the College. [III.C.25](#)

IVC is committed to compliance with federal and state regulations including FERPA, HIPPA, section 504, and section 508. The College will utilize its existing committees and/or create special workgroups to ensure that policies and guidelines related to the appropriate use

of technology remain current; to address regulations and create new complete policies and procedures related to technology; and to develop and introduce training to help students, faculty, staff and administrators comply with policies.

The College meets the standard.

Standard III D: Financial Resources

Standard III.D.1 Financial Resources

Financial resources are sufficient to support and sustain student learning programs and services and improve institutional effectiveness. The distribution of resources supports the development, maintenance, allocation and reallocation, and enhancement of programs and services. The institution plans and manages its financial affairs with integrity and in a manner that ensures financial stability.

Evidence of Meeting the Standard

Irvine Valley College's 2016-2017 Adopted Budget is \$83,705,894 which includes \$64,061,883 in Unrestricted General Funds and \$17,644,011 in Restricted Funds. The total 2016-2017 Adopted Budget for South Orange County Community College District is \$755 million. [III.D.1](#)

The College provides sufficient revenues to support educational improvements and consistently allocates funds to support them. The College publishes annual funding allocations for institutional improvements on the internet under the Budget Development and Resource Planning Committee site [III.D.2](#). The Irvine Valley College Comprehensive Budget Development Process provides a means for setting priorities for funding institutional improvements. The College focuses on program effectiveness and efficiencies in order to allocate its existing resources to fund new program improvements in the future [III.D.3](#).

The College manages its finances in a manner that ensures integrity and financial stability. The College maintains a \$1.0 million reserve annually, as documented in section III.D.2 below. In addition to the College's reserve, the District sets a 7.5% reserve for economic uncertainties set through the District Resources Allocation Committee (DRAC), [III.D.4](#) in accordance with the Board Budget Development Guidelines [III.D.1](#) as well as a 20% Basic Aid reserve pursuant to section 4.C (Contingency) of Administrative Regulation 3110 (Basic Aid Allocation Process) [III.D.5](#)

The following guiding principles are provided to DRAC and the College budget committees for use when recommendations are made about the budget [III.D.1](#), [III.D.6](#).

1. Reserve for Economic Uncertainties
2. Future Long-Term Debt Issues
3. Retirement Incentives
4. Area/College Allocations
5. Deficit Financing
6. Retiree Medical, Dental, Vision, and Medicare Coordination of Benefits

7. (COB) Plans
8. Basic Aid
9. One-time Cost Savings
10. Full Time Equivalent Student Targets
11. Funding for Growth
12. Budget Planning

The College aims to maintain sufficient reserves to address a possible situation when no growth funding is available to cover the step-and-column and other built-in mandatory cost increases. Institutional resources have been sufficient to ensure financial solvency. The College's unrestricted general fund ending balances in the last three years are as follows:

Fiscal Year	Ending Balance	Reference Endnote
2015-2016	\$3,921,728	2016-2017 Adopted Budget pg 28 III.D.1
2014-2015	\$3,085,848	2015-2016 Adopted Budget pg 29 III.D.7
2013-2014	\$2,577,143	2014-2015 Adopted Budget pg 27 III.D.8
2012-2013	\$20,019	2013-2014 Adopted Budget pg 27 III.D.9 Note the ending balance in 2012-13 was low due to an early retirement payout.
2011-2012	\$1,331,633	2012-2013 Adopted Budget pg 23 III.D.10

The 7.5% contingency reserve set through the RAC model for the last 5 years were as follows:

Fiscal Year	7.5% Contingency Reserve	Reference Endnote
2016-2017	\$12,005,329	2016-2017 Adopted Budget pg 19 III.D.1
2015-2016	\$11,090,008	2015-2016 Adopted Budget pg 21 III.D.7
2014-2015	\$11,452,034	2014-2015 Adopted Budget pg 18 III.D.8
2013-2014	\$11,306,568	(2013-2014 Adopted Budget pg 27 III.D.9 Note the ending balance in 2012-13 was low due to an early retirement payout.
2012-2013	\$10,345,556	2012-2013 Adopted Budget pg 14 III.D.10

The 20% Basic Aid contingency reserve for the last 5 years are listed in the Table below:

Fiscal Year	20% Basic Aid Reserve	Reference
2016-2017	\$11,702,190	2016-2017 Adopted Budget pg 21 III.D.1

Fiscal Year	20% Basic Aid Reserve	Reference
2015-2016	9,021,647	2015-2016 Adopted Budget pg 23 III.D.7
2014-2015	8,291,463	2014-2015 Adopted Budget pg 21 III.D.8
2013-2014	7,853,846	(2013-2014 Adopted Budget pg 27 III.D.9 Note the ending balance in 2012-13 was low due to an early retirement payout.
2012-2013	17,639,088	2012-2013 Adopted Budget pg 13 III.D.10

The capital outlay/basic aid fund of the District has a substantial amount of cash balance committed to specific future capital projects. As of August 2016, that amount was \$223,596,236. This cash may be temporarily transferred to another fund for the payment of obligations in accordance with the state budget and accounting manual. [III.D.11](#)

Analysis and Evaluation

The financial resources of IVC are sufficient to support and maintain student learning programs and services and improve institutional effectiveness. The distribution of resources supports the development, maintenance, innovation and reallocation, and enhancement of programs and services. The resource allocation process provides a means for setting priorities for funding institution improvements. The IVC Comprehensive Budget Development Process [III.D.3](#) allows the administrative unit heads (deans, directors, vice presidents/president) to review and rate individual resource requests submitted in their areas. The resource requests are then reviewed and rated by committees using a consistent rating rubric. The process concludes with a prioritized list of resource requests and corresponding funding sources recommended to the president of the College by the Strategic Planning Oversight and Accreditation Council (SPAC).

All resource requests must be supported by a program review or administrative unit review strategy or other planning document such as a college or district technology plan, education and facilities master plan, or college or district wide strategic planning objective.

Moreover, IVC's budget provides sufficient resources for the effective planning, maintenance, implementation and enhancement of Online Education (OE) courses, programs and services as well as personnel development. The College provides an instructional technology and 508 compliance specialist position to support the Distance Education programs and courses. Blackboard is the software platform used to support OE, and IVC maintains an instructional technologist position to support faculty. IVC is also currently piloting the Canvas Learning Management System (LMS). Professional Development funds are available to all faculty, including OE Faculty. The College spent \$55,756 in 2015-2016 for faculty professional development activities, including OE. [III.D.12](#) The following is a sample of professional development activities related to OE from 2015-16:

- Online Teaching Certification Program Training
- Workshop titled "Google for Education"
- Online Teaching and Learning with @ONE
- @ONE: Introduction To Teaching With Canvas

Thus, the College has consistently allocated funds to support educational improvements. The IVC Comprehensive Budget Development Process provides a means for setting priorities for funding institutional improvements. In the current economic environment of limited funding for growth, the institution was able to dedicate funds for institutional improvements annually. The College focuses on program effectiveness and efficiencies in order to redirect its existing resources to fund new program improvements in the future.

The College meets the standard.

Standard III.D.2 Financial Resources

The institution's mission and goals are the foundation for financial planning, and financial planning is integrated with and supports all institutional planning. The institution has policies and procedures to ensure sound financial practices and financial stability. Appropriate financial information is disseminated throughout the institution in a timely manner.

Evidence of Meeting the Standard

As documented in Standard I, the institution regularly reviews and revises, if necessary, the mission statement and College goals. The current mission statement, goals and objectives are posted to the IVC public website [III.D.13](#). The review of the mission statement and College goals is initiated by the Institutional Effectiveness Committee (IEC). As a part of this process, the BPPC regularly reviews these documents from a fiscal planning perspective to ensure progress is made in completing them and assesses the College fiscal planning to align it with the mission statement and College goals [III.D.14](#).

The mission statement and the College goals thus drive the development of planning objectives as planning objectives are set to attain or implement the goals. Planning objectives are statements which are specific, measurable, achievable, realistic, and time-related. In order to integrate financial planning with institutional planning, the Strategic Planning Committees review resource requests to ensure their alignment with the mission statement and College goals. (A resource request encompasses the proposed action to achieve the objectives and goals.) Planning objectives are included in the resource request form for the author to select and thereby link the resource request to a college wide objective. College planning and resource allocation processes are reviewed annually at the Strategic Planning and Accreditation Council (SPAC) retreat. [III.D.15](#), [III.D.16](#)

The institution establishes priorities among competing needs so that it can predict future funding needs, in accordance with the Comprehensive Budget Development Process [III.D.3](#) described above. The institution sets priorities among competing needs through the resource request review and rating process as well as mapping all possible funding sources with resource requests in order to maximize the use of available resources. The electronic resource request form requires the author to complete worksheets pertaining to personnel, equipment, facilities, technology and other resources, as necessary. The annual assessment of resources projects future spending in the area and allows the institution to establish priorities among competing needs in such a manner that future funding needs can be predictable and aligned with revenue projections.

The College's plans are clearly linked to both short-term and long-range financial plans. These plans are reflected in the 5-year budget model which allows BDRPC to make funding recommendations to SPAC for both ongoing and one-time expenditures. Final funding allocations to support College plans are made based on the BDRPC funding recommendation. [III.D.17](#)

During this process, requests that did not receive full funding are reviewed and analyzed to establish future funding needs. The unfunded list is shared with the campus (including the IVC Foundation) in order to explore the possibility of resource development raising funds through donor contributions. [III.D.18](#) Institutional plans are reflected in the College's strategic plan [III.D.19](#) and the planning objectives are linked in the resource request form under the planning section, as indicated in the screenshot below:

Furthermore, the College has a 5-year budget model that is being continually updated by BDRPC. The model shows long-term revenue and expenditure projections, both one-time and ongoing, allowing the institution to identify funding amounts for one-time and ongoing resource requests [III.D.2](#). Thus, the College has plans that are clearly linked to both short-term and long-term financial plans. Short-term and long term financial plans are reflected in the 5-year budget model which allows BDRPC to make funding recommendations to SPAC for both ongoing and one-time expenditures. Final funding allocations to support college plans are made based on the BDRPC funding recommendation.

The financial planning process relies primarily on institutional plans for content and timelines. The Comprehensive Budget Development Process [III.D.3](#) drives all institutional and financial planning on an annual timeline. Planning begins well in advance to allow sufficient time for review of the mission statement and College goals as well as the planning objectives and strategies, and making changes as necessary. The review of the mission statement and College goals and objectives occurs annually with major updates taking place on a three-year cycle. The online resource requests process is designed in such a way that the requests are tied into College goals and objectives. In addition to directly linking to strategic planning objective, the Comprehensive Budget Development Process allows linking financial planning to Program Reviews and Administrative Unit Reviews which in turn tie to the College mission, goals and objectives [III.D.21](#).

The College has evidence that past fiscal expenditures have supported the achievement of its plans. The resource request form includes a planning section where the author is required to select an institutional or departmental planning objective thus linking the expenditure authorization request to the achievement of institutional plans.

The governing board and other institutional leadership receive information about fiscal planning that demonstrates its links to institutional planning. Specifically, the following information has been provided in recent years:

Date	Topic	Forum	Reference
August 22, 2016	SOCCCD FY 2016-2017 Basic Aid Allocation Recommendations	Board of Trustees Meeting	SOCCCD FY 2016-2017 Basic Aid Allocation Recommendations III.D.23.2
August 22, 2016	FY 2016-17 Adopted Budget	Board of Trustees Meeting	FY 2016-17 Adopted Budget III.D.1
February 25, 2016	A Workshop on Understanding the Budget	College-wide presentation	A Workshop on Understanding the Budget III.D.31

In addition, the vice president of Administrative Services provides a college wide presentation on the college budget, its fiscal condition and financial planning in August and January of each year [III.D.22](#), [III.D.23](#). The vice president for College Administrative Services also provides periodic updates on financial matters to the college committees, councils and sessions with BDRPC being the primary participatory governance body where fiscal and budget planning matters are discussed [III.D.24](#). Lastly, the college president and vice president of Administrative Services send periodic college wide emails with information pertaining to the state and local budget developments and fiscal analysis [III.D.25](#). Information communicated to the campus is sufficient in content and timing to support institutional and financial planning and financial management.

The main source of financial resources for this institution is property tax revenues allocated through the District Revenue Allocation Model based on the State Apportionment. Excess revenue above apportionment is allocated to the College or District for one-time purposes including capital outlay projects pursuant to BP/AR 3110 [III.D.26](#), [III.D.5](#). Other sources of financial resources, including grants, partnerships, the Irvine Valley College Foundation and other auxiliary funds. The institution has not experienced any cash flow difficulties in the past; the District as a whole is debt-free, and all the liabilities are fully funded. The District has a healthy General Fund cash balance that is reported to the Board of Trustees on a regular basis [III.D.27](#). The College aims to maintain sufficient reserves to address a possible

situation when no growth funding is available to cover the step-and-column and other built-in mandatory cost increases. As documented in section III.D.1, Table IIID-1 (College Ending Balances) location-specific fund balances have been sufficient to maintain the financial health of the institution.

In addition, as documented in section III.D.1, Table IIID-2 (DRAC 7.5% Contingency Reserves) the District maintains an unrestricted general fund reserves of no less than 7.5% which is higher than the 5% recommended by the State Chancellor. Lastly, as documented in the same section, Table IIID-3 (Basic Aid 20% Contingency Reserves) the District maintains a 20% basic aid reserve required by BP/AR 3110. For these reasons, the institution believes it has reasonable and sufficient financial resources to cover its costs in case of an emergency situation.

Other sources of financial resources, including grants, partnerships, the Irvine Valley College Foundation and other auxiliary funds, are linked to institutional planning, and there is a realistic understanding of any restrictions on expenditures from those funds, as discussed above. There is also a realistic understanding of the availability of those funds. Specifically, the budget for the Associated Student Government (ASG) of Irvine Valley College is presented to the Board of Trustees in an open session [III.D.28](#). The ASG of IVC Budget presentations are available at the Student Life Office upon request. The Child Development Center and Community Education Fund budgets are posted online [III.D.1](#). The Irvine Valley College Foundation fiscal update is presented to the Foundation Board of Governors in an open session and is available at the Foundation Office upon request [III.D.29](#).

The District has sufficient insurance to cover its needs. Liability insurance costs are covered as an assessment on college Full-Time Equivalent Student (FTES) income through the District Revenue Allocation Model. The District is not self-insured but participates in several joint power authorities (JPAs) such as the State-Wide Association of Community Colleges (SWACC) (property and liability), Self-Insured Schools of California (SISC) (medical), and the Protected Insurance Program for Schools (PIPS) (workers compensation) lessening its risk factor and reducing costs. The District reviews its coverage annually in the spring and carries an excess liability policy. The District has implemented and fully funded an irrevocable trust for its Other Post-employment Employee Benefits (OPEB). The OPEB fund balance as of August 2016 was \$95.9 million.

Analysis and Evaluation

The mission and goals of IVC are the foundation for financial planning, and the College's financial planning is integrated with and supports all institutional planning. Institutional planning at the College reflects realistic assessment of financial resource availability, development of financial resources, partnerships, and expenditure requirements. The College's financial planning is integrated with and supports all institutional planning through the Comprehensive Budget Development Process. The institution has financial plans that are

integrated with the institution's plans and prioritized strategies supporting the mission statement and the college goals. The institution has policies and procedures to ensure sound financial practices and financial stability. Appropriate financial information is disseminated throughout the institution in a timely manner.

The College meets the standard.

Standard III.D.3 Financial Resources

The institution clearly defines and follows its guidelines and processes for financial planning and budget development, with all constituencies having appropriate opportunities to participate in the development of institutional plans and budgets.

Evidence of Meeting the Standard

IVC clearly defines and follows its guidelines and processes for financial planning and budget development, with all constituencies having appropriate opportunities to participate in the development of institutional plans and budgets. The processes for financial planning and budget are recorded and made known to college constituents through the Comprehensive Budget Development Process [III.D.2](#), which contains the budget development timeline. The document is circulated through various means of communication; it is also posted on the BDRPC SharePoint website [III.D.1](#). Lastly, the timeline and summary flowchart of the process can be accessed through the resource request form [III.D.30](#).

The Basic Aid Allocation Recommendation Committee (BAARC) process is described in Administrative Regulation 410 (Basic Aid Allocation Process) [III.D.5](#).

The various financial planning processes are shared with the campus community at the district service Understanding the Budget Workshops, held most recently in February 2016 [III.D.31](#). Lastly, the BDRPC SharePoint site records all the major budget and planning communications [III.D.2](#).

To ensure the inclusiveness of the Comprehensive Budget Development Process, all constituent groups of the College are represented on all strategic planning committees. The IVC and district wide Planning and Decision-Making Manuals define the composition of the Strategic Planning Committees [III.D.32](#). The composition of strategic planning committees, as described in the Planning and Decision Making Manuals, ensures all constituencies are given appropriate opportunities to participate in developing institutional plans and budgets. Strategic planning committee minutes are posted on their individual SharePoint web pages. The minutes record the attendance of the committee members and demonstrate a high participation rate for all constituent groups [III.D.2](#).

Analysis and Evaluation

The College clearly defines and follows its guidelines and processes for financial planning and budget development. The composition of strategic planning committees ensures all constituencies are given appropriate opportunities to participate in developing institutional plans and budgets. As discussed in Standard IV.B, Strategic Planning Committees, Task Forces, and Administrative Councils operate collegially on the basis of consensus with the focus on the establishment of a safe harbor for healthy dialogue on various issues including financial issues. The constituents involved in these processes are faculty, classified staff, administrators, managers, and students representing a variety of college areas such as instruction, student services, supportive services, research, technology, facilities, and the student body.

As also discussed in Standard I.B, all academic programs and student services participate in a program review, which feeds into the IVC Comprehensive Budget Development Process and further promotes faculty participation in the financial planning and budget development process. All programs identify program objectives, which are associated with the college goals. Thus, the program-level planning process is integrated with the college strategic planning process to ensure that the college mission and college goals are achieved. Similarly, academic and student support programs develop program objectives and planning strategies which are specific, measurable, achievable, realistic, and time related.

The College meets the standard.

Standard III.D.4 Financial Resources

Institutional planning reflects a realistic assessment of financial resource availability, development of financial resources, partnerships, and expenditure requirements.

Evidence of Meeting the Standard

Individuals involved in the Comprehensive Budget Development Process [III.D.3](#) receive accurate information about available funds, including the annual budget showing ongoing and anticipated fiscal commitments. BDRPC regularly reviews the College's Five-Year Fiscal Plan including ongoing projections and anticipated changes. BDRPC develops recommendations for SPAC on funding augmentations for one-time and ongoing resource requests [III.D.18](#).

To ensure communication of accurate information and to facilitate coordination, all chairs of the Strategic Planning Committees and the members of the President's Executive Council—the president, vice presidents, and executive director of Marketing, Communications and Broadcast Services—are also members of the SPAC. In addition the institution establishes

funding priorities in order to reasonably achieve its strategic goals. According to the Comprehensive Budget Development Process, proposed planning strategies are submitted to the appropriate Strategic Planning Committee using a resource request form in order to request funding and/or the necessary resources to implement planning strategies. The resource request form requires the author to specify how the funding request supports the college plans, including goals, objectives, or Program or Administrative Unit Reviews. The manager, vice president, and Strategic Planning Committees review and rate resource requests, and SPAC makes recommendations on funding priorities to the president, who makes final funding decisions. During the review and rating process, the funding priorities are established in a manner that helps the institution archive its mission and goals [III.D.3](#).

The status and outcomes of the approved strategies and corresponding objectives are tracked for accountability and to assist the institution in achieving its underlying goals in a reasonable fashion. For instance, items focused on student learning are given high priority consistent with the mission of the College. At the summer 2015 SPAC retreat, the IVC Research Office presented data showing a high correlation between resource request rating/funding and student learning [III.D.17](#).

Analysis and Evaluation

Institutional planning at IVC reflects a careful assessment of financial resource availability, development of financial resources, partnerships, and expenditure requirements. The resource request form is the main document that ties the resource allocation to the college goals and planning objectives. Other documents describing funding priorities used by institutional planners at IVC include Education Code Section 84362 (the 50 percent law). To comply with this requirement, “classroom instruction” is also given a high funding priority by institutional planners. Documents describing any restrictions on the use of special funds are also used in the planning and budget development process. Other documents used to establish funding priorities include: the Education and Facilities Master Plan, the Technology Master Plan and the Online Education Master Plan, ASIV Goals (for ASG requests), and Environmental Initiatives (in process).

The College meets the standards.

Standard III.D.5 Financial Resources

To assure the financial integrity of the institution and responsible use of its financial resources, the internal control structure has appropriate control mechanisms and widely disseminates dependable and timely information for sound financial decision making. The institution regularly evaluates its financial management practices and uses the results to improve internal control systems.

Evidence of Meeting the Standard

An audit of the District's financial records, including those of Irvine Valley College, is conducted in the fall of every year [III.D.32](#). This audit is conducted by an independent certified accounting firm in accordance with California Education Code Section 8848, in accordance with generally accepted auditing principles and is designed to obtain reasonable assurance that the financial statements are free of material misstatement. This process includes examination and testing of supporting documentation as well as an examination of internal controls which provide feedback on processes that require improvement and adjustments. The audit assesses the accounting principles used and management's estimates to provide reasonable assurance that material misstatements which could affect the financial statements as a whole are detected. It considers the District's internal controls over financial reporting in order to plan the audit but does not give an opinion on those controls. The District's effective financial management is reflected in the limited number of audit findings. Budget and audit documents are posted to the District Business Services website.

The District audit reports and findings are reported to the Board of Trustees in November of each year [III.D.33](#). The audit firm representatives share the report and highlight material weaknesses, if any. The District has audit committees for the District and foundation audits and several board members serve on those committees. The auditors share more detailed information during these meetings.

The College disseminates information about budget, fiscal conditions, financial planning, and audit results that is sufficient in content and timing to support institutional and financial planning and financial management, thus supporting its credibility with the College's constituents. The District's tentative and final budgets are approved at the Board of Trustees' June and August meetings respectively, each year [III.D.34](#). The vice president for College Administrative Services also provides periodic updates on financial matters to the college committees, councils and senate with BDRPC being the primary participatory governance body where fiscal and budget planning matters are discussed [III.D.35](#).

The College reviews the effectiveness of its past fiscal planning as part of planning for current and future fiscal needs. The primary method of assessment of the effectiveness of past fiscal planning is a special survey around resource request planning administered annually by the College's Research and Planning Office. BDRPC and SPAC review the survey results and make necessary improvements to the fiscal planning process [III.D.16](#).

Analysis and Evaluation

IVC assures the financial integrity of the College and responsible use of its financial resources. The director or administrator of each department or project is responsible for managing their respective budgets. Expenditure reports are provided by the Fiscal Office on a quarterly basis or as needed to assist these individuals with budget management. Any

expenditure above budget is corrected within the department or by the appropriate vice president or the president within the budget. At the end of each year the Fiscal Office conducts a comprehensive review of actual revenues/expenditures to strengthen fiscal management and correct any possible errors. This comprehensive review is shared with the management, and outcomes are incorporated into the next year's budget.

Documents containing the institution's financial information demonstrate that the allocation of resources is done with integrity. The audit statements indicate sound financial management and timely corrections to audit exceptions. The annual external audit includes an examination of internal controls, which is the mechanism to provide feedback on processes that require improvement or adjustments. The internal institutional review of financial management processes described above, existing financial management processes, and the results of the evaluation are used to improve financial management systems.

The College meets the standard.

Standard III.D.6 Financial Resources

Financial documents, including the budget, have a high degree of credibility and accuracy, and reflect appropriate allocation and use of financial resources to support student learning programs and services.

Evidence of Meeting the Standard

As previously discussed, funds are allocated, as shown in the College Budget, in a manner that will realistically achieve the institution's stated goals for student learning. The College realizes the importance of allocating resources responsibly in support of student learning, and research data shows such allocation occurs [III.D.15](#).

In addition, the 50 Percent Law ensures the College, as a part of the District, spends a minimum amount of its unrestricted general fund on classroom instructional salaries. The District is in compliance with the 50 Percent Law, and the calculation for 2015-16 was 53.32 percent [III.D.36](#). Lastly, the District is in compliance with the Full Time Faculty Obligation (FOI) which requires that the College employs a minimum number of full-time faculty as required by the state chancellor's office [III.D.37](#).

Analysis and Evaluation

The institution's financial documents, including the budget, have a high degree of credibility and accuracy, and reflect appropriate allocation and use of financial resources to support student learning programs and services. The institutional budget is an accurate reflection of institutional spending and has credibility with constituents. Salaries and benefits comprise

88-90% of the College's budget and the highest level of accuracy is assured since the budget information for personnel comes directly from the Human Capital Management (HCM) section of Workday, the HR/Finance software program the District uses. Operating expenses and equipment budgets are also accurate since they are developed through departmental meetings in the spring of each year. The \$1 million contingency reserve and any other uncommitted funds are discussed and shared with the participatory governance groups during BDRPC meetings [III.D.20](#).

BDRPC receives periodic reports showing monthly expenditures by all project codes compared to the annual budget [III.D.38](#) which ensures the credibility of budget information with constituents. Lastly, funding decisions are posted to the BDRPC page and circulated widely throughout the College to assure a high degree of transparency and understanding of funding decisions [III.D.39](#).

As evidenced above, financial documents are shared with the college community on a regular basis and in a transparent manner to ultimately promote the College's goals for student learning.

The College meets the standard.

Standard III.D.7 Financial Resources

Institutional responses to external audit findings are comprehensive, timely, and communicated appropriately.

Evidence of Meeting the Standard

As discussed previously, the Institution has an annual external audit to provide feedback on its processes in accordance with California Education Code Section 8848 [III.D.40](#). Information about the College's budget, fiscal conditions, financial planning, and audit results are provided throughout the College. The District's tentative and adopted budgets are approved at the Board of Trustee's June and August meetings, respectively, each year [III.D.34](#), [III.D.41](#).

The District's audit reports and findings are reported to the Board in November of each year [III.D.33](#). Any adjustments in financial management stemming from audit findings will be formally incorporated starting with November of each year when the audit reports are presented to the Board, however any major findings would be addressed prior to that timeline to ensure the institution's sound financial management is maintained.

Analysis and Evaluation

Institutional responses to external audit findings are comprehensive, timely, and communicated appropriately. The past six audits have resulted in a total of three findings for Irvine Valley College: two in 2011-2012 and one in 2010-2011. Each of the findings was corrected before the next audit. These results are summarized below:

Table III.D-4 – SOCCCD Financial Audits

Fiscal Year	Finding	Reference
2014-2015	None	SOCCCD 2014-2015 Financial Audit Report III.D.42
2013-2014	None	SOCCCD 2013-2014 Financial Audit Report III.D.43
2012-2013	None	SOCCCD 2012-2013 Financial Audit Report III.D.44
2011-2012	Student Financial Assistance Cluster (Corrected) EOPS/CARE advisory committee meetings (Corrected)	SOCCCD 2011-2012 Financial Audit Report III.D.45
2010-2011	Lack of evidence for tracking TBA hours student participation (Corrected)	SOCCCD 2010-2011 Financial Audit Report III.D.46

The College meets the standard.

Standard III.D.3 Financial Resources

The institution's financial and internal control systems are evaluated and assessed for validity and effectiveness, and the results of this assessment are used for improvement.

Evidence of Meeting the Standard

As documented in section III.D.7, external auditors and/or funding agencies audit and review the College's funds, including special funds, regularly. Each year, the District is audited by an independent CPA firm (currently Christy White and Associates). All auxiliary funds (Associated Student Government, Community Education, Child Development Center, Foundation, and financial aid grants) undergo an annual independent financial audit along

with the College's general fund. In addition to the annual audit, most programs have rules, guidelines, reporting requirements and separate audits specific to those programs. The audits demonstrate the integrity of the College's financial management practices, as reflected in the limited number of audit findings [III.D.32](#).

Expenditures from special funds are made in a manner consistent with the intent and requirements of the funding source. Restricted funds are allocated for specific purposes as defined by the corresponding granting or donor entities. The director or administrator of each department/project is responsible for managing their budgets and compliance with the rules and regulations of that specific funding source. The District does not have any funding from bonds.

The annual financial audit includes a review of the entire financial operations, including internal controls, compliance with laws and regulations, and the accuracy of the financial systems. As noted in Table III.D.4 (Table III.D-4 – SOA CCD Financial Audits), any findings issued are corrected in a timely manner to maintain the highest level of security and efficiency.

Analysis and Evaluation

The institution's financial and internal control systems are evaluated and assessed for validity and effectiveness, and the results of this assessment are used for improvement. The College and the District conducted several Business Process Analyses (BPAs) for the District's financial processes and the approvals and controls in place. Many of the outcomes of the recommendations were implemented in the new HR/Finance system, thereby improving business practices and internal controls of the District [III.D.47](#).

The College meets the standard.

Standard III.D.3 Financial Resources

The institution has sufficient cash flow and reserves to maintain stability, support strategies for appropriate risk management, and, when necessary, implements contingency plans to meet financial emergencies and unforeseen occurrences.

Evidence of Meeting the Standard

IVC aims to maintain sufficient reserves to address economic uncertainties. As documented in section III.D.1, IVC has consistently realized significant unrestricted general fund balances in the last several years. In addition, the District is in compliance with Board Policy 3100 (Budget Preparation) [III.D.48](#), which states that "unrestricted general fund reserves shall be no less than 7.5%" which is higher than the 5% recommended by the State Chancellor's

Office. Furthermore, a 20% Basic Aid reserve is required pursuant to Section 4.C (Contingency) of Administrative Regulation 3110 (Basic Aid Allocation Process) [III.D.5](#). Lastly, the capital outlay/basic aid fund of the District has a substantial amount of cash balance committed to specific future capital projects which may be temporarily transferred to another fund for the payment of obligations, including for emergencies, in accordance with the state budget and accounting manual [III.D.49](#).

Analysis and Evaluation

Overall, then, the institution has sufficient cash flow and reserves to maintain liquidity. The College has appropriate strategies for risk management and realistic plans to meet financial emergencies and unforeseen occurrences. The institution believes it has reasonable and sufficient financial resources to cover its costs in case of an emergency situation. Moreover, the institution believes that the cash receipt schedule does not pose any cash flow difficulties for the College.

The College meets the standard.

Standard III.D.10 Financial Resources

The institution practices effective oversight of finances, including management of financial aid, grants, externally funded programs, contractual relationships, auxiliary organizations or foundations, and institutional investments and assets.

Evidence of Meeting the Standard

The College develops its budgets based on funding sources available for operation. The unrestricted general fund is allocated for the main operations of the College based on the District Resource Allocation Model. Restricted funds are allocated for specific purposes as defined by the corresponding granting or donor entities. The director or administrator of each department or project is responsible for managing their budgets. Expenditure reports are generated by the department or provided by the Fiscal Office on a regular basis or as needed to assist with budget management. Any expenditure above budget is corrected within the department or by the appropriate vice president or the president. At the end of each year, the Fiscal Office conducts a comprehensive review of actual revenues/expenditures to strengthen fiscal management and correct any possible errors. The review is shared with management and outcomes are incorporated into the next year's budget [III.D.50](#).

All auxiliary funds (Associated Student Government, Community Education, Child Development Center, Foundation, and financial aid grants) undergo an annual independent financial audit along with the College's general fund. In addition to the annual audit, most

programs have rules, guidelines, reporting requirements and separate audits specific to those programs [III.D.32](#).

Demonstrating compliance with Federal Title IV regulations and requirements, the financial aid grants and operations are audited at least on an annual basis as part of the district, state, federal or veteran's affairs audits. In addition, the Blue Book "is intended to provide guidance to those offices and individuals responsible for managing, keeping records of, accounting for, and reporting on the use of federal funds at institutions that participate in the Title IV, Federal Student Aid programs." There is a self-reporting requirement for the financial aid programs at the year end [III.D.51](#).

Institutional grants are administered by the Office of Grants and Contracts within the Office of Academic Programs and Economic and Workforce Development. The state and federal granting agencies conduct periodic and ad hoc audits to ensure the funds are spent in compliance with the rules and regulations governing the grant [III.D.52](#).

Analysis and Evaluation

The College exercises effective oversight of finances and provides effective fiscal management of its auxiliary programs. The College uses results of these evaluations as the basis for improvement. As noted in Table III.D-4 (Table III.D-4 – SOCCCD Financial Audits), any audit findings issued are corrected in a timely manner to maintain the highest level of security and efficiency.

The College meets the standard.

Standard III.D.1 Financial Resources

The level of financial resources provides a reasonable expectation of both short-term and long-term financial solvency. When making short-range financial plans, the institution considers its long-range financial priorities to assure financial stability. The institution clearly identifies plans, and allocates resources for payment of liabilities and future obligations.

Evidence of Meeting the Standard

The institution has evidence of long-term fiscal planning and priorities. Specifically, the institution's *Five-Year Budget Model* is reviewed by the BDRPC on a regular basis [III.D.20](#). The *Five-Year Budget Model* was developed by the College's Fiscal Office utilizing various sources of information including the District Revenue Allocation Model, costs-of-living-and-doing-business assumptions, and enrollment growth assumptions. The *Five-Year Fiscal Plan* was utilized as a planning tool to maintain the financial health of the institution while

realistically assessing the resources that would be available for institutional improvements. According to the IVC Comprehensive Budget Development Process [III.D.3](#) by the end of May, June, and as necessary, BDRPC develops and updates revenue expenditure projections for the following fiscal year and for a longer planning horizon to identify ongoing and one-time sources of funds that have not been committed and any restrictions on those funds. SPAC reviews any unfunded resource requests and updates funding recommendations to the president.

The College has plans for payments of long-term liabilities and obligations, including debt, health benefits, insurance costs, and building maintenance costs. The College follows the Board of Trustees Budget Development Guidelines [III.D.1](#) published annually as part of the District's final budget. Guideline # (5) disallows deficit financing defined as a budget in which projected expenditure exceeds projected revenue for the year. Furthermore, the institution remains committed to directing ongoing revenues to cover ongoing expenditures only, while committing one-time revenues to one-time expenditures. Unrestricted general fund revenues are identified through the District Revenue Allocation Model and include primarily the property taxes within the state apportionment formula and non-resident tuition fees. The bulk of ongoing expenditures are permanent personnel and utility costs. The College does not have any long-term debt instruments.

Health benefit costs are included in the College's Five-Year Budget Model and are continually monitored by BDRPC as a part of annual budget planning process. The state provided base allocation adjustments in 2015-16 and 2016-17 in order to accommodate the rising health benefit costs along with pension costs for community colleges.

Liability insurance costs are covered as an assessment on college Full Time Equivalent Student (FTES) income through the District Revenue Allocation Model (DRAC) [III.D.53](#).

Building maintenance costs have been covered through a combination of state and local scheduled maintenance funds. The college conducted a comprehensive Facility Condition Assessment in May 2016 [III.D.54](#) as a part of a district wide 20-year projection of facility needs including projected cost and revenue. This information is used in short-term and annual budget and other fiscal planning.

Analysis and Evaluation

The College's financial resources provide a reasonable expectation of both short-term and long-term financial solvency. The Institution allocates resources to address long-term obligations. Currently, there are no long-term debts in the entire District. Resources are directed to actuarially developed plans for Other Post-Employment Benefit (OPEB) obligations, and the OPEB liability has been fully funded through a trust fund. According to the most recent SOCCCD Actuarial Valuation of Retiree Health Program Report the trust is

adequately funded to meet future obligations. The actuarial plan to determine OPEB liability is current and prepared as required by appropriate accounting standards [III.D.55](#).

Through integrated and regular planning processes, the institution is able to assure that its short-range and long-range priorities are consistent. The institution meets its liabilities and future obligations while maintaining financial stability.

The College meets the standard.

Standard III.D.12 Financial Resources

The institution plans for and allocates appropriate resources for the payment of liabilities and future obligations, including Other Post-Employment Benefits (OPEB), compensated absences, and other employee related obligations. The actuarial plan to determine Other Post-Employment Benefits (OPEB) is current and prepared as required by appropriate accounting standards.

Evidence of Meeting the Standard

As documented in section III.D.11, currently there are no long-term debts in the entire District. Resources are directed to actuarially developed plans for OPEB obligations and the OPEB liability has been fully funded through a trust fund [III.D.55](#).

The institution plans for and allocates appropriate resources for the payment of liabilities and future obligations for compensated absences and other employee-related obligations. Liabilities related to employee compensated absences are handled as part of the college budget. In areas with a higher rate of absences and/or required coverage for services such as Maintenance and Operations and Campus Police, a baseline budget is provided to cover substitute expenditures during such absences. STRS and PERS rates are anticipated to increase significantly over the next five years. STRS rate increases have already been set by the legislature. PERS rates are set each year by the PERS Board. For FY 2016-2017, the increased cost over the prior year is estimated at \$2.8 million. This amount will grow an additional \$9 million by FY 2020-2021. The Board has approved participation in a Pension Stabilization Fund to offset these increased costs. An initial deposit of \$14.5M was made in FY 2012-2013 with an additional \$12.6M budgeted from basic aid funds for FY 2016-2017 [III.D.1](#).

Analysis and Evaluation

The College plans for and allocates appropriate resources for the payment of liabilities and future obligations, including Other Post-Employment Benefits (OPEB), compensated absences, and other employee related obligations.

The College meets the standard.

Standard III.D.13 Financial Resources

On an annual basis, the institution assesses and allocates resources for the repayment of any locally incurred debt instruments that can affect the financial condition of the institution.

As documented in sections III.D.11 and III.D.12, the College does not have any locally incurred debt instruments.

Standard III.D.14 Financial Resources

All financial resources, including short- and long-term debt instruments (such as bonds and Certificates of Participation), auxiliary activities, fund-raising efforts, and grants, are used with integrity in a manner consistent with the intended purpose of the funding source.

Evidence of Meeting the Standard

The College develops its budget based on funding sources available for operations. The unrestricted general funds are allocated for the main operations of the College based on the District Resource Allocation Model. Restricted funds are allocated for specific purposes as defined by the corresponding granting or donor entities. The director or administrator of each department or project are responsible for managing their budgets. Any expenditure above budget is completed within the department or by the appropriate vice president or the president. At the end of each year, a comprehensive review of actual revenues/expenses is conducted by the Fiscal Services Department to strengthen fiscal management, and correct any possible errors. The review is shared with management, and the outcomes are incorporated in the next year's budget [III.D.50](#).

Each expenditure is reviewed online by the corresponding manager, including all auxiliary operations and grants to ensure the expense is used for its intended purpose. The expenditure is also reviewed by management at the District to ensure it is being used for the intended purpose [III.D.56](#).

Analysis and Evaluation

The College does not have any debt repayment obligations. The subject of short-term and long-term financial liabilities and future obligations is covered in more detail in sections III.D.11 and III.D.12.

The College meets the standard.

Standard III.D.15 Financial Resources

The institution monitors and manages student loan default rates, revenue streams, and assets to ensure compliance with federal requirements, including Title IV of the Higher Education Act, and comes into compliance when the federal government identifies deficiencies.

Evidence of Meeting the Standard

The Department of Education has now gone to a 3-year CRR calculation, with 2012 being the most recent cohort. The Official 3-year Cohort Default Rates for the (3) most recent years at IVC are as follows:

<u>Year</u>	<u>Rate</u>
2012 Official	8.9%
2011 Official	14.7%
2010 Official	14.7%

The default rate at IVC is within the federal guidelines and is considered adequate for a community college based upon the demographics of our student population. Anything less than 10 percent removes additional restrictions placed by the Department of Education on schools when disbursing student loan funds. New business practices are underway to develop a plan to reduce the default rate if it ever should exceed the federal guidelines.

Student loan default rates, revenues, and related matters are monitored and assessed to ensure compliance with federal regulations. The Financial Aid Office continually monitors the default activity, working with the skip trace reports from servicers, and speaking with other schools about best practices, including reaching out to delinquent borrowers by developing a communication plan to keep the default rate below 10 percent. Beginning spring 2016, the Financial Aid Office began participation with the U.S. Department of Education in Experimental Site #6 - Limit Direct Unsubsidized Loan Over-borrowing. As a result, the College only offers Direct Unsubsidized Loans to students who have completed 24 units of college level coursework and have a "satisfactory" academic progress status as students in these populations have the highest risk of defaulting on student loans. The financial aid grants and operations are audited at least on an annual basis as part of the district, state,

federal or veteran's affairs audits. In addition, the Blue Book "is intended to provide guidance to those offices and individuals responsible for managing, keeping records of, accounting for, and reporting on the use of federal funds at institutions that participate in the Title IV, Federal Student Aid programs." There is a self-reporting requirement for the financial aid programs at the year-end [III.D.51](#).

Analysis and Evaluation

The institution monitors and manages student loan default rates, revenue streams, and assets to ensure compliance with federal requirements.

The College meets the standard.

Standard III.D.16 Financial Resources

Contractual agreements with external entities are consistent with the mission and goals of the institution, governed by institutional policies, and contain appropriate provisions to maintain the integrity of the institution and the quality of its programs, services, and operations.

Evidence of Meeting the Standard

The institution has several types of contracts with various external entities, such as independent contractor agreements, service maintenance agreements, construction contracts, software agreements, and memorandums of understanding. All contracts support the mission of the College by supporting the activities under the appropriate school or department. All contracts are approved by the college president, or designee, and the vice chancellor of Business Services and ratified by the Board of Trustees. If warranted, the District seeks external legal advice prior to signing a contract to protect the College against liabilities and maintain the integrity of the institution. The Office of Instruction and Academic Senate have an agreement to submit academic contracts in the Academic Senate to provide discipline experts an opportunity to vet the contracts and to assure the contracts are conducive to academic freedom. Annual facility rentals are signed by the Director of Facilities who serves on the Budget Development and Resource Planning Committee as well as the Strategic Planning and Accreditation Council. Lastly, the Bookstore Task Force and the Cafeteria Task Force are charged to oversee the contract negotiations with the Bookstore and Cafeteria, respectively [III.D.32](#).

The contracts signed by the District have an early termination clause for situations when work performed does not meet the expectations of the institution. They also have an indemnification clause and liability and other insurance requirements aimed at minimizing the risk for the District [III.D.57](#). To guide the College with the contract process and

requirements, the District has a comprehensive website with agreement templates and helpful tips [III.D.58](#).

External contracts that are related to federal funding or programs are managed in a manner to ensure that federal guidelines are met [III.D.59](#), [III.D.60](#).

Analysis and Evaluation

The College's contractual agreements with external entities are consistent with the mission and goals of the institution, governed by institutional policies, and contain appropriate provisions to maintain the integrity of the institution and the quality of its programs, services, and operations. The institution has reliable internal controls in place pertaining to contract negotiations, and there are strong connections between the contract operations and the College's mission.

Standard IV: Leadership and Governance

The institution recognizes and uses the contributions of leadership throughout the organization for promoting student success, sustaining academic quality, integrity, fiscal stability, and continuous improvement of the institution. Governance roles are defined in policy and are designed to facilitate decisions that support student learning programs and services and improve institutional effectiveness, while acknowledging the designated responsibilities of the governing board and the chief executive officer. Through established governance structures, processes, and practices, the governing board, administrators, faculty, staff, and students work together for the good of the institution. In multi-college districts or systems, the roles within the district/system are clearly delineated. The multi-college district or system has policies for allocation of resources to adequately support and sustain the colleges.

Introduction

Irvine Valley College (IVC) is committed to creating an environment in which all members of the college community have the opportunity to effectively participate in institutional planning and decision-making. To create an environment for empowerment, innovation, and institutional excellence, the College leadership encourages faculty, staff, administrators, and students to participate fully in the decision-making process. Stakeholders have a variety of avenues for participating in discussions about strategic planning, budget development, resource allocation, student learning, student support programs, and institutional effectiveness. Through the use of formal and informal structures, the College and District leadership encourages broad participation in the planning and decision-making processes to increase institutional effectiveness.

IVC and the South Orange County Community College District (SOCCCD) have undertaken significant efforts to address the 2010 ACCJC recommendations required for reaffirmation of Accreditation. As outlined in the 2013 Irvine Valley College Midterm Report ([IV.A.1](#)), the College and District are proud of these improvement efforts and continue to meet all Accreditation standards. Ten of the twelve 2010 ACCJC recommendations were related to Standard IV (Leadership and Governance) and are addressed throughout. For example, two recommendations from 2010 that pertain to the ability of administrators, faculty, staff, and students to work together for the good of the institution are:

- College Recommendation 4: *In order to improve, the team recommends that the college enhance communication among constituencies, especially those with supervisory/subordinate roles, regarding established procedures and decision-making practices in a collegial manner.*

- College Recommendation 6: *Although the college and its constituent groups have achieved a collegial working relationship with the current president to address issues with a new optimism, the college does not have this same type of relationship with the district leadership and the Board of Trustees. While some progress has been made and policies have been developed, the team feels that Recommendations 7 and 8 (Standards IV.A.1, 2, 3, 5) of the 2004 visiting team Accreditation Team have not been fully met.*

As part of the ongoing process for improvement, IVC and SOCCCD as a whole have adopted strategic planning goals that address “respectful interactions and collaboration” (IV.A.2) (IV.A.3), convened a Task Force on Barriers (IV.A.4) and facilitated Higher Understanding Gatherings Sessions (HUGS) (IV.A.5) (discussed in Standard IV.A.2), and have included questions specific to the above recommendations in the institution’s bi-annual employee surveys as one of several means of evaluating this progress. Consequently, the pertinent facts from the most recent employee surveys are important considerations. For the 2015 Irvine Valley College Employee Survey (IV.A.6), 314 respondents’ responses are summarized below in Table IV.1. For the 2014 District wide Climate Survey (IV.A.7), 781 respondents’ responses are summarized in Table IV.2. Due to the varied wording of Likert-Scale prompts, non-negative responses are presented in Table IV.1 and Table IV.2 for quick analysis. More complete analysis can be completed by reviewing the entire survey results (IV.A.6, IV.A.7).

Table IV.1: Excerpts and Summary of IVC Employee Survey Results 2015

Statement / Question	Non-negative Responses (percentage)
Assessment of the working relationship between IVC and District Services.	89
Assessment of working relationship between IVC and Saddleback.	87
The District provides effective leadership that supports the College's mission.	72
The administration at the District is generally respected by employees.	73
The administration at IVC provides effective leadership that supports the College's mission.	78
District administrators and managers usually make decisions that are fair.	73
I have the opportunity to participate meaningfully in shared governance at IVC.	86
I am informed about budget decisions that affect my work area.	58

Statement / Question	Non-negative Responses (percentage)
I regularly receive the information I need to help me fulfill my job responsibilities.	79
I am content with the amount of information I receive on the major issues being addressed by my participatory governance representatives.	84
I am content with the amount of information I receive on the major issues being addressed by the college president.	75
The college president communicates regularly with all constituencies.	77
Staff and faculty members are kept informed about support services available for students.	82
I am content with the amount of information I receive on the major issues being addressed by the Chancellor.	68
The District Chancellor communicates regularly with all constituencies.	69

Table IV.2: Excerpts and Summary of the SOCCD District wide Employee Survey Results 2014

Statement / Question	Non-negative Responses (percentage)
Overall, how would you assess the working relationship between Irvine Valley College and District Services?	90 (55 n/a)
Overall, how would you assess the working relationship between Irvine Valley College and Saddleback College?	81 (33 n/a)
Administrators throughout the District provide effective leadership that supports the District's mission.	71
Administrators throughout the district provide effective leadership that supports the District wide Strategic Plan.	76
Administrators throughout the District follow established policies, procedures, and protocols.	71
Administrators throughout the District understand the roles of the colleges and district services.	70
Administrators throughout the District encourage civility and respectful behavior.	73

Statement / Question	Non-negative Responses (percentage)
Administrators throughout the District encourage collaboration.	68
Administrators throughout the District encourage respectful interaction.	72
I have the opportunity to participate meaningfully in decisions at work.	67
I regularly receive information on the major issues being addressed by the college presidents.	65
I regularly receive information on the major issues being addressed by my participatory governance representatives.	78
I regularly receive information on the major issues being addressed by the chancellor.	69
I am aware of the district wide integrated strategic planning process.	69

Students, faculty members, classified staff, managers, and administrators are encouraged to take initiative in improving the practices, programs, and services within the institution. In order to ensure all members of the college community have the opportunity to participate effectively, the College developed and adopted in 2008 the Irvine Valley College Planning and Decision-Making Manual (IVC-PDM) (IV.A.8). The IVC-PDM clearly delineates the role and scope of authority of all college councils, committees, and task forces, and the roles of each participatory governance constituent group in order to provide sufficient information for members of the College to participate effectively. Processes by which the College participates in district wide decisions are described in the SOCCCD District Wide Planning and Decision-Making Manual (SOCCCD-PDM) (IV.A.9), which will be discussed in detail in sections addressing Standards IV-C and IV-D. The SOCCCD-PDM also describes the relationship between college constituent groups, the district councils and committees, and the process by which college leadership interacts with the Board of Trustees.

Standard IV.A: Decision-Making Role and Processes

Standard IV.A.1 Decision-Making Role and Processes

Institutional leaders create and encourage innovation leading to institutional excellence. They support administrators, faculty, staff, and students, no matter what their official titles, in taking initiative for improving the practices, programs, and services in which they are

involved. When ideas for improvement have policy or significant institution wide implications, systematic participative processes are used to assure effective planning and implementation.

Evidence of Meeting the Standard

Irvine Valley College (IVC) and the South Orange County Community College District (SOCCCD) support the rights of faculty, staff, students, managers, and administrators to participate effectively in District and College governance processes in accordance with Education Code §70902(b)(7). Additionally, IVC has adopted a governance structure and policies that encourage leadership at all levels of the organization and promote the sharing of ideas and suggestions for improving institutional effectiveness: student performance and outcomes, fiscal stability, academic quality, and federal and state compliance. The *Irvine Valley College Planning and Decision-Making Manual* (IVC-PDM) ([IV.A.8](#)), and the *Participatory Governance Decision-Making Flowchart* ([IV.A.10](#)) outline IVC's formal committee structure. This committee structure was developed to create an environment for empowerment, innovation, and institutional excellence.

The College adopted the IVC-PDM in 2008 in order to provide opportunities for effective participation by all members of the college community in institutional planning and to ensure individuals would be able to contribute ideas for institutional improvement. The College also adopted a consensus decision-making philosophy (described in the IVC-PDM) and discussed during its regular review. According to this philosophy, it is the responsibility of institutional leaders to establish a safe harbor wherein members of the College community can engage in honest and open dialogue. Additionally, IVC overhauled its committee structure to include task forces and work groups to permit members of all constituent groups, including students, to participate either in smaller groups with more focused charges or in a larger committee that intentionally represented the breadth of the campus community.

The commitment to promote student, faculty, staff, and administrator input in planning and decision-making can be illustrated with the following example. In 2013 the Director of Fiscal Services predicted the possibility of a budget shortfall by 2015. In response, the budget committee recommended that the Budget Solutions Recommendations (BSR) Work Group be established to investigate the budget in detail and make suggestions to address the impending deficit. BSR examined several department budgets and the budget continuity process in detail to gain a better understanding of the extent to which department budgets were “rolled over” and the extent to which they were annually re-evaluated. IVC also placed a link on Inside IVC ([IV.A.11](#)), available to all employees, for suggestions and comments regarding the budget and college priorities. While the participatory governance committees and councils continued to look at budgetary issues in their formal meetings within their purview, the BSR site gleaned a large number of suggestions. Moreover, the BSR has now been incorporated into the Budget Development and Resource Planning Committee

(BDRPC) as a work group that can be convened as needed, and its Inside IVC page ([IV.A.11](#)) persists with a link—“Add a Suggestion”—perpetually available to the campus community to participate directly, as well as through their governance committee representatives. Thus, the entire college staff was aware of the global budgetary concerns, broad discussion ensued, and suggestions were fielded and used from all interested members of the campus to solve the problem.

A noteworthy consideration concerns the College’s efforts to promote innovation at all levels of the organization through professional development. In the IVC Strategic Plan ([IV.A.12](#)), two of the college goals involve professional development; the same is true in the SOCCC Strategic Plan ([IV.A.13](#)). One of these goals focuses on professional development to improve student learning and student success; the other involves encouraging employees of all titles and positions to undertake professional development to improve their work productivity or to move to another position to which they aspire perhaps because of increased responsibility or perhaps because it better fits their strengths or personal preferences. The benefit to the institution of professional development activities directed at improving student learning and student success are readily apparent. Promoting employee satisfaction with their work by making them more successful at what they are currently doing, as well as by encouraging employees to move into more congenial work situations in which they are likely to be more successful and satisfied, contribute to improving the work product and the climate of the institution.

Similarly, several categorical grant programs such as Student Equity, SSSP, BSI, Perkins, and AANAPISI, support directed relevant professional development for faculty members, administrators, and staff. In each of these cases, members of the faculty, administration, and staff who participate in these activities, conferences, workshops, and events are better able and expected to participate actively and assume leadership roles in the focus area of the supported activity.

Analysis and Evaluation

The governance structure and culture in the District and at IVC endorse individual involvement and responsibility for promoting best practices that enhance programs and services regardless of the individual’s title, constituent group, or level in the organization. Constituent members are encouraged to voice concerns, share ideas, and communicate freely about College and District programs and services.

The College committee structure is one facet of the effort to encourage and support involvement of all employees and students to develop and explore their ideas for improving the College as a whole, or specific aspects of the institution. The extensive systematic participatory committee structure described in the IVC-PDM institutionalizes this approach. Interested members of the staff, administration, faculty, and the student body can choose to

become involved in task forces or work groups with highly focused charges, or in strategic planning committees or councils that make recommendations for policy or decisions with significant institution wide implications which include prioritizing allocations of resources for personnel, equipment, facilities, technology, student success initiatives, and academic and enrollment planning. In this environment, students, faculty, staff, managers, and administrators openly share ideas through their committee and task force representatives, and the formal and informal participatory governance and review structures provide a framework for innovation.

The College meets the standard.

Standard IV.A.2 Decision-Making Role and Processes

The institution establishes and implements policy and procedures authorizing administrator, faculty, and staff participation in decision-making processes. The policy makes provisions for student participation and consideration of student views in those matters in which students have a direct and reasonable interest. Policy specifies the manner in which individuals bring forward ideas and work together on appropriate policy, planning, and special-purpose committees.

Evidence of Meeting the Standard

The College relies on Board Policies, Administrative Regulations, and college governance procedures to establish the rights of faculty, staff, administrators, and students to participate effectively in the governance and resource allocation processes. Board Policy 2001 (Administrative Organization) ([IV.A.14](#)) outlines the college presidents' responsibilities for the development of college governance committees.

In accordance with Title 5, § 53200(c), Board Policy 2100.1 (Delegation of Authority to the Academic Senate) ([IV.A.12](#)) asserts that the "district and college governance structures, as related to faculty roles, are academic and professional matters requiring collegial consultation between the college president and the Academic Senate. Board Policy 2100.2 (Role and Scope of Authority of the Academic Senates) ([IV.A.16](#)) espouses that faculty have not only the right to participate and express opinions at the college and district level but the guarantee that their opinions will be given every reasonable consideration. Additionally, Board Policy 6100 (Curriculum) ([IV.A.17](#)) establishes that the Academic Senate assumes primary responsibility for making recommendations in the areas of curriculum and academic standards.

In accordance with the Higher Education Employment Relations Act (HEERA), the District recognizes the Faculty Association as the exclusive representative of full-time and part-time

faculty of the District for the purposes of meeting and negotiating. In doing so the District complies with Chapter 10 of the Meyers-Milias-Brown Act, which promotes full communication between public employers and their employees by providing a reasonable method of resolving disputes regarding wages, hours, and other terms and conditions of employment between public employers and public employee organizations.

Assembly Bill (AB) 1725 directs the Board of Trustees to provide an opportunity for classified staff input on all matters that affect staff. There are four organizations within the South Orange County Community College District that assume this role: the Saddleback College Classified Senate, the Irvine Valley College Classified Senate, the California School Employees Association (CSEA), and the Police Officers Association (POA). The CSEA and the POA are the exclusive collective bargaining representatives for the groups they represent. All nonexempt classified employees, other than police officers, are represented by the CSEA. The CSEA has the right to appoint the first representative to any committee and the College Classified Senate has the right to appoint the second. As a practical matter, most governance committees offer seats to each exclusive representative. A representative from each Classified Senate.

Board Policy 4056 (Classified Employees Participation in Decision Making) ([IV.A.18](#)) and Title 5, §51023.5, define the right of classified staff to participate effectively in college governance through the Classified Senate. Accordingly, the Classified Senate is included in the joint formulation and development of District and College policies and procedures that significantly affect the classified staff and the opinions and recommendations of the Classified Senates of the District are given every reasonable consideration.

