

ADMINISTRATIVE REGULATION

7336

SOUTH ORANGE COUNTY
COMMUNITY COLLEGE DISTRICT

HUMAN RESOURCES

CERTIFICATION OF FREEDOM FROM TUBERCULOSIS

Except as provided herein, no person shall be initially employed by the District in an academic or classified position unless the person has within the last 60 days submitted to a tuberculosis risk assessment developed by the State Department of Public Health and the California Tuberculosis Controllers Association and, if risk factors are present, an examination to determine that they are free of active tuberculosis, by a physician licensed under the California Business and Professions Code. This examination shall consist of an X-ray of the lungs, or an approved intra-dermal tuberculin test, that, if positive, shall be followed by an X-ray of the lungs. This examination is a condition of initial employment.

Employees, prospective employees, and volunteers (if applicable) have the option of taking a tuberculosis test in either of the colleges' Student Health Centers free of charge, or, they may go to their own licensed physician to have the test conducted at the individual's own expense and have the physician provide the District with certification that the individual is free of tuberculosis. If the testing is done by the District, the individual will sign a Consent/Release Form, which allows the Student Health Center department to give the results to District's Human Resources.

The X-ray film may be taken by a competent and qualified X-ray technician if the X-ray film is subsequently interpreted by a physician licensed under the Business and Professions Code.

District Human Resources may exempt, for a period not to exceed 60 days following termination of pregnancy, a pregnant employee from the requirement that a positive intra-dermal tuberculin test be followed by an X-ray of the lungs.

Employees, prospective employees, and volunteers (if applicable) who are skin test negative, or were not tested because of a lack of risk factors, are required to undergo the foregoing tuberculosis risk assessment and, if risk factors exist, examination at least once every four years upon recommendation of the local health officer for so long as the employee remains skin test negative. Once an employee has a documented positive skin test that has been followed by an X-ray, the foregoing tuberculosis risk assessments and examinations shall no longer be required and referral shall be made within 30 days of completion of the examination to the local health officer to determine the need for follow up care.

If risk factors were present at the tuberculosis risk assessment and an examination occurs, after the examination, an employee shall ensure the District receives a certificate from the examining physician showing the employee was examined and found free from active tuberculosis.

This regulation shall not apply to any employee of the District who files an affidavit stating that they adhere to the faith or teachings of any well-recognized religious sect, denomination, or organization and in accordance with its creed, tenets, or principles depends for healing upon prayer in the practice of religion and that to the best of their knowledge and belief they are free from

active tuberculosis. If at any time there should be probable cause to believe that the applicant is afflicted with active tuberculosis, they may be excluded from service until District Human Resources is satisfied that they are not so afflicted.

A person who transfers their employment from another school or community college District shall be deemed to meet the requirements of this procedure if the person can produce a certificate that shows that they within the past four years had a tuberculosis risk assessment that showed no risk factors were present or was examined and was found to be free of communicable tuberculosis, or if it is verified by the college previously employing them that it has a certificate on file that contains the information required.

A person who transfers their employment from a private or parochial elementary school, secondary, or nursery school to the District shall be deemed to meet the requirements of this procedure if the person can produce a certificate as provided for in Health and Safety Code Section 121525 that shows that they within the last four years had a tuberculosis risk of assessment that showed no risk factors were present or was examined and was found to be free of communicable tuberculosis, or if it is verified by the school previously employing them that it has the certificate on file.