Title 5, Section 51023.7, Calif. Ed. Code, Section 70902[b][7]), and Board Policy 5627 (Student Participation in Governance) ([IV.A.19](#)) authorize student participation in the decision-making processes that significantly affect them and recognize the Associated Student Government at each college in the District. Board Policy 5240 (Associated Students' Organization) ([IV.A.20](#)) established the Associated Students as the official voice for the students in the college consultation process. Consequently, the Associated Students of Irvine Valley College (ASIVC) play an integral role in student clubs and activities as well as college governance.

To ensure administrators have a substantive and clearly defined role in institutional governance and exercise a substantial role in institutional policies, planning, and budget, the IVC Planning and Decision-Making Manual (IVC-PDM) ([IV.A.8](#)) clearly delineates the role and scope of authority of the Administrative Councils. The administrative structure consists of the Strategic Planning and Accreditation Council, the President's Executive Council, the Vice President for Instruction's Council, the Instructional Council, and the Student Services

Council. The charge of each council, membership, and reporting responsibilities are defined in the manual and outlined in Standard IV.A.3.

The processes for college and district strategic planning and decision-making are described fully in the IVC-PDM ([IV.A.8](#)), the SOCCCD District-Wide Planning and Decision-Making Manual (SOCCCD-PDM) ([IV.A.9](#)), and on the SOCCCD SharePoint site where the district wide committees' membership and charge are published. District wide planning and decision-making will be discussed in detail in the narrative for Standard IV.C. The interface between district wide and college committees and representation on these committees has two main components: District wide committees have representatives from the two Colleges and District Services, and college representatives report back to relevant college groups where matters of concern are discussed. College representatives, thus, are clear about the consensus perspective of the groups they represent when they meet in district wide committees. District committees' membership usually balances representation from the two Colleges and District Services and among the constituent governance groups—faculty, classified staff, administrators and managers, senates and bargaining units, and students—so that all voices may be heard with clearly defined roles.

Analysis and Evaluation

Student learning is the focus of the governance and decision-making processes. Individuals are encouraged to bring ideas for improvement through their representatives on the committees, task forces, work groups, and administrative councils through the agreed upon decision-making processes. College leadership has worked with the Board of Trustees to increase the ability of faculty to serve in key leadership roles by increasing the amount of reassigned time and/or stipends available to faculty. Managers and administrators are encouraged to make accommodations so classified staff may attend meetings and represent their constituents, and ASAC draws upon their membership to find student representatives to attend regularly scheduled governance meetings.

Within IVC, the nature of participatory governance in planning and decision-making is substantiated by the revisions of the IVC-PDM that established faculty co-chairs for each of the strategic planning committees (SPCs) and the Strategic Planning and Accreditation Council (SPAC) ([IV.A.8](#)). This intentional inclusion of faculty co-chairs for participatory governance committees reflects the college wide appreciation for the role and responsibilities of the faculty in planning and decision-making. Most of the task forces and work groups also sport faculty and administration co-chairs, in the same spirit. Furthermore, the number of faculty members as well as their proportion on college task forces, committees, and SPAC have increased gradually for several years, following the specific intention in the last major IVC-PDM revision.

IVC committees have student members, either voting or non-voting, as deemed appropriate in each instance. For example, students are invited to attend and speak at Academic Senate meetings but do not have a voting role in this organization that specifically represents the professional interests of the IVC faculty. On the other hand, student members of college committees have the same voting privileges as any other member, but it should be emphasized that virtually all decisions in these committees are accomplished through consensus, rather than voting. College committees have seen a remarkable and welcome increase in attendance and participation by student representatives during the past two to three years.

The College meets the standard.

Standard IV.A.3 Decision-Making Role and Processes

Administrators and faculty, through policy and procedures, have a substantive and clearly defined role in institutional governance and exercise a substantive voice in institutional policies, planning, and budget that relate to their areas of responsibility and expertise.

Evidence of Meeting the Standard

In accordance with Title 5, California Code of Regulations §53023, SOCCCD enacted board policies BP-2100.1 (Delegation of Authority to the Academic Senate [IV.A.14](#)), BP-2100.2 (Role and Scope of Authority of the Academic Senates [IV.A.16](#)), BP-6100 (Curriculum [IV.A.17](#)), BP-4056 (Classified Employees Participation in Decision Making [IV.A.18](#)), and BP-5627 (Student Participation in Governance [IV.A.19](#)) which provide clear delineation of roles so committee compositions, bylaws, and negotiated collective bargaining agreements all reflect the rights and responsibilities of faculty, staff, students, managers, and administrators. Everyone engages in college and district governance processes. Included in their responsibilities, department chairs, managers, and administrators have regular unit meetings to provide opportunities to exchange ideas for program change and improvements.

IVC reorganized its committee structure in 2008 under the auspices of a group convened by the president that included the president of the Board of Trustees, the SOCCCD Deputy Chancellor, and many IVC employees, including the vice presidents, the president of the Academic Senate, and a wide diversity of members of the faculty, classified staff, administration, and classified managers. The inclusion of the Deputy Chancellor and Board president ensured that all of the work was familiar and acceptable at the district level and that they witnessed the inclusive nature of the process. This process constituted a change in the relationships among groups on campus and with the Chancellor's Office and the Board. Since that time, the trust and ability to engage in fruitful and open dialog has grown to attain,

for the past several years, a sustainable relationship among constituent groups at the College and throughout the District.

Since 2008 The Irvine Valley College Planning and Decision-Making Manual (IVC-PDM) ([IV.A.8](#)) has been the primary document that specifies the systematic processes by which individuals, representatives of constituent groups, and members of the administration work together to make decisions that support student learning programs and services, and institutional effectiveness. The charge, membership, role and scope of authority of Strategic Planning Councils, committees, task forces, Academic Senate, Classified Senate, employee bargaining units, and students are clearly delineated in the manual to ensure all members of the college community have the opportunity for effective participation in planning and decision-making processes.

In an effort to clarify and reduce redundancy in the committee structure, IVC uses the terms “council” or “committee” when referring to strategic planning committees, and “task force” and “work group” for other participatory groups. Membership in all of these, with the exception of work groups, is delineated in the IVC-PDM and can be changed only by agreement of the Academic Senate and Strategic Planning and Accreditation Council (SPAC), with final approval by the president. Membership on college committees and task forces includes representatives of the student body represented by the ASIVC; faculty representatives appointed by the Academic Senate and in some instances the bargaining unit, the Faculty Association (FA); classified staff appointed by the bargaining unit, the California School Employees Association (CSEA), and the Classified Senate; classified managers and administrators appointed by the appropriate vice president. Work groups can be called together for a specific function and have more variable membership; no college wide approbation is required for these units, which are usually temporary although a few persistent work groups are exceptions as described in the IVC-PDM. They remain designated as work groups in order to permit more flexibility in their membership and schedule.

In 2008 IVC overhauled its committees as much as seemed feasible at that time, and established a revamped College Council that funneled recommendations from five strategic planning committees (SPCs) to the president and his President’s Executive Council for final decisions. Most of the other committees and task forces reported to one or more of the SPCs. The intention behind this organization was that this structure would permit members of all constituent groups, including students, to participate either in smaller groups with more focused charge, which were not necessarily completely representative, or in larger SPCs that intentionally represented the breadth of the campus community for a more integrated discussion of the issues in the context of the strategic plan. During the 2011-2012 academic year, the SPC for Institutional Effectiveness undertook a significant revision of the IVC-PDM ([IV.A.8](#)) including combining two of the SPCs and moving strategic planning from the

budget committee (hitherto Strategic Planning Oversight and Budget Development Committee) to what had been called College Council, thus forming the Strategic Planning and Accreditation Council (SPAC). Membership in the SPCs and SPAC of non-administrators, especially faculty members, was increased.

The organization's discussions and decision-making philosophy, which are part of annual committee reviews, keep the campus community aware of the intentionality of our committee structure and consensus-oriented, decision-making process. All interested members of the college community are encouraged to participate in the conversation. The "safe harbor" and consensus model is discussed often, keeping both in the public view.

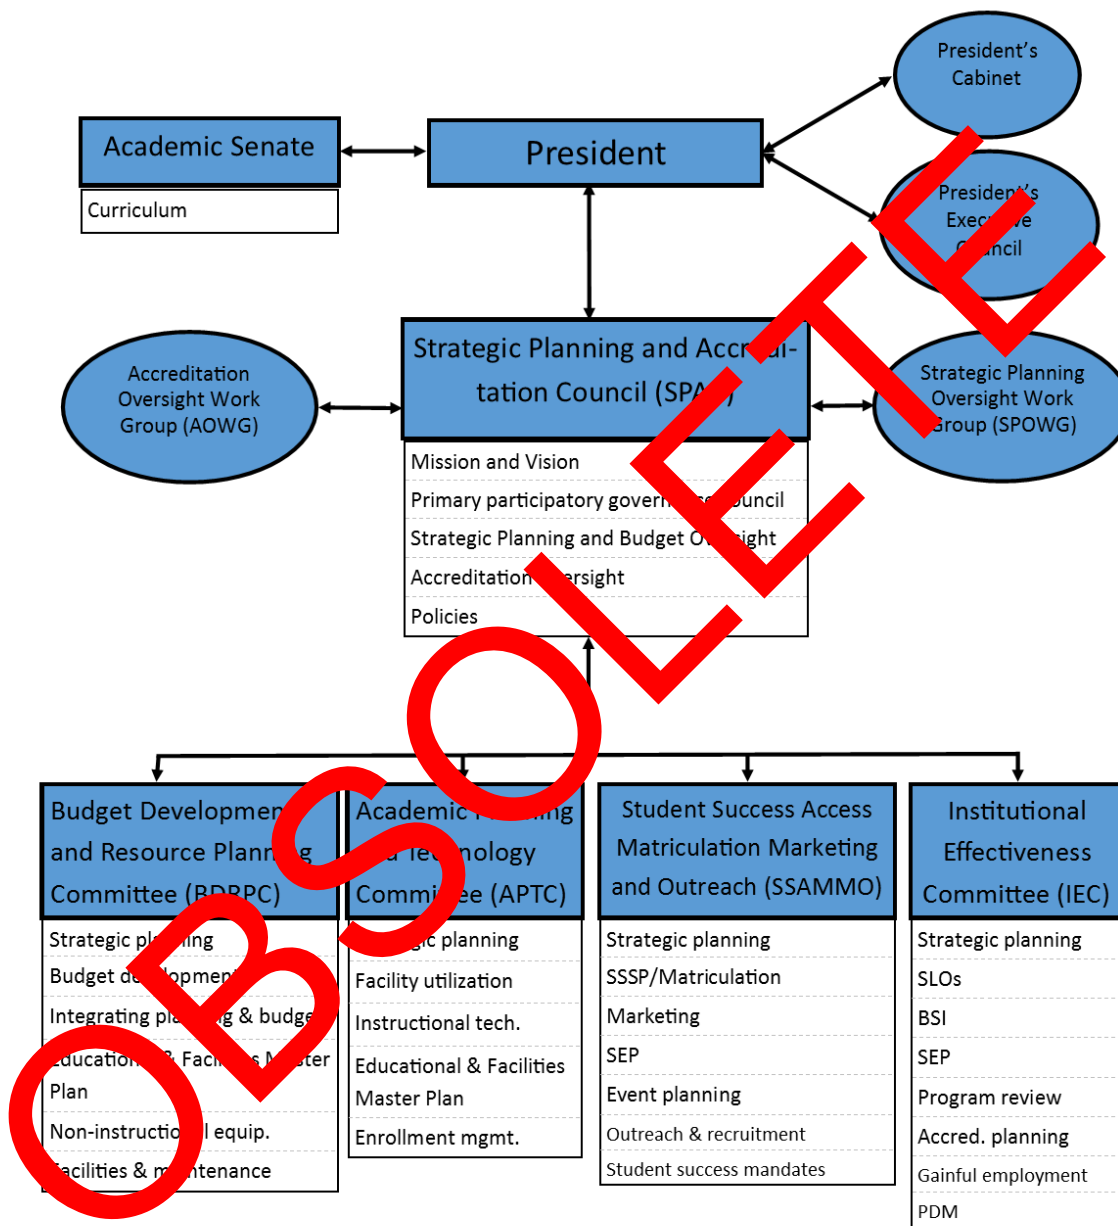

The four SPCs are the:

- Academic Planning and Technology Committee (APTC)
- Institutional Effectiveness Committee (IEC)
- Budget Development and Resource Planning Committee (BDRPC)
- Student Success, Access, Matriculation, Marketing and Outreach Committee (SSAMMO)

Each Strategic Planning Committee meets regularly throughout the academic year and operates with specific charges, membership, and reporting responsibilities, as described in the IVC-PDM. All meetings are open, and interested parties are encouraged to attend and participate. Committee agendas and minutes are posted on the college SharePoint site, "Inside IVC". Discussions in all of the committees, task forces, and councils range from the effects of the committee's charge on student learning and success, definitions of student success from various perspectives, programs and services offered by the College and District as they pertain to student success, employee satisfaction and efficiency, institutional planning, and the evaluation/assessment of college policies, procedures, and practices. The organizational structure of the College is thus designed to provide the opportunity for effective participation, inclusivity, and communication. Further, it is designed to have a certain amount of overlap among SPCs and between each task force and the SPC to which it reports, in order to ensure many people are able to discuss vital issues in a variety of combinations and contexts. While this organizational format inevitably leads to a certain amount of redundancy, IVC's experience to date has been that this system works best when knowledgeable people span committees to ensure good integration and depth of understanding.

Implementation of policies and procedures regarding institutional improvement is the responsibility of the Administrative Councils ([IV.A.21](#)). The college administrative councils include the President's Executive Council, the President's Cabinet, the Vice President for Instruction's Council, the Instructional Council, the Administrative Services Council, and the Student Services Council. Each Administrative Council has specific charges, defined membership, and a clearly delineated system of reporting responsibilities. The roles and responsibilities of the administrative councils are outlined below ([IV.A.21](#)):

Participatory Governance Decision-Making Process Flowchart

Analysis and Evaluation

Students, faculty, staff, managers, and administrators have clearly defined roles in the governance process. They are called upon to participate actively on committees, task forces, and work groups in accordance with established policies and procedures. IVC's participatory governance committees have membership from each of the primary constituency groups and decisions are made in an inclusive manner. Each SPC and SPAC annually evaluates its role in leadership of the governance and decision-making processes to ensure integrity and effectiveness. The results of the evaluation are widely communicated and form the basis for improvement and, as needed, revisions to the committee structure and charge. As a result, faculty, staff, students, and administrators are generally aware of their roles and responsibilities in the governance and decision-making process.

Using an inclusive system for planning and decision-making is often lengthy as every effort is made to vet issues and concerns in multiple venues. As the institution's processes become more familiar and are used for more purposes, the institution is able to discover the major avoidable bottlenecks and adjust the procedures to minimize them. Inevitable delays, for example those imposed by meeting schedules, are identified to avoid or minimize frustration. When a more expeditious decision is required, the institution is comfortable with adjustments that do not significantly reduce popular input. The resource request process is an excellent example of all of these components: a thorough, but inclusive and open deliberative process, with well-defined cut-outs and notifications for matters that require faster decisions. This process has been discussed in more detail in Standard III.

Clear definition of roles and responsibilities for constituent members extend beyond governance and policy decisions. Faculty, staff, and students also have defined roles in unit operations, hiring process, instructional activities, and student success initiatives as the following examples illustrate.

Within instructional units, deans are assisted by department chairs. The roles and compensation for department chairs have been clarified in several steps since the last self-evaluation. Through the department chairs, faculty expertise in departments and schools is communicated to the deans regarding issues including scheduling and faculty teaching assignments, hiring and evaluations of part-time faculty members, department budget recommendations, and other matters that might arise. On the rare occasion a major disagreement occurs between a chair and a dean, the matter is brought to the relevant vice president for consideration. Of course, it may happen that larger philosophical disagreements may occur, and these are brought to the Academic Senate or to the relevant college committee, but such instances have been extremely rare in recent years.

The Academic Senate also has clearly defined roles in the faculty hiring prioritization process. The Academic Senate plays a key role in determining evaluation criteria and prioritization methodology and ranking recommendations to the president. The Senate must

also approve the search committee composition for faculty hiring ([IV.A.22](#)). The Senate appoints faculty representatives for manager and administrator hires ([IV.A.23](#)). In addition, the Academic Senate has defined roles in determining whether newly hired administrators from outside the District will be granted retreat rights—the ability to secure a teaching position upon resigning from an administrative position—in the District.

The College meets the standard.

Standard IV.A.4 Decision-Making Role and Processes

Faculty and academic administrators, through policy and procedures, and through well-defined structures, have responsibility for recommendations about curriculum and student learning programs and services.

Evidence of Meeting the Standard

The roles and responsibilities of faculty, staff, and administrators in developing curriculum and enhancing student learning programs and services are defined in Board Policy 6100 (Curriculum [IV.A.17](#)), Board Policy 2100.2 (Role and Scope of Authority of the Academic Senate [IV.A.16](#)), and Board Policy 3550 (Student Success and Support Programs [IV.A.24](#)) as well as in the charters of the Curriculum Committee, Academic Senate, Academic Planning and Technology Committee (APTC), Institution Effectiveness Committee (IEC), Student Services Council, and Student Success, Access, Matriculation, Marketing, and Outreach Committee (SSAMMO).

The faculty, staff, and administrators have clearly defined roles in the curriculum process. The Curriculum Committee (CC) is a committee of the Academic Senate and makes recommendations to the Senate regarding curriculum, certificates, and the other curricular aspects of academic programs. The Senate makes recommendations regarding these items to the president, who makes recommendations to the Board of Trustees.

The Curriculum Specialist, a member of the classified staff who works in the Office of Instruction, serves as an *ex officio* non-voting member of the Curriculum Committee. The vice president for Instruction is a member of CC, and has currently delegated this work to the dean of Academic Affairs. The articulation officer serves as an *ex-officio* voting member. CC membership includes one voting faculty member from each school; assigning “alternates” who attend regularly, and can therefore serve in place of the member, is encouraged. As our faculty has grown, the Senate has encouraged schools, especially the larger ones, to send new faculty members to CC, Academic Affairs, or the Representative Council of the Academic Senate to become familiar with college practices and these core faculty roles. CC

membership is usually a healthy mix of experienced and new faculty members, so the more experienced members provide continuity and help train newer ones.

Curriculum is written or revised in CurricUNET, so that any interested faculty member is able to view it easily. Discipline experts in the relevant department vet new and revised curriculum, and the department chair passes the curriculum forward to CC. The dean is notified that new or revised curriculum is moving forward so she/he can review it. If necessary, the dean may engage the author, department chair, entire department, or school, in discussion if there is any concern about available resources (facilities, instructors, budgeted hours to offer the course, supplies, etc.) for the proposed course.

The Technical Review (TR) work group reviews new and revised curriculum and requests further revision as needed until the curriculum is acceptable to the faculty. This review includes checking: that the California Community College Chancellor's Office requirements are met; that student learning objectives are well described and integrated with content, methods of assessment, assignments, and all other components of the Course Outline of Record (COR); that the course proposal is integrated in certificates and/or programs; and that prerequisites are reasonable and other technical requirements are met ([IV.A.25](#)). CC reviews the COR upon recommendation from TR, reviewing matters of integration and confirming that in areas where disciplines may intersect or overlap the College does not introduce deleterious competition between departments or schools. As the Office of Instruction is represented at CC, and in the 2015-16 academic year the dean of Academic Programs had also attended most TR meetings, the administration is kept abreast of any potential areas of concern during curriculum development. By the time CC recommends approval of new or revised curriculum to the Academic Senate, there is every expectation it is acceptable to faculty and administration and the College administration is willing and able to offer the course.

Proposed changes or revisions to programs and certificates follow the same process as described above, though the role of administration is greater in determining that resources are available to support the program and offer its components frequently enough for students to be able to complete in a timely manner.

Board Policy 5050 and Administrative Regulation 5050 (Student Success and Support Programs [IV.A.24](#), [IV.A.26](#)) establish the framework for expectations that faculty, staff, and administrators work collaboratively to ensure the College “provide[s] students opportunity for (1) access, (2) equitable, quality education, and (3) successful attainment of their educational objectives, with a full range of support services through matriculation, all of which acknowledge the requirements and intent of the Seymour Campbell Act of 1986 and Student Success Task Force Requirements, September 2012.”

Student learning services are diverse and numerous. Standard II describes these in great detail. Faculty, staff, managers, and administrators in student services areas—defined for these purposes as all departments under the management of the vice president for Student Services (VPSS)—participate broadly in all college committees for planning and decision-making. Similarly, instructional faculty members participate in many committees that are traditionally part of student services. Thus, there is collaboration between the two “sides” of the campus community, reducing friction and increasing productive use of time and resources. These elements are apparent in the membership of the planning and oversight committees for student services and student success grants and initiatives as well as the strategic planning committees.

The Student Success, Access, Matriculation, Marketing, and Outreach Committee (SSAMMO) and the Student Services Council are the primary bodies that make recommendations regarding student services and programs to the Strategic Planning and Accreditation Council (SPAC) and the president. SSAMMO is charged with the development, review, and oversight of programs, grants, and processes, including matriculation, K-12 partnerships, student success mandates, tutoring, the Basic Skills Initiative, and Student Equity, to name a few.

Analysis and Evaluation

The faculty, staff, and administrators have well-defined roles in the processes and decisions related to curriculum and student learning programs and services. Curriculum is a faculty driven process, but administrators and classified staff provide input and participate in decision making as administration input is critical for assessing resource availability. The Curriculum Committee is the main body that reviews and makes recommendations for courses, programs, degrees and certificates to the Academic Senate; CC and APTC make recommendations to the Academic Senate and SPAC, respectively, regarding programs and resource (including personnel, facilities, and technology) requirements. Other committees such as the Institutional Effectiveness Committee (IEC) and SSAMMO involve faculty, staff, and administrators in recommendations related to student learning and support services including oversight, review, and evaluation of Student Learning Outcomes, Administrative Unit Outcomes, and Student Services Outcomes.

Working collaboratively, the faculty and administrators share the responsibility for shaping the college programs, and services that support student learning and achievement. To illustrate, policies and procedures requiring broad participation are in place and are reviewed and revised as needed to propose new programs or to discontinue a program. At IVC, program discontinuance occurred rarely; instead every effort is made by all constituent groups to revise faltering programs so they become viable. In the one instance since IVC established a process for program discontinuance, the program was discontinued with the full accord and support of the discipline faculty involved. A similar program has recently been started and a new full-time faculty member hired to support it. This example of the decade-

long history of Optics and Photonics at IVC demonstrates the utility of the institution's processes to reflect the changing academic, career technical education, and the workforce development needs of the community; the ability of IVC to respond to these community needs rather than be limited by its history; and the collaborative nature of the decision-making process.

The College meets the standard.

Standard IV.A.5 Decision-Making Role and Processes

Through its system of board and institutional governance, the institution ensures the appropriate consideration of relevant perspectives; decision-making aligned with expertise and responsibility; and timely action on institutional plans, policies, curricular change, and other key considerations.

Evidence of Meeting the Standard

The policies and procedures outlined in Standard IV.A.2 establish the rights of faculty, staff, students, and administrators to participate effectively in the governance process, so employee groups and students have regular, direct and collegial consultations with the administration. Every effort is made to include individuals and groups with the appropriate expertise and area of involvement in the decision-making process. Administrators, faculty, and staff are assigned to committees befitting their area of expertise, training, knowledge of best practices, and functions relative to their job duties. Decision making occurs in an open and collegial manner during regularly scheduled participatory governance meetings which ensure that individual stakeholders and the resident experts for particular items have a voice in the process. In addition, work groups are formed or additional meetings are convened when necessary, in accordance with Section 54952 of the California Governance Code (the Brown Act). Individual committees, task forces, and work groups establish timelines to attain closure in a timely manner. These groups generally err on the side of collegial and inclusive decisions versus rushing the process as the following example illustrates.

The 2014–2015 revision of the IVC Planning and Decision-Making Manual (IVC-PDM) (IV.A.2) took additional time for widespread conversation and consensus. In academic year 2014-15 the proposed revisions included descriptions of the institution's decision-making process and consensus and a new decision-making flow diagram. These topics engendered a great deal of discussion and many iterations before consensus could be reached, delaying the adoption of the final version until fall 2015. In spring 2015 the updated and revised committee charge components were approved by the Academic Senate and the Strategic Planning and Accreditation Council (SPAC), so their implementation was not delayed. While disagreements certainly occurred, members of the college community ultimately found

compromises with which all parties could feel comfortable, thus providing strong evidence of “appropriate consideration of relevant perspectives” in the decision-making process.

Analysis and Evaluation

The aforementioned policies and governance procedures specify the roles of students, faculty, staff, managers, and administrators. Constituent input is taken into account for decisions that directly affect them, or for which they have expertise or a vested interest. Administrative units and governance groups monitor operational timelines and the published calendar. They meet throughout the primary terms so there is ample time for notice; as a result, input may be gathered from the appropriate stakeholders and, whenever possible, decisions are delayed until consensus has been reached. Periodically, students, faculty, staff, and administrators dialogue about being over-scheduled and pressured to prioritize conflicting responsibilities. Attending regularly scheduled committee meetings and the associated task forces or workgroups is sometimes problematic. The classified staff appear to have the most difficulty with limited availability to participate in governance processes while also meeting the demands and time lines specific to their jobs. In many instances, financial concerns prohibit the use of overtime for staff members to complete their work if non-standard work group meetings are required for issues requiring their expertise. The College is aware of the predicament many face with the conflicting need to finish their work and their desire to participate in the governance process.

The College meets the standard.

Standard IV.A.6 Decision-Making Role and Processes

The processes for decision-making and the resulting decisions are documented and widely communicated across the institution.

Evidence of Meeting the Standard

The decision-making processes, delegation of authority, and delineation of roles and responsibilities are accessible to the public and employees through the publication of board policies, administrative regulations, various committee charters and bylaws, and the IVC Planning and Decision Making Manual. There are several ways in which documentation of the decision-making process and the associated decisions are communicated throughout the District and College. Communication to the public or the relevant stakeholders is achieved through committee reports, newsletters, district or college wide announcements, ad-hoc gatherings, and the college and district websites [IV.A.27](#), [IV.A.28](#). Board meetings and college governance meetings are open meetings with agendas and minutes posted on the college or district SharePoint sites or websites in accordance with Section 54952 of the California Code (the Brown Act), and at these meeting opportunities are provided for

individuals to make public comments. Additionally, Board meetings and many college wide meetings are videotaped and posted to the district or college website [IV.A.27](#), [IV.A.28](#).

Operational units and committees that do not fall under the provisions of the Brown Act conduct open meetings and maintain publicly accessible websites and/or SharePoint sites available to employees ([IV.A.29](#)). In all cases committee members are charged with reporting information back to their respective constituent group(s) through oral or written reports. To illustrate, curriculum updates are a standing agenda item at Academic Senate, Instructional Council, and Academic School meetings; the Senate president regularly reports decisions made in college or district wide committees back to the Senate; and collective bargaining units communicate negotiation progress and contract updates at regularly scheduled meetings, ad-hoc meetings, or via email.

Analysis and Evaluation

College and District policies, procedures, and communication protocols are compliant with the provisions of the Brown Act. Recommendations and final decisions are communicated to the public and employees through newsletters, announcements, committee reports, scheduled meetings, and ad-hoc gatherings.

The College meets the standard.

Standard IV.A.7 Decision-making Roles and Processes

Leadership roles and the institution's governance and decision-making policies, procedures, and processes are regularly evaluated to assure their integrity and effectiveness. The institution widely communicates the results of these evaluations and uses them as the basis for improvement.

Evidence of Meeting the Standard

Evaluation of the decision-making process and committee effectiveness occurs as a result of the planning protocols that are incorporated in each committee's charter. The College has instituted a regular evaluation of the role of leadership and the decision-making structures and processes in order to ensure integrity and effectiveness. Additionally, stakeholders periodically call policies and processes into question, which prompts additional evaluations to enhance the integrity and effectiveness of the decision-making process. The self-evaluation process may take the form of surveys, formal written reports, or discussions [IV.A.30](#).

SPAC and all the SPCs review their work annually using a common survey ([IV.A.30](#)). It has been suggested, that members of all SPCs and SPAC evaluate their own committee but also evaluate the other SPCs and SPAC with which they are supposed to interact. Committee practices are modified in response to complaints or concerns discovered through these surveys. Furthermore, campus wide biannual surveys include queries about the committee structure and participatory governance and the roles and practices of campus leadership. All of these data contribute to the modification of the charge, meeting schedule, and/or membership of the committees. Additionally, these annual committee and council reviews include: a review of the Strategic Planning and Budget Development Process; the distribution of evaluation results and recommended improvements; the integration of data into the planning process using internal and external data scans; and a review the college mission statement and college goals [IV.A.31](#), [IV.A.32](#).

The College also conducts biennial Employee and Student Satisfaction Surveys to assess the efficacy of the planning process and to evaluate the role of leadership in the decision-making processes [IV.A.6](#), [IV.A.33](#). The results of the surveys are posted on the college website, posted on committee SharePoint sites, reviewed during Strategic Planning Committee meetings, and discussed at college wide meetings during professional development week. The relevant results are presented at Academic Senate, Associated Students of Irvine Valley College, and Classified Senate meetings.

Analysis and Evaluation

The College and District have developed mechanisms to evaluate and update governance processes and procedures. Participatory governance committees and operational units undergo the self-evaluation process annually or when processes and procedures are questioned. Recommendations from the self-evaluation process are discussed and action is taken by the appropriate body.

To illustrate, constituent group members periodically identify the effectiveness of some committees and task forces but also report communication hurdles. A recurring concern is the communication gaps that occur when committee members don't report back to their constituent group in a timely manner, along with periodic difficulties with filling committee vacancies. Consequently, the governance structure is reviewed annually and modifications are made to committee charters, bylaws, and compositions. Through this review process, committees and task forces are disbanded or formed in efforts to improve institutional efficiency, communication, or resolve pressing issues.

The College meets the standard.

Standard IV.B: Chief Executive Officer

Standard IV.B.1 Chief Executive Officer

The institutional chief executive officer (CEO) has primary responsibility for the quality of the institution. The CEO provides effective leadership in planning, organizing, budgeting, selecting and developing personnel, and assessing institutional effectiveness.

Evidence of Meeting the Standard

Board Policy 2101 (Delegation of Authority to the College President) ([IV.B.1](#)) states that “the President is the Chief Executive Officer of the College [and] is responsible for implementing the College’s strategic plan and District policies,” additionally “the President’s administrative organization shall be the established authority on campus and the College President is the final authority at the college level.” The College president therefore makes final decisions, based as much as feasible, on the advice of the President’s Executive Council (PEC) representing the administration’s perspective, the Strategic Planning and Accreditation Council (SPAC) representing more broadly the perspective of the entire college community, and the Academic Senate.

As discussed elsewhere in this Accreditation report, such as in Standard IVA, IVC adopted a consensus-based decision-making philosophy in 2008 and has made in all iterations of the IVC Planning and Decision-Making Manual (IVC-PDM) ([IV.B.2](#)) then and since a strong statement that the College is committed to a “safe harbor” philosophy of open and honest discussion without fear of retaliatory repercussion. As members of the College have worked with the notion of “consensus,” the IVC-PDM definition and description have evolved into the mature vision that on the one hand adopts a traditional idea that while consensus can be reached without all parties favoring the proposition, if anyone objects, consensus is not reached and discussion, hopefully toward an acceptable compromise, continues. On the other hand, such a decision-making process cannot obstruct the organization such that either no decision is reached at all or an authority figure simply takes the matter away from group consideration. Therefore, when a stalemate seems to be occurring, the group discusses the situation and either comes to a common decision or sends a recommendation forward with both (or all) final arguments presented fairly, so the next level “up” in the organization can make a decision with the complete input from the “lower” group. To date, this last resort has seldom been necessary, but when it has been invoked, all parties involved have been satisfied that their voices have been heard and considered. Because, ultimately, the president makes all decisions, and all of the committees are recommending bodies only, this arrangement has been effective at IVC.

The president's leadership is evident in several initiatives and grants he has promoted or encouraged which have enhanced the programs and services offered by the institution. In collaboration with faculty, classified staff, and administration, the College president has worked diligently to provide effective leadership in planning, organizing, budgeting, selecting and developing personnel, and assessing institutional effectiveness. The evidence may be summarized and has been documented in this report as follows:

The development and implementation of the college mission statement and college goals, including the development of the Mission Statement and Goal Review Process. [IV.B.3](#)

The development and implementation of a transparent data-driven Strategic Planning and Budget Development Process wherein resource allocation is directly related to planning, the college mission statement, and college goals. [IV.B.4](#)

Continued resource allocation to the Office of Research, Planning, and Accreditation to support the acquisition of data that form the basis of the annual college strategic planning efforts and institutional effectiveness. [IV.B.5](#)

The integration of the College Strategic Planning and Budget Development Process with the District planning and goal-setting process. [IV.B.5](#)

The reorganization of the college committee structure resulting in the integration of strategic planning and decision-making. [IV.B.6](#)

The development, implementation, and updating of the IVC Planning and Decision-Making Manual which sets forth the roles and scope of authority of all constituent groups providing a means for widespread and effective participation by members of the college community. [IV.B.2](#)

Continued support for the collegial decision-making processes for hiring new and replacement faculty, administrators, and classified staff positions. [IV.B.7](#)

Continued development and updating of the Educational and Facilities Master Planning Process. [IV.B.8](#)

Oversight of the construction of the Performing Arts Center, the Business Science Education and Technology Center, the Life Science Building, the Liberal Arts Building. [IV.B.9](#)

Oversight of the plans for the Fine Arts Building and the maintenance and renovation of pre-existing facilities. [IV.B.9](#), [IV.B.10](#)

Effective and long-standing leadership in the development of the Advanced Technology and Education Park (ATEP). [IV.B.11](#)

Support for the acquisition and oversight of grants and projects including: SSSP, SEP, Perkins, BSI, AANAPISI, AACC Pathways, and the OC Pathway. [IV.B.12](#)

Analysis and Evaluation

The governance structure is such that councils, committees, and task forces make recommendations to the president for final approval. The president is therefore ultimately responsible for decisions involving planning, resources, student success endeavors, personnel decisions, community engagement, and institutional effectiveness. Through effective and continuous communication, the president demonstrates leadership and takes responsibility for the quality of the institution's programs and service to the community. The president communicates institutional values, goals, and directions in a variety of ways. He directs the vice president for Instruction to attend each Academic Senate meeting on his behalf. When invited by the Academic and Classified Senate, the president attends their meetings as a guest. He regularly meets with presidents of all the constituency groups, as well as the management team. These meetings allow for a free exchange of ideas regarding the values, goals, and priorities for the college. The president confers with PEC and the vice presidents but ultimately makes all decisions.

The College meets the standard.

Standard IV.B.2 Chief Executive Officer

The CEO plans, oversees, and evaluates an administrative structure organized and staffed to reflect the institution's purposes, size, and complexity. The CEO delegates authority to administrators and others consistent with their responsibilities, as appropriate.

Evidence of Meeting the Standard

The president is actively involved in the planning and oversight of the three primary units in the College – Administrative Services, Student Services, and Instruction. The president delegates the operations of these units to the corresponding vice president. Administrators and managers are delegated authority to act in line with the mission and strategic goals of the

College, but the president is ultimately responsible for evaluating the individual and collective accomplishments from this delegated authority.

The president ensures the organization operates with sufficient staffing to support outstanding student performance and institutional outcomes. Throughout his tenure the president has supported hiring additional instructional faculty, librarians, counselors, administrators, and support staff. In order to assure the integrity and quality of programs and services, the college president is committed to employing highly qualified personnel with the appropriate education, training and experience within all academic programs, student support services, and classified staff positions. The Board approved position descriptions clearly state the qualifications for administrators and classified managers. Minimum and desirable qualifications for all positions are evaluated by the administrative faculty, and classified staff to ensure that the qualifications, education, training, and experience are clearly related to the college mission and the college goals and accurately reflect the position duties, responsibilities, and authority.

Board Policies BP-2100.1 (Delegation of Authority to the Academic Senate [IV.B.13](#)), BP-4056 (Classified Employees Participation in Decision Making [IV.B.14](#)), and BP-5627 (Student Participation in Governance [IV.B.15](#)) outline how faculty, staff, and students may participate effectively. As such, the president is responsible for the integrity of the process and making sure constituent members are delegated the appropriate authority needed for effective participation. To illustrate, the president co-chairs SPAC—the highest level participatory governance college committee (a “Council”)—as well as his advisory PEC and the President’s Cabinet. Before the most recent committee reorganization, College Council served the role of the top of the committee pyramid, with the president as sole chair. When the institution reorganized, the president agreed that it would be a healthy revision for the College for the SPCs and SPAC to all have faculty and administration co-chairs; the president now sits on, but neither chairs nor dominates, the budget committee (BDRPC). Although naturally members look to him for leadership during discussions, he encourages free discussion so that all voices and opinions are heard before the body makes recommendations to SPAC; through SPAC, where more voices can be heard, the recommendations come to him. This process serves as a good example of his proper and effective delegation of responsibility to recommending bodies.

The revision of the SPCs and SPAC is an excellent indication that the president supports participatory governance and encourages the voices of all governance groups to be heard and considered. Comparing the initial SPCs and College Council memberships and charges to the committee structure and recommendation organization chart they replaced, the 2008 IVC-PDM ([IV.B.2](#)) constituted major shifts in participatory governance and decision-making policy and philosophy at IVC. These changes have promoted major improvements in faculty and staff outlook and confidence in the system. The recent revision (2013) in structure,

membership, and charge of the SPCs, and the reconfiguration of College Council into SPAC, while not a radical change in philosophy, reflected maturation of the system.

Analysis and Evaluation

The president delegates authority to constituent members and administrators in accordance with the individual's formal role, job description, and the committee or council charge/bylaw. For example, institutional effectiveness falls under the purview of the SPC called the Institutional Effectiveness Committee (IEC). The Director of Research, Planning, and Accreditation and the Academic Senate President co-chair this committee that reviews data to formulate reports and recommendations regarding institutional effectiveness. These are sent, ordinarily, to the Academic Senate and to SPAC, and, as appropriate, to other SPCs for their use in adjusting college activities to maintain or improve programs and the various parameters of student success. Thus a broad panoply of committees, departments, and individuals participate in not only monitoring the college's institutional effectiveness but in devising ways to improve as well. The large number and diversity of people, including students, staff, faculty, and administrators participating in one or more of the college's initiatives is evidence this approach is part of the IVC community constitution.

It is the president's responsibility to make sure authority is delegated appropriately and improves service to students and the community. When improvements can be made, the duties of administrators and managers are reorganized; for example, the Chief of Police and the director of Facilities reported directly to the president until the position of vice president of Administrative Service was established and took these reporting responsibilities. The president ensures that administrators are assigned responsibilities within their purview and that they are held accountable for their performance. For all departments that report to one or another vice president, the president delegates well. Each vice president has his/her own vice president's Council (VPC-PDM ([IVC.2](#))) to help coordinate the given vice president's area of responsibility and the president ordinarily follows recommendations of the vice presidents, taken together in the IEC. Similarly, the College's task forces report to SPCs which interact with each other as needed and send recommendations to SPAC. Recommendations from SPAC to the president are usually followed, and if not, or to the extent the president does not follow SPAC recommendations, he ordinarily explains his decision carefully and openly.

The president has identified challenges in the current administrative staffing levels. Other California Community Colleges of similar and smaller size have more extensive management and staff infrastructure to support the instructional needs of their students and faculty and the operational needs of the Colleges than IVC. Faculty, staff, and administration hiring is discussed from a financial perspective as part of budget development (BDRPC making recommendations to SPAC) and resource allocations as discussed above. The priorities are set by separate processes.

The College meets the standard.

Standard IV.B.3 Chief Executive Officer

Through established policies and procedures, the CEO guides institutional improvement of the teaching and learning environment by:

- *establishing a collegial process that sets values, goals, and priorities;*
- *ensuring the College sets institutional performance standards for student achievement;*
- *ensuring that evaluation and planning rely on high quality research and analysis of external and internal conditions;*
- *ensuring that educational planning is integrated with resource planning and allocation to support student achievement and learning;*
- *ensuring that the allocation of resources supports and improves learning and achievement; and*
- *establishing procedures to evaluate overall institutional planning and implementation efforts to achieve the mission of the institution.*

Evidence of Meeting the Standard

Working in conjunction with students, faculty, staff and administrators, the president has, through the participatory governance structure, established a variety of collegial processes that improved institutional effectiveness and the overall campus climate. Much of this improvement is outlined in the IVC Planning and Decision-Making Manual (PDM) ([IV.B.2](#)). Additionally, “mutual respect and collegial behavior” has been stated as a formal goal in the strategic plan. At IVC, institutional assessment and improvement is an ongoing process led and encouraged by the president but one that requires the participation and buy-in of the entire college community. The IVC-PDM ([IV.B.2](#)) describes the organizational structure that supports these processes and procedures, which are further described and documented by posted agendas, minutes, meeting handouts, and shared documents on Inside IVC (the SharePoint site) and allows all interested employees to access the information they need or just assuage their curiosity about ongoing college efforts.

Under the guidance of the college presidents and chancellor an extensive process to set the 2014-2020 IVC, Saddleback, and SOCCCD Strategic Plan was undertaken in 2013. All members of the college were invited to participate in numerous ways including all-college meetings, workshops, flex week activities, and invitations to submit suggestions in addition to the forums. First the institution gathered any ideas people thought were important for the College to undertake or improve or continue. Then, it organized these into clusters at workshop-style open meetings. A work group then organized emerging patterns into a relatively concise yet comprehensive set of goals and objectives. Saddleback College undertook their own tactics to develop their list. Subsequently, a District task force comprised of representatives from all three units (IVC, SC, and DS) managed to collegially bring all the ideas together into a proposed District wide Strategic Plan (DWSP) comprised of four goals and a total of thirteen objectives. These were discussed widely in all three units and ultimately were adopted by the District wide Planning Council (DWPC) ([IV.B.16](#)).

IVC then considered the extent to which the DWSP encompassed everything that IVC wanted in its college's strategic plan. One of the required parameters for the DWSP was that all three units could and should have a role in each goal and in each objective. Since IVC (as did SC) determined there were college-specific SP components that do not in any way conflict with the DWSP, IVC adopted as its IVC-SP a set of goals and objectives closely similar to the DWSP's but modified slightly and enriched to be IVC-specific. The inclusive process involved in generating and accepting these SPs and the number and diversity of employees who participated was remarkable for its extensive engagement and participation in the College and District.

The president ensures the College sets institutional performance standards for student achievement and institutional outcomes. To maintain compliance, the Office of Research Planning and Accreditation works through the participatory governance structure and the Institutional Effectiveness Committee (IEC) to define and adopt institution-set standards, targets, and performance goals ([IV.B.17](#)). IEC annually collects and examines data on various measures of student success, compares students' achievements to the college's stated goals, and re-evaluates these goals. Discussions in IEC include trying to define and summarize the underlying causes when success rates lower than those to which the College aspires are noted. These discussions lead to recommendations, often to other SPCs that have more operational charges in instruction, student services, and other components of the College.

The president has directed resources to promote a culture where planning incorporates quality analysis of internal and external conditions. To illustrate, the College has hired a Scheduling and Enrollment Management Analyst and additional research analysts for the Office of Research Planning and Accreditation to increase the use of quality analysis in the decision-making process. Under the leadership of the current director, the growth in the research department means much more institutional research is feasible, so it has become more common to base decisions on better data (internal and external, including environmental scans) that is analyzed more completely than in the past. The availability of these data and research staff to help with analysis has become a conventional part of evaluating plans and outcomes.

The president has promoted a resource allocation process that is tied to program evaluation and student performance outcomes. Resource requests must be mapped to strategic planning goals and outcomes assessment in TracDat ([IV.B.18](#)) before they can be forwarded for consideration. To illustrate, departments and academic programs submit resource requests that are prioritized with student outcomes at the forefront of the discussion. Next, the schools rank items on the list prior to the list being sent to the appropriate vice president's council for evaluation. The vice president's ranked list is then reviewed by SPAC which makes a recommendation to the president. As a consequence of this process, resource requests directly relate to the goals and objectives cited in the primary planning documents: EFMP, IVC-PDM, and the Strategic Plan. Further, student learning and administrative unit outcomes

and the resulting assessment data are integrated in the decision-making involved in resource planning activities.

The president ensures that resource allocation supports student and institutional learning and achievement through broad constituent participation and specific committee charge(s) for the resource allocation process (described above) and the budget development process. Budget development is initiated by the office of the VPAS, but discussion of the proposed budget is an open and often prolonged process in BDRPC, which is charged with the effective allocation of resources as it relates to improved institutional outcomes. The BDRPC membership composition ensures that budget planning at the college level is data-based and has significant input from administrators, faculty, and staff who are well-informed and who champion instructional and support components of the College's efforts to further student success. Enrollment planning, hiring of faculty, administrators, and staff, and resource allocations are all filtered through these SPCs and SPAC to allocate college resources wisely and efficaciously, keeping the college's mission as well as effectiveness, i.e. student achievement parameters, as the central underpinning of discussions and budgetary recommendations.

The president oversees all plans and ensures that the overall planning process is evaluated annually and that progress is being made toward attainment of the college mission. At the end of each cycle, a meta-evaluation of the planning process is completed by SPAC and recommended changes are incorporated into the next cycle.

The college mission statement and the college goals are received annually and drive the development and review of the planning objectives. The planning objectives are designed to implement the college goals through the development of planning assumptions based on data and information related to demographics, the economy and employment, educational trends, social trends, public policy, student learning and achievement, student outreach, technology, and facilities support. Data provided by the Institutional Effectiveness Annual Report also inform the planning assumptions ([IV.B.19](#)). Thus, planning, decision-making, and resource allocation are predicated on annual analysis of quantitative and qualitative data to ensure institutional effectiveness. For example, within the category of student learning and achievement, aggregated assessment data for the College is provided in overall annual successful course completion rates, successful completion rates in English and math basic skills courses; successful course completion rates in weekend, eight-week, and distance education courses; progression rates from basic skills to college-level courses in English and math; matriculation and persistence rates for first-time college students; the number of degrees and certificates awarded; percent growth in full-time equivalent students compared to percent growth in permanent employees; and transfer rates. Student learning outcomes assessment data is provided for the course level, program level, and degrees or certificates. Progress reports are prepared and distributed annually. The faculty, representing the academic disciplines, produce aggregated reports which are reviewed with discipline experts during the annual program review updates.

In addition to the *Institutional Effectiveness Annual Report*, which provides aggregated assessment data for the College, the Office of Research, Planning, and Accreditation provides key performance indicators for each program undergoing a comprehensive program review pursuant to the six-year review cycle previously discussed [IV.B.20](#). The assessment data included for each program includes disaggregated data down to the course level in each program over a five-year period for planning purposes, such as enrollment data, number of sections, productivity rates, fill rates, student retention rates, student grades, student success rates, student demographic information, education goals, and awards data.

Analysis and Evaluation

With the direction of the college president, the College utilizes a variety of assessment data in institutional as well as program-level planning to ensure institutional quality. Through formal and informal dialog about institutional goals, values, and priorities, the governance structure, and a data-driven resource allocation process, the president guides a collaborative process for institutional improvement. The president supports the integration of institution-set standards and targets into the strategic planning process and ensures that institutional performance standards are included in the resource allocation process and the annual planning process maps learning outcomes to department goals, college goals, and resource requests. Through program and unit review, educational planning is integrated with resource allocations to support student learning and achievement. Additionally, the president has continuously approved the necessary resources to implement student learning outcomes, and the faculty leadership has received administrative support in providing the necessary resources for the implementation of student learning outcomes and assessment plans.

Based on the foregoing, the president, in collaboration with the college community, guides a collegial annual evaluation of the overall institutional planning and improvement process. Each committee and council is charged with annual reviews of the role of leadership and governance, and decision-making processes to ensure integrity and effectiveness.

The College meets the standard.

Standard IV.B Chief Executive Officer

The CEO has the primary leadership role for accreditation, ensuring that the institution meets or exceeds Eligibility Requirements, Accreditation Standards, and Commission policies at all times. Faculty, staff, and administrative leaders of the institution also have responsibility for assuring compliance with accreditation requirements.

Evidence of Meeting the Standard

The president ensures that faculty, staff, and administrators actively participate in the accreditation process, and he embraces the primary leadership role in ensuring the College exceeds the minimum Standards set by the ACCJC. Through appropriate delegation of responsibilities and accreditation standard appointments, the president ensures that representatives from each constituent group are well-informed and able to provide meaningful input in the development and analysis for the self-study. For the purposes of the self-study, SPAC, AOWG, and the Academic Senate made recommendations for accreditation standard membership, but Standard assignments can be fluid and individuals have participated in discussions for additional standards based on their interest and expertise. The faculty, staff, and administration of the College have been encouraged to share responsibility for assuring compliance with accreditation requirements.

IVC's President Roquemore has participated in ten site visits for the ACCJC over the past twenty-one years and has been the team lead for several of them. He has also chaired a Partnership Resource Team (PRT). As IVC President since 2002, and as a full-time faculty member prior to that since 1990, he has participated in various ways in the IVC Accreditation process for a quarter of a century. As such, he is very well versed in the Accreditation Standards and their evolution, interpretation, and both the flexibility and inflexibility of the Accreditation process as experienced at colleges and districts in California.

The president has delegated the Accreditation responsibility to the VPI and has supported and approved the current committee structure in which the Strategic Planning and Accreditation Council (SPAC) charge also includes the work of what had been, hitherto, a separate accreditation oversight committee convened specifically for this purpose. The benefits to the College of this new arrangement are several. First and foremost, operationally it reduces the separate committee load for the college leadership who must, perforce, be the core of both the leading college council and the accreditation oversight group. Secondly, and more important philosophically, the leading college council knows, from its name, charge, and default agenda that it must always be mindful of the consequences of all of its actions and recommendations, and indeed the way in which it handles business, for Accreditation. In essence, SPAC is continually involved in institutional self-evaluation, as it should be, regardless of the accreditation report and visit schedule.

All of the college committees, regardless of designation as work group, task force, committee, or council, ultimately feed into the strategic planning committees (SPCs) and SPAC, with the exception of the mostly curricular concerns reposed in the Academic Senate. Some committee work does not require the consideration and imprimatur of SPAC, yet the efforts are reported nonetheless. Through all of the committees, then, all members of the College participate, at no more than one remove through the representation of the governance groups, in the health of the College, and thus the attainment of the Accreditation Standards.

Analysis and Evaluation

The president assumes the primary leadership and communication role in the accreditation process. Practically, the accreditation process is organized and maintained by a smaller group, a standing work group of SPAC, the Accreditation Oversight Work Group (AOWG) which has a standing report at SPAC meetings. AOWG maintains the accreditation work group membership lists, the accreditation Inside IVC and outward-facing websites, and generally monitors the progress of composing accreditation reports including this self-evaluation. It is the major editor of the self-study document. However, all iterations are posted on Inside IVC, major revisions are announced to the college community, and all members of the faculty, staff, and administration are invited to participate in as many ways as they are willing.

Recommendations from participatory governance groups including AOWG and SPAC are sent to the president for final approval, and individuals from across the College are encouraged to participate and provide input based on their formally assigned role, area of expertise, and interest. As such, the faculty, staff, and administrative leaders have been charged with assuring compliance and have been empowered to work through the participatory governance structure to guide the process of writing the standard reports and preparing for a comprehensive evaluation and site visit.

The College meets the standard.

Standard IV.B.5 Chief Executive Officer

The CEO assures the implementation of statutes, regulations, and governing board policies and assures that institutional practices are consistent with institutional mission and policies, including effective control of budget and expenditures.

Evidence of Meeting the Standard

To fulfill his responsibilities the president stays current with statutes, regulations, and governing board policies through active involvement with professional associations, conferences, and College and District governance meetings. Adding to the president's effectiveness are his relationships with colleagues throughout the State and within the national network of college presidents, relationships that help to make him aware of current and emerging trends and their impact upon IVC. However, it is through collaboration with each constituent group and delegation of responsibilities to administrators that the President assures the implementation of statutes, regulations, and governing board policies and, therefore, assures institutional practices are consistent with institutional mission and policies. For example, the vice president of instruction is responsible for ACCJC compliance while the vice president of student services is responsible for Federal Title IX compliance.

Board Policy 2101 delegates to the college president the responsibility of managing the College, including the college budget. The college president makes final decisions for the College based as much as is feasible on the advice of the President's Executive Council (PEC) representing the administration perspective and the Strategic Planning and Accreditation Council (SPAC) representing more broadly the perspective of the entire college community. Funding for the College comes from many sources; some are specific to IVC, such as certain grants. Most funds are allocated by the District as IVC's share of District funding. These allocations are managed in large measure by the District Resource Allocation Council (DRAC) (described in depth in the response to Standard III). Other District allocations emanate via the Basic Aid Allocation recommendation committee (BAARC) as described in BP & AR 3110 ([IV.B.21](#), [IV.B.22](#)).

Once the college income is ascertained, college processes are used to develop and update, as necessary, the college budget; these processes are described in detail in the response to Standard III. The budget committee, BDRPC, is a representative committee with members from all governance groups including students. It is co-chaired by the Academic Senate vice president and the College VPAS. During the last few years, the amount of information brought to BDRPC has grown from a rudimentary description of the budget to a fairly complete description of income sources, and broadly, spending patterns. Thus, BDRPC now has enough information to make educated, data-based recommendations after extensive discussion when anything potentially controversial arises. For example, when the finance office projects a deficit or an upcoming deficit, the discussion of how to address the budgetary problems is addressed first in BDRPC, then, if severe, opened to the college community for suggestions. This was the process used, for example, in 2012-13 when the president, through College Council, established in December 2012 the Budget Solutions Recommendation (BSR) Work Group. [IV.B.23](#)

After the main budget is recommended to, and approved by, the president, as yet unallocated funds may be requested for special projects through the resource request process, also described in depth in the response to Standard III. In recent years, (2012-present), IVC has modified the process by having IVC-IT develop a web-based site for resource requests and their analysis by relevant committees, SPCs, and SPAC that make the final college recommendations to the president as well as by progressively including more funding sources and types of allocations in this open and public assessment process. As so many faculty, staff, and administrators are involved in the process, and any employee has access to all of the information including SPC and SPAC ratings and minutes of discussions, resources are allocated in accordance with the college mission and the funded projects are acknowledged by the campus community to be high-priority ones.

While the president makes all final decisions, he does serve on BDRPC and co-chairs SPAC. Thus, he is party to and part of all of the discussions about process and the final SPAC recommendation conversations. It is expected that, should he disagree with anyone in these meetings that he, as any member, will speak up as part of IVC's "safe harbor" consensus-driven decision-making process. In most cases this participation by the president does, in fact, occur. Hence, committee members report confidence in the system. [IV.B.24](#).

Analysis and Evaluation

The President is well-versed and conversant in statutes, board policies, and regulations. He embraces overall responsibility for compliance issues, but delegates to others based on their area of competence and assigned roles. The president has established an effective organization and governance structure to comply with regulations, Board policies, and Accreditation mandates. The infrastructure and established participatory governance processes promote broad discussion and compliance through shared responsibilities and a collaborative approach.

The College and District have a long history of being fiscally stable and using conservative approaches to maintain positive ending balances. The president promotes this conservative fiscal approach and maintains effective control of budgets and expenditures. Information about the budget is shared widely and budget updates are a regular agenda item for participatory governance committee meetings; despite occasional differences of opinions, fiscal control and the conservative approach usually prevail with items that impact students taking the highest priority. In practice, the president effectively controls budget and expenditures through numerous mechanisms. First, as a member of BDRPC the president is actively involved with strategic planning, budget development, and the allocation of college resources. Second, the president meets twice monthly with the President's Executive Council (PEC), so he receives regular updates on the college budget and expenditures, and reviews recommendations from the PECs. Third, an audit is conducted annually in the fall, designed to provide reasonable assurance that the financial statements are free of material misstatement. The fiscal audit reports ([IV.B.25](#)) are presented to the Board of Trustees annually in November. Based on the foregoing, the president manages the College's financial affairs with integrity and in a manner that ensures financial stability.

The College meets the standard.

Standard IV.B.6 Chief Executive Officer

The CEO works and communicates effectively with the communities served by the institution.

Evidence of Meeting the Standard

The president works and communicates effectively with the communities served by the institution in a variety of ways through student outreach, marketing, the College Foundation, and external relationships developed through academic programs. Naturally, the president is not expected to be the College's only, or even its main, means of communication, but it is within his role to be aware of these elements, support them, provide introductions and links when appropriate, delegate responsibilities, and ensure integration of these efforts into an integrated and effective component of the College's efforts to fulfill its mission.

The president hosts an annual breakfast for the principals and vice principals and counselors of the College's feeder high schools. In previous years, this event has been an opportunity for IVC to convey information about the demographics of the region, workforce development data, IVC's great diversity of programs and the success of its students in transfer and CTE programs, and the success of IVC transfer students. Moreover, each principal is presented with his or her school-specific data. Much of the purpose is, clearly, to motivate the principals to encourage their students to consider IVC not only as a back-up plan but as a viable alternative route for success in a bachelor's degree educational plan and to help the high school teachers focus some effort on critical components for college success in their high school coursework. For many years, Student Services, and in particular the School of Guidance and Counseling, has invited the counselors from IVC's feeder schools to a program lasting most of a day to discuss similar topics. In 2011, these hitherto separate programs were successfully combined, gathering the principals, vice principals, and counselors together for a joint presentation followed by separate, focused sessions. The president's role is not limited to host but more importantly extends to articulating his and IVC's vision of its role in educating high school students and graduates, a crucial element of building successful relationships with IVC's feeder high schools.

Under the leadership of the new executive director of the IVC Foundation, and with the support and input of the president, the Foundation Board of Governors (BOG) has expanded tremendously, now including more than 25 members, including administrators, members of the classroom staff and faculty, emeritus faculty, and community members. Long-standing members have returned to the BOG, and new members have been encouraged to join. The enthusiasm of the BOG members is evident in the success of recent events and the level of attendance and participation at approximately bimonthly meetings and the annual retreat. The Foundation is an arm of the president's outreach activities, and the willingness of community members to join and participate stands as evidence of his ability to communicate with them convincingly about the value IVC brings to the community.

Another crucial element of the president's communication with the community is his involvement with a variety of business and civic organization that have allowed him to increase networking endeavors with local businesses which in turn support the Foundation and are potential employers and providers of internships for IVC students, and participants

on advisory councils for IVC CTE programs. The president has been a member of a number of community organizations including:

- Irvine Chamber of Commerce
- Irvine Sister Cities Foundation
- Tustin Chamber of Commerce
- U.S. Army Community Advisory Board
- Founding member, U.S. Army Community Advisory Board
- Orange County Business Council, Board Member
- OCBC Community College Working Group, Chair
- Irvine Exchange Club

The President has also been involved in state-wide organizations including:

- Southern California Community College Chief Executive Officers Association, President
- Community College League of California: Advisory Committee on Education Services
- Association of California Community College Administrators: Commission on Finance and Legislative Advocacy
- AACC Commission on Workforce Development (nominee for the Executive Board)
- AACC Presidents Academic Executive Council

Based on the memberships and community involvement documented above, the president has strengthened relationships within the community served by the College.

Analysis and Evaluation

Given that “our community” extends beyond the service area, and President Roquemore has been active in regional, state- and national- level activities, a strength of the college president is the expanded communication from the Office of the President. He has elevated the role of public information, marketing, and the College Foundation. The president also works to communicate with the external college community through various means. The president writes and disseminates newsletters campus wide, and generally holds two information sessions each semester (one mid-day, one early evening), in an effort to keep everyone informed. In addition, he hosts the President’s Breakfast each semester during Faculty Professional Development Week, followed by a morning of college updates and, usually, a special topic program.

The benefits to the College of the president’s efforts in the community range from connections that benefit its growing Foundation and fund-raising efforts, internship possibilities for students and potentially externships for faculty members, and improved relations with neighboring universities which increase transfer pathways for IVC graduates.

Three intertwined components of the communication with the communities IVC serves include: drawing in more students and improving their likelihood of success; establishing and strengthening the College's ability to place students after, and during, their experience at IVC as they move into the workforce and/or further education; and strengthening IVC's role, and IVC's perceived role, in the local community. The College and its president expect these components should be synergistic; for example, from work with feeder schools to improve the preparation of incoming students, not only does IVC expect its success and completion rates to be improved, it also anticipates these students will be more likely to aspire to education and careers of higher potential, thus better supporting the economy ["workforce development"] and being more successful should they transfer for continued education.

Standard IV.C: Governing Board

Standard IV.C.1 Governing Board

The institution has a governing board that has authority over and responsibility for policies to assure the academic quality, integrity, and effectiveness of the student learning programs and services and the financial stability of the institution.

Evidence of Meeting the Standard

The South Orange County Community College District's (SOCCC) Governing Board (Board) consists of seven members elected by voters in south Orange County. Responsibilities of the Board are defined by California Education Code §70902, Title 5 California Code of Regulations, and by Board Policy 12 (Duties and Responsibilities of the Board [IV.C.1](#)). The California Education Code §70902 (b) (1-14) further specifies the responsibilities of the Board, which include ensuring the educational quality and the financial integrity of the District. The Board has the ultimate responsibility for:

- Establishing policies for academic and facilities plans
- Establishing policies for approving curriculum and educational programs
- Establishing academic standards; probation, dismissal and readmission policies; and graduation requirements
- Employing and assigning all personnel, and establishing employment practices, salaries, and benefits for all employees
- The determination and control of the District's operational and capital outlay budgets
- The management and control of district property
- Establishing procedures to ensure faculty, staff, and students have the opportunity to express their opinions, and ensure that these opinions are given every reasonable consideration to ensure the right to participate effectively in district and college governance and to ensure the right of the Academic Senates to assume primary responsibility for making recommendations in the areas of curriculum and academic standards
- Establishing rules and regulations governing student conduct
- Establishing student fees
- Receiving and administering gifts, grants, and scholarships

The Board exercises its authority and responsibility for policies designed to ensure academic quality, integrity, and institutional effectiveness through established policies consistent with the District wide mission statement, the District wide vision statement, and the District wide goals ([IV.C.2](#)). To illustrate, the following Policies have been adopted to ensure academic quality, integrity, and student learning and safety:

- BP-5300 (Grading Policy [IV.C.3](#))

- BP-5300.5 (Grade Changes [IV.C.4](#))
- BP-5301 (Course Repetition [IV.C.5](#))
- BP-5320 (Academic Renewal [IV.C.6](#))
- BP-5401 (Rules And Regulations for Student Conduct [IV.C.7](#))
- BP-5404 (Sexual Assaults [IV.C.8](#))
- AR-5505 (Grade Grievance Policy [IV.C.9](#))
- BP-5600 (Associate Degree Requirements [IV.C.10](#))

The Board has adopted several board policies and administrative regulations to ensure the financial integrity of the District including board policies BP-3100 (Budget Preparation [IV.C.11](#)), BP-3101 (Budget Management [IV.C.12](#)), BP-3101.5 (Fiscal Management [IV.C.13](#)), and BP-3102 (Investment Policy [IV.C.14](#)). According to Board Policy 3100: Each year the Chancellor shall direct the staff in the methods of budget development and present to the Board a budget, prepared in accordance with Title 5 and the *California Community Colleges Budget and Accounting Manual*. The schedule for presentation and review of budget proposals shall comply with state laws and regulations, and provide adequate time for board study. Budget development shall meet the following criteria:

- The annual budget shall support the District's educational master plans
- Assumptions upon which the budget is based are presented to the Board for review
- Changes in the assumptions upon which the budget was based shall be reported to the Board in a timely manner
- A schedule is provided to the Board by the annual December board organization meeting that includes dates for presentation of the tentative budget and required public hearings that interested persons may attend and address the Board regarding the proposed budget or any item in the proposed budget
- Unrestricted general reserves shall be no less than 7.5 percent
- Budget projections address long term goals and commitments

The Board of Trustees is the ultimate arbiter regarding legal matters which are deliberated in closed session pursuant to Government Code 54950 et seq. (California Open Meeting Act) and, if appropriate and required by statute, in open session. The Board routinely seeks advice from legal counsel to ensure the integrity of its decisions.

Analysis and Evaluation

The SOCCCD Board establishes policies and regulations to ensure academic quality and integrity, fiscal integrity and stability, student learning, safety, equity, and accountability and accreditation. The Board of Trustees has authority over, and responsibility for, all aspects of the institution as established in policy and documented in practice. The policies and administrative regulations related to budget and investments affirm the Board's expectations for fiscal planning, reserves, contingencies, expenditure changes, accountability, regular reporting, investments, and the overall safeguarding of assets to ensure adequate resources.

While the Board has ultimate responsibility and its actions are final, the Board recognizes that those closest to the problem or issue are often those with the best information. Consequently, the Board encourages input and generally bases its decisions on policy. Primarily, the Board relies upon recommendations from the Chancellor, who, in turn, receives and considers input from the Chancellor's Executive Team (CET), which consists of the college presidents, vice chancellors, and the District director of Public Affairs. The Board prefers written reports but will provide time (approximately two minutes) for the information and updates of constituent groups such as the Academic and Classified Services, the Faculty Association, Associated Students, California School Employee Association (CSEA), and Police Officer Association (POA) at all monthly Trustee meetings.

The College meets the standard.

Standard IV.C.2 Governing Board

The governing board acts as a collective entity. Once the board reaches a decision, all board members act in support of the decision.

Evidence of Meeting the Standard

Board members adhere to the guidelines in BP-112 (Duties and Responsibilities of the Board of Trustees [IV.C.1](#)), BP-110 (Code of Ethics – Standards of Practice [IV.C.15](#)), and BP-180 (Respectful Interactions and Collaboration [IV.C.16](#)). BP-180 describes the expectations for fostering a district wide culture of mutually respectful interactions, cooperation, and a climate of civility for all employees.

The Board is composed of members from diverse backgrounds with differing perspectives. During meetings, the Trustees engage in energetic discussion of agenda items and share their individual viewpoints. However, once a decision is reached, they move forward in a unified fashion. The Board members are respectful and inclusive of all input and viewpoints when discussing topics in board meetings and prior to any voting. The Board meetings are taped and posted on the district website ([IV.C.17](#)).

Analysis and Evaluation

The Board adheres to the policies and procedures that provide the framework for the members' collective action and individual behavior. Board members are able to engage in debate and present multiple perspectives during open discussion but still come to collective decisions and support those decisions once reached. Minutes and videotape of board meetings from recent years substantiate this behavior.

The College meets the standard.

Standard IV.C.3 Governing Board

The governing board adheres to a clearly defined policy for selecting and evaluating the CEO of the college and/or the district/system.

Evidence of Meeting the Standard

The Board follows California Education Code and Board policies in the selection and evaluation of the chancellor and the college presidents. Board policies, BP-146 (Chancellor Succession [IV.C.18](#)), BP-148 (Evaluation of the Chancellor [IV.C.19](#)) and BP-4011.6 (Employment Procedures for Chancellor [IV.C.20](#)), govern the hiring and evaluation of the chancellor who serves as the Chief Executive Officer for the District. The chancellor is responsible for recommending the selection of the college presidents in accordance with BP-4011 (Employment Procedures for Administrators and Classified Managers [IV.C.21](#)). The chancellor is also responsible for the supervision and evaluation of the college presidents.

Oversight for hiring a new chancellor is delegated to the current chancellor or a Board designee. The Board is consulted if there is concern for the integrity of the process, but the final determination is made by the chancellor or the Board designee whether the process should be suspended pending resolution of a matter of interpretation or substantial violation of the hiring process. Direct involvement by the Board is reserved for second-level interviews. In order to select a successful candidate, the Board is provided with an unranked list of finalists by the search committee chair. The policy provides the Board with the option to invite the chancellor or the Board designee to participate in the interview. An additional provision allows for the Board to interview additional candidates from the first-level interview pool in the order of the next highest search committee rankings. Each participatory governance group has at least one representative on the first-level interview committee, so the interests of a wide cross section of the District is represented in the search for the District's CEO.

Normally, the chancellor will provide oversight of the hiring process for District academic administrators, managers and the college presidents. Similarly, the college president normally will provide oversight of the hiring process for respective college administrators and managers. However in any hiring process, the chancellor or college president may appoint an alternate designee, as appropriate, to ensure avoidance of any conflict of interest. The chancellor or college president, with the assistance of the Office of Human Resources, oversees the implementation of the hiring process and the activities of the hiring committee as it exercises its duties, specifically to ensure that actions of hiring committees are consistent with both the written stipulations and the intentions of the established policy.

In August 2007 the Board adopted Board Policy 148 (Evaluation of the Chancellor [IV.C.19](#)) which stipulates that:

- The Board shall conduct an evaluation of the chancellor at least annually. Such evaluation shall comply with any requirements set forth in the contract of employment with the chancellor as well as this policy.
- The Board shall evaluate the chancellor using an evaluation process developed and jointly agreed upon by the Board and the chancellor.
- The criteria for evaluation shall be based on board policy, the chancellor job description, and performance goals and objectives developed in accordance with Board Policy 2100 (Delegation of Authority to the Chancellor [IV.C.22](#)).

The Board has a clearly defined policy for selecting the presidents of the colleges. The hiring procedures are delineated in Board Policy 4011 (Employment Procedures for Administrators and Classified Managers [IV.C.21](#)). Board Policy 4011 mirrors the hiring procedures for the chancellor outlined above and clearly specifies rigorous hiring procedures to ensure the college president is sufficiently qualified to guarantee the integrity of programs and services. Presently, there is no board policy outlining the evaluation criteria for the college president. The chancellor sets the goals for the college president and evaluates them based on their assigned goals.

Analysis and Evaluation

The Board is responsible for hiring and evaluating the chancellor. In turn, the chancellor is responsible for selecting and evaluating his/her direct reports including the college presidents. On July 1, 2016, Chancellor Gary Portner announced his retirement after serving as chancellor since December 2010. For continuity, the Board appointed Vice Chancellor Debra Fitzsimons as the Acting Chancellor of the District. Following a brief search, Dr. Fitzsimons was appointed Interim Chancellor at the August 22, 2016 Board meeting ([IV.C.23](#)).

The District is currently engaged in the process for hiring a new chancellor. In accordance with the aforementioned policies, Interim Chancellor Fitzsimons has been assigned oversight of the recruitment process. At various venues during the fall 2016 professional development week, Interim Chancellor Fitzsimons reached out to the shared governance groups and asked that the District as a whole begin thinking about the characteristics that are important in a chancellor so that individuals will be prepared to provide input in open forums and through their participating governance leaders. Dr. Fitzsimons also explained that:

- The Board will hire an executive search firm for assistance with the selection process.
- The executive search firm will convene focus group/town hall meetings at both colleges. During these meetings, employee and student input will help develop a chancellor's profile.
- The executive search firm will use the desired qualities and characteristics for a new chancellor to develop a job description and timeline for selecting and hiring of the new chancellor.

The College meets the standard.

Standard IV.C.4 Governing Board

The governing board is an independent, policy-making body that reflects the public interest in the institution's educational quality. It advocates for and defends the institution and protects it from undue influence or political pressure.

Evidence of Meeting the Standard

The Board of Trustees is comprised of seven members elected to one to four year terms by the voters in south Orange County. Each governing Board member qualifies for candidacy by having legal residence within one of seven different trust areas ([IV.C.24](#)). Terms are staggered with elections being held every two years in connection with the general election. In accordance with California Education Code §72021.5 and Board Policy 104 (Student Membership of the Board of Trustees) ([IV.C.25](#)), the Board also has a student trustee elected by students for a one-year term. The student trustee has an advisory vote on actions other than personnel-related matters and collective bargaining items.

Board policy dictates that the Board act as an independent policy-making body that represents the public interest. Each trustee files an annual Conflict of Interest form (California Form 700, Statement of Economic Interests). A Conflict of Interest Policy (BP-154 [IV.C.26](#)) was adopted by the Board on August 27, 2007, and a corresponding conflict-of-interest administrative regulation (BP 154) has been implemented ([IV.C.27](#)). Additionally, Board Policy, BP-110 (Code of Ethics – Standards of Practice) asserts that each member of the Board will:

- Avoid any situation that may constitute a conflict of interest and disqualify him/her from participating in decisions in which he or she has a financial interest. Conflicts of interest may relate not only to the individual trustee but also to his or her family and business associations, or transactions between the District and trustees, including hiring relatives, friends, and business associates as college employees.
As an agent of the public entrusted with public funds protect, advance and promote the interest of all citizens maintaining independent judgment unbiased by private interests or special interest groups.
- In all decisions, hold the educational welfare and equality of opportunity of the students of the District as his or her primary concern.
- Conduct all District business in open public meetings unless in the judgment of the Board, and only for those purposes permitted by law, it is appropriate to hold a closed session.

BP-110 also maintains that a “Board member may be subject to a resolution of censure by the Board of Trustees should it be determined the Trustee misconduct has occurred.”

The Board’s role in protecting and promoting the interests of the District is also observed when the Board engages in advocacy efforts on behalf of the SOCCCD in particular, and community colleges in general, through its legislative advocates in Sacramento and in Washington, D.C. The Board sets its policy and legislative priorities in consultation with the chancellor, a state legislative consultant, and a federal lobbyist firm as illustrated in the September 2015 Legislative and Advocacy Efforts, Board presentation ([IV.C.28](#)).

Analysis and Evaluation

Board members work collaboratively to advocate for the interests of the District through interactions with the community, legislators, business organizations, and other public entities. The Board maintains its independence as a policy-making body by: (1) using well-informed and reviewing all materials in advance of meetings; (2) asking questions and requesting additional information or Board Reports as needed; (3) facilitating public input through open session comments at Board meetings; and (4) maintaining a comprehensive website that provides information to the public to support transparency in decision making ([IV.C.17](#)).

The College meets the standard.

Standard IV.C.5 Governing Board

The governing board establishes policies consistent with the college/district/system mission to ensure the quality, integrity, and improvement of student learning programs and services and the resources necessary to support them. The governing board has ultimate responsibility for educational quality, legal matters, and financial integrity and stability.

Evidence of Meeting the Standard

The Board establishes and updates policies consistent with the District’s mission and monitors their implementation to ensure the quality, integrity, and improvement of student learning programs and services. The District wide mission and goals are reviewed annually by the College and District Services. The overarching themes of the current mission and goals are: student success and access, community engagement, respectful interactions and collaboration, the economic vitality of the region, and fiscal responsibility ([IV.C.2](#)). The first four pages of the District’s adopted budget provides an overview of budget and planning efforts, major capital projects, technology initiatives, budget resources, priorities and the Board’s governing values regarding resource allocation ([IV.C.29](#)).

To assure fiscal integrity and the allocation of resources to support student learning programs, the Board has adopted guidelines for annual collaborative planning and periodic progress reports and updates. Board Policy, BP-2120 (Institutional Planning [IV.C.30](#)) sets forth that the “Chancellor chairs a district wide planning council which provide opportunities for administrators, faculty, and staff to participate in revising, establishing, and implementing the district wide strategic plan to be submitted to the Board of Trustees for review, discussion, and revisions as needed, [and] the colleges and district services will use campus meetings, shared governance procedures, and contact with advisory council members and other college and district liaisons to obtain broad-based input on the District-Wide Strategic Plan.” The most recent Board presentation on strategic planning occurred in December 2015 ([IV.C.31](#)).

The Board ensures educational quality through Board policies governing students and instruction ([IV.C.32](#)). The Board’s commitment to providing resources for enhancing student performance outcomes is illustrated through the District’s investment in and support for the development of highly innovative technology tools ([IV.C.33](#)) that support educational quality and student success. Investments in technology tools like MAP (My Academic Plan), SHERPA, and the Student Success Dashboard have had positive impacts on the District’s student success agenda.

Long-term fiscal stability is key to assuring sufficient resources for student success endeavors and general operations. The Board has adopted policies to convey the expectations for fiscal planning, reserve contingencies, accountability, regular reporting, investments, and the overall safeguarding of assets to ensure ongoing effective operations. Those specific policies are BP-3100 (Budget Preparation [IV.C.11](#)), BP-3101 (Budget Management [IV.C.12](#)), BP-3101.5 (Fiscal Management [IV.C.13](#)), and BP-3102 (Investment Policy [IV.C.14](#)). The District Resource Allocation Committee (DRAC), the Basic Aid Allocation Recommendation Committee (BAARC), and BP-3110 (Basic Aid Funds Allocation Process) govern the responsible allocation of all operating and capital outlay expenses to ensure educational quality and financial stability. Both committees are participatory governance committees representing all constituencies. The Board receives regular updates through reports and budget presentations ([IV.C.35](#)) including Basic Aid presentations ([IV.C.36](#)).

The Board maintains authority over all legal matters associated with the operation of the District, closely monitoring legal issues that arise, reviewing them in closed session, and approving decisions during open session, as required by legislative statutes.

Analysis and Evaluation

As documented above, the standing policies and practice of the Board of Trustees demonstrates the Board assumes responsibility for policies and decisions affecting

educational quality, legal matters, and financial integrity and stability. The District's mission is reviewed annually with input from constituencies district wide to ensure it continues to support the quality, integrity, and improvement of student learning programs. The Board adheres to strict budget planning guidelines and fiscally conservative values and ensures that the colleges have the necessary resources to deliver quality student learning programs and services.

The College meets the standard.

Standard IV.C.6 Governing Board

The institution or the governing board publishes the board bylaws and policies specifying the board's size, duties, responsibilities, structure, and operating procedures.

Evidence of Meeting the Standard

The District publishes all Board policies, bylaws, administrative procedures ([IV.C.37](#)), and specifications related to the Board's size and areas ([IV.C.24](#)) on the District's website. Board members adhere to the guidelines in BP-112 (Duties and Responsibilities of the Board of Trustees) and other Board responsibilities outlined in the 100 Board Policy Series ([IV.C.38](#)).

Analysis and Evaluation

The published Board policies in the 100 Board Policy Series all pertain to the Board of Trustees and are comprehensive in specifying the Board's size, responsibilities, structure, and operating procedures. The vast majority of policies refer to the corresponding Education Code, Government Code, Title 5, Penal Code, or WASC/ACCJC Standards. The Board publishes bylaws and policies that are made publicly available, both electronically and on paper. These policies are regularly reviewed and updated when necessary.

The College meets the standard.

Standard IV.C.7 Governing Board

The governing board acts in a manner consistent with its policies and bylaws. The board regularly assesses its policies and bylaws for their effectiveness in fulfilling the college/district/system mission and revises them as necessary.

Evidence of Meeting the Standard

The Board of Trustees is aware of, and operates in a manner consistent with, its policies and bylaws outlined the 100 Board Policy Series ([IV.C.38](#)) of the established Board Policies. The Board acts professionally and works collegially to resolve issues as documented in videotaped meetings and meeting minutes ([IV.C.17](#)).

The Board is actively engaged in regularly assessing and revising its policies and bylaws for their effectiveness in fulfilling the colleges' and District's mission and commitment to educational quality, institutional effectiveness, and student success. Board Policy, BP-007 (Board Policy and Administrative Regulation [IV.C.39](#)) notes that the "Board of Trustees will periodically review board policies [and] the Chancellor shall assist the Board of Trustees in the formation and revision of all board policies. In addition, recommendations for new or revised board policies may originate at any time from members of the Board of Trustees, the Chancellor, members of the district or college administration, faculty, staff, students, or members of the public."

The Board Policy and Administrative Regulation Advisory Council (BPARC) is a district wide participatory governance committee tasked with systematically reviewing and updating board policies. Revisions to board policies, once approved by committee, are presented to Chancellor's Council for review and input. The policies are then presented as a monthly agenda item for Board review and discussion. The following month, they are presented for board approval; once approved, the revised policies are posted to the District's website. Agendas, minutes and documents for BPARC and Chancellor's Council meetings are posted on the District's SharePoint intranet site home page under District wide Committees ([IV.C.40](#)). To illustrate, the following policies and administrative regulations were under review at the March 2016 BPARC meeting:

- BP-730 Employee Leaves – *FA Update from March 4, 2016*
- AR-750 Employee Leaves- *March 4, 2016*
- AP-5302 Campus Safety- *Aug 23, 2013*
- AR-4205 Recruitment of Part-time Faculty – *March 4, 2016*
- BP-4011 Recruitment – Administrators and Managers
- AR-4011 Recruitment – Administrators and Managers
- BP-472 Abusive Conduct in the Workplace- *Feb 5, 2016*
- BP-5626 Independent Study – *Sept 11, 2015*
- AR-5626 Independent Study – *Revised IVC 10-15, 2015*

Analysis and Evaluation

The Trustees act in accordance with established policies. Board meeting minutes, agendas, and videotaped sessions provide clear evidence of the Board acting in a manner consistent with policies, bylaws, and responsibilities. Board policies and administrative regulations are

subject to regular review and revision by BPARC. Additionally, the District recently hired a retired administrator to work part-time as facilitator for Board policy revisions.

The College meets the standard.

Standard IV.C.8 Governing Board

To ensure the institution is accomplishing its goals for student success, the governing board regularly reviews key indicators of student learning and achievement and institutional plans for improving academic quality.

Evidence of Meeting the Standard

At set intervals throughout the year, the Board reviews, discusses, and accepts reports that address indicators for student learning and achievement. The Board is updated annually with research and reports on institutional effectiveness, and student success and completion. Presentations are made at the public Board meetings so the trustees have opportunities to review and openly discuss performance indicators outlined by the Student Success Scorecard (IV.C.41). The Scorecard provides performance indicators on how well the colleges are doing in remedial instruction, job training programs, retention of students, and graduation and completion rates.

The Board has a second opportunity to review key performance indicators during the review of the ACCJC Annual Report (IV.C.42) which includes institution-set standards, goal/targets, and student achievement measures for students in basic skills courses, CTE programs, and degree and certificate programs. The Annual Report also includes data for SLO assessment, degree and certificate awards, university transfer rates. The Board has also invited presentations on student success initiatives including ESL & Basic Skills, Financial Aid, Learning Resource Center, Tutorial Programs, Enrollment Management plans, and Career Technical Education Certificate programs. During the ensuing discussions the Board has expressed an interest in factors that may contribute to low basic skills completion rates and benchmarking SCCCDD performance data with similar districts.

Analysis and Evaluation

The Board is regularly apprised of data for key indicators for student learning and achievement. Board agendas and minutes provide evidence of regular review, discussion, and Board input regarding student performance outcomes and the Colleges' plans for improving academic quality. The Board's level of engagement, along with its knowledge about student learning and achievement, has grown over the years. Board members ask insightful questions and expect honest and thorough responses from the Colleges.

The College meets the standard.

Standard IV.C.9 Governing Board

The governing board has an ongoing training program for board development, including new member orientation. It has a mechanism for providing for continuity of board membership and staggered terms of office.

Evidence of Meeting the Standard

The District has an ongoing training program and an orientation program for new Board members that includes a review of ethical rules and responsibilities, compliance with the Brown and Fair Political Practices acts, and an overview of the District's operation. All new Board members—including the student trustee—are oriented prior to them taking office. The chancellor and District Services staff, in consultation with the president of the Board, facilitate an annual Board retreat, promote trustee attendance at relevant conferences, and arrange for periodic Board education presentations throughout the year. Additionally, Board members provide oral reports and summaries of the conferences and Board educational activities in which they have participated at each board meeting ([IV.C.17](#)).

Board Policy, BP-109 (Board Education [IV.C.4](#)) asserts that “the Board of Trustees is committed to its ongoing development as a board and to a trustee education program that includes new trustee orientation. To this end, the Board will engage in study sessions, provide access to reading materials, and support conference attendance and other activities that foster trustee education.” BP-109 adds that:

- It is the responsibility of each individual trustee to pursue professional development opportunities to maintain knowledge of evolving educational governance, policies, legislation, best practices, employee relations, leadership, and accreditation standards and expectations.
- Individual trustees are encouraged to participate in at least one conference per year that provides professional development of trustee-related knowledge and skills. On an annual basis, the chancellor will circulate a list of national, state and regional conferences for trustees to select which they will attend, in order to take advantage of discounts on early registration and travel.
- At the board meetings following conferences, workshops and meetings, trustees are encouraged to share their written report from attendance of such conferences, meetings or workshops. The Board president may allow additional time for oral reports beyond the allotted two minutes, provided in the board report section of the agenda.

In practice, the Board training program and new member orientation includes:

- Board attendance at the CCLC Effective Trusteeship Workshop each January
- Board attendance at conferences with CCLC, AACC or ACCT.
- Completion of the online ACCJC's Accreditation Basics online training program.
- New board members receiving an orientation from the chancellor and the manager of the Office of the Chancellor and Trustee Services.
- Incoming board members meeting with each vice chancellor from each district services area, the college presidents, and several other department managers.
- Ethics training through the California Fair Political Practices Commission.

Board continuity is addressed through the combination of Board Policy Book 13 (Vacancies on the Board [IV.C.44](#)), which outlines the mechanisms for filling vacancies and with staggered elections. Specifically, Trustees are elected to four-year terms and Board member terms are staggered with elections held every two years in connection with the general election to provide continuity of Board membership.

Analysis and Evaluation

The Board has a consistent program for orientation and ongoing development including self-evaluation. The Board has followed policy in ensuring continuity of membership when vacancies have occurred. Staggered Board elections have provided consistency, and incumbents are frequently re-elected adding continuity of governance.

The College meets the standard.

Standard IV.C.10 Governing Board

Board policies and bylaws clearly establish a process for board evaluation. The evaluation assesses the board's effectiveness in promoting and sustaining academic quality and institutional effectiveness. The governing board regularly evaluates its practices and performance, including full participation in board training, and makes public the results. The results are used to improve board performance, academic quality, and institutional effectiveness.

Evidence of Meeting the Standard

Each year the SOCCCD Board of Trustees conducts an evaluation of its performance in order to continually assess its effectiveness. Board Policy, BP-172 (Board Self Evaluation [IV.C.45](#)) states that "the Board is committed to assessing its own performance as a board in order to identify its strengths and areas in which it may improve its functioning." The Board's self-evaluation process includes surveys of Board members and employees, discussion of the surveys, and a workshop to review outcomes and set goals. All employees are invited to participate in providing feedback through a survey. A special meeting of the Board is

publicized and conducted by a third-party facilitator. Information is posted on the District website for public transparency ([IV.C.46](#)). The Board fully reviews the surveys and Board goals in an effort toward continual improvement and effectiveness.

The Board of Trustees also holds periodic trustee listening sessions for classified staff and faculty to hear issues; these are publicized district wide. The Board may subsequently ask the chancellor to follow up on any concerns and provide a public presentation or Board report on a specific issue. The listening sessions help the Board clarify and underscore its role at the policy level. The trustee listening sessions improve Board performance by connecting the Board members to the Colleges and District. The chancellor, managers and administrators are asked not to attend these sessions in order to facilitate a more open dialog with Board members.

Analysis and Evaluation

The Board has clear policies and procedures for self-evaluation. The self-evaluation process has heightened the Board's focus on communication and appropriate roles and responsibilities for policy making in the District. The Board regularly participates in training, orientation, goal-setting, and self-evaluation activities, which have increased their knowledge of appropriate engagement in policy making, the accreditation process, college operations, and institutional effectiveness.

The College meets the standard.

Standard IV.C.11 Governing Board

The governing body upholds a code of ethics and conflict of interest policy, and individual board members adhere to the code. The board has a clearly defined policy for dealing with behavior that violates its code and implements it when necessary. A majority of the board members have no employment, family, ownership, or other personal financial interest in the institution. Board member interests are disclosed and do not interfere with the impartiality of governing body members or outweigh the greater duty to secure and ensure the academic and fiscal integrity of the institution.

Evidence of Meeting the Standard

SOCCCD has clear policies and procedures that govern ethical behavior and conflict of interest expectations for Board members as well as employees. The District also has defined procedures for dealing with behavior that violates the code of ethics. Board Policy 154 (Conflict of Interest) ([IV.C.26](#)) prohibits Board members from voting, debating, or attempting to influence the vote regarding a contract wherein the Trustee is financially interested as defined by Government Code §1091 and stipulates that a Board member shall

not engage in any employment or activity that is inconsistent with, incompatible with, in conflict with or inimical to his or her duties as an officer of the District. Additionally, each trustee files an annual Conflict of Interest form (California Form 700, Statement of Economic Interests).

Board Policy, BP-110 (Code of Ethics – Standard of Practice) ([IV.C.15](#)) requires that:

- The Board maintains high standards of ethical conduct for its members.
- Members of the Board are responsible to establish and uphold, implement and enforce all laws and codes applying to the District.
- All Board members are expected to maintain the highest standards of conduct and ethical behavior and to adhere to the Board's Code of Ethics.
- The Board reserves the right to censure any Board member who does not adhere to this policy or engages in other unethical conduct.

The Board completes ethics training required by law for cities, counties, and special districts in California (AB 1234, Chapter 700, Stats. of 2005) through the California Fair Political Practices Commission (<http://localethics.fppc.ca.gov/learn.aspx>). This training is free of charge and provided online. Upon completion of training Board members are provided with a Certification of Completion which kept on file in the Office of the Chancellor and Trustee Services.

Analysis and Evaluation

The Board of Trustees has a policy governing ethical behavior which includes detailed standards of practice and guidelines for enforcement. Board members are careful to disclose any connections to personal or financial interests that may conflict with their responsibilities as public stewards and abstain from any decision making related to such interests. Board meetings are taped to provide further public transparency. These are available on the District's website the day after each Board meeting.

The College meets the standard.

Standard IV.C.2 Governing Board

The governing board delegates full responsibility and authority to the CEO to implement and administer board policies without board interference and holds the CEO accountable for the operation of the district/system or college, respectively.

Evidence of Meeting the Standard

The Board delegates authority to the chancellor who, in turn, has responsibility for oversight of District operations and the autonomy to make administrative decisions. Board Policy, BP-2100 (Delegation of Authority to the Chancellor) ([IV.C.22](#)) asserts that in compliance with the provisions of the Education Code, the Board delegates full responsibility and authority to the chancellor to implement and administer board policies and conduct the business of the District and educational programs without interference and holds the chancellor accountable for the operation of the District. In addition, Board Policy, BP 2101 (Delegation of Authority to the College President [IV.C.47](#)) states that “the President is the Chief Executive Officer of the college [and] the President reports to, assists, and supports the chancellor in the performance of the duties delegated by the Board of Trustees in Board Policy 2100.”

Analysis and Evaluation

As trustees have improved their understanding of the policy role and the importance of following official channels of communication through the chancellor, the Board has improved its ability to allow the chancellor and presidents the ability to handle operational and administrative details at the District and Colleges, respectively. These practices have effectively empowered the interim chancellor to manage the operations of the District while it nonetheless remains evident the Board needs to be accountable.

The College meets the standard.

Standard IV.C.13 Governing Board

The governing board is informed about the Eligibility Requirements, the Accreditation Standards, Commission policies, accreditation processes, and the college's accredited status, and supports through policy the college's efforts to improve and excel. The board participates in evaluation of governing board roles and functions in the accreditation process.

Evidence of Meeting the Standard

The Board has a strong and ongoing focus on accreditation. All Board members are made aware of the ACCJC Eligibility Requirements and Accreditation Standards and processes through ongoing training and Board presentations. The Board's annual training on accreditation includes a review of the ACCJC publication: *Guide to Accreditation for Governing Boards*, and all Board members complete the ACCJC's online *Accreditation Basics* training. [IV.C.48](#)

The Board of Trustees is kept apprised of the process and progress of the Colleges in preparing the self-study report through presentations and reports by college and district administration in public meetings ([IV.C.49](#)). District services administrators participate on the college accreditation steering committees and keep the chancellor updated on progress, and both colleges publish comprehensive accreditation resources on the college websites.

Analysis and Evaluation

The Board of Trustees is engaged in the accreditation process. Through training and presentations, Board members remain informed about Eligibility Requirements, Accreditation Standards, and Commission policies. In addition, the Board of Trustees supports the efforts of both colleges to improve and excel through the approval of institutional policies, processes, and practices that ensure the College meet the Eligibility Requirements and in particular those requirements involving recommendations from previous self-study reports.

The College meets the standard.

Standard IV.D: Multi-College Districts or Systems

Standard IV.D.1 Multi-College Districts or Systems

In multi-college districts or systems, the district/system CEO provides leadership in setting and communicating expectations of educational excellence and integrity throughout the district/system and assures support for the effective operation of the colleges. Working with the colleges, the district/system CEO establishes clearly defined roles, authority and responsibility between the colleges and the district/system.

Evidence of Meeting the Standard

In accordance with Board Policy BP-2100 (Delineation of Authority of the Chancellor [IV.D.1](#)) Chancellor Poertner and now Interim Chancellor Fitzsimons have provided leadership and have encouraged employees from the Colleges and District Services to work together towards educational excellence and integrity. Through their leadership and communication, the chancellor and interim chancellor have clarified roles, responsibility, and authority between the Colleges and District Services as outlined in the Chancellor's Perspective ([IV.D.2](#)) and the District wide Function Map ([IV.D.3](#)) to support the effective operation of the Colleges. The interim chancellor meets regularly with the college presidents, and faculty and staff leaders to facilitate collaboration, team building, and mutual support for the Colleges. The interim chancellor also uses formal forums including district wide participatory governance meetings, facility ground-breaking and grand-opening ceremonies, district wide emails, and the Chancellor's Opening Session to communicate her expectations for educational excellence and integrity with college, district, and community stakeholders.

The interim chancellor holds the college presidents to clearly articulated standards for educational excellence, student success, and fiscal stability. She emphasizes and supports consultation with faculty and staff leadership in policies and activities related to student preparation and success, and district and college governance activities through the implementation of the District wide Planning and Decision-Making Manual (SOCCCD PDM) which has the expressed purpose of uniting the collective around the shared vision that "student success is the most important endeavor" of the District. ([IV.D.4](#)) The SOCCCD PDM also clarifies roles and responsibilities and promotes "governance structures that enable our Colleges to fulfill their missions and respond effectively to the needs of students."

Chancellor Poertner sought opportunities to communicate about operational roles and delineation of responsibilities to clarify expectations. In the Chancellor's Perspective from June 18, 2015 ([IV.D.2](#)), Chancellor Poertner stresses that:

- There are clear lines of authority established between the board and chancellor and the chancellor and presidents.

- Organizationally, neither the Colleges nor District Services reign over each other. Any assumptions that one entity is superior over another sets unreasonable expectations and fuels tensions.
- District Services provides centralized functions, enabling the District to operate more economically and efficiently. Accounting, payroll, purchasing, contracts, job recruitment, and IT systems security are examples of services performed for all departments, divisions, and employees district wide.
- Some people may not realize that District Services is also responsible for areas related to legal, compliance, policy, legislative, reporting, development, systems, employee complaints, research and planning.

The *Chancellor's Perspective* also used statements from the employee surveys to provide context through examples. To illustrate, an employee noted that "the District does not give my department sufficient supply and equipment budgets." Chancellor Partner responded by noting that:

Funds are annually distributed through the District Resource Allocation Committee (DRAC), a participatory governance group, to each College and District Services. All college departments are funded out of college funds and all of those decisions and allocations are made at the college level without interference from the Chancellor or District Services. Similarly, all District Services funds are allocated through the Chancellor's office.

Analysis and Evaluation

Interim Chancellor Fitzsimons communicates her expectations for institutional excellence and integrity through district wide participatory governance meetings, civic engagements, electronic communication, and college and district activities and events. In her role as vice chancellor for Business Services and her current role as interim chancellor, Dr. Fitzsimons has demonstrated leadership in updating the District wide Function Map and the District wide Planning and Decision Making Manual, which clarify the roles and responsibilities of the Colleges and District Services.

Recent discussions during the 2016 update of the *District wide Function Map* have identified gaps in understanding of roles and authority between District Services and the Colleges. The ensuing dialog proved helpful in identifying and addressing service gaps and providing clarification of responsibilities and authority for employees and stakeholders across the District. To illustrate, as technology advances and the needs of students and the colleges change, the roles and responsibilities of College IT and District IT will need to be evaluated and updated more frequently.

The College meets the standard.

Standard IV.D.2 Multi-College Districts or Systems

The district/system CEO clearly delineates, documents, and communicates the operational responsibilities and functions of the district/system from those of the colleges and consistently adheres to this delineation in practice. The district/system CEO ensures that the colleges receive effective and adequate district/system provided services to support the colleges in achieving their missions. Where a district/system has responsibility for resources, allocation of resources, and planning, it is evaluated against the Standard and its performance is reflected in the accredited status of the institution.

Evidence of Meeting the Standard

Interim Chancellor Fitzsimons has clearly communicated the delineation of functions and responsibilities of District Services from those of the Colleges in accordance with Board Policies:

- BP-112, Duties and Responsibilities of the Board of Trustees ([IV.D.5](#))
- BP-2100, Delegation of Authority to the Chancellor ([IV.D.6](#))
- BP-2100.1, Delegation of Authority to the Academic Senate ([IV.D.6](#))
- BP-2100.2, Role and Scope of Authority of the Academic Senates ([IV.D.7](#))
- BP-2101, Delegation of Authority to the College President ([IV.D.8](#))
- BP-3001, Delegation of Authority ([IV.D.9](#))
- BP-4309, Duties and Responsibilities of the Faculty ([IV.D.10](#))
- BP-4056, Classified Employees Participation in Decision Making ([IV.D.11](#))
- BP-5627, Student Participation in Governance ([IV.D.12](#))

In sum, there are over 20 Board Policies and associated Administrative Regulations that address the delineation of roles, responsibilities, and authority. As mentioned in Standard IV.D.1, the two primary documents that address the delineation of duties are the *District wide Function Map* ([IV.D.13](#)) and the *District wide Planning and Decision-Making Manual* ([IV.D.13](#)). Additionally, governance, fiscal, and operational responsibilities are often clarified and refined in the district wide participatory governance committees and councils, including the:

- Basic Aid Allocation Recommendation Committee ([IV.D.14](#))
- Board Policy and Administrative Regulation Advisory Council ([IV.D.15](#))
- Business Continuity Planning Committee ([IV.D.16](#))
- Capital Improvement Committee ([IV.D.17](#))
- Chancellor's Council ([IV.D.18](#))
- District Online Education Committee ([IV.D.19](#))
- District Resource Allocation Committee ([IV.D.20](#))
- District wide Planning Council ([IV.D.21](#))
- District wide Technology Committee ([IV.D.22](#))
- Learning Services Coordinating Committee ([IV.D.23](#))

The interim chancellor ensures that the colleges receive effective and adequate District Services support through dialogue, the governance structure, and the scope of authority of the units in District Services. Services at the district level are organized through the offices of the Vice Chancellor for Human Resources, the Vice Chancellor for Business Services, the Vice Chancellor for Technology and Learning Services, and the Chancellor and Trustee Services.

The Office of the Vice Chancellor for Human Resources (HR) is responsible for facilitating the recruitment, selection, and orientation of new employees; training and professional development; collective bargaining; compliance with State and Federal laws and regulations; management of the performance evaluation process; and human resource information systems.

The Office of the Vice Chancellor of Technology & Learning Services coordinates educational programs, technology services, and district wide research. The vice chancellor also provides leadership in: enrollment management; distance education; workforce development programs; online services, products, and programs; security, reliability, and continuity of all district wide network infrastructure, computer operations, and telecommunications; the maintenance of MIS data and reporting tools; and the maintenance of the Student Information System (SIS), My Academic Plan (MAP), MySite, the Learning Management Systems (Blackboard and Canvas), and Workday.

The Office of the Vice Chancellor for Business Services provides oversight of all business departments, including Fiscal Services, Facilities Planning and Purchasing, Accounting, Payroll, and Risk Management. The vice chancellor collaborates with the two colleges to prepare the tentative and final District budgets, and provide support and expertise to the District Resources Allocation Council (DRAC). The vice chancellor's office also provides oversight of the annual and biennial construction and facilities renovation, master plan development, and warehouse/mailroom services.

The Office of the Chancellor and Trustee Services is responsible for the coordination of all regular and special Board meetings, including notification, preparation, and distribution of agendas and minutes. Office responsibilities also include dissemination of information district wide, coordination of district wide events such as the Chancellor's Opening Session during Professional Development (Flex) Week each semester, and coordination of district wide committee meetings including the Chancellor's Executive Team, the Chancellor's Cabinet, the Docket and District Leadership Team. Public Affairs, a division within the Office of the Chancellor, coordinates marketing; government, community and public relations; and media relations.

The services provided to the colleges by District Services are evaluated through discussions in, and surveys for, the participatory governance committees. For example, the District's resource allocation process is evaluated by several committees including CIC, BARC, and DRAC. Evaluation of services is also done with a bi-annual district wide climate survey

([IV.D.24](#)). The survey is used to provide opportunities for employee feedback and identify future goals. Lastly, evaluation of services is also done by each District Services department through the use of Administrative Unit Reviews (AUR) with goals, action steps, and documented outcomes ([IV.D.24.B](#)).

Following the aforementioned 2010 Commission recommendations pertaining to communication and the delineation of roles, Chancellor Poertner initiated discussions in 2011 that identified five district wide barriers to successful communication ([IV.D.25](#)):

- Unhealthy competition within and between IVC, Saddleback, and District Services.
- Lack of utilizing data and metrics for decision making.
- Circumvention and lack of established policies, procedures, and protocols.
- Lack of district wide perspective and mutual understanding and acceptance of the roles of each college and district services.
- Lack of district policy encouraging civility, respect, and collegial behavior.

A task force was formed for each barrier to identify assumptions and make recommendations for improved communication ([IV.D.26](#)). For example, the Barrier Task Force (Lack of district wide perspective and mutual understanding and acceptance of the roles of each college and district services) identified the following assumptions and recommendations:

Assumptions

- We act as separate entities rather than as a unified district with one shared vision, focus, and purpose.
- There seems to be a general lack of respect for authority of the chancellor and/or district executive team by the presidents and/or other college managers and administrators.
- There seems to be a general lack of respect for the authority and responsibilities of the presidents and/or other college managers and administrators by the district executive team and/or other District Services personnel.
- District Services is often unresponsive and/or untimely.
- The knowledge base and expertise of District Services personnel is inconsistent, and individuals within the same department provide different information and advice.
- District Services is not customer (college) service centered, and often insular and/or process-driven.

Recommendations:

- Develop more in-depth new employee orientations.
- Conduct District Services department open houses and/or tours of the colleges.
- Increase in-person conversations and attendance at other departments' meetings.
- Develop a district wide calendar.
- Create job shadowing opportunities for faculty and staff.
- Increase the acceptance of roles and positions at the Colleges and District Services.

- Develop activities and/or compile personnel skills maps.
- Create student ambassador programs.

The Colleges and District Services have been charged to implement the recommendations from the barriers task force; this work is ongoing. To illustrate, IVC has a student ambassador program, both Colleges use a district wide calendar ([IV.D.27](#)), each district services department has conducted tours ([IV.D.28](#)), and facilitated conversations (Higher Understanding Gathering Sessions) ([IV.D.29](#)) have been held with the human resources, fiscal, facilities, and information technology teams to resolve issues.

Analysis and Evaluation

The interim chancellor strives to continuously delineate and outline the functions of District Services and its operational responsibilities to support the Colleges in achieving their missions. The adequacy and effectiveness of District Services are evaluated through Administrative Unit Reviews and employee satisfaction surveys. The District and Colleges almost continually discuss and evaluate the resource allocation process and the DRAC model. Yet, financial accountability policies are in place to ensure the Colleges receive adequate support and are able to meet Accreditation Standards related to financial resources and stability.

Given that college employees periodically expressed concerns that District Services occasionally overreached in their involvement in college operations, Chancellor Poertner arranged *District Services Road Shows* ([IV.D.29](#)) at the Colleges to provide an overview of each department, highlight topic areas where employees might need assistance, gather input from employees, and identify areas for improvement. These Road Shows are widely marketed to all employees and the Road Show materials and resources are kept on the District's SharePoint site for future reference. Also, in response to feedback from the Colleges that District Services did not always appear to act in service of the Colleges, a professional development event was held March 22, 2016 that focused on improving the customer service skills of District Services employees.

The College meets the standard.

Standard IV.D.3 Multi-College Districts or Systems

The district/system has a policy for allocation and reallocation of resources that are adequate to support the effective operations and sustainability of the colleges and district/system. The district/system CEO ensures effective control of expenditures.

Evidence of Meeting the Standard

The District has established resource allocation policies and procedures that support the effective operations and sustainability of the Colleges and District Services. Under the leadership of the interim chancellor, college and district personnel work together to ensure effective control of expenditures and financial sustainability for the Colleges and the District Services.

DRAC and BAARC are the primary committees that provide leadership on district-level budget policies and recommendations to the interim chancellor. The allocation of district general fund resources to the Colleges occurs in accordance with Board Policies, BP-3100 (Budget Preparation [IV.D.30](#)), BP-3101 (Budget Management [IV.D.31](#)), BP-3102 (Fiscal Management [IV.D.32](#)), and the Budget Development Guidelines ([IV.D.33](#)). The *Budget Development Guidelines* were developed to “ensure wise and prudent use of public resources, promote financial strength and stability, and maximize educational opportunities for students.” In addition, the *Budget Development Guidelines* specify that despite the District’s current basic-aid status:

- The expenditure budgets for ongoing purposes shall be the resources that would have been available from state apportionment.
- Excess revenue above apportionment shall be allocated at the College or District for one-time purposes such as to cover some of the unfunded obligations for the retiree benefit plans.
- Excess revenue above apportionment shall not be used for ongoing expenditures, such as salaries.
- Excess revenue above apportionment shall not be used for any other purposes that will jeopardize the District’s future financial stability.
- A general fund reserve for economic uncertainties of no less than 7.5 percent of the projected unrestricted revenue shall be maintained.

The District has established effective policies and mechanisms to control expenditures. College and district financial statuses are regularly reported to and reviewed by the Board, and the District commissions annual fiscal audit reports ([IV.D.34](#)). These audits are designed to provide reasonable assurance that the financial statements are free of material misstatement. The annual audit considers the District’s internal controls over financial reporting in order to plan the audit but does not give an opinion on those controls. The District’s participatory governance committees also provide comprehensive budget and financial oversight, including reviews of the District’s CCFS-320 filings, full-time Faculty Obligation Number (FON), enrollment projections, and year-to-year comparisons with enrollment targets.

Analysis and Evaluation

SOCCCD has a long history of financial conservatism. The Colleges and District Services adhere to standards of good practice that include the maintenance of adequate reserves and the obligation to maintain balanced budgets. Through the effective control of expenditures, District Services and the Colleges have consistently closed out the fiscal year with positive ending-balances. Each college president is responsible for his college budget and has the authority to collaboratively develop and implement appropriate processes for budget development and the effective utilization of financial resources in support of his/her college mission.

The District's Fiscal Services Office processes and facilitates the distribution of resources to the Colleges in accordance with the DRAC Model, State and Federal categorical fund allocation guidelines, and Board policies. The majority of resources allocated to the Colleges are data-driven and reflect the needs of the institutions through application of state-mandated guidelines and the local Board-approved budget guidelines.

The College meets the standard.

Standard IV.D.4 Multi-College Districts Systems

The CEO of the district or system delegates full responsibility and authority to the CEOs of the colleges to implement and administer delegated district/system policies without interference and holds college CEO's accountable for the operation of the colleges.

Evidence of Meeting the Standard

As outlined in standards IV.B.1 and IV.D.2, the Board of Trustees has adopted multiple policies and procedures to ensure that the chancellor gives full responsibility and authority to the college president. In January 2009 the SOCCCD Board of Trustees adopted Board Policy BP-2101 (Delegation of Authority to the College President [IV.D.8](#)). This policy establishes the college president as the final authority on the college level. At each college, the president is therefore expected to:

- Provide leadership in the development and implementation of a sustainable master plan and integrated strategic plan.
- Promote and support learning, teaching, and student success, including the maintenance and improvement of quality instructional and support services.
- Provide leadership in the development and implementation of career technical education to meet the needs in the community.
- Provide leadership in the development and implementation of a comprehensive enrollment management plan.
- Develop and monitor the college budget and assume fiscal responsibility.

- Propose strategies for selecting and retaining diverse high quality full-time faculty, staff and administrators.
- Provide leadership and empower the administrative team.
- Provide leadership focusing on accountability and professional conduct.
- Assume a highly visible leadership role in the community and build strategic partnerships with corporate, educational and community-based organizations.

In practice and accordance with Board Policy, BP 2101 (Delegation of Authority to the College President) and the adopted *District wide Function Map* ([IV.D.8](#)), the interim chancellor delegates full authority and responsibility for college operations to the college presidents and supports them in implementing district policies at their respective colleges. The college presidents are held accountable for their colleges' performance by the Board and interim chancellor but have the ability to conduct their work without interference from the interim chancellor and Board.

Analysis and Evaluation

The college presidents serve as the chief executives for their respective colleges and ensure the quality and integrity of programs and services, fiscal sustainability, and accreditation status of their colleges. The interim chancellor delegates fully the authority and responsibility to the college presidents for implementing college and district policies without interference. The Board, the interim chancellor, and the communities they serve hold the college presidents accountable for their performance.

The College meets the standard.

Standard IV.D.5 Multi-College Districts or Systems

District/system planning and evaluation are integrated with college planning and evaluation to improve student learning and achievement and institutional effectiveness.

Evidence of Meeting the Standard

SOC CD has adopted district wide integrated processes for fiscal, facilities, strategic, and technology planning. These processes provide the framework for planning integration across the District with the goal of promoting student learning and institutional effectiveness. Administrative Regulation, AR-2120 (Institutional Planning) ([IV.D.35](#)) espouses that "District-wide goals will be integrated with the Colleges and District Services and reflected in their respective written planning documents." The District wide Integrated Budget Planning Resource Guide ([IV.D.36](#)) provides information about the planning and budget process in the District. From a fiscal standpoint, the Budget Development Guidelines ([IV.D.33](#)) and the application of the District Resource Allocation Model align the college

planning process with the District planning process. Also, the College's Education and Facilities Plans ([IV.D.37](#)) are integrated with and inform the overall District's Education and Facilities Master Plan ([IV.D.38](#)).

The Colleges' strategic plans are integrated with the District wide Strategic Plan ([IV.D.39](#)), through alignment of goals between the two. To illustrate, Goal 1 from the District wide Strategic Plan indicates that "SOCCCD will foster an environment characterized by creativity, innovation, respectful interactions and collaboration," and Goal 1 from the IVC Strategic Plan ([IV.D.40](#)) indicates that "IVC will foster an environment characterized by creativity, innovation, respectful interactions and collaboration." The Colleges have, in effect, adopted the strategic goals of the District, but the Colleges have sufficient autonomy and responsibility to implement unique objectives for the shared goals, based on local conditions and institutional priorities.

The District Technology Plan ([IV.D.41](#)) aligns with the District wide Strategic Plan ([IV.D.39](#)), and establishes the framework of goals and objectives that guide district wide technology planning. The IVC Technology Plan ([IV.D.42](#)) is integrated with the District Technology Plan and both establish standards and priorities for the deployment of technological solutions based on available resources.

There are several mechanisms used to evaluate the effectiveness of integrated planning throughout the District. District wide and college wide participatory governance planning committees assess their effectiveness through the annual committee self-evaluation process ([IV.D.43](#)). Administrative Unit Reviews (AUR) ([IV.D.44](#)) include an analysis of planning outcomes and a review of planning processes.

Analysis and Evaluation

SOCCCD has established mechanisms for integrated district wide strategic planning. This integration involves collaboration and cooperation between the Colleges, District Services, and participatory governance committees. Assessment mechanisms include discussion and subsequent updates of governance and decision-making processes, district wide surveys, college wide surveys, governance committee self-evaluation, and AURs.

The college meets the standard.

Standard IV.D.6 Multi-College Districts or Systems

Communication between colleges and districts/systems ensures effective operations of the colleges and should be timely, accurate, and complete in order for the colleges to make decisions effectively.

Evidence of Meeting the Standard

Board Policy, BP-2001 (Administrative Organization) ([IV.D.6](#)) maintains that for “the District and the Colleges to be governed and administered in an effective manner, it is necessary that lines of communication be established within the organization so they allow for the orderly transaction of business.” To promote effective and timely communication, the interim chancellor meets weekly with the college presidents to discuss executive issues and ensure seamless operations of the Colleges. SOCCCD also has a robust participatory governance process in which numerous councils and committees with diverse representation meet regularly to enhance communication and ensure the effective and timely flow of information between and among the Colleges and District Services. In accordance with the Brown Act, agendas are posted in advance of meetings, and minutes and meeting handouts are posted electronically on the respective committee’s SharePoint site. For example, the Chancellor’s Council meets monthly to discuss district wide topics, and all constituency groups are represented. Council members provide updates and are responsible for communicating information back to their constituencies in a timely manner.

The Executive Director of Public Affairs and Government Relations in the Chancellor’s Office reports outcomes from board meetings in Board Highlights ([IV.D.45](#)), a newsletter sent out via email district wide following each regular Board meeting. These are also posted on the District website. The Public Affairs Office also sends out announcements from District Services departments via district wide emails on various subjects to ensure a high level of effective operations and constant communication with employees. The District Services administrative units have conducted Road Shows ([IV.D.46](#)) and produced and distributed newsletters ([IV.D.47](#)) to enhance communication and ensure the effective operation of the Colleges ([IV.D.29](#)).

Analysis and Evaluation

Due to sheer size, complexity, and volume of activity, the Colleges and District Services periodically struggled with communication. Maintaining consistent engagement and effective communication has been a priority for Chancellor Poertner and Interim Chancellor Fitzsimons. To address communication deficits, the District, Colleges, and primary planning bodies have all adopted strategic planning goals that emphasize the need for ongoing efforts to promote “respectful interactions and collaboration.” Table IV.1 and Table IV.2 outline the results of the most recent College and District employee survey results that are related to communication and collaboration ([IV.D.48](#), [IV.D.24](#)).

At the same time, the Colleges and District Services have improved in many respects, as stakeholders enjoy improved access to information. College and District Services SharePoint sites host information and resources for the primary units and governance committees, as well as newsfeeds, announcements, meeting agendas, handouts and outcomes, directories for

assistance, and archived communications for reference. Committees and councils have increased their membership to ensure broad constituent representation, to add new perspectives to the conversation and to improve transparency about processes. The advent of Road Shows, HUGS, newsletters and other endeavors to improve communications highlight the District's commitment to promoting timely, accurate, and complete communication in order for the Colleges to make decisions effectively.

The College meets the standard.

Standard IV.D.7 Multi-College Districts or Systems

The district/system CEO regularly evaluates district/system and college role delineations, governance and decision-making processes to assure their integrity and effectiveness in assisting the colleges in meeting educational goals for student achievement and learning. The district/system widely communicates the results of these evaluations and uses them as the basis for improvement.

Evidence of Meeting the Standard

Under the guidance of Chancellor Poertner and Interim Chancellor Fitzsimons, the District regularly evaluates and communicates the effectiveness of role delineations between District Services and the Colleges for governance and decision-making processes. Role delineations are evaluated during the bi-annual review of *District wide Function Map* (IV.D.7) and the *District wide Planning and Decision Making Manual* ([IV.D.13](#)) with revisions made based on input from participatory governance committees, administrative units, the Chancellor's Cabinet, and college stakeholders. The Function Map is currently being reviewed and updated and will be finalized prior to the Colleges' 2017 site visit.

The District has implemented and upheld an annual process for governance committee evaluations and analysis and reporting of results. These committee self-assessments usually document the committee's accomplishments and challenges in addition to highlighting areas for improvement in the college and/or district governance processes. District Services and the Colleges have designed and administered bi-annual district wide and college wide surveys, the results of which are discussed widely and posted on the College or District website for review. The District institutionalized these cycles and continues to review and revise processes to ensure integrity and institutional effectiveness.

Analysis and Evaluation

SOCCCD has processes and regularly evaluated district and college role delineations, governance, and decision-making and has developed mechanisms for wide communication of the results of these evaluations. The District and Colleges have conducted surveys ([IV.D.48](#), [IV.D.24](#)), analyzed recurring themes, disseminated and discussed results, and used the results

to plan improvements. To illustrate, the following are excerpts from the 2014 District Climate Survey:

I am aware of the District wide integrated strategic planning process.		
Strongly Agree	63	9%
Agree	315	47%
Disagree	170	25%
Strongly Disagree	37	5%
Don't Know/Not Applicable	88	13%
Total	673	100%

I feel planning in our District is effective.		
Strongly Agree	38	6%
Agree	254	38%
Disagree	150	22%
Strongly Disagree	55	8%
Don't Know/Not Applicable	176	26%
Total	673	100%

I am aware of the District wide Planning and Decision Making Manual.		
Strongly Agree	49	7%
Agree	203	30%
Disagree	151	28%
Strongly Disagree	90	13%
Don't Know/Not Applicable	140	21%
Total	673	100%

The College meets the standard.

Quality Focus Essay

Action Project One: the Resource Request Process

Action Project	Outcomes	Alignment with Standards
Resource Request Process Component of Budget Development and Management	Strategic	IA, IB, IC, IIA, IIB, IIC, IIIA, IIIB, IIIC, IIID, IVA, IVB

Since 2007, IVC faculty, classified staff, managers, and administrators have been working together to develop and improve the College's methods for allocating resources in a fair, equitable, and open fashion that reflects its strategic intentions and operational needs. Funds not already allocated for general costs of doing business—including salaries and benefits, utilities, ongoing maintenance and upkeep, and office and instructional supplies—are scarce and thus highly sought after. All college processes, including those for allocation of resources, have been evolving steadily; the component engendering the most discussion about the need for improvement is the Resource Request Process.

The College receives funds from diverse sources, many of which have specific restrictions. Until recently, the allocation of funds from most of these sources have been managed by one or two administrators or managers who have been designated as the functionary most closely involved with the designated uses of those funds. In 2011, however, the Resource Request Process, which employs Strategic Planning Committees (SPCs) to prioritize allocations, was revised to permit any employee to make a resource request that includes funding sources other than general fund.

To increase the efficiency and open access for requestors, appraisers, and observers in the process, a software program was developed in-house to meet the specifications of the process. This development has been fortuitous because each iteration has resulted in modifications to the process, and therefore the program, in response to feedback from all involved parties. The system stands as a vast improvement over the paper-based process used in the past, and most of the people involved agree that we are seeing incremental improvement with each cycle of use, review, and revision in each subsequent year.

Three remarkable aspects of the process IVC now employs are:

- All employees are invited to submit requests into the system; the requests remain in the system available to view and track, throughout the entire process. All employees have access to the IVC SharePoint site, Inside.IVC.edu, where the progress of any proposal through its consideration and minutes of committee meetings can be monitored by any interested employee.

- Review includes the budget manager of the area or department from which the request originates, the directors of College Technology Services and Facilities (if relevant), and the appropriate vice president to get a sense of need and relevance from the people most involved technically and operationally with the proposal. Then, one or more SPCs rate the proposal, to prioritize each proposal from a college-wide perspective as well as with a view to its strategic import. Final open collegial review occurs in the Strategic Planning and Accreditation Council (SPAC). Membership in all the SPCs and SPAC thus represents all governance groups, and decisions are made by consensus. SPAC makes its recommendations to the president, who makes funding decisions.
- All sources of funding are listed and considered (to the extent that their restrictions allow) when SPAC deliberates on its final recommendations. This procedure makes all sources of funds visible to the college community.

Each of these three components affords major benefit to the college, but each also results in challenges that the institution continues to work to address while at the same time being mindful of preserving the strengths of the system. **The goal of this project is to develop a Resource Request allocation process that better balances the virtues of the current system with advancing solutions to its major problems.**

The primary challenges that we have encountered are that our process is cumbersome, laborious, and takes much too long to complete. Many of these weaknesses are a direct consequence of allowing anyone to make a request and keeping all requests in the system throughout the process, which greatly increases the number of requests being considered. Having many eyes review and/or comment on each request is laborious and seems, to many, to be redundant or superfluous. Especially in cases where several requests are submitted, it takes a long time for individuals to complete their review work.

In the past, when only unrestricted general funds were considered in the open Resource Request process, it was clear that many fewer requests could be accommodated, which greatly reduced the need for extended conversation, because only the highest value requests could be considered. A possible solution to the time commitment issue with everyone reviewing all resource request would be to separate the categorical and restricted funding sources from general fund requests. In theory, an equally transparent and more nimble process could be developed around two broad funding source categories. This new process could be implemented as the College moves to integrate several major planning initiatives: Basic Skills, Student Equity, Student Success Support Programs, Perkins, and the Strong Workforce Initiative.

One idea currently being considered by committee members who have been involved in this process involves reviewing requests two or three times per year, instead of the current practice of rating requests in the spring. This change would address two main problems: the number of requests and thus, the workload entailed, and the fact that some funding sources have a fiscal year that differs from that of the college general fund. Reviewing a smaller number of requests in a shorter season could be more feasible than taking them all at once, could furthermore permit a more thorough discussion, and could result in a shorter response time for requesters. Even if the number of requests increases slightly with a “rolling” system as envisioned, IVC believes the smaller number being considered at each period will reduce the human toll.

Table QFE.1: Action Plan for Addressing the Speed of the Resource Allocation Process

Goal	Action Plan	Responsible Party	Timeline
Expedite the resource request process while maintaining transparency and access	Pilot biannual review cycles.	BDRPC/SPAC	fall 2016 – spring 2017
	Discuss separating categorical fund requests from general fund requests.	BDRPC/SPAC	spring 2017
Align resource request process with the fiscal years of all funding sources	Pilot biannual review cycles.	BDRPC/SPAC	fall 2016-spring 2017
	Pilot triannual review cycle	BDRPC/SPAC	fall 2017-spring 2018
Revise online resource request program	Allow two entry points/consideration cycles	IVC Technology Services	fall 2016-spring 2017
	Allow three entry points/consideration cycles	IVC Technology Services	fall 2017-spring 2018

Action Project Two: Online Education at Irvine Valley College

Overview

IVC offers online learning that consists of programs and courses offered fully online and partially online (hybrid) with the guiding principle of enhancing overall access for students to achieve and complete their educational goals, with support provided to faculty and related resources. To support students and faculty, the Online Education Task Force seeks to address the challenges for additional infrastructure, ongoing professional development, student access, course design, and enrollment growth. Specifically, the college leadership has had integrated planning and decision-making for online education, as well as integrated planning, Program Review and resource allocation. As a result of these processes, Online Education has been selected as the second area for the Quality Focus Essay.

Action Project	Outcomes	Alignment with Standards
Online Education Strategic Planning and Implementation	Strategic	I.B.6, A, II.A.7, II.B.1, II.C.1, III.A, B, and C, IV.C, IV.D, and Substantive Change for OE

Description, Purpose and Goals

Following a period of steady growth in online offerings at the college and acknowledging stable enrollments, the college—via collaboration with the dean of Online Education and the Online Education Task Force (OETF)—made a commitment to systematically re-enforce a framework for online learning, using planning and resource allocations to prioritize actions for improvement in faculty professional development and student learning. (OETF Priorities List [Q.1.1](#)), OETF Meeting Agenda for the first fall 2016 Meeting ([Q.1.2](#)).

Each year, the OETF addresses and assesses significant goals with achievable outcomes, (i.e., what has been accomplished in the prior year is assessed, discussed, changes are made, with documents updated and new priorities established for the upcoming year). To meet the identified areas of need in this self-evaluation, the goals for OE form the framework of quality established by the OETF. These include:

- Regular and effective contact and student engagement in learning through a review of the DE Faculty Handbook and quick sharing at each School meeting in the fall semester
- Faculty professional development
- Online course approval process
- OE strategic plan and resource request process and actions

- Collaborative decision-making process within the OETF and as the OETF recommendations are forwarded and approved according to the *IVC Planning and Decision-Making Manual*
- Work with the Technology Advisory Task Force to align technology, helpdesk, and faculty training (e.g., 508 and 504 compliance).

When the Online Education (OE) Strategic Plan was developed, the college intentionally integrated the Districtwide Strategic Plan, IVC Strategic Plan and IVC Technology Plan to support the strategic directions outlined in the IVC OE Strategic Plan. The Administrative Unit Review (AUR), with outcomes (AUOs) are directly linked to the strategic plan. The AUR, which includes an assessment plan, is reviewed annually by the OETF. OETF also consults with and communicates planning, annual priorities and technology and innovation needs to the Technology Advisory Task Force (TAF). IVC continues to make changes to its Online Education program and courses in order to continually improve learning and instruction. (Online Education Strategic Plan ([Q.1.3](#)), Districtwide Strategic Plan ([Q.1.4](#)), IVC Technology Plan ([Q.1.5](#)), OE AUR ([Q.1.6](#)).

Online Education Strategic Planning

The focus of the plan is to continually improve student success and faculty development to enhance completion, success, and instructional excellence. As a part of the action plan and process improvement, the Irvine Valley College Online Education Strategic Plan was created in 2015 and is reviewed annually by the OETF. This plan was a response to the high impact of online education on Irvine Valley College. In fall 2009, the Online Education course offerings accounted for approximately 8% of college's total enrollment; as of fall 2015, the percentage has steadily increased to 14%. There are 5 Certificates of Achievement (COAs) offered 100 percent online. There are 35 Certificates of Proficiency (COPS) offered 100 percent online. Other AA degrees and GE Certifications can be earned in an online environment, including CSU/IGETC requirements.

In response to the growth, and in alignment with IVC's Online Strategic Plan, departments at IVC can determine the suitability of their courses for online offerings. The OETF assesses student satisfaction and information every semester and uses this information to address any issues and confirm priorities and goals.

The process to develop the Online Education strategic plan involved faculty input, from academic school meetings, program reviews, the OETF, forums and college-wide presentations (e.g., Faculty professional development week). The OETF annually reviews the plan.

The purpose of the IVC Online Strategic Plan is to **increase access and success** for online students through:

- 1) **Determining** which components are essential to providing appropriate and effective online course offerings and services to students, enabling them to complete requirements and participate in a quality educational experience without physically visiting the campus sites;
- 2) **Assessing** the background and current state of those components, and making recommendations regarding ways to improve;
- 3) **Developing** a vision for the expansion of the online site to serve the needs of students and prospective students and helping them reach their educational goals through online learning;
- 4) **Ensuring** the subsequent development and support of a robust online education offering at Irvine Valley College;
- 5) **Establishing** a key place for online learning and the online site in the *IVC Planning and Decision-Making Manual (PDM)*;
- 6) **Evaluating** infrastructure needs for the online site and providing the resources necessary to build that infrastructure;
- 7) **Involving** the online site in provision of comprehensive educational programs that fulfill the South Orange Community College District's mission.

The IVC Online Education Mission Statement created in this process is: "The IVC Office of Online Education will promote student success and faculty development by providing resources, policies, procedures, and services to students and faculty to support high quality online instruction and learning."

The IVC 2014-2017 Online Strategic Goals include:

- 1) **Goal 1:** IVC will foster an environment characterized by creativity, innovation, respectful interactions and collaborations;
- 2) **Goal 2:** IVC will promote students' success by enhancing the teaching and learning environment;
- 3) **Goal 3:** IVC will advance economic and workforce development through regional partnerships with educational institutions and industry, and by strengthening career technical education;
- 4) **Goal 4:** IVC will strengthen long-term financial health and institutional effectiveness through integrated planning and resource allocation.

Table QFE.2: Online education objectives

Objective	Description
Objective 1.1	Recognize and support innovative ideas that improve collaboration and respectful interactions district-wide on the topic of Online Education.
Objective 1.2	Improve district climate in the areas of optimism, commitment, and respectful collaborations on the topic of Online Education.
Objective 1.3	Improve the representation process through active engagement and communication on the topic of Online Education.
Objective 1.4	Increase professional development opportunities that potentiate employees' talents and interests on the topic of Online Education.
Objective 2.1	Increase student completion rates (degrees, certificates, and transfer) while preserving access, enhancing quality, and closing achievement gaps for courses and programs via online/hybrid modalities.
Objective 2.2	Increase employee professional development opportunities that focus on student success outcomes for Online Education.
Objective 2.3	Increase opportunities for student engagement inside and outside the classroom, evidenced by co-curricular participation, student services, and instructional support for courses and programs offered as Online Education.
Objective 3.3	Provide relevant, innovative, and appropriate workforce training, including courses and programs offered as Online Education.

The areas of online education IVC that have the most room for improvement are: the distance education curriculum process, faculty professional development, the learning management system, and the online education course review process.

Distance Education Curriculum Process

The curriculum proposal process requires teamwork and effort from many different faculty members and administrators. The Curriculum Committee must approve each course taught in an online or hybrid format. The process to develop a new online or hybrid course may take up to a year. The actual development and design of the course is approximately 100–300 hours.

Each mode of instruction for an existing course intended for delivery by Online Education (OE) is separately reviewed and approved by the Curriculum Committee prior to being offered.

For online courses, including both 100 percent fully online courses and hybrid courses, the curriculum process is as follows: faculty complete and submit an OE/DE proposal for the

course as per the DE faculty handbook (linked below); the OE/DE proposal (form linked below) moves through the curriculum approval process beginning with a review by other faculty in the same School, then is reviewed and approved by the department or school chair; upon approval, the proposal is reviewed by the Alternate Media Specialist, who works with faculty to insure the course is accessible (meets Section 508 compliance) for all students; after further review by Technical (Tech) Review, which is a subcommittee of the Curriculum Committee, suggested changes are addressed by faculty; this is followed by the OE/DE proposal being sent to the Curriculum Committee for approval; before finally going on to the IVC Academic Senate.

The OE/DE proposal process focuses on establishing how faculty will engage students throughout the course. Methods used for substantive, regular, effective academic engagement must be described in terms of the tools used and how frequent the contact is.

IVC has been working hard to increase its online course offerings and this process begins with curriculum approval. Currently, IVC has approved 101 courses for 100 percent online instruction and/or hybrid instruction and another 54 courses are currently in the process of being approved. IVC's goal is to approve and reassess its online course offerings every semester.

Professional Development

Providing faculty Professional Development opportunities is a foundational activity for the OETF and the Faculty Co-Chairs. The College is in the process of transitioning to a new LMS and professional development is essential in assuring a smooth transition; therefore, the OETF offers multiple @ONE Introduction to Teaching with Canvas trainings which focus on effective practices in online instruction; this workshop builds on a solid understanding of California Community College distance education policies and procedures, giving faculty the opportunity to actively create an effectively designed online learning unit, maximize student success, develop online policies, identify the functions of a course management system, explore dynamic online content options, evaluate online assessments, and successfully apply copyright and fair use practices to digital content. In addition to these trainings, the OETF has supported the following professional development opportunities since 2014:

Online Education Professional Development Opportunities:

- Introduction to Online Teaching with Canvas (IOTC)
- @ONE Online Training: Introduction to Online Teaching and Learning
- @ONE Online Training: Introduction to Teaching with Canvas
- Online Teaching Conference
- 4C/SD Professional Development Conference
- Academic Senate for California Community Colleges Plenary

Learning Management System Migration

The California Community Colleges have implemented the Online Education Initiative (OEI). One of the primary offerings of the OEI is a subsidized migration to a LMS that has been selected and recommended by the OEI – Canvas. Irvine Valley College began the process of exploring this opportunity in August 2015. Over the last academic year, the OETF has worked to develop a LMS decision-making process, an endeavor that has involved multiple presentations from two LMS vendors (Canvas and Blackboard), faculty participation in the Canvas “sandbox”, college-wide forums to discuss both the process and assessment of vendor demonstrations, and feedback from the Canvas Pilot Workgroup. Based on the results of these explorations, the OETF made a recommendation to the Academic Senate and the Academic Planning and Technology Committee (APTAC) to migrate from Blackboard to Canvas. In addition to providing this input to the reporting groups for OETF, the recommendation was vetted with the Technical Advisory Task Force, Budget Development and Resource Planning Committee (BDRPC), Strategic Planning and Accreditation Committee (SPAC), and District Online Education Committee (DOEC). During spring 2016, summer 2016, and fall 2016, the OEI provided professional development for faculty to learn Canvas (see below for the Professional Development Table); the OETF will continue to support professional development opportunities through the final migration phase-in. For fall 2016, the institution implemented a Canvas Pilot consisting of 51 sections, 36 faculty, and 1271 students and plans to continue to assess, expand, and support the implementation of Canvas during spring, summer, and fall 2017, with the process ending in December 2017.

Online Course Review

In order to continue to ensure rigor and quality of the College’s online and hybrid course offerings, the OETF is developing a system and rubric for evaluating online courses. The development of this process will take place primarily through discussion in the Online Education Task Force meetings. The goal is to develop a process based on the input by faculty and online education policies. Topics of discussion will include areas of the course that should be assessed including course design, accessibility, interaction and collaboration in the course, methods of assessment, and support for learners. This discussion will lead to the development of a rubric and a systematic process of course evaluation for OE/DE courses.

Table QFE.3: Online Education Action Plan

Action Plan	Measures of Progress	Responsible Party	Timeline
Faculty Professional Development for Online Education	Accessibility: Number of Accessibility Prof. Development Opportunities offered throughout the year.	Technology Services	fall 2015 through spring 2019
	Canvas: Number of completers in the @ONE Introduction to Teaching with Canvas (ITC) or Introduction to Online Teaching Using Canvas (IOTC) or similar workshops	Online Education Task Force (OETF) and Technology Services	summer 2016 through fall 2017
	Online Pedagogy – Regular, Effective and Substantive Contact: Number of completers in the @ONE Introduction to Online Teaching and Learning (IOTL) or Introduction to Online Teaching Using Canvas (IOTC) or similar workshops	Online Education Task Force (OETF) and Technology Services	spring 2016 through spring 2019
Online Course Review	Approval of Course Design Rubric	OETF, Academic Senate, APTC	spring 2016 through spring 2017

Action Plan	Measures of Progress	Responsible Party	Timeline
	Development and approval of the Online Course Review Process (OE Faculty Handbook)	OETF, TATF, Academic Senate, APTC, SPAC	spring 2016 through spring 2017
	Number of completers of training for Peer Faculty Course Reviewers	OETF	fall 2016 through spring 2019
	Number of Courses Reviewed by Faculty employing a Course Design Rubric	OETF	spring 2018 through spring 2019
	Accessibility: Number of DE Proposals and active courses validated for Section 508 compliance	Technology Services	spring 2018 through spring 2019
LMS Migration from Blackboard to Canvas	Timeline: Approval	OETF, TATF, Academic Senate, APTC, SPAC	spring 2016 through fall 2016
	Phased-In Implementation	OETF and Technology Services	fall 2016 through fall 2017
	Full Implementation of Canvas	OOI, OETF, and Technology Services	spring 2018
Distance Education Curriculum Process	DE Proposal Form Approval	OETF, Curriculum Committee, Academic Senate, APTC	fall 2014 through spring 2016

Action Plan	Measures of Progress	Responsible Party	Timeline
	Number of DE Course Proposals Approved	Technology Services (508 Compliance), Technical Review, Curriculum Committee, Academic Senate	ongoing

To meet the needs of student attending IVC online, the college community will continue to:

- **Recognize and support innovative ideas** through respectful collaboration and active engagement on the topic of OE district wide.
- **Increase professional development opportunities** for faculty and technology services staff who provide faculty online education training that focuses on student success outcomes for OE.
- **Increase student completion rates** (degrees, certificates and transfer) while preserving access, enhancing equity, and closing achievement gaps for courses and programs offered via online/hybrid modalities.

Throughout the next academic year, the IVC campus community will continue to increase opportunities for student engagement in and outside the classroom for courses and programs offered in Online Education by systematically expanding OE offerings with appropriate support, resources, and attention to quality in order to meet Strategic Planning Objective 3.3. I will also provide relevant, innovative, and appropriate workforce training, including courses and programs offered as online education.

List of Acronyms

AACC	American Association of Community Colleges Guided Pathways
AANAPISI	Asian American Native American Pacific Islander Serving Institute
AESL	Adult English as a Second Language
APTC	Academic Planning and Technology Committee
AUO	Administrative Unit Outcome
AUR	Administrative Unit Review
BARC	Budget Allocation _____ Committee
BDRPC	Budget Development and Resources Planning Committee
BOT	Board of Trustees
BPARC	Board Policy & Administrative Regulation Committee
BSI	Basic Skills Initiative
CAI	Common Assessment Initiative
COR	Course Outline of Record
DE	Distance Education
DRAC	District Resource Allocation Committee
DWIPC	District Wide Integrated Planning Committee
DWPC	District Wide Planning Council
F2F	Face to Face
GAP+4	Guarantee Admission Program (Accounting-Cal State University Fullerton)
HUGS	Higher Understanding _____

TO: Board of Trustees
FROM: Debra L. Fitzsimons, Interim Chancellor
RE: SOCCCD: Minutes of the Board of Trustees Meeting
ACTION: Approval

Minutes from:

October 24, 2016 Regular Meeting of the Board of Trustees (Exhibit A)

are submitted to the Board for review and approval.

**SOUTH ORANGE COUNTY COMMUNITY COLLEGE DISTRICT
RONALD REAGAN BOARD OF TRUSTEES ROOM - RM 145
HEALTH SCIENCES/DISTRICT OFFICES BLDG., SADDLEBACK COLLEGE**

**MINUTES OF THE BOARD OF TRUSTEES' MEETING
October 24, 2016**

PRESENT

Members of the Board of Trustees:

Timothy Jemal, President
James R. Wright, Vice President
David B. Lang, Clerk
Barbara J. Jay, Member
Marcia Milchiker, Member
T.J. Prendergast, III, Member
Terri Whitt, Member
Johnathan Forde, Student Member

Administrative Officers:

Debra Fitzsimons, Interim Chancellor
C.M. Brahmbhatt, Acting Vice Chancellor, Business Services
Robert Bramucci, Vice Chancellor, Technology and Learning Services
David Bugay, Vice Chancellor, Human Resources
Tod Burnett, President Saddleback College
Glenn Roquemore, President Irvine Valley College

CALL TO ORDER: 5:00 P.M.

1.0 PROCEDURAL MATTERS

1.1 Call to Order

1.2 Public Comments

*Members of the public may address the Board on items listed to be discussed in **closed session**. If you wish to address the board on a closed session item, please complete a yellow form entitled, "Request to Speak" and submit it to the board's Executive Assistant. These forms are available outside the board room. **Speakers are limited to two minutes each.***

RECESS TO CLOSED SESSION FOR DISCUSSION OF THE FOLLOWING:

- 1.3 Student Discipline (Education Code Section 72122)(1 matter)
- 1.4 Public Employee Employment, Discipline, Dismissal, Release (Government Code Section 54957(b).)
 - A. Public Employee Employment Part-time Custodian (Government Code Section 54957(b).) (1 matter)
 - B. Public Employee Discipline, Dismissal, Release (Government Code Section 54957(b).)(3 matters)
- 1.5 Conference with Labor Negotiators (Government Code Section 54957.6)
 - A. Police Officers Association
Agency Designated Negotiator: David P. Bugay, Ph.D.
 - B. SOCCCD Faculty Association
Agency Designated Negotiator: David P. Bugay, Ph.D.
 - C. California School Employees Association (CSEA)
Agency Designated Negotiator: David P. Bugay, Ph.D.
- 1.6 Conference with Legal Counsel (Government Code Section 54956.9)
 - A. Anticipated Litigation (Government Code Section 54956.9(d)(2), (e)(1) (4 potential cases)

RECONVENE OPEN SESSION: 6:30 P.M.

2.0 PROCEDURAL MATTERS

2.1 Actions Taken in Closed Session

On a 7 to 0 vote, the board approved a general unpaid leave of absence without benefits from November 7 through November 23, 2016 to a part-time classified employee at Saddleback College.

On a 7 to 0 vote, the board rejected the claim by Amir Tavassoli.

2.2 Invocation

Led by Trustee T.J. Prendergast, III

2.3 Pledge of Allegiance

Led by Trustee Terri Whitt

2.4 Public Comments

*Members of the public may address the Board on any item on the agenda at this time or during consideration of the item. Items not on the agenda that are within the subject matter jurisdiction of the Board may also be addressed at this time. If you wish to address the board, please complete a yellow form entitled, "Request to Speak" and submit it to the board's Executive Assistant. These forms are available outside the board room. **Speakers are limited to up to two minutes each.***

3.0 **REPORTS**

- 3.1 Oral Reports: ***Speakers are limited to up to two minutes each.***
- A. Board Reports
 - B. Chancellor's Report
 - C. College Presidents' Reports (*Written Reports included in Section 8.0*)
 - D. Associated Student Government Reports
 - E. Board Request(s) for Reports

4.0 **DISCUSSION ITEMS**

4.1 **SOCCCD: Accreditation Process**

Dr. Tod A. Burnett, President, Saddleback College, and Dr. Glenn R. Roquemore, President, Irvine Valley College, will present information on the accreditation process currently underway at the colleges.

Accreditation steering committee members and the college presidents presented updates on the accreditation self-studies underway at the colleges.

5.0 **CONSENT CALENDAR ITEMS**

All matters on the consent calendar are routine items and are to be approved in one motion unless a Board member requests separate action on a specific item, and states the compelling reason for separate action.

Trustee Whitt requested to remove items 5.1 and 5.4 and 5.5 and Trustee Prendergast requested to remove 5.7 from the consent calendar for separate discussion and action.

On a motion made by Trustee Lang and seconded by Trustee Whitt, the balance of the consent calendar was approved on a 7-0 vote.

5.1 **SOCCCD: Board of Trustees Meeting Minutes**

Approve minutes of Regular Meeting held on September 24, 2016 and Special Meeting held on October 17, 2016.

On a motion made by Trustee Whitt and seconded by Trustee Lang, this item was approved on a 7-0 vote.

5.2 **Irvine Valley College: Community Education, Spring 2017**

Approve Spring 2017 Community Education courses, presenters and compensation.

5.3 **Saddleback College: Curriculum Revised for the 2016-17 Academic Year**

Approve the proposed curriculum changes for the 2016-17 and 2017-18 academic years at Saddleback College.

- 5.4 **Saddleback College: Student Study Abroad Program To Cuba, from May 30, 2017 to June 6, 2017**
Approve the Saddleback College study abroad program to Cuba from May 30, 2017 to June 6, 2017, and directs the administration to execute the Education Tour Field Study Travel Contractor Agreement with the Travel and Education for coordinating all travel agreements.
On a motion made by Trustee Lang and seconded by Trustee Jay, this item was approved on a 7-0 vote.
- 5.5 **SOCCCD: Saddleback College: Use of the WSCA/NASPO Cisco Systems, Inc. Contract for Data Communications Products and Services, Equipment for Wireless Expansion Project, ePlus, Inc.**
Approve the use of Master Price Agreement No. AR233 awarded by the State of Utah in association with the NASPO/WSCA, and approved for usage by the State of California pursuant to the California Participating Addendum No. 7-14-70-04 for procurement of Wireless Coverage Expansion equipment from ePlus, Inc. for an amount of \$323,442.04.

On a motion made by Trustee Jemal and seconded by Trustee Prenderganst, this item was approved on a 7-0 vote.
- 5.6 **Saddleback College and Irvine Valley College: Speakers**
Approve general fund honoraria for speakers for events and/or classes at Saddleback College and Irvine Valley College.
- 5.7 **SOCCCD: Trustees' Requests for Attending Conferences**
Approve trustees' requests for attending conference(s).

On a motion made by Trustee Lang and seconded by Trustee Whitt, this item was approved on a 7-0 vote.
- 5.8 **SOCCCD: Student Out of State Travel**
Approve the colleges' student out-of-state travel for the participants, dates, locations, courses and costs as listed.
- 5.9 **SOCCCD: Auction No. 60 - Surplus Property**
Approve the sale of surplus property, Auction No. 60, and authorize the Director of Purchasing, Contracts, and Materials Management to hire a private auction firm to conduct the auction, and to dispose of items not sold at the auction.
- 5.10 **SOCCCD: Budget Amendment: Adopt Resolution No. 16-28 to Amend FY 2016-2017 Adopted Budget**
Adopt Resolution No. 16-28 to amend the FY 2016-2017 Adopted Budget.
- 5.11 **SOCCCD: Transfer of Budget Appropriations**
Ratify the Transfer of Budget Appropriations.

- 5.12 **SOCCCD: August, September and October 2016 Change Orders / Amendm**
Ratify the change orders and amendments as listed.
- 5.13 **SOCCCD: Purchase Orders and Checks**
Ratify the purchase orders and checks as listed.
- 5.14 **SOCCCD: August - September 2016 Contracts**
Ratify contracts as listed.

6.0 GENERAL ACTION ITEMS

- 6.1 **SOCCCD: Biennial Ethics Training & Trustee Travel and Compensation**
Approve annual individual travel expenditures of the chancellor and trustees and approve report of all district compensation received by each trustee during the 2015-16 fiscal year.

On a motion made by Trustee Prendergast and seconded by Trustee Wright, this item was approved on a 7-0 vote.

- 6.2 **SOCCCD: Saddleback College Access Control Project, Adopt Resolution No. 16-27, Authorizing Design-Build Delivery Method**
Adopt Resolution No. 16-27 to authorize the use of the design-build delivery method for the Saddleback College Access Control project.

On a motion made by Trustee Lang and seconded by Trustee Jay, this item was approved on a 7-0 vote.

- 6.3 **SOCCCD: Saddleback College Access Control Project, Phase 1, Hire Design-Build Consultant, Alternate Delivery Solutions, LLC**
Approve an agreement with Alternative Delivery Solutions, LLC, to provide Design-build Consultant services for the Saddleback College Access Control project in the amount of \$232,310.

On a motion made by Trustee Prendergast and seconded by Trustee Jay, this item was approved on a 7-0 vote.

- 6.4 **SOCCCD: Advanced Technology & Education Park, Utilities and Infrastructure Phase I Project, Award of Bid No. 20, Griffith Company**
Award Bid No. 20, Advanced Technology & Education Park Utilities and Infrastructure Phase I project, and approve the agreement with Griffith Company, in the amount of \$5,353,750.

The Board postponed this item until the next meeting.

- 6.5 **SOCCCD: Advanced Technology and Education Park, ATEP IVC First Building Project and Utilities and Infrastructure Phase I Project, DSA Inspection Services Agreement, The Vinewood Company, LLC**
Approve the DSA Inspection Services agreement with The Vinewood

Company, LLC for the Advanced Technology and Education Park, ATEP IVC First Building and Utilities and Infrastructure Phase I projects for a not to exceed amount of \$178,144.

On a motion made by Trustee Prendergast and seconded by Trustee Jay, this item was approved on a 7-0 vote.

- 6.6 **SOCCCD: Board Policy Revision: BP-4202 Transfer of Sick Leave for Classified Personnel, BP-4420 Enrollment Fee Reimbursement for Eligible Employees, BP-5130 Financial Aid, BP-5200 Student Health Services, BP-5625 Students in the Military**

Accept for review and study the board policies as presented.

On a motion made by Trustee Wright and seconded by Trustee Whitt, this item was approved on a 7-0 vote.

- 6.7 **SOCCCD: Academic Personnel Actions – Regular Items**
Approve New Personnel Appointments, Additional Compensation: General Fund, Additional Compensation: Categorical/Non-General Fund, Workload Banking, Resignation/Retirement/Conclusion of Employment.

A correction was made to Exhibit A, pg. 2, footnote #7. The board approval date was corrected to 10/26/2015.

On a motion made by Trustee Milchiker and seconded by Trustee Prendergast, this item was approved on a 7-0 vote with an advisory abstention vote from Student Trustee Forde.

- 6.8 **SOCCCD: Classified Personnel Actions – Regular Items**
Approve New Personnel Appointments, Authorization to Establish and Announce a Classified Position, Authorization to Increase Hours and/or months per year, Reclassification, Change of Status, Out of Class Assignments, Resignation/Retirement/Conclusion of Employment, Volunteers.

On a motion made by Trustee Milchiker and seconded by Trustee Jay, this item was approved on a 7-0 vote with an advisory abstention vote from Student Trustee Forde.

- 6.9 **SOCCCD: 2017-18 Tenure Track Hiring Authorization**
Approve Saddleback College and Irvine Valley College full-time tenure track faculty position hiring lists.

On a motion made by Trustee Prendergast and seconded by Trustee Jay, this item was approved on a 7-0 vote.

- 6.10 **SOCCCD: Adopt Resolution 16-29: Classified Employee/Position Layoff**
Adopt Resolution No.16-29 to approve the reduction and/or discontinuance of classified service.

On a motion made by Trustee Lang and seconded by Trustee Wright, this item was approved on a 7-0 vote.

6.11 **SOCCCD: Chancellor Position Description**

Approve modifications to the Chancellor's position description.

On a motion made by Trustee Whitt and seconded by Trustee Milchiker, this item was approved on a 7-0 vote.

7.0 REPORTS

7.1 **SOCCCD, Saddleback College, Irvine Valley College, and Advanced Technology and Education Park: Vision and Mission Statements**

Annual review of the district and college vision and mission statements.

At the request of the board president, this item was postponed until the next board meeting.

7.2 **Saddleback College and Irvine Valley College: Speakers**

A listing of speakers for events and/or classes at Saddleback College and Irvine Valley College.

7.3 **SOCCCD: Basic Aid Report**

Report on projected receipts and approved projects.

7.4 **SOCCCD: Facilities Plan Status Report**

Status of current construction projects.

7.5 **SOCCCD: Monthly Financial Status Report**

Report for the period ending September 30, 2016.

7.6 **SOCCCD: Quarterly Financial Status Report**

Report for the period ending September 30, 2016.

7.7 **SOCCCD: Retiree (OPEB) Trust Fund**

Report is for the period ending September 30, 2016.

8.0 REPORTS FROM ADMINISTRATION AND GOVERNANCE GROUPS

*Reports by the following individuals and groups may be written and submitted through the docket process prior to distribution of the Board agenda packet. **Speakers are limited to two minutes each.***

- A. Saddleback College Academic Senate
- B. Faculty Association
- C. Irvine Valley College Academic Senate

- D. Vice Chancellor, Technology and Learning Services
- E. Vice Chancellor, Human Resources
- F. Vice Chancellor, Business Services
- G. Irvine Valley College Classified Senate
- H. California School Employees Association
- I. Saddleback College Classified Senate
- J. Police Officers Association

9.0 ADDITIONAL ITEMS

ADJOURNMENT (or continuation of closed session if required): **9:00 P.M.**

The meeting was adjourned at 8:01 p.m. in memory of Irvine Valley College student Joshua Thatcher and two long time faculty members from Saddleback College, Dr. Cal Dellefield and James Gordon Lindblad.

Debra L. Fitzsimons, Interim Chancellor

TO: Board of Trustees

FROM: Debra L. Fitzsimons, Interim Chancellor

RE: Saddleback College: New Program for the 2016-17 Academic Year and New, Revised, and Deleted Courses for the 2017-18 Academic Year.

ACTION: Approval

BACKGROUND

Saddleback College's Curriculum Committee and Academic Senate review and approve the curriculum on a regular basis. Subsequently, the curriculum is recommended to the college president or designee for approval.

STATUS

Saddleback College proposes revised curriculum for the College for the 2016-17 and 2017-18 academic years. Exhibit A includes a new Associate Degree for Transfer as required by SB 1440 (2010) and SB 440 (2013) for the 2016-17 academic year. Exhibit B includes new, revised, and deleted courses for the 2017-18 academic year. The new and revised curriculum is recommended by the Curriculum Committee and includes collegial consultation with the Academic Senate of Saddleback College pursuant to Title 5, Sections 53200 et seq.

RECOMMENDATION

The Interim Chancellor recommends that the Board of Trustees approves the proposed curriculum changes for the 2016-17 and 2017-18 academic years at Saddleback College as listed in Exhibits A and B.

SADDLEBACK COLLEGE
NEW PROGRAMS
ACADEMIC YEAR 2016-2017

New

**Associate in Science in Nutrition and
Dietetics for Transfer Degree**

The Nutrition program prepares students for a wide variety of employment opportunities involving the applications of fundamentals of normal nutrition. Employment possibilities include public agencies, day-care centers for the young and the elderly, food co-ops, recreation work, pregnancy clinics, education (such as preschool and elementary school), health clubs, gym and figure salons, health food stores and nutritional supplement sales, and drug abuse clinics. The program offers coursework for professional improvement, and some courses can be utilized as transfer courses for students pursuing a Bachelor's degree.

Students who complete the Associate in Science in Nutrition and Dietetics for Transfer degree will receive priority admission to the California State University system, though admission to a specific campus is not guaranteed. While an associate degree may support attempts to gain entry-level employment or promotion, a baccalaureate or higher degree is recommended for those considering professional careers, which can be achieved through transfer.

Program Student Learning Outcomes

Students who complete this program will be able to:

- Identify components of a healthy diet and lifestyle that lead to optimal health and chronic disease prevention.
- Analyze an individual's nutritional status and make appropriate dietary recommendations.
- Identify and analyze credible research on nutrition-related topics.

The following is required for all AA-T or AS-T degrees:

1. Completion of 60 semester units or 90 quarter units that are eligible for transfer to the California State University, including both of the following:

- a. The Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.
 - b. A minimum of 18 semester or 27 quarter units in a major or area of emphasis, as determined by the community college district.
2. Obtainment of a minimum grade point average of 2.0. Students must earn a "C" or better in all courses required for the major or area of emphasis.

Required Core (21 units)

<i>Course ID</i>	<i>Title</i>	<i>Units</i>
FN 50	Fundamentals of Nutrition	3
PSYC 1	Introduction to Psychology	3
or		
PSYC 1H	Honors Introduction to Psychology	3
CHEM 1A*	General Chemistry	5
and		
CHEM 1B*	General Chemistry	5
or		
CHEM 2*	General Chemistry Principles	5
and		
CHEM 1B*	General Chemistry	5
BIO 15*	General Microbiology	5

List A: Select one course (3-5 units)

CHEM 12A*	Organic Chemistry	5
BIO 11*	Human Anatomy	4
BIO 12*	Human Physiology	4
MATH 10*	Introduction to Statistics	3
PSYC 44*	Statistics for the Behavioral Sciences	3

List B: Select one course (3 units)

FN 110*	Food Preparation Essentials	3
SOC 1	Introduction to Sociology	3

Total Units for the Major

27-29

*Course has a prerequisite, corequisite, limitation, or recommended preparation; see course description.

TO: Board of Trustees

FROM: Debra L. Fitzsimons, Interim Chancellor

RE: Saddleback College: Community Education, Spring 2017

ACTION: Approval

BACKGROUND

The South Orange Community College District is known for offering high-quality, non-credit programs and fee-based classes. Saddleback College performs an important services and fulfills a vital part of their mission by offering these classes and programs through Community Education. The Community Education programs, presenters, and accompanying compensation require the approval of the Board of Trustees.

STATUS

A variety of educational and recreational events have been planned by Saddleback College Community Education to serve the community during Spring 2017. Expenses for conducting these classes will be paid by the income from participant fees.

RECOMMENDATION

The Chancellor recommends that the Board of Trustees approve the Community Education courses, presenters, and compensation.

RE: Saddleback College: Grant Acceptance, National Science Foundation Inclusion across the Nation of Communities of Learners of Underrepresented Discoverers in Engineering and Science (NSF INCLUDES)

ACTION: Approval

BACKGROUND

On June 24, 2016 Saddleback College submitted a grant application for the National Science Foundation pilot grant program NSF INCLUDES. Saddleback in partnership with 13 other community colleges in CA and Maryland, UCLA Higher Education Research Institute, Georgetown University, Growth Sector, JPL and other STEM employers proposed the development and broad implementation of the STEM Core Initiative (SCI) in support of student success in STEM education and career pathways.

STATUS

In September 2016, Saddleback College was notified by the National Science Foundation of its intent to award the college \$299,981 for the period of October 1, 2016 through September 30, 2018 to fund the project efforts as presented in EXHIBIT A. In order to accomplish the goals identified in EXHIBIT A, Saddleback College as project lead will work collaboratively to promote the SCI within a consortium of community colleges, universities, national labs, non-profit workforce intermediaries and other STEM employers to implement the STEM Core Initiative program throughout the nation. Principal Investigator Dr. Jim Zoval will lead project efforts with support from the division of Math, Science and Engineering and the Saddleback College Grants Office. Grant funds will be utilized for providing administrative and management support for SCI activities.

RECOMMENDATION

The Interim Chancellor recommends that the Board of Trustees accept this award of \$299,981 from the National Science Foundation for the NSF INCLUDES pilot grant in support of the STEM Core Initiative for the period of October 1, 2016 through September 30, 2018.

RE: Saddleback College and Irvine Valley College: Speakers

ACTION: Approval

BACKGROUND

Outside speakers may be invited by administrators, faculty members, or recognized student groups to speak at events open to the public.

STATUS

Administrative Regulation 6140 requires that the Board of Trustees be notified, at each board meeting, of speakers who have been invited to speak and/or who have spoken at the colleges and/or ATEP since the last board meeting. Travel expenses and/or honorarium for speakers must be recommended by the Chancellor or college president and submitted to the Board prior to reimbursement of travel expenses or payment of honorarium.

RECOMMENDATION

The Chancellor recommends that the Board of Trustees approve the general fund honoraria as shown in Exhibit A.

RE: SOCCCD: Irvine Valley College and Saddleback College, Amendment No. 2, Digital Catalog Software, Digital Architecture

ACTION: Approval

BACKGROUND

On October 27, 2014, the Board of Trustees approved a one year agreement with the option for four one-year extensions with Digital Architecture, for the Digital Catalog Software Services in an amount not to exceed \$135,856 the first year. On February 22, 2016 the board approved the first extension through November 19, 2016.

STATUS

Saddleback and Irvine Valley College staff has requested the district renew the Digital Catalog Software Services agreement (EXHIBIT A) for a one-year extension beginning November 20, 2016 and ending November 19, 2017. Fees are \$9,817 for Irvine Valley College and \$15,676 for Saddleback College for a total annual contract amount of \$25,493.

Funding is available through general funds at each college for the on-going operations.

RECOMMENDATION

The Chancellor recommends that the Board of Trustees approve Amendment No. 2 (EXHIBIT A) with Digital Architecture for a one-year extension beginning November 20, 2016 and ending November 19, 2017, in an amount not to exceed \$25,493 for annual operational fees.

**AMENDMENT No. 2
TO DIGITAL CATALOG SOFTWARE AGREEMENT
FOR SOUTH ORANGE COUNTY COMMUNITY COLLEGE DISTRICT**

November 14, 2016

THIS AMENDMENT shall modify the original agreement dated November 20, 2014, by and between the SOUTH ORANGE COUNTY COMMUNITY COLLEGE DISTRICT, hereinafter referred to as "DISTRICT", and Digital Architecture, PO Box 7791, Lakeland, FL 33807, hereinafter referred to as "VENDOR".

WHEREAS, Item 8, Term, of the original agreement indicates the Agreement shall be for one (1) year from the executed date and establishes that the term of the Agreement between the DISTRICT and VENDOR may be extended upon mutual agreement of the parties; and

WHEREAS, both colleges have requested that the DISTRICT amend the agreement to extend the term for a one-year period with a new termination date of November 19, 2017; and

WHEREAS, the VENDOR is able and willing to extend services for this additional timeframe; and

WHEREAS, Schedule C of the Software License and Hosting Agreement Payment Schedule indicates the yearly hosting, support and upgrades for Saddleback and Irvine Valley College was \$25,115 with an increase to \$25,493 at the first renewal; and

WHEREAS, the renewal cost for Saddleback and Irvine Valley College is \$25,493; and

NOW, THEREFORE, the Parties agree as follows:

1. TERM

The term of the agreement is hereby extended from November 20, 2016 to November 19, 2017 under the same terms and conditions of the original agreement.

2. OPERATIONAL COST ADJUSTMENT

The yearly hosting, support and upgrades cost is \$9,817 for Irvine Valley College and \$15,676 for Saddleback College for a total contract value of \$25,493.

IN WITNESS HEREOF, the Parties have executed this Amendment as of the date set forth above.

RE: SOCCCD: Irvine Valley College, Award of Bid: Chemistry Glassware, Bid No. 331

ACTION: Approval

BACKGROUND

South Orange County Community College District invites bids for anticipated chemistry glassware which are purchased annually in bulk to secure volume discounts. Items are bid separately and each vendor may bid on any and all items.

STATUS

On September 28, and October 5, 2016, SOCCCD ran a newspaper advertisement soliciting bids for Bid No. 331, Chemistry Glassware. Additional marketing efforts included placing a copy of the bid on the district website and notifying twelve prospective vendors. Ten vendors responded and their bids were opened October 14, 2016. Seven vendors submitted low bids on specific items as shown on (EXHIBIT A) for a total amount of \$94,162.84, including sales tax.

Irvine Valley College staff reviewed the bid and recommended to award the bid as indicated. Bid details are available in the district purchasing department.

Funds are budgeted in the colleges' general fund.

RECOMMENDATION

The Interim Chancellor recommends that the Board of Trustees award Bid No. 331 for Chemistry Glassware for FY 2016-2017 for a total amount of \$94,162.84 to the vendors listed on (EXHIBIT A) with an option for a two-year renewal period.

RE: SOCCCD: Trustees' Requests for Attending Conferences

ACTION: Approval

BACKGROUND

The Orange County Department of Education requires that all travel/mileage expenses claimed by Trustees for official college business be approved by the Board of Trustees as well as their requests to attend upcoming conferences and meetings.

STATUS

The official trips reported in Exhibit A require Board approval for payment by the County of Orange.

RECOMMENDATION

The Chancellor recommends that the Board of Trustees approve/ratify the Trustees' requests for attending conference(s) as shown in Exhibit A. The schedule of events is included in Exhibit B.

COMMUNITY COLLEGES: AMERICA'S NORTH STAR

In an ever changing world, community colleges are constant and dependable, responding to the needs of the nation's citizenry, and the changing economy. For this reason, we selected "**Community Colleges: America's North Star**" as the theme of the 2017 Annual Convention. In spite of the changing politics of the country, community colleges will always remain that fixed point by which people can set their compasses to navigate change successfully. This year's convention tracks are:

- College Readiness and Completion
- Faculty Engagement
- The American Skills Gap
- Organizational Strategy
- Public and Private Investments
- Policy and Governance
- Leadership Development and High Performance Culture

RE: SOCCCD: District-wide Sustainability/Energy Plan Consultant Services, Harley Ellis Devereaux Corporation

ACTION: Approval

BACKGROUND

On June 22, 2015, the Board of Trustees allocated basic aid funding for a district-wide Sustainability/Energy plan. A professional consultant is required to assist the district with plan development, create scopes of work, and provide advice to maximize best practices, align with energy savings programs and recommend procurement methods.

STATUS

On July 18 and July 25, 2016, SOCCCD ran a newspaper advertisement for consideration of district-wide Sustainability/Energy Plan Consultant Services. Additional marketing efforts included placing a copy of the "Request for Qualifications and Proposals" (RFQ&P) on the district's website and notifying firms known to provide these services.

On August 11, 2016, nine firms provided responses (EXHIBIT A). District and college staff evaluated the submittals and interviews followed on August 24 and August 25, 2016. The evaluation committee recommends award to Harley Ellis Devereaux Corporation (EXHIBIT B) in the amount of \$201,695 as best value to the district.

Basic aid funds for these services are available within the approved project budget of \$240,000.

RECOMMENDATION

The Interim Chancellor recommends that the Board of Trustees approve the district-wide Sustainability/Energy Plan Consultant Services agreement (EXHIBIT B) with Harley Ellis Devereaux Corporation, in the amount of \$201,695.

AGREEMENT – SUSTAINABILITY/ENERGY PLAN CONSULTANT SERVICES, SOCCCD, HARLEY ELLIS DEVEREAUX CORPORATION

This AGREEMENT is made and entered into this 14th day of November in the year 2016 between **South Orange County Community College District**, 28000 Marguerite Parkway, Mission Viejo, California 92692, hereinafter referred to as "DISTRICT", and Harley Ellis Devereaux Corporation, hereinafter referred to as "CONSULTANT";

WHEREAS, DISTRICT desires to obtain CONSULTANT services for South Orange County Community College District, Sustainability/Energy Plan, hereinafter referred to as "PROJECT"; and

WHEREAS, CONSULTANT is fully licensed to provide CONSULTANT services in conformity with the laws of the State of California;

NOW, THEREFORE, the parties hereto agree as follows:

ARTICLE 1 CONSULTANT'S SERVICES AND RESPONSIBILITIES

- 1.1. **Services.** The CONSULTANT'S services shall consist of those services performed by the CONSULTANT and CONSULTANT'S employees as enumerated in this AGREEMENT.
- 1.2. **Standard of Care.** CONSULTANT shall provide the Services and authorized Additional Services using its best professional skill and judgment, acting with due care and in accordance with professional standards of care, the terms of this Agreement, and all applicable laws, codes, rules, regulations or ordinances. CONSULTANT'S services shall be provided and completed promptly and in such a manner as to avoid hindrance, interruption, or delay to the orderly progress and timely completion of Project. CONSULTANT shall without additional compensation, correct or revise any errors or omissions in its studies, reports, and other services.
- 1.3. **Key Individual Assignment.** The CONSULTANT has been selected to perform the work herein because of the skills and expertise of key individuals. The CONSULTANT shall designate Brent Miller, as Project Executive, and a management team of Bharat Patel as Project Manager and Dee Patel as Senior Project Consultant. So long as their performance continues to be acceptable to the DISTRICT, these named individuals shall remain in charge of the PROJECT. Additionally, the CONSULTANT must furnish the name and obtain approval after a resume' review of all other key people in CONSULTANT'S firm that will be associated with the PROJECT .
- 1.4. **Replacement of Key Individual.** If the designated project manager or any other designated lead or key person fails to perform to the satisfaction of the DISTRICT, then upon written notice the CONSULTANT will have 10 working days to remove that person from the PROJECT and replace that person with one acceptable to the DISTRICT after review of resume' and/or

interview. A project manager and all lead or key personnel must also be designated by the CONSULTANT and are subject to all conditions previously stated in this paragraph

- 1.5. **Relationship of CONSULTANT to Other Project Participants.** CONSULTANT'S services hereunder shall be provided in conjunction with applicable contracts between the DISTRICT and others providing services in connection with the PROJECT. The CONSULTANT is responsible for the adequacy and sufficiency of the contents of documents for the PROJECT. The CONSULTANT shall perform its duties in accordance with its contract(s) with the DISTRICT. CONSULTANT shall coordinate all work with DISTRICT as necessary to complete contract requirements
- 1.6. **Project Schedule.** The CONSULTANT acknowledges that all time limits stated in this Agreement and associated work orders are of the utmost importance to DISTRICT. The CONSULTANT shall submit for the DISTRICT's approval a schedule for the performance of the CONSULTANT'S services. The schedule may be adjusted as the PROJECT proceeds by mutual written agreement of the parties and shall include allowances for time required for the DISTRICT's review and for approval by authorities having jurisdiction over the PROJECT. The time limits established by this schedule shall not, except for reasonable cause, be exceeded by the CONSULTANT .

ARTICLE 2 SCOPE OF CONSULTANT'S SERVICES

- 2.1. **Services.** The District is interested in developing Sustainability/ Energy Plans for the Advanced Technology Education Park, Irvine Valley College and Saddleback College that use the California Community College's Sustainability Plan Guidebook (Guidebook Plan) as a point of departure to furthering SOCCCD Board Policy 3006. Sustainability/ Energy Plan development includes working with campus committees, raising awareness and making recommendations concerning the conservation of energy and other resources. In continuing efforts to be a responsible partner and steward for managing its resources, the District desires to create and establish Sustainability Plans to further its vision, goals and objectives.

It is the intent of the District to utilize the successful Sustainability/ Energy Consultant as a resource for sustainability and energy planning including consultation services for a period of up to five years, consisting of a one-year agreement with up to four one-year extensions.

The first task will be two-fold: 1). To develop Sustainability/ Energy Plans related to capital improvement projects including integrating best practices into projects identified in the latest Five Year Plan and 2) to develop the criteria necessary to complete the work of incorporating Sustainability/ Energy plans into scheduled maintenance projects, other operational issues and all other components identified within the State Chancellor's Guidebook. The scope of work will be divided into two sequential phases at each of the District's three campuses during each phase:

Phase One: Develop a plan supporting the design, construction and life cycle consideration of energy efficient buildings and utility systems, including water conservation and solid waste reduction/management and the potential for on-site generation and renewable energy in general and more specifically as these issues relate to best practices for projects identified in the District's most recent Five Year Plan.

Phase Two: Develop the criteria necessary for developing and implementing a plan focusing on campus organizational policies and procedures that support sustainability, student and curriculum development, sustainable transportation, solid waste management and purchasing policies and programs, campus and community outreach and awareness and creation of a climate action plan. Utilizing the State Community College District Sustainability Guidebook, assist the District in developing Sustainability Plans as well as Implementation Programs and Plans Checklists for each of the District's three facilities.

1. Perform the following Tasks and Activities:

- a. Review and collect existing district data, energy audits and other reports to establish baseline information. Determine what information is useful, what data gaps may exist and items the District may be in need of addressing. Facilitate the step by step process of guiding the District through the Guidebook Plan in order to establish the District's position and/or strategy to address each section of the Guidebook Plan in accordance with phasing and in an appropriate fashion.
- b. Conduct Project Planning, Kick-Off Meetings, Steering Committee Meetings.
- c. Confirm Vision, Goals, Criteria and Timelines (Section 3 of the Guidebook).
- d. Define and Prioritize Potential Programs and Projects (Section 4 of the Guidebook). Outline Strategies to meet the Vision and Goals, including the Programs and Projects once identified and prioritized. For Programs identified, the Consultant is to include specific strategies for implementation and estimates of costs to execute them.
- e. Establish Performance Measurement and Reporting Protocols (Section 5 of the Guidebook)

2. Develop a draft report to be presented to the Steering Committee at each of the District's three facilities including Action Plans and Implementation Checklists as deemed appropriate by the District. Identify any items, activities or projects completed by the District within the prior three years and current project which apply toward meeting the goals of the Sustainability/ Energy Plan as well as new projects that would augment those defined in the Five Year Plan. The committees will provide feedback within three weeks of the presentations. The final report will incorporate comments received.

3. The Final Sustainability Plans to be presented to the steering committee at each of the District's three facilities as well as provided in both word or acceptable alternate and pdf format.

Schedule. The Sustainability/ Energy Plan Services effort is expected to begin upon Board approval at the September Board meeting with a six month duration for the initial work ending no later than March 31, 2017.

Tasks. The following are the expected tasks and deliverables associated with the Sustainability/ Energy Plan Services effort. Each task will be accomplished during each of Phases One and Two as discussed under Services above. Phases one and two are to be performed sequentially.

1. Task 1: Project Initiation

Meet with ATEP, Irvine Valley College and Saddleback College steering committees to develop and finalize a detailed work plan and schedule which at a minimum will establish meeting and presentation schedules, clarify roles and responsibilities of both staff and consultant teams, and include an evaluation methodology, in accordance with Sustainability Plan Consultant Services terms and conditions and appropriate to meet the highest standard for the preparation of Sustainability Plans.

Deliverables:

- a) Meeting notes
- b) Final work plan and project schedule
- c) Roles and Responsibilities Matrix
- d) Evaluation methodology

2. Task 2: Research and Analysis Phase

Review available background materials and any other relevant information relating to the project including, but not limited to:

- Campus Building Profiles
- Energy Audits

Meet with staff members most knowledgeable about the Project.

Deliverables:

- a) Summary of meeting notes with College representatives and key stakeholders
- b) Draft and final versions of Research and Analysis findings

3. Task 3: Implementation

Based upon comments and information received through Task 2, continue work identified under "Services" above.

- 2.2. **Technical Qualifications.** Demonstrated experience in development of Sustainability/ Energy Plans, experience with the Community College District Sustainability Guidebook and knowledge of sustainability practices, programs, activities, projects, including monitoring and verification practices.
- 2.3. **Qualified Personnel.** The CONSULTANT shall provide enough qualified personnel to properly perform services required under this AGREEMENT and DISTRICT shall have the right to remove any of CONSULTANT'S personnel from the PROJECT.
- 2.4. **Regulatory Compliance.** The CONSULTANT shall comply with all applicable federal, state and local laws, statutes, ordinances, codes, rules and regulations currently existing and as amended, enacted, issued or adopted in the future and which are applicable to the PROJECT.
- 2.5. **Associated Regulatory Codes.** The CONSULTANT shall prepare and submit to DISTRICT an outline of applicable provisions of regulations that apply to any PROJECT.
- 2.6. **Project Initiation Phase.**
 - a. Participate in a general Project kick-off meeting to include the CONSULTANT'S and DISTRICT staff.
 - b. Before beginning work, the CONSULTANT shall submit to the DISTRICT a written preliminary estimate of the total PROJECT cost and shall advise the DISTRICT, in writing, of any adjustments to the estimate of PROJECT Cost.
 - c. CONSULTANT must respond to/incorporate DISTRICT comments during the various PROJECT phases.
- 2.7. **Coordination for Government Authorities.** The CONSULTANT shall file documents required for the approval of governmental authorities having jurisdiction over the PROJECT.
- 2.8. **Evaluate Performance.** The CONSULTANT shall evaluate the performance of associates under the requirements of the PROJECT when requested in writing by the DISTRICT.
- 2.9. **Coordination of Others.** The CONSULTANT may be asked to coordinate PROJECT performed by separate contractors or by the DISTRICT's own employees.

ARTICLE 3 ADDITIONAL CONSULTANT'S SERVICES

- 3.1. **Additional Services.** Additional services are not included in the Services set forth previously. If the DISTRICT requests in writing any of the Additional Services, CONSULTANT shall be compensated for the same in accordance with the provisions of the Agreement relating to Additional Services and the amounts indicated in Exhibit A for Additional Services. The Board of Trustees of the District must approve an amendment to this Agreement, fully executed, prior to CONSULTANT performing any Additional Services. The CONSULTANT shall request

payment for Additional Services in a separate line item on the same invoice submitted for Services in a format pre-approved by the DISTRICT

- 3.2. **Notification and Authorization.** CONSULTANT shall notify the DISTRICT in writing of the need for additional services required due to circumstances beyond the CONSULTANT'S control. CONSULTANT shall obtain written authorization from the DISTRICT before rendering such services. Compensation for such services shall be compensated based on attached standard hourly rates. Such services shall include:
- a. **Regulatory Revisions.** Making material revisions in documents when such revisions are required by the enactment or revision of laws, rules or regulations subsequent to the preparation of such documents.
 - b. **Scope Change after Phase Approvals.** Providing services required because of significant changes made in the PROJECT after approval of each phase of the work including, but not limited to, size, quality, complexity, or the DISTRICT's schedule, except for services required under changes related to design errors or omissions.
 - c. **Legal Services.** Providing services in connection with an arbitration proceeding or legal proceeding except where the CONSULTANT is a party thereto.
 - d. **Consultant Coordination.** Providing services, other than coordination and incorporation of information into the design documents, in connection with the work of consultants retained by the DISTRICT.

ARTICLE 4 TERMS OF SERVICE

- 4.1. **Time is of the Essence.** Time is of the essence in the performance of each Party's obligations under this Agreement, including without limitation CONSULTANT's performance of the service required hereunder and DISTRICT's payment of all sums due to CONSULTANT .
- 4.2. **Term.** Services under this Agreement shall be diligently performed by the CONSULTANT for 4 months.
- 4.3. **Billing Rate.** Should services be necessary after the expiration of contract duration, they can be provided in accordance with the Billing Rates as provided in EXHIBIT A.
- 4.4. **Suspension Notice.** DISTRICT may suspend this Agreement at any time without penalty by written notice to CONSULTANT of such suspension.

ARTICLE 5 INDEMNITY AND INSURANCE

- 5.1. To the fullest extent permitted by law, CONSULTANT agrees to indemnify and hold the DISTRICT and its Board of Trustees, officers, employees and agents harmless from all liability arising out of:

- a. **Workers Compensation and Employer's Liability.** Any and all claims under workers' compensation acts and other employee benefit acts with respect to CONSULTANT'S employees or CONSULTANT'S subcontractor's employees arising out of CONSULTANT's work under this agreement; and
 - b. **General Liability.** If arising out of, pertaining to, or relating to the negligence, recklessness, or willful misconduct of the CONSULTANT, the CONSULTANT shall indemnify and hold the DISTRICT harmless from any liability for damages for (i) death or bodily injury to person; (ii) injury to, loss or theft of property; (iii) any failure or alleged failure to comply with any provision of law; or (iv) any other loss, damage or expense arising under either i, ii, and iii above, sustained by the CONSULTANT or the DISTRICT, or any person, firm or corporation employed by the CONSULTANT or the DISTRICT upon or in connection with the Project, except for liability resulting from the sole or active negligence, or willful misconduct of the DISTRICT, its officers, employees, agents or independent CONSULTANTS who are directly employed by the DISTRICT.
 - c. The CONSULTANT, at its own expense, cost and risk, shall defend any and all claims, actions, suits, or other proceedings that may be brought or instituted against the DISTRICT (other than professional negligence covered by section below, its officers, agents, or employees, that arise out of, pertain to, or relate to the negligence, recklessness, or willful misconduct of the CONSULTANT, and shall pay or satisfy any judgment that may be rendered against the DISTRICT, its officers, agents, or employees, in any action, suit or other proceedings as a result thereof; and
- 5.2. **Purchase and Maintain Insurance.** CONSULTANT shall purchase and maintain project specific insurance with an insurer or insurers, qualified to do business in the State of California and acceptable to DISTRICT policies of insurance, which will protect CONSULTANT and DISTRICT from claims which may arise out of or result from CONSULTANT'S actions or inactions relating to the AGREEMENT, whether such actions or inactions be by themselves or by any subcontractor or by anyone directly or indirectly employed by any of them, or by anyone for whose acts any of them may be liable. The aforementioned insurance shall include coverage for:
- a. **Statutory Workers' Compensation and Employers' Liability.** CONSULTANT shall purchase and maintain Workers' Compensation Insurance covering claims under workers' or workmen's compensation, disability benefit and other similar employee benefit acts under which CONSULTANT may be liable. CONSULTANT shall purchase and maintain Employer's Liability Insurance covering bodily injury (including death) by accident or disease to any employee which arises out of the employee's employment by CONSULTANT. The Employer's Liability Insurance required of

CONSULTANT hereunder may be obtained by CONSULTANT as a separate policy of insurance or as an additional coverage under the Worker's Compensation Insurance required to be obtained and maintained by CONSULTANT hereunder.

- b. **Comprehensive general and auto liability.** CONSULTANT shall purchase and maintain Commercial General Liability and Property Insurance as will protect CONSULTANT from the types of claims set forth below which may arise out of or result from CONSULTANT'S services under this Agreement and for which CONSULTANT may be legally responsible: (i) claims for damages because of bodily injury, sickness or disease or death of any person other than CONSULTANT'S employees; (ii) claims for damages insured by usual personal injury liability coverage which are sustained (a) by a person as a result of an offense directly or indirectly related to employment of such person by CONSULTANT, or (b) by another person; (iii) claims for damages, other than to the Work itself, because of injury to or destruction of tangible property, including loss of use resulting therefrom; (iv) claims for damages because of bodily injury, death of a person or property damages arising out of ownership, maintenance of use of a motor vehicle; (v) contractual liability insurance applicable to CONSULTANT'S obligations under this Agreement; and (vi) for completed operations.

Comprehensive general and auto liability insurance with limits of not less than 1,000,000 combined single limit, bodily injury and property damage liability per occurrence, including:

1. owned, non-owned and hired vehicles;
2. blanket contractual;
3. broad form property damage;
4. products/completed operations; and
5. personal injury.

- c. **Professional liability insurance.** Professional liability insurance, including contractual liability, with limits of 1,000,000. Such insurance shall be maintained during the term of this AGREEMENT and renewed for a period of at least 5 years thereafter if available to the professional and/or at rates consistent with the time of execution of this AGREEMENT adjusted for inflation. In the event that CONSULTANT subcontracts or assigns any portion of his/her duties, he/she shall require any such subcontractor to purchase and maintain insurance coverage as provided in this subparagraph.
- d. **Additional Insured.** Each policy of insurance required in (a) and (b) above shall name DISTRICT and its officers, agents and employees as additional insureds; shall state

that, with respect to the operations of CONSULTANT hereunder, such policy is primary and any insurance carried by DISTRICT is excess and non-contributory with such primary insurance; shall state that not less than thirty (30) days' written notice shall be given to DISTRICT prior to cancellation; and, shall waive all rights of subrogation. CONSULTANT shall notify DISTRICT in the event of material change in, or failure to renew, each policy.

5.3. **State Authorized Insurers.** All policies of insurance required hereunder shall be issued by insurer(s) authorized to issue insurance by the State of California and to the reasonable satisfaction of the DISTRICT. Coverages under each policy of insurance, whether by endorsement or otherwise, shall provide that such policy will not be materially modified, canceled or allowed to expire without at least thirty (30) days advance written notice to the District.

5.4. **Insurance Evidenced.** Prior to commencing work, CONSULTANT shall deliver to DISTRICT certificates of insurance as evidence of compliance with the requirements herein. In the event CONSULTANT fails to secure or maintain any policy of insurance required hereby excepting professional liability, DISTRICT may, at its sole discretion, secure such policy of insurance in the name of and for the account of CONSULTANT, and in such event CONSULTANT shall reimburse DISTRICT upon demand for the cost thereof.

5.5. **Coverage Amounts**

Insurance Policy	Minimum coverage Amount
Workers Compensation	In accordance with applicable law
Employers Liability	One Million dollars (\$1,000,000)

ARTICLE 6 COMPENSATION TO THE CONSULTANT

6.1. **Contract Price for Services.** The Contract Price for the CONSULTANT's performance of the Services under this Agreement shall consist of the lump sum price of \$201,695 distributed as follows:

ATEP PHASE ONE:

a.	Task 1: Project Initiation Phase	\$1,604
b.	Task 2: Research and Analysis Phase	\$1,604
c.	Task 3: Implementation	
	Mission Statement, Goals and Priorities	\$4,011

	Programs and Projects for Implementation	\$3,209
	Performance Measurement and Reporting Protocols	\$4,011
	Draft Report	\$802
	Final Sustainability/ Energy Plan	\$802
d.	SUB-TOTAL	\$16,043

ATEP PHASE TWO:

a.	Task 1: Project Initiation Phase	\$4,813
b.	Task 2: Research and Analysis Phase	\$4,813
c.	Task 3: Implementation	
	Mission Statement, Goals and Priorities	\$12,032
	Programs and Projects for Implementation	\$9,626
	Performance Measurement and Reporting Protocols	\$12,032
	Draft Report	\$2,406
	Final Sustainability/ Energy Plan	\$2,406
d.	SUB-TOTAL	\$48,128

IRVINE VALLEY COLLEGE PHASE ONE:

a.	Task 1: Project Initiation Phase	\$1,705
b.	Task 2: Research and Analysis Phase	\$1,705
c.	Task 3: Implementation	
	Mission Statement, Goals and Priorities	\$4,263
	Programs and Projects for Implementation	\$3,410
	Performance Measurement and Reporting Protocols	\$4,263
	Draft Report	\$853
	Final Sustainability/ Energy Plan	\$853
d.	SUB-TOTAL	\$17,052

IRVINE VALLEY COLLEGE PHASE TWO:

a.	Task 1: Project Initiation Phase	\$5,115
b.	Task 2: Research and Analysis Phase	\$5,115

c.	Task 3: Implementation	
	Mission Statement, Goals and Priorities	\$12,788
	Programs and Projects for Implementation	\$10,788
	Performance Measurement and Reporting Protocols	\$12,788
	Draft Report	\$2,558
	Final Sustainability/ Energy Plan	\$2,558
d.	TOTAL	\$51,710

SADDLEBACK COLLEGE PHASE ONE:

a.	Task 1: Project Initiation Phase	\$1,705
b.	Task 2: Research and Analysis Phase	\$1,705
c.	Task 3: Implementation	
	Mission Statement, Goals and Priorities	\$4,263
	Programs and Projects for Implementation	\$3,410
	Performance Measurement and Reporting Protocols	\$4,263
	Draft Report	\$853
	Final Sustainability/ Energy Plan	\$853
d.	TOTAL	\$17,052

SADDLEBACK COLLEGE PHASE TWO:

a.	Task 1: Project Initiation Phase	\$5,115
b.	Task 2: Research and Analysis Phase	\$5,115
c.	Task 3: Implementation	
	Mission Statement, Goals and Priorities	\$12,788
	Programs and Projects for Implementation	\$10,788
	Performance Measurement and Reporting Protocols	\$12,788
	Draft Report	\$2,558
	Final Sustainability/ Energy Plan	\$2,558
d.	TOTAL	\$51,710

CUMULATIVE TOTAL: **\$201,695**

- 1.2. **Price Inclusions.** The Contract Price is inclusive of personnel expenses (inclusive of all benefits and burdens), fees and personnel expenses of any sub-consultant or subcontractor to the CONSULTANT, travel for personnel to and from the Site, travel within the Counties of Los Angeles, Orange, Riverside, San Diego, San Bernardino and Ventura, insurance and all other overhead/administrative expenses or costs associated with performance of the Services, except for Allowable Reimbursable Expenses described in this Agreement. At no time shall meals be considered a reimbursable expense. The items and services identified in EXHIBIT A are services included in the CONSULTANT'S compensation for Services as set forth in Article 2.
- 1.3. **CONSULTANT Monthly Billing Statements.** CONSULTANT shall submit monthly billing invoices to the DISTRICT for payment of the Contract Price for Services, authorized Additional Services, and previously approved and allowable Reimbursable Expenses performed or incurred in the immediately prior month in a format previously approved by the DISTRICT. Previously approved and allowable Reimbursable Expenses shall be itemized and evidence shall be provided of the cost or value of any Allowable Reimbursable Expense costs for which payment is requested by CONSULTANT.
- 1.4. **DISTRICT Payment of Contract Price.** Within thirty (30) days of the date of the District's receipt of CONSULTANT'S billing invoices, DISTRICT will make payment to CONSULTANT of undisputed amounts of the Contract Price due for Services, authorized Additional Services, and Allowable Reimbursable Expenses.
- 1.5. **Withholding Payment.** The DISTRICT may withhold or deduct from amounts otherwise due CONSULTANT hereunder if CONSULTANT shall fail to timely and completely perform material obligations to be performed on its part under this Agreement, with the amounts withheld or deducted being released after CONSULTANT has fully cured its failure of performance, less costs, damages or losses sustained by the DISTRICT as a result of such failure of performance of a material obligation hereunder.
- 1.6. **Payment in Full.** This compensation shall be compensation in full for all services performed by the CONSULTANT under the terms of this AGREEMENT, except where additional compensation is agreed upon between the CONSULTANT and DISTRICT in writing as provided for as additional services.
- 1.7. **Monthly Payments.** Payments for CONSULTANT services shall be made monthly on the basis set forth in this article.
- 1.8. **Late payments.** Invoices shall be on a form and in the format approved by the DISTRICT. Payments are due and payable upon receipt of the CONSULTANT'S invoice. Amounts unpaid thirty (30) days after the invoice date shall bear interest at the legal rate prevailing at the time, at the site of the PROJECT.

- 1.9. **Schedule Delay.** To the extent that the time initially established for the completion of CONSULTANT'S services is exceeded or extended through no fault of the CONSULTANT, compensation for any services rendered during the additional period of time may be computed as follows: at standard hourly rates (See EXHIBIT A) or as a fixed fee.
- 1.10. **Reimbursable Expenses** incurred by the CONSULTANT and CONSULTANT'S employees in the interest of the PROJECT shall have prior DISTRICT written approval before incurred and records of such expenses shall be provided to DISTRICT for the DISTRICT's review. The District shall not be liable to CONSULTANT for any costs or expenses paid or incurred by CONSULTANT in performing services for DISTRICT, except reimbursable expenses that have been pre-approved in writing. Expenses may be invoiced during the monthly pay request at cost plus 10% markup.
- a. Reimbursable expenses are in addition to compensation for Original and Additional Services and include expenses incurred by the CONSULTANT and CONSULTANT'S employees in the interest of the PROJECT.
 - b. Reimbursable expenses shall be expense of transportation in connection with the PROJECT; expenses in connection with authorized out-of-town travel; long-distance communications; and fees paid for securing approval of authorities having jurisdiction over the PROJECT. CONSULTANT'S normal travel expense (including to and from the PROJECT) and meals are excluded.
 - c. Expense of reproductions (except those needed for the use of the CONSULTANT and his or her consultants or identified specifically as a deliverable), postage and handling of Drawings, Specifications and other documents are reimbursable upon DISTRICT's prior written approval.
 - d. If authorized in advance in writing by the DISTRICT, expense of overtime work requiring higher than regular rates will be reimbursed.
 - e. Expense of renderings, models and mock-ups requested by the DISTRICT if not part of CONSULTANT'S Services will be reimbursed.
 - f. For reimbursable expenses, compensation shall be computed at a multiple of 1.05 times the expenses incurred by the CONSULTANT, the CONSULTANT'S employees and consultants in the interest of the PROJECT.
 - g. For additional services of CONSULTANTS, compensation shall be computed at a multiple of 1.1 times the amounts billed to the CONSULTANT for such services.
- 1.11. **Non Waiver of Rights.** Neither the DISTRICT'S review, approval of, nor payment for, any of the services required under this Agreement shall be construed to operate as a waiver of any rights under this Agreement, and CONSULTANT shall remain liable to the DISTRICT in

accordance with applicable law for all damages to the DISTRICT caused by CONSULTANT'S failure to perform any of the services furnished under this Agreement.

ARTICLE 2 CONSULTANT'S WORK PRODUCT

- 2.1. **District Ownership of Documents.** The documents prepared by the CONSULTANT for this PROJECT shall be and remain the property of the DISTRICT pursuant to Education Code Section 17316. Such documents supplied as herein required shall be the property of the DISTRICT whether or not the work for which they were made is executed. CONSULTANT grants to DISTRICT the right to reuse all or part of the fore mentioned documents at its sole discretion for the construction of all or part of this or another PROJECT constructed for the DISTRICT. If the documents are reused for another project constructed for the DISTRICT, then the DISTRICT agrees that CONSULTANT shall not be responsible for any reuse of the documents. The DISTRICT is not bound by this AGREEMENT to employ the services of CONSULTANT in the event such drawings, specifications and/or other documents are reused. CONSULTANT grants to the DISTRICT the right to copy, use, modify, and reuse any and all copyrights and designs embodied in the plans, specifications and other documents prepared or caused to be prepared by the CONSULTANT pursuant to this AGREEMENT.
- 2.2. **Documentation.** The CONSULTANT shall make a written record of all meetings, conferences, discussions and decisions made between or among the DISTRICT and CONSULTANT during all phases of the PROJECT and concerning any material condition in the requirements, scope, performance and/or sequence of the work. The CONSULTANT shall provide a draft copy of such record to the DISTRICT for review and comment, make adjustments and provide a final copy to the DISTRICT.
- 2.3. **Electronic Copy of Documents.** The CONSULTANT shall perform the work under this agreement using DISTRICT approved software and shall deliver electronic copy via CD, DVD or thumb drive in both the software format and PDF format upon completion of the PROJECT requirements. If work is terminated prior to PROJECT completion, a copy of the work completed to date shall be provided to the DISTRICT.
- 2.4. **Copyright/Trademark/Patent.** CONSULTANT understands and agrees that all matters produced under this AGREEMENT shall become the property of DISTRICT and cannot be used without DISTRICT's express written permission. DISTRICT shall have all right, title and interest in said matters, including the right to secure and maintain the copyright, trademark and/or patent of said matter in the name of the DISTRICT. CONSULTANT consents to the use of CONSULTANT'S name in conjunction with the sale, use, performance and distribution of the matters, for any purpose and in any medium.

ARTICLE 3 TERMINATION

- 3.1. **Termination for Convenience.** DISTRICT may, at any time, with or without reason, terminate this AGREEMENT and compensate CONSULTANT only for services satisfactorily rendered to the date of termination. 30 day written notice by DISTRICT shall be sufficient to stop performance of services by CONSULTANT. Notice shall be considered applicable as of the date established on the termination notice and deemed given when received by the CONSULTANT or no later than three days after the day of mailing, whichever is sooner.
- 3.2. **Termination for Cause.** DISTRICT may terminate this AGREEMENT upon giving of written notice of intention to terminate for cause. Cause shall include: (a) material violation of this AGREEMENT by the CONSULTANT; or (b) any act by CONSULTANT exposing the DISTRICT to liability to others for personal injury or property damage; or (c) CONSULTANT is adjudged a bankrupt, CONSULTANT makes a general assignment for the benefit of creditors or a receiver is appointed on account of CONSULTANT'S insolvency. Written notice by DISTRICT shall contain the reasons for such intention to terminate and unless within ten (10) days after service of such notice the condition or violation shall cease, or satisfactory arrangements for the correction thereof be made, this AGREEMENT shall upon the expiration of the ten (10) days cease and terminate. In the event of such termination, the DISTRICT may secure the required services from another contractor. The foregoing provisions are in addition to and not a limitation of any other rights or remedies available to DISTRICT. Written notice by DISTRICT shall be deemed given when received by the other party or no later than three days after the day of mailing, whichever is sooner.
- 3.3. **Termination by Either Party.** This AGREEMENT may be terminated without cause by the DISTRICT upon not less than 7 days written notice to the CONSULTANT. This AGREEMENT may be terminated by either party upon not less than 7 days written notice should the other party fail substantially to perform in accordance with the terms of this AGREEMENT through no fault of the party initiating the termination.
- 3.4. **Suspension of PROJECT.** The District may suspend this Agreement at any time without penalty by written notice to CONSULTANT of such suspension. The Suspension Notice shall set forth the reason for the suspension, the anticipated term of the suspension and shall be provided to the CONSULTANT not less than fifteen days prior to the suspension date. If the PROJECT is suspended by the DISTRICT for more than ninety consecutive days, the CONSULTANT shall be compensated for services satisfactorily performed prior to such suspension. When the PROJECT is resumed, the CONSULTANT'S compensation shall be equitably adjusted to provide for expenses incurred in the interruption and resumption of the CONSULTANT'S services.
- 3.5. **Abandonment of PROJECT.** If the DISTRICT abandons the PROJECT for more than ninety consecutive days, the CONSULTANT shall be compensated for services satisfactorily

performed prior to the abandonment and CONSULTANT may terminate this AGREEMENT by giving not less than 7 days written notice to the DISTRICT.

- 3.6. **Non Payment.** The DISTRICT's failure to make payments to the CONSULTANT in accordance with this AGREEMENT shall be considered substantial nonperformance and cause for termination by the CONSULTANT.
- a. In the event the DISTRICT fails to make timely payment, the CONSULTANT may, upon 7 days written notice to the DISTRICT, suspend performance of services under this AGREEMENT.
 - b. Unless payment in full is received by the CONSULTANT within 7 days of the date of the notice, the suspension shall take effect without further notice.
 - c. In the event of a suspension of services, the CONSULTANT shall have no liability to the DISTRICT for delay or damage caused the DISTRICT because of such suspension of services.
- 3.7. **CONSULTANT Compensation.** The CONSULTANT shall be compensated for services satisfactorily performed prior to a termination which is not the fault of the CONSULTANT. The DISTRICT shall pay the CONSULTANT only the fee associated with the services provided, since the last billing and up to the notice of termination.
- 3.8. **Liability for District Damages.** In the event of termination due to the fault of CONSULTANT, CONSULTANT shall receive compensation due for services satisfactorily rendered prior to the date of termination. The CONSULTANT is liable for all damages suffered by the DISTRICT due to CONSULTANT'S failure to perform as provided in the AGREEMENT.

ARTICLE 4 DISPUTES, MEDIATION AND ARBITRATION

- 4.1. **Work to Continue.** In the event of a dispute between the parties as to performance of the work, the interpretation of this Agreement, or payment or nonpayment for work performed or not performed, the parties shall attempt to resolve the dispute. Pending resolution of the dispute, CONSULTANT agrees to continue to diligently perform and provide services hereunder until completion of the work. If the dispute is not resolved, CONSULTANT agrees it will neither rescind this Agreement nor stop the progress of the work. The DISTRICT and CONSULTANT agreed that, in the event that a dispute comes to litigation, each party will bear its own legal expenses.
- 4.2. **Mediation Requirements.** All claims, disputes or controversies arising out of or relating to the PROJECT or to this agreement or the breach thereof shall be first attempted to be resolved through mediation.

- 4.3. **Arbitration.** If mediation is unsuccessful, claims, disputes or controversies arising out of or relating to this AGREEMENT will be decided by arbitration in accordance with the American Arbitration Association then prevailing unless the parties mutually agree otherwise.
- a. No arbitration arising out of or relating to this Agreement shall include, by consolidation, joinder or in any other manner, any additional person not a party to this Agreement except by written consent containing a specific reference to this Agreement and signed by the CONSULTANT, District and any other person sought to be joined. Consent to arbitration involving an additional person or persons shall not constitute consent to arbitration of any dispute not described therein or with any person not named therein.
 - b. This agreement to arbitrate shall be specifically enforceable under applicable law in any court having jurisdiction thereof.
 - c. Notice of demand for arbitration shall be filed in writing with the other party to this AGREEMENT in accordance with the rules of the American Arbitration Association. The demand shall be made within a reasonable time after the claim, dispute or other matter in question has arisen. In no event shall the demand for arbitration be made after the date when institution of legal or equitable proceedings based upon such claim, dispute or other matter in questions would be barred by the applicable statutes of limitation.
 - d. In any judicial proceeding to enforce this agreement to arbitrate, the only issues to be determined shall be those set forth in 9 U.S.C. Section 4 Federal Arbitration act and such issues shall be determined by the court without a jury. All other issues, such as, but not limited to, arbitrability, prerequisites to arbitration, compliance with contractual time limitations, applicability of indemnity clauses, clauses limiting damages and statutes of limitation shall be for the arbitrators whose decision thereon shall be final and binding. There shall be no interlocutory appeal of an order compelling arbitration.
 - e. The award rendered by the arbitrators shall be final and judgment may be entered upon it in accordance with applicable law in any court having jurisdiction thereof.
 - f. Unless otherwise provided, this Agreement shall be governed by the law of the state and county where the Project is located.

ARTICLE 5 DISTRICT'S RESPONSIBILITIES

- 5.1. **District Provided Information.** The DISTRICT shall provide to the CONSULTANT full information regarding requirements for the PROJECT, including information regarding the DISTRICT's objectives, schedule, constraints and criteria.

- 5.2. **District Representative.** The DISTRICT shall appoint a representative authorized to act on the DISTRICT's behalf with respect to the PROJECT. The DISTRICT or its authorized representative shall render decisions in a timely manner pertaining to documents submitted by the CONSULTANT. CONSULTANT shall consult with authorized employees, agents, and representatives of DISTRICT relative to the design and construction of the Project. However, CONSULTANT shall accept directives only from DISTRICT's designated representative and not from other DISTRICT employees or consultants. The DISTRICT shall notify CONSULTANT in writing if, at its sole option, it makes a change in the DISTRICT representative. Unless modified by written notice by the DISTRICT to the CONSULTANT, the DISTRICT Representative is:

Mark Schoeppner, Construction Manager

- 5.3. **District Notification.** The DISTRICT shall give prompt written notice to the CONSULTANT if the DISTRICT becomes aware of any fault or defect in the PROJECT or nonconformance with the PROJECT intent. However, the DISTRICT's failure or omission to do so shall not relieve the CONSULTANT of his/her responsibilities hereunder and the DISTRICT shall have no duty to observe, inspect or investigate the PROJECT.
- 5.4. **DISTRICT Consultants.** Other consultants required or desired by the DISTRICT in connection with the PROJECT shall be retained and paid for by the DISTRICT. Such other consultants include, but may not be limited to legal counsel, insurance consultants, and Sustainability/Energy Plan consultants.
- 5.5. **Project Description.** The DISTRICT shall furnish a description of the PROJECT as required.
- 5.6. **Reliable Information.** The CONSULTANT may rely on the information provided by DISTRICT but only to the extent such reliance is consistent with CONSULTANT'S obligations under this agreement

ARTICLE 6 MISCELLANEOUS

- 6.1. **Affirmative Action.** CONSULTANT agrees that CONSULTANT will not engage in unlawful discrimination in employment of persons because of race, ethnicity, religion, nationality, disability, gender, marital status or age of such persons.
- 6.2. **Compliance with Applicable Laws.** The services completed herein must meet the approval of the DISTRICT and shall be subject to the DISTRICT's general right of inspection to secure the satisfactory completion thereof. CONSULTANT agrees to comply with all federal, state and local laws, rules, regulations and ordinances that are now or may in the future become applicable to CONSULTANT, CONSULTANT'S business, equipment and personnel engaged in services covered by this AGREEMENT or accruing out of the performance of such services.

- 6.3. **CONSULTANT Accounting Records.** Pursuant to and in accordance with the provisions of Government Code Section 8546.7 or any amendments thereto, all books, records, and files of the DISTRICT and the CONSULTANT, including, but not limited to the costs of administration of this Agreement, shall be subject to examination and audit of the State Auditor at the request of the DISTRICT or as part of any audit of the DISTRICT for a period of three (3) years after final payment is made under this agreement. During this time, CONSULTANT shall maintain accounting records and make them available upon request of the DISTRICT for reproduction or inspection.
- 6.4. **Review, Approval or Acceptance.** Review, approval or acceptance of CONSULTANT'S work whether by DISTRICT or others, shall not relieve CONSULTANT from responsibility for errors and omissions in CONSULTANT'S work.
- 6.5. **Cumulative Rights; Non Waiver.** Duties and obligations imposed by this Agreement and rights and obligations hereunder are in addition to and not in lieu of any imposed by or available at law or inequity. The failure of DISTRICT or CONSULTANT to seek redress for violation of, or to insist upon, the strict performance of any term or condition of this AGREEMENT shall not be deemed a waiver by that party of such term or condition, or prevent a subsequent similar act from again constituting a violation of such term or condition.
- 6.6. **Employment with Public Agency.** CONSULTANT, if an employee of another public agency, agrees that CONSULTANT will not receive salary or remuneration, other than vacation pay, as an employee of another public agency for the actual time in which services are actually being performed pursuant to this AGREEMENT. Additionally, No member, officer or employee of the DISTRICT during tenure or for one year thereafter, shall have any interest direct or indirect, in this Agreement or the proceeds thereof.
- 6.7. **Governing Law.** This AGREEMENT shall be governed by the laws of the State of California. The duties and obligations of the parties created hereunder are performable in Orange County and such county shall be the venue for any action or proceeding that may be brought or arise out of, in connection with or by reason of this Agreement.
- 6.8. **Independent Contractor.** CONSULTANT, in the performance of this AGREEMENT, shall be and act as an independent contractor. CONSULTANT understands and agrees that he/she and all of his/her employees shall not be considered officers, employees or agents of the DISTRICT, and are not entitled to benefits of any kind or nature normally provided employees of the DISTRICT and/or to which DISTRICT's employees are normally entitled, including, but not limited to, State Unemployment Compensation or Worker's Compensation. CONSULTANT assumes the full responsibility for the acts and/or omissions of his or her employees or agents as they relate to the services to be provided under this AGREEMENT. CONSULTANT shall assume full responsibility for payment of all federal, state and local taxes or

contributions, including unemployment insurance, social security and income taxes for the respective CONSULTANT's employees.

- 6.9. **Marginal Headings; Captions.** The titles of the various Paragraphs of the Agreement and the Articles of these Conditions are for convenience of reference only and are not intended to and in no way shall enlarge or diminish the rights or obligations of CONSULTANT and DISTRICT hereunder.
- 6.10. **Non-Assignment.** The DISTRICT and CONSULTANT, respectively, bind themselves, their partners, officers, successors, assigns and legal representatives to the other party to this AGREEMENT with respect to the terms of this AGREEMENT. The obligations of the CONSULTANT pursuant to this AGREEMENT shall not be assigned by the CONSULTANT. Nothing contained in this AGREEMENT shall create a contractual relationship with or a cause of action in favor of any third party against either the DISTRICT or CONSULTANT. The sale or transfer of a majority membership interest in CONSULTANT firm or the admission of new member to the CONSULTANT firm which causes there to be a change in majority ownership and / or control of CONSULTANT firm shall be deemed an assignment for purposes of this Agreement. Nothing contained in this Agreement is intended to make any person or entity who is not a signatory to the Agreement a third party beneficiary of any right created by the Agreement or by operation of law.
- 6.11. **Permits/Licenses.** CONSULTANT and all CONSULTANT'S employees or agents shall secure and maintain in force such permits and licenses as are required by law in connection with the furnishing of services pursuant to this AGREEMENT.
- 6.12. **Notifications.** All notices or demands to be given under this AGREEMENT by either party to the other shall be in writing and given either by: (a) personal service or (b) by U.S. Mail, mailed either by registered or certified mail, return receipt requested, with postage prepaid. Service shall be considered given when received if personally served requiring signature acknowledging receipt, or if mailed, on the third day after deposit in any U.S. Post Office. The address to which notices or demands may be given by either party may be changed by written notice given in accordance with the notice provisions of this section.
- 6.13. **Communications** between the parties shall be sent to the following addresses:

- 6.14. **Severability.** If any provision of this Agreement is deemed illegal, invalid unenforceable or void by any court of competent jurisdiction, such provision shall be deemed stricken and deleted here from, but all remaining provisions will remain and continue in full force and effect.
- 6.15. **Entire Agreement / Amendment.** This AGREEMENT and any exhibits attached hereto represent the entire AGREEMENT between the DISTRICT and CONSULTANT and supersede all prior negotiations, representations or agreements, either written or oral with respect to the services contemplated. This AGREEMENT may be amended or modified only by an agreement in writing signed by both the DISTRICT and the CONSULTANT.
- 6.16. **Binding Agreement.** The DISTRICT and CONSULTANT, respectively, bind themselves, their partners, officers, successors, assigns and legal representatives to the other party to this AGREEMENT with respect to the terms of this AGREEMENT.

This AGREEMENT entered into as of the day and year first written above.

EXHIBIT A - CRITERIA AND BILLING AND EXTRA WORK

- A. The following extra services to this Agreement shall be performed by CONSULTANT if needed and requested by the DISTRICT.
1. Making revisions in documents when such revisions are:
 - a. Inconsistent with approvals or instructions previously given by the DISTRICT.
 - b. Required by the enactment or revisions of codes, laws or regulations subsequent to the preparations of such documents.
 - c. Due to changes required as a result of the DISTRICT'S failure to respond to a written request from the CONSULTANT within a reasonable time, as requested by CONSULTANT.
 2. Providing services required because of significant documented changes in the Project initiated by the DISTRICT, including but not limited to, size, quality, complexity, the DISTRICT'S schedule.
- B. The following rates which include overhead, administrative cost and profit shall be utilized in arriving at the fee for initial and extra services. The hourly rates reflected below shall be effective as of the date of execution of this Contract and shall be revised each twelve (12) months; thereafter based upon changes in the Consumer Price Index for the previous twelve month period, using the CPI for the geographical area of the CONSULTANT.

RE: SOCCCD: Budget Amendment: Adopt Resolution No 16-30 to Amend
FY 2016-2017 Adopted Budget

ACTION: Approval

BACKGROUND

Title 5 of the California Code of Regulations, Section 58308 provides that the Board of Trustees by resolution may amend the District budget to provide for the expenditure of funds, the amount of which was unknown at the time of the adoption of the final budget.

STATUS

In order to properly account for the revenues and expenditures of these funds, it is necessary to amend the FY 2016-2017 Adopted Budget.

The District is updating the adopted budget with current information as follows:

General Fund

Deputy Sector Navigator (SB1402) at Irvine Valley College	\$154,666
Adult Education Block Grant at Irvine Valley College	\$869,190
Perkins Title IC at Irvine Valley College	\$300
CTE Transitions at Irvine Valley College	(\$391)
Perkins Title IC at Saddleback College	\$6,796
Real Estate Education Center at Saddleback College	\$92,000
Physical Plant & Instructional Equipment at Irvine Valley College	\$20,761
Cooperative Agencies Resources for Education (CARE) at Saddleback College	\$2,940
Full-time Student Success Grant (FTSSG) at Irvine Valley College	\$165,900
Basic Skills Transformation Initiative at Irvine Valley College	\$1,447,720
CTE Data Unlocked Initiative at Irvine Valley College	\$50,000
Total Increase to the General Fund	<u>\$2,809,882</u>

Total Budget Amendment \$2,809,882

RECOMMENDATION

The Interim Chancellor recommends that the Board of Trustees adopt Resolution No. 16-30 to amend the FY 2016-2017 Adopted Budget as indicated in EXHIBIT A.

Item Submitted By: *C.M. Brahmhatt, Acting Vice Chancellor, Business Services*

SOUTH ORANGE COUNTY COMMUNITY COLLEGE DISTRICT

GENERAL FUND

RESOLUTION 16-30

November 14, 2016

WHEREAS, the Governing Board of the South Orange County Community College District has determined that income in the amount of \$2,809,882 is assured to said District as an increase of the amounts required to finance the total proposed budget expenditures and transfers for fiscal year 2016-2017 from sources listed in Title 5 of the California Code of Regulations, Section 58308;

WHEREAS, the Governing Board of the South Orange County Community College District can show just cause for the expenditure of such funds;

NOW, THEREFORE, BE IT RESOLVED that, pursuant to Title 5 of the California Code of Regulations, Section 58308, such excess funds are to be appropriated according to the following schedule:

General Fund

<u>Account</u>	<u>Income Source</u>	<u>Amount</u>
8100	Federal Revenue	6,705
8600	State Revenue	2,803,177
		<u>\$ 2,809,882</u>

<u>Account</u>	<u>Expenditure Description</u>	<u>Amount</u>
1000	Academic Salaries	506,928.00
2000	Classified Salaries	428,151.00
3000	Fringe Benefits	145,108.00
4000	Books and Supplies	47,447.00
5000	Other Operating Expenses and Services	1,477,791.00
6000	Capital Outlay	38,557.00
7000	Other Outgoing	165,900.00
		<u>\$ 2,809,882</u>
	Total Budget Amendment	<u>\$ 2,809,882</u>

COUNTY OF ORANGE)

I, Debra L. Fitzsimons, Acting Secretary to the Board of Trustees of South Orange County Community College District of Orange County, California, hereby certify that the Budget Amendment and foregoing Resolution in the amount of \$2,809,882 duly and regularly adopted by the said Board at a regular meeting thereof held on November 14, 2016.

IN WITNESS WHEREOF, I have hereunto set my hand and seal this 15th day of November 2016.

Debra L. Fitzsimons
Acting Secretary to the Board of Trustees

TO: Board of Trustees

FROM: Debra L. Fitzsimons, Interim Chancellor

RE: SOCCCD: Transfer of Budget Appropriations

ACTION: Ratification

BACKGROUND

Title 5, California Code of Regulations, Section 58199 requires the Board of Trustees to approve, by a two-thirds vote of its members, all transfers of funds from its contingency reserve to any expenditure classification, and ratify, by a majority vote, all transfers of funds between expenditure classifications other than that originating from the Contingency Reserve.

STATUS

For the current reporting period ending October 31, 2016 and in accordance with Administrative Regulation 3101, the Transfer of Budget Appropriations are summarized on EXHIBIT A and presented for ratification.

RECOMMENDATION

The Interim Chancellor recommends that the Board of Trustees ratify the Transfer of Budget Appropriations as detailed in EXHIBIT A.

SOUTH ORANGE COUNTY COMMUNITY COLLEGE DISTRICT

TO: Board of Trustees**FROM:** Debra L. Fitzsimons, Interim Chancellor**RE:** SOCCCD: October 2016 Change Orders/ Amendments**ACTION:** Ratification

BACKGROUND

On October 26, 2015, the board authorized the Chancellor/designee to execute change orders/amendments up to \$100,000 for board ratification. The following change orders/amendments were reviewed and approved by the Vice Chancellor of Business Services or designee, following review by legal counsel, when appropriate.

Exhibit	Contractor Name / Description	Change Order Amount	Revised Total Contract Amount
A.	<u>HPI Architecture</u> Saddleback College Marquees and Landscape Project – Architectural Services Amendment No. 1 – For increased scope of services. SOCCCD	\$70,169.00	\$195,489.00
B.	<u>Solpac Construction, Inc.</u> Saddleback College Fine Arts HVAC Upgrade Interior Renovation Project – Construction Services Change Order No. 4 – For project revisions to the general contractor's contract. SOCCCD	\$53,107.00	\$7,574,347.00
C.	<u>Orange County Department of Education</u> Orange County Career Pathways Partnership (OCCPP) Program – Sub-Grant Amendment No.2 – For payment and invoicing terms allowing a portion of annual allocations to be carried over into subsequent years.	\$0	\$1,297,862.00

**AMENDMENT NO. 1
TO ARCHITECTURAL SERVICES AGREEMENT
FOR
MARQUEES AND LANDSCAPE PROJECT
SADDLEBACK COLLEGE**

October 24, 2016

THIS AMENDMENT shall modify the original agreement dated June 27, 2016 by and between the South Orange County Community College District, hereinafter referred to as "DISTRICT," and HPI Architecture, 115 22nd Street, Newport Beach, California, 92663, hereinafter referred to as "CONSULTANT".

WHEREAS, Article 11, paragraph 11.16 of the original agreement establishes that it may be amended in writing by mutual consent of both parties; and

WHEREAS, Article 6, paragraph 1 and Attachment A establish the compensation of the agreement at a total contract value of \$125,320; and

WHEREAS, the scope of services has increased to include additional landscape, updated security, and information technology design services; and

NOW, THEREFORE, the Parties agree to modify the original agreement as follows:

PROVIDE SUPPLEMENTAL A/E SERVICES

Original Contract Amount:	\$125,320
Amendment No. 1	<u>\$ 70,169</u>
Total Contract Amount	\$195,489

IN WITNESS HEREOF, the Parties have executed this Amendment No.1 as of the date set forth above.

Supersedes Amendment #2 Dated 4/1/2016

AGREEMENT NUMBER: 40945

AMENDMENT #2

SOUTH ORANGE COUNTY COMMUNITY COLLEGE DISTRICT – SADDLEBACK COLLEGE
ORANGE COUNTY CAREER PATHWAYS PARTNERSHIP (OCCPP) PROGRAM

The AGREEMENT entered into July 1, 2014 by and between the Orange County Superintendent of Schools, 200 Kalmus Drive, P.O. Box 9050, Costa Mesa, California 92628-9050, hereinafter referred to as "SUPERINTENDENT", and the South Orange County Community College District, on behalf of Saddleback College, 28000 Marguerite Parkway, Mission Viejo, California 92692, hereinafter referred to as "PARTNER", last amended August 28, 2015, is hereby further amended as follows:

1.0 Section 4.0 **PAYMENTS AND INVOICING** shall be amended to read as follows:

A. SUPERINTENDENT, under the terms of this AGREEMENT, shall reimburse PARTNER for PARTNER's eligible expenses for providing the services and activities hereunder identified in Exhibit A; provided, however, the total of such payments does not exceed PARTNER's maximum obligation; and provided further, PARTNER's costs shall be reimbursable pursuant to State and Federal Regulations. PARTNER shall be responsible for all other expenses incurred in connection with the performance of this AGREEMENT.

B. For the period of July 1, 2014 through June 30, 2015 (Year 1) PARTNER shall receive its' first year allocation. Starting with Year 2 (July 1, 2015 through June 30, 2016) and continuing through Year 4 (July 1, 2017 through June 30, 2018), contingent upon submission and approval of PARTNER's annual report and annual Workplan, funds will be distributed as a quarterly reimbursement. PARTNER can submit an invoice with detailed documentation for any portion of their approved allocation for Year 2. Once PARTNER's invoice has been reviewed and approved, PARTNER will be reimbursed within thirty (30) days after the end of the quarter for which their invoice was submitted.

1 C. All funds received for Year 1 (July 1, 2014 through June 30, 2015) may be carried over into
2 Year 2 (July 1, 2015 through June 30, 2016). Year 2 work plans must clearly describe how all carryover
3 funds from Year 1 and all Year 2 allocations and/or leveraged funding from other sources will be used
4 to meet the outcomes of the Orange County Career Pathways Partnership (OCCPP) Program grant
5 described in the approved industry sector work plan framework. No more than forty percent (40%)
6 of the total of Year 1 carryover and the full Year 2 allocation can be carried over into Year 3 (July 1,
7 2016 through June 30, 2017). (Example: Partner carries over \$30,000 from Year 1 and has a Year 2
8 allocation of \$80,000, sum = \$110,000.00. The maximum amount that they can carry over would be
9 \$44,000.00) No more than forty percent (40%) of the total of Year 2 and all of Year 3 allocations can
10 be carried over into Year 4 (July 1, 2017 through June 30, 2018). Year 5 is a full sustainability year
11 and no OCCPP funds may be carried over.

12 D. As a condition for carrying over any funds up to the forty percent (40%) limit, Partner must
13 complete and submit on or before July 29, 2016 a Year 3 work plan. The Year 3 work plan template
14 and Year 3 budgeting document will be distributed to all Partners by June 15, 2016 along with the
15 Year 2 narrative template.

16 E. Recognizing that special circumstances may warrant an exception to Partner's forty percent
17 (40%) carry-over cap, the Executive Committee has authorized the Executive Director and the two (2)
18 Executive Committee chairs to approve or deny a formal request. Such requests must be submitted
19 no later than the last day of fiscal quarter 3 (April 15) and include a revised work plan, a budget
20 request form and a cover letter providing a detailed justification for a one-time exception to the forty
21 (40%) cap.
22

23 F. For travel necessary to the performance of this AGREEMENT, PARTNER's travel and other
24 travel related expense reimbursement claims shall not exceed the travel policy and procedures of the
25 State of California. Travel and other related travel expenses shall be limited to those necessary for

1 the performance of this AGREEMENT. Travel outside of the State of California must be authorized in
2 writing by SUPERINTENDENT prior by to travel. Travel outside of the United States is not permitted.

3 G. PARTNER's billings shall be submitted on SUPERINTENDENT's form, "Budget and
4 Expenditure Invoice," which is attached hereto as Exhibit "B" and incorporated herein by this
5 reference to this AGREEMENT and shall also include a full description and source of local match (cash
6 or In-kind), attached as Exhibit "C" and incorporated herein by this reference to this AGREEMENT.
7 PARTNER shall submit an original Budget and Expenditure Invoice no later than the 15th of each
8 quarter per year. Payments to PARTNER should be released by SUPERINTENDENT no later than thirty
9 (30) calendar days after receipt of a fully documented and accurate Budget and Expenditure Invoice.

10 H. All PARTNER Budget and Expenditure Invoices submitted to SUPERINTENDENT shall be
11 supported by source documentation including, but not limited to, ledgers, journals, time sheets,
12 invoices, bank statements, canceled checks, receipts, receiving records, and records of services
13 provided.

14 I. SUPERINTENDENT may withhold or delay any payment if PARTNER fails to comply with any
15 provision set forth in this AGREEMENT.

16 J. PARTNER shall not claim reimbursement for services provided beyond the expiration and/or
17 termination of this AGREEMENT, except as may otherwise be provided under this AGREEMENT.

18 K. PARTNER shall receive no compensation for the services provided pursuant to this
19 AGREEMENT other than the rate set forth above.

20 L. The obligation of SUPERINTENDENT under this AGREEMENT is contingent upon the
21 availability of funds furnished by State of California. It is mutually agreed that if the Budget Act of
22 the current fiscal year and/or subsequent fiscal years covered under this AGREEMENT does not
23 appropriate sufficient funds for this program, this AGREEMENT shall be of no further force and effect
24 and shall be terminated. In this event, SUPERINTENDENT shall have no liability to pay any funds
25

whatsoever to PARTNER or to furnish any other considerations under this AGREEMENT and PARTNER shall not be obligated to perform any provisions of this AGREEMENT. If funding for any fiscal year is reduced, or deleted by the Budget Act for purposes of this program, the SUPERINTENDENT shall have the option to either terminate this AGREEMENT with no liability occurring to the SUPERINTENDENT or offer an amendment to PARTNER to reflect the reduced amount. SUPERINTENDENT shall give PARTNER written notification of such termination. Notice shall be deemed served on the date of mailing.

2.0 Except as expressly herein amended, said AGREEMENT of July 1, 2014, shall in all respects be and remain in full force and effect.

IN WITNESS WHEREOF, the Parties hereto set their hands.

FROM: Debra L. Fitzsimons, Interim Chancellor
RE: SOCCCD: Purchase Orders and Checks.
ACTION: Approval

BACKGROUND

In accordance with the provisions of Article 4 of Chapter 8 of the California Education Code, commencing with Sections 85230, purchase orders and checks are submitted for ratification by the Board of Trustees.

STATUS

Purchase orders over \$5,000 amounting to \$873,536.59 and an additional 250 purchase orders below \$5,000 amounting to \$173,852.71 for a combined total of \$1,047,389.30 are submitted to the Board of Trustees for ratification. The purchase order list is provided in order of supplier (EXHIBIT A), and in order of amount (EXHIBIT B).

The district processed 1,190 checks in the amount of \$10,283,129.46 as summarized and submitted for ratification by the Board of Trustees (EXHIBIT C).

RECOMMENDATION

The Interim Chancellor recommends that the Board of Trustees ratify the purchase orders and checks in EXHIBIT A through EXHIBIT C.

TO: Board of Trustees

FROM: Debra L. Fitzsimons, Interim Chancellor

RE: Saddleback College: Study Abroad Program to Santander, Spain, from June 30, 2017 to July 31, 2017

ACTION: Approval

BACKGROUND

Saddleback College is committed to providing high quality education and a full range of cultural activities for students. The college has conducted very successful study abroad programs during summer sessions in Santander, Spain since 1993. Study abroad programs are authorized under Education Code 72640.

STATUS

The Liberal Arts Division at Saddleback College proposes to offer the study abroad program: Spanish Language Studies in Santander, Spain during summer 2017 from June 30, 2017 to July 31, 2017. The program will be organized and arranged by Travel and Education (T&E) for a fee of \$4484, without airfare, per student at a cost of \$140.12 per day for 10 to 15 students, or \$4394, without airfare, per student at a cost of \$137.31 per day for 16 or more students. Saddleback College solicited three bids for this program from International Studies Abroad Jumpstreet Tours, CIEE, and Travel & Education (T&E). T&E is the only vendor that met all of the required specifications. The details of the program are summarized in the Narrative in EXHIBIT A and the Study Abroad Program Information Summary in EXHIBIT B. The required Educational Tour/Field Study Contractor Agreement is provided in EXHIBIT C, which includes evidence of liability insurance of not less than \$5,000,000. The proposal from T&E is included in EXHIBIT D. The current travel alerts and warnings list issued by the U.S. Department of State in EXHIBIT E does not include Spain. Financial Aid opportunities will be provided through the Office of Financial Aid for those students who qualify. There is no impact to the General Fund.

RECOMMENDATION

The Interim Chancellor recommends that the Board of Trustees approve the Saddleback College study abroad program: Spanish Language Studies in Santander, Spain from June 30, 2017 to July 31, 2017 as summarized in EXHIBIT B, and directs the administration to execute the Educational Tour/Field Study Travel Contractor Agreement with Travel and Education for coordinating all travel agreements in EXHIBIT C.

Item Submitted By: *Dr. Tod A. Burnett, President*

C.M. Brahmabhatt, Acting Vice Chancellor, Business Services

Study Abroad Narrative
Santander, Spain
Summer 2017

Saddleback College has offered the Santander, Spain Study Abroad Program for twenty-three consecutive years. In summer 2017, a group of 15 or more students will study Spanish language, culture, and history from June 30, 2017 through July 31, 2017. Fifteen students participated in summer 2016. The faculty advisor will accompany the students on their arrival flight, as well as the duration of the program in Santander.

Students will enroll in a minimum of 11 units of Saddleback courses and will attend classes Monday through Friday. Professors at Colegio Miguel Unamuno will teach the courses, adhering to Saddleback's course outlines. The average number of units taken per student in summer 2016 was 11 units. The program includes more than 40 weekly hours of instruction in addition to Sunday excursions to cultural and historic sites.

Accommodations for the students are in approved home-stays, including meals. The faculty advisor will be provided a single room for two nights in a hotel in Madrid (arrival night and departure night) and a one bedroom apartment while in Santander and is responsible for meals. All accommodations are within easy walking distance from Colegio Miguel de Unamuno.

SOUTH ORANGE COUNTY COMMUNITY COLLEGE DISTRICT

EDUCATIONAL TOUR / FIELD STUDY TRAVEL CONTRACTOR AGREEMENT

GENERAL TERMS AND CONDITIONS

Summer 2017 Education Program in Santander, Spain

This Agreement is made this 14th day of November, 2016 between the South Orange County Community College District, located at 28000 Marguerite Parkway, Mission Viejo, California ("DISTRICT") and Travel and Education (T&E) located at 1055 Mill Creek Drive, Feasterville-Trevoze, PA 19053 and is for the limited purpose of providing travel arrangements for the Educational Tour / Field Study Trip described on the Exhibits to this Agreement labeled "SPECIFIC DETAILS."

IN CONSIDERATION of the covenants, promises, and agreements of the parties hereinafter contained, DISTRICT and TRAVEL CONTRACTOR hereby covenant, promise and agree as follows:

1. INSTRUCTIONAL SERVICES – District shall arrange for and provide all instructional services, including but not limited to appropriate course announcements, course descriptions and registration prerequisites, student selection and registration, pre-trip student orientation, lectures (staff and guest), student supervision, instruction by Trip Instructor and evaluation for said Educational Tour / Field Study Trip.
2. TRAVEL SERVICES – TRAVEL CONTRACTOR shall arrange for and provide all transportation and lodging for the Educational Tour / Field Study Trip, the details of which TRAVEL CONTRACTOR shall specify on the Exhibit to this Agreement labeled "SPECIFIC DETAILS." Said Exhibit shall be prepared by TRAVEL CONTRACTOR and submitted to DISTRICT for written approval and acceptance by DISTRICT as part of this Agreement. In the event of a conflict between the terms and conditions of any of the SPECIFIC DETAILS set forth in such Exhibit and the terms and conditions set forth in this Agreement, the General Terms and Conditions set forth in this Agreement shall prevail.
3. PROMOTIONAL MATERIAL – TRAVEL CONTRACTOR may prepare and provide at its own expense additional promotional material, which material must have the written approval of the DISTRICT administrator responsible for the activity before publication and distribution to the participants of the Educational Tour / Field Study Trip. Such material shall prominently display the statement: "Instructional Activities provided by Saddleback College or Irvine Valley College." All travel arrangements are the responsibility of TRAVEL CONTRACTOR."

Travel Contractor Agreement

4. PAYMENT BY TRIP PARTICIPANTS – All payments by Educational Tour / Field Study Trip participants for travel services shall be made directly to TRAVEL CONTRACTOR. All checks drawn by Educational Tour / Field Study Trip participants shall be made to the order of TRAVEL CONTRACTOR'S firm name or to such other name as TRAVEL CONTRACTOR may direct in writing.

TRAVEL CONTRACTOR shall manage all charges collected from Educational Tour / Field Study Trip participants in accordance with applicable Federal and State laws and regulations and the requirements of this Agreement. Any and all funds received by TRAVEL CONTRACTOR shall be held in trust for the benefit of the Educational Tour / Field Study Trip. TRAVEL CONTRACTOR shall account in detail to the DISTRICT the total cost to each participant of each Educational Tour / Field Study Trip.

TRAVEL CONTRACTOR shall provide to District a detailed itemization of all costs and expenses for each Educational Tour / Field Study Trip. Trip costs and expenses shall include but are not limited to details regarding the extent of free transportation, per diem allowance, incidental support, any direct payment to or prerequisites intended by TRAVEL CONTRACTOR for Trip Instructor. Disclosure of these costs and expenses for each Educational Tour / Field Study Trip shall be labeled "SPECIFIC DETAILS." Cost figures so disclosed will not be changed, except that costs quoted may be based on tariffs and foreign exchange rates in effect at the time of the quote and may be subject to change without amendment to this Agreement if the possibility of such changes has been disclosed in advance and in writing by TRAVEL CONTRACTOR to the DISTRICT and each participant in the Educational Tour / Field Study Trip. In the event an Educational Tour / Field Study Trip is for any reason cancelled prior to the time of its scheduled departure, TRAVEL CONTRACTOR shall refund in full within ten (10) days, any payments received from Educational Tour / Field Study Trip participants provided, however, that if any Educational Tour / Field Study Trip participants cancel after the date specified for final payment for participation in a particular Educational

Tour / Field Study Trip TRAVEL CONTRACTOR shall refund payments within ten (10) days to said Educational Tour / Field Study Trip participants minus any non-recoverable charges or expenses incurred by TRAVEL CONTRACTOR in connection with its provision of travel services for those participants.

5. RESTRICTION ON TRIP PARTICIPATION – All Educational Tour / Field Study Trip participants shall be registered in the course related to the Educational Tour Field Study. Though registration is open to the public, some individuals may be denied admission on the basis of academic prerequisites or other constraints. TRAVEL CONTRACTOR SHALL NOT MAKE THE TOUR PACKAGE AVAILABLE TO INDIVIDUALS WHO ARE NOT STUDENTS OF DISTRICT EXCEPT UNDER CONDITIONS ACCEPTED BY THE DISTRICT IN WRITING AND MADE A PART OF THIS AGREEMENT. IN THE EVENT PERSONS WHO ARE NOT DISTRICT STUDENTS SHALL PARTICIPATE IN AN EDUCATIONAL TOUR / FIELD STUDY

Travel Contractor Agreement

TRIP WITHOUT DISTRICT PERMISSION, THE TRAVEL CONTRACTOR HEREBY ASSUMES ALL LIABILITY, AS DEFINED IN THIS AGREEMENT, FOR SUCH NON-STUDENT PARTICIPATION.” Prior to the departure of any Educational Tour / Field Study Trip, TRAVEL CONTRACTOR shall provide the DISTRICT at the address set forth below with a roster of all Educational Tour / Field Study Trip participants, showing name, address, emergency contact and address, along with the same information for any other persons the DISTRICT has agreed in writing to allow participation in the Educational Tour / Field Study Trip.

6. EDUCATIONAL TOUR / FIELD STUDY CORRESPONDENCE - TRAVEL CONTRACTOR shall forward a copy of all correspondence between the TRAVEL CONTRACTOR and any Trip/Instructor/Presenter/Guide of the DISTRICT at the address set forth below.

7. INDEMNIFICATION – TRAVEL CONTRACTOR shall protect, hold harmless, indemnify, and defend DISTRICT (including its trustees, officers and employees) from any and all liability as defined in this Paragraph. For purposes of this Agreement, liability means any and all claims, demands, losses, causes of action, suits, or judgments of any and every kind (including reasonable attorney’s fees) that any person (including but not limited to Educational Tour / Field Study Trip participants or TRAVEL CONTRACTOR’S employees), or such person’s heirs, executors, administrators or assigns may have against the DISTRICT, arising out of or in connection with TRAVEL CONTRACTOR’S activities under this Agreement which give rise to personal injury, accident, illness or death, or any loss or damage to property, or any other claim including but not limited to claims based on TRAVEL CONTRACTOR’S failure or refusal to perform in accordance with this Agreement, that results from any cause other than the sole negligence of the DISTRICT.

8. LIQUIDATED DAMAGES. – TRAVEL CONTRACTOR acknowledges that the DISTRICT is a non-profit public entity that makes no economic gain on travel arrangements for Educational Tour / Field Study Trips. If TRAVEL CONTRACTOR fails to perform in accordance with the Educational Tour / Field Study Trip set forth in SPECIFIC DETAILS or in promotional brochures provided by TRAVEL CONTRACTOR to Educational Tour / Field Study Trip participants, such breach may cause hardship to the Educational Tour / Field Study Trip participants. However, from the nature of the case it would be impracticable and difficult to fix the amount of damages sustained by Educational Tour / Field Study Trip participants in the event of any such breach. DISTRICT and TRAVEL CONTRACTOR, therefore, presume that in the event of any such breach by TRAVEL CONTRACTOR the minimum amount of damages that will be sustained by Educational Tour / Field Study Trip participants will be \$100 per trip per participant and that TRAVEL CONTRACTOR shall pay such amount as liquidated damages and not as a penalty, provided, however, that the rights set forth in this Paragraph shall not preclude each Educational Tour / Field Study Trip participant from claiming and from being awarded, upon proper proof thereof, of damages in a greater amount than the liquidated damages amount specified in this Paragraph.

Travel Contractor Agreement

9. TRAVEL AGENTS – All travel agents used by TRAVEL CONTRACTOR to arrange for transportation (or TRAVEL CONTRACTOR itself if it is a travel agency) shall be licensed and bonded by the International Air Transport Association (IATA) and the Air Traffic Conference (ATC) and shall be members of the American Society of Travel Agents (ASTA) or an equivalent professional travel agent's association.

10. TRIP CANCELLATION INSURANCE – TRAVEL CONTRACTOR shall make available to each Educational Tour / Field Study Trip participant trip cancellation insurance that will insure trip participants of trip transportation in spite of accident or illness of any participant that prevents that participant from either commencing the trip or requires the participant's early return from the trip.

11. GENERAL LIABILITY INSURANCE – TRAVEL CONTRACTOR shall for the duration of each Educational Tour / Field Study Trip maintain a comprehensive worldwide, general liability policy or policies insuring TRAVEL CONTRACTOR'S activities under this Agreement against risk of loss due to: (a) bodily injury, death or property damage caused by an occurrence arising out of the operation, maintenance or use, including loading and unloading of hired automobile, watercraft or aircraft in TRAVEL CONTRACTOR'S operations; (b) personal injury arising out of TRAVEL CONTRACTOR'S operations, and shall provide emergency medical services to participants while on the Educational Tour / Field Study Trip, and other general trip insurance benefits as specifically set forth in SPECIFIC DETAILS. If the Educational Tour / Field Study Trip is to travel to locations beyond the continent of the United States, such policy shall be endorsed to provide coverage for planes brought into the United States, for occurrences elsewhere.

LIABILITY INSURANCE – CERTIFICATE OF INSURANCE – TRAVEL CONTRACTOR shall provide the District's Office of Administrative and Business Services with a valid certificate of insurance for each Educational Tour / Field Study Trip naming the District as additional insured with a single limit of liability of a minimum of \$5,000,000 with evidence that the policy covers the world-wide exposures of each Educational Tour / Field Study Trip. The certificate shall be submitted with the executed AGREEMENT to the Office of the Deputy Chancellor at least fifteen (15) working days prior to commencement of the program.

12. TRAVEL CONTRACTOR INFORMATION AND IDENTIFICATION – TRAVEL CONTRACTOR shall at all times maintain on file with the DISTRICT an accurate information sheet listing name, address, telephone, facsimile, e-mail, person(s) responsible for assisting the Educational Tour / Field Study Trip.

13. TERM – This Agreement shall be effective on the date first noted above when signed by TRAVEL CONTRACTOR and DISTRICT and shall continue in force until terminated. TRAVEL CONTRACTOR may, upon written notice to DISTRICT, cancel any particular Educational Tour / Field Study Trip no later than 45 days prior to the

Travel Contractor Agreement

departure of the Educational Tour / Field Study Trip (or fewer days upon the express mutual written agreement of DISTRICT and TRAVEL CONTRACTOR specifically set forth SPECIFIC DETAILS) if the minimum number of participants specified in SPECIFIC DETAILS fails to sign up for Educational Tour / Field Study Trip. DISTRICT may, upon written notice to TRAVEL CONTRACTOR, cancel any particular Educational Tour / Field Study Trip or may terminate this Agreement in its entirety at any time if TRAVEL CONTRACTOR fails to satisfy any of the terms and conditions of this Agreement or DISTRICT may terminate this Agreement in its entirety in District's sole discretion upon 45 days prior to departure written notice to TRAVEL CONTRACTOR stating that DISTRICT so terminates (or fewer days upon the express mutual written agreement of DISTRICT and TRAVEL CONTRACTOR specifically set forth in SPECIFIC DETAILS). The termination or expiration of this Agreement shall not relieve any party from any liability arising from breach of this Agreement.

14. NO ASSIGNMENT/TIME OF ESSENCE / HEIRS AND ASSIGNS – This Agreement is for the particular services of TRAVEL CONTRACTOR and shall not be assignable by TRAVEL CONTRACTOR in whole or in part without the prior written consent of DISTRICT. Time is of the essence on the performance of each and every provision of this Agreement. The provisions of this Agreement shall extend to be binding upon and inure to the benefit of the heirs, executors, administrators, successors and assigns of the respective parties hereto or of any third party beneficiaries of the Agreement.

15. NO MODIFICATION OF AGREEMENT – This Agreement constitutes the full and complete understanding of the parties on the subject hereof, and supersedes all prior understandings or agreements on that subject. No oral understanding or agreement not incorporated herein shall be binding on any of the parties hereto. No prior or contemporaneous agreements, representations or understandings between TRAVEL CONTRACTOR and any Trip Instructor for any Educational Tour / Field Study Trip that are not set forth herein shall be binding upon DISTRICT. No waiver, modification or amendment of any provision of this Agreement shall be effective unless it is in writing and signed by both parties.

16. NOTICE – Any notices required or permitted hereunder shall be given in writing to the appropriate party at the address specified above or at such other address as the party may have noticed to the other in accordance with this Paragraph. Such notice upon personal delivery shall be deemed given at the time of personal delivery to the signatory of the appropriate party named below, or upon mailing by certified or registered mail three (3) days after the date of such mailing.

17. CONTROLLING LAW – This Agreement is made in California and its terms and conditions shall be construed in accordance with the laws of the State of California, excluding the body of law applicable to conflicts of law. TRAVEL CONTRACTOR warrants and agrees that any suit brought by DISTRICT or any Educational Tour / Field

Travel Contractor Agreement

Study Trip participant against TRAVEL CONTRACTOR based upon this Agreement may be brought in any California court of competent jurisdiction.

IN WITNESS WHEREOF, TRAVEL CONTRACTOR and DISTRICT have executed this Agreement to be effective on the day and year first written above.

- **24 hour / 7 day on-site services of a T&E Coordinator for the duration of the program.** SADDLEBACK COLLEGE - SOCCCD'S assigned point person with presence during all group activities and available 24 hours for all group needs.
- **Group flight reservation for roundtrip from Los Angeles Airport (LAX) to Madrid with one stop and round-trip —*ONLY AVAILABLE ONCE THE GROUP REACHES 10 PAYING PARTICIPANTS and will be paid for separately. See below.**
- **Two (2) nights in Madrid – one (1) upon arrival and one (1) before departure for US (triple occupancy) with breakfast.**
- **Tapas tour in the evening upon arrival in Madrid**
- **Roundtrip group transfers by private bus: Madrid – Santander -- Madrid**
- **Airport transfers at beginning and end of program: Barajas airport - Madrid hotel - Barajas airport**
- **Accommodation in SANTANDER with Spanish families (2 students per homestay sharing a double room).**
- **Three meals per day, 7 days per week, plus a weekly laundry service (additional washes may be arranged with the homestay family for an extra cost).**
- **An orientation program in SANTANDER consisting of an orientation meeting with a T&E representative, local area information, and a walking tour of SANTANDER.**
- **Reception and Farewell dinners.**
- **Spanish language immersion courses at the Colegio Unamuno. Five (5) hours of immersion daily, 5 days a week (M-F) from 9am to 2pm. TOTAL 100 hours of immersion. Level of proficiency and courses to be determined upon completion of on-site placement test. All course materials included and tutoring if necessary.**
- **All of the necessary class materials (textbooks, photocopies and classroom handouts as well as complementary folder).**
- **Social and cultural program including events such as visits to local museums, tapas tours, Mediterranean style cooking classes, flamenco dance lessons, walking visits to local places of interest, lectures on Spanish culture, art and/or literature, viewing of Spanish films, etc...**

- **Four (4) Excursions** will be included along with group transportation by private bus, hotel accommodations with breakfast (where applicable), and sightseeing tour of the various cities with entrances to relevant historical monuments as listed and the services of a T&E tour manager and a professional English-speaking tour guide. Following are possible locations and inclusions:
 - Santander
 - Santillana del Mar and Comillas
 - Valle del Pas and Bilbao
 - Picos de Europa
- **\$50 non-refundable application fee.**
- **\$80 USD per student** for expenses in Madrid (tapas)
- **Unlimited access to computer lab with free email, printing and internet facilities.**
- **Medical and accident insurance coverage** in Spain during the duration of the program.
- **Local T&E office facilities with classroom space and local staff** available during regular office hours in Spain (9am-2pm and 5pm-8pm)

VALUE ADDED BENEFITS

- **Phone card with 200 minutes** for calls to the US for each student.
- **US Liability Insurance Policy** under which SADDLEBACK COLLEGE - SOCCCD will be named coinsured for the duration of the program. Certificates sent upon request.
- **Comprehensive Study Abroad Insurance Coverage:** Accident and Sickness, Trip cancellation and interruption, Baggage/Personal effects, Dental, Emergency Medical Reunion, Accidental death and dismemberment, Mobile App/24 hour assist, Compassionate visit, Administrative/Faculty Replacement. Additional fee may apply. See below for details.
- **US Embassy registration** for each student for the program period
- **Accounting / billing services** in the U.S.
- **Pre-departure information services and a TOLL-FREE contact number in the U.S.**
- **24 hour contact number** for emergency or for after-hours support for participants in programs outside the EST time zone.
- **Disciplinary and Safety Controls** for under-aged participants through special family assignments, curfew enforcement, zero-tolerance for substance abuse and documented warning protocols.
- **Full color comprehensive "T&E Acceptance and Orientation Packet"** and additional promotional materials including flyers and posters for university wide promotions.
- **Advance planning services** offered by our T&E office in Philadelphia.
- **Promotional digital PDF version of flyer** for reproduction by SADDLEBACK COLLEGE - SOCCCD.
- **Promotional presentations / orientations** at SADDLEBACK COLLEGE - SOCCCD campus or other specified places by T&E local staff on predetermined and mutually agreed upon dates.

FACULTY BENEFITS INCLUDED IN THE STUDENT FEE:

Target enrollments below with pro-rated scale pricing will include benefits for one (1) faculty member or administrative visit listed below:

- **Roundtrip flights between Orange County, CA and Madrid** on the scheduled group flight.
- **T&E can arrange air travel for faculty companions** if they are traveling on the standard group flight. Since fares change frequently, the cost cannot be determined until the ticket has been booked. Faculty will be billed for any companion tickets and they must be paid for in advance of planned travel. If, for any reason, a faculty member no longer requires an issued ticket, cancellation notification must reach T&E by March 23rd 2017, and s/he will need to pay a \$200 cancellation fee. After this date, the ticket is non-refundable and faculty will be responsible for the entire cost. Faculty may charge tickets to a major credit card.
- **T&E will provide the SOCCCD faculty member with housing** in a single room in the hotel in Madrid (arrival night and 1 night prior to departure) and ONE bedroom apartment while in Santander.
- **A pay-as-you-go mobile phone** will be provided for accompanying faculty with courtesy credit of 100 €
- **Local Medical insurance** for the duration of the program while on Spanish soil.
- **Inclusion in Comprehensive insurance policy** as mentioned above.
- **Use of office space** with internet / phone / fax as well as copy machines.

- **Use of classroom space** for group meetings or for the teaching of predetermined SADDLEBACK COLLEGE - SOCCCD course(s). *Limit two (2) hours a week for this offer. Additional hours negotiable.*
- **Full participation on all activities** scheduled on the itinerary, on the same basis as the students, including transfers, entrances, sightseeing tours, etc.

For group participation in summer programs the faculty benefits listed above will be for the entire program period. For long-term group participation faculty benefits will be for a period of one (1) week during the group program period. Faculty benefits are paid in full for an enrollment of specified paying participants as listed below, or pro rata for a lower enrollment.

Provided classroom space will be limited to (2) two hours per week. Additional time can be solicited for a supplemental fee. Students need not participate in the same program in order to be included in the minimum number of participants however they must be participating during the same program period with the same or similar dates.

PROGRAM OPTIONS AND FEES:

- **\$4484** US Dollars per participant for an enrollment of **10-15 paying student participants** with ONE (1) faculty administrative visit.
- **\$4394** US Dollars per participant for an enrollment of **16 or more paying student participants** with ONE (1) faculty administrative visit.

These fees are guaranteed not to change as a result of fluctuations in the \$/€ exchange rate.

***TARGET enrollment.**

Students can enroll on an individual basis for participation in any program however for one (1) administrative visit with full benefits as outlined in the previous section, the minimum group participation must be reached.

GROUP FLIGHT COMPONENT

IMPORTANT NOTE—The group flight is not included in the program fee above and must be paid separately:

- **Group flight Reservations:**
T&E offers the option for group flight reservations to ensure your group will travel together. **SADDLEBACK COLLEGE – SOCCCD** will need to meet a minimum sustained enrollment of **ten (10) paying participants in order to qualify**. If you choose this option,
 - A group of ten (10) must be reached by **April 7th, 2017**.
 - Students must apply to the T&E program by **April 7th, 2017**.
 - A maximum of 15 seats will be held for this group. Additional seats must be contracted separately and may carry a higher cost.
 - **Once applied, everyone will be supplied with a link for T&E flight portal where they can visit to purchase their individual airline ticket.**
 - ***Contracted price per ticket will be made available once the group reaches minimum.**
- Students who do not reserve airfare through the suggested student flight option will be responsible for securing their own flight which should arrive before or at the same time as the contracted flight listed in this proposal. It is also their responsibility to check for any possible schedule changes with the T&E contracted itinerary to ensure their arrival coincides with the group. **IMPORTANT NOTE:** ***Transfers to and from the airport will not be provided for students arriving outside of the scheduled transfer time which is based on the T&E contracted flight for the group.***

NOT INCLUDED IN PROGRAM FEES:

- Airline fees and fuel surcharges
- Mandatory **\$125** refundable damage deposit to be collected from each student and returned to each individual student by T&E Philadelphia office upon completion of program if no damages are reported. If the institution is being invoiced for the entire group there will be a flat charge of \$1000 for groups with up to 15 students.
- Faculty compensation
- Visa and or passport fees.
- Meals other than those indicated on itinerary.
- Personal expenses.
- Additional field trips that have not been specified.
- Usage and upgrades on provided mobile phones.

OPTIONAL COMPONENTS:

- **Additional Administrative visits: \$950** per administrative visit for full faculty benefits.
- Single room supplement: \$200 for short term. *This applies only to the homestay component of the academic program.*

PROPOSED PROGRAM APPLICATION PROCEDURE, BILLING, PROMOTIONS AND FOLLOW-UP

(This procedure can be modified according to the needs and general practice of at SADDLEBACK COLLEGE - SOCCCD)

- T&E would require SADDLEBACK COLLEGE - SOCCCD to instruct students to apply to the appropriate program via the provided link below.
 - **2017 Online Student Application link for SADDLEBACK COLLEGE - SOCCCD Spain Program** (link will become live once program is approved)
- A total deposit per student of **\$700** (\$450 non-refundable program deposit plus airfare deposit of \$250) must be collected and sent to the T&E office along with a group roster (student names and emails) by **February 24th, 2017**. Penalties apply to changed program bookings after this date.
- Students must purchase the airfare by: **TBA**
- T&E will bill students directly who will then be responsible keeping up with T&E payment schedule as outlined on the T&E invoice. **All T&E invoices are sent via email only.** Please contact T&E if a hard copy invoice is required.
- **Payment Schedule:**

Payment	Date	Amount Due
Deposit	February 24, 2017	\$700
1st Installment	March 17, 2017	\$1500
2nd Installment	April 14, 2017	\$1500
Final Payment	May 12, 2017	Final payments due

- Students applying after **April 7th, 2017** can only be accepted on a space-available basis and will be enrolled in a land-only program. T&E guidelines set forth in the T&E Application Contract must be followed when making airline reservations in order to take T&E provided transfer services to and from the Barajas Airport in Madrid to the program site. Should the T&E guidelines not be followed, participants will be responsible for their own transportation to or from the Madrid airport and their chosen program site.

- The assigned **SADDLEBACK COLLEGE - SOCCCD** accompanying program director must fill out an online form no later than **April 7th, 2017**. Administrative will be asked a series of questions regarding preferences on communications with the group and other important items. Use the following link to register: [T&E Accompanying Faculty Application](#). Faculty will then receive a "T&E Welcome Email" which will provide access to their online inscription. From the online inscription record, faculty will be provided with a link to monitor student enrollment and access student files.
- The school administration and **SADDLEBACK COLLEGE - SOCCCD** will promote the program on an appropriate institutional website listing or through the various available institutional outlets in order to ensure student awareness of the program offering at **SADDLEBACK COLLEGE - SOCCCD**.
- T&E will be invited to present programs to **SADDLEBACK COLLEGE - SOCCCD**'s students and parents on predetermined and agreed upon dates during strategic periods of each academic term and will be provided with dates with sufficient time to plan for attendance. If T&E is unable to attend in person we will offer other options via video conferencing platforms.

REFUND POLICY

Should an individual participant withdraw from the program they must do so in writing to T&E and the following policy will apply based on the date of withdrawal...

If participant withdrawals in writing...	he / she receives...
on or before April 8th, 2017	A refund of all fees paid less \$450 non-refundable application fee plus any additional non-refundable deposits paid by the student or by T&E on behalf of the student
After April 8th, 2017 but before April 15th, 2017	A refund of all fees paid less \$450 non-refundable application fee plus an additional \$250 airline deposit as well as any additional non-refundable deposits paid by the student or by T&E on behalf of the student.
After April 15th 2017 but before April 29th, 2017 .	A refund of all fees paid less \$450 non-refundable application fee plus an additional \$250 airline deposit and \$1000 processing and insurance plus any other fees incurred by T&E on the students behalf.
After April 30th, 2017	No refund

- Once the program has begun students withdrawing receive no refund unless T&E suspends the program.
- It is understood that **SADDLEBACK COLLEGE - SOCCCD** will not cancel the program if the necessary minimum number of participants have not been enrolled by **May 6th, 2017** for summer group participation.
- **Force Majeure:** The Parties agree that, if by reason of strike or other labor disputes, civil disorders, severe weather, acts of God, acts of terror, war, pandemic, or other unavoidable cause beyond the control of the party seeking to invoke this paragraph, either Party is unable to perform its obligation, such non-performance shall not be considered a breach of this Agreement. In the event a US Department of State travel warning is issued advising against travel to Spain, **SADDLEBACK COLLEGE - SOCCCD** may refrain from sending students to Spain and in such event shall only pay for actual and documented costs incurred by Travel & Education for the scheduled program.

- In the case of the U.S. State Department issuing a travel warning which advises U.S. citizens not to travel to Spain or to leave the country if they are already there, T&E will:
 - If the program has not started, either make suitable alternative arrangements or cancel the program and refund all fees paid.
 - If the program has started, suspend the program and fly the students home. If students are returned home they will receive a prorated rebate of fees paid to T&E for the portion of the program not completed, less the \$200 processing fee, the \$75 insurance premium, the \$95 non-refundable application fee and any costs incurred for flying the student home.
- **Loyalty Clause:** As part of the terms of this agreement, SADDLEBACK COLLEGE - SOCCCD will not actively seek out or accept any offer of a direct relationship with any of the academic institutions or organizations who partner with T&E in Spain to supply academic and/or other services as part of the T&E provided program for the next 3 terms starting from the effective date of this contract.

ADDITIONAL CONSIDERATIONS

If participants are taking immersion courses, each student must take a placement test which will be provided online prior to departure and/or by the host institution at the beginning of the academic program to determine the linguistic ability of the student and they will be placed in accordance to their level. This implies that not all of SADDLEBACK COLLEGE - SOCCCD students will be in the same language classes for the duration of the program. This also implies that if the student is not at the necessary level of proficiency to be accommodated in his/her chosen course options they may not be admitted into those courses and, in turn, be offered appropriate courses for their determined level of proficiency.

Airfare is the responsibility of each individual participant and any accompanying faculty unless otherwise indicated on this contract. T&E guidelines set forth in the T&E Application Contract must be followed when making airline reservations in order to take T&E provided transfer services to and from the Barajas Airport in Madrid to the program site. Should the T&E guidelines not be followed, participants will be responsible for their own transportation to or from the Madrid airport and their chosen program site.

The present agreement is subject to all of the policies, terms and conditions set forth in the T&E brochure and T&E Application Contract.

The present agreement will be valid for the 2017 academic term with the mutually implicit understanding that T&E and SADDLEBACK COLLEGE - SOCCCD will continue a relationship for the offering of T&E programs to SADDLEBACK COLLEGE - SOCCCD students for both short and long term study abroad options. The present contract will be reviewed and drawn up on an annual basis and will be negotiated at the start of the promotional period for the following academic term.

ACCEPTANCE OF PROPOSAL

Travel & Education requires written acceptance of this proposal by **November 18th, 2016** in order to prepare program materials, make the relevant bookings and to guarantee the price quoted. Please sign and date below to confirm that the components listed in this proposal fulfill your program requirements. Once signed, this document can be sent in its entirety via regular mail to **Travel & Education, 1055 Mill Creek Drive, Feasterville-Trevose, PA 19053** or by fax to 215-396-0236. Should a signed agreement not be submitted by the specified due date above and SADDLEBACK COLLEGE - SOCCCD subsequently launches a group program through Travel & Education Corp during term quoted, the formal acceptance of this agreement will be implied and will be binding with the stated terms and conditions.

Alerts and Warnings

Travel Warnings

We issue a Travel Warning when we want you to consider very carefully whether you should go to a country at all. Examples of reasons for issuing a Travel Warning might include unstable government, civil war, ongoing intense crime or violence, or frequent terrorist attacks. We want you to know the risks of traveling to these places and to strongly consider not going to them at all. Travel Warnings remain in place until the situation changes; some have been in effect for years.

Travel Alerts

We issue a Travel Alert for short-term events we think you should know about when planning travel to a country. Examples of reasons for issuing a Travel Alert might include an election season that is bound to have many strikes, demonstrations, or disturbances; a health alert like an outbreak of H1N1; or evidence of an elevated risk of terrorist attacks. When these short-term events are over, we cancel the Travel Alert.

ENROLL

TO: Board of Trustees

FROM: Debra L. Fitzsimons, Interim Chancellor

RE: SOCCCD: Advanced Technology & Education Park (ATEP) Utilities and Infrastructure Phase I Project, Award of Bid No. 20, Griffith Company

ACTION: Approval

BACKGROUND

On June 22, 2015, the Board of Trustees approved \$7,000,000 for the Advanced Technology & Education Park (ATEP) Utilities and Infrastructure Phase I Project, and \$3,100,000 for the IVC First Building parking lot.

The ATEP Utilities and Infrastructure Phase I project includes a parking lot and site development aligned with the guidelines of the ATEP Development Framework and approved by the Board of Trustees on June 22, 2015.

STATUS

On June 2, June 9, July 7, and July 14, 2016, SOCCCD ran newspaper advertisements requesting pre-qualification submittals by general engineering contractors for the ATEP Utilities and Infrastructure Phase I project. The request for pre-qualification submittals was also posted on the district web site. Nine companies submitted and four were deemed qualified to submit bid proposals. On August 25, 2016, three of the four pre-qualified bidders attended the mandatory job walk. Three bids were received on September 29, 2016. The lowest bid meeting all specification requirements was submitted by Griffith Company in the amount of \$5,353,750 (EXHIBIT A). Staff has reviewed the bids and recommends approval.

Basic aid funds are available in the approved project budget of \$10,100,000.

RECOMMENDATION

The Interim Chancellor recommends that the Board of Trustees award Bid No. 20, Advanced Technology & Education Park (ATEP) Utilities and Infrastructure Phase I project, and approve the agreement (EXHIBIT B) with Griffith Company, in the amount of \$5,353,750.

***RECOMMENDED AWARD**

****PREQUALIFIED BUT DID NOT SUBMIT BID**

**AGREEMENT – CONSTRUCTION SERVICES, SITE UTILITIES AND INFRASTRUCTURE PHASE I
PROJECT AT ADVANCED TECHNOLOGY & EDUCATION PARK (ATEP), GRIFFITH COMPANY**

THIS AGREEMENT, dated the 14th day of November, 2016 , in the County of Orange, State of California, is by and between South Orange County Community College District, (hereinafter referred to as "DISTRICT"), and Griffith Company, 12200 Bloomfield Avenue, Santa Fe Springs, CA 9067, (562) 929-1128 (hereinafter referred to as "CONTRACTOR").

The DISTRICT and the CONTRACTOR, for the consideration stated herein, agree as follows:

1. CONTRACTOR agrees to complete the Project known as Site Utilities and Infrastructure Phase I at Advanced Technology & Education Park according to all the terms and conditions set forth in the Project Documents, including but not limited to the Notice Calling For Bids, Information for Bidders, Bid Form, Bid Security, Designation of Subcontractors, all prequalification forms submitted pursuant to Public Contract Code Section 20651.5, if any, Non-collusion Declaration, Workers' Compensation Certificate, Faithful Performance Bond, Payment Bond, Escrow Agreement, if applicable, Drug-Free Workplace Certification, Smoke-Free Workplace Certification, No Gift Policy Certification, Change Orders, Shop Drawing Transmittals, Insurance Certificates and Endorsements, Guarantees, CONTRACTOR'S Certificate Regarding Non-Asbestos Containing Materials, Disabled Veteran Business Enterprises Certification, if applicable, General Conditions, Supplemental Conditions, if any, Special Conditions, if any, Drawings, Specifications, and all modifications, addenda and amendments thereto by this reference incorporated herein. The Project Documents are complementary, and what is called for by any one shall be as binding as if called for by all.

2. CONTRACTOR shall perform within the time set forth in Paragraph 4 of this Agreement everything required to be performed, and shall provide, furnish and pay for all the labor, materials, necessary tools, expendable equipment, and all taxes, utility and transportation services required for construction of the Project. All of said work shall be performed and completed in a good workmanlike manner in strict accordance with the drawings, specifications and all provisions of this Agreement as hereinabove defined and in accordance with applicable laws, codes, regulations, ordinances and any other legal requirements governing the Project. The CONTRACTOR shall be liable to the DISTRICT for any damages arising as a result of a failure to fully comply with this obligation, and the CONTRACTOR shall not be excused with respect to any failure to so comply by any act or omission of the Architect, Engineer, Inspector, Division of State Architect, or representative of any of them, unless such act or omission actually prevents the CONTRACTOR from fully complying with the requirements of the Project Documents, and unless the CONTRACTOR protests at the time of such alleged prevention that the act or omission is preventing the CONTRACTOR from fully complying with the Project Documents. Such protest shall not be effective unless reduced to writing and filed with the DISTRICT within three (3) working days of the date of occurrence of the act or omission preventing the CONTRACTOR from fully complying with the Project Documents.

3. DISTRICT shall pay to the CONTRACTOR, as full consideration for the faithful performance of this Agreement, subject to any additions or deductions as provided in the Project Documents, the sum of Five Million Three Hundred Fifty Three Thousand Seven Hundred Fifty Dollars and 00/100 (\$5,353,750).

4. The work shall be commenced on the date of the DISTRICT'S Notice to Proceed and shall be completed within Three Hundred Ninety-Three (393) consecutive calendar days from the date specified in the Notice to Proceed.

5. **Time is of the essence.** If the work is not completed in accordance with Paragraph 4 above, it is understood that the DISTRICT will suffer damage. It being impractical and infeasible to determine the amount of actual damage, in accordance with Government Code Section 53069.85, it is agreed that CONTRACTOR shall pay to DISTRICT as fixed and liquidated damages, and not as a penalty, the sum of Three Thousand Seven Hundred Fifty Dollars(\$3,750) for each calendar day of delay until work is completed and accepted. Time extensions may be granted by the DISTRICT as provided in Article 64 of the General Conditions. Liquidated damages shall be imposed as set forth in Article 64 of the General Conditions.

6. **Termination for Cause or Non-appropriation.** In the event CONTRACTOR defaults in the performance of the Agreement as set forth in General Conditions Article 13(a) or if there is a non-appropriation of funds or insufficient funds as set forth in General Conditions Article 13(d), then this Agreement shall terminate or be suspended as set forth in General Conditions Article 13.

7. **Termination for Convenience.** DISTRICT has discretion to terminate this Agreement at any time and require CONTRACTOR to cease all work on the Project by providing CONTRACTOR written notice of termination specifying the desired date of termination. Upon receipt of written notice from DISTRICT of such termination for DISTRICT'S convenience, CONTRACTOR shall:

- (i) Cease operations as directed by DISTRICT in the notice;
- (ii) Take any actions necessary, or that DISTRICT may direct, for the protection and preservation of the work; and
- (iii) Not terminate any insurance provisions required by the Project Documents.

In case of such termination for DISTRICT'S convenience, CONTRACTOR shall be entitled to receive payment from DISTRICT for work satisfactorily executed and for proven loss with respect to materials, equipment, and tools, including overhead and profit for that portion of the work completed. In the case of Termination for Convenience, DISTRICT shall have the right to accept assignment of subcontractors. The foregoing provisions are in addition to and not in limitation of any other rights or remedies available to the DISTRICT.

8. **Hold Harmless and Indemnification.** Contractor shall defend, indemnify and hold harmless District, Architect, Construction Manager, Inspector, the State of California and their officers, employees, agents and independent contractors from all liabilities, claims, actions, liens, judgments, demands, damages, losses, costs or expenses of any kind arising from death, personal injury, property damage or other cause based or asserted upon any act, omission, or breach connected with or arising from the progress of Work or performance of service under this Agreement or the Contract Documents. As part of this indemnity, Contractor shall protect and defend, at its own expense, District, Architect, Construction Manager, Inspector, the State of California and their officers, employees, agents and independent contractors from any legal action including attorney's fees or other proceeding based upon such act, omission, breach or as otherwise required by this Article.

Furthermore, Contractor agrees to and does hereby defend, indemnify and hold harmless District, Architect, Construction Manager, Inspector, the State of California and their officers, employees, agents and independent contractors from every claim or demand made, and every liability, loss, damage, expense or attorney's fees of any nature whatsoever, which may be incurred by reason of:

(a) Liability for (1) death or bodily injury to persons; (2) damage or injury to, loss (including theft), or loss of use of, any property; (3) any failure or alleged failure to comply with any provision of law or the Contract Documents; or (4) any other loss, damage or expense, sustained by any person, firm or corporation or in connection with the Work called for in this Agreement or the Contract Documents, except for liability resulting from the sole or active negligence, or the willful misconduct of the District.

(b) Any bodily injury to or death of persons or damage to property caused by any act, omission or breach of Contractor or any person, firm or corporation employed by Contractor, either directly or by independent contract, including all damages or injury to or death of persons, loss (including theft) or loss of use of any property, sustained by any person, firm or corporation, including the District, arising out of or in any way connected with Work covered by this Agreement or the Contract Documents, whether said injury or damage occurs either on or off District property, but not for any loss, injury, death or damages caused by the sole or active negligence or willful misconduct of the District.

(c) Any dispute between Contractor and CONTRACTOR'S subcontractors/supplies/ Sureties, including, but not limited to, any failure or alleged failure of the Contractor (or any person hired or employed directly or indirectly by the Contractor) to pay any Subcontractor or Material supplier of any tier or any other person employed in connection with the Work and/or filing of any stop notice or mechanic's lien claims.

Contractor, at its own expense, cost, and risk, shall defend any and all claims, actions, suits, or other proceedings that may be brought or instituted against the District, its officers, agents or employees, on account of or founded upon any cause, damage, or injury identified herein Article 5 and shall pay or satisfy any judgment that may be rendered against the District, its officers, agents or employees in any action, suit or other proceedings as a result thereof.

The CONTRACTOR'S and Subcontractors' obligation to defend, indemnify and hold harmless the Owner, Architect, Construction Manager, Inspector, the State of California and their officers, employees, agents and independent contractors hereunder shall include, without limitation, any and all claims, damages, and costs for the following: (1) any damages or injury to or death of any person, and damage or injury to, loss (including theft), or loss of use of, any property; (2) breach of any warranty, express or implied; (3) failure of the Contractor or Subcontractors to comply with any applicable governmental law, rule, regulation, or other requirement; (4) products installed in or used in connection with the Work; and (5) any claims of violation of the Americans with Disabilities Act ("ADA").

This indemnity shall survive termination of the contract or final payment thereunder. This indemnity is in addition to any other rights or remedies which the DISTRICT may have under the law or under the Project Documents. In the event of any claim or demand made against any party which is entitled to be indemnified hereunder, the DISTRICT may in its sole discretion reserve, retain or apply any monies due to the CONTRACTOR under the Project Documents for the purpose of resolving such claims; provided, however, that the DISTRICT may release such funds if the CONTRACTOR provides the DISTRICT with reasonable assurance of protection of the DISTRICT'S interests. The DISTRICT shall in its sole discretion determine whether such assurances are reasonable.

9. CONTRACTOR shall take out, prior to commencing the work, and maintain, during the life of this Agreement, and shall require all subcontractors, if any, whether primary or secondary, to take out and maintain the insurance coverages set forth below and in Articles 16, 17, 18 and 19 of the General Conditions. CONTRACTOR agrees to provide all evidences of coverage required by DISTRICT including certificates of insurance and endorsements.

Public Liability Insurance for injuries
including accidental death, to any one

person in an amount not less than	\$2,000,000
Subcontractors of every tier	\$1,000,000
and	
Subject to the same limit for each person on account of one accident, in an amount not less than	\$2,000,000
Subcontractors of every tier	\$1,000,000
Property Damage Insurance in an amount not less than	\$2,000,000
Subcontractors of every tier	\$1,000,000
Course of Construction Insurance without exclusion or limitation in an amount not less than	\$2,000,000
Excess Liability Insurance (Contractor only)	\$2,000,000

Insurance Covering Special Hazards: The following special hazards shall be covered by rider or riders to above-mentioned public liability insurance or property damage insurance policy or policies of insurance, or by special policies of insurance in amounts as follows:

Automotive and truck where operated in amounts as above

Material hoist where used in amounts as above

Waiver of Subrogation

Contractor waives (to the extent permitted by law) any right to recover against the District, and its respective elected officials, officers, employees, agents, and representatives for damages to the Work, any part thereof, or any and all claims arising by reason of any of the foregoing, but only to the extent that such damages and/or claims are covered by property insurance and only to the extent of such coverage (which shall exclude deductible amounts) actually carried by the District.

The provisions of this section are intended to restrict each party to recovery against insurance carriers only to the extent of such coverage and waive fully and for the benefit of each, any rights and/or claims which might give rise to a right of subrogation in any insurance carrier. The District and the Contractor shall each obtain in all policies of insurance carried by either of them, a waiver by the insurance companies there under of all rights of recovery by way of subrogation for any damages or claims covered by the insurance.

Pollution Legal Liability Insurance Terms.

The Contractor shall obtain at its sole cost and expense and maintain in effect from the inception of the Contract until the District's filing of a Notice of Completion and with an extended reporting period of not less than five (5) years after the Notice of Completion, Pollution Legal Liability Insurance which provides financial protection and assurance for benefit of the District, for all claims, losses, expenses, and costs related to or arising from pollution

conditions, including those related to asbestos containing materials, lead based paint, PCB's and petroleum products and their derivatives that are created, released or conveyed through the Contractor's or the Contractor's agents' activities and performance under the contract, including negligence or failure to perform the project.

Contractor shall provide to the District and the City of Tustin with ten (10) working days after the Notice of Award of the contract evidence of the aforementioned insurance with insurer endorsements, which must meet the requirements of this Article. An Acor Certificate will be accepted solely as evidence of the name of the insurers and the amounts of insurance. Failure to comply with these requirements will result in annulment of the award, forfeiture of the proposal guarantee, and the District will pursue award to the next qualified responsive bidder. Contractor is advised that insurance requirements are non-negotiable and the District will not consider waiving insurance requirements. There are no exceptions.

Contractor shall provide District and the City of Tustin with a Certificate of Insurance form which evidences the required insurance. The certificate shall be submitted with the contract documents and shall cover risks associated with personal injury, property damage, defense costs, and remediation costs, in an aggregate amount of not less than \$5,000,000.00 and with a self-insured retention amount not in excess of \$100,000.00 per claim. Such insurance contract shall name the District, the City of Tustin, the Tustin Public Financing Authority, and the Tustin Community Redevelopment Agency and the Department of the Navy (only for those portions of the project within the boundaries of the properties listed as Lease in Furtherance of Conveyance "LIFOC" as additional insured, without any limitations on coverage different from those provided for the Contractor. Such policy shall provide that the carrier waives any right of subrogation against the City of Tustin, the Tustin Public Financing Authority, and the Tustin Community Redevelopment Agency and the Department of the Navy. Such policy shall not be cancellable by the Contractor without the prior written consent of the District and the City of Tustin, and shall have the premium paid at inception and 100 percent earned at that time. Contractor shall provide evidence of its ability to satisfy multiple self-insured retention amounts (Multiple SIRs would be the SIR for each claim, so if there were 5 claims, the Contractor would have to satisfy the \$100,000.00 SIR 5 times).

Additional Insured Endorsement Requirements.

The Contractor shall name, on any policy of insurance required the District, their officers, employees, Construction Manager, Architect, and all other Agents and Representatives as additional insureds. Subcontractors shall name the Contractor, the District, their officers, employees, Construction Manager, Architect, and all other Agents and Representatives as additional insureds. The Additional Insured Endorsement included on all such insurance policies shall state that coverage is afforded the additional insured with respect to claims arising out of operations performed by or on behalf of the insured. The additional insured endorsement shall be an ISO CG 20 10 (04/13), or an ISO CG 20 38 (04/13), or their equivalent as determined by the District in its sole discretion. If the additional insureds have other insurance that is applicable to the loss, such other insurance shall be on an excess or contingent basis. The insurance provided by the Contractor must be designated in the policy as primary to any insurance obtained by the District. The amount of the insurer's liability shall not be reduced by the existence of such other insurance.

10. Public Contract Code Section 22300 permits the substitution of securities for any retention monies withheld by the DISTRICT to ensure performance under this Agreement. At the request and expense of the CONTRACTOR, securities equivalent to the monies withheld shall be deposited with the DISTRICT, or with a state or federally chartered bank in California as the escrow agent, who shall then pay such monies to the CONTRACTOR. The DISTRICT retains the sole discretion to approve the bank selected by the CONTRACTOR to serve as escrow agent. Upon satisfactory completion of the Agreement, the securities shall be returned to the CONTRACTOR. Securities eligible for investment shall include those listed in Government Code Section 16430 or bank or savings and loan

certificates of deposit. The CONTRACTOR shall be the beneficial owner of any securities substituted for monies withheld and shall receive any interest thereon.

In the alternative, under Section 22300, the CONTRACTOR may request DISTRICT to make payment of earned retention monies directly to the escrow agent at the expense of the CONTRACTOR. Also at the CONTRACTOR'S expense, the CONTRACTOR may direct investment of the payments into securities, and the CONTRACTOR shall receive interest earned on such investment upon the same conditions as provided for securities deposited by CONTRACTOR. Upon satisfactory completion of the Agreement, CONTRACTOR shall receive from the escrow agent all securities, interest and payments received by escrow agent from DISTRICT pursuant to the terms of Section 22300.

11. Prevailing Wages. Wage rates for this Project shall be in accordance with the general prevailing rate of holiday and overtime work in the locality in which the work is to be performed for each craft, classification, or type of work needed to execute the Contract as determined by the Director of the Department of Industrial Relations. Copies of schedules of rates so determined by the Director of the Department of Industrial Relations are on file at the administrative office of the District and are also available from the Director of the Department of Industrial Relations. Monitoring and enforcement of the prevailing wage laws and related requirements will be performed by the Labor Commissioner/ Department of Labor Standards Enforcement (DLSE). The following are hereby referenced and made a part of this Agreement and Contractor stipulates to the provisions contained therein: (1) Chapter 1 of Part 7 of Division 2 of the Labor Code (Section 1720 et seq.); and (2) California Code of Regulations, Title 8, Chapter 8, Subchapters 3 through 6 (Section 16000 et seq.)

12. If CONTRACTOR is a corporation, the undersigned hereby represents and warrants that the corporation is duly incorporated and in good standing in the State of California, and that Lucas J. Walker, whose title is Vice President/Regional Manager, is authorized to act for and bind the corporation.

13. Each and every provision of law and clause required by law to be inserted in this Agreement shall be deemed to be inserted herein and the Agreement shall be read and enforced as though it were included herein, and if through mistake or otherwise any such provision is not inserted, or is not currently inserted, then upon application of either party the Agreement shall forthwith be physically amended to make such insertion or correction.

14. This Agreement constitutes the entire agreement of the parties. No other agreements, oral or written, pertaining to the work to be performed, exists between the parties. This Agreement can be modified only by an amendment in writing, signed by both parties and pursuant to action of the Governing Board of the District. This Agreement shall be governed by the laws of the State of California.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be executed.

RE: SOCCCD: Board Policy Revision: BP-4202 Transfer of Sick Leave for Classified Personnel, BP-4420 Enrollment Fee Reimbursement for Eligible Employees, BP-5130 Financial Aid, BP-5200 Student Health Services, BP-5625 Students in the Military

ACTION: Approval

BACKGROUND

Board policies and administrative regulations are periodically reviewed to ensure that they are satisfactory, meet the District's needs, and are in compliance with current laws and regulations.

STATUS

Five board policies are presented to the Board of Trustees for discussion and approval. The new language to the board policies was reviewed and revised by the District's Board Policy and Administrative Regulation Advisory Council and includes collegial consultation with the Academic Senates, pursuant to Title 5 Section 53200 et. seq.

Legal counsel has been involved throughout the review process. The proposed policies were presented to the Chancellor's Council on October 13, 2016 for review and recommendation to the Chancellor.

RECOMMENDATION

The Interim Chancellor recommends that the Board of Trustees approve the board policies as shown in EXHIBIT A through E.

BOARD POLICY

4202

SOUTH ORANGE COUNTY
COMMUNITY COLLEGE DISTRICT

HUMAN RESOURCES

TRANSFER OF SICK LEAVE FOR CLASSIFIED PERSONNEL

Any classified employee of a community college district, school district, or county superintendent of schools who has been employed for a period of one calendar year or more whose employment is terminated for reasons other than action initiated by the employer for cause and who subsequently accepts employment with the South Orange County Community College District within one year of such termination of his/her former employment, shall have transferred with him/her the total amount of earned leave of absence for illness or injury to which he/she is entitled under California Education Code. In any case where an employee was terminated as a result of action initiated by his/her former employer for cause, such a transfer may be made if agreed to by the Board of Trustees. The District may elect to allow transferred service to apply toward seniority, provided that personnel reduction has not been ordered.

RE: SOCCCD: Board Policy Revision: BP-109 Board Education

ACTION: Review and Study

BACKGROUND

Board policies and administrative regulations are periodically reviewed to ensure that they are satisfactory, meet the District's needs, and are in compliance with current laws and regulations.

STATUS

One board policy is presented to the Board of Trustees for review and study. The new language to the board policy was reviewed and revised by the District's Board Policy and Administrative Regulation Advisory Council and includes collegial consultation with the Academic Senates, pursuant to Title 5 Section 53200 et. seq.

Legal counsel has been involved throughout the review process. The proposed policy was presented to the Chancellor's Council on November 3, 2016 for review and recommendation to the Chancellor.

RECOMMENDATION

The Interim Chancellor recommends that the Board of Trustees accept for review and study the board policy as shown in EXHIBIT A.

BOARD POLICY

109

SOUTH ORANGE COUNTY
COMMUNITY COLLEGE DISTRICT

BOARD OF TRUSTEES

BOARD EDUCATION

The Board of Trustees is committed to its ongoing development as a board as a whole and to a formalized trustee education program that includes new trustee orientation. The board understands that ongoing training and professional development is key to being a strong effective board. To that end, the Board will engage in regular required board training sessions, study sessions, provide access to reading materials, new board member orientations, and support conference attendance and other activities that foster trustee education.

I. RESPONSIBILITY

It is the responsibility of each individual trustee to pursue professional development opportunities to maintain knowledge of evolving educational governance, policies, legislation, best practices, employee relations, leadership, and accreditation standards and expectations.

II. GUIDELINES

1. All board members will attend regular required board training sessions to be held at the district twice per year, in the months of January and September/October, to be facilitated by a professional board trainer/consultant and coordinated by the SOCCCD Chancellor.
2. The Chancellor will provide for a new trustee orientation program for any newly appointed or elected board members, which will be required to be completed no later than 45 days after they become a board member. This orientation will include both internal district and college information, as well as basic training for new board members as recommended by such organizations as the Community College League of California (CCLC), the Association of Governing Boards (AGB), the Association of Community College Trustees (ACCT).
3. Newly elected board officers (including board president) will be required to have board president training within 45 days after they become the new board president. This training can be held at the district by a consultant or the trustee can attend this training at another location.
4. All board members will receive regular training on topics to include but not be limited to a) the roles and responsibilities of board members, b) development of the chancellor/board relationship, c) accreditation standards, d) understanding board policy making, e) effective parliamentary procedure, how to conduct a meeting, and Brown Act requirements, f) board fiduciary responsibilities, g) closed session and legal matters confidentiality, h) board communication and protocols, ~~and~~ i) board ethics, ~~ii)~~ participatory governance.

Adopted: 6-26-06
Revised: 8-27-07
Revised: 5-20-13
Revised: 8-26-13

- 1-5. Individual trustees are encouraged to participate, along with the chancellor, in at least one conference per year that provides professional development of trustee-related knowledge and skills with an emphasis on the Community College League of California (CCLC), the Association of Governing Boards (AGB), the Association of Community College Trustees (ACCT), Academic Senate for California Community Colleges (ASCCC), or trustee community college organizations.
- 2-6. On an annual basis, the Chancellor will circulate and recommend a list of national, state and regional conferences for trustees to select which they will attend, in order to take advantage of discounts on early registration and travel. It is encouraged that board members and the chancellor attend together.
- 3-7. The District will budget for each trustee to participate in up to two out of district conferences each year, in addition to participation/presentations at regional meetings and workshops. The District will budget for the regularly required board trainings and orientations as described in this board policy.
8. At the board meetings following conferences, workshops and meetings, trustees are ~~encouraged~~ to share their written report from attendance of such conferences, meetings or workshops. The Board President may allow additional time for oral reports beyond the allotted two minutes, provided in the board report section of the agenda.
9. Board members who are appointed to Board Committees will participate in training related to that committee subject matter and regularly attend the scheduled meetings. They will provide reports back to the full board periodically.
- 4-10. There will be an annual board retreat held in the spring/summer in which the board will do both a self-evaluation and have additional training sessions.

TO: Board of Trustees
FROM: Debra L. Fitzsimons, Interim Chancellor
RE: SOCCCD: Academic Personnel Actions – Regular Items
ACTION: Ratification

BACKGROUND

In accordance with Board Policy 2100, all SOCCCD employee actions must be ratified by the Board of Trustees.

STATUS

Personnel are employed in the South Orange County Community College District for the purpose of meeting the needs of students.

Those academic personnel actions shown in Exhibits A and B are presented to the Board of Trustees for ratification to be effective on the dates as shown on the Exhibits.

RECOMMENDATION

The Chancellor recommends that the Board of Trustees ratify the academic personnel actions as shown in Exhibits A and B.

SOUTH ORANGE COUNTY COMMUNITY COLLEGE DISTRICT

EQUIVALENCY

As outlined in the Academic Hiring Policies, Division 1, Part 4, Section 3B, Review of Equivalent Minimum Qualifications, members of the hiring committee, including faculty with discipline expertise, have met and rendered an affirmative decision that each recommended candidate possesses the educational background equivalent to the minimum qualifications for each respective position. As such, the following individuals are submitted for approval/ratification as part-time instructors under Equivalencies as outlined in the Title 5 Regulations and Minimum Qualifications, Article 2, Section 53430.

¹ Correction to 10/24/16 Board Agenda. Start date is 12/5/16, not 1/17/17

A. NEW PERSONNEL APPOINTMENTS - Continued

3. **ACADEMIC TEMPORARY PART-TIME/SUBSTITUTE STAFF** (Ratified - Pursuant to Board Policy 4002.1)

<u>Applicant</u>	<u>Highest Degree</u>	<u>Assignment</u>	<u>Approx. Salary Placement</u>	<u>Start Date</u>
Abdou, Marc	BA/Business Admin.	Communication/SC	1	01/17/17

Equivalency is based on a Bachelor's in Business Administration and professional experience in video and film production. Mr. Abdou is an Emmy Award winning video editor of several educational television series and has served the video production community as a technical video engineer.

Buzdygan, Jolanta	MS/Elem. Education	ESL/SC	2	01/17/17
-------------------	--------------------	--------	---	----------

Equivalency is based on a Master's Degree in Education from Jagiellonian University in Krakow, Poland, and an earned certificate in TESL from the University of California, Irvine in 1997. Ms. Buzdygan has been teaching English as a Second Language at Santa Ana College since 2015. She has also been teaching ESL full time at UC Irvine since 2011.

² Mitolo, Massimo	PhD/Electrical Engin.	Physics/IVC	5	01/17/17
------------------------------	-----------------------	-------------	---	----------

Equivalency is based on a PhD in Electrical Engineering. Mr. Mitolo has several years of diverse teaching experience in Physics, Mathematics, Electrical Systems and Electromechanical Equipment.

Reinhardt, William	PhD/Human&Org Syst	Emeritus/SC	5	01/17/17
--------------------	--------------------	-------------	---	----------

Equivalency is based on extensive education and professional experiences. Dr. Reinhardt graduated from the U.S. Merchant Marine Academy at Kings Point and served shipboard in the U.S. Navy as Operations Officer and Navigator. After completing U.S. Navy Instructor Training in San Diego, he was assigned for two years as an Assistant Professor teaching Naval Science at the State University of New York, Fort Schuyler. Honorably discharged from the Navy, he advanced to executive Management positions in the civilian workforce. He completed a Master's degree in Management at Claremont Graduate University, and a second Master's and a PhD in Human and Organizational Systems at Fielding Graduate University in Santa Barbara, CA. He made numerous teaching presentations throughout his career and most recently gave guest lectures and book reviews to the Concerned Citizens Club before 250 senior residents in Laguna Woods. He is currently writing a book, "Brainwashed: The Manipulation of the American Mind."

² Full-time Electrical Technology Instructor at Irvine Valley College

B. ADDITIONAL COMPENSATION: GENERAL FUND

1. It is recommended that the following **Irvine Valley College** faculty members be compensated as indicated below for the 2016/2017 fiscal years.

ATTACHMENT 1

South Orange County Community College District

ASSISTANT DEAN OF DIVISION/DIRECTOR OF EMERITUS INSTITUTE – JC #, Academic Administration, Integrated Academic and Classified Administrator and Manager Salary Schedule 2

DEFINITION

Provide primary leadership and administration for the planning, developing, implementing, directing, monitoring, reviewing and evaluating non-credit programs for the Emeritus Institute (Older Adult Education) for Saddleback College; conduct needs assessments and develop relevant non-credit programs that meet identified needs; select, train, supervise, and evaluate program instructors and office staff.

Serve as secondary administrator in the leadership, supervision, guidance, growth and direction for local, regional, and State initiatives associated with the division and provide the Dean with other assistance as directed and needed.

To foster a culture of collaboration, mutual respect, innovation, and continuous improvement throughout the District; lead by example; actively participate in and support District-wide participatory governance components and activities and other collaborative processes; encourage professional excellence among the staff and promote an organizational culture of customer service, innovation, and quality services.

SUPERVISION RECEIVED AND EXERCISED

Receives direction from the Dean of Community Education, Emeritus Institute and K-12 Partnerships or presidential designee. Exercises functional and technical supervision over contracted instructional staff and permanent support personnel.

EXAMPLES OF DUTIES - Duties may include, but are not limited to, the following:

1. Develop, implement, manage and evaluate non-credit academic and community outreach programs and related services within the Division and the Emeritus Institute, including managing student recruitment funnels, enrollment management KPIs, resource development partnerships, community involvement, and teaching site attainment; secure and schedule the use of on and off-campus facilities for classes while ensuring compliance with standards, rules, and regulations of leased facilities; provide classroom sites of sufficient size to accommodate unique needs of student populations.
2. Provide strategic and operational leadership in the development, assessment and delivery of high quality, innovative courses to a diverse group through enhanced non-credit-certificates, courses, workshops, lifelong learning and other educational events and related activities, as determined by the needs of the workplace and the community; oversee course scheduling and development activities, overall deployment of faculty and staff assignments; conduct evaluations, orientation, coaching and professional development to faculty and staff; closely manage instructional delivery for courses within assigned non-credit areas of instruction; and serve as primary contact with assigned department chairs, directors and coordinators.
3. Assist in the development of marketing strategies leading to the growth, enhancement and recognition of the departments as State-wide leaders; provide leadership and management, and maintain accountability for assigned departments' faculty, staff, and operations; hold regularly scheduled meetings with direct reports; promote and support the professional development of faculty and staff; provide administrative support to Dean and provide direction to faculty chairs and staff as directed; work with faculty chairs in assignment of faculty, in the preparation of the multiple course catalogs/schedule of classes and appropriate budgets pertaining to course offerings.

South Orange County Community College District
Page 2 - Assistant Dean of Division/Director of Emeritus Institute

4. Enhance and create a widespread culture of inquiry in which thoughtful interpretation of assessment information by faculty and staff is used to improve teaching and learning; ensure the creation, distribution and evaluation of Student Learning Outcomes; utilize data informed decision-making processes to make recommendations to Dean for program adjustments; and respond to the evolving needs of current and future students.
5. Maintain current expertise in all local, regional, and State legislation and initiatives pertaining to disproportionately-impacted student groups and educational programs to meet the academic needs of determined groups; and attend campus, local, regional, and State meetings/conferences pertaining to areas of supervision.
6. Monitor program, manage campus enrollments in coordination with VPI Council; attend meetings to provide and engage in cohesive dialog and collaboration with multiple college divisions; and ensure compliance with College policies and procedures and external accrediting requirements.
7. Supervise staff by assigning and delegating tasks, providing direction, resolving work problems, communicating job expectations, and training employees; chair selection committees; serve as initial administrator for student conflicts and coordinate with Dean and Vice Presidents in the resolution of student judicial matters.
8. Recommend and develop new and/or current curriculum modifications as required; support Dean and VPI in planning, developing, coordinating, and administering academic and career programs and related academic affairs to maintain non-credit educational integrity; enable the college to develop strategies to meet emerging needs of future learners within assigned areas; research, obtain and deploy innovative technological tools across supervised areas pertaining to staff and faculty assessment, course assessment, communication with on and off-campus teaching sites and office efficiency.
9. Develop budget recommendations; manage approved and assigned budgets; monitor and oversee equipment/inventories for assigned programs; provide materials, equipment, supplies, and expenditures within the annual budget guidelines; prepare recommendations and justifications regarding budget requests; direct the forecast of additional funding for staffing, equipment, materials, and supplies; implement mid - year budget adjustments and authorize expenditures according to District policies and applicable regulations.
10. Manage and direct the preparation of short and long-range plans and strategic plans of assigned areas in support of college goals and objectives related to the educational master plan, AUR, and PRs; author AURs for assigned areas and closely collaborate with program faculty in the writing of PRs for each department.
11. Communicate college activities, plans, decisions and events to faculty, staff, and students; establish operating procedures and liaison with other divisions and departments of the college on matters relating to academic programs, physical assets and facilities.
12. Plan, develop, organize, staff, direct and evaluate administrative processes including: student registration, scheduling, fee collection, special events, payroll, accounting, purchasing, printing, and other support for departments, classes, and programs; select, hire, evaluate and train subject matter instructors and consultants to coordinate and develop activities and programs; respond to inquiries and concerns from the general public.

South Orange County Community College District
Page 3 - Assistant Dean of Division/Director of Emeritus Institute

13. Interact with community and local industry representatives and outside agencies to determine needs for existing and additional programs; and coordinate the attainment and maintenance of off-campus teaching locations throughout college service area.
14. Participate in professional and community activities which promote and extend the benefits, brand and awareness of assigned programs; develop and participate in internal and external physical and human resource development in conjunction with the college's resource allocation request process; and increase accountability of both internal and external constituents.
15. Ensure compliance with District policies and procedures and State and federal laws related to assigned program; and review and certify the accuracy of data concerning program participation.
16. Prepare and submit a variety of statistical and narrative reports; prepare budget reports, annual recap data and special reports, proposals, recommendations and other materials as requested; and coordinate and respond to periodic audits.
17. Communicate with instructional and student services program personnel, college and District administrators and support personnel, representatives of State and federal agencies, educational institutions, social service organizations, counselors and others to coordinate programs and activities and increase student enrollment and community involvement.
18. Maintain current knowledge of regulations, policies and application requirements and eligibility criteria for assigned program, including computer hardware and software enhancements.
19. Make oral presentations to students, parents, counselors and professional colleagues at various gatherings; conduct workshops to provide specialized information regarding the Emeritus Institute and related student services; and develop and direct the distribution of brochures, flyers and other materials to publicize opportunities for students.
20. Foster a culture of collaboration, mutual respect, innovation, and continuous improvement throughout the District; lead by example; actively participate in and support District-wide participatory governance components and activities and other collaborative processes; encourage professional excellence among the staff and promote an organizational culture of customer service, innovation, and quality services.
21. Perform other related duties as assigned.

QUALIFICATIONS

EDUCATION AND EXPERIENCE GUIDELINES:

Any combination of education and experience that would likely provide the required knowledge and abilities is qualifying. A typical way to obtain the knowledge and abilities would be:

South Orange County Community College District
Page 4 - Assistant Dean of Division/Director of Emeritus Institute

Education:

A Master's degree from an accredited college or university with major course work in education, gerontology, public administration, human services or closely related field.

Experience:

At least three years of increasingly responsible teaching, counseling, student services or other directly-related work experience, preferably in an administrative capacity, at an institution of higher education, including experience in working with older adults and evidence of a sensitivity to and understanding of the diverse academic, socioeconomic, cultural, physically challenged, and ethnic backgrounds of community college students.

Desirable Experience:

Evidence of an understanding of and experience with the principles of participatory governance and the ability to develop and implement technology-based solutions to curriculum and instructional issues is preferred.

LICENSE AND OTHER CERTIFICATION:

Valid California driver's license.

Knowledge of:

Applicable District policies and local, State and federal laws, codes and regulations.

Budget preparation and administration.

Community college curriculum development processes for non-credit courses.

Community demographics and consumer trends.

Computer systems and software applications related to area of assignment, including capabilities and limitations.

Correct English composition, grammar, spelling and vocabulary.

Curriculum content of non-credit, tuition-free and fee-based courses.

Development and coordination of educational programs associated with older adults at a community college.

District and College organization, operations and objectives.

Interpersonal skills including tact, patience and diplomacy.

Marketing, promotion and public relations techniques.

Modern office practices, procedures, methods, and equipment.

Modern principles, practices, methods and techniques of administration.

Operation of computer, peripherals and software programs, including student information systems, database management, spreadsheet, word processing and specialized software.

Oral and written communication skills.

Planning and organizational skills.

Preparation, publication and distribution of informational and promotional materials.

Principles and practices of financial record-keeping and reporting.

Principles and practices of training, supervision and performance evaluation.

Statistical procedures and mathematical concepts.

Ability to:

Analyze problems, identify alternative solutions, project consequences of proposed actions and implement recommendations in support of goals.

Assess the needs and trends of the adult and senior community and develop appropriate programs.

Collect, compile and analyze data.

South Orange County Community College District
Page 5 - Assistant Dean of Division/Director of Emeritus Institute

Ability to:

Communicate clearly, concisely and effectively, both orally and in writing, with diverse constituencies within and outside of the District.

Develop, implement and evaluate the delivery of instruction to adults, including older adults.

Encourage professional excellence among the staff and promote an organizational culture of customer service, innovation, and quality services.

Establish and maintain cooperative working relationships with those contacted in the course of work.

Interpret, apply and explain applicable District policies and procedures and local, State and federal laws and regulations.

Maintain current knowledge of non-credit educational programs for adults, including older adults.

Maintain the security of confidential materials.

Operate computer and applications software, including database management, spreadsheet, word processing and software related to area of assignment.

Plan and organize work.

Plan, organize, coordinate and direct a comprehensive Emeritus Institute program.

Prepare and administer budgets for assigned program areas.

Prepare oral and written reports and recommendations.

Relate effectively to people of varied academic, cultural and socio-economic background using tact, diplomacy and courtesy.

Respond to requests and inquiries from the public.

Select, train, lead, direct, supervise and evaluate the performance of assigned personnel.

Understand and effectively and collaboratively work in a complicated multi-college environment, as well as within a system of community college districts.

Work effectively with others to achieve common goals including student recruitment and retention.

Work independently with minimum administrative direction.

WORK ENVIRONMENT AND PHYSICAL DEMANDS

The work environment and physical demands described here are representative of those required by an employee to perform the essential functions of this job successfully. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

Work Environment

Standard office setting. Duties are performed primarily in an office environment while sitting at a desk or computer workstation. Work also requires travel to various community locations to scout locations for classes, attend meetings or otherwise conduct work. Incumbents are subject to contact with students, frequent interruptions, noise from talking or office equipment and demanding legal timelines. At least minimal environmental controls to assure health and comfort.

Physical Demands

Incumbents regularly sit for long periods, walk short distances on a regular basis, use hands and fingers to operate an electronic keyboard or other office machines, reach with hands and arms, stoop or kneel or crouch to file, speak clearly and distinctly to answer telephones and to provide information; see to read fine print and operate computer; hear and understand voices over telephone and in person; and lift, carry, and/or move objects weighing up to 10 pounds.

Finalized by Marlys Grodt and Associates, September 4, 2016
Approved by the Board of Trustees, November 14, 2016

November 14, 2016

TO: Board of Trustees

FROM: Debra L. Fitzsimons, Interim Chancellor

RE: SOCCCD: Classified Personnel Actions – Regular Items

ACTION: Ratification

BACKGROUND

In accordance with Board Policy 2100, all SOCCCD employee actions must be ratified by the Board of Trustees.

STATUS

Personnel are employed in the South Orange County Community College District for the purpose of meeting the needs of students.

RECOMMENDATION

The Chancellor recommends that the Board of Trustees ratify the classified personnel actions as shown in Exhibit A, Exhibit B and Exhibit C.

SOUTH ORANGE COUNTY COMMUNITY COLLEGE DISTRICT

South Orange County Community College District

**HUMAN RESOURCES COMPLIANCE SUPPORT SPECIALIST – JC #, Classified Bargaining Unit
Salary Schedule 127**

Class specifications are intended to present a descriptive list of the range of duties performed by employees in the class. Specifications are not intended to reflect all duties performed within the job.

SUMMARY DESCRIPTION

Under direction from the Director and other administrators as assigned, provides specialized administrative and clerical assistance in support of the Human Resources functions of employer/employee relations, equal employment opportunity, diversity compliance and training; performs duties with minimal supervision and direction, exercising initiative, judgment and discretion in receiving and providing highly sensitive and confidential information; provides information relative to assigned area of responsibility to students, faculty, staff, and the community; establishes and maintains files and records; monitors and ensures various timelines and deadlines are met; prepares reports and correspondence as directed.

DISTINGUISHING CHARACTERISTICS

This is a specialized administrative support classification that performs a wide variety of duties to facilitate the smooth functioning of the assigned office, including the follow up and investigation of Title IX complaints. Incumbents at this level typically receive instruction or assistance only as new or unusual situations arise, and must be fully aware of District policies and procedures and relevant laws and regulations pertaining to unlawful discrimination, sexual harassment, and other violations of rights. Information received and processed is typically highly sensitive and confidential, requiring the incumbent to exercise discretion in making sound decisions.

REPRESENTATIVE DUTIES

The following duties are typical for this classification. Incumbents may not perform all of the listed duties and/or may be required to perform additional or different duties from those set forth below to address business needs and changing business practices.

1. Provide assistance to assigned administrator(s) in organizing and coordinating departmental functions and activities; plan and organize work processes to ensure timely completion of office activities; develop schedules to ensure deadlines/timelines are met; keep supervisor and other departmental staff apprised of essential timelines.
2. Provide information and assistance to students, faculty, staff, and community members on District policy and procedures related to unlawful discrimination and harassment prevention; respond quickly and effectively to questions and complaints, using judgment in referring situation(s) appropriately; prepare and maintain detailed case records, ensuring all timelines are met.
3. Serve as liaison between the department and District staff, the Colleges, and the community by relaying messages, answering questions, clarifying information, responding to requests, resolving problems, explaining policies and procedures, and/or referring callers to the administrator or others as necessary.
4. Participate in planning and coordinating District wide training; prepare training materials from general and specific information; provide staff assistance during training activities as necessary.
5. Collect, research, compile, analyze, verify, summarize, record, and evaluate information; prepare required and ad hoc reports related to departmental activities; ensure mandated reports are submitted in a timely manner.
6. Compose correspondence and narrative reports independently; prepare preliminary responses to letters, general correspondence, and personal inquiries of a sensitive nature, grievances and complaints, for administrator's approval.

South Orange County Community College District
Page 2 - Human Resources Compliance Support Specialist

7. Utilize electronic technology to correspond with others and to maintain assigned calendars, schedules, and appointments; maintain and generate reports from a database or network system; coordinate and arrange meetings; coordinate activities with other divisions and departments; make travel arrangements for department staff; process conference reimbursement and other requests.
8. Provide technical assistance to users of the Human Resource Systems as requested; maintain records of assistance provided; identify training needs and communicate to supervisor.
9. Assure that Board agenda items and supporting documents are developed, prepared, and forwarded within District timelines and legal requirements and guidelines; assure the administrator receives timely notification of Board requests for information or action; assure that the Board receives information and notification of action taken as requested.
10. Provide staff support to standing and ad hoc committees and other groups as assigned; attend meetings and take notes or record proceedings; prepare and distribute agendas, background materials, and minutes as appropriate.
11. Establish and maintain a variety of complex, interrelated filing systems including confidential files.
12. May provide work direction to lower-level office staff and student workers as assigned; prioritize work assignments; review and validate completed work for accuracy.
13. Perform related duties as required.

QUALIFICATIONS

The following generally describes the knowledge and ability required to enter the job and/or be learned within a short period of time in order to successfully perform the assigned duties.

Knowledge of:

Operational characteristics, services, and activities of the department.

Pertinent federal, state, and local laws, codes, and regulations including applicable sections of Title IX, the State Education Code and other legal requirements related to area of assignment.

Work organization and office management principles and practices.

Office procedures, methods, and equipment including computers and applicable software applications such as word processing, spreadsheets, and databases.

Human Resource Systems at a level to provide user assistance.

Processes, procedures, and practices of budget preparation and administration.

Principles, practices, and procedures of business letter writing and report preparation.

Principles and procedures used in complex, inter-related record keeping.

Principles and practices used to establish and maintain files and information retrieval systems.

Principles, practices and procedures of complex fiscal, statistical, and administrative research and report preparation.

Principles and techniques used in handling highly sensitive situations.

Principles and practices of providing training, work direction, and guidance to lower-level office staff and student workers.

English usage, grammar, spelling, punctuation, and vocabulary.

Ability to:

Understand the organization and operation of the department as necessary to assume assigned responsibilities.

Understand, interpret, and apply administrative and office policies and procedures as well as pertinent laws, regulations, and ordinances.

Perform responsible and difficult administrative duties involving the use of independent judgment and personal initiative.

South Orange County Community College District
Page 3 - Human Resources Compliance Support Specialist

Ability to:

Analyze problems, identify alternative solutions, project consequences of proposed actions, and implement recommendations in support of goals.

Use sound judgment in recognizing scope of authority.

Exercise good judgment and maintain confidentiality in maintaining critical and sensitive information, records, and reports.

Respond effectively and with discretion to requests and inquiries from students, faculty, staff, or the public.

Type or enter data at a speed necessary for successful job performance.

Participate in the preparation and administration of assigned budgets.

Prepare a variety of clear and concise administrative, financial and statistical reports.

Implement and maintain filing systems.

Independently compose and prepare correspondence and memoranda.

Plan and organize work to meet schedules and changing deadlines.

Operate office equipment including computers and supporting word processing, spreadsheet, and database applications.

Adapt to changing technologies and learn functionality of new equipment and systems.

Work under steady pressure with frequent interruptions and a high degree of public contact by phone or in person.

Work independently and effectively in the absence of supervision.

Work with and exhibit sensitivity to and understanding of the varied racial, ethnic, cultural, sexual orientation, academic, socio-economic, and disabled populations of community college students.

Use correct English usage, grammar, spelling, punctuation, and vocabulary.

Communicate clearly and concisely, both orally and in writing.

Establish and maintain effective working relationships with those contacted in the course of work.

EDUCATION AND EXPERIENCE GUIDELINES - Any combination of education and experience that would likely provide the required knowledge and abilities is qualifying. A typical way to obtain the knowledge and abilities would be:

Education/Training:

Equivalent to two years of college level course work or specialized training in public administration, business administration, or a related field.

Experience:

Three years of increasingly responsible experience in an administrative support position, preferably in a law office or legal department, or other office that deals with highly regulated compliance issues.

LICENSE OR CERTIFICATE:

A valid California driver's license and proof of insurability may be required to drive a District or personal vehicle to attend meetings or pick up/deliver documents or other materials.

PHYSICAL DEMANDS AND WORKING ENVIRONMENT

The conditions herein are representative of those that must be met by an employee to successfully perform the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential job functions.

South Orange County Community College District
Page 4 - Human Resources Compliance Support Specialist

Environment:

Work is performed primarily in a standard office setting. Duties are typically performed at a desk or computer terminal; subject to noise from office equipment operation; frequent interruptions and contact in person and on the telephone with students, academic and classified staff, and others. At least minimal environmental controls are in place to assure health and comfort.

Physical:

Primary functions require sufficient physical ability and mobility to work in an office setting; to stand or sit for prolonged periods of time; to occasionally stoop, bend, kneel, crouch, reach, and twist; to lift, carry, push, and/or pull light to moderate amounts of weight; to operate office equipment requiring repetitive hand movement and fine coordination including use of a computer keyboard; to verbally communicate to exchange information; and to occasionally travel to other offices or locations to attend meetings or to pick up or deliver materials.

Vision:

See in the normal visual range with or without correction.

Hearing:

Hear in the normal audio range with or without correction.

Evaluative Criteria: Education: __%; Experience: __%; Knowledge: __%

Finalized by Forsberg Consulting Services, August, 2016
Approved by the Board of Trustees,

South Orange County Community College District

DIRECTOR OF HUMAN RESOURCES, EMPLOYEE RELATIONS & COMPLIANCE – JC #,
Classified Management, Integrated Academic and Classified Administrator and Manager Salary Schedule
21

DEFINITION

Plan, supervise, lead and direct compliance with federal, State, and local laws, Board policies and collective bargaining agreements in connection with all human resources functions; facilitate the District's Diversity and Equal Employment Opportunity Advisory Committee and administer the District's Equal Employment Opportunity Plan and diversity efforts; oversee and support performance management, leaves, discipline, reorganization, layoff, and grievance processes, including investigations, litigation and complaints filed with external administrative agencies; supervise and administer compliance, EEO, Title IX and training programs; play a key role in interpreting, maintaining and revising Human Resources Board policies, administrative regulations, and other applicable documents and records.

Lead the development and implementation of proactive equity, diversity and inclusion programs, services, operations and activities of HR/EER that support the District's strategic plan for a diverse and inclusive environment; engage faculty, staff and students to build a welcoming and inclusive culture throughout the District; assess potential barriers and develop strategies focused on recruiting and retaining a diverse workforce; design training programs on cultural competency, gender differences, disability, sexual harassment, and other topics designed to increase awareness and support of equity and inclusion values, and maintain compliance with applicable laws; direct the District's Workforce Analysis and lead and oversee compliance with Affirmative Action, Equal Employment Opportunity, the Americans with Disabilities Act, and other applicable legal requirements, including serving as the District's Title IX Coordinator.

Plan, develop, coordinate, design, organize, implement, direct, supervise, review, update and evaluate assigned HR/EER programs, services, operations and activities related to equity, diversity, inclusion, sexual harassment, staff development, training, performance evaluation, occupational health and safety, non-discrimination and discrimination prevention, according to legal requirements.

Assist in planning, developing, organizing, coordinating, implementing, overseeing and evaluating other assigned human resources programs, services, operations and activities of the District, such as recruitment and selection, employment, wage and salary administration, collective bargaining, employee and union contract management, ensure timely and accurate submission of required reports and documents; and provide complex staff assistance to the Vice Chancellor of Human Resources and Employer/Employee Relations and the Executive Director of Human Resources and Employer/Employee Relations.

Foster a culture of collaboration, mutual respect, innovation, and continuous improvement throughout the District; lead by example; actively participate in and support District-wide participatory governance components and activities and other collaborative processes; encourage professional excellence among the staff and promote an organizational culture of customer service, innovation, and quality services.

South Orange County Community College District
Page 2 - Director of Human Resources, Employee Relations & Compliance

DISTINGUISHING CHARACTERISTICS

This is a single-position classified management classification. The primary areas of accountability include legal compliance, advocacy and education. This position serves in a lead role in the Human Resources department, focused on the development and implementation of bias-free policies and procedures for all employees. The incumbent serves as the main contact for employees regarding compliance with diversity and equal employment opportunity requirements of federal, State, and local laws through effective internal and external communications, comprehensive employee training programs, and uniform policies of the District. The incumbent promotes stability and transparency by effectively maintaining and enforcing established District and Human Resources procedures, laws, regulations and best practices. The incumbent continuously monitors federal, State, and local laws for changes in compliance requirements and regularly provides diversity, equal employment opportunity and other relevant training to employees accordingly. The incumbent serves as advisor and resource person for management and staff in the areas of diversity, inclusion, equity and intake and investigation of concerns across the District and Colleges that pertain to discrimination or harassment.

SUPERVISION RECEIVED AND EXERCISED

Receives administrative and technical direction from the Vice Chancellor of Human Resources and Employer/Employee Relations or designee of the Chancellor.

Exercises supervision over regular and contracted professional and technical staff and clerical support staff, including a Title IX Compliance Support Manager and Title IX Compliance Support Specialist, when assigned.

EXAMPLES OF DUTIES - Duties may include, but are not limited to, the following:

1. Lead, handle, and resolve legal issues, including disciplinary actions, sexual harassment complaints, and implementation of grievance resolutions; and coordinate legal matters with District's legal counsel as directed.
2. Plan, develop, coordinate, design, organize, implement, direct, supervise, review, update and evaluate assigned HR/EER programs, services, operations and activities related to equity, diversity, inclusion, sexual harassment, staff development, training, performance evaluation, occupational health and safety, non-discrimination and discrimination prevention, according to legal requirements.
3. Develop, recommend, and implement District-wide policies regarding EEO, non-discrimination, sexual harassment prevention, Title IX compliance, and ADA; work in collaboration with various District departments and divisions to implement recommendations; keep leadership apprised as to the progress in meeting the District's commitment to enhancing inclusiveness and diversity.
4. Respond to alleged discrimination and sexual harassment complaints by investigating, analyzing and resolving complaints filed under the District's unlawful discrimination and harassment complaint policies and procedures; recommend appropriate corrective action to such complaints; prepare reports of findings, conclusions and recommendations for internal documentation or for outside federal and State agencies.
5. Prepare, respond to and represent the District in State and federal civil rights agencies investigations involving alleged discrimination; consult and collaborate with legal counsel on legal matters and judicial processes and/or proceedings, supplying technical information to support the District's interests.

South Orange County Community College District
Page 3 - Director of Human Resources, Employee Relations & Compliance

6. Serve as the primary resource to District hiring committees on EEO and other compliance matters; monitor hiring committee proceedings, personnel actions, and/or other employment processes, ensuring compliance with legal requirements and established policies; and advise and train selection committees on requirements of Title V and other applicable State and federal regulations and laws.
7. Develop and implement strategies to increase recruitment of qualified job applicants from underrepresented groups.
8. Research, analyze, and report on a variety of workforce data; perform adverse impact calculations and/or other analyses as they relate to established District employment processes.
9. Assist in planning, developing, organizing, coordinating, implementing, overseeing and evaluating other HR/EER programs, services, operations and activities, such as recruitment, selection, employment, wage and salary administration, collective bargaining and contract management.
10. Assist in the daily administration of HR/EER programs, such as recruitment and selection, employment, retention, contract negotiation and administration, legal compliance, worker's compensation, unpaid leaves, classification and compensation, according to District objectives, policies and procedures and other legal requirements.
11. Ensure timely and accurate submission of required reports and documents; and provide complex assistance to the Vice Chancellor of Human Resources and Employer/Employee Relations and the Executive Director of Human Resources and Employer/Employee Relations.
12. Resolve and/or assist with legal compliance issues related to equity, diversity, inclusion, labor relations and other areas of HR/EER; prepare and propose District case positions/responses regarding discipline or grievance issues; interact directly with attorneys and law firms; receive and respond to complaints and grievances from employees, students and the public regarding discrimination, sexual harassment, employment contract violations and other equity, diversity and inclusion issues; conduct research, investigations and grievance session to determine resolutions in accordance with State and federal laws, District policies, practices and procedures and applicable collective bargaining agreements; recommend appropriate corrective action and counsel employees as appropriate.
13. Interpret, apply and explain laws, rules, regulations, policies and practices related to human resources administration, equal employment opportunities and collective bargaining; counsel District administrators, managers, supervisory personnel and others on the relevance of State and federal human resources laws affecting assigned functional areas; and counsel administrators, manager and supervisors on matters concerning job performance issues and complaints.
14. Administer ADA and EEO programs, including the ADA interactive process, services, policies and procedures in compliance with District, State and federal regulations; assist in the formulation and development of other human resources programs, goals and objectives and new or revised policies and procedures; develop and maintain diverse recruitment pools, work in conjunction with District administrators, managers, and supervisors to resolve employee performance issues and that require fitness for duty exams.

South Orange County Community College District
Page 4 - Director of Human Resources, Employee Relations & Compliance

15. Develop, implement, update, monitor and evaluate the South Orange Community College District Equal Employment Opportunity Plan (Plan) for equal employment opportunity in the District's recruitment and hiring policies and practices pursuant to the applicable Title 5 regulations (Section 53000 et seq.) and the steps the district takes in the event of underrepresentation of monitored groups; conduct an ongoing analysis of the demographic makeup of the district's workforce population, the requirements for a complaint procedure for noncompliance with the Title 5 provisions relating to equal employment opportunity programs; establishment of an EEO Advisory Committee; methods to support equal employment opportunity; and procedures for dissemination of the Plan.
16. Oversee the District's Title IX compliance program; serve as the Section 504/ADA Officer for employees; provide guidance, training and resolution of issues; and coordinate with multiple units to address matters.
17. Provide professional advice and guidance to employees regarding rights, classification, leaves and privileges in areas of assigned responsibilities; and conduct interactive processes and coordinate fitness for duty examinations.
18. Develop, maintain and implement the District's Equal Employment Opportunity Plan in consultation with the Equal Employment Opportunity Advisory Committee ("EEOAC"), administration, faculty, staff, and employee organizations.
19. Coordinate the District's Diversity and EEOAC, including agendas, minutes and support materials; participate in the District's Diversity and EEOAC as required; maintain the District's Diversity fund records and reports; and submit required reports to the State Chancellor's office.
20. Serve as a member of the District's EEO Advisory Committee; and serve on various committees and taskforces to ensure that program and plan development includes EEO and diversity awareness.
21. Ensure the preparation and provision of materials for hiring/screening committees, in connection with EEO requirements; coordinate selection and assignment of employees for hiring/screening EEO members; and provide training for EEO hiring/screening committee members; develop and provide initial and on-going training to District staff and all District sites regarding EEO, student and staff diversity, ADA and harassment prevention; and participate in staff and student orientation activities; work closely with the Vice Chancellor of HR and EER and the Executive Director of HR and EER on recruitment, selection, job classification, compensation, personnel action, labor relations, and other areas of responsibility to ensure compliance with federal, State, and local laws, Board policies, collective bargaining agreements and the District's Equal Employment Opportunity Plan.
22. Attend and participate in professional group meetings; maintain awareness of new trends and developments in the field of equal employment opportunity policies and procedures; and incorporate new developments as appropriate.
23. Manage the development and implementation of departmental goals, objectives, and priorities for each assigned service area; and recommend and administer policies and procedures.
24. Receive, investigate and prepare detailed investigative reports and implement procedures to respond to internal and external complaints or allegations regarding unlawful discrimination, harassment, and/or retaliation, including complaints from students.

South Orange County Community College District
Page 5 - Director of Human Resources, Employee Relations & Compliance

25. Respond to federal and State agencies in connection with complaints of unlawful discrimination, harassment or retaliation.
26. Serve as liaison for the District to various agencies and governmental units; respond to inquiries and provide confidential data and analysis as required; assist in internal and external auditing processes by providing confidential data and reports; and respond to questions and retrieve documents as required.
27. Prepare reports for internal use and for external federal and State agencies; prepare statements, findings, conclusions and recommendations and, depending on the nature of the report, provide background information for use by external investigators or legal counsel.
28. Oversee performance management and annual performance evaluations of all District employees; coordinate, work with and assist supervisors in improving below standard work performance of assigned employees, evaluating and documenting progressive discipline issues and recommending employee discipline, including terminations, as necessary.
29. Assist in the development and implementation of evaluation processes and provide training and support in evaluation processes.
30. Coordinate discipline processes, ensuring that forms are complete and comply with law, Board policies, administrative procedures, and collective bargaining agreement provisions.
31. Lead, supervise, train and evaluate assigned personnel; apply the terms and provisions of applicable collective bargaining agreements, State and federal laws and Board policies and administrative procedures.
32. Develop, interpret, revise and implement Human Resources Board policies and procedures, including, but not limited to, leaves, discrimination, harassment, diversity, Title IX compliance, disabled populations and/or Vietnam-era veterans; provide comprehensive training for screening committees and other staff regarding laws, regulations, policies and procedures for equal employment opportunity, diversity, unlawful discrimination, sexual harassment and other areas as directed.
33. Provide leadership and participate in other staff development activities, District and Human Resources initiatives and administrative processes and procedures, including, but not limited to, training and staff development, labor relations, grievances and/or complaints, development of policies, procedures, job descriptions, and other Human Resources functions, as assigned by the Vice Chancellor of HR/EER.
34. Participate in labor negotiations and assist with the preparation and administration of collective bargaining agreements.
35. Coordinate, assist and participate in the development, preparation and maintenance of Human Resources information for employee documents and other records.
36. Participate with the management team to facilitate efforts in organizational planning, especially in the area of human resources and staff planning, development of organizational structures and work processes and procedures that facilitate attainment of established program goals and objectives; develop, implement and maintain appropriate methods and procedures to optimize efficient and effective delivery of services related to assigned functions; monitor and evaluate operations and activities and take corrective actions as necessary.

South Orange County Community College District
Page 6 - Director of Human Resources, Employee Relations & Compliance

37. 37. Provide resources and information to the Vice Chancellor of HR/EER, the Executive Director of HR/EER, other District administrators, managers, employees, students and members of the public regarding assigned human resources and employer-employee relations functions, professional development and other matters; work closely with risk management, benefits and payroll departments, the colleges and other departments to meet their requirements and needs.
38. Develop and provide written and oral reports and presentations to employees and/or the public at various meetings; conduct workshops to provide specialized information regarding assigned HR/EER programs and services; ensure the development and dissemination of information related to new or revised automated systems, requirement or regulations affecting HR/EER services; identify, communicate and make recommendations regarding trends and best practices in HR/EER.
39. Represent the District as needed regarding assigned areas of HR/EER; chair or serve on committees, task forces and other work groups as needed or assigned; provide technical expertise concerning assigned areas of HR/EER and performance management.
40. Represent the District in court, at hearings and on related administrative, personnel and other committee and commissions, as appropriate.
41. Develop, coordinate and oversee the recruitment and selection of personnel as assigned; develop, recommend and implement recruitment strategies and efforts directed toward ethnic minorities, women and other under-represented groups; approve interview questions, exercises and processes for hiring committees; communicate with hiring committees during the hiring process; and conduct committee orientations.
42. Participate in recommending candidates for employment; oversee the processing, completion and recording of all HR/EER transactions; and ensure that all personnel records related to assigned functions are maintained according to established procedures.
43. Design, plan, implement and oversee the daily administration of district-wide employer/employee relations, staff development and training programs, policies and procedures, according to District objectives, policies and procedures and other legal requirements; investigate employer/employee relations problems and resolve or develop, recommend and initiate appropriate steps for resolution
44. Maintain good communication and a positive relationship with employees to promote employee satisfaction; counsel employees regarding personnel matters; receive and respond to complaints and grievances from employees and students regarding discrimination, sexual harassment, employment contract violations and other issues; conduct research, investigations and grievance sessions to determine resolutions according to District policies, practices, procedures and applicable collective bargaining agreements; and recommend appropriate corrective action.
45. Develop, organize, coordinate, implement, monitor, track and evaluate a District-wide occupational health and safety program and ensure related employee training; analyze records of work-related injuries and diseases and work to reduce risks; implement human resources component of workplace security program.

South Orange County Community College District
Page 7 - Director of Human Resources, Employee Relations & Compliance

46. 46. Perform studies of the duties, computer systems/software programs and equipment assigned to District employees and use results to develop, implement or acquire appropriate in-service training; schedule, monitor and track assigned employee training and ensure completion as required; maintain related records and prepare reports as needed.
47. Research, design, develop and implement new training techniques and enhancements to existing training programs; develop curriculum, methods and materials for staff training, such as lectures, ideas for group discussions, demonstrations or workshops or contract same with outside professionals or vendors.
48. Contract with and maintain relationships with vendors to ensure employee participation in outside training programs as authorized; evaluate training delivery, measure results and implement training program changes as needed.
49. Design, develop, organize, coordinate, implement, monitor, track and evaluate a District-wide occupational health and safety program and ensure related employee training; analyze records of work-related injuries and diseases and work to reduce risks; implement human resources component of workplace security program; assure compliance with the District's Injury and Illness prevention program.
50. Develop, prepare, generate and analyze a variety of reports related to employee personnel information and data, such as benefit costs, staffing levels/deployment, absenteeism, worker's compensation, FMLA/CFRA leaves, recruitment, applicant tracking, AA/EEO and compensation.
51. Serve as a member of District negotiating teams for collective bargaining as assigned; assist in serving as liaison and working cooperatively with bargaining unit representatives as assigned; and assist in managing negotiated agreements as assigned.
52. Ensure that the supervisor of record evaluates the performance of each District employee annually and that eligible employees receive appropriate salary step increases, cost of living adjustments or other salary schedule changes; coordinate, work with and assist supervisors in improving below standard work performance of assigned employees, evaluating and documenting progressive discipline issues and recommending employee terminations as necessary.
53. Coordinate and administer annual employee recognition and award programs, such as "Outstanding Classified Employee of the Year."
54. Communicate with other human resources personnel, District and College administrators and support personnel, representatives of State and federal agencies, educational institutions, social service organizations, counselors and others to coordinate programs and activities; represent the District, as assigned, regarding assigned areas of human resources; chair or serve on committees, task forces and other work groups; provide technical expertise concerning employee relations, staff development and training.
55. Review and certify the accuracy of data concerning employee relations, staff development, training, recruitment and other assigned programs; conduct research and direct the timely and accurate compilation, preparation and submittal of a variety of statistical and narrative reports, annual reports, proposals, recommendations, correspondence and other materials, as required or requested by the Board of Trustees, District administrators, the State or federal government or other agencies.

South Orange County Community College District
Page 8 - Director of Human Resources, Employee Relations & Compliance

56. Participate in the timely preparation and submission of Board agenda items related to human resources; direct the preparation and distribution of other human resources information, such as recruitment flyers and updated lists of faculty and administrators for both college catalogs.
57. Review and recommend new, revised or updated District policies ensuring legal compliance; interpret, apply and explain District policies, procedures and State and federal legal requirements relating to human resources, including those involving equity and diversity, non-discrimination employment and sexual harassment.
58. Assist in developing and implementing personnel procedures to promote equal and fair employment practices; inform human resources staff and District and college management personnel of any substantive and/or relevant changes or additions in legal requirements or District policies and procedures.
59. Train, guide, supervise, support and evaluate the performance of assigned classified staff in keeping with the policies of the Board of Trustees and administrative procedures; participate in the selection of assigned staff and temporary professional staff in accordance with District policies and legal requirements; establish and monitor work timelines; prioritize, assign, schedule and review work; evaluate work products and results; recommend transfers, reassignment, termination and disciplinary action of assigned personnel; motivate staff and resolve conflicts within the group.
60. Prepare, administer and monitor assigned budgets; prepare budget recommendations and justifications for staff, equipment, materials and supplies; approve the forecast of funds needed for staffing, equipment, materials and supplies; approve expenditures and implement budgetary adjustments, as appropriate and necessary and in accordance with District policies and applicable regulations.
61. Assure compliance with the District's Injury and Illness prevention program.
62. Stay abreast of new or modified employee relations programs or training methods and determine relevancy to District employees.
63. Perform related duties as assigned.

QUALIFICATIONS

South Orange County Community College District

TITLE IX COMPLIANCE SUPPORT MANAGER – JC #, Classified Management, Integrated Academic and Classified Administrator and Manager Salary Schedule 09

To serve as an independent neutral party to oversee and deliver a District-wide program, in collaboration with other District stakeholders, to prevent, reduce, and remediate all forms of sex and gender discrimination including harassment, retaliation, sexual violence, intimate partner and relationship violence, gender and sex based bullying, dating violence, and stalking; ensure the District's compliance with Title IX of the Education Amendments of the 1972 Civil Rights Act (Title IX) and the California Education Code (Ed. Code) and other related laws, guidance and regulations, as well as District policies.

To coordinate related activities to the Violence Against Women Act Reauthorization of 2012 (VAWA), Campus Sexual Violence Elimination (SaVE) Act, the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistic (Clery) Act; support the District's commitment to an open, diverse, and inclusive learning and working environment by conducting assessments of the effectiveness of District's policies and procedures, including the overall efficacy of coordination and overall response by the District to sexual and gender-based discrimination and harassment.

To foster a culture of collaboration, mutual respect, innovation, and continuous improvement throughout the District; lead by example; actively participate in and support District-wide participatory governance components and activities and other collaborative processes; encourage professional excellence among the staff and promote an organizational culture of customer service, innovation, and quality services.

DISTINGUISHING CHARACTERISTICS

The Title IX Compliance Support Manager is a classified management position in the Human Resources & Employer-Employee Relations department,

SUPERVISION RECEIVED AND EXERCISED

Receives administrative and technical direction from the Director of Human Resources, Employee Relations & Compliance or Chancellor's designee.

Exercises supervision over technical and clerical personnel, as assigned, including the Human Resources Compliance Support Specialist.

EXAMPLES OF DUTIES - Duties may include, but are not limited to, the following:

1. Serve as the District's independent and neutral compliance officer on Title IX, VAWA and related legal requirements and compliance issues, including disciplinary actions, gender-based violence, sexual harassment complaints and implementation of grievance resolutions; provide consultation to senior leadership as needed; and coordinate legal matters with District's legal counsel as directed.
2. Manage and coordinate external regulatory or legal inquiries into sexual discrimination, harassment and misconduct issues; work with appropriate District offices to coordinate any remediation efforts; and respond to federal and State agencies in connection with complaints of unlawful discrimination, harassment, or retaliation.

South Orange County Community College District
Page 2 - Title IX Compliance Support Manager

3. Collaborate with the District's police department and other District personnel, to ensure compliance with requirements under the Clery Act and VAWA; provide training and technical assistance on District policies and procedures related to sexual discrimination, harassment and misconduct, including developing programs to ensure all members of the District community, including staff and students, are aware of their rights and obligations, including collaborating with the Office of Vice President for Student Services at both colleges and other District departments, as needed, to ensure a prompt response and investigation of complaints and to ensure that students are aware of their options and resources with respect to reporting and filing complaints; train and provide work direction to campus deputy Title IX coordinators.
4. Work closely with different members of the District community, including administrators, counselors, athletic directors, non-professional counselors or advocates, and legal counsel, in order to ensure compliance, conduct training, prevention and education efforts.
5. Receive and process complaints and grievances from employees, students and third parties regarding discrimination, sexual harassment, employment contract violations and misconduct; monitor and manage Title IX incidents to ensure an efficient, effective and timely response to complaints; process inquiries and discrimination complaints from the colleges and third parties in a timely manner; provide a fair and neutral process for all parties, provide professional advice and counseling to employees regarding rights and privileges in areas of assigned responsibilities; and refer faculty, staff, and students to resources for supplementary support during an investigation; monitor outcomes, identifying and addressing any patterns, and assessing effects of sexual discrimination, harassment and misconduct on the campus climate.
6. Make recommendations and coordinate appropriate interim and remedial measures.
7. Recommend modifications to District policies and procedures as needed; recommend changes in related policies, procedures and best practices, based on identified patterns and trends.
8. Recommend changes in related policies, procedures and best practices, based on identified patterns and trends.
9. Develop investigation plans for each complaint; obtain, review and analyze relevant facts and documents related to reported incidents and determine a resolution or assess whether a further review or investigation is necessary to ensure the safety of the impacted student and the community; prepare recommendations for appropriate corrective action and issue factual findings and recommendations, as necessary; participate in the timely preparation and submission of Board agenda items related to area of assignment.
10. Conduct investigations or work with third party neutral fact finders to conduct investigations; conduct research, investigations and/or grievance session according to federal and State laws, District policies, practices and procedures and applicable collective bargaining agreements to attempt to resolve alleged discrimination; notify and interview complainants, respondents, and witnesses; interpret, apply and explain relevant laws, rules, regulations, policies and practices as appropriate; review and certify the accuracy of information and data related to area of assignment; conduct interactive processes and fitness for duty examinations as part of the investigative process; and advocate for improvements in the investigatory process as needed.

South Orange County Community College District
Page 3 - Title IX Compliance Support Manager

11. Effectively investigating or overseeing and coordinating investigations of allegations and complaints of alleged sexual discrimination, harassment and misconduct; preparing reports and making findings and recommendations; ensuring investigations are timely, impartial and thorough.
12. Manage the day-to-day legal issues and tasks associated with the District's Title IX compliance obligations; develop and implement a case management plan for each reported Title IX incident; develop and implement a case management database to organize, manage and track sexual discrimination, harassment and misconduct incidents
13. Coordinate, or work with others to coordinate, the collection and analysis of relevant information obtained from climate surveys.
14. Prepare an annual statistical report on the number, nature and disposition of complaints.
15. Provide background information for use by external investigators or legal counsel.
16. Prepare and propose District case positions/responses regarding discrimination issues.
17. Interact directly with attorneys and law firms.
18. Prepare written comprehensive reports of investigation, statements, findings of facts, conclusions, and recommendations; and respond to federal and State agencies in connection with complaints of unlawful discrimination, harassment, or retaliation.
19. Counsel and train District administrators, managers, supervisory personnel and other employees on the relevance of federal and State human resources laws affecting Title IX, and on legal compliance matters, issues and complaints; assist and counsel them in the resolution of problems, issues, grievances and other matters related to area of assignment.
20. Plan, develop, coordinate, implement, manage, review and evaluate legal compliance programs related to equity and diversity, non-discrimination, sexual harassment and discrimination prevention, according to District objectives, policies and procedures and other legal compliance requirements related to Title IX, VAWA, Title 5, and other applicable laws, codes and regulations.
21. Develop, coordinate and deliver, or ensure the delivery of, relevant student, employee, supervisor, volunteer, vendor, and other training and orientation.
22. Provide recommendations for training and outreach programs as well as changes to policies and procedures based on findings.
23. Conduct research and compile, prepare and submit a variety of report, documentation, proposals, recommendations, correspondence and other materials, as required for internal use and for external federal and state agencies; ensure the development and dissemination of information related to new or revised automated systems, requirements or regulations affecting area of assignment.

South Orange County Community College District
Page 4 - Title IX Compliance Support Manager

24. Maintain good communication and a positive relationship with other District employees to promote employee satisfaction; communicate effectively with other human resources personnel, District and College administrators and support personnel, representatives of State and federal agencies, educational institutions, social service organizations, counselors and others to coordinate programs and activities and conduct investigations and other work.
25. Represent the District while attending conferences and when communicating with federal and State compliance or investigation officers; chair or serve on committees, task forces and other work groups; and conduct workshops, as needed or as requested, to provide new, updated or specialized information regarding area of assignment; provide technical expertise concerning assigned area of legal compliance.
26. Represent the District in court, at hearings, and on related administrative, personnel, and other committee and commissions, as directed.
27. Represent the District, as needed, regarding assigned area of human resources; chair or serve on committees, task forces and other work groups.
28. Develop, maintain, implement, manage, review and evaluate the District's overall Title IX Compliance Plan, Policy and related procedures, protocols and practices, in consultation with assigned supervisor; implement procedures and organize and maintain files, disposition reports and other records regarding Title IX cases.
29. Manage and coordinate discipline processes and ensure compliance with law, Board policies, administrative procedures, and collective bargaining agreement provisions;
30. Stay abreast of issues, changes or updates related to Title IX and VAWA legal compliance, trends, investigations, regulations and statutes.
31. Review proposed, new, revised or updated District Board policies and procedures for compliance with Title IX, including those involving equity and diversity, non-discrimination employment and sexual harassment; ensure that policy changes are properly communicated throughout the District, providing recommendations and/or instructions to departments to ensure regulatory compliance and adherence to District policies and requirements.
32. Understand and ensure compliance with State and federal law, Board policies, administrative procedures and collective bargaining agreement provisions.
33. Monitor, evaluate, and understand all relevant and current federal, State and local laws, court decisions, administrative guidance, or other sources for updates and changes to compliance requirements.
34. Perform related duties as assigned.

QUALIFICATIONS

EDUCATION AND EXPERIENCE GUIDELINES

Any combination of education and experience that would likely provide the required knowledge and abilities is qualifying. A typical way to obtain the knowledge and abilities would be:

South Orange County Community College District
Page 5 - Title IX Compliance Support Manager

Education:

Bachelor's Degree from an accredited college or university with major course work in human resources, law, business or public administration, social work, psychology, forensic psychology, higher education administration or related field is required. A Master's Degree with emphasis in human resources, law, business or public administration, social work, psychology, forensic psychology, higher education administration or related field is desirable.

Experience:

At least three years of increasingly responsible professional legal compliance work, involving the investigation and resolution of discrimination and harassment complaints. Victim advocacy training and experience is desirable.

LICENSES AND OTHER REQUIREMENTS:

Valid California driver's license.

Knowledge of:

Computer systems and software applications related to human resources and employer/employee relations programs.

Effective project management, organization and analytical skills.

Excellent attention to detail, strong problem-solving skills.

Interpersonal skills including tact, patience, and diplomacy.

Modern office practices, procedures, methods, and equipment.

Oral and written communication skills.

Presentation and facilitation skills, with an emphasis on education and training for a variety of constituencies.

Professional business letter composition and report preparation.

Progressive discipline procedures and documentation.

Public sector collective bargaining processes.

Rules and techniques for maintaining legal records.

Title IX, VAWA, Clery Act, SaVE Act, Ed Code, Title 5, and other applicable laws, codes, and regulations and their best practices.

Ability to:

Administer established policies and procedures for assigned areas of human resources.

Analyze problems, identify alternative solutions, project consequences of proposed actions, exercise sound judgment and prepare recommendations in support of goals.

Build relationships and establish collaborative partnerships across the District and peer institutions.

Collect, compile, and analyze a variety of data.

Communicate clearly, concisely and effectively, both orally and in writing, with diverse constituencies within and outside of the District.

Coordinate with multiple persons to address matters involved in investigations, including providing background information for use by external investigators or legal counsel.

Demonstrate commitment to diversity and inclusivity.

Encourage professional excellence among the staff and promote an organizational culture of customer service, innovation, and quality services.

Establish and maintain cooperative and effective working relationships with those contacted in the course of work.

Exercise initiative and work independently with minimum direction.

South Orange County Community College District
Page 6 - Title IX Compliance Support Manager

Ability to:

Guide, advise, and support the training and learning processes to ensure District compliance.
Interpret, apply and explain applicable local, state and federal laws and regulations, including Title IX, VAWA, Clery Act, SaVE Act, Ed Code, and Title 5.
Learn, interpret, apply, and explain District organization, operations, policies, and objectives.
Maintain a variety of records and reports involving legal case files.
Maintain professional qualifications through on-going training and professional development.
Manage multiple, on-going and complex caseload of Title IX related incidents and complaints.
Operate computer and applications software, including database management, spreadsheet, word processing and software related to human resources.
Operate modern office equipment, such as computer, printer and copier.
Plan, schedule, organize and perform work according to established legal timelines.
Prepare and present effective, complete and accurate oral and written reports and recommendations.
Relate effectively to people of varied academic, cultural and socio-economic background using tact, diplomacy and courtesy.
Remain a neutral party when performing work.
Serve as an advocate to victims as needed.
Understand and effectively and collaboratively work in a complicated multi-college environment, as well as within a system of community college districts.
Work with a wide range of constituencies, such as administrators, faculty, staff, students, and parents, using diplomacy and tact.
Work with discretion when dealing with confidential and sensitive information.

WORK ENVIRONMENT AND PHYSICAL DEMANDS

The work environment and physical demands described here represent those required by an employee to perform the essential functions of this job successfully. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

Work Environment

Standard office setting. Typically, duties are performed in an office environment while sitting at a desk or computer workstation. Incumbents are subject to constant contact with others, frequent interruptions, noise from talking or office equipment and adherence to strict legal timelines. At least minimal environmental controls to assure health and comfort. Must be able to adapt to changing situations and demanding timelines.

Physical Demands

Incumbents regularly sit for long periods, walk short distances on a regular basis, travel to various locations to attend meetings/workshops and conduct investigations, use hands and fingers to operate an electronic keyboard or other office machines, reach with hands and arms, stoop or kneel or crouch to file, speak clearly and distinctly to answer telephones and to provide information; see to read fine print and operate computer; hear and understand voices over the telephone and in person; and lift, carry, and/or move objects weighing up to 10 pounds.

Approved by the Board of Trustee:

TO: Board of Trustees
FROM: Debra L. Fitzsimons, Interim Chancellor
RE: SOCCCD: Sabbatical Leave Rescindment
ACTION: Approval

BACKGROUND

Annually, the SOCCCD Board of Trustees reviews the recommendations of the Sabbatical Committee for faculty sabbatical projects for the upcoming academic year. Sabbatical projects are reviewed and approved in accordance with Article XXVI, Section H, of the Academic Employee Master Agreement.

On January 25, 2016, the Board of Trustees approved the sabbatical projects of 21 faculty members for the 2016-2017 academic year, including Brooke Choo, Learning Assistance Instructor/Coordinator, School of Languages and Resources at Irvine Valley College for the Fall 2017 semester.

STATUS

Dr. Choo was recently appointed to serve as Interim Dean, Liberal Arts at Irvine Valley College. For this reason, Dr. Choo requests that approval of her sabbatical leave for the Fall 2017 semester be rescinded.

RECOMMENDATION

The Chancellor recommends that the Board of Trustees rescind approval of sabbatical leave for Dr. Brooke for the Fall 2017 semester.

Item Submitted by: *David P. Bugay, Ph.D., Vice Chancellor, Human Resources & Employer/Employee Relations*

TO: Board of Trustees

FROM: Debra L. Fitzsimons, Interim Chancellor

RE: SOCCCD: Resolution No.16-31: Retirement Incentive Program & Public Agency Retirement Services (PARS) Agreement

ACTION: Approval

BACKGROUND

The District is considering a supplementary retirement plan for eligible academic faculty, administrators, managers, and classified staff for the 2016-2017 and 2017-2018 academic years, to be administered by the Public Agency Retirement Services (PARS). The retirement incentive program supplements STRS/PERS, and qualifies under relevant sections of Section 403(b) of the Internal Revenue Code.

STATUS

Upon approval of the Resolution and PARS Agreement, employees eligible to participate in the retirement incentive will be notified of eligibility and receive information and accompanying enrollment materials. Orientation meetings and workshops will be held at Saddleback College and Irvine Valley College. Enrollment deadlines will be established and upon these deadlines the District will determine whether the participation is sufficient to meet the District's fiscal and operational objectives. This determination will be made by the District on or before April 28, 2016.

RECOMMENDATION

The Interim Chancellor recommends that the Board of Trustees adopt Resolution No. 16-31 PARS Supplementary Retirement Plan (SRP) (Exhibit A); and approve the agreement for administrative services (Exhibit B) with Phase II Systems, doing business as Public Agency Retirement Services (PARS).

**BOARD RESOLUTION # 16-31
SOUTH ORANGE COUNTY COMMUNITY COLLEGE DISTRICT
ORANGE COUNTY, CALIFORNIA**

WHEREAS it is determined to be in the best fiscal interest of the South Orange County Community College District and its employees to provide a retirement incentive offer to eligible employees who wish to voluntarily exercise their option to separate from District Service;

WHEREAS there is no cash option available to employees in lieu of this retirement incentive offer;

WHEREAS Public Agency Retirement Services (PARS) has made available to the District a Supplementary Retirement Plan, a retirement incentive program supplementing STRS/PERS, and qualifying under the relevant sections of Section 403(b) of the Internal Revenue Code;

WHEREAS the District, pursuant to applicable policy and/or a collective bargaining agreement, desires to adopt the Supplementary Retirement Plan and to fund the incentive through nonelective employer, post-employment contributions to the PARS designated 403(b) provider.

NOW THEREFORE, BE IT RESOLVED THAT:

1. The Governing Board of Trustees of the District hereby adopts the PARS Supplementary Retirement Plan, as part of the District Retirement Program, effective November 14, 2016; and
2. The retirement incentive must meet the District's fiscal and operational objectives in order for the plan to go into effect. If these goals are not reached, the District may withdraw the retirement incentive. If the District withdraws the retirement incentive, resignations may be rescinded; and
3. The Board of Trustees of the District hereby delegates to the Interim Chancellor the responsibility to determine if the District's fiscal and operational objectives have been met pursuant to item 2 above and to thereby confirm the District's participation in the plan.
4. The Board of Trustees of the District hereby appoints the Interim Chancellor, or his/her successor or his/her designee as the District's Plan Administrator; and
5. The District's PARS Plan Administrator is hereby authorized to execute the contracts, custodial agreement facilitating the payment of contributions to the 403(b) arrangement, and other legal documents related to a trust or the plan on behalf of the District and to take whatever additional actions are necessary to maintain the District's participation in the plan and to maintain compliance of any relevant regulations issued.

STATE OF CALIFORNIA
COUNTY OF ORANGE

_____, the Clerk of the Board of Trustees of the South Orange County Community College District of Orange County, California, hereby certifies that the above foregoing resolution was duly and regularly adopted by said District at a regular meeting thereof held on the _____, and passed by a _____ vote of said Board.

IN WITNESS WHEREOF I have hereunto set my hand and seal this _____, 2016.

Clerk of the Board of Trustees

AGREEMENT FOR ADMINISTRATIVE SERVICES

This agreement ("Agreement") is made this _____ day of _____, 2016, by and between Phase II Systems, a corporation organized and existing under the laws of the State of California, doing business as Public Agency Retirement Services and PARS (hereinafter "PARS") and the South Orange County Community College District ("Agency").

WHEREAS, the Agency is desirous of retaining PARS to act as administrator to assist the Agency in the establishment of early retirement incentive programs through contributions to purchase an *IRC 403(b)* fixed annuity contract ("Plan"), for the benefit of Agency's eligible employees and their beneficiaries ("Participants"); and

WHEREAS, the Agency wishes for PARS to provide consulting, analytical, and administrative services necessary to implement the Plan; and

WHEREAS, in performance of the duties set forth hereinafter PARS shall designate from time to time a custodian and/or trustee to receive Employer Plan contributions ("Custodian") designated for Participants; and

WHEREAS, in performance of the duties set forth hereinafter, PARS shall designate from time to time an insurance company for the purpose of paying Participants a specified amount of money on a regular basis over a specified period of time ("Insurance Company") pursuant to the terms of the Plan.

NOW THEREFORE, the parties agree:

1. **Services.** PARS will provide the services pertaining to the Plan as described in the exhibit attached hereto as "Exhibit 1A" ("Services") in a timely manner, subject to the further provisions of this Agreement.
2. **Fees for Services.** PARS will be compensated for performance of the Services as described in the exhibit attached hereto as "Exhibit 1B".
3. **Payment Terms.** Payment for the Services will be remitted directly from contributions for the Plan that Agency has made to the Custodian unless otherwise stated in Exhibit 1B. In the event that the Agency chooses to make payment directly to PARS, it shall be the responsibility of the Agency to remit payment directly to PARS based upon an invoice prepared by PARS and delivered to the Agency. If payment is not received by PARS within thirty (30) days of the invoice delivery date, the balance due shall bear interest at the rate of 1.5% per month.
4. **Fees for Services Beyond Scope.** Fees for services beyond those specified in this Agreement will be billed to the Agency at the rates indicated in the PARS standard fee schedule in effect at the time the services are provided and shall be payable as described in Section 3 of this Agreement. Before any such services are performed, PARS will provide the Agency with a detailed description of the services, terms, and applicable rates for such services. Such services, terms, and applicable rates shall be agreed upon in writing and executed by both parties.

5. **Information Furnished to PARS.** PARS will provide the Services contingent upon the Agency's providing PARS the information specified in the exhibit attached hereto as "Exhibit 1C" ("Data"). It shall be the responsibility of the Agency to certify the accuracy, content and completeness of the Data so that PARS may rely on such information without further audit. It shall further be the responsibility of the Agency to deliver the Data to PARS in such a manner that allows for a reasonable amount of time for the Services to be performed. Unless specified in Exhibit 1A, PARS shall be under no duty to question Data received from the Agency, to compute contributions made to the Plan, to determine or inquire whether contributions are adequate to meet and discharge liabilities under the Plan, or to determine or inquire whether contributions made to the Plan are in compliance with the Plan or applicable law. In addition, PARS shall not be liable for non-performance of Services to the extent such non-performance is caused by or results from erroneous and/or late delivery of Data from the Agency. In the event that the Agency fails to provide Data in a complete, accurate and timely manner and pursuant to the specifications in Exhibit 1C, PARS reserves the right, notwithstanding the further provisions of this Agreement, to terminate this Agreement upon no less than ninety (90) days written notice to the Agency.
6. **Suspension of Contributions.** In the event contributions are suspended, either temporarily or permanently, prior to the complete discharge of PARS' obligations under this Agreement, PARS reserves the right to bill the Agency for Services under this Agreement at the rates indicated in PARS' standard fee schedule in effect at the time the services are provided, subject to the terms established in Section 3 of this Agreement. Before any such services are performed, PARS will provide the Agency with written notice of the subject services, terms, and an estimate of the fees therefore.
7. **Records.** During the term of this Agreement, and for a period of five (5) years after termination of this Agreement, PARS shall provide duly authorized representatives of the Agency access to all records and material relating to calculation of PARS' fees under this Agreement. Such access shall include the right to inspect, audit and reproduce such records and material and to verify reports furnished in compliance with the provisions of this Agreement. All information so obtained shall be accorded confidential treatment as provided under applicable law.
8. **Confidentiality.** Without the Agency's consent, PARS shall not disclose any information relating to the Plan except to duly authorized officials of the Agency and to parties retained by PARS to perform specific services within this Agreement. The Agency shall not disclose any information relating to the Plan to individuals not employed by the Agency without the prior written consent of PARS, except as such disclosures may be required by applicable law.
9. **Independent Contractor.** PARS is and at all times hereunder shall be an independent contractor. As such, neither the Agency nor any of its officers, employees or agents shall have the power to control the conduct of PARS, its officers, employees or agents, except as specifically set forth and provided for herein. PARS shall pay all wages, salaries and other amounts due its employees in connection with this Agreement and shall be responsible for all reports and obligations respecting them, such as social security, income tax withholding, unemployment compensation, workers' compensation and similar matters.
10. **Indemnification.** PARS and Agency hereby indemnify each other and hold the other harmless, including their respective officers, directors, employees, agents and attorneys, from any claim, loss, demand, liability, or expense, including reasonable attorneys' fees and costs,

incurred by the other as a consequence of, to the extent, PARS' or Agency's, as the case may be, negligent acts, errors, or omissions with respect to the performance of their respective duties hereunder.

11. **Compliance with Applicable Law.** The Agency shall observe and comply with federal, state and local laws in effect when this Agreement is executed, or which may come into effect during the term of this Agreement, regarding the administration of the Plan. PARS shall observe and comply with federal, state and local laws in effect when this Agreement is executed, or which may come into effect during the term of this Agreement, regarding Plan administrative services provided under this Agreement.
12. **Applicable Law.** This Agreement shall be governed by and construed in accordance with the laws of the State of California. In the event any party institutes legal proceedings to enforce or interpret this Agreement, venue and jurisdiction shall be in any state court of competent jurisdiction.
13. **Force Majeure.** When satisfactory evidence of a cause beyond a party's control is presented to the other party, and nonperformance was unforeseeable, beyond the control and not due to the fault of the party not performing, a party shall be excused from performing its obligations under this Agreement during the time and to the extent that it is prevented from performing by such cause, including but not limited to: any incidence of fire, flood, acts of God, acts of terrorism or war, commandeering of material, products, plants or facilities by the federal, state or local government, or a material act or omission by the other party.
14. **Ownership of Reports and Documents.** The originals of all letters, documents, reports, and data produced for the purposes of this Agreement shall be delivered to, and become the property of the Agency. Copies may be made for PARS but shall not be furnished to others without written authorization from Agency.
15. **Designees.** The Agency, or their designee, shall have the authority to act for and exercise any of the rights of the Agency as set forth in this Agreement, subsequent to and in accordance with the written authority granted by the Governing Board of the Agency through adoption of a Resolution, a copy of which writing shall be delivered to PARS. Any officer of PARS, or his or her designees, shall have the authority to act for and exercise any of the rights of PARS as set forth in this Agreement.
16. **Notices.** All notices hereunder and communications regarding the interpretation of the terms of this Agreement, or changes thereto, shall be effected by delivery of the notices in person or by depositing the notices in the U.S. mail, registered or certified mail, return receipt requested, postage prepaid and addressed as follows:
 - (A) To PARS: PARS; 4350 Von Karman Avenue, Suite 100, Newport Beach, CA 92660; Attention: President
 - (B) To Agency: South Orange County Community College District; 28000 Marguerite Parkway, Mission Viejo, CA 92692; Attention: Interim ChancellorNotices shall be deemed given on the date received by the addressee.
17. **Term of Agreement.** This Agreement shall remain in effect for the period beginning November 14, 2016 and ending October 31, 2021 ("Term"). This Agreement will continue unchanged for successive twelve-month periods following the Term unless either party gives

written notice to the other party of the intent to terminate prior to ninety (90) days before the end of the Term. However, the Agreement will terminate following the benefit payment to the last surviving Participant and any residual interest earnings held in the Agency's custody account, if any, will be returned to the Agency.

18. **Amendment.** This Agreement may not be amended orally, but only by a written instrument executed by the parties hereto.
19. **Entire Agreement.** This Agreement, including exhibits, contains the entire understanding of the parties with respect to the subject matter set forth in this Agreement. In the event a conflict arises between the parties with respect to any term, condition or provision of this Agreement, the remaining terms, conditions and provisions shall remain in full force and legal effect. No waiver of any term or condition of this Agreement by any party shall be construed by the other as a continuing waiver of such term or condition.
20. **Attorney's Fees.** In the event any action is taken by a party hereto to enforce the terms of this Agreement, the prevailing party therein shall be entitled to receive its reasonable attorney's fees.
21. **Counterparts.** This Agreement may be executed in any number of counterparts, and in that event, each counterpart shall be deemed a complete original and be enforceable without reference to any other counterpart.
22. **Headings.** Headings in this Agreement are for convenience only and shall not be used to interpret or construe its provisions.
23. **Effective Date.** This Agreement shall be effective on the date first above written, and also shall be the date the Agreement is executed.
24. **Further Acts.** The Parties shall execute all such further and additional documents as shall be reasonable, convenient, necessary, or desirable to carry out the provisions of this Agreement, including but not limited to any Custodial Agreement and/or Trust Agreement as shall be required by PARS and/or the Custodian/Trustee.

EXHIBIT 1A
SERVICES

PARS will provide the following services for the South Orange County Community College District:

1. Plan Consultation Services:
 - (A) Meeting with Agency personnel to discuss the impact to the Agency of implementing a Plan;
 - (B) If appropriate, completing a fiscal analysis, based on data and assumptions provided by Agency, to determine the fiscal feasibility of a Plan;
 - (C) Meeting with Agency personnel to discuss the fiscal analysis and receive feedback on the analysis, data, and assumptions made;
 - (D) Making appropriate revisions to the fiscal analysis as directed by Agency.
2. Plan Installation Services:
 - (A) Meeting with Agency personnel to finalize Plan provisions, implementation timelines, benefit communication strategies, data reporting and contribution submission requirements;
 - (B) Providing the necessary analysis and advisory services to finalize these elements of the Plan;
 - (C) Providing the documentation needed to establish the Plan to be reviewed and approved by Agency legal counsel. Resulting final Plan documentation must be approved by the Agency prior to the commencement of PARS Plan Administration Services outlined in Exhibit 1A, paragraph 3 below.
3. Plan Administration Services:
 - (A) Monitoring the receipt of Plan contributions made by the Agency to the Custodian, based upon information received from the Agency and the Custodian;
 - (B) Performing periodic accounting of custodial assets, including the allocation of employer contributions, payments to the Insurance Company, investment activity and expenses (if applicable), based upon information received from the Agency and/or Custodian;
 - (C) Acting as ongoing liaison between the Participant and the Agency in regard to the Plan, which shall include use by the Participants of toll-free telephone communication to PARS;
 - (D) Producing benefit illustrations and processing enrollments;
 - (E) Coordinating the processing of contribution payments to the Insurance Company pursuant to authorized written Agency certification of eligibility, authorized direction by the Agency, and the provisions of the Plan, and, to the extent possible, based upon Agency-provided Data;
 - (F) Coordinating actions with the Custodian as directed by the Plan Administrator within the scope of this Agreement.

4. PARS is not licensed to provide and does not offer tax, accounting, legal, investment or actuarial advice.
5. Any analysis provided by PARS is subject to the receipt of accurate information and assumptions as may be provided by Agency. The Agency is responsible for integrating the PARS analysis into any Agency budgetary analysis or decision-making processes. The fiscal projections in the PARS analysis are dependent upon future experience conforming to the assumptions used and the results will be altered to the extent that future experience deviates from these assumptions. It is certain that actual experience will not conform exactly to the assumptions used in the analysis.

EXHIBIT 1B
FEES FOR SERVICES

PARS will be compensated for performance of Services, as described in Exhibit 1A based upon the following schedule:

1. Upon implementation of the Plan associated with this Agreement, the Agency agrees to pay an administration fee equal to five and one-half percent (5.50%) of all premiums made by the Agency on behalf of Participants in the subject Plan, subject to a \$5,000.00 minimum per year for five years. Fees will be billed to the Custodian as contributions are made by the Agency, and it will be the responsibility of the Custodian to pay those fees from the custodial assets of the Plan.
2. In the event that the Plan associated with this Agreement is not implemented, the Agency agrees to pay a one-time fee equal to \$5,000.00. The fee will be billed to the Agency upon notice of cancellation of the Plan and it will be the responsibility of the Agency to pay this fee.

EXHIBIT 1C
DATA REQUIREMENTS

PARS will provide the Services under this Agreement contingent upon receiving the following information:

1. Fiscal Analysis Data (provided by Agency):
 - (A) Participant's Legal Name
 - (B) Participant's Position
 - (C) Participant's Birth Date
 - (D) Participant's Hire Date
 - (E) Participant's Contract Salary
 - (F) Years of Agency Service
 - (G) Completed Request for Information Form, including applicable Salary Schedules, Collective Bargaining Agreements, and Board Policies
2. Participant Data (provided by Agency):
 - (A) Participant's Legal Name

TO: Board of Trustees

FROM: Debra L. Fitzsimons, Interim Chancellor

RE: Saddleback College and Irvine Valley College: Speakers

ACTION: Information

BACKGROUND

Outside speakers may be invited by administrators, faculty members, or recognized student groups to speak at events open to the public.

STATUS

Administrative Regulation 6140 requires that the Board of Trustees be notified, at each board meeting, of speakers who have been invited to speak and/or who have spoken at the colleges since the last board meeting. Exhibit A lists invited speakers and other pertinent information.

TO: Board of Trustees
FROM: Debra L. Fitzsimons, Interim Chancellor
RE: SOCCCD: Basic Aid Report
ACTION: Information

BACKGROUND

The District returned to Basic Aid status in FY 1999-2000. The Board of Trustees has requested regular information reports about projected basic aid receipts and approved projects.

STATUS

As of October 31, 2016, total estimated Basic Aid receipts are \$686.8M and total approved projects are \$672.9M as shown in EXHIBIT A. The balance of \$13.9M is the reserve for unrealized tax collections and returned funds available for distribution.

It should be noted that some of the approved projects are for state funded project match. Although approved, these funds will not be needed until the projects are approved by the State for funding.

There were no changes for the FY 2016-2017 Basic Aid allocation from the October, 2016 Board report.

TO: Board of Trustees
FROM: Debra L. Fitzsimons, Interim Chancellor
RE: SOCCCD: Facilities Plan Status Report
ACTION: Information

BACKGROUND

On August 30, 2004, the Board of Trustees received a list of projects under consideration for local funding and a report on the status of each project. The Board requested to be kept informed about these and other facilities projects.

STATUS

(EXHIBIT A) provides an up-to-date report on the status of current construction projects.

FACILITIES PLAN STATUS REPORT
*November 14, 2016***CAPITAL IMPROVEMENT PLANNING**

The decision to design and construct capital improvement projects begins with the Education and Facilities Master Planning (EFMP) process. The last EFMP cycle was complete December 2011 and that report includes an evaluation of education needs that measured planning for facilities to meet current and future needs. The 2011 EFMP report is available at the district website: http://www.socccd.edu/about/about_planning.html. The next EFMP process is scheduled for FY 2016-2017.

SADDLEBACK COLLEGE**1. SCIENCES BUILDING**

Project Description: This project is a new three story building of 51,197 assignable square feet (ASF), 81,980 gross square feet (GSF) dedicated to the Sciences programs. The Biology, Chemistry, Marine Science, Geology, Physics and Astronomy programs will all be relocated from the existing Math Science Building. The space vacated within the existing Math Sciences Building will remain inactive until funds are available for a separate capital outlay project that will reconstruct the space into additional mathematics and general instructional classroom space. The new Sciences Building, located adjacent to the Student Services Center, will consist of primarily lab classroom and support space with some lecture classroom space and offices.

Start Preliminary Plans	April 2011	Award Construction Contract	Nov 2013
Start Working Drawings	March 2012	Complete Construction	June 2016
Complete Working Drwngs	Jan 2013	Advertise for FF&E	Nov 2015
DSA Final Approval	June 2013	DSA Close Out	Pending

Budget Narrative: Budget reflects Board agenda action on 8/26/08, 10/27/08, 4/27/09, 6/22/09, 5/24/10, 2/28/2011 and 8/24/2012. On February 28, 2011, the Board reassigned \$14,789,346 from other Saddleback College projects and applied \$29,000,000 from basic aid dollars to partially fund the Sciences building after three years running with no state funding. On August 27, 2012, the Board approved \$11,179,000 to fund the remainder of the project budget. In August, the state chancellor's office has escalated the project budget to \$59,050,000 resulting in the unassigned amount of \$215,000. On October 28, 2013, the Board approved reassignment of funds from existing encumbered funding from the ATAS renovation project for an amount of \$8,523,000 for a new project budget equaling \$67,358,000.

	Original	Revision	Total
Project Budget:	\$52,234,000	\$ 8,308,000	\$67,358,000
District Funding Commitment:	\$15,670,000	\$51,688,000	\$67,358,000

Anticipated State Match:	\$36,564,000	(\$36,564,000)	\$0
Basic Aid Allocation:	\$3,867,000	\$63,491,000	\$67,358,000

Status: Construction Phase, 100% Complete.

In Progress: *DSA Close Out and Certification.*

Recently Completed: *LEED Gold certification is awarded. Commissioning process is complete, including all required reports. Change order negotiations and potential claims resolved.*

Focus: *Continuing to address minor building issues and DSA close-out and certification.*

2. STADIUM AND SITE IMPROVEMENT

Project Description: The existing stadium will be replaced with a new 8,000 seat multi-sport stadium with restrooms, team rooms, concession stand, ticket booth, storage, press box, scoreboard, synthetic turf and 9-lane running track. This project includes the southeast campus perimeter drainage control and campus storm water outfall on County of Orange property. The existing practice fields and thrower's park will be relocated to and replace the Golf Driving Range and expanded to include a soccer practice field.

Start Preliminary Plans	March 2014	Award Design/Build Contract	Aug 2016
Start Working Drawings	Sept 2016	Complete Construction	Jan 2019
Complete Working Drwns	March 2017	Advertise for FF&E	N/A
DSA Final Approval	Sept 2017	DSA Close Out	Pending

Budget Narrative: Budget reflects Board agenda action on 3/24/08, 6/23/14, 6/22/15. Several previously budgeted projects are integrated into a single project budget: Upper Quad (2008 - \$1M) Loop Road (2008 - \$3,442,000), Storm Drain Repairs (2013 - \$1,500,000) and Storm Drain, Parking, Practice Fields (2014 - \$7,638,000). On June 23, 2014, the Board approved \$950,000 and on June 22, 2015 the Board approved additional funds of \$7,945,000 and \$17,050,000. The Board approved Saddleback College's use of RDA and Promenade income of \$22,705,000.

Project Budget:	Original \$14,530,000	Revision \$47,700,000	Total \$62,230,000
District Funding Commitment	\$14,530,000	\$47,700,000	\$62,230,000
Anticipated State Match:	\$N/A	\$N/A	\$N/A
Basic Aid Allocation:	\$14,530,000	\$24,995,000	\$39,525,000

College Contribution:	\$0	\$22,705,000	\$22,705,000
-----------------------	-----	--------------	--------------

Status: *Schematic Design: 15% Complete.*

In Progress: *Transitioning from program adjacencies to schematic.*

Recently Completed: *College approval of Program Validation.*

Focus: *Arrange preliminary meeting with Division of the State Architect (DSA) in early December.*

3. TECHNOLOGY AND APPLIED SCIENCE (TAS) RENOVATION PROJECT

Project Description: This project is a renovated two story building of 29,425 assignable square feet (ASF), 36,601 gross square feet (GSF). The Technology & Applied Sciences building was completed in 1991 and as early as 1992 there were reports of slab distress. This project will replace the first floor slab with a structural mat slab, upgrades the mechanical and electrical systems, replaces the exterior plaster and reinstalls mission roof tiles. The project includes instruction and support space renovation throughout including spaces for Architecture, Drafting, Environmental Studies, Electronics, Automotive, and Graphic Arts programs.

Start Preliminary Plans	July 2005	Award Construction Contract	March 2017
Start Working Drawings	Sept 2011	Complete Construction	Sept 2018
Complete Working Drawings	Dec 2013	Advertise for FF&E	Oct 2017
DSA Final Approval	Dec 2016	DSA Close Out	Pending

Budget Narrative: Budget reflects Board agenda action on 2/28/11, 8/27/2012, 10/25/2013, 6/23/2014, and 8/22/2016. The original basic aid assignment of \$1,956,000 met design costs. The scope was revised to include both the North and South wing with a new budget estimated at \$14,733,000. On February 28, 2011, the Board approved \$6,799,055. On August 27, 2012, the Board approved \$5,977,945. On October 25, 2013, the Board approved reassignment of funds of \$8,523,000 for the Saddleback College Sciences Building. On June 23, 2014 the Board restored funding of \$8,523,000 and an additional \$2,702,000. On August 22, 2016, the Board approved an additional \$3,110,000 to fully fund the project.

	Original	Revision	Total
Project Budget:	\$ 8,755,055	\$ 11,789,945	\$20,545,000
District Funding Commitment:	\$ 8,755,055	\$ 11,789,945	\$20,545,000
Anticipated State Match:	\$0	\$0	\$0
Basic Aid Allocation:	\$ 1,956,000	\$18,589,000	\$20,545,000

Status: Bid and Award Phase (On Hold): Constructability review ongoing with architect and District. *This project went into an approximately two to three month delay with a change in project manager and Mechanical, Electrical, Plumbing (MEP) Engineer.*

In Progress: Develop Request for Qualifications (RFQ) for construction services. Submission of revised drawings to DSA.

Recently Completed: *On hold for in house review on DSA submittal.*

Focus Issue: Submit revised drawings to DSA. *Develop RFQ for construction services.*

4. TECHNOLOGY AND APPLIED SCIENCE (TAS) SWING SPACE PROJECT

Project Description: This project modified classrooms in the village and added a new one story building of 10,173 assignable square foot (ASF), 12,000 gross square footage (GSF) transportation / maintenance building in lot 1 for interim use by the automotive department. The project creates temporary housing for the Architecture, Drafting, Environmental Studies, Electronics, Automotive, and graphic Arts programs during the renovation of the TAS building. The new transportation/ maintenance building will be used by the maintenance department when the TAS Renovation project is complete.

Start Preliminary Plans	May 2012	Award Construction Contract	Feb 2015
Start Working Drawings	Aug 2012	Complete Construction	Mar 2016
Complete Working Drwngs	July 2014	Advertise for FF&E	Sept 2015
DSA Final Approval	Dec 2014	DSA Close Out	July 2016

Budget Narrative: Budget reflects Board agenda action on 8/27/2012, 6/17/13 and 6/23/2014. On August 27, 2012, the Board approved \$5,807,000 to fund the original project budget. On June 17, 2013, and June 23, 2014 the Board approved additional funding of \$3,714,000 and \$729,000 respectively.

	Original	Revision	Total
Project Budget:	\$ 5,807,000	\$ 4,443,000	\$10,250,000
District Funding Commitment:	\$ 5,807,000	\$ 4,443,000	\$10,250,000
Anticipated State Match:	\$0	\$0	\$0
Basic Aid Allocation:	\$ 5,807,000	\$ 4,443,000	\$10,250,000

Status: Construction Phase: Final completion. DSA Certified/ *Bid Phase for exhaust fan follow up work.*

In Progress: Occupied. *The bid process for the exhaust system is underway.*

Recently Completed: *Architectural detail for exhaust fan installation leading into bidding installation.*

Focus: Bid and Installation of Exhaust System.

5. FINE ARTS HVAC UPGRADES AND INTERIOR RENOVATION PROJECT

Project Description: This project addresses the Fine Arts complex and replaces existing HVAC units and controls with new energy efficient systems, and interior improvement, a Performing Arts lobby expansion and a new canopy at the exterior patio.

Start Preliminary Plans	July 2012	Award Construction Contract	Jan 2016
Start Working Drawings	Jan 2014	Complete Construction	Sept 2016
Complete Working Drwngs	Nov 2014	Advertise for FF&E	May 2016
DSA Final Approval	Sept 2015	DSA Close Out	Pending

Budget Narrative: Budget reflects Board agenda action on 5/21/2012, 6/17/13, 6/22/2015 and 6/27/2016. On May 21, 2012, the Board approved \$1,000,000. On June 17, 2013, the Board approved additional funding of \$3,950,000. On June 22, 2015 the Board approved additional funds of \$2,750,000. On June 27, 2016, the Board approved \$2,100,000 necessary to fully fund project in advance of basic aid request cycle.

	Original	Revision	Total
Project Budget:	\$1,000,000	\$6,700,000	\$7,700,000
District Funding Commitment:	\$1,000,000	\$6,700,000	\$7,700,000
Anticipated State Match:	\$0	\$0	\$0
Basic Aid Allocation:	\$1,000,000	\$6,700,000	\$7,700,000

Status: Construction Phase: 99% Complete.

In Progress: Final testing and balance of mechanical systems, Final punch list. *DSA Review of seismic bracing and thermal expansion loops at chilled water & hot water lines.*

Recently Completed: Define work scope additions for required improvements.

Focus: Resolve change orders, Schedule construction for seismic bracing over winter break. Close out & training.

6. GATEWAY PROJECT

Project Description: This proposed project will construct a new three story building of 52,156 assignable square feet (ASF), 77,985 gross square feet (GSF) and will provide a new highly integrated space for student services and consolidated and expanded interdisciplinary instructional space. This building, located west of the existing Health/Sciences building, will collocate and expand student services currently dispersed at opposite ends of the campus. In addition, this project will reduce/remove the need for portable buildings and set the stage for the Student Services building renovation.

Start Preliminary Plans	Pending	Award Construction Contract	Pending
Start Working Drawings	Pending	Complete Construction	Pending
Complete Working Drwngs	Pending	Advertise for FF&E	Pending
DSA Final Approval	Pending	DSA Close Out	Pending

Budget Narrative: Budget reflects Board action on 6/17/2013, 6/23/2014 and 8/22/2016. On June 17, 2013, the Board approved \$1,545,115. On June 23, 2014, the Board approved a reduction of (\$655,115). On August 22, 2016, the Board approved \$1,936,817. The District revised the funding commitment from 30 to 50 percent of state supportable costs to increase project competitiveness for state funding.

	<u>Original</u>	<u>Revision</u>	<u>Total</u>
Project Budget:	\$42,867,000	\$ 1,612,000	\$44,479,000
District Funding Commitment:	\$12,814,000	\$ 9,425,500	\$22,239,500
Anticipated State Match:	\$30,053,000	\$ (7,813,500)	\$22,239,500
Basic Aid Allocation:	\$ 1,545,115	\$ 1,281,702	\$ 2,826,817
Unallocated Amount:			\$41,652,183

Status: Voters will have an opportunity to approve a \$9 billion state school bond with \$2 billion allocated to community colleges in this November's election.

In Progress: State Chancellor's office submittal review for second year funding.

Recently Completed: Five Year Plan, Initial Project Proposals and Final Project Proposals (one each per college) submittal to state.

Focus: Projects statewide compete for funding using an objective, established point allocation system. The Gateway project has been evaluated for state funding since 2008 with no money assigned due to lack of funding. Current enrollments have resulted in reduced points and the project is less competitive than required to successfully compete for funding in the first round of distribution. Two additional *funding* rounds are projected to follow in two successive years. *However, there is recent speculation that the Governor will*

not release the bonds as designed, rather by using a more gradual release of bond/ funds over a longer period of time.

IRVINE VALLEY COLLEGE

1. PERFORMING ARTS CENTER AND PARKING LOT 5 EXTENSION

Project Description: This project provided a new two story building of 31,275 assignable square feet (ASF), 58,625 gross square feet (GSF) dedicated to Performing Arts. It includes a performing arts auditorium with stage, a black box theater, faculty offices, classroom lab space and various support areas for Fine and Applied Arts. The project was complete and occupied in early 2007 using a multiple prime contract delivery method.

Start Preliminary Plans	Dec 2003	Award Construction Contract	Jan 2006
Start Working Drawings	April 2004	Complete Construction	June 2007
Complete Working Drwngs	Dec 2004	Advertise for FF&E	Jan 2007
DSA Final Approval	Aug 2005	DSA Close Out	Pending

Budget Narrative: Budget reflects Board agenda action on 4/30/2001, 10/28/2002, 1/20/2004, 2/23/2004, 12/13/2004, and 1/31/2006. Budget also reflects reporting as shown on State Chancellor's Office FUSION report FY 2003-2004 and FY 2007-2008.

	Original	Revision	Total
Project Budget:	\$16,304,000	\$17,309,000	\$33,613,000
District Funding Commitment:	\$16,304,000	\$ 2,837,000	\$19,141,000
Anticipated State Match:	\$14,472,000	\$0	\$14,472,000
Basic Aid Allocation:	\$ 1,832,000	\$17,309,000	\$19,141,000

Status: Close Out: The final Notice of Completion was filed on September 24, 2007. *Original Architectural firm is re-engaged to address pending items.*

In Progress: *One change order is in the review process, and must be closed to arrive at DSA close out. Obtaining a Structural Engineer to address the final change order issue.*

Recently Completed: Resolved *addenda* and *five change orders*.

Focus: DSA Close-Out Consultant is engaged to work with the DSA to complete this effort.

2. LIFE SCIENCES PROJECT

Project Description: This project is a new two story building of 19,584 assignable square feet (ASF) and 30,267 gross square feet (GSF). The Life Science programs were relocated

from the A-400 building. The vacated building was demolished to make way for a new facility that will house Liberal Arts programs. The Life Sciences building, located on the south east portion of the Sciences Quad, consist primarily of lab classrooms and support space with some lecture classroom space and offices.

Start Preliminary Plans	Nov 2008	Award Construction Contract	April 2011
Start Working Drawings	April 2010	Complete Construction	March 2014
Complete Working Drwngs	June 2010	Advertise for FF&E	Sept 2013
DSA Final Approval	Dec 2010	DSA Close Out	May 2014

Budget Narrative: Budget reflects Board agenda action on 6/22/2004, 5/23/2005, 3/24/2008, 4/27/2009, 5/24/2010 and 6/17/2013. The original project budget totaled \$24,861,000. The project budget was reduced to \$20,490,000 when a lower-than-estimated bid was received and the state reduced their match to \$13,568,000. When the state indicated they may not have funds for their match, the Board allocated a portion of the state's short fall using basic aid funding for a funded total of \$17,410,000 with all overage returned to basic aid upon reimbursement.

	Original	Revision	Total
Project Budget:	\$24,861,000	\$ (4,371,000)	\$20,490,000
District Funding Commitment:	\$ 7,468,000	\$ (546,000)	\$ 6,922,000
Anticipated State Match:	\$17,393,000	\$ (3,825,000)	\$13,568,000
Basic Aid Allocation:	\$ 1,113,000	\$ 5,809,000	\$ 6,922,000

Status: Warranty: Final "first year discovery" items to be completed by end of the fiscal year. First year discovery projects include items discovered by the end users that are unrelated to warranty issues and that have been identified as necessary to have a fully operational facility.

In Progress: *Combining of "First Year Discovery" project with a college project to elicit a better contractor response.*

Recently Completed: *Draft of combined package with college project.*

Focus: Completion of "first year discovery" items. Final closeout of project budget.

3. BARRANCA ENTRANCE

Project Description: This project creates a new signalized entrance with vehicular, bicycle and pedestrian access including landscaping and leading to the college perimeter road from Barranca Parkway.

Start Preliminary Plans	Feb 2010	Award Construction Contract	May 2016
-------------------------	-----------------	-----------------------------	-----------------

Start Working Drawings	March 2011	Complete Construction	Jan 2017

DSA Final Approval	Dec 2012	DSA Close Out	Pending

Budget Narrative: Budget reflects Board agenda action on 4/27/2009. The current basic aid assignment of \$2,850,000 is considered sufficient to meet project costs.

	Original	Revision	Total
Project Budget:	\$2,850,000	\$0	\$2,850,000
District Funding Commitment:	\$2,850,000	\$0	\$2,850,000
Anticipated State Match:	\$0	\$0	\$0
Basic Aid Allocation:	\$2,850,000	\$0	\$2,850,000

Status: Construction Phase: 35% Complete. 95% of submittals have been reviewed. Inspection coordination with the City of Irvine and Irvine Ranch Water District is continuing.

In Progress: *Completion of irrigation system installation and procurement of street lighting and traffic signal equipment. Signal connection under Southern California Edison review with a potential for project delay.*

Recently Completed: *Construction of sidewalk and installation of road base material in preparation of asphalt pavement.*

Focus: Coordination with City of Irvine, Southern California Edison, Irvine Ranch Water District and the Irvine Company is continuing.

4. LIBERAL ARTS BUILDING PROJECT

Project Description: This project is a new two story building of 16,896 assignable square feet (ASF) and 27,787 gross square feet (GSF). The Social & Behavioral Science, Humanities & Languages, and Co-Curricular programs will be relocated from various campus locations. The Liberal Arts building, located at the northwest portion of the "A" quad, consist primarily of classrooms, a few labs and offices and gathering spaces at first and second floor lobby.

Budget Narrative: Budget reflects Board agenda action on 2/28/2011, 8/27/2012 and 6/17/2013. On 8/27/2012, the Board approved \$11,463,000 additional to fund the project

budget. Staff analyzed the budget identified in the Education and Facilities Master Plan and determined there was no allowance for equipment. On 6/17/13 the Board approved \$1,550,000 for furniture, fixtures and equipment.

	Original	Revision	Total
Project Budget:	\$ 3,004,951	\$10,008,949	\$13,013,000
District Funding Commitment:	\$ 3,004,951	\$10,008,949	\$13,013,000
Anticipated State Match:	\$ 0	\$ 0	\$ 0
Basic Aid Allocation:	\$ 1,000,000	\$12,013,000	\$13,013,000

Status: Construction Phase: 100% complete. Substantial completion reached on July 29, 2016.

In Progress: Final Pay application review.

Recently Completed: Punch list, warranty and M&O Manuals provided, final furniture install.

Focus: Final Pay application review.

5. FINE ARTS PROJECT

Project Description: The proposed project will construct a new complex of three buildings totaling 40,155 assignable square feet (ASF), 57,560 gross square feet (GSF) and will consolidate and expand space for the Fine Arts department. Art, Art History, Music and Dance instruction will be relocated from laboratories currently housed across a number of different buildings on campus. The Fine Arts building, located south west of the existing Performing Arts Center, will include an assembly space, labs and classrooms with some offices. Following occupancy space will be vacated within the B-100, B-300 and A-300 buildings setting the stage for future renovation.

Budget Narrative: Budget reflects Board action on 6/23/2014 and 8/22/2016. On June 23, 2014, the Board approved 795,000. On August 22, 2016, the Board approved \$1,659,739. The district revised the funding commitment from 30 to 50 percent of State supportable costs to increase project competitiveness for state funding.

	Original	Revision	Total
Project Budget:	\$35,703,000	\$ 2,053,000	\$37,756,000

District Funding Commitment:	\$10,562,000	\$ 8,316,000	\$18,878,000
Anticipated State Match:	\$25,141,000	\$ (6,263,000)	\$18,878,000
Basic Aid Allocation:	\$795,000	\$1,659,739	\$ 2,454,739
Unallocated Amount:			\$35,301,261

Status: The ballot measure for a 2016 state general obligation bond has been certified for the November 2016 election ballot and voters will have an opportunity to approve a \$9 billion state school bond with \$2 billion allocated to community colleges.

In Progress: State Chancellor's office submittal review for anticipated second year funding.

Recently Completed: Five Year Plan, Initial Project Proposals and Final Project Proposals (one each per college) submittal to state.

Focus: Projects statewide compete for funding using an objective, established point allocation system. The Fine Arts project has been evaluated for state funding since 2006 with no money assigned due to lack of funding. Current enrollments have resulted in reduced points and the project is less competitive than required to successfully compete for funding in the first round of distribution. Two additional *funding* rounds are projected to follow in two successive years. *However, there is recent speculation that the Governor will not release the bonds as designed, rather using a more gradual release of funds over a longer period of time.*

6. PARKING LOT PHASE IA AND SOLAR SHADE PROJECT

Project Description: This project includes development of a 135,000 square feet of lighted parking lot creating 400 additional parking spaces. The project proposes to include photovoltaic panels supported on parking canopies designed to generate up to one megawatt of solar power. The Photovoltaic System is to be integrated with the campus electrical system and interconnected with the local utility grid.

Start Preliminary Plans	Jan 2017	Award Construction Contract	Aug 2017

Budget Narrative: Budget reflects Board action on 6/23/2014, 6/22/2015 and 8/22/2016. On June 23, 2014, the Board approved \$3,010,000. On June 22, 2015, the Board approved \$90,000. On August 22, 2016, the Board approved \$3,655,000.

	Original	Revision	Total
Project Budget:	\$3,010,000	\$3,745,000	\$6,755,000

District Funding Commitment:	\$3,010,000	\$3,745,000	\$6,755,000
Anticipated State Match:	\$N/A	\$N/A	\$N/A
Basic Aid Allocation:	\$3,010,000	\$ 3,745,000	\$6,755,000

Status: Programming and Planning phase: 80% *complete*. Integration of *Solar Shade Structure* scope.

In Progress: Development of Design-Build project criteria is *continuing*.

Recently Completed: Kickoff meeting with criteria architect and user group. Preliminary parking lot layout is complete.

Focus: Development of Design-build project criteria *and Design-build RFQ & P documents*.

7. HEALTH CENTER/CONCESSIONS PROJECT

Project Description: This project is a new one story building of an estimated 2,553 assignable square feet (ASF), 3,730 gross square feet (GSF) dedicated to Health Center services, Sports Medicine, sports concession and toilet facilities. The Health Center will move from the existing Student Services building which will free space for renovation to meet the increased counseling requirements. The new Heath Center/ Concession building, located adjacent to athletics fields will consist of student support services, offices, restrooms and concessions. Additionally, bleacher seating for 300 seats will be constructed at the baseball field.

Recently Completed: *Kickoff meeting with criteria architect and user group.*

Focus: Development of Project Criteria and Design-build RFQ&P documents.

ATEP

1. ATEP DEMOLITION

Project Description: This project is for demolition of the facilities and infrastructure of the former Tustin Marine Corps Air Station is required to facilitate the development of the ATEP site. This project was undertaken in a number of phases, six are complete, with one additional required after the land exchange between the County and SOCCCD is complete. The schedule below reflects the most recently completed phase.

Start Preliminary Plans	Jul 2013	Award Construction Contract	Nov 2014
Start Working Drawings	Jul 2013	Complete Construction	Jul 2015
Complete Working Drawings	Apr 2014	Advertise for Equipment	N/A
DSA Final Approval	N/A	DSA Close Out	N/A

Budget Narrative: Budget reflects Board action on 4/22/2004 and 6/17/2013.

	Original	Revision	Total
Project Budget:	\$ 7,000,000	\$ 6,700,000	\$13,700,000
District Funding Commitment:	\$ 7,000,000	\$ 6,700,000	\$13,700,000
Anticipated State Match:	\$0	\$0	\$0
Basic Aid Allocation:	\$ 7,000,000	\$ 6,700,000	\$13,700,000

Status: Between demolition phases: Six demolition projects, which include removal of all ATEP building foundations, roads, parking lots and utility infrastructure are complete.

In Progress: Negotiations with the City and the Navy to transfer county land to district so the last phase of demolition can be completed.

Recently Completed: Land exchange between District and the County of Orange.

Focus: Adhere to various regulatory requirements specific to maintenance of the ATEP site. Complete County land exchange.

2. ATEP - IVC FIRST BUILDING

Project Description: This project is a new two-story 20,249 assignable square feet (ASF), 30,000 gross square feet (GSF) building dedicated to technical and applied sciences and economic development. The automation (HAAS), subtractive and additive 3-D sculpting labs, design model prototyping, electronics, photonics, electrical, engineering computer labs, alternative robotics classes, and the testing center will be located from the existing ATEP classrooms and from the IVC campus with some spaces representing expansion. The space vacated at the ATEP campus will terminate the temporary lease with the City of Tustin. The space vacated at the IVC campus at the A300 and B300 building will become available to meet additional curriculum needs. The new ATEP IVC First Building, located in the north east portion of the ATEP campus, will consist of primarily lab classrooms and support spaces, with some lecture classroom space, offices and student support services. The project includes 50kW of solar electric power and will be a LEED Gold Equivalent building.

Start Preliminary Plans	Oct 2014	Award Construction Contract	June 2015

Budget Narrative: Budget reflects Board action on 2/28/2011, 6/23/2014, 6/22/15 and 8/22/2016. On February 28, 2011, \$12,500,000 was originally allocated to the Phase 3A project budget and transferred to the IVC ATEP First Building with \$8,950,000 additional funds approved on 6/23/14. On June 22, 2015 the Board approved additional funds of \$3,250,000 for associated parking. On August 22, 2016, the Board approved the FF&E budget of \$1,600,000. The College has elected to use Irvine Valley College RDA equaling \$1,400,000.

	Original	Revision	Total
Project Budget:	\$23,000,000	\$ 3,300,000	\$27,700,000

College Contribution:	\$0	\$ 1,400,000	\$ 1,400,000

Status: Construction phase: *2% complete.*

In Progress: *Building foundations and under slab utility installation.*

Recently Completed: *Site grading and foundation preparation.*

Focus: *Final review of project Audio Visual and IT components and begin furniture selection process.*

3. ATEP – UTILITIES AND INFRASTRUCTURE

Project Description: This project is a utilities and infrastructure project required to support construction of the ATEP IVC First Building as well as support future development. Utility and infrastructure construction will be phased with phase 1 including the site utility infrastructure, utility laterals to offsite points of connection and development of vehicular, bicycle and pedestrian circulation. This phase 1 utility and infrastructure project will address improvements at the north east and a small central portion of the ATEP campus.

Basic Aid Allocation:	\$7,000,000	\$0	\$7,000,000

Status: Bid and Award

In Progress: *Coordination with Irvine Ranch Water District for plan approval.*

Recently Completed: Receive construction bids and prepare award. *Approval of grading permit by the City of Tustin.*

Focus: Construction coordination between Infrastructure, IVC First Building and City of Tustin Victory Road contractors.

DISTRICT WIDE

1. 20 YEAR FACILITIES, RENOVATION AND SCHEDULED MAINTENANCE FACILITIES SYSTEM

Project Description: This project is a districtwide facilities condition assessment including building and site assessments and associated cost models for repair costs and a prioritized list of projects. Building assessments were completed in advance of site assessment. Building assessment includes a system level review of all buildings located at the

Saddleback and Irvine Valley colleges. Systems include mechanical, electrical, plumbing, elevators, building envelope, and finishes including a detailed analysis of mechanical components. Site assessment includes pavement, fencing and walls, signage, stadiums and playing fields, trees, landscaping, water supply, sanitary sewer system, storm water system, heating and cooling distribution systems, fuel and electrical distribution, communication distribution systems and site lighting.

Anticipated State Match:	\$N/A	\$N/A	\$N/A
Basic Aid Allocation:	\$ 732,744	\$ 396,256	\$1,129,000

Status: Building Assessments and associated report are complete. Site assessments surveys are complete and final report has been distributed. *This item will be removed from future Board Facilities Reports.*

In Progress: Final reports have been submitted and are loaded on District SharePoint site.

Recently Completed: Consultant submittal of final report.

Focus: Acceptance of final reports.

2. DISTRICTWIDE SUSTAINABILITY/ ENERGY PLAN

Project Description: This project develops a Sustainability/Energy Plan to support the colleges' plans for future sustainability/energy projects and to assist with the development of the ATEP site. Additionally, the study will advise the campuses on best practices, help take advantage of programs such as, Savings by Design, and recommend procurement methods for various sustainability projects. This information anticipates the upcoming Education and Facilities Master Plan process.

Status: Award is recommended at this November Board meeting.

In Progress: Board recommendation and if approved, contract execution.

Recently Completed: Proposal evaluation and recommendation.

Focus: Execute contract, engage college committee(s).

3. ADA TRANSITION PLAN

Project Description: This project includes site accessibility compliance audits to provide the basis for identification, prioritizing, budgeting and implementation of plans to assist the District in developing Americans with Disabilities Act (ADA) Transition Plans. The project includes assessment of barriers to access, summary of costs for remediation, implementation schedules with prioritization and standard drawings for remediation methods. This information anticipates the upcoming Education and Facilities Master Plan process.

Budget Narrative: Budget reflects Board action on 6/22/2015. On June 27, 2016, the Board approved \$440,000.

Project Budget:	Original \$400,000	Revision \$440,000	Total \$840,000
District Funding Commitment:	\$400,000	\$440,000	\$840,000
Anticipated State Match:	\$	\$	\$
Basic Aid Allocation:	\$400,000	\$440,000	\$840,000

Status: Completing development of transition plan.

In Progress: *Final prioritization of issues identified during surveys and completion of Transition Plan.*

Recently Completed: *Analysis of survey data and draft Transition Plan.*

Focus: Completion of transition plans.

Project updates for active projects may be viewed at:

<http://www.socccd.edu/businessservices/ProjectUpdates.html>.

Notes

- Schedule Table: Bold dates in the schedule table indicate actuals. Items that are not bold indicate anticipated dates.
- Budget Table:
 - When state matches are identified, the project budgets reflect the allocated state match as reported in FUSION for the latest planning year. (FUSION is the State Chancellor's Office database for Capital Outlay.)
 - The "Revisions" column for the State Match category includes changes due to escalation and changes that may have occurred to the state's percentage (i.e. going from an 80% match down to a 70% match and so on as the economy changes) from the original project approvals to current date. The "Revisions" column for the Basic Aid Allocation will show a total variation to date taking into account both increased and decreased basic aid allocations.
 - The Unassigned category identifies an underfunded budget.
- The Budget Narrative paragraph for each project discusses the history of change to all category amounts over the life of the project.

TO: Board of Trustees

FROM: Debra L. Fitzsimons, Interim Chancellor

RE: SOCCCD: Monthly Financial Status Report

ACTION: Information

BACKGROUND

Monthly General Fund financial reports (EXHIBIT A) are provided to the Board of Trustees to keep members regularly informed of current information and provide an alert to any significant changes in the projected year ending balance. These reports provide district-wide and college financial information.

STATUS

The reports display the adopted budget, revised budget and transactions through October 31, 2016 (EXHIBIT A). A review of current revenues and expenditures for FY 2016-2017 show they are in line with the budget.

RE: SOCCCD: Quarterly Investment Report

ACTION: Information

BACKGROUND

Senate Bill Number 564 added Government Code Section 53646 requiring the local agencies in California, including educational institutions, to render a statement of investment policy to their local governing Board on an annual basis. In addition, a quarterly report in compliance with the investment policy is to be rendered to the governing Board with respect to the agency's investments. The Board approved the District's investment policy on September 16, 1996, and since then, quarterly reports have been rendered for the Board's information.

STATUS

As of the quarter ending on September 30, 2016, our cash balances were \$256,379,568.40 in the Orange County Investment Pool (OCIP), and the OCIP investment pool is yielding an average of 0.74% compared to prior quarter of 0.75%.

The cash balances for the Local Agency Investment Fund (LAIF) Pooled Investment were \$26,198,109.68, and the LAIF investment pool is yielding an average of 0.60% compared to prior quarter of 0.55%.

Both pools are highly liquid, with overnight wire transfers available upon request

RE: SOCCCD: Quarterly Pension Stabilization Trust Fund
ACTION: Information

BACKGROUND

In March, 2016 the SOCCCD Board of Trustees authorized the District to join the California Public Entity Pension Stabilization Trust to set aside funds to offset the cost increases related to the STRS and PERS retirement systems pension liabilities. The trust was established with the Benefit Trust Company and Morgan Stanley as the registered investment advisor.

STATUS

This report is for the period ending September 30, 2016 (EXHIBIT A). The portfolio is entirely invested in fixed income mutual funds. The portfolio's performance increased 1.19%, ending with a fair market value of \$14,817,905 and an annualized return of 1.19%.

Re: South Orange County CCD Pension Stabilization Irrevocable Trust

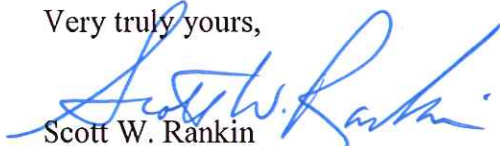

With a fair market value on September 30th of \$14,817,905.01 your portfolio's performance was up 1.19% for the quarter and up 1.19% on an annualized basis since the June 16, 2016 inception date net of program fees.

Your portfolio is entirely invested in fixed income mutual funds. It was designed to be invested over a short time frame. Deposits include the initial contribution of \$14,500,000 on June 16, 2016. Below is the performance of your portfolio for various time frames since inception.

<u>Performance</u>	<u>3rd Quarter 2016</u>	<u>Annualized Since Inception</u>
South Orange CCCD PST	1.19%	1.19% annualized return
Barclays Aggregate	0.46%	0.46% (Domestic Bonds)
Barclays Global	0.81%	0.81% (Global Bonds)

Very truly yours,

Scott W. Rankin
Senior Vice President

Pension Stabilization Trust

IVC Attends PromiseNet 2016 Conference

On October 24-26, IVC sent a delegation to Washington, D.C. that included Vice President for Student Services Dr. Linda Fontanilla, Director of Student Life and Equity Programs Anissa Heard-Johnson, Professor of Biology and IVC Academic Senate President, Dr. Katherine T. Schmeidler, Acting Director of Outreach and Recruitment Dennis Gordon, and Research Analyst Jared Lessard to attend the PromiseNet 2016 Conference. IVC, Saddleback and other community colleges from around the nation, came together to learn more about PromiseNet and the College Promise Campaign. The conference brought together practitioners, policymakers, and researchers to identify strategies to build and implement an effective Promise Program. The training emphasized strong support from local communities through donations and collaboration with a focus on educating community members, keeping local graduates employed within their communities, and building a strong economic development model. The three-day conference offered keynote messages from speakers including: Dr. Martha J. Kanter, Executive Director of the College Promise Campaign; Eloy Ortiz Oakley, incoming Chancellor of the California Community Colleges; Janice Brown, Executive Director Emeritus of the Kalamazoo Promise Program, one of the largest programs in the country; and Roberto Rodriguez, White House Domestic Policy as Deputy Assistant to the President for Education.

IVC Hosts Orange County Women Veterans Leadership Summit

On November 4, Irvine Valley College (IVC) hosted the Orange County Women Veterans Leadership Summit. The summit offered women veterans a day of inspiration and empowerment as they transition from service to civilian life. Guest speakers included Congresswoman Mimi Walters, Wes Beavis, PsyD, and Dr. Miatta Snetter. The day also featured a fashion show in which veterans modeled clothing by Trina Turk, as a way to further help women veterans acclimate to civilian life. Veterans resource organizations were also on hand to provide additional support to women veterans.

Diversity and Equity Retreat

On November 4-6, the Office of Student Life and Equity Programs held a diversity and equity retreat for students at the Griffith Park Boys Camp in Los Angeles. The retreat was open to 80 students through an application process and was designed to help participants learn cultural competency skills to work and live with all people.

IVC Transfer Fair

On November 9, the IVC Transfer Center held its second transfer fair of the fall semester. Over 30 colleges and universities, including California State Universities, University of California campuses, private and out-of-state institutions participated in the transfer fair. Students were able to speak with institution representatives to discuss their transfer opportunities.

IVC's Administration of Justice Club Hosts Conference

Members of the Administration of Justice club (Chi Tau Epsilon – XTE) recently hosted the American Criminal Justice Association – Lambda Alpha Epsilon Region 1 conference in Ontario, CA. Seventy-five students and advisors attended the conference representing institutions including: Boise State University, Cal State University Los Angeles, Fresno State, Long Beach Community College and Sacramento State University. XTE planned and coordinated several competitions that were held in conjunction with the conference including firearms, physical agility, crime scene investigation, and written academic tests, as well as set up educational speakers for the conference. Twelve IVC students were accompanied by club advisor Monty Mauney and Firearms Coach Ted Falencki, Jr. at the conference. Students included Sara Allen, Haniel Choi, Jason Chung, Sorrel Dumas, Geoffrey Goble, Parker Grinde, Alexis Marroquin, Sergeant at Arms Kia Golbad, XTE Secretary Lauren Goeres-Hill, XTE Treasurer Sabrina Mendoza, XTE President President, and XTE Vice President Kenneth Tran.

TO: Members of the Board of Trustees
Dr. Debra L. Fitzsimons, Interim Chancellor

FROM: Dr. Tod A. Burnett, President

SUBJECT: Report for November 14, 2016 Board of Trustees Meeting

The President's State of the College Breakfast was held on Friday, October 28th, with more than 75 guests in attendance to hear about the college's top 10 goals for the year, the College Promise, new transfer data, and other college priorities. The guests included local elected officials, representatives of business and industry, and college administrators and faculty. Assembly Member Bill Brough provided remarks. Thank you to trustees Tim Jemal, Dr. Jim Wright, Dr. Barbara Jay, and Marcia Milchiker for attending the breakfast

The K-12 Partnership Breakfast was held on Wednesday, October 24th. Capistrano Unified School District Superintendent Kirsten Vitale and Saddleback Valley Unified School District Superintendent Clint Harwick both offered remarks and stated their appreciation of their partnerships with Saddleback College and President Burnett. More than 75 K-12 school administrators were in attendance.

Family Night will be held on Tuesday, November 15th. Coordinated by the outreach department, Family Night provides high school students and their families an opportunity to come to the college and learn about transfer opportunities, financial aid, and other college resources. Faculty will be on hand to provide information on their academic programs.

The following college administrators attended the Promise Net 2016 conference in Washington, DC: Dr. Juan Avalos, Carol Hilton, Dr. Georgina Guy, Dr. Cadence Wynter, Dr. Estella Castillo-Garrison, Dr. Jeanne Harris-Caldwell, and John Jaramillo. PromiseNet is a convening of practitioners, policymakers, and researchers to learn more about the College Promise movement, and enabled discussions around local place-based scholarship programs, community economic development models, and efforts underway to replicate and scale the College Promise with state and federal support. A principle of the College Promise is to "make the first two years of community college – at a minimum – as universal, free, and accessible as public high schools has been in the 20th century". The conference was attended by nationwide leaders, professionals and residents and multiple sessions provided an opportunity to learn more about how to start and maintain a successful College Promise program.

Office of Instruction

The Music Department offered free events in November starting with a Concert Hour performance by the Mike Baggetta jazz trio from New York on November 10th in the McKinney Theatre; a master class with concert violinist Iryna Krechkovsky on November 18th in Fine Arts 101, and a free concert outside in the Fine Arts courtyard by our commercial music ensembles on November 28th. On November 3rd through the 6th, the Department of Theatre Arts presented an uproarious comedy *You Can't Take it With*

You in the McKinney Theatre. On November 13th, Keyboard Studies presented *The Art of Music...and the Music of Art* with concert pianist Jennifer Hayghe in the McKinney Theatre to an appreciative audience of art and music enthusiasts. On November 17-19, Deidre Cavazzi presented WinterDance in the McKinney Theatre. On November 21st, the Speech Department presented their annual Speech & Debate Fundraiser Showcase in the McKinney Theatre. On November 28th, the Jazz Lab Ensemble presented a concert featuring original compositions and arrangements.

The journalism department held an open house on November 2nd.

Orientations were held on the Oxford, England, and Cuba study abroad programs.

The anthropology department presented a talk entitled, "Exiled Home: Salvadoran Transnational Youth in the Aftermath of Violence," on Wednesday, November 9th. Drawing on interviews with one-and-a-half and second generation Salvadoran immigrant youth, this talk detailed the ways that the Salvadoran civil war and emigration to the United States intervened in these young people's lives, as well as the strategies through which youth have sought to overcome such ruptures. The speaker was Dr. Susan Coutin, a professor of anthropology and criminology, law, and society at UC Irvine.

Office of Student Services

Veterans Week was held November 7th through November 10th. A field of flags commemorating those who have served in the U.S. Military was on display. The Veterans Student Council hosted a "vet talk" event to educate students on the veteran experience. Student enjoyed a combat fitness course, a barbecue, and a Marine Corps birthday cake cutting ceremony.

External Affairs

The foundation has seen dramatic growth in fundraising since 2012: Assets have grown from \$4,952,376 to \$11,072,491; Endowments have grown from \$3,063,457 to \$8,297,204; Scholarships have grown from \$232,000 to \$793,719; Revenues have grown from \$1,769,803 to \$3,573,648; Gross proceeds for the Gala have risen from \$65,000 to \$162,000; and net proceeds from \$27,642 to \$106,000.
